Health Reference Center Academic
ScienceDirect

Technology/ Computer Science:

ACM Digital Library
Computer Abstracts International
Computer & Information Systems Abs.
IEEE Computer Society Digital Library
Applied Science & Technology Full Text
Compendex (engineering)
ScienceDirect

Search the databases that were created for your degree or discipline, or are focused on a particular area, and then search other related databases.

No database contains 100% full text. They list many sources that show the citation information and abstract, but do not link to the actual source. See the handout *Finding Full Text Materials*, or visit the library Web (<http://www.nova.edu/library/help/>) site for additional assistance in retrieving materials.

If you are looking for a specific type of material (tests, dissertations, etc.) use the listing on the back of this paper to begin your search.

Access databases through the Alvin Sherman Library Web page – select electronic resources, databases and log in. Find databases by subject or name.

Databases by Material Type

Tests / Measurements / Instruments

Mental Measurements Yearbook –reviews and information about test publishers

ERIC database – articles and ERIC Ed documents with tests used in specific studies

PsycINFO database – articles and dissertations with tests used in specific studies

Dissertations and Theses-ProQuest – dissertations with specific test used in studies

HAPI (Health and Psychosocial Instruments) – Information about measurement instruments in healthcare, psychosocial sciences, organizational behavior

Dissertations / Theses

Dissertations and Theses-ProQuest

MARPS, Practicums and Applied Dissertations Database (NSU)

WorldCat

ERIC database (focus on education)

PsycINFO database (focus on psychology/behavioral sciences)

Conference and Proceedings Papers

ACM Digital Library (focus on technology and computer science)

Conference Papers Index (focus on life and environmental sciences)

PapersFirst (all subjects)

ProceedingsFirst (all subjects)
