You must register for access the first time you use MDConsult. You will set up your own user name and password. After that, sign in using the boxes above.

Important features: Medline search, daily updates, select full text, online textbooks, “What your patients are reading,” practice guidelines, patient handouts, drug updates, CME units, “Case of the week.”
Start your search by typing a keyword or selecting Advanced Search or search within a specific field by selecting one of the tabs.

MDConsult is a user-friendly program. Within each of the sections (advanced search, Books, Drugs, etc.) there is a help screen to guide you and give you tips on using that feature.
