### **QUALITY OF LIFE**

The mission of the NSU Quality of Life (QOL) Council is a simple one: take the most serious problems affecting the quality of life in Broward County, bring the best minds of NSU's faculty members, students, and community providers to bear, and the results will be a better quality of life for Broward County. Through the efforts of the university's president and its trustees, as well as community organizations, funds have been targeted to support faculty scholarship in applied research to improve the quality of life in Broward County. These funds are awarded in the following five categories: Autism; Adults, Children, and Families; Criminal Justice; Elderly Services; and Foster Care.

# PRESIDENT'S FACULTY RESEARCH AND DEVELOPMENT GRANT

The President's Faculty Research and Development Grant (PFRDG) Program, established in 1999, was designed to bring recognition and funding to the university's faculty members as they attempt to secure resources in support of research activities. This innovative internal granting initiative is designed to provide seed funds for potential research projects. The ultimate goals are to publish the results for the common good, enrich students' education experiences, and leverage preliminary results to pursue and acquire additional funding from external sponsors.

# **VISION 2020**

By 2020, through excellence and innovations in teaching, research, service, and learning, Nova Southeastern University will be recognized by accrediting agencies, the academic community, and the general public as a premier, private, not-for-profit university of quality and distinction that engages all students and produces alumni who serve with integrity in their lives, fields of study, and resulting careers

### **MISSION**

The mission of Nova Southeastern University, a private, not-for-profit institution, is to offer a diverse array of innovative academic programs that complement on-campus educational opportunities and resources with accessible distance-learning programs to foster academic excellence, intellectual inquiry, leadership, research, and commitment to community through engagement of students and faculty members in a dynamic, lifelong learning environment.
