

How to get a link for media

- Navigate to your 'My Media' page.
- Select the item that you would like to link to or embed and open it.
- After the media page has loaded, click the 'Share' button under the player.
- Two tabs will load with the link and embed code.
- For a link:
 - Copy the link in the text box and paste it where ever you are sharing it.
 - This requires that the media be published or unlisted.
If the media is only published to a channel, the only users who can view that channel can view the media from the link.
