Proceedings of the 11th International Coral Reef Symposium, Ft. Lauderdale, Florida, 7-11 July 2008
Session number XX

This is the title for my paper. The style is Arial 16 point, bold, single-spaced. And words are all in lower case

U. Author[1], B.U. Author[2], C.U. Author[3]

1) Excellent University, Coral Reef Center, 200 N. Azure Drive, Lagoon, Reef City 2025, Reefland
2) Even Better University, Inst. Oceanography, 25 Wave Drive, Lagoon, Reef City 2025, Reefland
3) The Best University, Inst. Appl. Mathematics, 25 Brain Loop, Reef Crest, Reef City 2037, Reefland

Abstract. The abstract is limited to 200 words, and must be block-set, in a single column, in 10-point Times New Roman. This demonstration abstract contains exactly 200 words, so you should all have enough space when using up your 200. In the address line, please try and only use a single line for each address. You can achieve this by using abbreviations. It makes the layout look more coherent. The following is just blind text and is to be ignored. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text, lalalallal. Blind text, blind text,. Blind text, blind text. Blind text, blind text.

Key words: Abstract, Blind text, lalallal.

Introduction

Should you wonder how to get the line underneath the Key words: there is a button for this in your toolbar. It looks like a big square consisting of four little squares. You also find it under "format" "Borders and Shading".

Please indent the first line of each paragraph. You can adjust the distance of indentation on the ruler right above your text. Put the slider to the first tick. What follows now is just blind text to fill space.

Three incredibly smart folks got together and produced a paper that will blow everybody away because the information contained herein is so phantastic and new that nobody would have ever even dreamt of anything even remotely close to this and, in any case, even if anybody had even dared dream as far as the three smart folks have gone in their paper they would have never achieved anything remotely close to this astonishing effusion of scientific competence, farsightedness and applicability to the burning questions of our time. The rest of this text will of course fall pitifully short of anything even remotely intelligent and I sincerely hope that none of you will bother reading the empty blabla that is squeezed into these lines simply in order to demonstrate what the format should look like. In any case, there are another few lines to fill before we can start with the next section, therefore, I am required to add a few extra words at the end of this sentence.

Material and Methods

Please note that the heading is not indented. Make sure to get rid of any automatic indentation when you get to a heading or the first line of text underneath that heading. That should not be indented. If you accidentally (or, even worse, willfully) indent the first line, your editor will frown upon you...

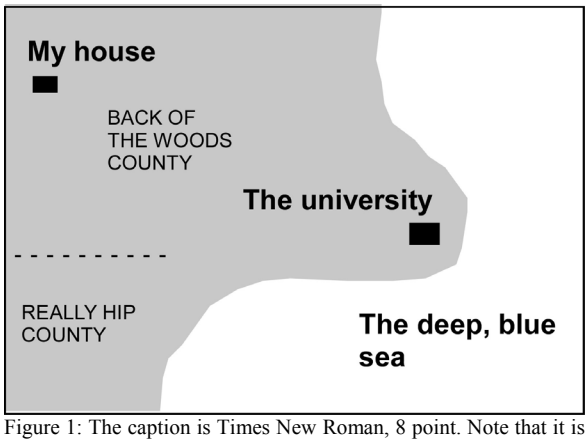

Figure 1: The caption is Times New Roman, 8 point. Note that it is "Figure", not "Fig.". In the text body, please refer to a "Fig. 1" etc. You can have half-tones, but no color! Files should be eps or tiff, these embed and resolve best.

And now we continue with text and describe lovely Back of the Woods County and why the coral reefs grow better there than anywhere else. This, of course, is not so straightforward, so we had to spend a lot of

time and money to find at least something out. And this leads us straight into the results.

Results

Note that this first line is not indented. This section is just your regular results section with graphs and all that smart analysis that goes into here. We will just fill space with a lot of blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text.

When you come to the next paragraph, please don't forget to indent it! Gosh, these editors are a pain and just make life complicated. But at least it'll look good when it's all said and done.

When you come to the next paragraph, please don't forget to indent it! When you come to the next paragraph, please don't forget to indent it! When you come to the next paragraph, please don't forget to indent it!

And now we refer to underneath regression (Fig. 2).

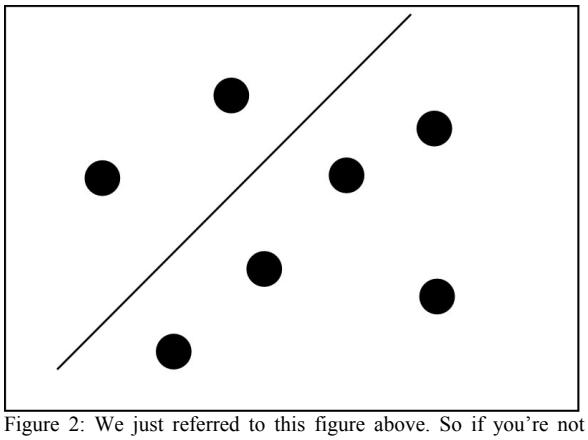

Figure 2: We just referred to this figure above. So if you're not certain how to call out your figures in the text, please read the sentence immediately above the figure.

Note that this sentence gets indented, because it is not the first one of a section and also not a caption. And now, more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text.

Discussion

Everybody knows what comes next. Go ahead, explain the world. Just try to be brief. Remember: you only have 5 pages in total. And now more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text. blind text, blind text, lalalalalala, blind text blind text and even more blind text.

Acknowledgement

The session chairs and editorial team really appreciate the effort expended by the authors to adhere to the formatting guidelines. In any case, if you don't format your paper correctly, it will be returned to you and you might not keep the deadline. So let's all work together to make this as little painful as possible. And all this is said in Times New Roman, 8 point. Oh yes, and we really appreciate the tax money that supports so many of us via grants and positions. And should some wealthy dude/dudette have supported our work via a foundation, then more power (and money) to him/her.
