Senior Research Associate - Outcomes Research

Successful candidates for our Senior Research Associate position will play a critical role in supporting managers and directors in designing and analyzing pharmacoeconomic, quality of life, and patient satisfaction studies. We are looking for a highly motivated researcher who wants to develop his/her international career in outcomes research. Applicants will have a degree in social science or health related field, knowledge of literature research methodology and qualitative and quantitative analysis methods; knowledge of patient reported outcomes methodology and/or a strong foundation in health economics; and a minimum of 3-4 years related work experience. Strong writing and analytical skills are required. The Senior Research Associate role will gain project management experience by leading small studies. There is a travel component to the position. Key responsibilities will include:

- Collect data from patients by interview or questionnaire administration
- Assist in the qualitative analysis of data
- Assist in the writing of reports
- Assist in the preparation of presentations for scientific conferences and client meetings
- Literature reviews and survey work
- Data abstraction for economic evaluations
- Development of patient based questionnaires
