

# **SYLLABUS**

## **CVR 7700**

### **PRESENTATION, EVALUATION, & PUBLICATION OF CLINICAL VISION RESEARCH**

#### **Course Description**

This course prepares the student to effectively organize and design a presentation, critically prepare, analyze, and disseminate clinical or basic research information. The course is composed of on-line lectures, discussions, and independent practice. Initially, emphasis is placed on the factors necessary to make scientific presentations on topic within vision science and vision related health care.

Specifically, the student will learn the requirements of each part of a research manuscript, the preparations of research poster and oral presentation for scientific meetings, and the basics of manuscript submission and publication. Discussions and homework assignments following each chapter will help the student to understand the basic concepts mentioned above.
