Notice: Credits and degrees earned from colleges within the state of Florida that are licensed by the State Board of Independent Colleges and Universities do not automatically qualify the individual to participate in professional examinations in Florida. The established procedure requires the appropriate state professional board to review and recognize the colleges granting the degrees prior to scheduling examinations. Additional information regarding Nova Southeastern University Health Professions Division and its Colleges of Osteopathic Medicine, Pharmacy, Optometry, Health Care Sciences, Medical Sciences, Dental Medicine, and Nursing may be obtained by contacting the State Board of Independent Colleges and Universities, Department of Education, Tallahassee, Florida. Any student interested in practicing a regulated profession in Florida should contact the Department of Business and Professional Regulation, 2009 Apalachee Parkway, Tallahassee, Florida 32311.

This catalog is for information purposes only and does not represent a contract. Information contained herein is subject to change at any time by administrative decision or the direction of the NSU Board of Trustees.

Accreditation
Nova Southeastern University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate’s, baccalaureate, master’s, educational specialist, doctorate, and professional degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Nova Southeastern University.

Notice of Nondiscrimination
Consistent with all federal and state laws, rules, regulations, and/or local ordinances (e.g., Title VII, Title VI, Title III, Title II, Rehab Act, ADA, and Title IX), it is the policy of Nova Southeastern University not to engage in any discrimination or harassment against any individuals because of race, color, religion or creed, sex, pregnancy status, national or ethnic origin, nondisqualifying disability, age, ancestry, marital status, sexual orientation, unfavorable discharge from the military, veteran status, or political beliefs or affiliations, and to comply with all federal and state nondiscrimination, equal opportunity, and affirmative action laws, orders, and regulations.

NSU admits students of any race, color, religion or creed, sex, pregnancy status, national or ethnic origin, nondisqualifying disability, age, ancestry, marital status, sexual orientation, unfavorable discharge from the military, veteran status, or political beliefs or affiliations, and does not discriminate in the administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other school-administered programs.

As president of Nova Southeastern University, I am honored by your interest in learning this extraordinary educational institution and our approach to higher education.

This is a very exciting time for NSU. With the university's golden anniversary behind us, all eyes are set on our bright future, helping our students achieve the power of their potential. To facilitate this, construction on NSU's $80-million, 218,000-square-foot Center for Collaborative Research (CCR) is on-schedule to be completed this year. The CCR will house top researchers working in state-of-the-art wet labs. In addition, as a precursor to a future major teaching/research hospital, HCA East Florida has built an emergency room on our Davie campus that will provide both educational and clinical opportunities for our students, while providing much-needed health care services to the community.

As a prospective student in our prestigious Health Professions Division, you have the opportunity to learn from an array of professors from different backgrounds with a variety of real-world experiences. At NSU, your learning can and will go beyond the classroom through simulation labs, clinical rotations, research, medical missions, community service, and internships. Students have the opportunity to work with faculty members conducting research in areas including cardiovascular disease, anti-cancer therapies, chronic fatigue syndrome, autism, coral reef restoration, stem cells, and wildlife DNA forensics, among other subjects. The university has been recognized as a research university with “high research activity” by the Carnegie Foundation for the Advancement of Teaching, and you can be part of that.

Whether you are looking to become a physician, dentist, optometrist, pharmacist, nurse, or audiologist, or plan to pursue one of the many other exciting health care degrees we offer at various levels, I invite you to learn more about NSU and how we can help prepare you for success on your unique career path.

We look forward to a lifelong partnership with you.

George L. Hanbury II, Ph.D.
NSU President and Chief Executive Officer
Letter from the NSU Executive Vice President for Academic Affairs and Provost

Welcome, and congratulations on your acceptance to the Health Professions Division of Nova Southeastern University. We have developed an array of health programs at NSU that will enhance your learning experiences and prepare you for interesting and fulfilling careers in the health fields.

At NSU, your success is our success. We are committed to supporting your academic, physical, financial, and social needs through a comprehensive set of services that are in line with our mission and core values. The Health Professions Division’s distinguished faculty members are dedicated to helping you obtain the skills and knowledge you need to begin or advance your career. Their cutting-edge research, clinical skills, and commitment to academics are a valuable resource to support you on your educational journey.

We look forward to working with you as you pursue your academic studies and prepare to become health care professionals.

Ralph V. Rogers, Ph.D.
Executive Vice President for Academic Affairs and Provost
For the more than 9,400 full-time students who are currently enrolled in the 50-plus academic programs that comprise NSU’s Health Professions Division, the future is indeed bright.

For those seeking multifaceted and interprofessional educational opportunities, NSU’s Health Professions Division offers degree programs in various aspects of health care through its seven colleges. Currently, the Health Professions Division comprises the Colleges of Osteopathic Medicine, Pharmacy, Optometry, Medical Sciences, Dental Medicine, Health Care Sciences, and Nursing.

NSU is at a very exciting point in its history. As we continue to enhance our educational offerings and establish a significant research environment, our national prominence will be perpetually enhanced. The significance of these advancements will be of tremendous value to you in the future. As a result, we will continue to attract exceptional students to our programs and recruit additional first-rate faculty members and researchers to teach and prosper in our colleges.

In addition, because our educational paradigm is so academically and technologically robust, our students are aware and appreciative of the fact that we’ve provided them with the knowledge and skills they will need to become compassionate and dedicated health care professionals.

**Vision 2020 Statement**

By 2020, through excellence and innovations in teaching, research, service, and learning, Nova Southeastern University will be recognized by accrediting agencies, the academic community, and the general public as a premier, private, not-for-profit university of quality and distinction that engages all students and produces alumni who serve with integrity in their lives, fields of study, and resulting careers.

**Nova Southeastern University Mission Statement**

The mission of Nova Southeastern University, a private, not-for-profit institution, is to offer a diverse array of innovative academic programs that complement on-campus educational opportunities and resources with accessible, distance-learning programs to foster academic excellence, intellectual inquiry, leadership, research, and commitment to community through engagement of students and faculty members in a dynamic, lifelong learning environment.

**Core Values**

The Vision 2020 Statement, Mission Statement, and Core Values were adopted by the NSU Board of Trustees on March 28, 2011.
Health Professions Division Mission Statement

The mission of the Nova Southeastern University Health Professions Division is to train health practitioners in a multidisciplinary setting, with an emphasis on medically underserved areas.

The institutional premise is that health professionals should be trained in a multidisciplinary setting and, whenever possible, with integrated education. The university trains students in concert with other health profession students so that the various disciplines will learn to work together as a team for the good of the public’s health. During their didactic work, students share campus facilities and, in some cases, have combined classes. In their clinical experiences, they work together in facilities affiliated with the university.

The division aims to educate health care practitioners who will eventually increase the availability of health care to alleviate health care shortages. The division aims to mitigate some of these shortages by exposing the entire student body to the needs and challenges of rural, underserved, and geriatric populations. Existing curricula require all students to attend ambulatory care rotations in rural or urban areas, or both, making Nova Southeastern University oriented toward a pattern of training its students in areas geographically removed from the health center itself, and to the care of indigent and multicultural population groups. In doing this, it developed training programs that address the health care needs of the region’s most medically underserved populations.

All students are encouraged to participate in community service. The Health Professions Division supports the mentoring and collaboration of interdisciplinary research with faculty members.
University History

Sustained growth and unity has made Nova Southeastern University (NSU) the largest independent university in the state of Florida. This growth culminated in January 1994, when Nova University and Southeastern University of the Health Sciences merged to become Nova Southeastern University.

Nova University was chartered in 1964 as a graduate institution in the physical and social sciences. Over time, Nova added programs in law, education, business, psychology, computer science, oceanography, social and systemic studies, and hospitality, and, in 1972, introduced its first off-campus course of study, in education. Soon, Nova became nationally recognized for its innovative distance learning programs. Today, field-based programs are located in 32 other Florida cities, in nearly 30 other states, and at selected international sites.

While Nova continued to expand its educational reach, Southeastern University of the Health Sciences also was on an expansion course. Southeastern was created by osteopathic physicians committed to establishing a College of Osteopathic Medicine in the Southeast. As a result, Southeastern College of Osteopathic Medicine, as it was first known, opened in 1981.

From 1987 to 1997, Southeastern added Colleges of Pharmacy, Optometry, Allied Health, Medical Sciences, and the College of Dental Medicine, which admitted 88 students in 1997. This growth was unprecedented, but not unsurpassed. There was still more to come.

The merger brought on new possibilities. Prior to 1994, Nova had evolved with innovative technology and Southeastern expanded to provide much needed health care education. With the merger, Nova Southeastern University's resources make possible a more transdisciplinary education. Students have an opportunity to integrate across the disciplines and understand how their professions relate to society as a whole.

The growth of the Health Professions Division (HPD) is continuous. In 2003, an R.N. to B.S.N. (Bachelor of Science in Nursing) program was added to the College of Allied Health, which then became the College of Allied Health and Nursing. Numerous other nursing programs were added over the next nine years. This resulted in the creation of a separate College of Nursing in 2012. At the same time, the College of Allied Health was renamed the College of Health Care Sciences.

Campus

Nova Southeastern University's Health Professions Division—now composed of the Colleges of Osteopathic Medicine, Pharmacy, Optometry, Health Care Sciences, Medical Sciences, Dental Medicine, and Nursing—offers a rare blend of tropical South Florida weather, plentiful sunny beaches, an easily accessible campus, a dedicated and professional faculty, well established affiliations with many hospitals, clinics, and health care systems in the area, and a mission to educate professionals capable of providing the highest-quality health care service.

The university's main campus is located on a lush, 314-acre site in the Greater Fort Lauderdale area, 10 miles inland of the Atlantic Ocean and readily accessible via several highways and Florida's Turnpike.

The Health Professions Division complex, dedicated in June 1996, is located on the northwest corner of the main campus and encompasses more than 540,000 square feet of space for administrative offices, classrooms, laboratories, the HPD Library, and a patient-services clinic. There is also a 600,000-square-foot parking structure with space for 2,000 vehicles.

The division elicited input from students and faculty members and incorporated innovations in architecture, ergonomics, and computer-aided technology to provide facilities that enhance the learning experience.

The complex is an arrangement of eight buildings, four of which are connected by air conditioned lobbies. The Sanford L. Ziff Health Care Center, physical plant, and parking garage are connected to the central buildings by covered walkways. Administration and faculty offices are on the upper levels of the five-story Terry Administration Building, with the departments of admissions and student services, and a cafeteria located on the first floor.

Located in the lobby of the Terry Building, the Health Museum exhibits artifacts and antiques representing each of the colleges of the Health Professions Division. The collection houses an informative and historical display of medical memorabilia for students, faculty members, and visitors to explore.

Private tours of the museum can be arranged with the curator, Cynthia Magalian Tupler, B.F.A. Contact Helen Caidin in the Pharmacy Department to schedule an appointment, (954) 262-1380.

Adjacent to the administration building is the Assembly Building, which consists of a 500-seat auditorium, a 250-seat auditorium, and eight 126-seat amphitheater-classrooms, all equipped with computerized audio/video systems.

Connected to this is the three-story Library/Laboratory Building. On the first floor is the library and a 100-seat cardiac laboratory utilizing "Harvey," a computerized mannequin that duplicates the sounds and symptoms of most heart conditions.

Also on the first floor are patient simulation training rooms and a 50-station computer laboratory for student use. The second and third floors house laboratories, a student lounge, and a research area. Laboratories are equipped for viewing pretaped medical procedures, and each large
laboratory has a video system and hookups to equipment such as an electron microscope, so that illustrations can be amplified for laboratory-wide viewing.

Just north of the Library/Laboratory Building is the Health Care Center, with facilities for primary health care, rehabilitative services, eye care, pharmacy, and a simulation nursing laboratory.

The College of Dental Medicine’s 70,500-square-foot building advances the state-of-the-art in dental education facilities. The first floor contains a 100-operatory predoctoral clinic facility and clinics and support laboratories for oral medicine, radiology, and oral surgery. The second floor houses a faculty practice; clinics for postgraduate programs in advanced education in general dentistry, endodontics, operative dentistry, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontology, and prosthodontics; a 120-position simulation technique laboratory; and support laboratories. Faculty and administration offices are on the third floor.

The Health Professions Division added a building to foster opportunities for interdisciplinary education and to meet the need for additional classroom, computer, and research facilities. This modern, spacious facility known as the Assembly II Building contains more than 31,000 square feet of instructional and research facilities, including a 312-seat auditorium, ultrasound training center, a 50-station computer science laboratory, and 37 seminar and study rooms.

Foreign Coursework

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com

- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905, for the appropriate college.

Admissions Policy

Students provisionally are admitted to a degree-seeking program based on a review of unofficial transcripts or other specific program admission requirements. However, this admission includes a condition that final and official transcripts, documents, and requirements must be received within 90 calendar days from matriculation for the graduate and professional programs and by the end of the drop/add period for undergraduate programs. If these final and official transcripts, documents, and/or requirements are not received by that time, the student will not be allowed to continue class attendance. Financial aid will not be disbursed to a provisional/conditional student until he or she has been fully admitted as a regular student (all admissions requirements have been approved by the college/program admissions office). Students who have an unpaid balance 30 days from the start of the term will be assessed a $100 fee.

Background Checks

Accepted applicants and students are required to authorize the NSU Health Professions Division to obtain background check(s) as per the policy adopted on March 2011. If the background check(s) reveal information of concern, which the NSU Health Professions Division may deem unfavorable, HPD will request that the individual provide a detailed written explanation of the information contained in this report, along with appropriate documentation (e.g., police reports). Students may also be required to authorize clinical training facilities that they are assigned to by the Health Professions Division to obtain a background check with the results reported to the clinical training facility. This information must be delivered in the format requested (electronic or written) to the NSU Health Professions Division Background Check Committee within 10 business days of the date the communication is sent or another date specified by HPD in its communication with the student.

Offers of admission will not be considered final until the completion of the background check(s), with results deemed favorable by the NSU Health Professions Division, and where appropriate, by the clinical training facilities. If information received indicates that the student has provided false or misleading statements, has omitted required information, or in any way is unable to meet the requirements for completion of the program, then the admission may be denied or rescinded, the student may be disciplined or dismissed, or his or her enrollment may be terminated.

Following the initial background check(s), students will be asked annually to provide a certification relating to any convictions or guilty or no-contest pleas to any criminal offense other than traffic violations. Additionally, a Level 2 background check may be required for certain rotations.
Tuition Credit Policy—Voluntary Withdrawals

Students who wish to withdraw from the program or course must submit a written request for voluntary withdrawal to the dean or program director, who will evaluate the student’s request. After completing the required documentation and obtaining the dean’s or program director’s approval, an eligible student may receive partial credit of the tuition, according to the following formula:

- Drops during the first week of the semester in which classes begin ........75 percent
- Drops after the first week of the semester in which classes begin .........No refund

The withdrawal period starts in the second week of the semester and ends three weeks prior to the end of the semester. Students enrolled in programs that have a drop/add period, will have until 11:59 p.m. the first Sunday of the semester, which is the end of the drop/add period, to make any changes in their schedule without incurring any financial expenses. Students who drop during the second week of classes will receive a reversal of 75 percent of their charged tuition. Students who drop after the second week of the semester will not be entitled to receive a refund.

Students enrolled in bachelor's degree programs are required to follow policy procedures for drops and withdrawals as noted in the undergraduate catalog.

Students may not be given refunds for portions of tuition paid by financial aid funds. As appropriate, the respective financial aid programs will be credited in accordance with federal regulations. Students should notify the Office of Student Financial Assistance prior to withdrawing to determine the effect this will have on financial aid. For complete withdrawals, please refer to the Return of Title IV Funds section of the student handbook.

Failure to comply with these requirements could jeopardize future receipt of Title IV student assistance funds at any institution of higher education the student may attend. If a student is due a refund, it will be mailed to the student’s address or deposited directly into his or her checking account as soon as the dean of the respective college has approved the withdrawal and the drop request has been processed. The tuition refund policy is subject to change at the discretion of the university’s board of trustees/the NSU administration.

Changes to a semester’s registration will not be accepted 20 days after the semester ends.

Florida Residency

Eligible students must request in-state tuition on application. For tuition purposes, students' Florida residency status (in-state or out-of-state) will be determined at initial matriculation and will remain the same throughout the entire enrollment of the student at NSU. Accordingly, tuition will not be adjusted as a result of any change in residency status after initial enrollment registration.

Enrollment and Student Services

Enrollment and Student Services (ESS) includes the Office of Student Financial Assistance, Office of the University Registrar, Office of the University Bursar, the One-Stop Shops in the Horvitz and Terry Administration buildings, the University Call Center, Enrollment Processing Services/Admissions Management Services, Transfer Evaluation Services, Health Professions Division (HPD) Office of Admissions, and the Help Desk. Collectively, the ultimate goal of ESS is to effectively meet the information and service needs of all NSU students.

Means of Communication with Students

Enrollment and Student Services’ official means of communicating with students is via SharkLink and NSU email. Students are encouraged to use NSU’s SharkLink to access email, access their financial aid information, request official transcripts, view their student accounts, make payments, access their grades, register for classes, apply for student employment, sign the Student Enrollment Agreement.

The SharkLink system is available 24 hours a day, 7 days a week. Students may also call the University Call Center for questions or visit one of the One-Stop Shops on the main campus.

The Office of Student Financial Assistance

The Office of Student Financial Assistance (OSFA) is dedicated to helping students make informed financial choices while in college. There are four types of financial aid available to assist in meeting the cost of attending college: grants, scholarships, student employment, and loans. Grants and scholarships are considered “gift” aid and generally do not have to be repaid. However, if a student drops or withdraws from any classes for which financial aid has been received, the student may have to return any “unearned” funds. Loans are considered “self-help” aid and always have to be repaid. Student employment requires the student to work in exchange for a pay check. Please remember that students interested in federal financial aid must complete the Free Application for Federal Student Aid (FAFSA) and meet general eligibility criteria. For detailed information
on the financial aid process and sources of aid, visit the financial aid website at nova.edu/financialaid.

Financial Aid Checklist

1. Complete the FAFSA.
Complete the Free Application for Federal Student Aid (FAFSA) at fafsa.gov annually. The 2016–2017 academic year is the last year that FASFA became available on January 1. The FAFSA for the 2017–2018 academic year will become available October 1, 2016. The earlier you apply, the better chance you have of being considered for maximum available funds. To apply for Florida grants and scholarships, undergraduate students should also complete the NSU State Aid Application available at nova.edu/financialaid/forms.

2. Plan for Housing and Meal Expenses.
Your budget includes a housing and meal component. Please ensure that your budget covers these expenses if you intend to live on campus.

Regularly check your financial aid status via SharkLink to ensure that you have no outstanding requirements. The link to My Financial Aid is located in the center of your SharkLink Student tab. Now is a good time to confirm your admissions status. You will have to be fully admitted in order for your financial aid funds to disburse.

4. Submit Additional Documents and Complete a Master Promissory Note.
Some students may be required to submit additional documents prior to being awarded. You will be notified of outstanding requirements via NSU (SharkLink) email. If you are interested in receiving Federal Direct Loans, you will be required to complete a Direct Loan Master Promissory Note (MPN) and the entrance counseling at studentloans.gov.

5. Accept, Reduce, or Decline Your Loan and Federal Work-Study Award(s).
Your financial aid award notice will provide you with detailed instructions on how to accept, reduce, or decline your financial aid award. Your award will not be disbursed until this step has been completed.

6. Don’t Forget to Continually Apply for and Identify Scholarships.
Schedule time regularly to search for scholarships. The best place to start is the scholarship web page at nova.edu/financialaid/scholarships.

7. Check Your NSU (SharkLink) Email Daily.
NSU (SharkLink) email and SharkLink are the official means that the OSFA will use to communicate with students. Keep up-to-date by checking your NSU email daily.

8. Register for Classes (early).
Students awarded Federal Direct Loans must be enrolled at least half time. Half-time enrollment is defined as 6 credits per semester for all undergraduate students. For graduate and first-professional students, your program of study defines half-time status. Enrollment requirements for federal and state grants vary. Familiarize yourself with the enrollment requirements defined by your program office as well as by the financial aid programs through which you are receiving aid. Be sure to register as early as possible to ensure timely disbursement of your financial aid funds.

Return of Title IV Funds
Any student who does not complete at least one course within an academic semester for which financial aid is received, or could have been received, will be reviewed for a Return of Title IV Funds calculation. For complete information, please review nova.edu/financialaid/apply-for-aid/title-iv-return.

Student Employment
There are three main student employment programs: Federal Work-Study (FWS), Nova Student Employment (NSE), and Job Location and Development (JLD). The NSE and JLD programs provide jobs to students regardless of financial need. The FWS program is need-based and requires the completion of the FAFSA. Students awarded FWS may participate in the America Reads/America Counts Programs through which students serve as reading or math tutors to elementary school children. For more information on NSU part-time and full-time student employment, visit nova.edu/financialaid/employment.

Satisfactory Academic Progress (SAP)
In order to receive financial assistance, a student must continually meet Satisfactory Academic Progress (SAP). Different definitions of SAP apply for Florida state aid and federal aid. According to federal regulations, NSU has established university-wide quantitative, qualitative, maximum time frame, and pace SAP requirements.

Students who fail to meet SAP during the 2016–2017 academic year will not be eligible for Title IV federal and Florida state financial aid during the 2017–2018 academic year.

Comprehensive information is available on the financial aid website at nova.edu/sap.

Veterans Affairs
The Department of Veterans Affairs (DVA) educational benefits are designated to provide eligible individuals with an opportunity for educational and career growth. Detailed information regarding veteran benefits at NSU are available online at nova.edu/financialaid/veterans. Students may also contact the NSU Veterans Benefits
Office at (954) 262-7236 or toll free at 800-541-6682, ext., 27236 Monday through Friday, between 8:30 a.m. and 5:00 p.m. or visit the veteran benefits office in the Horvitz Administration Building on the Fort Lauderdale/Davie Campus. Students may also learn about their education benefits by visiting the U.S. Department of Veterans Affairs online at benefits.va.gov/gibill or by contacting the DVA at 888-442-4551.

Grade/Progress Reports for Students Receiving Veterans Benefits

Nova Southeastern University furnishes each student with a Notification of Posting of Grade with instructions on how to view an unofficial transcript that shows current status of grades and earned semester hours for all courses completed and/or attempted, and grades for courses in which the student is currently enrolled. At the end of every evaluation period (e.g., term, semester) each veteran can request an official transcript that shows the current status of grades and earned semester hours for all courses completed and/or attempted. This transcript can be obtained from the One-Stop Shop at the William and Norma Horvitz Administration Building or Terry Administration Building or online at sharklink.nova.edu.

Veterans Resource Center

The mission of the Veterans Resource Center (VRC) is to link veterans with university and community resources, as well as provide a welcoming environment for student-veterans to meet, relax, and gather. The VRC is located in Room 218 on the second floor of the Rosenthal Building. The room is open from 7:00 a.m. to 10:00 p.m., seven days a week. For more information about NSU’s Veterans Resource Center, please call (954) 262-FLAG (3524) or email VRC@nova.edu.

The Office of the University Bursar

The Office of the University Bursar is responsible for billing students, collecting and depositing payments, sending invoices and receipts, distributing student educational tax forms, issuing refunds from excess financial aid funds, and verifying students’ eligibility for financial aid funds. The office also assists borrowers of Federal Perkins and Health and Human Services Loans with repayment options.

Office of the University Bursar Policies

• By registering for courses at Nova Southeastern University, the student accepts financial responsibility for payment of all institutional costs including, but not limited to, tuition, fees, housing and meal plan (if applicable), health insurance (if applicable), and any additional costs when those charges become due.
• Payment is due in full at the time of registration. NSU eBills are sent the middle of each month to the student's NSU email address. However, to avoid late charges, students should not wait for their billing statement to pay their tuition and fees.
• A student will not be able to register for future semesters until all outstanding balances from previous semesters have been paid in full. If a student has a balance 30 days after the start of the semester, a hold and a $100 late fee will be placed on his or her account. This hold stops all student services, including, but not limited to, access to the University RecPlex, academic credentials, grades, and future registrations. It will remain on the student’s account until the balance has been paid in full.
• Delinquent student account balances may be reported to a credit bureau and referred to collection agencies or litigated. Students with delinquent accounts will be liable for any costs associated with the collection of unpaid charges, including attorney fees and court costs. All registration agreements shall be construed in accordance with Florida law, and any lawsuit to collect unpaid fees may be brought in the appropriate court sitting in Broward County, Florida, regardless of the student’s domicile.

Methods of Payment

NSU accepts Visa, MasterCard, and American Express. Check payments include traveler's checks, cashier's checks, personal checks, and money orders. International checks must be in U.S. funds only and drawn on a U.S. bank. Wire transfers are accepted.

Electronic check and credit card payments can also be made through NSU eBill, SharkLink, or WebStar. Students can access NSU eBill using their SharkLink ID and password to authorize other individuals (e.g. parent, spouse, or grandparent) to view their bill and make payments to their account. Credit card authorization forms can be downloaded from the Bursar's website at nova.edu/bursar/forms/cc_authorization and faxed to (954) 262-2473. Students may also mail a payment to the Office of the University Bursar or make payments in person at either of the One-Stop Shops on the Fort Lauderdale/Davie Campus.

Payment and Tuition Assistance Plans

NSU Payment Plans

NSU Payment Plans allow students (with the exception of international students) and their families to pay university charges in installments. For more information, visit nova.edu/bursar/payment/payment_plans.

Tuition Assistance Plans

• Tuition Deferment
Graduate students should contact their program office for information on deferment programs. Undergraduate students participating in employer tuition assistance
programs who wish to defer tuition payment must, before the first day of class,

- submit a letter of eligibility, a purchase order from their employer, or details of their employer's program from the employer's human resources office or the employer's website

- provide postdated payments (check or credit card authorizations) for the amount of tuition. Payment of tuition only (not fees) may be deferred for five weeks after course completion.

- pay a $75 deferment fee along with all other fees

- notify the Office of Student Financial Assistance of participation in an employer tuition assistance program

**Tuition Direct Billing**
A student whose employer, sponsor, or guarantor has agreed to be direct billed by NSU must notify the Office of the University Bursar accordingly. Before the first day of classes, the student must

- provide a voucher, financial guarantee, letter of credit or eligibility from the respective payer with the amount and enrollment period for which funds are to be applied when charges are due at the time of registration

- pay any amount due not covered in the billed party documentation

**Tuition Reimbursement**
Some employers/sponsors/guarantors make payments directly to the student. Students must

- pay charges in full for the semester/term to be reimbursed

- send an email to bursar@nova.edu from their SharkLink (NSU) email account to request a receipt of paid charges

### Florida Prepaid College Plan
NSU accepts and bills the Florida Prepaid College Plan for tuition, fees, and on-campus housing costs. The plans are based on the tuition rates of the tax-assisted Florida public colleges and universities. The difference between NSU tuition, fees, and on-campus housing costs and the allocations through the Florida Prepaid College Plan is the sole responsibility of the student. If a student is on the unrestricted plan, the student must designate a dollar amount for up to the cost of tuition and fees. Students new to NSU must contact Florida Prepaid at 800-352-GRAD to authorize NSU for payment. For those students who have notified the Florida Prepaid College Plan that they are attending NSU, the plan will automatically be billed based on the hours of enrollment after the drop/add period. A student may request changes to this procedure by submitting a completed and signed Florida Prepaid College Plan Billing Request Form available on the bursar website at nova.edu/bursar/forms. To learn more about the Florida Prepaid College Plan, visit myfloridaprepaid.com.

### The Office of the University Registrar
The Office of the University Registrar offers a variety of services to the university community. These services include, but are not limited to, course registration, transcript processing, name and address change, loan deferment, enrollment and degree verification, grade processing, commencement, degree conferral, transfer of credit services, and general university information. Additional information is available at nova.edu/registrar.

### Transcript Requests
Students may view a complete academic history, print out an unofficial transcript, and request an official transcript via the Student tab in SharkLink. In addition, a Transcript Request Form—available online at nova.edu/registrar/forms/transreq.pdf—can be completed and submitted in person to the One-Stop Shop, via fax to (954) 262-4862, or via regular mail to

Nova Southeastern University
Enrollment and Student Services
Office of the University Registrar
3301 College Avenue
Fort Lauderdale, Florida 33314-7784

There is a $10 fee for each official transcript.

### Grades
Once grade(s) have been posted to the student’s academic record, a notification email directing students to SharkLink to view their grades is sent. An official grade report may also be printed from SharkLink.

### Class Registration and Changes
All students must complete an online Student Enrollment Agreement (SEA) form each semester/term in order to register for classes. The SEA outlines the university’s standards and policies regarding course registration and withdrawal, financial responsibility, and more. A copy of the SEA is available on the registrar’s website at nova.edu/registrar/forms/catch-the-sea-wave. Students must be officially registered prior to the start of the semester/term in order to participate in and receive academic credit for those courses. All holds must be cleared at the time of registration. Late registration will not be accepted if due to a financial hold that was not cleared prior to the close of the registration period. Students are responsible for reviewing their registration and academic records each semester/term for accuracy and for promptly notifying their program office/adviser of any discrepancies. Students have no more than 20 days after the end of a semester/term to resolve any discrepancies. Petitions for retroactive drops, withdrawals, or refunds for a course will only be considered based on documented extenuating circumstances. Appropriate documentation may include medical records and death certificates.
Roster Reconciliation
University policy requires that each faculty member reconciles and validates the accuracy of his or her class roster during the second week of the semester/term, as determined by the approved Nova Southeastern University academic calendar. Any student deemed as a non-attendee will be dropped from the class roster by the Office of the University Registrar.

Students who believe they were reported in error as non-attendee must communicate with the instructor, who is the only one able to correct the record. Faculty members must email rostrec@nova.edu to request a student be left on the class roster who was originally reported as not in attendance.

Name and/or Social Security Number Changes
NSU requires official documentation to make any change to the name or Social Security number students have on record. Acceptable documents verifying a name change include a marriage license or certified abstract of marriage, divorce decree, driver’s license, certificate of naturalization, permanent or conditional permanent resident card, resident alien card, passport (book or card), court order (final judgment of name change or final judgment of change of name), uniformed services military identification card, birth certificate (acceptable only for correcting spelling errors), and a Bureau of Vital Statistics card. Documents that will not be accepted include a petition of name change, Social Security card, petition for naturalization, employee identification card, and professional license card. To change a Social Security number, submit a Data Change Form, along with a copy of your signed Social Security card.

Gender Changes
NSU requires official documentation to make a change in gender. Provide the previous and current names, along with the student identification number. A court order is the only official documentation required to update the student record with a gender change.

Address Changes
Students may change their address via SharkLink or submit a written request to the University Registrar’s Office via fax at (954) 262-2915, in person at the One-Stop Shop, or via email to studentupdates.nova.edu.

Loan Deferment/Enrollment and Degree Verification
Students may obtain a free, official Loan Deferment/Enrollment Verification Form, via the student tab in SharkLink. This Enrollment Verification Form is an official document from the National Student Clearinghouse (NSC) that can be presented to health insurance agencies, housing authorities, consumer product companies, banks, and other agencies requiring documentation of your current enrollment status.

Commencement
The Office of the University Registrar coordinates all NSU commencement exercises, processes degree applications, and prints and distributes diplomas. Complete information is available online at nova.edu/registrar.

Transfer Evaluation Services
NSU will transfer a maximum of 90 degree-applicable credits toward a degree, including credit for the College-Level Examination Program (CLEP), proficiency exams, and prior experiential learning. NSU will transfer courses from previous institutions for which a student has earned a grade of C or higher. Remaining credits and at least 50 percent of credits in the student’s major must be earned at NSU in regular academic offerings.

Transfer students who have earned an Associate in Arts degree or 60 credits as of 1992 to the present from a Southern Association of Colleges and Schools (SACS) accredited institution and who are in good academic standing, as defined by the transfer institution, shall be admitted to NSU with junior standing. Grades of C- and D will transfer under this policy. Applicable credits are transferred based upon received transcripts. The evaluation of transfer credit is performed on both unofficial and official transcripts. However, a student will not receive full acceptance to the university nor financial aid until all final official transcripts have been received. Students will be advised to take courses at NSU based upon the completed transfer evaluation.

Official transcripts from all previously attended institutions should be sent to:

Nova Southeastern University
Enrollment Processing Services
Attn: Undergraduate Admissions
P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Electronic transcripts can be sent to:
electronictranscript@nova.edu.

For additional information please contact the Office of Transfer Evaluation Services online at nova.edu/tes or call (954) 262-8414 for details.

CAPP Degree Evaluation
The Curriculum, Advising, and Program Planning (CAPP) degree evaluation system is a useful reference tool to help you track your progress toward degree requirements published in the college catalog. You may access CAPP in SharkLink and learn more about the system at nova.edu/capp. Please note that CAPP does not replace your academic advisor or college catalog information. CAPP degree evaluations are not official. You should consult your academic advisor/program office for detailed program requirements and course options. Final approval for the completion of graduation requirements is granted by your program office.
University Call Center
The University Call Center is available during the hours listed below to answer financial aid, bursar, registrar, and academic computing Help Desk questions. All hours are eastern time.

Office of the University Bursar: (954) 262-5200
Office of Student Financial Assistance: (954) 262-3380 • 800-806-3680
Office of the University Registrar: (954) 262-7200 • 800-806-3680
HPD Admissions: (954) 262-1101
Help Desk: (954) 262-HELP (4357)*

Hours of Operation
Monday–Friday: 7:00 a.m. to 10:00 p.m.
Saturday and Sunday: 8:30 a.m. to 5:00 p.m.
* The Help Desk is available until midnight on Sundays.

The One-Stop Shop
(Horvitz and Terry Administration Buildings)
The One-Stop Shop is the central point of contact for information and service for walk-in prospective, new, and continuing students. Staff members are cross-trained to answer inquiries about financial aid, registrar, and bursar functions. The One-Stop Shop is located in the Horvitz Building on the main campus as well as on the first floor of the Terry Administration Building.

Hours of Operation
Monday–Thursday: 8:30 a.m. to 7:00 p.m.
Friday: 8:30 a.m. to 6:00 p.m.
Saturday: 9:00 a.m. to noon (Horvitz only)
The University Call Center and the One-Stop Shop are closed on holidays observed by NSU.

Regional Campuses
The Office of Student Financial Assistance hours of operation at the regional campuses are as follows:

Fort Myers
Monday–Friday: 9:00 a.m.–5:30 p.m.
(No Saturday or Sunday hours)

Jacksonville
Monday–Friday: 9:30 a.m.–6:00 p.m.
(No Saturday or Sunday hours)

Miami
Monday–Friday: 8:30 a.m.–6:00 p.m.
(No Saturday or Sunday hours)

Orlando
Monday–Friday: 9:00 a.m.–5:30 p.m.
(No Saturday or Sunday hours)

Palm Beach
Monday–Friday: 8:30 a.m.–5:00 p.m.
(No Saturday or Sunday hours)

Tampa
Tuesday–Friday: 8:00 a.m.–4:30 p.m.
Saturday: 7:30 a.m.–1:00 p.m.

Certificate of Physical Examination
Students must have a certificate of physical examination completed by their physician. Forms will be provided to each matriculant as part of the admissions package or can be downloaded.

Students may request that the University Health Service perform these examinations. The University Health Service will make appointments in as timely a manner as possible, and the appointments, once made, become an obligation of the student, and must be kept.

These certificates (whether done privately or by the university) will be placed in an appropriate facility.

Immunization Requirements
Students must complete a mandatory immunization form, which must be signed by a licensed health care provider. The form can be found at nova.edu/smc.

Students in the Health Professions Division may be required to upload proof of immunizations to multiple online portals to satisfy the requirements of their programs and training facilities where they are assigned.

The following immunizations/vaccinations are required of students at the Health Professions Division based on the current Centers for Disease Control (CDC) recommendations for Health Care Personnel:

Basic Immunizations
Every student is required to have had an immunization for, or show evidence of immunity to, the following diseases before matriculating at Nova Southeastern University:

Varicella (Chicken Pox)
One of the following is required—Proof of two vaccinations or positive antibody titer. (Lab report is required.)

Measles, Mumps, and Rubella (MMR)
One of the following is required—Proof of two vaccinations or positive antibody titer for measles (rubeola), mumps, and rubella. (Lab report is required.)

Tetanus Toxoid, Diphtheria Toxoid, and Acellular Pertussis Vaccine (Td)ap
All students are required to have had a Tetanus Toxoid, Diphtheria Toxoid, and Acellular Pertussis Vaccine (Td)ap booster prior to matriculation and must maintain immunity
by continuing to remain current according to the CDC recommendations for health care personnel during their program. Due to the increased risk of pertussis in a health care setting, the Advisory Committee on Immunization Practices highly recommends health care workers receive a one-time Tdap (ask your health care provider). Tdap is required, without regard to interval of previous dose of Tetanus Toxoid (Td).

**Influenza**
Vaccinations are administered annually.

**Hepatitis B**
- Both of the following are required—Three vaccinations and positive surface antibody titer. (Lab report is required.)
- If the series is in progress, evidence of at least one shot must be provided, and the renewal date will be set accordingly.
- If the titer is negative or equivocal, the student must repeat the series and provide a repeat titer report.

**PPD Skin Test (Two Step)**
One of the following is required—negative two-step test or negative blood test (such as QuantiFERON Gold Blood Test or T-Spot Test) or, if positive PPD results, provide a chest X-ray and/or prophylactic treatment information within the past 12 months.

**Arrangements**
Students may request that the Student Medical Center or the NSU Clinic Pharmacy administer these immunizations. The Student Medical Center will make appointments in as timely a manner as possible. Students may call (954) 262-1270 to make an appointment. Once made, the appointment becomes the student’s obligation and must be kept. For students at other NSU campuses, appointments may be scheduled with the NSU-designated physician for their area.

**HPD Fee**
The HPD general access fee covers a series of three Hepatitis B vaccines and an annual PPD screening. All other immunizations and health care services are the responsibility of the student.

**Failure to Comply**
The university is not required to provide alternative sites for clinical practicum or rotations should immunization be a requirement for placement. Therefore, failure to comply with this policy may result in a student’s inability to satisfy the graduation requirements in his or her program.

Relative to clinical rotation site requirements, students are expected to consult their specific college/program handbooks for compliance with any college/program-specific requirements.

**Student Housing**
NSU offers a residential living program that is designed to meet a wide array of student needs. Students who live on campus have numerous opportunities to participate in a variety of programs and activities that maximize intellectual growth and personal development. The types of facilities and amenities offered are listed below.

**Leo Goodwin Sr. Residence Hall**
The Leo Goodwin Sr. Residence Hall houses up to 292 students during the academic year. Leo Goodwin Sr. Residence Hall is the primary undergraduate facility for students with 0–30 credits.

Each room is built for double- or single-occupancy and features a private bathroom, large closet space, and high ceilings. The Leo Goodwin Sr. Residence Hall has limited availability for single rooms. Residents are placed on a first-come, first-served basis. Each room is furnished with beds, desks, desk chairs, dressers, and a built-in storage/counter facility. The building houses a classroom, a computer lab, study lounges on each floor, laundry facilities, a kitchen, and a large TV lounge.

All undergraduate students living in the Leo Goodwin Sr. Residence Hall, regardless of credit hours, must purchase a mandatory declining balance plan. The minimum amount a resident can apply to their NSU I.D. card for the declining balance plan is $1,450 per semester. Residents who choose to apply additional funds to their cards are able to do so at any time. If a balance exists on a resident’s declining balance plan at the end of the fall semester, the resident’s funds will roll over to the winter semester. Once the winter semester has ended, the remaining balance will no longer be available to the resident.

**The Commons Residence Hall**
The Commons houses undergraduate students. The state-of-the-art living and learning community includes 501 beds, classroom and meeting space, 16 community living rooms, 16 study rooms, and plenty of indoor and outdoor common space. The 16 community living rooms have comfortable furnishings that create unique spaces for students and groups to conduct study sessions or group meetings or to congregate with friends. The Office of Residential Life and Housing is located in The Commons.

The Commons is unique and dynamic for the inclusion of incorporating communities within a community. Twelve of the communities are reserved for returning and incoming residents. The other communities (listed below) will be based upon themes and/or academic initiatives.

- Razor’s Edge Leadership Program
- Greek Life (Greek Village)
All undergraduate students living in The Commons, regardless of credit hours, must purchase a mandatory declining balance plan. The minimum amount a resident can apply to their NSU I.D. card for the declining balance plan is $1,450 per semester. Residents who choose to apply additional funds to their cards are able to do so at any time. If a balance exists on a resident’s declining balance plan at the end of the fall semester, the resident’s funds will roll over to the winter semester. Once the winter semester has ended, the remaining balance will no longer be available to the resident.

Founders, Farquhar, and Vettel Residence Halls
These residence halls each house undergraduate students with 49 or more credits throughout the academic year. Each apartment is furnished and features single and double options. Each apartment provides a full kitchen with refrigerator and stove, one private bathroom, and a living room.

All undergraduate students living in the Founders, Farquhar, and Vettel Residence Halls, regardless of credit hours, must purchase a mandatory $200 declining balance plan per semester. If a resident chooses to apply additional funds to their card, they are able to do so at any time. If a balance exists on a resident’s declining balance plan at the end of the fall semester, the resident’s funds will roll over to the winter semester. Once the winter semester has ended, the remaining balance will no longer be available to the resident.

Cultural Living Center
The Cultural Living Center was built in 1984 and houses undergraduate students with 49 or more credits throughout the academic year. Each apartment is fully furnished and features single and double rooms with a full kitchen, bathroom, and living room.

All undergraduate students living in the Cultural Living Center, regardless of credit hours, must purchase a mandatory $200 declining balance plan per semester. If a resident chooses to apply additional funds to the card, they are able to do so at any time. If a balance exists on a resident’s declining balance plan at the end of the fall semester, the resident’s funds will roll over to the winter semester. Once the winter semester has ended, the remaining balance will no longer be available to the resident.

Rolling Hills Graduate Residence Hall
The Rolling Hills Graduate Residence Hall is approximately one mile west of the NSU main campus and houses approximately 373 graduate and doctoral students. The Rolling Hills Graduate Hall complex is made up of a seven-story building and a three-story building. The buildings feature single studios and quad apartments that are furnished and feature a kitchen, bathroom, and living room.

The Rolling Hills Graduate Hall complex is made up of 10 separate communities, 3 of which are based upon themes. Two of these themes are
- HPD Communities (one in Building A and one in Building C)
- Law Community (in Building A)

For more information, please contact the Office of Residential Life and Housing at (954) 262-7052 or visit their website at nova.edu/housing.

Dress Code

Students in the Health Professions Division must maintain a neat and clean appearance befitting students attending professional school. Therefore, attire should convey a professional appearance whenever the student is on the division campus and in classes or laboratory or on an experiential rotation or program. The following constitute acceptable attire:

1. Students must wear their white consultation/clinical jackets with their names and appropriate college designation embroidered over or on the left breast pocket. A white jacket is to be worn daily over the prescribed attire, unless the student is in the College of Medical Sciences, where a professional dress code is still required at all times.

2. Shirt (approved college polo shirt for pharmacy students only), tie, slacks, socks, and regular shoes for men, and for women it should be professional business dress, which includes slacks, pants, or skirt with blouse (approved college polo shirt for pharmacy students only), or dress and appropriate shoes. For men and women, matching scrub sets, socks, and shoes are also an option.

3. Identification badges will be issued at the One-Stop Shops in the Health Professions Division and the Horvitz Administration Building, or from the Office of Student Affairs for distance programs students, and must be worn and visible at all times when the student is on campus or at a clinical rotation. Please note that ID badges are necessary for proper use of on-campus auditoriums, library and recreational facilities, offices, laboratories, and certain restricted parking areas. These badges are given to the students at no charge, except for replacement.

Students may not wear the following:
- shorts
- cut-offs
- mini-skirts (higher than mid-thigh)
- jeans
- see-through clothing or halter-tops
Students who are required to have insurance by their academic program, or living on campus, will automatically be enrolled and will see a charge for health insurance on their student account. Students who already have health insurance coverage and do not need the NSU-endorsed insurance plan must opt out each year. The charges will be removed from your account once proof of comparable coverage has been submitted and approved. To do this, please complete an online waiver form at novastudentinsurance.com. Click on waiver out.

Students who have health care coverage from commercial carriers or the marketplace health care exchanges from other states should check to verify comprehensive health care coverage in the regions of Florida where you will be attending classes or practicum rotations.

Students who fail to complete the waiver form and provide proof of comparable health insurance coverage by the stated deadline will not be eligible to have charges removed, will continue to be enrolled in the NSU student insurance plan endorsed by NSU, and will be financially responsible for payment of those premiums. The waivers must be completed every academic year by the published deadline.

If you have any questions, please contact the student health insurance department at (844) 990-1800, (954) 262-4060, or studenthealth@nova.edu. In addition, you may contact our student health insurance servicer, Academic Insurance Solutions (AIS), at 1-888-776-9920 or (813) 944-3939.

Service Units Learning Resources

The HPD Library is located on the first floor at the north end of the Terry Building Complex in the Library/Lab Building. The collection consists of more than 17,000 print volumes, 700+ electronic books, and 8,000+ active medical/health journal subscriptions in both print and digital formats. Many of the available electronic texts are required textbooks in various courses. In addition, more than 210 medical/health databases are available 24/7 to meet the needs of the seven HPD colleges. All students have access to the full resources of all NSU libraries, both print and online. Medical/health databases include Medline, CINAHL, Clinical Key (which includes Procedures Consult and First Consult), LexiComp, and UpToDate, as well as many databases specific to individual programs. The Interlibrary Loan and Document Delivery Office will provide additional journal articles, books, and items not available digitally to any student at no cost. All resources are available through the HPD Library home page (nova.edu/hplibrary). In addition, free notary service is available during business hours.

Professional reference services are available via phone, text, email, or face to face. Seven professional librarians are available for help with searching, finding full-text journals,
citation reference management, and research strategies. Each HPD college/program is assigned a subject specialist liaison librarian who works closely with faculty members and offers assistance with specific class assignments.

Quiet study areas are designated in the library with a variety of seating options available, from large tables to individual carrels and comfortable seating. There are 48 individual/small group study rooms in the library and adjacent Assembly II Building. Rooms may be checked out for up to three hours. All rooms are equipped with white boards and Wi-Fi. A small teaching lab is available for group instruction and there is a large group study hall. Two 50-station computer labs are open when the library is open. In addition, a production studio is available for student use for Tegrity, video recording, and video editing.

A common area provides space for collaborative projects and is equipped with two Media:scape units for collaboration using multiple laptops with single or double monitor displays for group work. The library has both PC and Mac computers for student use, as well as iPads for short-term checkout, each is loaded with 100 medical and production apps. Other library services include binding, faxing, and scanning services; earplugs; sports equipment for the student lounge; school supplies for sale; and coffee service.

Hours of operation for the HPD Library, Study Center rooms in Assembly II, and adjoining computers labs are Monday–Thursday: 7:00 a.m.–midnight, Friday: 7:00 a.m.–9:00 p.m., and Saturday and Sunday: 10:00 a.m.–midnight. From September through May, these study rooms in the Assembly II building are open 24/7.

For more information, please call (954) 262-3106.

See the Libraries section of the NSU Student Handbook for information about NSU’s Alvin Sherman Library, Research, and Information Technology Center.

Health Care Centers
The Health Professions Division Health Care Centers serve an important function and are an integral part of the training programs. They provide a vital community function by bringing health care service to areas whose medical needs traditionally have gone unmet.

Sanford L. Ziff Health Care Center
The Ziff Health Care Center is a state-of-the-art, primary care facility with full-service, radiologic-diagnostic capabilities. Contained at the health care center are family medicine, pediatrics, X-ray, occupational therapy, pharmacy, physical therapy, rehabilitation, nephrology, hypertension, an optometric center, optical dispensary, OB-GYN, dermatology, and general internal medicine. Complete dental services are available next door at the clinics operated by the NSU College of Dental Medicine. Ambulatory medical, optometric, and dental care is made available during regular business hours for the university community. When a student or a family member needs care, they may make an appointment with the University Health Service. For those unable to make appointments in advance, hours will be posted. For urgent situations, contact the University Health Service at (954) 262-4100. Most insurance policies are accepted by the health facility for medical services.

Hearing and Balance Center
The Hearing and Balance Center, located in the Ziff Health Care Center, evaluates individuals of all ages using a variety of diagnostic testing procedures to determine the exact nature of the hearing and/or balance impairment. It provides tinnitus evaluation and treatment services, as well as auditory processing evaluation and treatment. The center also offers an array of treatment options for hearing loss to fit a patient’s lifestyle and communication needs. These include digital hearing instruments and assistive listening devices. Additionally, newborn hearing screenings, hearing conservation services, and hearing protection device services are offered. For more information or an appointment, call (954) 678-2273.

Consultation with specialists, when needed, will be arranged by the University Health Service. Such specialty care will be the student’s financial responsibility. Direct visits to specialists without referral by the University Health Service are strongly discouraged.

Sports Medicine Clinic
Sports Medicine services are available in the Don Taft University Center.

Campus Pharmacy
Located adjacent to the Ziff Health Care Center is the pharmacy where prescriptions and over-the-counter, herbal, and homeopathic remedies are available. The pharmacy Wellness Center addresses diabetes, high blood pressure, and other diseases.

Hours of Operation
Monday–Friday: 9:00 a.m. to 6:00 p.m. Saturday: 9:00 a.m. to 1:00 p.m.

For additional information, contact (954) 262-4550.

NSU Student Counseling
3538 South University Drive, Davie, Florida 33328-2003 (in University Park Plaza, east of the NSU Bookstore)

Counseling for NSU students is provided by the Henderson Student Counseling Center. Services include treatment for anxiety, depression, anger management issues, stress, relationship challenges, chronic illnesses, abuse, suicidal thoughts, break-up/divorce, assault, substance abuse, and many other areas affecting a student’s quality of life. The
office is staffed with licensed mental health professionals including a psychologist and psychiatrist. Services include

- individual counseling
- couples counseling
- group counseling
- psychiatric services

Contact Information
Office: (954) 424-6911
Fax: (954) 424-6915
After hours on-call counselor: (954) 424-6911

Hours
Monday, Thursday, Friday: 9:00 a.m. to 5:00 p.m.
Tuesday, Wednesday: 9:00 a.m. to 8:00 p.m.

NSU Health Care Center at North Miami Beach
1750 NE 167th Street, North Miami Beach, Florida
This facility houses a full-service primary care family medicine practice as well as a state-of-the-art dental center, a comprehensive optometric clinic and optical dispensary to serve the community. For more information or an appointment, call (954) 678-2273.

Eye Care Institute of Fort Lauderdale
The Eye Care Institute of Fort Lauderdale, located in the North Broward Hospital District building at 1111 West Broward Boulevard, provides primary eye care and pediatric/binocular vision services to the urban community in the downtown area as well as the hospital district patients. Along with routine and emergency eye care, services for early detection and monitoring and treatment of glaucoma and other eye diseases are provided by students supervised by experienced faculty members in this state-of-the-art facility. Specialty care, including vision training for children up to 12 years of age, is offered by the Eye Institute’s pediatric section. A wide selection of frames and lenses for both children and adults are available at reasonable cost on-site.

Core Performance Standards for Admission and Progress
The Nova Southeastern University Health Professions Division is pledged to the admission and matriculation of qualified students and wishes to acknowledge awareness of laws that prohibit discrimination against anyone on the basis of race, color, religion or creed, sex, pregnancy status, national or ethnic origin, nondisqualifying disability, age, ancestry, marital status, sexual orientation, unfavorable discharge from the military, veteran status, or political beliefs or affiliations.

Regarding those students with verifiable disabilities, the university will not discriminate against such individuals who are otherwise qualified, but will expect applicants and students to meet certain minimal technical standards (core performance standards) as set forth herein, with or without reasonable accommodation. In adopting these standards, the university believes it must keep in mind the ultimate safety of the patients whom its graduates will eventually serve as well as the efficacy and safety in the learning environment. The standards reflect what the university believes are reasonable expectations required of health professions students and personnel in performing common functions. Any exceptions to such standards must be approved by the dean of the student’s particular college based upon appropriate circumstances.

The holders of health care degrees must have the knowledge and skills to function in a broad variety of clinical situations and to render a wide spectrum of patient care. In order to carry out the activities described in the following paragraphs, candidates for Health Professions Division degrees must be able to integrate consistently, quickly, and accurately all information received, and they must have the ability to learn, integrate, analyze, and synthesize data.

Candidates for degrees offered by the Health Professions Division must have, with or without reasonable accommodation, multiple abilities and skills including intellectual, conceptual, integrative, and quantitative abilities; interpersonal communication; mobility and strength; motor skills; and hearing, visual, tactile, behavioral, and social attributes. Candidates for admission and progression must be able to perform these abilities and skills in a reasonably independent manner.

Intellectual, Conceptual, Integrative, and Qualitative Abilities
These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving—a critical skill—requires all of these intellectual abilities. Candidates and students must have critical thinking ability sufficient for good clinical judgment. This is necessary to identify cause-effect relationships in clinical situations and to develop plans of care. In addition, candidates and students should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. An individual is expected to be able to perform multiple tasks in a diverse, dynamic, highly competitive, and challenging learning environment. All individuals are expected to meet their program requirements on a satisfactory level as determined by HPD administration or the applicable college/program administration. Osteopathic medical students must be able to perform multiple tasks in a diverse, dynamic, highly competitive, and challenging environment. They must be able to think quickly and accurately in an organized manner, despite environmental distractions.
Interpersonal Communication
Candidates and students must be able to interact and communicate effectively with respect to policies, protocols, and process, with faculty, students, staff, patients, patient surrogates, and administration. They must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but also reading and writing. Candidates and students must also be able to communicate effectively and efficiently in all written forms with all members of the health care team. They must have interpersonal abilities sufficient to interact with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds.

Motor Skills
Candidates and students must have sufficient motor function to execute movements reasonably required to provide general care and emergency treatment. Examples of emergency treatment reasonably required of some health care professionals are cardiopulmonary resuscitation (CPR), administration of intravenous medication, the application of pressure to stop bleeding, the opening of obstructed airways, and the ability to calibrate and use various pieces of equipment. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Physical therapy and occupational therapy students must be able to position patients for treatment, as well as teach the functions involving gross and fine movements. Pharmacy candidates and students must have sufficient motor skills to weigh chemical and pharmaceutical (including intravenous) solutions, prepare prescriptions, and carry out sterile procedures.

Strength and Mobility
Candidates and students must have sufficient mobility to attend emergency codes and to perform such maneuvers as CPR when required. They must have the physical ability to move sufficiently from room to room and to maneuver in small places. Osteopathic medical students must have the ability to position patients for the administration and delivery of osteopathic manipulative treatment in a variety of settings and to position and move patients when required.

Pharmacy students must be able to move about within a pharmacy setting and a patient’s room.

Physical therapy and occupational therapy students must be able to administer treatment in a variety of settings and positions and move patients when required.

Hearing
Candidates and students must have sufficient auditory ability to monitor and assess health needs. They must be able to hear information given by the patient in answer to inquiries; to hear cries for help; to hear features in an examination, such as the auscultatory sounds; and to be able to monitor equipment.

Visual
Candidates and students must have visual ability sufficient for observation and assessment necessary in patient care. It must be consistent, in many cases, with being able to assess asymmetry, range of motion, and tissue texture changes. Osteopathic medicine, optometry, and physician assistant students must have sufficient visual ability to use ophthalmologic instruments. It is necessary to have adequate visual capabilities for proper evaluation and treatment integration. Candidates and students must be able to observe the patient and the patient’s responses, including body language and features of the examination and treatment. Pharmacy students must be able to read and interpret prescriptions and medical orders, as well as to inspect medicine for deterioration or expiration.

Tactile
Candidates and students must have sufficient tactile ability for physical assessment. They must be able to perform palpation and functions of physical examination and/or those related to therapeutic intervention. Pharmacy students must be able to measure and compound, sometimes transferring from container to container, and to carry out sterile procedures. Dental students must be able to deliver appropriate treatment using high technology equipment such as dental drills and surgical instruments.

Sensory
Osteopathic students and physician assistants are required to have an enhanced ability to use their sensory skills. These enhanced tactile and proprioceptive sensory skills are essential for appropriate osteopathic evaluation and treatment of patients.

Behavioral and Social Attributes
Candidates and students must possess the emotional health required for full use of their intellectual abilities; the exercise of good judgment; the ability to take responsibility for their own actions with respect to policies, protocols, and process, with faculty, students, staff, patients, patient surrogates, and administration during the student’s educational program; the prompt completion of all responsibilities attendant to the diagnosis and care of patients; and the development of mature, sensitive, and effective relationships with the patients. Candidates and students must be able to physically tolerate taxing workloads, to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal skills, interest, and motivation are all personal qualities that will be assessed during the admissions and education process.
College of Osteopathic Medicine
College of Osteopathic Medicine

Mission Statement
The mission of the College of Osteopathic Medicine is to provide learner-centered education, both nationally and internationally, for osteopathic medical students, postgraduate trainees, physicians, and other professionals. Through its interprofessional programs, the college prepares competent and compassionate lifelong learners; supports research, scholarly activity, and community service; and advocates for the health and welfare of diverse populations, including the medically underserved.

An Osteopathic Physician
Two types of complete physicians may practice medicine in all 50 states: the Doctor of Osteopathic Medicine (D.O.) and the Doctor of Medicine (M.D.). While both types of physicians are trained in all aspects of patient care, D.O.s offer a distinct, holistic approach to medicine.

Osteopathic medicine is distinguished by an emphasis on primary care, by using osteopathic manipulative medicine when necessary, and by a tradition of caring for patients in underserved rural and urban areas.

Osteopathic physicians recognize the relationship between physical structure and organic function and view the human body as an interdependent unit rather than an assortment of separate parts and systems.

While all medical and surgical specialties are represented within the osteopathic medical profession, the training of vitally needed family physicians and the drive to reach rural, minority, geriatric, and indigent populations, make the osteopathic medical profession unique.

We are proud of our success in producing vitally needed primary care physicians—nearly 70 percent of our graduates practice in the primary care disciplines of family medicine, general internal medicine, or general pediatrics—and we remain committed to training physicians capable of delivering the highest standards of total-patient care in all practice settings.

Accreditation
Nova Southeastern University College of Osteopathic Medicine has been granted accreditation by the Commission on Osteopathic College Accreditation of the American Osteopathic Association. This body is recognized by the U.S. Department of Education and the Council of Post-Secondary Accreditation as the accrediting agency for colleges educating osteopathic physicians and surgeons.

Administration

Assistant Dean of Faculty Affairs
Jennifer Jordan, Ed.D.
Assistant Dean of Medical Education
Doris Newman, D.O.
Assistant Dean of Osteopathic Clinical Education
Mission Statement
The Doctor of Osteopathic Medicine Program in the College of Osteopathic Medicine is dedicated to student-centered osteopathic medical education to produce exemplary osteopathic physicians known for competent and compassionate care.

Admissions Requirements
Applicants for the first-year class must meet the following requirements prior to matriculation:

1. have a bachelor's degree from a regionally accredited college or university (A minimum of 90 semester hours of coursework from a regionally accredited college or university may be considered for admission.)

2. have successfully completed (with a grade of 2.0 or higher)
   - 8 semester hours of biological science (biology, embryology, genetics, microbiology, physiology, etc.)
   - 8 semester hours of general chemistry with laboratory
   - 8 semester hours of organic chemistry with laboratory (Biochemistry may be substituted for all or part of Organic Chemistry II)
   - 8 semester hours of physics
   - 6 semester hours of English/humanities (must include 3 semester hours of English)
   
Note: These are minimum academic requirements for admission. Students are encouraged to take additional upper-level science, behavioral sciences, and humanities courses. It is recommended that applicants complete at least one course in biochemistry and one course in physiology.

3. A minimum cumulative and science GPA of 3.0 is required. However, the dean is empowered to evaluate the total qualifications of every student and to modify requirements in unusual circumstances.

4. All applicants are required to take the Medical College Admission Test (MCAT). Applications for the MCAT may be obtained online at aamc.org, from your college's preprofessional adviser's office, by calling (319) 337-1357, or by writing directly to
   
   Medical College Admission Test Program Office
   2255 North Dubuque Road
   P.O. Box 4056
   Iowa City, IA 52243-4056
   
   MCAT scores must be no more than three years old prior to the application cycle.

   The discipline and intensive study required by the osteopathic medicine curriculum make the attainment of a superior GPA in undergraduate studies essential.

   The college receives more than 6,500 applications a year, from which only 230 students are chosen. These students have varied backgrounds, and while some many enter the college directly from an undergraduate program, other students come from successful careers.

   The Committee on Admissions recommends applicants to the dean on the basis of demonstrated academic excellence, leadership, compassion, and commitment to the osteopathic medical profession.

Application Procedures
The college participates in the American Association of Colleges of Osteopathic Medicine Application Service (AACOMAS) for the receipt and processing of all applications. AACOMAS takes no part in the selection of students.

Applicants should submit applications electronically through AACOMAS Online, an interactive, web-based application at aacom.org. For questions, applicants may call (301) 968-4190.

The following steps are necessary to the primary application process.

1. The applicant must submit the following materials to AACOMAS by January 15:
   - completed AACOMAS application
   - official transcripts from the registrars of all colleges or universities attended, mailed directly to AACOMAS by the college or university
   - MCAT scores (must be no more than three years old prior to the application cycle)

2. The applicant must submit the following to the college by March 1:
   - a secondary application, which will be sent to the applicant by the college upon receipt of the AACOMAS application
• a nonrefundable application fee of $50
• a letter of recommendation from the preprofessional committee, or, if such a committee does not exist, then three letters of evaluation: two from science professors, and one from a non-science professor
• a letter of recommendation from a physician

A personal interview is a part of the admission process; however, being interviewed is not a guarantee of admission. Not all applicants will be granted an interview. Those selected for an interview will be notified of the date and time of such interview by the Office of Admissions.

Notice of acceptance will be on a rolling or periodic schedule; therefore, early completion of the application is in the best interest of the applicant because of the limited number of spaces available in each class.

After acceptance, final and official documents and requirements must be received by the Office of Admissions within 90 days following the start of the first term. If these final and official documents are not received, or other requirements are not met by that time, the student will not be able to continue his or her enrollment. Financial aid will not be disbursed to anyone until he or she has been fully admitted as a regular student (all admissions requirements have been approved by the program office).

Tuition and Fees

1. The tuition for 2016–2017 (subject to change by the board of trustees without notice): $49,639 for Florida residents and $54,806 for out-of-state students. Eligible students must request in-state tuition on their application.

For tuition purposes, a student’s Florida residency status (in-state or out-of-state) will be determined at matriculation and will remain the same throughout the entire enrollment of the student at NSU. Accordingly, tuition will not be adjusted as a result of any change in residency status after initial enrollment registration.

2. For first-year students, a microscope/laboratory fee of $100 is required. In addition, a Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.

Additional COM program fees apply as follows:

Year 1 Mandated Review Course and Clinical Laboratory Fee: $563.25
Clinical Rotation Fee: $1,000

Year 2 Mandated Review Course and Clinical Laboratory Fee: $839 ($275 discount for total charge to student of $564)
Clinical Rotation Fee: $1,000

Year 3 Mandated Review Course Fee: $797 ($275 discount for total charge to student of $522)
Clinical Rotation Fee: $1,000

3. Acceptance fee is $1,250. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be deducted from the tuition payment, but is not refundable in case of a withdrawal.

4. Deposit is $750. This advance payment is due March 15 or at the date specified below for those accepted after March 15. It will be deducted from the tuition payment, but is not refundable in the event of a withdrawal.

Due Dates for Acceptance Fees and Deposits

a. Applicants accepted prior to November 15 will have until December 14 to pay the acceptance fee and until March 15 to pay the deposit.

b. Applicants accepted between December 15 and January 14 will have 30 days to pay the acceptance fee and until March 15 to pay the deposit.

c. Applicants accepted between January 15 and February 28 will have 14 days to pay their acceptance fee and until March 15 to pay the deposit.

d. Those accepted between March 1 and May 14 will be required to submit their combined acceptance and deposit fees within 14 days.

e. Anyone accepted on May 15 or later will be asked to immediately pay the combined acceptance fee and deposit of $2,000.

The first semester’s tuition and fees, less the $2,000 previously paid, are due upon receipt of the NSU invoice. Students will be billed tuition for each subsequent semester. Students will not be admitted until their financial obligations have been met.

The financial ability of applicants to complete their training at the college is important because of the limited number of positions available in each class. Applicants should have specific plans for financing four years of medical education, including tuition and fees, living expenses, books, equipment, clinical rotation travel, and miscellaneous expenses.

Schedule of Application for Admission Cycle

June—Application cycle for the next academic year begins. Inquiries are invited by Nova Southeastern University College of Osteopathic Medicine, and AACOMAS forms are made available.

July—Credentials sent to AACOMAS are processed, and applicant records are forwarded to Nova Southeastern University College of Osteopathic Medicine. A supplemental application is then sent to the applicant.
When the supplemental application is completed and returned and when recommendations are received, the completed application is evaluated for interview.

**August**—Personal interviews start.

**January 15**—Deadline for AACOMAS applications.

**March 1**—Deadline for NSU-COM supplemental applications.

### Technology Requirements

Students are required to own an Apple iPad® second generation or newer with a minimum of 64 GB of memory. As part of the curriculum, students will develop medical research skills, hone and refine information management skills, and be exposed to medical informatics. Students have access to a variety of computer educational resources and course material, including:

- Blackboard courses, including SharkMedia recordings
- examinations via ExamSoft
- electronic textbooks through the NSU bookstore and NSU libraries
- interactive learning via Turning Point®
- KBIT cases
- medical Spanish
- Web modules
- electronic library
- Up-To-Date
- academic/board review materials
- clinical procedures resources

A campus-wide wireless network exists to provide students with electronic access anywhere on campus.

### Academics

#### Transfer of Credit

Circumstances may warrant that a student enrolled in a medical school seeks to transfer to another institution. Credits may be transferred from medical schools and colleges accredited by the Commission on Osteopathic College Accreditation (COCA) of the American Osteopathic Association or by the Liaison Committee on Medical Education (LCME).

- Transfers from a medical school accredited by the COCA or the LCME shall require that, at minimum, the last two years of instruction be completed within the NSU College of Osteopathic Medicine.
- Transfers from an LCME-accredited medical school must complete NSU College of Osteopathic Medicine’s requirement for osteopathic manipulative medicine prior to graduation.
- Transfer credits will only be given if the student is in good academic standing at, and eligible for readmission to, the previously attended COCA- or LCME-accredited medical school.
- Credit is only given for completed courses with grades of 70 percent (2.0) or greater that fulfill the COM’s graduation requirements.

Anyone wishing to transfer to NSU College of Osteopathic Medicine must meet the following criteria:

1. make a formal application to NSU College of Osteopathic Medicine Office of Admissions
2. satisfy all admission requirements to NSU College of Osteopathic Medicine, which include submitting official transcripts of all college work (including osteopathic transcripts); MCAT scores; National Board scores, if taken; and letters of evaluation
3. be in good standing at the transferring institution, as documented by a letter from the dean of the transferring institution
4. supply a letter of recommendation from a faculty member of the transferring institution
5. supply a written statement outlining reasons for request for transfer

Decisions on transfer are made by the dean. No applicant will be accepted without an interview. The decision will be based on factors which include, but are not limited to, academic record, interview, circumstances leading to the transfer request, available space, and admission standards.

#### Advanced Placement

Request for advanced placement for any course at Nova Southeastern University College of Osteopathic Medicine must be declared and all supporting documentation must be submitted by the student no later than 45 days prior to the first day of class. The student must present all supporting documents to the College of Osteopathic Medicine Office of Student Affairs.

The student will be required to attend all classes and take all examinations until the disposition of the advanced placement request is finalized.

A student must have significant training or history of accomplishments in a basic science area that warrants consideration for advanced placement examinations. Students must pass a comprehensive examination given for the purpose of determining the student’s competency in the subject involved. The passing requirement will be determined by the College of Osteopathic Medicine.
The decision regarding the request for advanced standing will be transmitted in writing to the student by the dean. The Office of the Registrar will be appropriately notified. Courses for which advanced standing is granted will be designated as advanced placement on the student’s transcript and will not show a grade or contribute to the student’s grade point average.

**Course of Study**

The College of Osteopathic Medicine has a dedicated faculty; well established affiliations with medical centers, hospitals, and health care systems; a nationally recognized rural medicine program; and a mission to educate the finest osteopathic physicians possible. We place our students and residents at the nation’s fourth largest public hospital system—the North Broward Hospital District—or at one of our regional academic centers throughout the state to improve continuity and coordination of clinical education within our vast and growing clinical training network.

Our innovative curriculum is designed to fulfill our mission of training primary-care physicians. The design of the curriculum is based on successful academic models—carefully developed and integrated. It emphasizes interdisciplinary collaboration, guiding students to develop a holistic, and more importantly, an osteopathic approach to medicine. We continually correlate basic scientific information with fundamental clinical application. Students are exposed to clinical settings in their first semester, which gives them the opportunity to prepare for the “real world” of medicine.

This clinical exposure continues into the second year when students have increased opportunity to interact with standardized patients on campus as well as be involved, under physician supervision, with real patients in the office and hospital setting.

A notable aspect of the clinical program is a required three-month rotation in a rural practice setting. In rural clinics throughout the state of Florida, our students provide health care to medically underserved and indigent patients. Our students learn to treat various patients whose lifestyles, practices, and attitudes toward health care differ from those seen in more traditional training sites. This enriching educational experience is one that cannot be taught in the classroom.

Physicians do not work in a vacuum, but rather in a health care team, and NSU promotes interdisciplinary cooperation whenever possible. Students share faculty members and campus facilities with NSU’s pharmacy, dental, optometry, physician assistant, physical therapy, occupational therapy, public health, nursing, and medical science students.

</table>

Electives may be taken in half-month or one-month increments.  
No more than four half-month electives may be taken in the fourth year.
COM 5010—Gross Anatomy
This course will introduce the students to the study of the structural and functional features of the human trunk, extremities, head, and neck. The course includes the dissection of cadavers by teams of students. (6.5 credit hours)

COM 5011—Medical Neuroanatomy
This course will introduce students to structural, functional, and developmental features of the human nervous system with an emphasis on clinical concepts. This course is an introduction to neurology. (3.0 credit hours)

COM 5020—Medical Histology
Histology is the study of the microscopic anatomy of the cell, tissues, and organs of the body. In this course, the normal microscopic anatomy of the parts of the body is presented and each part is correlated with its function. Histology is a course that serves as a bridge between the disciplines of physiology, gross anatomy, and pathology. Basic physiological concepts and relevant areas in pathology are presented with the goal of understanding the function of, as well as any abnormal changes that may occur in, the cells and organs of the body. This course includes an introduction to human embryology, with emphasis on the embryo’s first eight weeks. The study of embryology is a foundation for understanding normal anatomy and birth defects. (3.5 credit hours)

COM 5021—Medical Biochemistry
Clinical practice is changing so rapidly that the physician must be a perpetual student and must be able to read and understand the literature in order to keep up to date. This course offers the fundamentals of biochemistry, many aspects of which are currently and directly relevant to medicine. Other aspects serve to round out scientific preparation, and in the future, may emerge at the center of medical advances. This course covers biochemical reactions and pathways of normal human health; nutrition from a biochemical viewpoint; and the biochemistry of the body systems including, but not limited to, the gastrointestinal, pulmonary, renal, musculoskeletal, and endocrine systems. (5.5 credit hours)

COM 5030—Medical Microbiology I
This course will be presented in lecture/required readings format to emphasize immunology, bacteria, and viruses involved in infectious diseases. The immunology section covers both innate and adaptive immune responses of humans with a focus on the host’s interaction with an environment containing a variety of potential pathogens. In addition, other aspects of immunology, such as immunodeficiencies, autoimmunities, allergies, graft rejection, and immunity to tumors, are presented. Bacteria and viruses commonly involved in human diseases, as well as newly and reemerging pathogens, will be presented from a clinically relevant perspective. The sections on microorganisms will stress practical clinical skills by presenting pathogens employing a systems approach involving case studies, visual illustrations of typical clinical symptoms, and the most common therapies. (5.5 credit hours)

COM 5031—Medical Microbiology II
This course will consist of lectures on parasites and fungi that produce infectious disease states. Parasites and fungi commonly involved in human diseases, as well as new and reemerging pathogens, will be presented from a clinically relevant perspective in a systems format. The sections will stress practical clinical skills by presenting case studies, visual illustrations of typical clinical symptoms, and the most common therapies. (1.5 credit hours)

COM 5061—Medical Physiology I
This course reviews the physiological functions and regulation of the major human organ systems. Topics covered in the first semester include cell physiology, membranes and membrane transport mechanisms, electrophysiology, muscle physiology, the autonomic nervous system, and cardiovascular physiology. (3.0 credit hours)

COM 5080—Basic Life Support
An American Heart Association course that includes both didactic material (including methods of reducing cardiovascular risk) and instruction in the psychomotor skills necessary for the initial resuscitation of the cardiac arrest patient. (1.0 credit hour)

COM 5121—Osteopathic Principles and Practice (OPP) I
OPP I presents the first unit of a four-course sequence that addresses osteopathic theory, philosophy, and manipulative procedures. OPP I provides an introduction to the general principles and techniques of osteopathic diagnosis of the axial skeleton and paraspinal regions. Student doctors will be exposed to basic terminology and examination skills through lecture, demonstration, and hands-on performance. (4.0 credit hours)

COM 5122—Osteopathic Principles and Practice (OPP) II
OPP II covers the second unit of a four-course sequence that addresses osteopathic theory, philosophy, and osteopathic manipulative procedures. OPP II provides
an introduction to the general principles and techniques of osteopathic diagnosis of the axial skeleton and paraspinal regions, including the lumbar, thoracic, and cervical spines, as well as the rib cage. Student doctors will be exposed to basic terminology and examination skills through lecture, demonstration, and hands-on performance. (3.5 credit hours)

COM 5171—Interdisciplinary Generalist Curriculum Preceptorship I
The Interdisciplinary Generalist Curriculum (IGC) Preceptorship for first-year students is composed of the IGC Primary Care Physician Mentor Preceptorship and the Explore Selective. The premise of the IGC Program is that exposure to professional role models is a significant determinant of medical students’ career choices. In addition, an early clinical experience is an essential learning component for medical students to begin to correlate classroom knowledge with actual patient encounters. The IGC Preceptorship I and II courses expose first-year medical students to clinical settings by matching each student with a community-based physician mentor for a primary care rotation. Based on selection preferences, students are also assigned to an Explore Selective in either an Osteopathic Principles and Practice (OPP) clinic on or off campus, a College of Osteopathic Medicine in Community Service (COMServe) site, a clinical subspecialty session from one of at least five disciplines, or a prerequisite training program that will enable students to provide special services (e.g., HIV testing, reproductive health counseling). (1.0 credit hour)

COM 5172—Interdisciplinary Generalist Curriculum Preceptorship II
The Interdisciplinary Generalist Curriculum (IGC) Preceptorship for first-year students is composed of the IGC Primary Care Physician Mentor Preceptorship and the Explore Selective. The premise of the IGC Program is that exposure to professional role models is a significant determinant of medical students’ career choices. In addition, an early clinical experience is an essential learning component for medical students to begin to correlate classroom knowledge with actual patient encounters. The IGC Preceptorship I and II courses expose first-year medical students to clinical settings by matching each student with a community-based physician mentor for a primary care rotation. Based on selection preferences, students are also assigned to an Explore Selective in either an Osteopathic Principles and Practice (OPP) clinic on or off campus, a College of Osteopathic Medicine in Community Service (COMServe) site, a clinical subspecialty session from one of at least five disciplines, or a prerequisite training program that will enable students to provide special services (e.g., HIV testing, reproductive health counseling). (1.0 credit hour)

COM 5800—Foundations and Applications of Clinical Reasoning I
This course will integrate basic and clinical sciences in a case-based approach. Faculty members from multiple disciplines will guide students in developing the skills necessary to effectively assimilate knowledge from the basic sciences into the disease processes and apply this knowledge to varied patient presentations. (1.5 credit hours)

COM 5801—Foundations and Applications of Clinical Reasoning II
This course will integrate basic and clinical sciences in a case-based approach. Faculty members from multiple disciplines will guide students in developing the skills necessary to effectively assimilate knowledge from the basic sciences into the disease processes and apply this knowledge to varied patient presentations. (1.5 credit hours)

COM 5802—Tobacco Use and Dependence
This course will focus on providing first-year osteopathic medical students with knowledge and skills-based training covering the following topics: (1) health effects of tobacco use; (2) pharmacology and drug delivery systems in tobacco cessation; (3) nicotine addiction; and (4) attitude and behavioral changes in tobacco cessation. (1.0 credit hours)

COM 5830—Physical Diagnosis I
Students will learn the components of a patient history and physical examination and will develop effective interviewing techniques and physical examination skills. The course will consist of assigned readings, lectures, and laboratory sessions in which diagnostic techniques will be practiced and performed by students under faculty assistance and supervision. Simulation manikins and standardized patients will be utilized in training students to perform a modified history and physical examination. (1.5 credit hours)

COM 5840—Physical Diagnosis II
Students will learn the components of a complete history and physical examination and be able to recognize normal findings in a healthy patient, as well as some abnormal findings that may represent disease. In addition, they will begin to develop proper documentation skills for both patient history and physical exam findings. This will be accomplished through a series of write-ups and SOAP notes on the various history and physical exam areas taught throughout the semester. (1.5 credit hours)
COM 5835—Humanism in Medicine I
This course consists of lectures, small group assignments, patient panel discussions, journaling, and online learning modules that run throughout the M1 year of the medical curriculum. The first semester course covers the broad humanism topics of physician/patient communication and cultural competency. The course is designed to be an innovative and forward-looking way of linking the humanities and social sciences to the practice of medicine. Throughout the course, evaluations are used to measure the student’s mastery of concepts through group assignments, participation in class discussion, journaling, simulated patient experiences, self-assessment tools, and online experiences. (1.5 credit hours)

COM 5845—Humanism in Medicine II
This course consists of interactive lectures, small group assignments, patient panel discussions, journaling, and online learning modules that run throughout the M1 year of the medical curriculum. The second semester course covers the humanism topics of medical ethics, social issues (including domestic violence, physician and patient addiction, and the homeless population), and wellness (including nutrition, exercise, complementary and alternative medicine, spirituality, public health, and health sexuality). The course is designed to be an innovative and forward-looking way of linking the humanities and social sciences to the practice of medicine. Throughout the course, evaluations are used to measure the student’s mastery of concepts through group assignments, participation in class discussion, journaling, self-assessment tools, and online experiences. (2.0 credit hours)

COM 5830—Principles of Radiology
This course provides an overview of common imaging modalities used in clinical practice. The course syllabus, as well as selected course content and radiological images, will be posted on the student Blackboard throughout the duration of the course. It is the students’ responsibility to visit the Blackboard prior to and after each lecture and the final exam. Students are responsible for knowing and understanding all posted content and being able to interpret all posted radiological images. Students are also expected to complete the required reading prior to each lecture. (1.0 credit hour)

COM 5990—Preclinical Medical Science Review
The study of the medical sciences contains a broad scope of knowledge in both science disciplines and organ systems of the body. This information is the foundation of knowledge needed for study of human body functions and diseases. It is essential to master this knowledge to be successful in both the medical school curriculum and medical licensing examinations. This course provides an opportunity for students to complete a review of medical science content using an independent study program. It allows students to work at their own pace to prepare for upcoming courses within the medical school curriculum. (3.0 credit hours)

COM 6000—Principles of Clinical Medicine I
This course has several components. Using multiple learning modalities, the course begins in the fall semester and continues as Principles of Clinical Medicine II during the winter semester. The components of the course include Interactive Learning Group (ILG), a problem-based, small group using patient cases for discussion and analysis with a clinical facilitator; Standardized Patient Encounters (SPE) with an interpersonal skills review session—a one-on-one student experience with patients who have been trained to portray medical problems; Clinical Skills Exam (CSE), a cumulative examination at the end of the semester similar to the SPE but involving multiple clinical stations; and KBIT, an online, advanced, instructional sciences-derived, artificial intelligence-based approach to differential diagnosis training and assessment. (1.5 credit hours)

COM 6001—Principles of Clinical Medicine II
This course is a continuation of Principles of Clinical Medicine I. It has several components. Using multiple learning modalities, the course that began in the fall semester will now continue as Principles of Clinical Medicine II during the winter semester. The components of the course include Interactive Learning Group (ILG), a problem-based, small group using patient cases for discussion and analysis with a clinical facilitator; Clinical Skills Exam (CSE), cumulative examinations midway and at the end of the semester involving multiple clinical stations; lectures on male and female exams; guided practical sessions for male and female exams; and KBIT, an online, advanced, instructional sciences-derived, artificial intelligence-based approach to differential diagnosis training and assessment. (1.0 credit hours)

COM 6005—Medical Jurisprudence
An attendance-required, mandatory, interactive program involving the issues of law that impact on a medical student and physician. Specific vignettes, clinical interactions, and role play are used to underscore some of the issues concerning actions by the Board of Osteopathic Medicine, and the issues around malpractice. Legal principles and specific cases involved in medical negligence, as well as those factors that also adversely affect the practice of osteopathic medicine, will be emphasized. (0.5 credit hours)

COM 6040—Principles of Pathology
The purpose of this course is to introduce the fundamental concepts of general pathology so the student may understand the basic pathological processes involved in
COM 6050—Principles of Pharmacology
This 30-hour course consists of basic pharmacological concepts and principles needed for the applied clinical courses to follow during the semester. (2.0 credit hours)

COM 6082—Pediatric Advanced Life Support
PALS presents a systematic, interactive approach dealing with the survival of critically ill and injured children. This care includes a broad spectrum of services, from early identification of problems through pre-hospital, hospital, and rehabilitative care. It also presents a way for resuscitation providers to treat a desperately ill patient in a coordinated way, regardless of whether the response team consists of one person, two people, or a team. PALS-trained providers will use the same guidelines and approaches inside and outside the hospital, as well as nationally and internationally. This course will consist of 13 hours of interactive instruction supplemented by audiovisuals; demonstration of required skills on Pediatric Advanced Life Support Manikins; and practice using defibrillators, EKG monitors, and intubation equipment. Instruction will be formatted on case-based scenarios. (1.0 credit hour)

COM 6090—Geriatrics
This course of instruction provides an overview of geriatric problems or syndromes affecting older adults, using a case-based approach with an emphasis on differential diagnosis, systematic evaluation, and management incorporating the interprofessional team. Concepts of physiological changes with aging and psychosocial and functional aspects, as well as their effects on general medical disorders, will be addressed. (1.0 credit hour)

COM 6091—Hematopoietic and Lymphoreticular System
This course covers the diagnosis and management of diseases of the hematopoietic and lymphoreticular system. It will include a discussion of cancer chemotherapy and principles of surgical oncology. Indications for, and adverse reactions to, blood transfusion will also be addressed. The systems component of the interdisciplinary curriculum involves participation by the Departments of Internal Medicine, Surgery, Pathology, and Pharmacology. Traditional classroom lecture topics are integrated so that clinical aspects, pathophysiology of diseases, and disorders of each system are addressed. (1.5 credit hours)

COM 6092—Respiratory System
This course presents pathophysiology, diagnosis and management of selected respiratory disorders, infectious disorders, and neoplasms of the respiratory system. Ventilatory functions and management of respiratory failure are described. Speakers are from the Departments of Internal Medicine, Family Medicine, Pathology, Pharmacology, OPP, and Surgery (including the Division of Otorhinolaryngology). This course consists of lectures supplemented by independent reading assignments and instruction in basic procedures. (2.5 credit hours)

COM 6093—Cardiovascular System
This course covers pathophysiology, diagnosis, and management of common cardiovascular disorders. (2.5 credit hours)

COM 6094—Gastrointestinal System
This course covers pathophysiology, diagnosis, and management of gastrointestinal diseases and diseases of the lower and biliary system. The instruction involves the participation of faculty members from the Departments of Internal Medicine (Gastroenterology division), Surgery, Pediatrics, Pathology, Pharmacology, and Osteopathic Principles and Practice. (2.5 credit hours)

COM 6095—Endocrine System
This course presents the pathophysiology, diagnosis, and management of hormonal disorders, including diseases of the endocrine glands, as well as neoplasms and infectious diseases affecting the endocrine system. The system component of the interdisciplinary curriculum involves participation by the Departments of Internal Medicine, Pediatrics, Surgery, Pathology, Pharmacology, and Osteopathic Principles and Practice. Lectures are integrated so that clinical aspects, pathophysiology of diseases, and disorders of each system are addressed. (2.0 credit hours)
COM 6106—ECG
This course provides an overview of electrocardiography and cardiopulmonary auscultation used in clinical practice. It will help students obtain a basic understanding of selected electrocardiographic and cardiopulmonary auscultation findings and will foster an interest in continued learning in these fields. This course utilizes a standard lecture format as well as interactive auscultatory learning sessions that may be supplemented with learning technologies and modalities, such as reading assignments. (1.5 credit hours)

COM 6107—Musculoskeletal System
This course introduces students to diseases and other disorders of the musculoskeletal system; the pathophysiology, diagnosis, and management of rheumatologic disorders; orthopedics; and physical medicine and rehabilitation. Pathology, pharmacology, osteopathic principles and practice, instruction in basic procedures, and independent reading assignments will be integrated into this course. (2.5 credit hours)

COM 6108—Psychiatry and Behavioral Medicine
Through lecture and self-study, this course introduces the fundamental clinical concepts and official nomenclature used within the realm of psychiatry and behavioral medicine. This includes the use of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM) for the evaluation and diagnosis of the major psychiatric disorders. Current methodologies of treatment, communication with patients, and select topics in behavioral medicine will be discussed. (2.0 credit hours)

COM 6109—Renal/Urinary System
This course presents renal and genitourinary pathophysiology; glomerular and tubulointerstitial diseases; acute and chronic kidney failure; congenital disorders; metabolic, functional, and benign disorders; and neoplasms of the renal/urinary system. The instruction involves the participation of the Departments of Internal Medicine (Nephrology division), Surgery (Urology division), Pathology, and Osteopathic Principles and Practices. (2.5 credit hours)

COM 6110—Women’s Health System
The course begins with the role of the history and physical examination in a diagnostic approach to the female patient. This is followed by a review of the reproductive cycle and by general gynecologic topics including the evaluation and treatment of the victim of sexual assault, the embryology and anatomy of the female genitalia, and the application of osteopathic principles and practice to women’s health. Lectures dealing with disorders of the breast serve as a transition between the gynecologic topics and the lectures dealing with normal and abnormal pregnancy. Genomics and minimally invasive surgical techniques, including robotic surgery, will be discussed. (3.5 credit hours)

COM 6111—Pediatrics
This course of instruction covers the details of normal and abnormal growth and development in children. Issues involving preventive care and health interventions of newborns, growing children, and adolescents will be addressed. Specifics regarding illnesses in the integumentary, hematologic, respiratory, cardiac, gastrointestinal, endocrine, renal, and neuromuscular systems will be presented. (2.5 credit hours)

COM 6112—Neurology
This course, consisting of 38 hours presented in a multidisciplinary approach, covers pathology, neurologic dysfunction, pathophysiologic mechanisms of neurologic diseases, and pharmacotherapeutics. In addition, it addresses rehabilitation of nervous system dysfunctions and introduces the students to ophthalmology. (2.5 credit hours)

COM 6123—Osteopathic Principles and Practice (OPP) III
This course presents the third unit in a four-course sequence that addresses osteopathic theory, philosophy, and manipulative procedures. The second-year curriculum is designed to organize all information learned in year 1 into clinical frames of reference (e.g., cardiovascular disease and OPP, sports injuries and OPP, pregnancy and OPP). The student doctor is also presented with an opportunity to review and master all techniques presented in year 1, as well as an opportunity to master advanced manipulative treatment techniques. All OPP courses are presented in lecture and laboratory sessions. Laboratories in this year are designed to both review earlier material and to present new techniques for mastery. (2.5 credit hours)

COM 6124—Osteopathic Principles and Practice (OPP) IV
This course presents the fourth unit in a four-course sequence that addresses osteopathic theory, philosophy, and osteopathic manipulative procedures. The second-year curriculum is designed to organize all information learned in year 1 into clinical frames of reference (e.g., family medicine and OPP, pediatrics and OPP, pregnancy and OPP). The student doctor is also presented with an opportunity to review and master all techniques presented in year 1, as well as an opportunity to master advanced manipulative treatment techniques. All OPP courses are presented in lecture and laboratory sessions. Laboratories in this year are designed to both review earlier material and to present new techniques for mastery. During the second half of the course, students will be required to attend one of three selectives in advanced osteopathic manipulative treatment. (2.5 credit hours)
COM 6173—Interdisciplinary Generalist Curriculum Preceptorship III
The Interdisciplinary Generalist Curriculum (IGC) Program has three components: (1) The IGC Physician Mentor Program; (2) The IGC Business of Medicine Program; (3) the College of Osteopathic Medicine in Community Service (COMServe) Experience. The premise of the IGC Program is that exposure to professional role models is a significant determinant of medical students’ career choices. In addition, an early clinical experience is an essential learning component for medical students to begin to correlate classroom, laboratory, small group, and independent learning with actual patient encounters. The IGC Preceptorship III course exposes second-year medical students to clinical settings by matching each student with a community-based physician mentor for a primary care clinical rotation where they are also exposed to the central role of the primary care physician in the management of their patients and practices. Students also learn about the business aspects of medical practice, including private and public models of health care finance and delivery and systems-based components of providing cost-effective and evidence-based medicine. As part of the IGC COMServe Experience, students also rotate through community-based clinics and other service organizations and experiences that provide health care to medically underserved or at-risk populations. (1.0 credit hour)

COM 6221—Advanced Cardiac Life Support
Advanced Cardiac Life Support (ACLS) is an American Heart Association program that is accepted and required in most hospitals and clinics throughout the United States. It is required for second-year medical students from Nova Southeastern University College of Osteopathic Medicine. ACLS presents a systematic, interactive approach to dealing with people experiencing a cardiopulmonary emergency, sudden death, or an acute cerebral vascular accident. ACLS presents a way for resuscitation providers to treat a desperately ill patient in a coordinated way, regardless of whether the response team consists of one person, two people, or a larger team. ACLS-trained providers will use the same guidelines and approaches inside and outside the hospital, as well as nationally and internationally. This course will consist of 12 hours of interactive instruction supplemented by audiovisuals; demonstration of required skills on Advanced Life Support Manikins; and practice using defibrillators, EKG monitors, and intubation equipment. Instruction will be formatted on case-based scenarios. (1.0 credit hour)

COM 6300—Foundations and Applications of Clinical Reasoning III
This course will integrate basic and clinical sciences in a case-based approach. Faculty members from multiple disciplines will guide students in developing the skills necessary to effectively diagnose and manage patients. This course also includes a two-hour mandatory academic review most weeks. (3.5 credit hours)

COM 6301—Foundations and Applications of Clinical Reasoning IV
This course will integrate basic and clinical sciences in a case-based approach. Faculty members from multiple disciplines will guide students in developing the skills necessary to effectively diagnose and manage patients. This course also includes a weekly, two-hour session of academic review. (3.0 credit hours)

COM 6990—Preclinical Academic Review
The study of the medical sciences contains a broad scope of knowledge in both science disciplines and organ systems of the body. Additionally, students must be able to analyze and apply knowledge to diagnose presentations and conditions of patients, as well as to synthesize and evaluate data to develop treatment and management plans for patients presenting with varying conditions. It is essential to master this knowledge as the medical licensing examinations are required to graduate from the College of Osteopathic Medicine. This course provides students with an in-depth review of medical science content, clinical case study, practice exam questions, and a mock board examination. This online, independent study course provides resources to the students and allows them to work at their own pace to prepare for the COMLEX Level 1 licensing examination. It provides several opportunities to assess knowledge and track the student’s progression toward preparation. (3.0 credit hours)

COM 7091—Family Medicine I
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7092—Family Medicine II
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7093—Geriatrics
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)
COM 7094—Psychiatry
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7095—Emergency Medicine
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7102—Internal Medicine I
Internal Medicine is hospital-based, content-driven specialty training that places a premium on the cognitive work and interpersonal skills necessary for providing well-patient care and for managing medical problems seen on this clinical service. Emphasis is placed on differentiating normal from abnormal history and physical findings, interpreting diagnostic tests, establishing differential diagnoses, developing skills for accurate reporting and recording of data and problems, and developing management plans—including health education for patients and families and referrals. (4.0–24.0 credit hours)

COM 7103—Internal Medicine II
Internal Medicine is hospital-based, content-driven specialty training that places a premium on the cognitive work and interpersonal skills necessary for providing well-patient care and for managing medical problems seen on this clinical service. Emphasis is placed on differentiating normal from abnormal history and physical findings, interpreting diagnostic tests, establishing differential diagnoses, developing skills for accurate reporting and recording of data and problems, and developing management plans—including health education for patients and families and referrals. (4.0–24.0 credit hours)

COM 7104—General Surgery I
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. It will also provide experience and help acquire skills in a surgical setting. (4.0–24.0 credit hours)

COM 7105—General Surgery II
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7106—Internal Medicine III
Internal Medicine is hospital-based, content-driven specialty training that places a premium on the cognitive work and interpersonal skills necessary for providing well-patient care and for managing medical problems seen on this clinical service. Emphasis is placed on differentiating normal from abnormal history and physical findings, interpreting diagnostic tests, establishing differential diagnoses, developing skills for accurate reporting and recording of data and problems, and developing management plans—including health education for patients and families and referrals. (4.0–24.0 credit hours)

COM 7110—Obstetrics and Gynecology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7131—Pediatrics/Ambulatory
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7132—Pediatrics/Hospital
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7151—Rural Medicine I
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 7152—Rural Medicine II
Rural medicine incorporates family medicine training into the rural setting and stresses the development of the independent practitioner who, with a minimum use of sophisticated technical and ancillary services, will have the ability to diagnose and formulate a treatment plan based on the data gathered through history, physical examinations, and minimal laboratory work. The core medical knowledge and practical experience gained in the didactic years and in family medicine rotations will provide the platform for learning to diagnose and provide cost-effective treatment and education for patients within the rural setting. (4.0–24.0 credit hours)
COM 7153—Domestic Rural or Urban Underserved Medicine Selective
The clerkship will expose the student to the practice of rural and urban underserved medicine in the inpatient and ambulatory environments in the United States with the aim of increasing the knowledge and awareness of multicultural health and unique value systems. It serves as an introduction to community medicine and the health care needs of the rural and urban underserved populations in the United States. (4.0–24.0 credit hours)

COM 7154—International Rural or Urban Underserved Medicine Selective
The clerkship will expose the student to the practice of rural and urban underserved medicine in the inpatient and ambulatory environments outside of the United States with the aim of increasing the knowledge and awareness of international health care systems. It will provide an introduction to pathology that is, or may become, apparent in the United States, and expose students to the unique value systems of different cultures. Students will develop an understanding of the disparities and inequalities in global health systems and observe the interrelated medical, political, economic, and environmental factors influencing health care in other countries. This rotation will serve as an introduction to community medicine and the health care needs of underserved populations around the world. (4.0–24.0 credit hours)

COM 7990—Clinical Board Review Course COMLEX 2CE
The study of the medical sciences contains a broad scope of knowledge in both science disciplines and organ systems of the body. Additionally, students must be able to analyze and apply knowledge to diagnose presentations and conditions of patients, as well as to synthesize and evaluate data to develop treatment and management plans for patients presenting with varying conditions. It is essential to master this knowledge as the medical licensing examinations are required to graduate from the College of Osteopathic Medicine. This course provides students with an in-depth review of medical science content, clinical case study, practice exam questions, and a mock board examination. This online independent study course provides resources to the students and allows them to work at their own pace to prepare for the COMLEX Level 2CE licensing examination. It provides several opportunities to assess knowledge and track the student’s progression toward preparation. (6.0 credit hours)

COM 8004—Senior Seminar
A series of presentations prior to graduation to reinforce knowledge and skills useful for the internship experience. Topics include: medical economics, risk management, on-call medication, physician impairment, professional liability, medical licensure, and emergency management. A mock trial is presented. (1.0 credit hour)

COM 8009—Emergency Medicine
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8011—Otolaryngology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8012—Family Medicine
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8014—Surgery—General
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8015—Geriatric Medicine
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8018—Internal Medicine
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8020—Radiation Oncology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8021—Medical Genetics
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)
COM 8022—Nuclear Medicine
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8023—Neurology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8024—Neurological Surgery
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8025—Obstetrics and Gynecology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8027—OPP Medicine
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8028—Ophthalmology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8029—Orthopedic Surgery
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8030—Preventive Medicine
Pain management is considered an elective rotation to be taken during fourth-year clerkships. COM students performing this elective clerkship will be exposed to patients with chronic pain syndromes and the management of these unique diseases by a physician who specializes in this area of medicine. (4.0–24.0 credit hours)

COM 8031—Pathology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8032—Pediatrics
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8035—Plastic Surgery
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8036—Psychiatry
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8037—Radiology—Diagnostic
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8038—Physical Medicine and Rehabilitation
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8040—Rural/International Medicine
Rural medicine incorporates family medicine training into the rural setting and stresses the development of the independent practitioner who, with a minimum use of sophisticated technical and ancillary services, will have the ability to diagnose and formulate a treatment plan based on the data gathered through history, physical examinations, and minimal laboratory work. The core medical knowledge and practical experience gained in the didactic years and in family medicine rotations will provide the platform for learning to diagnose and provide cost-effective treatment and education for patients within the rural setting. (4.0–24.0 credit hours)
COM 8042—Thoracic Surgery
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8044—Urology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8103—Allergy and Immunology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8104—Anesthesiology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8105—Colon and Rectal Surgery
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8108—Dermatology
The clerkship will expose the student to the practice of medicine in the inpatient and ambulatory environments. Students will be engaged in the care of patients under the direct supervision of a physician certified in a specialty. (4.0–24.0 credit hours)

COM 8170—Public Health
A structured and supervised experience at a public health agency or public health-related institution. The student will acquire skills and experiences in the application of basic public health concepts and specialty knowledge to the solution of community health problems. (4.0–24.0 credit hours)

COM 9100—Osteopathic Principles and Practice Fellowship
The Predoctoral OPP Fellowship Program is a unique opportunity that is made available to exceptional students. It expands the medical training period from four to five years by including a one-year fellowship with two years of clinical rotations. The fellowship program is a 12-month program that takes place between the M2 and M3 years. The curriculum includes guided clinical experience, teaching in the OPP courses, participation in department research activities, and a program of didactics. (8.0–48.0 credit hours)

COM 9200—Research Fellowship
The goal of the research fellowship is to provide a year-long, structured training experience in conceptualizing, conducting, and disseminating research for select medical students in the College of Osteopathic Medicine (COM). The fellowship consists of three core activities: completing academic coursework, serving as research associate on an existing research study, and participating in communication of scientific knowledge. The percentage of time each fellow will dedicate to the three activities will be outlined in an individualized fellowship training plan. Following the model of the OPP fellowship, the fellowship year will occur between the M2 and M3 years. In addition to their fellowship year, fellows will receive tuition remission for their M3 and M4 years. (8.0–48.0 credit hours)

COM 9300—Medical Spanish
This course is designed for students in health care with little or no formal background in Spanish to obtain the language skills needed to carry out a basic conversation with a Spanish-speaking patient. This course also provides students who are fluent in Spanish with the opportunity to learn medical terminology and/or to use Spanish in a patient encounter. It utilizes an online format of independent modules supplemented by optional weekly tutoring sessions. The modules focus on medical vocabulary, phrases, and grammar needed to communicate in Spanish during a patient encounter. The tutoring sessions focus on providing live practice and help with pronunciation. Students are evaluated by three online, modular quizzes and a language skills examination (a competency-based, standardized, patient assessment). (1.5 credit hours)

COM 9400—Preclinical Preceptorship
This course provides the opportunity for the student to participate in a self-guided experience in health-related fields. The student will be under the supervision of a College of Osteopathic Medicine faculty member. Publications and presentations may be generated from this experience. (2.0 credit hours)

COM 9500—Guided Study
Special assignment on a clinical or scientific subject, under faculty supervision. (2.0 credit hours)
COM 9600—Research
This course provides the opportunity for the student to participate in scientific research in health-related fields. The student will be under the supervision of a research scientist/faculty member. Publications and presentations may be generated from this experience. (3.0 credit hours)

COM 9707—Honors Histology
This course will provide an opportunity for medical students to assist first-year students with acquisition and application of basic science knowledge in histology. The goal for the enrollees will be to learn the skills necessary to facilitate self-directed learning. After a brief training period that will include specific tutoring skills training, expectations and process will be clearly discussed, and the enrollee will be expected to effectively facilitate group sessions that occur in the M1 curriculum. Specifically, the student will be assigned to facilitate a group of M1 students throughout the courses. Each session will be one–two hours, for a total of two hours per week during the semester. It is expected that enrollees will broaden their understanding of group learning, which can be used to facilitate basic science knowledge. Prerequisite: Grade of 90 or higher in NSU College of Medical Sciences Master of Biomedical Sciences histology course (3.0 credit hours)

COM 9708—Honors Microbiology I
This course will provide an opportunity for medical students to assist first-year students with acquisition and application of basic science knowledge in microbiology. The goal for the enrollees will be to learn the skills necessary to facilitate self-directed learning. After a brief training period that will include specific tutoring skills training, expectations and process will be clearly discussed, and the enrollee will be expected to effectively facilitate group sessions that occur in the M1 curriculum. Specifically, the student will be assigned to facilitate a group of M1 students throughout the courses. Each session will be one–two hours, for a total of two hours per week during the semester. It is expected that enrollees will broaden their understanding of group learning, which can be used to facilitate basic science knowledge. Prerequisite: Grade of 90 or higher in NSU College of Medical Sciences Master of Biomedical Sciences microbiology I course (5.5 credit hours)

COM 9709—Honors Microbiology II
This course will provide an opportunity for medical students to assist first-year students with acquisition and application of basic science knowledge in microbiology. The goal for the enrollees will be to learn the skills necessary to facilitate self-directed learning. After a brief training period that will include specific tutoring skills training, expectations and process will be clearly discussed, and the enrollee will be expected to effectively facilitate group sessions that occur in the M1 curriculum. Specifically, the student will be assigned to facilitate a group of M1 students throughout the courses. Each session will be one–two hours, for a total of two hours per week during the semester. It is expected that enrollees will broaden their understanding of group learning, which can be used to facilitate basic science knowledge. Prerequisite: Grade of 90 or higher in NSU College of Medical Sciences Master of Biomedical Sciences microbiology II course (6.5 credit hours)

COM 9710—Honors Biochemistry
This course will provide an opportunity for medical students to assist first-year students with acquisition and application of basic science knowledge in biochemistry. The goal for the enrollees will be to learn the skills necessary to facilitate self-directed learning. After a brief training period that will include specific tutoring skills training, expectations and process will be clearly discussed, and the enrollee will be expected to effectively facilitate group sessions that occur in the M1 curriculum. Specifically, the student will be assigned to facilitate a group of M1 students throughout the courses. Each session will be one–two hours, for a total of two hours per week during the semester. It is expected that enrollees will broaden their understanding of group learning, which can be used to facilitate basic science knowledge. Prerequisite: Grade of 90 or higher in NSU College of Medical Sciences Master of Biomedical Sciences biochemistry course (1.5 credit hours)

COM 9700—Excellence in Peer Mentoring
This course offers current students the opportunity to participate in the COM Excellence in Peer Mentoring Development (EPM) Program. The EPM program provides additional knowledge in advising, supporting, conflict resolution, and communicating skills. (3.0 credit hours)

COM 9703—Honors Anatomy
This course will provide an opportunity for medical students to assist first-year students with acquisition and application of basic science knowledge in anatomy. The goal for the enrollees will be to learn the skills necessary to facilitate self-directed learning. After a brief training period that will include specific tutoring skills training, expectations and process will be clearly discussed, and the enrollee will be expected to effectively facilitate group sessions that occur in the M1 curriculum. Specifically, the student will be assigned to facilitate a group of M1 students throughout the courses. Each session will be one–two hours, for a total of two hours per week during the semester. It is expected that enrollees will broaden their understanding of group learning, which can be used to facilitate basic science knowledge. Prerequisite: Grade of 90 or higher in NSU College of Medical Sciences Master of Biomedical Sciences anatomy course (6.5 credit hours)
COM 9704—Honors Neuroanatomy
This course will provide an opportunity for medical students to assist first-year students with acquisition and application of basic science knowledge in neuroanatomy. The goal for the enrollees will be to learn the skills necessary to facilitate self-directed learning. After a brief training period that will include specific tutoring skills training, expectations and process will be clearly discussed, and the enrollee will be expected to effectively facilitate group sessions that occur in the M1 curriculum. Specifically, the student will be assigned to facilitate a group of M1 students throughout the courses. Each session will be one–two hours, for a total of two hours per week during the semester. It is expected that enrollees will broaden their understanding of group learning, which can be used to facilitate basic science knowledge. Prerequisite: Grade of 90 or higher in NSU College of Medical Sciences Master of Biomedical Sciences neuroanatomy course (3.0 credit hours)

COM 9705—Honors Physiology I
This course will provide an opportunity for medical students to assist first-year students with acquisition and application of basic science knowledge in physiology. The goal for the enrollees will be to learn the skills necessary to facilitate self-directed learning. After a brief training period that will include specific tutoring skills training, expectations and process will be clearly discussed, and the enrollee will be expected to effectively facilitate group sessions that occur in the M1 curriculum. Specifically, the student will be assigned to facilitate a group of M1 students throughout the courses. Each session will be one–two hours, for a total of two hours per week during the semester. It is expected that enrollees will broaden their understanding of group learning, which can be used to facilitate basic science knowledge. Prerequisite: Grade of 90 or higher in NSU College of Medical Sciences Master of Biomedical Sciences Physiology I course (3.0 credit hours)

COM 9706—Honors Physiology II
This course will provide an opportunity for medical students to assist first-year students with acquisition and application of basic science knowledge in physiology. The goal for the enrollees will be to learn the skills necessary to facilitate self-directed learning. After a brief training period that will include specific tutoring skills training, expectations and process will be clearly discussed, and the enrollee will be expected to effectively facilitate group sessions that occur in the M1 curriculum. Specifically, the student will be assigned to facilitate a group of M1 students throughout the courses. Each session will be one–two hours, for a total of two hours per week during the semester. It is expected that enrollees will broaden their understanding of group learning, which can be used to facilitate basic science knowledge. Prerequisite: Grade of 90 or higher in NSU College of Medical Sciences Physiology II course (4.5 credit hours)

COM 9990—Community Service
NSU-COM students are enrolled in the Community Service Course in order to provide direct community service to improve the world around them, in the best traditions of holistic and complimentary care. The goal of the NSU-COM Community Service Program is to provide altruistic service to the community at large, treating all people with dignity and respect, to foster among NSU-COM students a sense and habit of stewardship for people and the environment. (2.0 credit hours)

Affiliated Hospitals
The College of Osteopathic Medicine affiliates with a large variety of teaching partners throughout local, regional, and national territories to provide valuable clinical training experiences. A sample selection of these sites is highlighted below.

Aventura Hospital and Medical Center
North Miami, Florida

Bethesda Health, Inc.
Boynton Beach, Florida

Broward Health System
South Florida locations

Florida Medical Center
Fort Lauderdale, Florida

GEO Care, Inc.
Pembroke Pines, Florida

Good Samaritan Hospital
West Islip, New York

Jackson Memorial Hospital
Miami, Florida

Jackson North Medical Center
Jacksonville, Florida

Lakeside Medical Center
Belle Glade, Florida

Largo Medical Center
Largo, Florida

Larkin Community Hospital
Miami, Florida

Lee Memorial Health Systems
Fort Myers, Florida
Special Academic Programs

The Interdisciplinary Generalist Curriculum (IGC) Program

The IGC Program exposes medical students to primary care clinical settings from the beginning of their first year, with the long-term goal of increasing the numbers of graduates who will pursue careers in family medicine, general internal medicine, and general pediatrics. The premise of the program is that exposure to professional role models is a significant determinant of medical students’ career choices, and that an early clinical experience is an essential learning component for medical students to begin to correlate classroom knowledge with actual patient encounters. The IGC Program is composed of three components: (1) the IGC Physician Mentor Program, (2) the IGC Business of Medicine/Managed Care Program, and (3) the College of Osteopathic Medicine in Community Service (COMServe) Program.

IGC Physician Mentor Program

Students are placed with physician mentors, either one or two students at a time. They may elect to switch mentors every semester and are required to switch primary care disciplines and mentors after their first year. In addition to providing a broad exposure to the role of a primary care physician, the physician mentor provides the student with the opportunity to perform patient histories and physical examinations within the limits of the student’s ability, and educates the student by providing timely feedback and engaging in discussions and explanations of his or her decision making. There are approximately 140 primary care physician mentors who teach first- and/or second-year medical students in their private offices. This network of preceptors is composed of physicians in the three primary care disciplines; they are located throughout the tricounty area. Students will need a car or easy access to transportation to get to and from their IGC sites.

IGC Business of Medicine/Managed Care Program

Students learn the business aspects of practice as well as the various components of managed care organizations (MCOs). Each student is either assigned to an MCO teaching partner, or attends a special conference or seminar on health care systems, policies, and access. Students learn how a managed care organization operates by participating in seminars and small group discussions led by professionals representing various departments/experiences such as medical operations, physician committee meetings, utilization management, quality management, and provider/practice management.

IGC COMServe Program

This is the community service component of the IGC preceptorship, in which second-year medical students are involved in service learning with community health centers, public health departments, homeless assistance centers, migrant farmworker clinics, and other subsidized community clinics. The COMServe partner organizations provide health care and other needed services to medically underserved, minority, and at-risk populations.

Osteopathic Principles and Practice Laboratories

The development of the palpatory skills used for diagnosis and treatment is a significant distinction between the educational programs in osteopathic and allopathic medical schools. Stedman’s Medical Dictionary defines palpation as “examination with the hands and fingers; touching, feeling, or perceiving by the sense of touch.” Palpation in the osteopathic medical education context is the use of touch to examine the body. Palpatory skills are used in all areas of osteopathic medical practice and are especially important in the evaluation, diagnosis, and treatment of the musculoskeletal system.

The development of palpatory skills is taught in the first- and second-year osteopathic principles and practice (OPP) courses. Successful completion of these courses requires active participation in all laboratory sessions. During the two years, each student will palpate, in the laboratory setting, a variety of people, representing both genders and individuals with different body types to simulate the
Consortium for Excellence in Medical Education (CEME), established an innovative program to revolutionize learning to provide valuable primary care services to underserved areas. Students have opportunities to work together while actively participate in all skills development laboratory sessions. These skills are taught by treating and being treated by a cadre of students of both genders and with varying body types to simulate a medical practice setting.

Area Health Education Center (AHEC) Program
The mission of NSU’s Area Health Education Center (AHEC) Program is to improve the access to and the quality of primary health care service to medically underserved communities by linking the resources of academic health centers with community-based health care providers. Nova Southeastern University’s College of Osteopathic Medicine, the first medical school in the state of Florida to develop an AHEC Program, officially began its program in 1985. Since its inception, the program has worked to develop effective and comprehensive training programs that improve access to quality primary health care for Florida’s medically underserved rural and inner-city urban communities.

Our nationally recognized program now serves underserved communities and populations throughout a nearly 20,000 square mile area of South and Central Florida. Our first AHEC center—the Everglades AHEC—reaches underserved areas within a 10-county region extending from the inner city of northern Miami-Dade County to rural communities around Lake Okeechobee. Based on the success of the Everglades AHEC, the university was awarded additional funding to develop a Central Florida AHEC, which now serves nine counties and extends from Lake Okeechobee to north of Orlando. By including training programs in community settings, we expose students to the challenges, rewards, and practice opportunities related to working in medically underserved areas. Students have opportunities to work together while learning to provide valuable primary care services to the community.

Consortium for Excellence in Medical Education (CEME)
In January 1999, the College of Osteopathic Medicine established an innovative program to revolutionize clinical education and postgraduate medical training. The Consortium for Excellence in Medical Education (CEME), in affiliation with NSU College of Osteopathic Medicine, was formed to increase opportunities for postdoctoral medical training, including internships, residencies, fellowships, and continuing education programs.

The CEME is an alliance of affiliated clinical training sites linked through electronic networks; teaching, research, and community health collaborations; and a shared commitment to excellence in the education of tomorrow’s physicians. CEME partners are joining forces on postgraduate clinical education, research initiatives, and public health and preventative medicine programs to benefit Florida’s elderly, indigent, and minority patient populations. The CEME creates a unified medical education system composed of Nova Southeastern University College of Osteopathic Medicine and its multiple affiliated teaching hospitals and hospital systems spanning the state of Florida and includes ambulatory centers, county health departments, and veterans administration health care centers. Several additional affiliated programs are located in Georgia and Mississippi.

The CEME, as a dynamic consortia of affiliated regional academic training centers, uses distance learning systems to strengthen teaching, research, and community health collaboration while also nurturing a shared commitment to excellence in the education of tomorrow’s physicians.

West Palm Beach Veterans Affairs Medical Center
The College of Osteopathic Medicine has a major affiliation with the West Palm Beach Veterans Affairs Medical Center (VAMC). This state-of-the-art health care facility’s close academic ties with the college includes sharing academic positions, granting faculty appointments to VAMC staff members, a shared residency training program in preventive medicine, and major participation in the clinical program of the college. The VAMC employs a computerized paperless patient record system. It also permits X rays to be visualized with high resolution, includes laboratory and other reports that can be retrieved and tracked, has systems that ensure the selection of appropriate drugs for patient safety, and facilitates arrangements for specialist consultations. Students may spend as much as six months at the facility during their clinical years.

Rural and Urban Underserved Medicine Program
Since its establishment in 1979, the College of Osteopathic Medicine has been committed to educating students about rural medicine and having them train in underserved communities. The Department of Rural Medicine’s instructional programs have been recognized nationally for helping to meet the health care needs of underserved communities and enhancing the medical skills of our students.
Our fourth-year medical students train for three months in rural and underserved settings. They are expected to expand their diagnostic and therapeutic skills as well as their patient and community proficiency in relation to addressing multicultural populations. Training sites include community health centers, private physicians’ offices, ambulatory care facilities operated by the West Palm Beach Veterans Affairs Medical Center, and leading health care institutions of the Florida Department of Corrections.

The Rural Medicine Training Program provides our students with a unique and enriching experience. A number of our graduates are now clinical directors at the community health centers or have established successful practices in a rural Florida region.

Preventive Medicine
Prevention, in its broadest sense, is practiced by all physicians and other health professionals who help their patients to stay healthy. Preventive medicine, however, is also a distinct medical specialty, one of 25 recognized by the American Board of Medical Specialties.

The specialty of preventive medicine is based on our knowledge that promoting health and preventing disease requires work with both individuals and communities. Preventive medicine physicians are trained in both clinical medicine and public health. They have the skills to understand and reduce the risks of disease, disability, and premature death both in individuals and population groups. The distinctive aspects of preventive medicine include knowledge and competence in

- biostatistics
- bioterrorism
- epidemiology
- environmental and occupational health
- planning, administration, and evaluation of health services
- the social and behavioral aspects of health and disease
- the practice of prevention in clinical medicine

The American Osteopathic Association grants certificates to physicians who have successfully completed three years of supervised training and a written examination in any one of three areas: general preventive medicine/public health, occupational medicine, or aerospace medicine. Specialists in general preventive medicine/public health focus their skills on population groups, such as the residents of a particular community or state or the patient population of a health center, hospital, or managed care organization.

Preventive medicine specialists work in a wide variety of settings, including primary care and managed care settings, public health and community agencies, industry, and academia. These physicians usually engage in multiple activities, including planning, administration and evaluation of disease prevention and health promotion programs, research, teaching, and direct patient care. The varied career paths include managed care, public health, occupational medicine, aerospace medicine, clinical medicine, informatics, policy development, academic medicine, international medicine, and research, covering all levels of government, educational institutions, organized medical care programs in industry, as well as voluntary health agencies and health professional organizations. About 6,000 physicians nationally are board-certified in preventive medicine.

In addition to the need for more physicians trained in the specialty of preventive medicine, there is a need for more training in prevention in all the other medical specialties, especially in primary care. Toward this end, the Department of Preventive Medicine is initiating efforts to strengthen prevention education, particularly in relation to individual patient care. This will be accomplished by weaving the distinctive aspects of preventive medicine throughout all coursework offered to medical students at the College of Osteopathic Medicine. Specialists in preventive medicine, who have skills in population-based prevention as well as individual preventive interventions, can assist the other specialties in the further development of education in prevention and the population-based health sciences for residents and medical students alike.

Geriatric Teaching Program
The College of Osteopathic Medicine has a strong commitment to teaching students, residents, and physicians about the care of the geriatric patient. As a result, the college requires a didactic geriatric course in the M-2 year, which addresses “successful aging.” Attention is given to elderly populations and their diverse profiles and circumstances. During the M-3 year, students participate in a monthlong, required geriatric clerkship, where they care for elders in a variety of settings under the supervision of a geriatric specialist.

The College of Osteopathic Medicine also provides clinical teaching in geriatrics for second-year family medicine residents from its Palmetto Family Medicine Residency during a one-month rotation. The College of Osteopathic Medicine, along with the North Broward Hospital District, sponsors a geriatric fellowship training program for family medicine physicians who successfully complete an American College of Osteopathic Family Physicians (ACOFFP) approved family medicine residency program. This will prepare the physician for a Certificate of Added Qualifications (CAQ) in geriatrics. We are excited about what we are doing in geriatrics and are looking for ways to expand our programs and teaching facilities.
M.B.A. Program
The Master of Business Administration program is available to all students who are academically in good standing and have completed the first semester of their first year. The H. Wayne Huizenga School of Business and Entrepreneurship administers the M.B.A. degree. Students may contact the Huizenga School program representative for details on this program. Participation in this program is at the discretion of the dean of the College of Osteopathic Medicine.

M.P.H. Program
The Master of Public Health Program is available to students who are academically in good standing and have completed the first semester of the first year. This degree program is administered by the College of Osteopathic Medicine. Students may contact the public health program director for further information. Participation is at the discretion of the dean of the College of Osteopathic Medicine.

M.P.H. Dedicated Tuition Reduction
All College of Osteopathic Medicine students who have completed the first semester of their first year and are currently enrolled in NSU-COM classes and in good academic standing are eligible to receive a tuition reduction for the payment of M.P.H. tuition if they are enrolled in the on-campus program option. To apply for the M.P.H. tuition reduction, a brief letter must be submitted to the dean of the College of Osteopathic Medicine. The student should indicate the reasons for requesting the tuition reduction in the letter. Students who receive the tuition reduction must remain in good standing with the college. Students are eligible for the tuition reduction while they are enrolled in the College of Osteopathic Medicine. The tuition reduction is not available after graduation, unless the student continues as an intern, resident, or fellow with any of the Nova Southeastern University College of Osteopathic Medicine affiliated institutions. All tuition reductions require renewal by the College of Osteopathic Medicine each academic year.

Master of Health Law
Students in good academic standing matriculated at the College of Osteopathic Medicine may, with the permission of the dean, apply for admission to the NSU Shepard Broad College of Law for the 30-credit Master of Health Law Program. This program, available to students upon completion of their first year of study, is designed to prepare future physicians to identify legal issues within their health professional responsibilities. It will help them acquire in-depth knowledge of the laws and regulations governing medical care and health professional practice. Students who complete the D.O./M.H.L. dual degree also will be especially qualified for leadership positions in managed health care environments as well as other organizations and programs that continue to evolve in the complex world of health care.

D.O. Program for Doctors of Podiatric Medicine (D.P.M.)
A program has been established leading to the D.O. degree for D.P.M.s in an accelerated period of time. It is designed for students from podiatric medical schools accredited by the Council on Podiatric Medical Education who have been accepted to a podiatric medical and surgery residencies. Particular interest is in those applicants who intend to acquire the D.O. degree to provide added value to podiatric medical practice. A limited number of D.P.M.s will be accepted each year. The program leads to a D.O. degree and a license to practice osteopathic medicine in states requiring one year of internship as well as to eligibility for certification by the American Board of Podiatric Orthopedics and Primary Podiatric Medicine (ABPOPPM). Applicants admitted to the program will be granted credit for the core basic sciences courses in the D.O. curriculum. The ABPOPPM will determine the amount of credit it will grant toward the completion of the two-year residency in podiatric medicine and surgery. Applicants may apply from all states but preference will be granted to those who are legal residents of Florida. Additional information about the program, including details about the curriculum, may be obtained by contacting the associate dean of education, planning, and research, NSU College of Osteopathic Medicine, 3200 South University Drive, Fort Lauderdale, Florida 33328-2018.

D.O./D.M.D. Dual-Degree Program
In order to address the access to care issue and meet the needs of underserved populations, Nova Southeastern University’s (NSU’s) College of Dental Medicine and College of Osteopathic Medicine have structured a curriculum that provides students with an opportunity to receive a D.O. (Doctor of Osteopathic Medicine) and a D.M.D. (Doctor of Dental Medicine) degree. This D.O./D.M.D. Dual-Degree Program is in accord with the missions of both schools. This dual program will prepare health care practitioners to use a totally holistic approach to health care that will address preventive medicine and general dentistry, as well as access to care issues, meeting the needs of rural and underserved populations.

Once students complete this six-year program, they will be qualified for licensure in dentistry and for postgraduate, one-year residencies that are required prior to medical licensure. Only a select number of motivated students who have attained the highest academic standards and embody the spirit of this collaborative initiative will be considered.
Public Health Program

The Master of Public Health (M.P.H.) Program is an accredited, graduate-level program designed to prepare students to define, critically assess, and resolve public health problems. The program provides training in the theories, concepts, and principles of public health and their application. To meet the rapidly changing needs of health service professionals, including preventive medicine specialists, the curriculum is structured to accommodate a diversity of backgrounds and individual career goals.

There is a need for public health professionals to address emerging and re-emerging diseases, environmental health concerns, health care reform, health care system, sociopolitical factors affecting our nation's health, and expansion of health issues that are global in scope. Professionals with the M.P.H. degree may hold positions of responsibility in a variety of settings including health care facilities, county and state health departments, social service agencies, health policy and planning organizations, universities, and community-based health education and health promotion settings, nongovernmental organizations, governmental agencies, international health organizations, and the corporate world. These positions often involve active participation of the M.P.H. graduate in the coordination, planning, development, implementation, and evaluation of health programs and services. Some students pursue further advancement in their graduate education upon completion of the M.P.H. degree program.

Concurrent Degree Programs

Health Professions Division students have an option to pursue the M.P.H. degree concurrently with osteopathic medicine, pharmacy, physician assistant, dental medicine, optometry, and health science degrees. Schedules will allow students the opportunity to achieve and meet the requirements of both degrees within three to four years. Students must maintain good academic standing.

Program Vision

The Master of Public Health Program of the College of Osteopathic Medicine fully embraces the vision and core values of Nova Southeastern University.

Program Mission

To improve the health of the population through education, research, and service, with emphasis on multicultural and underserved populations.

Goal: Education

To provide quality education in public health

Objectives

- Maintain a progressive and innovative Master of Public Health curriculum that addresses the essential knowledge and skills for a qualified public health workforce.
- Contribute to the education of public health professionals, health care providers, and alumni.
- Provide prevention-based educational initiatives to address community-determined public health needs.

Goal: Research

To contribute to the discovery and application of knowledge in public health

Objectives

- Conduct research activity as primary investigators or collaborators.
- Participate in collaborative research initiatives with other disciplines.
- Engage in scholarly activities, such as research publications and presentations.

Goal: Service

To provide public health leadership and service in the community

Objectives

- Provide leadership in service initiatives that promote community health.
- Contribute to the improvement of health through community service, with attention to underserved and culturally diverse populations.
- Provide consultation and technical assistance to the community on matters of public health interest.

Course of Study

The M.P.H. Program offers a general Master of Public Health (M.P.H.) degree, which requires a minimum of 42 semester hours of study. This consists of 27 semester hours of required core courses, including a public health field experience (6 semester hours), a minimum of 15 semester hours of public health elective courses, and a written comprehensive examination. Coursework may be taken on a full-time or part-time basis. M.P.H. students are required to complete their course of study within five years of matriculation. A full-time student may be able to complete the requirements within two years. The M.P.H. degree may be completed on-site or online. Online courses have both synchronous and asynchronous components.
Spanish-language version of the online program is available for those who wish to complete their M.P.H. in Spanish. The curricula for the three options are identical, although the modality of instruction is different. On-site classes are offered in the evening, with each class generally scheduled one evening per week. Up to 15 credits of online courses are allowable to complete the on-site option. A face-to-face orientation is required for both online and on-site students prior to matriculation into the program. Students must maintain a grade point average (GPA) of 3.0 to remain in good academic standing. The culminating public health experiences at the end of the program include a supervised field experience (with an oral evaluation) and a written comprehensive examination. There are supervised elective field-based courses, projects, and research opportunities available to students. The on-site orientation session is available prior to each semester. Graduating students have the opportunity to participate in a commencement exercise in May of each year. Each M.P.H. student must pass a written comprehensive examination to successfully complete the course of study. A capstone session for graduating students is held annually, in May, just prior to commencement.

The schedule of course offerings and other pertinent information about the program is available on the program website: nova.edu/ph.

Accreditation and Authorization
The M.P.H. Program is accredited by the Council on Education for Public Health (CEPH) (www.ceph.org).

Nova Southeastern University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (SACS).

Nova Southeastern University is authorized by the Washington Student Achievement Council (WSAC) and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes Nova Southeastern University to offer specific degree programs. The WSAC may be contacted for a list of currently authorized programs. Authorization by the WSAC does not carry with it an endorsement by the board of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the WSAC at P.O. Box 43430, Olympia, WA 98504-3430.

Admissions Requirements
The M.P.H. Program evaluates the overall quality of its applicants, including academic achievement, personal motivation, knowledge about the public health profession, health care and life experience, and recommendations. Criteria for admission are as follows:

- The applicant must hold a bachelor's, master's, or doctoral degree from a regionally accredited college or university.
- A cumulative grade point average (GPA) of 3.0 or above, on a 4.0 scale, is preferred.
- Public health or health-care related experience is desirable, but not required.
- Evidence of having taken one of the following standardized tests: GRE, PCAT, OAT, AHPAT, MCAT, DAT, GMAT, or LSAT, if the applicant does not hold a health-related graduate or professional degree. The scores must be no more than five years old. Applicants with a health-related graduate or professional degree may be required to submit official test scores upon evaluation of their application.
- Applicants enrolled in another area of study within Nova Southeastern University must provide a letter of recommendation from the dean or program director of the other college or program, and must meet the M.P.H. admission requirements.
- All application materials must be received in a timely manner to enable the Office of Admissions and the admissions committee to process the application promptly.

Application Procedures
The Office of Admissions processes applications on a year-round basis. Applicants may apply for matriculation into any one of three semesters (fall, winter, summer), and may contact the Office of Admissions at (954) 262-1101 or 877-640-0218 or access the M.P.H. Program website (nova.edu/ph) for the exact deadline and start dates.

All application materials should be sent to
Nova Southeastern University
Enrollment Processing Services
College of Osteopathic Medicine, M.P.H. Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Applicants must provide the following:
1. a completed online application, along with a $50, nonrefundable application fee (online application can be found at nova.edu/ph/admissions/procedures.html)
2. official transcripts of all coursework attempted by
the applicant at all colleges and universities (It is the
responsibility of the applicant to ensure that arrangements
are made for all transcripts to be sent. A final transcript
of all the applicant's work up to the time of matriculation
must be forwarded to the Office of Admissions prior
to matriculation.)

3. official scores of one of the following standardized tests
taken by the applicant: GRE, PCAT, OAT, AHPAT,
MCAT, DAT, GMAT, or LSAT, if the applicant does not
hold a health-related graduate or professional degree (The
scores must be no more than five years old. Applicants
with a health-related graduate or professional degree may
be required to submit official test scores upon evaluation
of their application.)

4. official scores from the Test of English as a Foreign
Language, Pearson Test of English—Academic, or
International English Language Test System (IELTS),
if applicable.

Coursework taken at foreign institutions must be evaluated
for U.S. institution equivalence by an approved National
Association of Credential Evaluation Services (NACES)
organization, such as one of the services listed below.

- World Education Services, Inc.
  Attn: Documentation Center
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wees.org

- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com

- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework
evaluated. An official course-by-course evaluation with
a cumulative grade point average (GPA) must be sent
directly from the evaluation service to NSU’s Enrollment
Processing Services.

Any applicant who has graduated from a college or
university in another country where English is not the
primary language, regardless of United States residency
status, must obtain a minimum score of 550 on the written,
213 on the computerized, or 79-80 on the Internet-based
TOEFL, a score of 6.0 on the IELTS, or a score of 54 on
the Pearson Test of English—Academic. An official set
of scores must be sent directly from the testing service to
NSU’s EPS.

5. two letters of recommendation, one of which must be
from a health professional (The other letter of evaluation
must be from an individual—other than a relative—such
as an academic adviser, professor, coworker, or supervisor
who is familiar with the applicant’s character, scholastic
aptitude, and work ethic.)

Upon receipt of the completed application and required
material, the committee on admissions will review
the application and make recommendations to the
program director. The committee may request a phone
interview to gather additional information before a
recommendation is submitted. The director submits his
or her recommendation on admission to the dean. The
final decision on admission is made by the dean of the
NSU College of Osteopathic Medicine.

Graduate Certificate Programs
The M.P.H. Program offers graduate certificates in public
health and health education.

Criteria for admission are as follows:
- The applicant must hold a bachelor's, master's, or
doctoral degree from a regionally accredited college
or university.
- A cumulative grade point average (GPA) of 3.0 or
above on a 4.0 scale is preferred.

Applicants must provide the following:
- completed online application form
- official transcripts
- nonrefundable application fee of $50
- one letter of recommendation (professional)

Graduate Certificate in Public Health
The Graduate Certificate in Public Health program is
designed to educate students on the fundamental principles,
concepts, and skills applied to public health practice. It
consists of the following courses, totaling 15 credit hours,
and a comprehensive examination. The program must be
completed within two years of matriculation.

PUH 5430 Epidemiology
3 Credit Hours

PUH 6001 Social and Behavioral Sciences
Applied to Health
3 Credit Hours

PUH 5512 Health Policy, Planning, and Management
3 Credit Hours

PUH 5301 Biostatistics
3 Credit Hours

PUH 5220 Environmental and Occupational Health
3 Credit Hours
This certificate will be presented to the student after all program requirements are successfully met and a capstone session is successfully completed. If, after taking classes in the M.P.H. Program, a certificate-seeking student decides to pursue the M.P.H. degree, the student must submit a new and complete application to the program to become a degree-seeking student and must meet all the requirements for admission to the M.P.H. Degree Program. Previous coursework taken may be transferable if performance equals or exceeds the grade of B in the course.

Graduate Certificate in Health Education
The Graduate Certificate in Health Education program is designed to enable the student to learn the fundamental principles, concepts, and skills applied to health education, health promotion, and disease prevention at the graduate level. It consists of the following courses, totaling 15 credit hours, and a capstone session. The program must be completed within two years of matriculation.

- PUH 5115 Principles of Health Education
  3 Credit Hours
- PUH 6604 Research Methods in Public Health
  3 Credit Hours
- PUH 5002 Health Promotion and Disease Prevention
  3 Credit Hours
- PUH 6120 Public Health Program Planning and Evaluation
  3 Credit Hours
- PUH 5210 Public Health Communications
  3 Credit Hours

This certificate will be presented to the student after all program requirements are successfully met and the comprehensive examination is successfully completed. A student who wishes to pursue National Certification (Certified Health Education Specialists) may take 10 additional credits of recommended coursework to meet the 25 credits, with additional competencies, required to be eligible for the national certification examination.

For more information on the graduate certificates in public health and health education, please visit our website (nova.edu/ph).

Nondegree-Seeking Students
A nondegree-seeking student is one who wishes to take a course in the public health program, but does not intend to pursue the Master of Public Health degree at the time of application. The nondegree-seeking student must provide the following admission requirements in order to take classes in the M.P.H. Program:

- completed online application form
- official transcripts

- nonrefundable application fee of $50
- one letter of recommendation (academic)

Undergraduate students must have a minimum cumulative GPA of 3.0 with at least 90 hours of coursework, 30 hours of which must be upper level courses. An official transcript showing the coursework is required.

Application for nondegree status by students holding a bachelor's degree or higher will be considered by the admissions committee, through a review of the required records.

Nondegree-seeking students are limited to a maximum of 12 semester hours of public health program courses. Enrollment in these courses does not guarantee acceptance into the Master of Public Health degree-seeking program. After taking classes in the program as a nondegree-seeking student, the student must submit a complete application to the program to become degree-seeking. The student must also meet all the requirements for admission.

Graduate students from other NSU programs who elect to take public health courses may do so with the written consent of the course director.

The university reserves the right to modify any requirements on an individual basis as deemed necessary by the dean of the College of Osteopathic Medicine.

The college reserves the right to require the student's withdrawal at any time the college deems it necessary to safeguard its standards of scholarship, conduct, and compliance with the regulations, or for such other reason as deemed appropriate. The student, by his or her act of matriculation, concedes the college this right.

Tuition and Fees
Tuition for the M.P.H. Degree Program for 2016–2017 is $585 per credit hour. Tuition and fees are subject to change without notice. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.

Tuition for the Graduate Certificate Programs for 2016–2017 is $585 per credit hour. An NSU student service fee of $1,050 is required annually. All tuition and fees are subject to change by the board of trustees without notice.

Expenses and Financial Aid
The purpose of the Student Financial Assistance Program at Nova Southeastern University is to help as many qualified students as possible to complete their educational pursuit. Various loans, scholarships, and grants are available to qualified students to help ease the high cost of their education. These financial assistance programs are described in a variety of separate university publications.
Students pursuing the M.P.H. degree should anticipate spending approximately $3,100 per year on books and supplies, as well as $17,647 (on campus) and $22,212 (off campus) per year for living expenses.

Transfer of Credits

Applicants to or enrollees of the NSU-COM M.P.H. Program may petition for transfer of a maximum of 12 credit hours of elective or core courses from a regionally accredited graduate program toward their M.P.H. degree. The core courses must have been taken at a program, school, or college accredited by the Council on Education for Public Health (CEPH).

Any courses taken at another academic program or institution that the student wants to transfer to meet the requirements of this M.P.H. degree program must have the prior approval of the program director. All courses considered for transfer into the program must have been successfully completed with a grade of B (80 percent) or better and must not have been applied to another awarded degree. Transfer course grades are not calculated toward the student's grade point average.

The course transfer applicant must submit a written request to the program director, along with the appropriate verification documents (i.e., official transcripts, syllabi, and catalogs). The Curriculum Committee will review all applications for transfer of credit, including the documents provided on the petitioned courses. The committee will submit its recommendations to the program director who makes the final decision. The program does not give course credit for prior work experience.

**Graduation Requirements**

To be eligible for the M.P.H. degree, the student must

- satisfactorily complete, with a grade point average of 3.0 or higher and within five years of matriculation, the course of study required for the M.P.H. degree—a minimum of 42 semester hours of courses (27 hours of required core courses, including the Public Health Field Experience, and 15 hours of electives)
- successfully pass the comprehensive examination
- complete an exit survey
- satisfactorily meet all financial and library obligations

Upon satisfactory completion of degree requirements, the student is expected to attend the rehearsal and commencement program, at which time the degree is conferred. Students who do not plan to attend the commencement ceremonies must notify the program office before the established deadline for the commencement application.

Course Descriptions

Note: Listed at the end of each entry are lecture hours, laboratory hours, and semester hours. Prerequisites are also listed.

**PUH 5002—Health Promotion and Disease Prevention**
Students learn health education strategies that can be incorporated into multiple settings, focusing on wellness and preventive interventions. This course addresses individual and social factors as well as behavioral issues, health detriments, and community resources. (45-0-3)

**PUH 5003—Public Health Seminar**
This course requires viewing a minimum of 45 public health special lectures—some live at NSU, others accessed from online sources preapproved by the course director. A written report and reaction is required following each lecture. (45-0-3)

**PUH 5004—Public Health Grant Writing**
Introduction to the skills of grant writing in public health. Each student will submit a grant as a culminating experience. (45-0-3)

**PUH 5014—Principles and Practice of Clinical Trials**
This course introduces students to the principles and practice of clinical trials and their application to public health. Ethical issues and the role of the Institutional Review Board will also be addressed. **Prerequisites:** PUH 5430, PUH 5301 (45-0-3)

**PUH 5050—Substance Abuse Prevention and Intervention**
This course provides an overview of substance abuse in a public health context, focusing on local, national, and global issues. It will enhance the student’s understanding of current prevention and intervention strategies. (45-0-3)

**PUH 5110—Culture, Ethnicity, and Health**
Introduces students to skills and insights necessary in promoting health in diverse populations. Issues discussed include the need for effective communication, with an understanding of cultural factors and how they impact on preventive efforts, health care status, access to health care, and use and cost of health care services. The course also explores traditional modalities of health maintenance among various populations. (45-0-3)
PUH 5111—Public Health Issues of the Elderly
Examines important determinants of morbidity and mortality among the aged population. Emphasizes social, cultural, economic, behavioral, and physical characteristics of importance in the design and development of appropriate prevention efforts directed at the elderly. (45-0-3)

PUH 5112—All-Hazards Preparedness
Students will review the ecological, sociological, environmental, and general health effects of disasters, natural and man-made. The course will explore the interprofessional roles and responsibilities of professionals, paraprofessionals, and volunteers in all-hazards emergency planning, response, mitigation, and recovery. Students will gain insights into all-hazard preparedness within the health system, community, and state and local agencies. (45-0-3)

PUH 5115—Principles of Health Education
Historical and philosophical foundations of health education, focusing on the principles of the discipline and preparation for service as a professional. Theoretical models will be discussed. (45-0-3)

PUH 5201—Foundations of Public Health
This course provides an introduction to the history, concepts, values, principles, and practice of public health. The course suggests the sense of purpose that unites the myriad occupations and tasks in public health practice and provides an orientation to each of the five traditional core disciplines of public health practice. (45-0-3)

PUH 5210—Public Health Communications
This course provides an overview of basic principles of communication as applied to health behaviors. Attention will be given to the theories, design, and implementation of health communication used to reach the public. The course involves practice and offers feedback to students in the effective use of major modes of communication in public health work. Students will acquire skills in writing reports, speaking in public, and applying various media to publications. (15-60-3)

PUH 5220—Environmental and Occupational Health
Investigates environmental and occupational factors that contribute to the development of health problems in industrialized and developing countries. Includes such topics as toxic substances, pests and pesticides, food quality, air and water pollution, solid and hazardous waste disposal, occupational hazards, and injury prevention. (45-0-3)

PUH 5301—Biostatistics
This course focuses on the principles and reasoning underlying modern biostatistics and on specific inferential techniques commonly used in public health research. At course completion, students will be able to apply basic inferential methods in research endeavors, and improve their abilities to understand the data analysis of health-related research articles. (45-0-3)

PUH 5305—Advanced Biostatistics
This course addresses advanced statistical methodologies for students who want to pursue research in the public health or medical professions. The concepts of regression, correlation, and prediction will provide practical methods to answer clinical/health research questions. Three types of regressions (linear, logistic, and time-to-event) are taught. Prerequisite: PUH 5301 (15-60-3)

PUH 5311—Public Health Genomics
This course addresses the principles and practices of genetics and genomics, as well as the ethical, legal, and social issues of genetics and genomics in public health practice. (45-0-3)

PUH 5313—Vaccines and Vaccine-Preventable Diseases
This course addresses the spectrum of vaccine-preventable diseases and vaccines administered routinely to children, adults, and travelers. The benefits and problems associated with vaccinations will be addressed. (45-0-3)

PUH 5314—Global Health
This course addresses global health problems and trends translated to the needs and demands of populations, as well as the socioeconomic and political impact on health delivery. The role of international health agencies will also be addressed. (45-0-3)

PUH 5420—Epidemiology of Diseases of Major Public Health Importance
In-depth study of the distribution and determinants of specific infectious, chronic, behavioral, and environmentally caused diseases of major public health importance. Prerequisites: PUH 5301, PUH 5430 (45-0-3)

PUH 5430—Epidemiology
Examines basic principles and methods of modern epidemiology used to assess disease causation and distribution. Students develop conceptual and analytical skills to measure association and risk, conduct epidemiological surveillance, evaluate screening and diagnostic tests, and investigate disease outbreaks and epidemics. (45-0-3)

PUH 5431—Community Health Assessment
Community Health Assessment (CHA) is a process of collecting, analyzing, and reviewing public health data to understand community health needs and facilitate planning of community health resources. CHA serves a core function for local health departments and organizations. In this course, students will learn to locate appropriate public health data sources, analyze public health data, and write a community health profiling report. Prerequisite: PUH 5430 (45-0-3)
PUH 5500—School Health
Study of the development and enhancement of school level health education and health service programs that support student health and academic achievement. (45-0-3)

PUH 5502—Children's Health
This course addresses disease and disorders of children of public health significance as well as public health issues in children such as child safety, child abuse, and newborn screening. (45-0-3)

PUH 5503—Women’s Health
This course addresses disease and disorders of women of public health significance as well as public health issues of women such as domestic violence and breast cancer. (45-0-3)

PUH 5504—Public Health Issues in Child Protection
In this course, students will learn to apply public health planning principles to the creation and refinement of programs that protect children from negative health impacts of abuse and neglect. This includes both follow-up restorative programs for children already identified as abused/neglected and community programs to prevent abuse/neglect before it occurs. Since research knowledge in this field is expected to continue growing, students will become accustomed to adding to their personal knowledge base through critical study of new findings. (45-0-3)

PUH 5510—Maternal and Child Health
This course addresses public health issues pertaining to mothers and children. It also addresses programs for prevention, both in the United States and globally, and resources for the programs. (45-0-3)

PUH 5512—Health Policy, Planning, and Management
Discusses principles and logic involved in health policy, planning, and management. Addresses history, political, and environmental contexts, and their incorporation into population research. (45-0-3)

PUH 5513—Public Health Nutrition
This course will provide students with methods and skills to identify nutrition-related health problems and to plan community-based prevention programs for diverse populations. (45-0-3)

PUH 5516—Public Health Informatics
This course focuses on developing the knowledge and skills of systemic application of information, computer science, and technology to public health practice, research, and learning. Students will acquire a basic understanding of informatics in public health practice, and be able to apply the skills of use of some informatics tools in public health practice. Prerequisites: PUH 5301, PUH 5430 (45-0-3)

PUH 5520—Legal and Ethical Issues in Public Health
This course introduces nonlawyers to the important roles law and ethics play in determining the public's health. Students develop skills in analyzing political, legislative, and ethical aspects of public health issues. (45-0-3)

PUH 5802—Epidemiologic Surveillance and Outbreak Investigation
This course provides a descriptive analysis of basic components and strategies required for the surveillance and investigation of disease outbreaks. Surveillance data collection, analysis, and reporting are emphasized as well as indicators for assessing the effectiveness of such programs. Prerequisites: PUH 5430, PUH 5301 (30-30-3)

PUH 6001—Social and Behavioral Sciences Applied to Health
Introduces students to the social, cultural, and behavioral foundations of modern public health practice as applied to interventions for disease prevention and health enhancement. Reviews the linkage between public health and other social sciences. Students gain knowledge and awareness of today's most pressing public health problems and the social and behavioral factors determining them. (45-0-3)

PUH 6002—Public Health Field Experience
The field experience is a culminating experience for all M.P.H. students. This required course (200 hours of structured activities) takes place at a public health agency or public health-related institution. The student will work under the supervision of a site-based preceptor and a faculty adviser, who identify the appropriate educational objectives for the experience. The student is expected to acquire skills and experiences in the application of basic public health concepts and specialty knowledge to the solution of community health problems. A comprehensive written report and an oral presentation will be required upon completion of the field experience. Prerequisites: PUH 5430, PUH 5301, PUH 5512, PUH 5220, PUH 6001 (0-200-6)

PUH 6008—Public Health Advocacy
This course will enable students to develop tools and skills to influence the political processes at the national, state, and community levels to enhance the public's health and welfare. A number of faculty and guest lecturers will share their insights and strategies. Speakers will include elected officials, public health leaders, and community advocates. Students will analyze their own attitudes and insights and enhance their political advocacy skills. Case study methods will be used with emphasis on communication, marketing, and education. (45-0-3)
PUH 6016—Survey Methods in Public Health
This course addresses the theory and practice of designing and conducting surveys in public health research and practice. Topics will include survey designs, sampling strategies, data collection methods, interviewing skills, coding, and data analysis. Prerequisites: PUH 5430, PUH 5301 (30-30-3)

PUH 6017—Special Studies in Public Health
This course is designed to give the student the opportunity to plan, implement, or evaluate a specific community health initiative. It is an applied experience in collaboration with a field-based site. The project is also approved and monitored by the course director. (0-90-3)

PUH 6022—Community Health Project
This course is designed to give the student the opportunity to plan, implement, or evaluate a specific community health initiative. It is an applied experience in collaboration with a field-based site. The project is approved and monitored by the course director. (0-90-3)

PUH 6025—Interprofessional Leadership
This course covers best practices in interprofessional education and practice in public health. Students will learn and practice competencies included in the four core competency domains of interprofessional collaborative practice, as well as leadership skills for team-based, community-oriented health care. (45-0-3)

PUH 6101—Health Care Organization and Administration
Building on knowledge of the basic structure and organization of health systems, this course provides an overview of the application of management concepts to the health care field. A general introduction to the process of management is presented. Particular emphasis is placed on organization, planning, control, quality improvement, and evaluation of health care management. Prerequisite: PUH 5512 (45-0-3)

PUH 6104—Health Service Planning and Evaluation
This course is an in-depth review of basic planning and evaluation techniques for the implementation of a community health care program. It is designed and will be taught using multiple international examples and experiences. The course covers the interdependence between policy and planning and management. It consists of policy analysis techniques as well as the conceptual framework for the planning and management of health care programs. The course also reviews essential methods for effective planning and evaluation considering the economic, political, epidemiological, demographic, and other components that contribute to the assessment of health needs and resource allocation. (45-0-3)

PUH 6120—Public Health Program Planning and Evaluation
This course provides students with the knowledge necessary to perform public health program planning, management, and evaluation. Students will critically identify and define a public health need, create a plan for responding to the need, implement and manage the planned intervention, and evaluate the extent to which the intervention effectively addresses the public health need. To accomplish these ends, students will develop and critique both a unique public health program plan and an evaluation plan for the program during the course of the semester. Prerequisites: PUH 5430, PUH 6001 (45-0-3)

PUH 6201—Tropical Diseases
This course will address tropical diseases in the world today and their public health significance. Malaria, yellow fever, trypanosomiasis, leishmaniasis, filariasis, dengue fever, malnutrition, diarrheal diseases, and other tropical diseases will be discussed in relation to epidemiology, clinical presentation, and management. The impact of these diseases on global health and economic issues will be discussed. (45-0-3)

PUH 6521—Budgeting and Accounting for Health Care Organizations
This course will provide knowledge and skills in various aspects of budgeting and accounting as it applies to health care organizations. (45-0-3)

PUH 6522—Strategic Marketing for Health Care Organizations
This course will provide students with knowledge and strategies in marketing as it applies to health care. (45-0-3)

PUH 6523—Strategic Leadership in Management of Human Resources
This course focuses on the concepts and dynamics of leadership in health care organizations. It emphasizes the interactions and influence processes of leadership to effectively use problem-solving mechanisms in the management of human resources. The student will develop competencies through application of the case study approach in public health practice. (45-0-3)

PUH 6604—Research Methods in Public Health
Provides an intermediate level review of basic research methodology, concepts, and principles common in public health and epidemiological studies. Issues related to the design, development, and realization of public health studies, including sampling, surveying, data collection, and management as well as the interpretation and reporting of findings are discussed. Prerequisites: PUH 5430, PUH 5301 (30-30-3)
PUH 6605—Grant Proposal Writing Practicum
In this course, the student will prepare a grant proposal for a public health project of utility to an existing organization. The student will be guided individually by the course director in the planning, writing, and submission of the grant proposal. (15-60-3)

PUH 6606—Introduction to SAS
This course introduces students to the basic data concepts and the structure of the SAS programming language. The course will cover both SAS data management and the statistical programming features. A review of those statistical procedures to be programmed in SAS will occur prior to the actual SAS programming. Students will learn how to manipulate actual data sets as well as how to analyze sample data. SAS will be briefly compared with SPSS. Prerequisites: PUH 5301, PUH 5430, (15-60-3)

PUH 6608—Public Health Research
Students conduct supervised research in any of the major areas of public health. The student and faculty adviser define the project and its objectives. Prerequisites: PUH 5301, PUH 5430 (0-90-3)

PUH 6690—Comprehensive Examination
Each M.P.H. student must take, and pass, the comprehensive examination at the end of his or her course of study. The purpose of the exam is to assess the individual student's competency to begin work in public health. This short-answer written examination requires critical thinking to integrate learning and apply it to public health scenarios. The student writes the examination with appropriate references during a scheduled, two-week period of the registered semester. (0-60-0)

Biomedical Informatics Program

Nova Southeastern University College of Osteopathic Medicine's Biomedical Informatics Program is designed to train future leaders in the development, dissemination, and evaluation of health information technologies that are utilized by hospitals and health systems, health information technology system vendors, eHealth companies, insurers, pharmaceutical companies, and academic institutions.

With its focus on clinical informatics, the program's curriculum emphasizes the areas of computer science and its clinical applications, management, and evaluation of information technology in the health care environment.

The Biomedical Informatics Program offers coursework in both on-campus and online formats to enable working professionals to earn a master's degree or graduate certificates in health informatics without career disruption.

Biomedical informatics is an interdisciplinary field encompassing computer and information sciences, cognitive and decision-making sciences, medicine and epidemiology, telecommunications, business management, education sciences, and a collaboration of a number of other fields. In short, biomedical informatics is the intersection of health care, technology, and people, with the implicit goals of improving the quality and safety of the world's health care systems while reducing cost.

As terminology continues to evolve along with the field itself, the more broadly encompassing term "biomedical informatics" can generally be broken down into three more distinct levels: bioinformatics, medical informatics, and public health informatics.

At the molecular level, incorporating things such as gene sequencing research and pharmaceutical development, bioinformatics looks to change the way biological data is stored, retrieved, organized, and analyzed, ultimately producing new tools/methods for generating valuable biological knowledge.

Medical informatics, at an individual patient level, can further be divided into a number of more specific areas including nursing informatics, imaging informatics, pharmacy informatics, dental informatics, and consumer health informatics. Medical informatics aims to manage an individual's health data—including storage, retrieval, sharing, and optimal use—with the goals of providing safer, more efficient, and more affordable health care. Integration of advanced clinical information systems into the health care decision-making process allows health care professionals to accomplish tasks in a more competent and effective manner. Furthermore, this integration affords development of novel tasks. It produces new knowledge and allows providers to begin thinking like epidemiologists in addition to providing patient care.
At a population level, public health informatics aims to apply information technology advances to traditional public health research and practice. Detection, management, and prevention of disease across populations—through the collection and analysis of vital statistics and health data—have the potential to be significantly influenced and advanced through the auspices of evolving information technology.

People who have a degree in biomedical informatics have a wide variety of career opportunities. The type of informatics career options that an individual can pursue is, to some extent, dependent on his or her background and selected area of study. Biomedical informatics trained professionals may become:

- chief medical information officers (CMIOs)
- chief medical officers (CMOs)
- chief information officers (CIOs)
- directors of medical informatics
- chief nursing information officers (CNIOs)
- project managers
- implementation specialists
- project designers
- researchers
- programmers
- clinical systems analysts
- health information technology (HIT) educators and trainers
- HIT consultants
- template writers
- nursing informatics specialists
- account representatives

The following are examples of settings in which they might work:

- hospitals and health systems
- community health centers
- physician practices and clinics
- health care agencies within the federal and state government
- health information technology system vendors
- eHealth companies

...
At the end of the course of study leading to the degree of Master of Science in Biomedical Informatics, the graduate will be able to

1. identify the fundamentals of a telecommunication network design
2. develop practical health care applications using popular database management systems
3. evaluate information technology for integration into health care
4. utilize the knowledge, skills, and concepts of health information technology in evidence-based practice
5. apply principles of information security and policy formation
6. assess existing and emerging health information technologies
7. appraise health information exchange system standards
8. analyze project management strategies in health information technology

**Course of Study—Graduate Certificate in Medical Informatics**

The Medical Informatics Certificate is designed to enable students to acquire the core knowledge that applies to the fundamentals, principles, and practice of medical informatics. This certificate option consists of 18 credits of graduate-level courses that are presented using online learning technology.

If, after taking courses in the certificate program, a certificate-seeking student decides to pursue the M.S.B.I. degree, the student must submit a new and complete application to become a degree-seeking student and must meet all requirements for admission to the M.S.B.I. program. Previous coursework taken as a certificate-seeking student does not guarantee acceptance into the M.S.B.I. degree-seeking program. If accepted into the degree program, credits with the prefix MI taken as a certificate-seeking student will be automatically applied toward the degree.

**Course of Study—Graduate Certificate in Public Health Informatics**

The Public Health Informatics Certificate is designed to enable students to acquire the core knowledge that applies to the fundamentals, principles, and practice of public health informatics. This certificate option consists of 18 credits of graduate-level courses that are presented using online technology.

If, after taking courses in the certificate program, a certificate-seeking student decides to pursue the M.S.B.I. degree, the student must submit a new and complete application to become a degree-seeking student and must meet all requirements for admission to the M.S.B.I. program. Previous coursework taken as a certificate-seeking student does not guarantee acceptance into the M.S.B.I. degree-seeking program. If accepted into the degree program, credits with the prefix MI taken as a certificate-seeking student will be automatically applied toward the degree.
• submit official transcripts of all undergraduate, graduate, and professional education

Please mail all supplemental admissions material to

Nova Southeastern University
Enrollment Processing Services
College of Osteopathic Medicine
Biomedical Informatics Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Upon receipt of the completed application and required material, the Committee on Admissions will review the application and the applicant’s file and make recommendations to the program director. The director submits his or her recommendation on admission to the dean. The final decision on admission is made by the dean of the College of Osteopathic Medicine.

Should you have any questions, please email msbi@nova.edu or call 800-356-0026, ext. 21032.

*A recommendation is not required for admission to the graduate certificates in Medical Informatics or Public Health Informatics programs.

Nondegree-Seeking Students

A nondegree-seeking student is one who wishes to take courses in the Biomedical Informatics program, but does not intend to pursue the master's degree at the time of application. The nondegree-seeking student must provide the following admissions requirements in order to take classes in the Biomedical Informatics program:

• completed online application form
• official transcripts of all undergraduate, graduate, and professional education
• nonrefundable application fee of $50

Nondegree-seeking students are not guaranteed future acceptance into the Master of Science in Biomedical Informatics program. If after taking classes in the program as a nondegree-seeking student, the student wishes to become degree seeking, he or she must apply to the M.S.B.I. program as a new student and meet all the requirements for admission. If accepted into the degree program, credits with the prefix MI that were taken as a nondegree-seeking student will be automatically applied toward the degree.

Other Degree Options

An M.S.N. in Nursing Informatics is offered in conjunction with the College of Nursing. For more information, visit osteopathic.nova.edu/msbi/nursinginformatics.html.

A concurrent Pharm.D./M.S.B.I. option is also available. For more information, visit osteopathic.nova.edu/msbi/pharm.d.m.s.b.i.-concurrent-degrees--nsu.html.

International Applicants

International students who wish to be considered for admissions must submit official course-by-course evaluation of all foreign transcripts (Agencies that can complete this evaluation can be found at nova.edu/internationalaffairs/students/prospective/credentialservices.) Applicants whose native language is not English are required to demonstrate English proficiency. The standardized tests listed below currently satisfy the university's English requirement for nonnative English speakers.

• Test of English as a Foreign Language (TOEFL): score of 213 on the computer-based test or 79–80 on the Internet-based test
• International English Language Testing System (IELTS): score of 6.0 on the test module
• Pearson Test of English—Academic: score of 54
• GMAT: score of 450
• GRE: score of 1,000 (old format) or score of 306 (new format)
• Scholastic Assessment Test (SAT): score of at least 500 in the reading section
• American College Test (ACT): score of at least 20 on the verbal section

Test results must be sent directly from the testing agency to the center you applied to. Proof of English language competency can also be in the form of successful completion of a degree at an approved U.S. institution of higher education.

Tuition and Fees

Tuition is $680 per credit hour at the College of Osteopathic Medicine. Students taking courses at other NSU schools or colleges may be subject to varying tuition rates. An NSU student services fee of $1,050 and a Health Professions Division student access fee of $145 are required annually for degree- and nondegree-seeking students. Tuition and fees are subject to change without notice.

Transfer of Credits

Applicants or enrollees of the NSU-COM Biomedical Informatics Program may petition for a transfer of credits earned from a regionally accredited institution. Degree-seeking students may petition for a maximum of 12 credit hours toward their degree, and certificate-seeking students may petition for a maximum of 6 credit hours toward their certificate. Any exceptions require the written approval of the program director. To be considered for transfer of credit, courses must have been completed less than five years prior to the beginning of the student’s first semester.
in the program. All courses to be transferred must be substantially equivalent to courses offered in the program, as determined by the program director and appropriate faculty members.

All courses considered for transfer into the program must have been successfully completed with a grade of B (80 percent) or better. Transfer course grades are not calculated toward the student’s grade point average.

An accepted applicant to the program who wishes to receive transfer credit must submit a written request and the appropriate verification documents (e.g., official transcripts, syllabi, and catalogs) to the program director.

**Graduation Requirements**

To be eligible for the M.S.B.I. degree or Medical Informatics/Public Health Informatics Graduate Certificates, students must fulfill the following requirements:

- satisfactorily complete, with a grade point average of B (3.0) or higher, within five years of matriculation, the course of study required for the M.S.B.I. degree (minimum of 43 semester hours of courses and any required additional courses, if applicable) or graduate certificates (minimum of 18 semester hours of courses and any required additional courses, if applicable)

- satisfactorily meet all university financial and library obligations

Upon satisfactory completion of degree requirements, the student is expected to attend the rehearsal and commencement program, at which time the degree is conferred. Students who do not plan to attend the commencement ceremony must notify the program office before the established deadline.

**Curriculum Requirements**

To develop a comprehensive biomedical informatics program at NSU-COM, a curriculum has been developed that includes teaching, clinical care, research, and development.

The didactic courses will be offered online using NSU’s state-of-the-art, web-based distance learning technology, as well as on-site. Students will be required to complete a practicum within the environment in which it is being conducted. Students must have a GPA of at least 3.0 to be eligible to register or participate in practicum work.

Course Descriptions

MI 4201—Medical Terminology
This self-paced online course provides a basic introduction to medical terminology using the body systems approach. It provides the student with guided practice and assessment of prefixes, suffixes, word roots, and combining forms. It includes vocabulary, definitions, spelling, and pronunciation. A problem-solving approach to learning is the key strategy and focus of this course. (3 credits)

MI 4202—Health Care Organization and Administration
This course provides students with an overview of health care management covering fundamental concepts and theories, including information systems management, operational leadership, strategic leadership, governance, foundations of clinical performance, clinical support services, community health, knowledge management, human resource management, the environment of care management, financial management, and marketing. A common theme of high-performance health care organizations (HCOs) are that they embrace a culture of transformational and evidence-based management. Both are carefully woven throughout the course. Also emphasized are critical management activities, including measures and metrics, benchmarking, negotiated goal setting, and continuous improvement, which are all essential to high-performance HCOs. (3 credits)

MI 4203—Introduction to Information and Communication Technologies in Health Care
This interactive course will provide students with a comprehensive overview of information technology (IT) in a variety of health care settings. Students will gain a wide-ranging understanding of the role of IT in health care organizations (HCOs) applicable to health information technology (HIT) operational functions and patient care delivery. Course content covers HIT terminology, essentials of computing (hardware and software), HIT applications, and introductory topics in biomedical informatics—including database, decision support systems, networks, program evaluation, and information security and privacy in health care. The course is designed to build a solid foundation of information and knowledge regarding health information technologies. The course is targeted at individuals with varied backgrounds, including medical, nursing, pharmacy, administration, and computer science. Students will gain the skills and understanding required to implement and support HIT systems, as well as to develop a baseline knowledge relevant to pursuing the Biomedical Informatics Program curriculum. (3 credits)

MI 5120—Management Information Systems in Health Care
This course covers major concepts, systems, and methodology in managing health care information systems. Topics will include concepts in system implementation and support, information architecture, IT governance in health care, information systems standards, organizing IT services, strategic planning, IT alignment with the health care facility, and management’s role in major IT initiatives. Topics will include concepts in health care data quality; health care information regulations, laws, and standards; clinical information systems; systems acquisition, implementation, and support; technologies that support health care information systems; security of health care information systems; IT alignment and strategic planning in the health care facility; and management’s role in major IT initiatives. (3 credits)
MI 5121—Information Systems Project Management in Health Care
This course introduces the fundamental principles of project management from an information technology (IT) perspective as it applies to health care organizations (HCOs). Critical features of core project management are covered, including integration, scope, time, cost, quality, human resource, communication, risk, and procurement management. Also covered is information technology management related to project management (user requirements, infrastructure, conversion, workflow, security, interface, test, customer, and support management and software configuration). The following areas of change management related to project management will also be covered: realization, sponsorship, transformation, training, and optimization management. Students will explore and learn hands-on skills with project management software assignments and participate in a health care systems implementation, course-long, group project intended to apply these newly developed knowledge and skills in a controlled environment. (3 credits)

MI 5130—Database Systems in Health Care
This course covers basic to intermediate knowledge of the concept, the design and the implementation of database applications in health care. Students will study tools and data models for designing databases such as E-R Model and SQL. The course also covers Relational DBMS systems such as SQL Server, Access, Oracle, and MySQL. Database connectivity design (essential in data-driven web development) and database administration will also be introduced. Students will practice designing, developing, and implementing a test relational online health IT database application (myHealth) through a comprehensive project that contains the above topics. (3 credits)

MI 5152—Information Security in Health Care
The course will cover concepts, applications, and techniques of data security in health care systems. Topics include health care industry, regulatory environment, decision making, policy assurance, information management, access control, risks and vulnerabilities management, database security, web security, personnel and physical security issues, and issues of law and privacy. Areas of particular focus include secure health care system design, implementation, data encryption and decryption, attacks, and techniques for responding to security breaches. (3 credits)

MI 5153—Telecommunications and Computer Networking in Health Care
The understanding of telecommunications and networking is imperative for adequate functioning of health care organizations. This is due to the convergence of computing, data management, telecommunications, and the growing applications of information technology in the health care arena and medical facilities. The knowledge of these key areas of information systems also becomes essential for competitive advantage. This course combines the basic technical concepts of data communications, telecommunications, and networking with the health care IT management aspects and practical applications. (3 credits)

MI 5160—System Analysis and Design for Health Care
The need to create effective, new solutions and innovative interventions to deliver quality patient care outside of the traditional medical setting is at the forefront of society today. The basis of this course will be to provide a solid educational foundation for systems design and analysis, as it relates to current and future health care systems. In addition, this course will build upon the fundamental systems design and analysis principles to explore current and future health care systems that will include integration of disparate clinical health care systems, mobile technologies, and a combination of remote-monitoring technology, sensors, and online communications and intelligence to improve patient adherence, engagement, and clinical outcomes. (3 credits)

MI 5180—Human-Computer Interaction in Health Care Settings
The dynamics of human-computer interaction (HCI) directly impacts health care. This course will introduce the student to usable interfaces and the study of social consequences associated with the changing environment due to technology innovation. (3 credits)

MI 5200—Survey of Medical Informatics
This online, interactive course is an introductory survey of the discipline of biomedical informatics. This course will introduce the student to the use of computers for processing, organizing, retrieving, and utilizing biomedical information at the molecular, biological system, clinical, and health care organization levels through substantial, but not overwhelming, reading assignments. The course is targeted at individuals with varied backgrounds including medical, nursing, pharmacy, administration, and computer science. It will describe essential concepts in biomedical informatics that are derived from medicine, computer science, and the social sciences. (3 credits)

MI 5204—Clinical Decision Support Systems
This course introduces students to theoretical, statistical, and practical concepts underlying modern medical decision making. Students will be provided with a review of the multiple methods of knowledge generation for clinical decision support systems (CDSS) and will create their own prototype of CDSS. Current implementations of stand-alone and integrated CDSS will be evaluated. Techniques for planning, management, and evaluation of CDSS implementations will be reviewed. Human factors,
including work-flow integration and the ethical, legal and regulatory aspects of CDSS use, will be explored, as applicable to commercial implementations in patient care settings. Future models of health care, supported by CDSS and evidence-based medicine, will be discussed and reviewed. (3 credits)

MI 5205—Program Evaluation in Health Information Technology
This interactive course will introduce students to various evaluation methods for health care informatics systems, projects, and proposals. Students will consider both quantitative and qualitative methods of evaluation as they examine the design and implementation processes. Topics will include why to evaluate health care informatics projects; deciding what to evaluate; deciding when evaluation should occur; quantitative evaluation methods; overview of some descriptive and inferential statistical methods; barriers and facilitators to project implementation; and stakeholders, both internal and external to an organization. (3 credits)

MI 5401—Managing Organizational Behavior for Medical Informatics
This online course is an introduction to the management of employees in health care organizations (HCOs). Students will gain a working knowledge of how to manage personal, interpersonal, and group processes by having the interpersonal skills to assume responsibility for leading and promoting teamwork among diverse stakeholders. Students will learn to manage individual and group behaviors in improving organizational productivity and performance. Students will be able to apply newly learned organizational skills, developed through experiential- and application-based learning scenarios in the form of case studies, as well as from their home, work, and educational observations and experiences. It is anticipated that this practical learning experience can be transferred to their day-to-day managerial responsibilities. (3 credits)

MI 6401—Biostatistics
This course focuses on the principles and reasoning underlying modern biostatistics and on inferential techniques commonly used in public health research. Students will be able to apply basic inferential methods in research endeavors and improve their abilities to understand the data analysis of health-related research articles. (3 credits)

MI 6403—Epidemiology
This course examines basic principles and methods of modern epidemiology used to assess disease causation and distribution. Students develop conceptual and analytical skills to measure association and risk, conduct epidemiological surveillance, evaluate screening and diagnostic tests, and investigate disease outbreaks and epidemics. (3 credits)

MI 6404—Special Topics in Health Care
This is an elective course designed as a student/self-directed course. In consultation with the chosen adviser/mentor and the course director, the student will determine a focused topic of quasi-independent study, research, or other appropriate learning activity. A final paper or other appropriate document(s) will serve as documentation of having met the mutually agreed upon objectives. (3 credits)

MI 6405—Public Health Informatics
Public health informatics is the systematic application of information and computer science and technology to public health practice, research, and learning. This course focuses on developing the knowledge and skills of systemic application of information, computer science, and technology to public health practice. Students will acquire a basic understanding of informatics in public health practice and be able to use some informatics tools in public health practices. (3 credits)

MI 6407—Grant Writing
This course provides an introduction to the skills of grant writing in biomedical informatics. Each student will submit a completed grant application as a culminating experience. This course introduces students to grant development and preparation, so they can participate in the process of obtaining public or private funds to support research, education, and/or service projects. Topics will include writing specific aims and hypotheses; research plan significance; methods/approach and innovation; evaluation, timeline, and budget; preliminary data, investigator, and human subjects; subcontracts (if necessary); and abstract, facilities/environment, and letters of support. (3 credits)

MI 6408—Health Policy, Planning, and Management
This course discusses the principles and logic involved in health policy, planning, and management. It addresses the historical, political, and environmental contexts, and their incorporation into population research. (3 credits)

MI 6409—Health Services Planning and Evaluation
This course is an in-depth review of basic planning and evaluation techniques for the implementation of a community health care program. It is designed, and will be taught, employing comparative methodology. The material will be taught using multiple international examples and experiences. The course covers the interdependence between policy and planning and management. It will consist of policy analysis techniques as well as the conceptual framework for the planning and management of health care programs. The course also reviews essential methods for effective planning and evaluation considering the economic, political, epidemiological, demographic, and other components that contribute to the assessment of health needs and resource allocation. (3 credits)
MI 6410—Consumer Health Informatics
Consumer Health Informatics is a relatively new application of information technologies in the field of health care that aims to engage and empower consumers to become involved in their health care. This course provides an introduction to, and overview of, consumer health informatics, mobile health (mhealth), and social media applications used in health care. It explores the development of consumers as ePatients and tools such as personal health records (PHRs), as well as the fluid nature of social media in medicine and the emerging area of mobile health (mhealth). Students will learn from a combination of lectures and a hands-on approach of interacting directly with the tools and technologies discussed. (3 credits)

MI 6411—Health Information Technology Acquisition and Assessment
This course immerses students in the technical, business, cultural, and organizational dynamics typically encountered during the HIT systems selection and contract-negotiation process. Real-world case studies—replete with dynamic political, financial, and technical roadblocks and opportunities—will be used to introduce the student to skills required to make the best cultural decisions and to negotiate a viable contract. (3 credits)

MI 6412—Leadership in Health Information Technology
This course provides the conceptual and technical skills needed in leading health information technology. It is designed to create a profound understanding of leadership at the cognitive and action levels to enable health information leaders to optimize decision making in the workplace. Students review remarkable leaders, organizations, and teams in order to hone their own observation, sense-making, and innovating skills in a health information setting. This leadership course reviews and builds upon the basic knowledge of leadership provided in the organizational behavior course by expanding the scope and depth of the student’s knowledge of leadership theories and conflict management techniques and by developing the student’s self-knowledge of his or her preferred leadership styles. (3 credits)

MI 6413—Lean Six Sigma Yellow Belt for Health Care
Lean Six Sigma for Health Care (Yellow Belt) participants will learn the basic philosophy, tools, and techniques to deliver breakthrough business improvements that will reduce waiting times, improve quality, and reduce costs in a health care environment. More specifically, they will learn to apply a comprehensive set of 15–20 Lean Six Sigma process improvement tools by using the PDCA (Plan, Do, Check, Act) problem-solving model. They will learn techniques for both quantitative and qualitative analysis, as well as methods and tools for waste reduction and process enhancement and acceleration. The course also covers how to map out processes and identify sources of variation, as well as to gain a basic understanding of descriptive statistical analysis. Finally, students will learn how to perform basic pilot studies and analyze the results in order to determine the most effective way to improve and stabilize processes. Candidates work on either an integrated health care case study or on an actual business project and will apply classroom techniques to the project. (3 credits)

MI 6414—Basic Skills for Clinical Analysts
This class will provide students with introductory understanding of clinical analysts’ daily responsibilities and functions within hospitals. Students will be introduced to the daily operations of clinical software systems and lead to understand how such systems are used by health care organizations to provide quality care services. (3 credits)

MI 6415—Information Technologies in Medicine and Telehealth
Telemedicine is the exchange of health information from one side to another utilizing electronic communications. This course introduces the student to fundamental concepts and knowledge of telemedicine technologies, as well as its application and usage. Essential aspects of communication networks and services, wired and wireless infrastructures, safeguarding medical data (including health information privacy), systems deployment, patient monitoring and care, information processing, and future trends in telemedicine will be studied. Discussion areas include telemedicine, technical perspectives, scalability to support future growth, integration with legacy infrastructures and interoperability, history, trauma, emergencies and disasters, clinical applications, and other critical components of telemedicine technologies. (3 credits)

MI 6416 – Lean Six Sigma Green Belt for Health Care
Lean Six Sigma Green Belt for Health Care participants will learn intermediate-level tools and techniques to deliver breakthrough business improvements that will reduce waiting times, improve quality, and reduce costs in a health care environment. More specifically, they will learn to apply a comprehensive set of 15–20 Lean Six Sigma process improvement tools by using the DMAIC (define, measure, analyze, improve, and control) problem-solving model. They will learn techniques for both quantitative and qualitative analysis, as well as methods and tools for work-flow enhancement and acceleration. The course also covers how to map out processes and identify sources of variation, as well as to gain a basic understanding of inferential statistical analysis. Finally, they will learn how to perform how to implement lean management tools and philosophies in order to improve and stabilize processes. Candidates work on either an integrated health care case study or an actual business project and will apply class techniques to the project. There will be additional practice with basic tools to help promote mastery. (3 credits)
MI 6417—Meaningful Use of Electronic Health Record Systems—A NextGen Approach
This course will provide students with the opportunity to learn the fundamentals of set-up and using the applications of one of the most commonly used electronic health record systems in the United States, NextGen, in clinical settings. Students will be required to complete the NextGen elearning modules before the on-campus, hands-on training sessions. This course is required for the competitive internship opportunity in the NSU clinics. (3 credits)

MI 6418—App Development for Health Information Technology Projects
This course provides an introduction to iOS Applications (apps) development with an emphasis on health information technology projects. Topics cover iOS development environment setup, the Swift language syntax, Model-View-Controller design patterns, iOS apps lifecycle, GUI implementation, multitouch handling, graphics processing, file handling, SQLite database handling, audio and video processing, multiprocessor support for iPhone and iPad, maps displaying, and web service interfacing. (3 credits)

MI 6420—Medical Image Processing and Analysis
This course will provide students with a preliminary understanding of the theory and practice of medical image processing and analysis in health care. Basic concepts and fundamentals of medical image processing and analysis will be described in the course. The application of medical image processing and analysis in biomedical information systems will also be discussed. Students will be introduced to the fundamentals and methodology of medical image processing, image analysis, image compression, and molecular imaging. (3 credits)

MI 6421—Geographical Information Systems: Fundamentals for Health Care
This course will introduce students to geographic information systems (GIS) to map and spatially analyze public health and demographic data. Students will learn the fundamentals of the ArcMap software system and ways to integrate cartography into biomedical informatics practice. Beyond use of GIS for cartography, this course will also examine ethical issues and methods of analyzing demographic and spatial health patterns using GIS and demography analysis methods. The versatility of GIS in a public health setting will be examined and will include exercises involving GIS applications in health marketing, demography, epidemiology, and health care systems. For example, the course will look at how different socioeconomic groups use urban spaces differently in terms of transportation and how these differences in navigation impact contact points for health marketing. Other issues covered in the class will be the ethics of GIS, manipulation of data, sources of data, and understanding some commonly used public health datasets such as the YRBS, BRFSS, and U.S. Census. (3 credits)

MI 6422—Workflows and Process Improvement in Health Care Settings
The course will introduce the clinical workflow analysis as a method of choice to improve clinical processes in health care delivery systems. Students will review the primary objectives for process improvement in clinical health care: outcome quality (including patient safety) and the development of health information technology (HIT) to support the Electronic Health Record (EHR) with initiatives showing a significant impact on clinical workflows, such as meaningful use. Students will define the functional components of the health care activities and learn to map on a flowchart the standard symbols used to represent all tasks and steps, decision points, resources, and outcomes of the clinical workflow. Students will apply the tools of workflow analysis by assessing a workflow in a health care setting using graphical representations of the workflow phases (current state, desired state), and process defects identification and classification. The course will introduce the quantitative measures of workflow improvement used in Lean Six Sigma. Students will formalize a proposal for an intervention aimed at the modification and optimization of a clinical workflow. (3 credits)

MI 6423—Maximizing Talents in the Health Technology Workforce
In the ever-changing world of information and global economic competition, it is crucial that individuals and organizations understand their personal and group talents. Today’s educational, health care, and institutional structures lack leadership and cutting-edge thinking. By applying strength-based leadership practices, one comes to understand his or her own, as well as the group’s, strengths and talents and is able to apply these practices in daily work, as well as in leadership roles. The course will produce a personal understanding of individual, as well as group personality/strengths and how these evolve and affect performance in individuals. Students will develop a better self-awareness of what strengths they possess and how this affects personal and work performance. It demonstrates how leaders continue to grow, if this is a chosen career path, and how they develop each of the group’s talents to maximize the performance of the team and organization. The Affordable Care Act will be incorporated and students will discover what individual and organizational talents must be used to improve patient care in the future when utilizing technology. (3 credits)

MI 7000—Health Informatics Practicum
This is a required course for all M.S.B.I. students. The practicum allows the student to select an area of interest
in which to apply the theories, concepts, knowledge, and skills gained during the didactic courses in a real-world setting. The student will work under the supervision of a site-based preceptor and an NSU-based faculty adviser. The student is expected to acquire skills and experiences in the application of basic biomedical informatics concepts and specialty knowledge to the solution of health information technology (HIT) problems. Students will be actively involved in the development, implementation, or evaluation of an informatics-based application or project.

A specific set of measurable learning objectives and deliverables will be determined by the student, the site preceptor, and the NSU-based faculty adviser. These learning objectives must be approved by the course director. The student’s area of interest would be determined at an earlier point in the program or by the needs of the precepting organization.

The practicum is evaluated by completion of an ePortfolio. The ePortfolio is an evidence-based digital format method used by the program to assess the quality and quantity of learning gained from a student practicum experience. The ePortfolio is standardized in its structure and format, yet individualized in its content for each student. Overall, the ePortfolio is goal-driven documentation of professional growth and achieved competencies during the practicum. The ePortfolio combines self-reflection, instructor assessments, and documentation supplied by students (evidence/samples) to document what they learned/produced. It is used to help students prepare for career transition/development. (4 credits)

Students are responsible for finding their own practicum site. Once a site is located, the program office will facilitate a legal affiliation agreement between the site and the program. Some practicum sites may require background checks, drug screening, and immunization records. Students are responsible for any associated costs.

---

**Disaster and Emergency Management Program**

**Program Overview**

The Master of Science degree in Disaster and Emergency Management (M.S. DEM) in the College of Osteopathic Medicine will provide students with the knowledge, skills, and basic research capabilities to enter one of the fastest-growing academic disciplines with both a national and an international perspective. This interprofessional degree is designed to provide students with the theoretical knowledge and applied skills to be part of the rapidly growing, interdisciplinary field of disaster and emergency management. It will allow students from a variety of disciplines to specialize in one of several concentrations (all of which have a community research practicum at the local, regional, state, federal, or international level as a key component). The program is available online and will incorporate interactive and individual, asynchronous activities. In addition, all students in the program will be required to participate in a cohort orientation at the beginning of the program and a final presentation at the conclusion of their studies. The concentrations for the Master of Science degree include **maritime safety and security, cybersecurity, criminal justice, public health, environmental hazards, and fire administration**.

Distinct concentrations will allow the students to apply the principles of emergency management to these areas of particular interest and need. The M.S. in Disaster and Emergency Management is designed to provide students with knowledge and skills, along with basic research application in the field that will help them acquire the competencies as outlined by the FEMA Emergency Management Higher Education Program and will prepare them to work in an all-hazards preparedness environment. Disaster management is a critical challenge and responsibility of government, businesses, educational institutions, nonprofit organizations, and health care agencies and institutions. Response to disasters begins long before the disaster occurs, involving pre-disaster planning, mid-disaster operations, and post-disaster recovery and reconstruction. A successful response can only be carried out through the coordinated efforts of all levels of government, the public and private sector stakeholders, and nongovernmental organizations, as well as the involvement of faith-based organizations.

The program will help meet the need for trained emergency management professionals at local, state, national, and international levels.
international levels. The Master of Science in Disaster and Emergency Management not only develops the skills in leadership, but facilitates students in gaining specialized training in emergency management and disaster response related to: 1) maritime safety and security, 2) cybersecurity, 3) criminal justice, 4) public health, 5) environmental hazards, and/or 6) fire administration. With the increased threat of terrorism, law enforcement and public health personnel need additional training in the areas of response and recovery and fire fighters need additional skills to oversee their departments in this new landscape. As the threats of cyber-theft, cyber-crime, cyber-fraud, and cyber-warfare continue to increase, computer and IT professionals need additional training in protecting our nation’s assets and infrastructure. In addition, as the incidents of piracy on the high seas continue to grow and the potential for terrorists to attack our ports becomes more imminent, maritime security has become a high priority. As natural hazards continue to increase, environmental and meteorological experts are being called upon more and more for their input related to these disasters.

This degree program fits the mission of NSU in that it provides an “accessible distance learning” program while “fostering intellectual inquiry, leadership, and commitment to community through engagement of students” by providing an online curriculum that is convenient, but also offers ample student and faculty member engagement. The program fosters community involvement by requiring a community research capstone project. The curriculum also supports the mission of the College of Osteopathic Medicine for “producing compassionate and ethical lifelong learners and advocating for the health and welfare of diverse patient populations” through its specialty concentration in public health, while the overarching goal of the degree to prepare communities to be more prepared and resilient to disasters serves the overall general health and welfare of all.

Program Objectives

By creating a cadre of individuals who interact with the public and private sectors, the program in disaster and emergency management can help to create an environment in which all-hazards initiatives include preparedness, mitigation, response, and recovery as the standard. Students who graduate from this program will achieve the following program objectives:

- demonstrate the skills to conduct a comprehensive vulnerability risk assessment at the community, county, state, and national levels
- demonstrate knowledge and skills of available tools and resources for disaster and emergency planning and response
- analyze the disaster process and differentiate disaster response actions, including recovery operations, from routine emergency operations
- exhibit competencies for disaster mitigation, response, and recovery at the individual, community, and state levels
- demonstrate the knowledge and skills necessary to build resilience post-disaster in a variety of disaster settings
- enter the field of emergency management and be leaders within this discipline

Course of Study

The M.S. DEM program consists of five core courses (15 credit hours), including a required community research practicum (3 credit hours). Along with the core requirements, the student can choose one of several specialization concentrations or elect to pursue a general track. These concentrations require four courses (12 credit hours) in the chosen discipline. To complete the degree, an additional 9 credit hours will be taken from general electives or electives in one of the six areas of specialization (i.e., concentrations) that include maritime safety and security, cybersecurity, criminal justice, public health, environmental hazards, and fire administration. Students also have the option of choosing from the electives list for the Master of Science in National Security Affairs, a partner degree program offered by the College of Arts, Humanities, and Social Sciences.

In order to analyze the broad spectrum of hazardous events and to appropriately assess and employ the large volume and rapidly evolving literature in this field, all students are required to take biostatistics and an introductory course in all-hazards preparedness, as well as the practicum in their chosen specialization concentration. In addition to the three courses required for all students, each student must take a core of 3 credit hours from the Management and Leadership cluster and 3 credit hours from the Threats, Hazards, and Impacts cluster.

Realizing that disaster and emergency management often crosses the boundaries of interests, as well as the professional lines of homeland security and other disciplines, students in the program will be able to take courses from related programs at NSU, such as conflict resolution, sociology, or psychology, as a substitute for up to 6 elective credit hours (with permission of the adviser).
Accreditation
The program has been approved by the Southern Association of Colleges and Schools.

Admissions Requirements
The Master of Science in Disaster and Emergency Management program evaluates the overall quality of its applicants, including academic achievement, life experience, recommendations, knowledge of the field of emergency management, and personal motivation.

The applicant must have
• a bachelor's, master's, doctoral, or terminal professional degree from a regionally accredited college or university or from a college or university accredited by the Distance Education and Training Council (DETC) Accrediting Commission
• a cumulative, overall grade point average (GPA) of 3.0 or above on a 4.0 scale from all institutions attended
• the ability to express himself or herself in writing through a written statement submitted with the application
• two letters of recommendation from college or university instructors, employers, work colleagues, etc.

Any applicant who has graduated from a college or university in another country where English is not the primary language, regardless of United States residency status, must obtain a minimum score of 550 on the written, 213 on the computerized, or 79–80 on the Internet-based TOEFL, a score of 54 on the Pearson Test of English—Academic, or a score of 6.0 on the IELTS. An official set of scores must be sent directly from the testing service to NSU's EPS.

GRE or MAT scores are preferred from all applicants except those who currently have a terminal degree (e.g., Ph.D., D.M.D., D.V.M., J.D., or D.O.) or those who already have a master's degree from a regionally accredited U.S. university or college or from a college or university accredited by the Distance Education and Training Council (DETC) Accrediting Commission. An applicant who does not provide a GRE or MAT score will be required to attain a grade of B or higher in his or her first 9 credit hours in order to continue in the program.

Application Procedures
The M.S. in Disaster and Emergency Management program accepts applications year-round. Applicants may apply for matriculation into any one of three semesters (fall, winter, or summer). Application deadline will be 30 days prior to the start of each semester.

For an application to be considered by the admissions committee, applicants must submit
• the online application found at https://webSTAR.nova.edu/pls/PROD/bwskalog.P_DisploginNon (Payment of a nonrefundable application fee of $50 is required to complete your application.)
• official transcripts of all coursework attempted by the applicant from all colleges and universities attended, including undergraduate, graduate, and professional education
• evidence of GRE or MAT scores no more than seven years old, if applicable
• two letters of recommendation from college or university instructors, employers, work colleagues, etc.
• a written statement

Please call 800-356-0026, ext. 24319, or visit our website (osteopathic.nova.edu/msdem) for further information.

Nondegree-Seeking Students
A nondegree-seeking student is one who wishes to take courses in the M.S. in Disaster and Emergency Management (DEM) program, but does not wish to pursue the master's degree at the time of application. A limit of 15 credit hours will be allowed. The nondegree-seeking student must provide the following admissions requirements in order to take courses in the program:
• a completed online application form
• a nonrefundable application fee of $50
• official transcripts of all undergraduate, graduate, and professional education

If, after taking courses in the M.S. DEM program, a nondegree-seeking student chooses to pursue the degree, the student must submit a new and complete application to the program to become a degree-seeking student and must meet all requirements for admission into the degree program. Previous coursework as a nondegree-seeking student does not guarantee acceptance into the degree program. If accepted into the program as a degree-seeking student, previous coursework may be eligible for transfer toward the degree.

Graduate students from other NSU programs who elect to take courses in the degree program may do so with written approval of the degree program director.
Tuition and Fees
Tuition for the 2016–2017 academic year is $560 per credit hour for all M.S. DEM courses. Courses with the MMIS, ISEC, or NSAM designation are offered at tuition rates determined by the college or program through which the courses are offered. Tuition for 2017–2018 will subsequently be posted on our website (osteopathic.nova.edu/msdem). A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually. All tuition and fees are subject to change by the board of trustees without notice.

Program discounts are available to full-time law enforcement officers, fire fighters, and emergency service personnel. Please contact the program adviser for more information.

Graduation Requirements
In order for students to graduate and receive the M.S. in Disaster and Emergency Management degree, they must complete 36 credit hours from the list of courses outlined in this document. In addition, a cumulative grade point average of 3.0 must be attained. In lieu of a comprehensive exam or thesis, students must successfully complete a practicum in which they must receive a grade of C or better. Students will be required to present the findings and/or results of their practicums at the end of their program to faculty members.

Curriculum Outline

Core Courses (15 credit hours)

<table>
<thead>

Course Descriptions

DEM 5001—Biostatistics
This course focuses on the principles and reasoning underlying modern biostatistics and on inferential techniques commonly used in public health research. At course completion, students will be able to apply basic inferential methods in research endeavors and improve their abilities to understand the data analysis of health-related research articles. The examples utilized will be derived from issues involved in all-hazards preparedness. (3 credit hours)

DEM 5050/PUH 5112/CJI 6121/HCP 6101/GERO 5050—Bioterrorism and All-Hazards Preparedness
This course will define the interdisciplinary roles and responsibilities of professionals, paraprofessionals, and volunteers in all-hazards emergency planning, response, mitigation, and recovery. (3 credit hours)

DEM 6010—Practicum
This is a culminating capstone experience for all M.S. students. With faculty member approval, students will select a community-based project for a practicum in an emergency preparedness site or facility. The student is expected to acquire skills and experience in the application of emergency preparedness. (3 credit hours)
Management and Leadership Cluster
Core Courses

DEM 5010—Leadership and Organizational Behavior for Emergency Preparedness
The application of effective leadership techniques and behaviors that influence them are a valued skillset that emergency preparedness professionals use to mobilize human resources. Understanding and responding to organizational behavior is a challenge that emergency managers routinely face. This course provides students with an understanding of various leadership and organizational theories in the context of emergency preparedness. Students will examine and develop a range of skills in a number of areas including the use of 21st-century management theories and practice, group dynamics, leadership and influence, conflict management, and the dynamics of positional power and authority. Students will acquire these skills through experiential learning, observation, and practice while learning practical strategies for their application for personal and professional growth in the emergency preparedness discipline. (3 credit hours)

DEM 5020—Preparedness, Planning, Mitigation, and Continuity Management
This course provides the student with an understanding of the techniques for in-house or on-site planning as well as community planning. Planning will be addressed from its position in the overall philosophy of comprehensive emergency management. Regulatory requirements for planning will be covered. Sample plans will be developed. (3 credit hours)

DEM 5030—Executive Leadership and Administration
Topics covered in this course include program planning and management, financial planning and management, managing information, managing people and time, personality types, leadership styles, decision-making skills, team-building skills and group dynamics, community-building skills, intergovernmental relationships, negotiating skills, communications skills, emergency preparedness ethics, and professionalism. (3 credit hours)

DEM 5040—Security Management in a Global Society
This course will examine security challenges and responses that face a global society including airport, maritime, rail, and auto safety. This course will provide students with the opportunity to investigate security management in other countries in order to make a comparison to U.S. security management systems. (3 credit hours)

Threats, Hazards and Impacts Cluster
Core Courses

DEM 5060—Environmental Hazards in Emergency Preparedness
This course will provide a basic understanding of the variety of environmental hazards that can be associated with a variety of disasters and emergencies. Topics to be addressed include types of hazardous materials, their storage and transportation, hazardous waste, and a variety of physical and mechanical environmental hazards. Basic standards and regulations will be examined. Students will learn how to develop in-house and on-site emergency response contingency plans. (3 credit hours)

DEM 5070—Risk Assessment and Mitigation
The student will review the key concepts, methods, and practices of modern risk management through a detailed exploration and evaluation of hazard identification, vulnerability assessment, and risk analysis. Legal and political risk factors will be addressed. (3 credit hours)

DEM 5080—Agroterrorism and Food System Disasters
This course will introduce the student to the dangers and impacts of terrorist attacks against agricultural or food industry targets. The student will learn about potential targets, detection systems, vulnerability assessment, planning, and recovery. (3 credit hours)

DEM 5090/CJI 6122/HCP 6102—Weapons of Mass Threat and Communicable Diseases
This course will provide students with an understanding of pandemic influenza and other communicable diseases. Students will also be introduced to potential chemical, biological, radiological, nuclear, and explosive weapons and will learn the expectations of preparations and responses to a pandemic or CBRNE event. Prerequisite: DEM 5050/PUH 5112/CJI 6121 (3 credit hours)

General Electives Concentration

DEM 6110—Community Vulnerability Assessment
This course will review the components of a community vulnerability assessment. Students will be actively involved in a community assessment and develop a report for recommended steps for action. (3 credit hours)

DEM 6120—Psychosocial Dimensions of Disaster
This course will focus on the psychological and behavioral health and psychological impacts of emergencies, disasters, and terrorism on survivors, responders, and communities. Topics will include identification and management of impacts and reactions, mental health systems and resources, Psychological First Aid (PFA), and considerations for vulnerable populations. (3 credit hours)
DEM 6130—Risk and Crisis Communication
Students will be exposed to the strategies and methodologies in the exchange of information among stakeholders about the nature, magnitude, significance, or control of a risk. The course will focus on helping students to build trust and explain complexities to individuals and groups when emergencies arise. (3 credit hours)

DEM 6150—Grant Writing for Emergency Preparedness
This course is an introduction to the skills needed to write a grant in the field of emergency preparedness. Each student will submit a grant as a culminating experience. (3 credit hours)

DEM 6160—Leadership Topics in Disaster and Emergency Preparedness
This is a didactic course in a specific area of interest in emergency preparedness and disaster management. Each leadership topic course will have a different DEM course number. (3 credit hours)

DEM 6170—Elective Practicum
With faculty member approval, students will be allowed to select an additional community-based project for a practicum in an emergency preparedness facility. The facility and the area of focus for the project will be different from those selected for the required practicum. The student is expected to become familiar with a different area of emergency preparedness and develop additional skills from those developed in the required practicum in their chosen track. (1–3 credit hours)

DEM 6180—Exercise Design
Exercise design is much like scripting a play to make sure all of the players perform the correct actions and make the right decisions at the appropriate time. In this course, students will learn what comprises the various types of exercises (tabletop, functional, and full-scale) and explore the design process following a step-by-step process (needs assessment, scope, statement of purpose, objectives, narrative scenario, major and detailed event schedule, and expected actions) utilizing a building block approach that will ensure successful progression in exercise complexity and execution, allowing for appropriate training and preparation to occur in the community conducting the exercise. At the completion of the course, students will have developed an individual, tabletop exercise with all the requisite components. Additionally, students will incorporate various evaluation methods to facilitate the development of viable after action reports and improvement plans.

Maritime Safety and Security Concentration Electives

DEM 6210—Introduction to Maritime Safety and Security
This course offers basic shipboard safety awareness, covering topics such as personal safety techniques and use of firefighting and other onboard equipment to protect one's self, the crew, and a vessel at sea. (3 credit hours)

DEM 6220—Maritime Safety and Security Leadership
A ship's officers are responsible for the safety of their crew. This course will introduce the student to concepts such as crew leadership, target identification, the decision-making risk matrix, and safety drilling. Students will learn to develop a vessel safety plan. Prerequisite: DEM 6210 (3 credit hours)

DEM 6230—Maritime Security for the Cruise Line and Yachting Industries
This course will address the safety issues specific to the cruise and yachting industries. Topics will include keeping threats away from the vessel and protecting passengers' lives and well-being. Prerequisite: DEM 6210 (3 credit hours)

DEM 6240—Concepts in Shipboard Safety Management
In this course, students will learn how to address safety issues such as medical emergencies, oil spills, fires, and collisions while underway or at dockside. Students will also learn to develop a contingency plan for a vessel, taking into consideration such things as geographical area of operation, environmental conditions, and the proximity or suitability of both onshore and offshore facilities. (3 credit hours)

DEM 6250—History of Maritime Disasters
This course will provide a historical understanding of the development of the maritime industry and will include topics such as piracy, commerce, naval warfare, and improvement in naval architecture. (3 credit hours)

DEM 6260—Maritime Environmental Responsibilities
This course introduces environmental politics and policy and examines the process through which environmental policy is generated. This course will also examine the stress placed on the marine environment by global growth, economic development, and modernization. (3 credit hours)
Cybersecurity Concentration Electives

(Note: This concentration will be facilitated in partnership with NSU’s College of Engineering and Computing.)

DEM 6310—Introduction to Cybersecurity
This course introduces students to the wide range of modern communications technologies. Use of these technologies by government and business entities for intelligence gathering, their limitations, and their vulnerabilities are presented to students. An overview of the history of computer hacking is covered. Additionally, a brief overview of law and policy concerning cyber communications are discussed, beginning with the National Security Act of 1947. (3 credit hours)

DEM 6320—Information Security and Protection
This course prepares students to assess the security needs of computer and network systems, recommend safeguard solutions, and manage the implementation and maintenance of security devices, systems, and procedures. Reviews of past hacking, criminal, and terrorist (state and nonstate) attacks on information networks are a component of this course. (3 credit hours)

DEM 6330—Cybersecurity and Constitutional Issues
This course discusses telecommunications law and policy as it applies to the rapidly evolving technologies and capabilities of the Internet, telecommunications, satellites, and imagery systems available for commercial and government exploitation. The legal implications of a global Internet, recourses available to law enforcement, treaties, etc. are reviewed from an international perspective—including processes by which international cooperation is gained to deal with cyber threats. (3 credit hours)

DEM 6340—Cyber Vulnerability
Students discuss at length the reliability and vulnerability of computer-based technologies, biometrics, and security technologies. Included are case analyses of external (hacking) and internal (man-in-the-middle) attacks on government and private communications systems. (3 credit hours)

DEM 6350—Data Mining
This is a course in statistics particularly geared to pattern analysis, information continuity, and data recovery. Inferential and descriptive techniques for decision analysis are included. This course uses a variety of data bases associated with business, census, terrorism, and crime statistics from which students conduct research projects. Personal computers with fundamental software programs such as Excel, SPSS, or SAS are necessary for students to complete this course. (3 credit hours)

Criminal Justice Concentration Electives

(Note: This concentration will be facilitated in partnership with NSU’s College of Arts, Humanities, and Social Sciences.)

DEM 6423/CJI 6123—Interagency Disaster Communication
This course will examine concepts and principles of communication among the many agencies involved in disaster response and recovery. Topics such as the principles and organizational structure of the Incident Command System (ICS) and the National Incident Management System (NIMS) will be explored. Additional topics will include the principles of successful communication, the application of communication principles to all phases of the disaster cycle, mutual aid agreements, memoranda of understanding/agreement, the use of social media in disaster communications, and the role of the public information officer (PIO). Students will develop a communications annex plan as part of the course. (3 credit hours)

DEM 6424/CJI 6124—Community Disaster Preparedness
This course will emphasize “disaster-resistant communities” and provide information on preparing and developing partnerships within the community. Regardless of the nature of the incident, intentional or unintentional, emergency services personnel may be charged with enforcing public health orders, securing contaminated areas or health facilities, providing protection and support for the transportation and dispensing of assets from the national stockpiles, and controlling civil unrest. Resources may be overwhelmed and the ability to respond will depend on preparation and partnerships within the community. (3 credit hours)

DEM 6404/HCP 6104—Community Planning, Response, and Recovery for Families and Children
This course is designed to address interdisciplinary roles in preparation and post-disaster community health among families and children. The course will focus on the impact of a disaster on health and family, dissemination of health information, and guides to family emergency planning. Topics will include best practice methods and evaluations of the impact of disaster on health and family, dissemination of health information, guides to family emergency planning, and avenues for public health and safety disciplines to interface with health management organizations. (3 credit hours)

DEM 6410/HCP 6103—Emergency Preparedness Public Policy and Law
This course will address relevant state and federal statutes that affect emergency preparedness. Students will explore the legal implications of mitigation and preparedness efforts and will also become familiar with legal resources available for future reference and research. (3 credit hours)
DEM 6440—Conflict Management in Times of Crisis
This course addresses one of the core competencies required of leaders in times of disasters and emergencies—namely, conflict management. Conflict is inevitable in times of crisis, and this course addresses conflict styles, conflict management techniques, communication skills that contribute to effective conflict resolution, and how to bring a strategic approach to managing conflict to support disaster response and recovery. (3 credit hours)

Public Health Concentration Electives
(Note: This concentration will be facilitated in partnership with the Public Health Program at NSU’s College of Osteopathic Medicine)

DEM 6500—Epidemiology of Disasters
This course will examine the fundamentals of epidemiology, including basic concepts in epidemiology concerning the distribution and determinants of disease frequency in human populations and their investigation. Using a case-based approach, students will use the basic principles and methods of epidemiological investigation to assess the short-term and long-term effects of disasters and to predict consequences of future disasters. This course will address topic areas including basic demography, measures of disease frequency, disease screening and surveillance, descriptive and analytical study design, and sources of error in investigations. (3 credit hours)

DEM 6510—Public Health Issues in Disaster and Emergency Preparedness
This course will explore the pervasive views about public health in the emergency and disaster prevention, response, and recovery environment. The course will emphasize the importance of the integration of public health in the development of effective emergency response contingencies for disasters. (3 credit hours)

DEM 6520—Veterinary Challenges in Disasters
This course will identify the planning, mitigation, response, and recovery issues and challenges for pets and animals in both confined and unconfined areas. (3 credit hours)

DEM 6141 Social Vulnerability: Implications in the Disaster Cycle
This course will identify the at-risk and vulnerable populations and discuss how each of these groups is affected in times of disaster. In addition, the course will address the special needs and emergency response efforts that must be considered for each of these groups. (3 credit hours)

Environmental Hazards Concentration Electives

DEM 5060—Environmental Hazards in Emergency Preparedness
This course will provide a basic understanding of the variety of environmental hazards that can be associated with a variety of disasters and emergencies. Topics to be addressed include types of hazardous materials, their storage and transportation, hazardous waste, and a variety of physical and mechanical environmental hazards. Basic standards and regulations will be examined. Students will learn how to develop in-house and on-site emergency response contingency plans. (3 credit hours)

DEM 5080—Agroterrorism and Food System Disasters
This course will introduce the student to the dangers and impacts of terrorist attacks against agricultural or food industry targets. The student will learn about potential targets, detection systems, vulnerability assessment, planning, and recovery. (3 credit hours)

PUH 5201—Foundations of Public Health
This course provides an introduction to the history, concepts, values, principles, and practice of public health. The course suggests the sense of purpose that unites the myriad occupations and tasks in public health practice and provides an orientation to each of the five traditional core disciplines of public health practice. (3 credit hours)

DEM 6260—Maritime Environmental Responsibilities
This course introduces environmental politics and policy and examines the process through which environmental policy is generated. This course will also examine the stress placed on the marine environment by global growth, economic development, and modernization. (3 credit hours)

DEM 6710—Weather and Disaster and Emergency Preparedness
This course will include basic meteorological principles, methodologies, and terms as well as introduce the student to a variety of weather-related resources and surveillance systems used in planning for disasters. The basic meteorological processes causing disasters such as hurricanes, tornadoes, floods, droughts, blizzards, and heat waves will be discussed. Students will learn how meteorology and understanding the science of weather can be used in disaster risk reduction. (3 credit hours)
PUH 5220—Environmental and Occupational Health
This course investigates environmental and occupational factors that contribute to the development of health problems in industrialized and developing countries. It includes such topics as toxic substances, pests and pesticides, food quality, air and water pollution, solid and hazardous waste disposal, occupational hazards, and injury prevention. (3 credit hours)

Fire Administration Concentration Electives
DEM 6610—Fire Service Operations
This course will explore the role of the fire department as a part of the emergency services and response community, as well as the greater community, during a disaster. The concept of risk-based decision-making for a more effective response during disasters or multiple casualty incidents will be addressed. Incident priorities, strategies, and tactics as they relate to preparedness, planning, and incident management, as well as de-escalation of the response, will also be discussed. (3 credit hours)

DEM 5030—Executive Leadership and Administration
Topics covered in the course include program planning and management, financial planning and management, managing information, managing people and time, personality types, leadership styles, decision-making skills, team-building skills, intergovernmental relationships, negotiating skills, communication skills, emergency preparedness ethics, and professionalism. (3 credit hours)

DEM 6423/CJI 6123—Interagency Disaster Communication
This course will examine concepts and principles of communication among the many agencies involved in disaster response and recovery. Topics such as the principles and organizational structure of the Incident Command System (ICS) and the National Incident Management System (NIMS) will be explored. Additional topics will include the principles of successful communication, the application of communication principles to all phases of the disaster cycle, mutual aid agreements, memoranda of understanding/agreement, the use of social media in disaster communications, and the role of the public information officer (PIO). Students will develop a communications annex plan as part of the course. (3 credit hours)

DEM 6424/CJI 6124—Community Disaster Preparedness
This course will emphasize “disaster-resistant communities” and will provide information on preparing and developing partnerships within the community. Regardless of the nature of the incident, intentional or unintentional, emergency services personnel may be charged with enforcing public health orders, securing contaminated areas or health facilities, providing protection and support for the transportation and dispensing of assets from the national stockpiles, and controlling civil unrest. Resources may be overwhelmed and the ability to respond will depend on preparation and partnerships within the community. (3 credit hours)

DEM 6410—Emergency Preparedness Public Policy and Law
This course will address relevant state and federal statutes that affect emergency preparedness. Students will explore the legal implications of mitigation and preparedness efforts and will also become familiar with legal resources available for future reference and research. (3 credit hours)

DEM 6440—Conflict Management in Times of Crisis
This course addresses one of the core competencies required of leaders in times of disasters and emergencies—namely, conflict management. Conflict is inevitable in times of crisis, and this course addresses conflict styles, conflict-management techniques, communication skills that contribute to effective conflict resolution, and how to bring a strategic approach to managing conflict to support disaster response and recovery. (3 credit hours)

Interprofessional Electives
- PUH 5512—Health Policy Planning and Management
- PUH 5430—Epidemiology
- MI 6421—Geographic Information Systems
- MI 6405—Public Health Informatics
- NSAM 5001—Current Historical Issues in National Security Affairs
- NSAM 5002—Terrorists and Terrorism: Theory and Practice
- NSAM 5003—National Intelligence Collection and Analysis: Theory and Practice
- NSAM 5004—Border Protection and Military Issues
- NSAM 6640—Critical Incident Response
- NSAM 6643—Social Aspects of Terrorism
- NSAM 6654—Islam, Conflict, and Peacemaking
Graduate Certificate in Social Medicine

The Graduate Certificate in Social Medicine will target medical residents, directors of medical education, residency program directors or anyone with an interest in learning more about global/social medicine. Over the past 15 years, there has been a growing national and international trend toward developing frameworks for defining, applying, teaching, and measuring the competency of a physician. Many organizations have developed criteria to define and measure competency. The Certificate in Social Medicine is designed to address these needs and enhance the experiences for residents to achieve program competencies. Residents will obtain additional information from this graduate-level program, which helps to achieve competency in several elements. Program directors and directors of medical education completing this certificate can impart their expertise to the residents.

Admissions Requirements
The Graduate Certificate in Social Medicine evaluates the overall quality of applicants, including academic achievement, personal motivation, knowledge about health care, and life experiences. Criteria for admission to the Graduate Certificate in Social Medicine are as follows:

- The applicant must hold a bachelor's, master's, or doctoral degree from a regionally accredited college or university.
- A cumulative grade point average (GPA) of 3.0 or above, on a 4.0 scale, is preferred.
- Applicants enrolled in another area of study within Nova Southeastern University must be in good academic standing, must provide a letter of recommendation from the dean or program director of the other college or program, and must meet the Graduate Certificate in Social Medicine admission requirements.
- All application materials must be received in a timely manner to enable the Office of Admissions and the admissions committee to process the application promptly.

Health care-related experience is desirable, but not required. If the applicant does not hold a health-related graduate or professional degree, he or she must supply evidence of having taken the GRE, PCAT, OAT, AHPAT, MCAT, DAT, GMAT, or LSAT. Applicants' scores from these standardized tests must be no more than five years old. Applicants with health-related graduate or professional degrees may be required to submit official test scores upon evaluation of their applications.

Tuition and Fees
Tuition for 2016–2017 is $585 per credit hour. Tuition for 2017–2018 will subsequently be posted on our website (osteopathic.nova.edu/masters). A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $350 per semester for two or more courses and $175 per semester for one course, not to exceed $1,050 annually, is also required.

Curriculum Outline
Students will complete a total of five courses of 3 credits each for a total of 15 credits.

Disaster and Emergency Management Concentration (choose one for 3 credits)

Community Disaster Preparedness

Community Planning, Response, and Recovery for Families and Children

Foundations of Public Health

Public Health Issues in Disaster and Emergency Preparedness

Epidemiology of Disasters

Elective (choose a second course from any of the previous concentrations for 3 credits)

Global Health Experience (complete all requirements listed below for 3 credits)

Global Health

complete 30 hours of approved community service

participate in one NSU-COM medical outreach program

At the completion of the Graduate Certificate in Social Medicine program, students will have completed course offerings that can be applied to a master’s degree in any of the following three programs:

- Master of Public Health
- Master of Science in Biomedical Informatics
- Master of Science in Disaster and Emergency Management

Students must follow the application process for the respective chosen program, but the credits earned for the courses taken in earning the certificate will be transferred to the degree program.

Medical Education Program

Education is at a crossroads. Physicians and other health professionals are sought after to serve as educators in their respective professions. While they have strong recognition as experts in their clinical discipline, typically, they have little or no formal training in the educational process. Today’s students no longer merely watch, listen, and memorize information. Those medical professionals who choose to teach in the health professions must be guided by new innovations and contemporary technology in order to better understand how people learn.

It is important for educators in the health care professions to facilitate the learning process. Graduates of health programs should learn to connect and integrate multiple forms of reasoning (critical and creative thinking) and types of knowledge (formal and case-based) in order to provide the best patient care. Faculty members should be prepared to integrate formal knowledge and concepts fundamental to professional practice in a manner that is relevant to students and residents in a clinical context.
To this end, the Nova Southeastern University College of Osteopathic Medicine has developed a Master of Science in Medical Education program. This 36-credit-hour, online degree program is designed to help clinical faculty members and community preceptors enhance their professional education and teaching skills, as well as expand their ability to facilitate the learning process of students and residents in a variety of clinical teaching environments. The program is composed of 6-credit-hour courses and includes

- assessment and evaluation
- educational methodologies
- research
- technology in education
- learning styles

The rich, interprofessional platform of NSU’s College of Osteopathic Medicine and Health Professions Division provides an excellent environment for this degree program, as it parallels the interprofessional delivery model of patient-care settings. The program incorporates the most recent educational technologies into a robust, six-course program designed to be completed in two years; however, students have a maximum of six years to complete it.

Faculty members for the Master of Science in Medical Education program are recognized scholars and educators from NSU, as well as other major universities. They are carefully selected on the basis of their subject expertise, teaching abilities, and professional involvement. Most importantly, they are united in their desire to educate and to motivate students to use what they learn in the program to inspire others.

Master of Science in Medical Education program graduates may serve in a variety of educational roles in both university and hospital settings. These include residency program directors, department chairs, assistant deans, associate deans, designated institutional officers, and directors of medical education. The program provides graduates with an educational framework to pursue academic leadership positions. It also strengthens credentials for academic promotion.

Course of Study

The course of study was designed to develop professional educators with the knowledge and skills to lead in a dynamic and changing health care system. The program includes completion of the six required courses identified in the curriculum. Students are expected to demonstrate the application of content knowledge to their specific clinical profession and engage in robust dialogues with other health care professionals. To be eligible for the M.S. in Medical Education degree, students must satisfactorily complete the minimum 36 credit hours of coursework required, with a grade point average of 3.0 (B) or higher, within seven years of matriculation.

Program Learning Objectives

The participant in the Master of Science in Medical Education Program will be able to

- demonstrate the ability to employ multiple methods to facilitate learning in a variety of health profession education settings
- design learning opportunities that incorporate the use of multiple forms of current and evolving technologies
- employ assessment strategies to determine the degree to which learners have achieved specified education and training outcomes
- identify and employ multiple learning principles in the provision of a broad range of instructional activities
- demonstrate the ability to design and conduct research and engage in scholarly activities in health professions education
- develop a project that applies the knowledge of concepts, skills, and attitudes acquired during the Master of Science in Medical Education program

Admissions Requirements

- The applicant must hold a bachelor’s, master’s, or doctoral degree from a regionally accredited college or university.
- A cumulative grade point average (GPA) of 3.0 or above, on a 4.0 scale, is preferred.
- Health care- and/or education-related experience is desirable, but not required.
- The applicant must provide evidence of having taken the GRE, PCAT, OAT, AHPAT, MCAT, DAT, GMAT, LSAT, or Miller Analogies Test, if he or she does not hold a health-related graduate or professional degree. The applicant’s score for the standardized test must be no more than five years old. Applicants with a health care- and/or education-related graduate or professional degree may be required to submit official test scores upon evaluation of their application.
- Applicants enrolled in another area of study within Nova Southeastern University must provide a letter of recommendation from the dean or program director of the other college or program, and must meet the M.S. in Medical Education admissions requirements.
- All application materials must be received in a timely manner to enable the Office of Admissions and the admissions committee to process the application promptly.
Application Procedures
The Office of Admissions processes applications on a year-round basis. Students are admitted to begin studies during the fall, winter, or summer semesters. To be considered for admission, all applicants must

- submit a completed online application with a nonrefundable application fee of $50
- submit official transcripts of undergraduate, graduate, and professional education
- provide one letter of recommendation from a professional reference

All application materials should be sent to
Nova Southeastern University
Enrollment Processing Services (EPS)
College of Osteopathic Medicine, Medical Ed. Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Upon receipt of the completed application and required materials, the Admissions Committee will review the applicant's file and make recommendations to the program director. The director submits recommendations for admission to the dean. The final decision on admission is made by the dean of the College of Osteopathic Medicine.

Should you have any questions, please email shazell@nova.edu or call (954) 262-1786.

Tuition and Fees
Tuition for 2016–2017 is $560 per credit hour. Tuition for 2017–2018 will subsequently be posted on our website (osteopathic.nova.edu/msme). A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually. All tuition and fees are subject to change by the board of trustees without notice.

Transfer of Credits
No transfer credits from coursework completed at another institution will be accepted in this program.

Graduation Requirements
To be eligible for the Master of Science in Medical Education degree, students must fulfill the following requirements:

- satisfactorily complete, with a grade point average of B (3.0) or higher, within seven years of matriculation, the course of study required for the M.S. (minimum of 36 credit hours of coursework) or graduate certificates (minimum of 18 semester hours of coursework)
- satisfactorily meet all university financial and library obligations.

Curriculum Requirements
To develop a comprehensive Master of Science in Medical Education Program at NSU COM, a curriculum has been developed that includes teaching and learning, technology, curriculum development, assessment and measurement, research, and leadership. The didactic courses will be offered online using NSU's state-of-the-art, web-based distance learning technology, as well as on-site resources.

Nondegree-Seeking Students
A nondegree-seeking student is one who wishes to take courses in the Master of Science in Medical Education program, but does not intend to pursue the master's degree at the time of application. The nondegree-seeking student must provide the following admissions requirements in order to take classes in the Master of Science in Medical Education program:

- a completed online application form
- official transcripts of all undergraduate, graduate, and professional education
- a nonrefundable application fee of $50

Nondegree-seeking students are not guaranteed future acceptance into the Master of Science in Medical Education program. If after taking classes in the program as a nondegree-seeking student, the student wishes to become degree seeking, he or she must apply to the M.S. program as a new student and meet all the requirements for admission. If accepted into the degree program, courses or credits that were taken as a nondegree-seeking student will be automatically applied toward the degree. Nondegree-seeking students can enroll in a maximum of three courses or 18 credit hours.

**Course Descriptions**

**MED 0600—Practicum in Teaching Medical and Other Health Professions Students in a Diverse Learning Environment**
This course will assist the participants in adapting instruction in their medical area of expertise to the ways in which their individual students learn best. Research in the field of education suggests that students’ academic performance improves when instructors match their instructional strategies to students’ learning styles. The practicum will include guidelines for identifying students’ learning preferences and identifying instructional strategies and environments to address these preferences. *(6 credit hours)*

**MED 0610—Practicum in Implications of the Domains of Human Development on Health Professions Students**
This course will address the nuances of adult learning, with specific emphasis on the relationship between knowledge of diversity and human development as significant variables in devising effective learning environments. The course will address the theoretical and applied aspects of human development and learning theory as a means to incorporate such knowledge into academic planning and programming. *(6 credit hours)*

**MED 0620—Practicum in Technology Resources for Health Professions Education**
This course will help the student become familiar with current and emerging technologies used to deliver or facilitate instruction. Participants will learn about the various computer technologies used in the classroom as well as other environments where health professions students learn. They will also become familiar with various online resources appropriate to the health professions education process. Experiences in emerging technologies—such as robotic simulation, gaming, and virtual world tools—will be used to create instructional modules within respective health career fields. *(6 credit hours)*

**MED 0630—Practicum in Effective Instruction Strategies in Health Professions Education**
This course is designed to assist faculty members in the improvement of their teaching skills in formal, informal, and nontraditional settings. Topics addressed include theories, principles, and practices associated with effective education and learning in higher education. Course activities and assignments are designed to encourage participants to develop skills and abilities that enhance the teaching and learning processes. The course will also explore the diversity of student populations within health care education and find practical solutions to current problems. *(6 credit hours)*
In response to a growing need for nutrition professionals at the graduate level throughout the United States, the College of Osteopathic Medicine has developed a Master of Science (M.S.) degree in Nutrition. The passage of the 2010 Patient Protection and Affordable Care Act in the U.S. Congress has put increased demand on the health care delivery system for preventive services, which includes nutrition in almost all of the areas in primary care. Nutrition assessment and nutrition intervention for chronic diseases are important components of the new health care reform mandates.

This 42-credit-hour, online degree program incorporates the most recent technologies, including Livescribe pens, Blackboard, and interactive video. In addition, all students are required to spend time on campus at the beginning of the program of study for orientation and at the end of the program to present their final projects/research and to participate in graduation ceremonies. The rich, interprofessional platform of NSU's College of Osteopathic Medicine and Health Professions Division provides an excellent environment for this degree program. Nutrition is an essential part of medicine and health care delivery. Elective course offerings in the new program are open to students in osteopathic medicine, public health, and all of the other health professions. Nutrition is an important, interprofessional enhancement to any curriculum, given the increasing attention to nutrition in health care delivery, and is a critically important component in primary care. Given the growth worldwide in people over age 65, nutritionists play a key role in senior health, both in preventing medical and health-related challenges and in managing diseases and in preventing and controlling chronic diseases.

This degree is intended to educate and prepare nutritionists and dietitians (upon completion of an approved internship) to work in a variety of settings including hospitals, food service establishments, long-term care facilities, physician offices/private clinics, outpatient care centers, schools and universities, home health, corporations, athletic training centers or gyms, health departments, food production centers and plants, health care insurance companies, and private consulting businesses. The job outlook for dietitians and nutritionists is better than the average for other health-related disciplines. Employment forecasts for dietitians and master’s degree-prepared nutritionists are expected to be at 21 percent annually for the next 10 years. According to the U.S. Bureau of Labor Statistics (2010), employment in the nutrition field is expected to increase 30 percent during the 2010–2020 decade projection. Job growth is expected to increase, due to an increased emphasis on wellness, prevention of disease through better food choices and dietary habits, and greater integration of nutrition in primary care. The Patient Protection and Affordability Care Act increases the need for nutrition professionals as a result of required wellness checks and emphasis on health promotion and disease prevention.

Possible career options include:

- research, health center, public health, or school nutritionist
- county or state nutritionist
- private health consultant
- WIC coordinator
- health/lifestyle coach
spa director
instructor at the technical or baccalaureate level
corporate wellness consultant
employee health nutrition/wellness coordinator
media and communications professionals
personal trainer/health and fitness instructor

The program will be a source of continuing graduate education for students from the athletic training program and physical education. Students in medicine, public health, and other health disciplines may also select a minor in this new program or may obtain a dual degree. The M.S. in Nutrition provides for an excellent interprofessional graduate degree for students in other health professions, such as medicine, dentistry, optometry, or pharmacy.

The degree does not provide for an internship leading to eligibility to become a registered dietitian. Students completing the M.S. in Nutrition can apply for an approved internship. If successfully completed, students are then eligible to take the National Registered Dietitian Examination.

Course of Study
The curriculum is designed so that all students receive a 15-credit-hour core. All students are also required to complete a 6-credit-hour special project (thesis or nonthesis research option) focused on a current area of research or a community-based project that incorporates nutrition. Students select from one of two concentrations (community nutrition or sports nutrition) and choose three electives, which are 3-credit-hours each, to complete the program. Entering and completing the program as a cohort, they are required to come to the NSU main campus both to begin their studies—meeting with program advisers—and at the completion of the program of study—to present their final projects and meet with faculty members prior to graduation. The program was designed to further the education of those who want to integrate nutrition into other health professions and to enable those who want to practice in the profession of nutrition and dietetics to meet their academic requirements so that they can enter the nutrition or dietetics field.

To develop a cadre of interprofessional nutrition and dietetics leaders for a global society that will have the knowledge and skills to respond to a dynamic and changing system of care, the program emphasizes the

1. interprofessional role of nutrition in health care and sports
2. future of primary health care and the role of nutrition throughout the life span
3. health promotion, disease prevention, and achievement of optimal wellness through proper nutrition
4. use of technology in education and nutrition care
5. current and emerging issues in nutrition in a global society to better serve the population's health care needs through proper nutrition
6. cultural competencies and health disparities critical to the delivery of nutrition services for all ages
7. incorporation of functional nutrition to optimize prevention and wellness

The Master of Science in Nutrition was developed to provide students from varied undergraduate disciplines, or from other graduate areas of study, with the knowledge and applicable skills to function successfully in the profession of nutrition and dietetics. Nutrition is the science and study of nutrients and the impact and interaction of nutrients in the body. Dietetics is the branch of therapeutics concerned with the practical application of diet in relation to health and disease. Dietary guidelines for Americans emphasize the relationship between food choices, disease management, and prevention. Successful education of the public and interprofessional health care practitioners will require nutrition professionals with advanced training in nutrition as it relates to health promotion and disease prevention. The importance of nutrition in primary health care is further reinforced in the Patient Protection and Affordable Care Act of 2010.

Program Objectives
- demonstrate the knowledge and skills to conduct comprehensive nutrition assessment, planning, and ongoing follow-up care
- demonstrate leadership skills in comprehensive community nutrition planning and program development
- demonstrate the knowledge and skills to work with diverse populations throughout the life span
- demonstrate the skills to educate individuals and population groups on the role of nutrition and health
- demonstrate the skills necessary to evaluate nutrition research and participate in community-based nutrition research projects
- demonstrate the knowledge and skills needed to integrate nutrition care into primary care, public health, and related community health environments such as centers, continuum of care retirement communities, fitness centers, etc.
Learning Objectives
• participate in a variety of community-based settings to document nutrition assessments and ongoing follow-up care using the Academy of Nutrition and Dietetics (AND) assessment, diagnosis, intervention, monitoring, and evaluation system
• participate in community-based environments using nutrition diagnosis codes to provide medical nutrition therapy based on federal diagnosis-related guidelines
• develop and deliver presentations for community groups on a variety of topic areas related to interprofessional community nutrition
• develop the skills to conduct a comprehensive community nutrition education initiative
• exhibit the knowledge and skills to become a culturally competent nutrition professional able to work with individuals throughout the life span, who have varied educational, socioeconomic, cultural, and religious backgrounds
• conduct basic community-based nutrition research
• identify nutrition misinformation and demonstrate the ability to differentiate fact from fallacy
• exhibit the knowledge and skills to effectively integrate nutrition education and care into a variety of environments, with a focus on primary care throughout the life cycle

Admissions Requirements
The Master of Science in Nutrition program evaluates the overall quality of its applicants, looking at academic achievement, personal motivation, knowledge of health care, profession-related experience, and recommendation.

Specific criteria for admission are as follows:
• The applicant must hold a bachelor’s, master’s, doctoral, or terminal professional degree from a regionally accredited college or university (international applicants must provide evidence of institutional approval or acceptance).
• A cumulative overall grade point average (GPA) of 3.0 or above, from all institutions attended and/or graduated from, on a 4.0 scale (or equivalent) is preferred.
• Applicants who are concurrently enrolled in a Health Professions Division program can enter the Master of Science in Nutrition program as dual-degree students. The program can be taken concurrently online with other health professions programs. There is no tuition waiver for these students.

Prerequisites
For those without a nutrition-related degree, the courses below must be taken at a regionally accredited college or university. Applicant must have received a grade of C or higher in the courses.
• Anatomy and Physiology (lecture and lab)
• Biochemistry
• General Chemistry/Inorganic Chemistry (lecture and lab)
• Organic Chemistry (lecture and lab)
• General Biology (lab preferred)
• General Statistics

Application Procedures
The Office of Admissions processes applications on a year-round basis. Students are admitted as a cohort annually each fall. To be considered by the admissions committee, all applicants must
• complete the online application
• send the nonrefundable application fee of $50
• provide one letter of recommendation (The letter must be from someone who knows the applicant professionally or academically, on letterhead, specific to the program, and contain a handwritten signature with contact information. The letter must be from an instructor from the applicant’s institution of higher learning or from an employer or work colleague who is not a relative or spouse.)
• submit official transcripts of all undergraduate, graduate, and professional education

Please mail all supplemental admissions material to
Nova Southeastern University
Enrollment Processing Services (EPS)
College of Osteopathic Medicine, Nutrition Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905
Upon receipt of the completed application and required materials, the Committee on Admissions will review the application and the applicant's file and make recommendations to the program director. The director will submit his or her recommendation on admission to the dean. The final decision on admission is made by the dean of the College of Osteopathic Medicine. Should you have any questions, please call (954) 262-1850.

Nondegree-Seeking Students
A nondegree-seeking student is one who wishes to take courses in the Master of Science in Nutrition program, but does not intend to pursue the master's degree at the time of application. The nondegree-seeking student must provide the following admissions requirements in order to take classes in the Master of Science in Nutrition program:

- a completed online application form
- a nonrefundable application fee of $50
- official transcripts of all undergraduate, graduate, and professional education

Nondegree-seeking students are not guaranteed future acceptance into the Master of Science in Nutrition program. If, after taking classes in the program as a nondegree-seeking student, the student wishes to become degree seeking, he or she must apply to the Master of Science in Nutrition program as a new student and meet all the requirements for admission. If accepted into the degree program, credits with the prefix NUT that were taken as a nondegree-seeking student will be automatically applied toward the degree. Nondegree seeking students can enroll only in a maximum of four courses or 12 credit hours.

International Applicants
International students who wish to be considered for admissions must submit official course-by-course evaluations of all foreign transcripts. (Agencies that can complete this evaluation can be found at nova.edu/internationalaffairs/students/prospective/credentialservices.) Applicants whose native language is not English are required to demonstrate English proficiency. The standardized tests listed below currently satisfy the university’s English requirement for nonnative English speakers.

- Test of English as a Foreign Language (TOEFL): score of 213 on the computer-based test or 79–80 on the Internet-based test
- International English Language Testing System (IELTS): score of 6.0 on the test module
- Pearson Test of English—Academic: score of 54
- GMAT: score of 450
- GRE: score of 1000 (old format) or score of 306 (new format)
- Scholastic Assessment Test (SAT): score of at least 500 in the reading section
- American College Test (ACT): score of at least 20 on the verbal section

Test results must be sent directly from the testing agency to the center you applied to. Proof of English language competency can also be in the form of successful completion of a degree at an approved U.S. institution of higher education.

Tuition and Fees
Tuition for 2016–2017 is $560 per credit hour. Tuition for 2017–2018 will subsequently be posted on our website (osteopathic.nova.edu/ms-nutrition). A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually. All tuition and fees are subject to change by the board of trustees without notice.

Transfer of Credits
Applicants or enrollees of the NSU COM Master of Science in Nutrition program may petition for a transfer of a maximum of 6 credit hours toward their degree from a regionally accredited institution for degree-seeking students. Any exceptions require the written approval of the program director. To be considered for transfer of credit, courses must have been completed less than three years prior to the beginning of the student's first semester in the program. All courses to be transferred must be substantially equivalent to courses offered in the program, as determined by the program director and appropriate faculty members. All courses considered for transfer into the program must have been successfully completed with a grade of B (80 percent) or better. Transfer course grades are not calculated toward the student's grade point average. An accepted applicant to the program who wishes to receive transfer credit must submit a written request and the appropriate verification documents (e.g., official transcripts, syllabi, and catalogs) to the program director.
Graduation Requirements
To be eligible for the Master of Science in Nutrition degree, students must fulfill the following requirements:

- satisfactorily complete, with a grade point average of B (3.0) or higher, within seven years of matriculation, the course of study required for the Master of Science in Nutrition degree (minimum of 42 credit hours of courses and any required additional courses, if applicable) or graduate certificates (minimum of 15 credit hours of courses and any required additional courses, if applicable, dependent on the specific certificate granted)

- satisfactorily meet all university financial and library obligations

Upon satisfactory completion of degree requirements, the student is expected to attend the rehearsal and commencement program, at which time the degree is conferred. Students in the program are required to visit the NSU campus twice during their course of study, once at the beginning of the program and once at the end to present their research/special project and to participate in graduation.

Curriculum Requirements
To develop a comprehensive Master of Science in Nutrition program at NSU COM, a curriculum has been developed that includes teaching, interprofessional care, research, and nutrition leadership. The didactic courses will be offered online (using NSU's state-of-the-art, web-based distance learning technology), as well as on-site. Courses will incorporate the most recent technologies, including Livescribe pens, Blackboard, and interactive videos.

** denotes a clinical observation requirement
NUT 5010—Alternative Nutrition and Complementary Therapies
This course will focus on providing graduate students with an in-depth understanding of alternative nutrition and complementary therapies not generally used in conventional Western medicine or integrated with conventional medicine. General characteristics and cultural and historical backgrounds of popular therapies will be emphasized. Students will develop the knowledge and skills needed to enable them to analyze appropriately and to incorporate what they learn into medical nutrition therapy as necessary and appropriate. (3 credit hours)

NUT 5020—The Anthropology of Food
You are what you eat. Food represents an integral part of human livelihoods, biology, identity, and culture. The Anthropology of Food is an analysis of food in culture. While the primary purpose for food is nutrition, it also has a cultural dimension by which people choose what they eat not only by flavor or nutritional value, but by cultural, religious, historic, economic or social status, and environmental factors. This course will study the complex interactions between food and culture by specifically analyzing how individuals, communities, and societies identify themselves through food and through the relationships between food and gender, health, socioeconomics, race, and ethnicity. (3 credit hours)

NUT 5030—Food Policy
This course will enable students to explore the billion-dollar food industry and the policies and politics behind it. The course will review the impact of politics on what foods are made available to us, where we shop for food, how much we pay, how safe it is, what standards of quality are met, and what messages we are taught about nutrition, health, the American way of life, and the role of nutrition in the overall health of the American throughout the life span will be discussed. (3 credit hours)

NUT 5040—Functional Foods in Society Today
This course will examine food components and substances with physiological activity of interest in society today other than macronutrients and micronutrients. Students will be able to define and describe metabolic and health promotion roles and apply accurate information. (3 credit hours)

NUT 5050—Nutrition and Exercise Performance
This course will provide the graduate student with the knowledge and skills to perform nutrition assessments and education targeted towards the athlete and the active individual. Students will develop nutritional plans taking into account the effects of acute and chronic exercise on nutrients and exercise performance. Students will develop skills to conduct clinical, biochemical, and physical measures beneficial to individualized sports nutrition assessment. (3 credit hours)

NUT 5060—Sports and Dietary Supplements
This course will provide an in-depth analysis of the various sport and dietary supplements on the market and explore the essential role of vitamins and minerals in the human diet as they relate to health, health promotion, physical activity, exercise performance, illness, and disease prevention. Governmental regulation of the dietary supplement industry will be explored. (3 credit hours)

NUT 5070—Introduction to Functional Nutrition and Herbal Therapy
This course will provide students with a historical perspective of herbal therapies. It will teach the pharmacology and phytotherapy in herbal therapy, which includes plants (herbs and whole foods), animal tissues, sea, bee, and orthomolecular supplements in clinical practice. It will describe “functional nutrition,” which relates the biochemistry and physiology to the functionality of body systems and the etiology of diseases. Students will discuss the patient-centered care model and demonstrate how to develop interprofessional relationships in the context of team-based care to address the needs of integrative medicine patients. (3 credit hours)

NUT 5100—World Culture, Food, and Nutrition
Experience foods from various cultures and explore the many issues surrounding food and culture—including faith and religion, history, economic status, the economy, and geography—and how they impact the food patterns from various countries around the world, as well as within the United States with a focus on population health. Students will examine how the major factors that affect food customs around the world can also influence what you choose to eat from day to day and, ultimately, impact health. (3 credit hours)
NUT 5130—Nutrition Counseling
This course will provide students with an understanding of the various counseling methods, including motivational interviewing, along with practical skills that can be used to help clients understand their eating patterns and themselves better, while working with them to create healthy change in their lives. The course will outline for students the nutrition counseling approaches for all age and cultural groups. Students will obtain demonstrated practical skills for nutrition counseling including how to prioritize time within a counseling session; how to create an intake, assessment, and progress form that incorporates all of the key areas; and how to calculate the appropriate fees for services rendered. (3 credit hours)

NUT 5140—Nutrition for Geriatric and Vulnerable Populations
This course relates to nutrition evaluation for vulnerable population groups with a focus on mature populations, as well as individuals with developmental disorders who have high risk factors. Students will conduct a formal nutritional evaluation, analyzing dietary, biochemical, anthropometry, and physical signs related to the client care plan, and interpret data using reference standards for the clinical assessment, as well as an interprofessional and ongoing review for individuals throughout the life span. (3 credit hours)

NUT 5200—Nutritional Biochemistry
This course will provide students with an in-depth understanding of the metabolic pathways and control processes relevant to the digestion and assimilation of foods. The major biological roles of micronutrients—vitamins and minerals—will be explored. The importance of genetics in nutrition and dietary selection will be covered in the course. The biochemical bases for dietary selection and nutritional advice will be outlined. (3 credit hours)

NUT 5300—Functional Nutrition and Herbal Therapy Principles in the Gastrointestinal, Pancreatic, Gallbladder, and Liver Systems
This course will review the physiological functions and biochemical pathways of the gastrointestinal system, liver, gallbladder, and pancreas and relate it to principles of functional nutrition, herbal therapy, diet-based therapies, and probiotics. (3 credit hours)

NUT 5310—Functional Nutrition and Herbal Therapy Principles in the Endocrine, Immune, and Nervous Systems
This course will review the physiological and biochemical functions of the endocrine, nervous, and immune systems with the purpose of understanding pathways and incorporating herbal therapy to enhance homeostatic functions. (3 credit hours)

NUT 5320—Functional Nutrition and Herbal Therapy Principles in Nervous, Cardiovascular, and Musculoskeletal Systems and Special Populations
This course will review the physiological and biochemical functions of the nervous, cardiovascular, and musculoskeletal systems and the kidneys and special populations. The course will focus on the functional nutrition and herbal therapy principles of these systems and special populations including children, older adults, and psychiatric patients. (3 credit hours)

NUT 5330—Clinical Applications in Functional Nutrition and Herbal Therapy
This course will bring all components of the previous coursework to integrate it into an interprofessional clinical practice. The course will review environmental medicine principles. It will examine various functional tests that can be performed to help detect nutritional deficiencies, toxicities, and biological systems dysfunctions. The course brings science and evidenced-based information together with case reports that can be applied within an interprofessional team and functional nutrition and herbal therapy practice. (3 credit hours)

NUT 5400—Psychology of Eating
This online course will explore the psychology of eating—what's behind what we eat, why we eat, and what motivates us to always want just one more M&M. Students will identify major triggers in the cycle of emotional eating and overeating and discover how several different biochemicals and neurotransmitters play a role in influencing food intake. They will learn to complete and analyze a self-assessment that will help clients examine how mood and various triggers impact what we choose to eat. The course will examine the epidemic of obesity and its psychological impact on our nation. (3 credit hours)

NUT 5500—Health Disparities and Health Literacy
This active online course will provide graduate students with an understanding of the sociocultural and socioeconomic factors that contribute to health disparities among racial, ethnic, gender, cultural, and disadvantaged groups, with an emphasis on diverse practices related to nutrition and health status. Students will discuss the sociocultural and socioeconomic factors that contribute to health disparities among diverse populations and identify specific dietary practices commonly associated with particular cultural groups. Best practices for interprofessional therapeutic nutrition intervention will be discussed. (3 credit hours)
NUT 5600—Models of Health Behavior
Health behavior comprises actions taken by a person to maintain, attain, or regain good health and to prevent illness. Traditional models—including the Health Belief Model, the Theory of Reasoned Action/Planned Behavior, the Social Cognitive Theory, and the Trans-Theoretical Model—will be discussed. Additionally, alternative models relevant to nutritional and consumptive behaviors will be discussed as a reflection of a person's health beliefs and motivators. Students will apply models of health behavior in real-life practice as it pertains to nutritional and health counseling. (3 credit hours)

NUT 6100—Nutrition, Physical Activity, Wellness, and Weight Management
This course will delve into an integrated and interprofessional collaborative approach to wellness, healthy weight assessment, attainment, and long-term management. Students will examine the seven dimensions of wellness and study popular weight loss methods identifying strengths, weaknesses, safety, and effectiveness long term. (3 credit hours)

NUT 6110—Pediatric Nutrition
This course will provide the graduate student with an in-depth understanding of general and high-risk pediatric nutrition. Students will apply normal and therapeutic dietary knowledge to infants and children with diseases or disorders. The course will provide students with a strong foundation to work with those who have chronic diseases or developmental disorders. Current community resources available for nutrition and assistance will be identified in the course. (3 credit hours)

NUT 6120—Nutrition and Art: A Historical Perspective
This course will review the body as reflected in art through the centuries. Body image has been a central theme in health status through the centuries and is depicted in art since the beginning of mankind. Students will be actively involved in reviewing art through the centuries as reflected by body image and discussing the role art played in health status and ideal body image. (3 credit hours)

NUT 6130—Nutrition in Disaster and Emergency Preparedness, Mitigation, and Recovery
This course examines the role of nutrition in both disaster and recovery. Students will engage in in-depth review of the special needs of vulnerable populations in disasters and strategies on mitigation to prevent or reduce impact through community nutrition planning and public health preparedness. Students will identify the role of food in disaster preparedness, mitigation, response, and recovery and be actively involved in reviewing personal and community preparedness as related to food. (3 credit hours)

NUT 6400—Nutritional Assessment and Medical Nutrition Therapy
This course will provide graduate students with clinical and community levels of nutritional assessment using five parameters in the actual assessment (with knowledge of medicial nutrition therapy in selected individuals). Students will have an in-depth exploration of the role of nutrition in health care with an emphasis on primary care, interprofessional care, and the medical home concept. (3 credit hours)

NUT 6700—Advanced Sports Nutrition
This course is an advanced study of nutrition as a tool to enhance athletic performance using food as the optimal fuel. The course will investigate the macronutrients, micronutrients, body composition, and medical nutrition therapy for active individuals, athletes, and special groups. Body composition and the appropriate use of equations to determine energy needs will be studied in depth. (3 credit hours)

NUT 6800—Special Project (Thesis and Nonthesis)
Students will participate in a research or community-action project. Students will identify their project by the second semester and a faculty member will be assigned to serve as their faculty adviser and mentor in this project, which must be approved by both the faculty member and departmental faculty members. All program faculty members will be assigned to individual students. (6 credit hours)

NUT 6900—Special Topics Course: Current Topics
A special topics course will be available as determined by the faculty to address current and emerging issues in nutrition science and practice. All faculty members will have an opportunity to teach in this course and each faculty member can bring forth a new course that will need to be approved by the program’s curriculum committee. (3 credit hours)
College of Osteopathic Medicine Departments

College of Pharmacy
College of Pharmacy

Mission
To educate and develop practitioners and researchers who, through their leadership and entrepreneurism, will transform the profession of pharmacy to improve global health

Vision
To be recognized as an innovative and entrepreneurial college of pharmacy providing opportunities that encourage innovation in education, practice, and research

Values
• entrepreneurship
• excellence
• innovation
• integrity
• professionalism
• respect for diversity
• service
• teamwork

William D. Hardigan, B.S., M.S., Ph.D.
Dean Emeritus

Pharmacy
With the nation struggling to deliver high quality, affordable health care, there has come a greater appreciation of the importance of pharmacists as members of today's health care team. The pharmacist's role has expanded rapidly from drug compounding and distribution to a patient-centered role. The College of Pharmacy is educating its students in practices vital to meeting the challenges facing the profession and leading to improved health and wellness while reducing health care costs.

The College of Pharmacy admitted its first class in 1987 to become the first College of Pharmacy in South Florida. Since then, it has graduated more than 4,500 pharmacy professionals. The college offers the Doctor of Pharmacy (Pharm.D.) degree program, a Ph.D. in Pharmaceutical Sciences, and an M.S. in Pharmaceutical Affairs.

Pharmacists are experts on drugs and therapeutic goals, their biological action and uses, formulation, adverse effects, and potential for drug interactions. Pharmacists must be able to think quickly and accurately in an organized manner, despite environmental distractions; be able to communicate effectively; and have interprofessional abilities sufficient to interact with others. They consider both the medication and the patient to ensure the patient has the right drug, in the right amount, for the right length of time, and with minimal adverse effects. The result is improved health care.
Most pharmacists practice in patient-oriented settings: in community pharmacies, hospitals, extended care facilities, or public health clinics. In addition, pharmacists are employed by the pharmaceutical industry in research and development, in manufacturing, or as medical service representatives. They work in academic institutions, government, health maintenance organizations, and home health care programs.

The college embraces these opportunities for pharmacists to assume a wider role in the health care needs of society, and qualified students have the opportunity to earn concurrent master's degrees in either business administration (M.B.A.), public health (M.P.H.), or biomedical informatics (M.S.).

Ph.D. graduates focus on expanding the science of drug knowledge by creating and testing new drug molecules or using technology to develop new dosage forms. This field responds to needs identified by practicing pharmacists in caring for patients. The pharmaceutical scientist is very knowledgeable in pharmacology, pharmacetics, pharmacokinetics, and administration.

The M.S. in Pharmaceutical Affairs program prepares graduates to work with professionals in diverse environments, such as the pharmaceutical industry, academia, governmental and nongovernmental agencies, and health care systems.

**Accreditation**

The Accreditation Council for Pharmacy Education, 135 S. LaSalle Street, Suite 4100, Chicago, IL 60603, (312) 664-3575, 800-533-3606; Fax (312) 664-4652, website: [www.acpe-accredit.org](http://www.acpe-accredit.org), has accredited the Doctor of Pharmacy Program of the College of Pharmacy, Nova Southeastern University.

**Memberships**

The College of Pharmacy is a member of the American Association of Colleges of Pharmacy. The College of Pharmacy is also a member of the International Pharmaceutical Federation (FIP).  

**Facilities**

The College of Pharmacy is located on the third floor of the Health Professions Division Administration Building. Pharmacy practice and research laboratories are located on the third floor of the Library/Laboratories Building, near the Health Professions Division’s research laboratories. Experiential sites are primarily located throughout Florida and Puerto Rico. Pharmacy practice faculty members are assigned to innovative, patient-centered facilities in South Florida and Puerto Rico.

In the fall of 2000, the NSU College of Pharmacy opened a program in northern Palm Beach County. After spending many years in a shared site, NSU was happy to move to its own four-story, 75,000-square-foot facility. Classes began at the new location in the fall of 2011. The Palm Beach Regional Campus features 26 classrooms, including four labs. It also includes a student lounge, a fitness area, a pharmacy library, and offices. In the fall of 2001, a full-time program on the campus of Pontificia Universidad Catolica de Puerto Rico in Ponce, Puerto Rico, was opened. The Puerto Rico program moved to its new location in San Juan in 2014. The San Juan location has state-of-the-art facilities for pharmacy students and is equipped with lecture halls; student study rooms; computer, pharmaceutics, and patient care management laboratories; a Drug Information Center; and additional meeting and classroom space fully equipped for compressed interactive video.

Each regional campus has administrators and faculty and staff members. Interactive video technology is used to provide lectures among the three campuses simultaneously. This provides for live interaction between lecturer and students regardless of location. Identical handouts, tests, and texts are used. Communication through telephone, fax, online technologies, and email are available to students at all campuses. All students have access to the Health Professions Division Library, computer labs, online learning resources, and the vast technological innovations provided by NSU, which has been a leader in distance education programs for many years.

The pharmaceutical care center and pharmacy are adjacent to the health clinic in Fort Lauderdale. This is a community pharmacy with disease management services for diabetes, hypertension, hyperlipidemia, osteoporosis, and anticoagulation. It also manages pharmacy services, including drug regimen review, consultation, and teaching.

**Financial Aid**

The purpose of the Student Financial Assistance Program at Nova Southeastern University is to help as many qualified students as possible to complete their pharmacy education. Various loans, scholarships, and grants are available to qualified students to help ease the high cost of a health professions education. Approximately 90 percent of College of Pharmacy students receive some form of financial assistance. These financial assistance programs are described in a variety of separate university publications. Although most first-year pharmacy students will be classified as graduate students for financial aid purposes, students who matriculate with fewer than 90 semester hours and students in the dual-admission program will be classified as undergraduates for the first year in the College of Pharmacy.

**Transfer Credits**

Requests for transfer credit must be submitted in writing to the associate dean, Professional Program. The request must include a copy of the transcript containing the course title and final grade and a course syllabus. Transfer credit will only be considered for courses taken at pharmacy schools accredited by ACPE or for those courses given prior
approval by the associate dean, Professional Program. Up to, but no more than, four elective hours may be transferred from an approved graduate institution. Transfer students entering the College of Pharmacy may be given credit for courses that are equivalent to the courses outlined in the curriculum. Upon acceptance, students must submit their syllabi for review.

A minimum of 30 credit hours of didactic coursework and all Advanced Pharmacy Practice Experiences (APPE) must be completed at NSU. Transfer credits may not exceed 2/3 of the required credits to complete the degree program. Transfer credit will only be considered for courses designated with a graduate level course number that were passed with a grade of B or better. Credit will not be transferred if previous credit was used to earn a degree from the granting institution. An official transcript from the institution attended must be provided before transfer credit will be awarded. All transfer credit requests must be received prior to August 1 of the first year of pharmacy school.

Official transcripts must be sent to Nova Southeastern University, Enrollment Processing Services, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905. Electronic transcripts may be sent to electronictranscript@nova.edu.

Class Cancellation Policy
The university reserves the right to cancel any class. Students may be eligible for a refund for summer semester only (P1–P3); cancelled elective classes during the fall and winter semesters are not eligible for refund.

Doctor of Pharmacy (Pharm.D.) Entry-Level Program

Admissions Requirements for 2017 Entering Class
The College of Pharmacy selects students based on pre-pharmacy academic performance, Pharmacy College Admission Test (PCAT) scores, personal interviews, written applications, and letters of reference.

1. Prior to matriculation, all applicants must complete a minimum of 64 semester hours of coursework at a regionally accredited college or university, including the following required courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Biology I and II (including laboratory)</td>

</tr>
</tbody>
</table>

TOTAL 64

* Ethics, micro or macroeconomics, and general/life science statistics are highly recommended and may substitute for up to 9 humanities and social and behavioral sciences elective credits.

2. Applicants must have a cumulative GPA of 2.75 or higher and a minimum science and math GPA of 2.0 on a 4.0 scale.

3. Applicants are required to submit official scores from the Pharmacy College Admission Test (PCAT).

   - PCAT scores must be no more than three years old at the time of the applicant’s interview. Applicants should take the PCAT no later than February prior to the expected date of matriculation.

Candidates may register online at pcatweb.info or call 800-622-3231 with any questions.

4. Applicants are required to provide three letters of reference from the members of the pre-professional committee, or if such a committee does not exist, letters of reference from two science professors and one liberal arts professor are necessary. A letter of reference from a pharmacist may substitute for one letter from a professor in either subject.

Application Procedures
Primary Application Process
Applicants apply for matriculation into the fall semester. The Office of Admissions processes applications on a rolling basis; therefore, it is in the best interest of the applicant to apply early. Listed below are the steps necessary to complete the primary application process.

1. Applicants must submit an electronic PharmCAS application. The interactive, web-based application can be accessed through PharmCAS.org. The PharmCAS application process takes four to six weeks.

   * September 6: PharmCAS submission application deadline for early decision
2. Applicants must submit the following materials to PharmCAS:

- official transcripts from all college and universities attended (must be submitted directly to PharmCAS by the college or university)
- three letters of reference
- PCAT scores

**Early Decision**

The Early Decision program is a binding option for applicants who have decided that a particular pharmacy degree program is their first choice, and they will enroll if accepted. As an Early Decision applicant, you can apply to only one pharmacy degree program. If you are offered admission as an Early Decision applicant, you are obligated to accept the offer. You will not be permitted to apply to other PharmCAS degree programs during the current cycle. However, if you are denied admission as an Early Decision applicant, you may apply to other PharmCAS degree programs for an additional fee. Visit the PharmCAS website at PharmCAS.org for more information about applying as an Early Decision applicant.

**Secondary Application Process**

In addition to completing the PharmCAS application, NSU requires the completion of a supplemental application. Upon receipt of the PharmCAS application, NSU will email a link to access our supplemental application.

1. Applicants must submit the following materials electronically to NSU:
   - a completed supplemental application
     - **October 10:** submission application deadline for early decision
     - **March 15:** submission application deadline for regular admission
   - a nonrefundable application fee of $50 (U.S.)

**Transfer Students**

Circumstances may warrant that a student enrolled in one college of pharmacy seeks to transfer to another institution. All applications submitted will be reviewed by the associate dean, Professional Program. The final decision will be based on factors that include, but are not limited to, academic record, circumstances leading to the transfer request, available space, and admissions standards. Students in good academic standing may apply as transfer applicants by completing the following requirements:

1. Submit the following materials electronically to NSU.
   - an NSU application (due March 15)
   - a nonrefundable application fee of $50 (U.S.)
   - Meet all entry-level or advanced-standing admissions requirements for the NSU College of Pharmacy, as applicable.
   - Submit the following documentation.
     - official transcripts for all college coursework
     - a written statement outlining the reasons for requesting the transfer
     - three letters of recommendation (two from pharmacy faculty members and one from the dean, associate dean, or assistant dean of the transferring college of pharmacy that indicate the student is in good standing within the current or most recent academic program)

4. Complete an interview.

5. Submit any official standardized test scores such as PCAT, GRE, TOEFL, or IELTS to help further the evaluation of applications (recommended).

Transfer students entering the NSU College of Pharmacy may be given credit for courses that are equivalent to the courses outlined in the curriculum of the College of Pharmacy. Upon acceptance, students should submit their syllabi for review. The dean's office will evaluate the courses for transfer credit eligibility. Courses must meet graduate-level criteria. Transfer credits will not exceed 2/3 of the required credits to complete the degree program. A minimum of 30 credit hours of didactic coursework and all Advanced Pharmacy Practice Experiences (APPE) must be completed at NSU.

**Interview Process**

A personal interview is part of the admissions process; however, being interviewed is not a guarantee of admission. Upon receipt of the completed application, a review will be made to determine if the applicant will be granted an interview. Not all applicants will be granted an interview. The Office of Admissions will notify selected applicants to schedule interviews.

**Notice of Acceptance**

Notice of acceptance or other action by the committee on admissions will be on a “rolling” or periodic schedule. Early completion of the application process is in the best interest of the applicant.

Admittance to the college is contingent upon successful completion of all prerequisite coursework prior to the first day of the semester. Proof of completion is required.

**Transcripts**

After acceptance, final and official transcripts from all colleges and universities attended, and/or final and official documents must be received within 90 calendar days from the start of the term. If these final and official transcripts and/or documents are not received by that time, the student will not be allowed to continue class attendance.
In addition, financial aid will not be disbursed to a student until he or she provides all the necessary documents required to be fully admitted as a regular student.

Foreign Coursework
Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.  
  Bowling Green Station  
  P.O. Box 5087  
  New York, New York 10274-5087  
  (212) 966-6311 • wes.org

- Josef Silny & Associates, Inc.  
  7101 SW 102nd Avenue  
  Miami, Florida 33173  
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com

- Educational Credential Evaluators, Inc.  
  P.O. Box 514070  
  Milwaukee, Wisconsin 53203-3470  
  (414) 289-3400 • ece.org

It is the applicant's responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University. All admissions materials and foreign evaluations must be mailed to

Nova Southeastern University  
Enrollment Processing Services  
College of Pharmacy  
Office of Admissions  
3301 College Avenue  
P.O. Box 299000  
Fort Lauderdale, Florida 33329-9905.

Program Requirements
All students must have ongoing access to a computer and an active account with an Internet service provider. Entering students must purchase an iPad for assignments and assessments. Nova Southeastern University will provide access to email, online databases, and library resources.

Students must also provide their own transportation to experiential sites. It is recommended that all students have their own personal transportation, due to the inconsistency of reliable public transportation. During the final month of the fourth professional year, all students return to their respective campuses for a week of live instruction and board exam preparation.

Computer Requirements
In addition to an iPad, students must have ongoing access to a computer capable of connecting to the Internet and playing streaming video files. Online course notes and discussions will be provided to the student through an online course management system.

Tuition: Entry-Level Program
All tuition and fees are subject to change by the board of trustees without notice.

Annual in-state tuition for 2016–2017 is U.S. $30,549 for Florida and Puerto Rico residents and U.S. $34,399 for out-of-state residents. Annual tuition for 2017–2018 will be posted on our website when available. Only Florida residents in the entry-level program may qualify for in-state tuition. Information on applying for Florida residency status is available at nova.edu/cwis/hpdasa/florida-in-state-tuition. Residency status will be determined at matriculation and will remain the same throughout enrollment at NSU. No tuition amounts will be adjusted as a result of a change in residency.

Fees and Deposit—All Programs
- Acceptance and Preregistration Deposit—$1,000. This deposit is required to reserve the accepted applicant's place in the entering, first-year class. This deposit will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is due within three weeks of an applicant's acceptance.
- Health Professions Division General Access Fee—$145. This fee is required annually.
- NSU Student Services Fee—$1,050. This fee is required annually.
- College of Pharmacy Fees—Additional fees will be incurred for immunization training, pharmacy testing, and other college-approved activities. These fees will likely not exceed $500 over the course of the program.

The first semester's tuition and fees, less the $1,000 deposit, are due on or before the first day of classes. Tuition and fees for each subsequent semester are due on or before the first day of classes. Students will not be permitted to register or attend classes until their financial obligations have been met. The financial ability of applicants to complete their training at the college is important. Applicants should have specific plans for financing their professional education. This should include tuition, fees, living expenses, iPad and computer-related expenses, health insurance, books, equipment, travel to and from experiential sites, and other miscellaneous expenses.

Each student is required to carry adequate personal medical and hospital insurance. For more information about NSU's required health insurance, visit the website at nova.edu/bursar/health-insurance.
Undergraduate/Pharm.D. Dual Admission Program

Nova Southeastern University Health Professions Division has established a dual admission program with the Nova Southeastern University Halmos College of Natural Sciences and Oceanography and Pontificia Universidad Catolica de Puerto Rico for a select number of highly motivated, qualified students interested in pursuing both an undergraduate education and professional studies in pharmacy. This allows students to receive their undergraduate bachelor of science degree and a doctor of pharmacy degree in a six- to eight-year period.

Candidates must maintain a specified GPA and achieve acceptable scores on the Pharmacy College Admissions Test (PCAT). Students will spend two to three years in the undergraduate school and then will be awarded a B.S. degree upon successful completion of the second/third year at Nova Southeastern University College of Pharmacy. Students will receive the Doctor of Pharmacy degree after successfully completing the four-year Pharm.D. program at Nova Southeastern University College of Pharmacy.

For information and requirements, contact one of the following:

- Office of Admissions
  Halmos College of Natural Sciences and Oceanography
  Nova Southeastern University
  3301 College Avenue
  Fort Lauderdale, Florida 33314-7796

- Office of Admissions
  Pontificia Universidad Catolica de Puerto Rico
  2250 Avenida Las Americas
  Suite 584
  Ponce, Puerto Rico 00717-0777

Pharmacy Intern

Internship hours must be completed within the guidelines of the Florida Board of Pharmacy as set forth in the Rule, Chapter 64B16-26 and also by the Board of Pharmacy in the state in which the student plans to be licensed. A Social Security number is necessary in order to obtain an intern license from the state of Florida. All efforts should be made by the student to obtain a Social Security number prior to matriculation. It is the responsibility of any student who does not have U.S. citizenship or permanent resident status to ensure that his or her visa status allows for the issue of a Social Security number. An intern license is a requirement for placement on practice experiences. Without practice experiences, a student cannot complete the curriculum or the requirements of the Pharm.D. degree program. Any student who has concerns regarding visa or Social Security status should contact the Office of International Students and Scholars by phone at (954) 262-7240 or 800-541-6682, extension 27240, or by email at int@nova.edu. The directors of experiential education will provide assistance and guidance to students regarding pharmacy practice experiences and earning required hours.

Course of Study

The Doctor of Pharmacy degree is awarded after successful completion of four years of professional study in the College of Pharmacy. The curriculum stresses innovative teaching delivery and assessment methods. Students are provided an initial orientation during which they are exposed to library and online resources, professionalism, and academic expectations.

The curriculum is designed so courses integrate information and build on one another in order to provide students with the knowledge and skills necessary to be successful in the profession. The didactic component of the curriculum builds a foundation in the medical and pharmaceutical sciences. Traditional courses in physiology and pathophysiology, biochemistry, microbiology, research design, and statistics are provided in order to develop a solid foundation. Pharmaceutical sciences courses including Pharmacokinetics, Pharmacodynamics, and Nonprescription Therapies are designed to provide students with a strong understanding of the principles of drug therapy. The innovative curriculum also includes the integration of medicinal chemistry and pharmacology into one course titled Pharmacodynamics, which runs five semesters. Insight into the business, human relations, communication, marketing, and legal aspects of pharmacy and the health care system are also provided. Students are actively involved in the two-semester Introduction to Professionalism and Leadership course that covers topics such as ethics and professionalism and promotes student advocacy in the profession and the community.

Additionally, the curriculum includes courses that focus on application of material learned in previous semesters. Pharmacotherapy addresses the use of drugs in the disease process and physical assessment provides students with hands-on opportunities to develop skills essential to monitoring and managing medication therapy. Students hone their analytical skills with courses in pharmacoeconomics and outcomes research and biomedical literature evaluation. All students must complete a minimum of 6 semester hours of elective credit.

Opportunities for the students to experience pharmacy practice firsthand are provided early in the curriculum. In the first year, students participate in the Introduction to Professionalism and Leadership course, which is designed to begin the development of abilities including social and cultural awareness; active citizenship and leadership; personal, ethical, and legal judgment; and communication. In the second year of the curriculum, students spend four hours per week in a community pharmacy setting. Practice experiences in the third year involve eight hours per week in hospital pharmacy services. Patient Care Management Lab is initiated during the second year and continues through the third. This provides an opportunity for students to integrate information learned in all courses of the curriculum in order to facilitate application of the material in real-life practice settings.
During the fourth year, through experiential coursework, students will complete nine 160-hour Advanced Pharmacy Practice Experience (APPE) courses, six in direct patient care areas and three selective experiences in specialty health care areas. APPEs continue the student’s education by providing opportunities for the clinical application of patient care in a broad variety of health care environments and systems. At this point in the curriculum, it is expected that student pharmacists practice drug therapy monitoring with more independence. Each term of the fourth year curriculum includes a Curricular Review course that provides resources for student-initiated review and update of calculations and case-based drug therapy evaluations. During the final month of the fourth professional year, all students return to their respective campuses for a week of live instruction and board exam preparation.

Note: The advanced pharmacy practice experiences are full-time commitments for the students (a minimum of 40 hours per week). Students are responsible for having reliable transportation (e.g., personal vehicle) to attend assigned IPPE and APPE sites. Students may be required to secure accommodation at APPE sites away from their home location. Experiences may be taken in any sequence, however students may not begin advanced pharmacy practice experiences until all didactic work, including electives, has been satisfactorily completed. The curriculum is designed so that knowledge gained in one semester becomes the foundation for material covered in subsequent semesters. Therefore, if students do not successfully complete the coursework specified for one semester, it may impede their ability to take courses in the future semesters. (Students have 60 days after the end of the semester to resolve any grade disputes; after that, the instructor may discard all materials from the semester.) This may lead to a delay in graduation. The program must be completed within six academic years from the date of matriculation.

**Travel Study**

Opportunities for travel study programs may be provided during the summer. Students must be preapproved to participate in travel study programs.

**Graduation Requirements**

To receive a degree, a student must fulfill the following requirements:

- be of good moral character
- pass all required courses
- complete a minimum of 145 semester hours of coursework in the College of Pharmacy within six academic years
- satisfactorily complete the assigned curriculum requirements for the degree, including all assignments, with a GPA of 2.0 on a four-point scale or a numerical average of 70 percent or above
- satisfactorily pass the Pharmacy Curriculum Outcomes Assessment (PCOA)
- satisfactorily meet all financial obligations
- complete a minimum of 30 credit hours of didactic coursework in addition to all advanced pharmacy practice experiences if transferring from another college of pharmacy
- submit to the registrar’s office an application for degree/diploma by the posted deadline. Applications received after the deadline will not be considered for that year’s commencement ceremony
- must attend the commencement ceremony in person
- receive approval by a College of Pharmacy faculty vote

---

**Entry-Level Curriculum Outline**

The curriculum is frequently being revised and modified to meet the demands of the profession. These courses are representative of the overall requirements of the program at the time of publication.

IPPE = Introductory Pharmacy Practice Experience  
APPE = Advanced Pharmacy Practice Experience
Doctor of Pharmacy (Pharm.D.) Advanced Standing (International Pharmacy Graduates)

In an effort to meet the growing demands of the pharmacy profession, the Nova Southeastern University College of Pharmacy provides an opportunity for international pharmacy graduates to enter the Pharm.D. degree program with advanced standing. Upon completion of the degree program, students are eligible to take the North American Pharmacy Licensing Examination (NAPLEX) and the Multistate Pharmacy Jurisprudence Examination (MPJE). This opportunity is designed exclusively for graduates of pharmacy degree programs outside of the United States jurisdiction, allowing them to build upon their pharmacy education and prepare them for clinical pharmacy practice.

The Advanced Standing Doctor of Pharmacy degree educates students to achieve the same outcomes as the Entry-level Pharm.D. degree program. Courses integrate information and build on one another to provide students with the knowledge and skills necessary to be successful in the profession. Clinical Pharmacology, Pharmacotherapeutics, and Nonprescription Therapies courses provide a strong understanding of the principles of drug therapy. The business, human relation, communication, and legal aspects of pharmacy and the health care system are also studied. Courses focus on application of material learned, the use of drugs in the disease process, and developing skills essential to monitoring drug therapy. Students hone their analytical skills with courses in pharmacoconomics and outcomes research and biomedical literature evaluation. All students must complete a minimum of 4 semester hours of elective credit.

Pharmacy practice experiences in community, hospital, and other traditional pharmacy settings facilitate real-life application of the material and provide opportunities to integrate information learned. Full-time practice experiences facilitate application of drug therapy monitoring with more independence. International pharmacists may be awarded advanced standing based on their previous coursework. Advanced standing and the actual degree curriculum will vary based on the matriculant’s previous pharmacy coursework. The curriculum provided is representative of a typical international pharmacist entering the advanced-standing program.

The curriculum stresses innovative delivery and assessment methods. Courses will be on campus and approved experiential sites. All lectures, handouts, reading materials, and assessments will be in English.

Admissions Requirements

The College of Pharmacy selects international pharmacy graduates for the program based on previous academic performance, TOEFL/IELTS scores (if applicable), written applications, pharmacy experience, and letters of reference.

1. Prior to matriculation, applicants must have an earned Bachelor of Pharmacy degree or a Bachelor of Science degree in Pharmacy from an accredited institution. The college will evaluate all official transcripts to determine if the student has successfully completed the courses listed below with a grade of C or higher.

<table>

</tr>
</tbody>
</table>

The college may require an applicant to complete additional prerequisite courses in order to strengthen his or her academic background.

2. It is required that applicants have a minimum 2.75 GPA on a 4.0 scale on all college-level coursework completed.

3. An official course-by-course evaluation of foreign coursework with the cumulative grade point average included (see under application procedures for further details) must be provided.

4. Proof of English proficiency is required of all applicants. The following standardized tests currently satisfy NSU College of Pharmacy English requirements for nonnative English speakers:
   - Test of English as a Foreign Language (TOEFL)*: score of 213 or above on a computer-based test or 80 or above on the Internet-based test (toefl.org)
   - International English Language Testing System (IELTS)*: score of 6.0 or higher on the test module (ielts.org)

* TOEFL and IELTS scores may be no more than two years old at the time of the interview.

Candidates who have taken college courses in the United States may also prove English proficiency by completing two college-level English composition courses at a regionally accredited college or university in the United States with a grade of a 2.0 or higher on a 4.0 scale.

5. Three letters of reference are required from the dean/director of a pharmacy program, registered pharmacists, or professors.
It is strongly recommended that applicants also submit official scores from the Graduate Record Examination (GRE) and/or the Pharmacy College Admission Test (PCAT).

Application Procedures
1. A completed international application along with a $50 (U.S.), nonrefundable application fee must be submitted electronically to NSU by February 1 of the year of anticipated entry. The application is available on our website (pharmacy.nova.edu).

2. Coursework taken at foreign institutions must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.
   - World Education Services, Inc.
     Bowling Green Station
     P.O. Box 5087
     New York, New York 10274-5087
     (212) 966-6311 • wes.org
   - Josef Silny & Associates, Inc.
     7101 SW 102nd Avenue
     Miami, Florida 33173
     (305) 273-1616 • (305) 273-1338 fax • jsilny.com
   - Educational Credential Evaluators, Inc.
     P.O. Box 514070
     Milwaukee, Wisconsin 53203-3470
     (414) 289-3400 • ece.org

3. In order to be considered for admissions, applicants must submit all required documents, including all official test scores from the testing center, directly to NSU’s Enrollment Processing Service at the address below.

   Nova Southeastern University
   Enrollment Processing Service
   3301 College Avenue, P.O. Box 299000
   Fort Lauderdale, Florida 33329-9905

4. Upon receipt of the completed application and submitted required documents, the Committee on Admissions will select applicants for a personal interview, notifying those applicants of the day and time of the interview. Being granted an interview is not a guarantee of admission.

Program Requirements
All students must have ongoing access to a computer and an active account with an Internet service provider. Entering students must purchase an iPad for assignments and assessments. Nova Southeastern University will provide access to email, online databases, and library resources.

It is recommended that all students have their own personal transportation, due to the inconsistency of reliable public transportation. During the final month of the third professional year, all students return to their respective campuses for a week of live instruction and board exam preparation.

Computer Requirements
In addition to an iPad, students must have ongoing access to a computer capable of connecting to the Internet and playing streaming video files. Online course notes and discussions will be provided to the student through an online course management system.

Tuition: Advanced Standing Program
All tuition and fees are subject to change by the board of trustees without notice.

Annual tuition for 2016–2017 is U.S. $42,019. Tuition for 2017–2018 will be posted on our website when available.

Fees and Deposit—All Programs
- Acceptance and Preregistration Deposit—$1,000. This deposit is required to reserve the accepted applicant’s place in the entering, first-year class. This deposit will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is due within three weeks of an applicant’s acceptance.
- Health Professions Division General Access Fee—$145. This fee is required annually.
- NSU Student Services Fee—$1,050. This fee is required annually.
- College of Pharmacy Fees—Additional fees will be incurred for immunization training, pharmacy testing, and other college-approved activities. These fees will likely not exceed $500 over the course of the program.

The first semester’s tuition and fees, less the $1,000 deposit, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be permitted to register until their previous financial obligations have been met. The financial ability of applicants to complete their training at the college is important. Applicants should have specific plans for financing their professional education, and should include tuition, fees, living expenses, iPad and computer-related expenses, health insurance, books, equipment, travel to and from experiential sites, and other miscellaneous expenses.

Each student is required to carry adequate personal medical and hospital insurance. For more information about NSU’s required health insurance, visit the website at nova.edu/bursar/health-insurance.
Graduation Requirements
Graduation requirements for students in the Advanced Standing Doctor of Pharmacy degree program are the same as the Entry-level Pharm.D. program, except advanced standing students must complete a minimum of 108 credit hours of coursework at the College of Pharmacy within five academic years.

International/Immigration Information
It is the responsibility of the applicant to contact the Office of International Students and Scholars for information on immigration regulations and student visa requirements. Inquiries can be directed to
Nova Southeastern University
Attention: Office of International Students and Scholars
3301 College Avenue
Fort Lauderdale, Florida 33314-7796
(954) 262-7240
800-541-6682, ext. 27240
Fax: (954) 262-3846

nova.edu/internationalaffairs/students

Pharmacy Intern
Internship hours must be completed within the guidelines of the Florida Board of Pharmacy as set forth in the Rule, Chapter 64B16-26.2032 and also by the Board of Pharmacy in the state in which the student plans to be licensed. A Social Security number is necessary in order to obtain an intern license from the state of Florida. All efforts should be made by students to obtain a Social Security number prior to matriculation. It is the responsibility of any student who does not have U.S. citizenship or permanent resident status to ensure that his or her visa status allows for the issue of a Social Security number. An intern license is a requirement for placement on practice experiences. Without these experiences, a student can not complete the curriculum or the requirements of the Pharm.D. degree program. Any student who has concerns regarding visa or Social Security status should contact the Office of International Students and Scholars by phone at (954) 262-7240 or 800-542-6682, ext. 27240, or by email at intl@nova.edu. The directors of experiential education will provide assistance and guidance to students regarding pharmacy practice experiences and earning required intern hours.

Advanced Standing Curriculum Outline
The curriculum is frequently being revised and modified to meet the demands of the profession. These courses are representative of the overall requirements of the program at the time of publication.

Entry-Level and Advanced Standing Course Descriptions

Note: Listed at the end of each entry are lecture clock hours, laboratory clock hours, and credit hours.

**Basic Medical Sciences**

**PHRC 4410—Physiology and Pathophysiology I**
This two-semester course reviews the physical and chemical processes occurring in the human body that are responsible for the maintenance of health and the pathophysiology of disease. Topics covered during the first semester include membrane and cellular physiology, genetic diseases, and the physiology and pathophysiology of the integumentary, musculoskeletal, nervous, lymphatic, and cardiovascular systems. The second semester (PHRC 4420) addresses the physiology and pathophysiology of the digestive, urinary, respiratory, endocrine, and reproductive systems. (64-0-4)

**PHRC 4420—Physiology and Pathophysiology II**
This two-semester course reviews the physical and chemical processes occurring in the human body that are responsible for the maintenance of health and the pathophysiology of disease. The second semester reviews the physiology and pathophysiology of the digestive, urinary, respiratory, endocrine, and reproductive systems. (64-0-4)

**PHRC 4700—Biochemistry**
This course covers the structure, function, and metabolism of lipids, proteins, carbohydrates, and nucleic acids. Their interactions to compose body systems and their relevance in pharmaceutical applications will be emphasized. (64-0-4)

**PHRC 5700—Medical Microbiology**
Covers the underlying nature of infectious microorganisms. Emphasizes cause, prevention, and control of infectious diseases; immunology; mycology; parasitology; bacteriology; virology. (48-0-3)

**Pharmacy—Required Courses**

**PHRC 4000—Medical Terminology**
This online course will provide an overview of medical terminology. Upon completion, students will demonstrate proficiency in the medical terminology required to be successful in pharmacy education. (8-0-0)

**PHRC 4110—Pharmaceutics I**
Pharmaceutics I emphasizes the theories and applications of underlying physicochemical principles in preparation of pharmaceutical dosage form. It also emphasizes biopharmaceutics principles, as well as drug development and approval processes. (48-0-3)

**PHRC 4120—Pharmaceutics II**
This course deals with the study of traditional and basic pharmaceutical dosage forms, their fundamental characteristics, and their routes of administration. The dosage forms that are examined in the course include oral liquids, parenterals, solids, molded solids, semi-solids, nasal, pulmonary, buccal, sublingual, otic, ophthalmic, transdermal, and controlled release dosage forms and systems. **Prerequisites:** PHRC 4110 and 4200 **Corequisite:** PHRC 4130 (32-0-2)
PHRL 4130—Pharmaceutics
Compounding Laboratory
This course is a compounding laboratory for the basic pharmaceutical formulations that can be prepared and dispensed in a pharmacy setting. Preparation and dispensing of pharmaceutical solutions, emulsions, suspensions, semisolids, and solid dosage forms are studied in the laboratory. Basic parenteral procedures and calculations are included. Prerequisites: PHRC 4110 and 4200 Corequisite: PHRC 4120 (16-48-1)

PHRC 4200—Pharmacy Calculations
Pharmacy Calculations includes the study of different methods used by the pharmacist in the process of solving the mathematical problems typically found in the practice of the profession of pharmacy. This course also emphasizes metric and common systems conversions, fundamentals of measurements, percentages, dose calculation, specific gravity, dilution, concentration, and dosage adjustment. (16-0-1)

PHRC 4210—Pharmacodynamics I
This is the first course in the pharmacodynamics sequence. This course applies the principles of organic chemistry in order to understand drug actions at the molecular level. It introduces students to the basic pharmacokinetic principles (absorption, distribution, metabolism, and elimination) as it pertains to pharmacology. The remainder of the course covers physiological receptors and key pharmacogenomic concepts. (48-0-3)

PHRC 4220—Pharmacodynamics II
This is the second course in the pharmacodynamics sequence. This course applies the principles of biochemistry, physiology, and pathophysiology to help students understand drug actions at the receptor, cellular, and system levels under normal physiological and pathological conditions. It focuses on the drugs that act on the autonomic nervous system, cardiovascular system, and blood components. Prerequisites: PHRC 4210 and 4410 (48-0-3)

PHRC 4250—Pharmacokinetics
The principles involved in drug absorption, distribution, metabolism, and elimination in the body are discussed. Mechanisms and rates of these processes are covered. Examines how the fate of drugs in the body is influenced by physiologic and biochemical processes. Examines the mathematical techniques involved in the graph analysis of drug-blood-level kinetic curves to determine pharmacokinetic parameters. This course describes the application of basic pharmacokinetic principles in therapeutic drug monitoring and in toxicology. (64-0-4)

PHRC 4300—Pharmacy and the U.S. Health Care System
This course covers concepts related to the structure and function of the United States health care system. Emphasis is placed on the analysis of issues associated with personnel; the finance, organization, and regulation of the health care system; and the provision of pharmacy services in the context of the health care enterprise. (32-0-2)

PHRC 4550—Introduction to Drug Information Resources and Health Informatics
Drug information resources provides a detailed review of the fundamental tools necessary to identify the quality of health care information available in primary, secondary, and tertiary resources. Students learn the strengths and weaknesses of the various references and how to apply their use in practice. Active learning experiences include retrieving scientific literature, utilizing electronic resources, performing literature searches, and formulating responses to drug information requests. Students also learn fundamental aspects of health informatics including basic terminology and tools (e.g., electronic health records, e-prescribing, and clinical decision support systems), the role of data analytics and visualization, and both the benefits and limitations associated with the use of health information technology. (32-0-2)

PHRC 4580—Introduction to Professionalism and Leadership I
Students will achieve a basic understanding of leadership, service, and professional activities as they relate to the practice of pharmacy. This course will provide an introduction to, and overview of, organized pharmacy on a local, state, and national level, with a focus on professionalism. Students will be exposed to opportunities for community engagement hours within the profession and the university and will be expected to become involved in areas that support their future professional goals. Students will learn from a combination of lectures, service activities, and reflective exercises. Students are expected to participate as team members, to improve listening and observation skills, and to improve professional demeanor. (16-0-1)

PHRC 4680—Introduction to Professionalism and Leadership II
Students will achieve a basic understanding of leadership, service, and professional activities as they relate to the practice of pharmacy. This course will provide an introduction to, and overview of, organized pharmacy on a local, state, and national level, with a focus on leadership. Students will be exposed to opportunities for community engagement hours within the profession and the university and will be expected to become involved in areas that support their future professional goals. Students will learn
from a combination of lectures, service activities, and reflective exercises. Students are expected to participate as team members, to improve listening and observation skills, and to improve professional demeanor. (16-0-1)

PHRC 5000—Physical Assessment
This course is intended to teach patient assessment in ambulatory and inpatient settings. Clinical interview and physical examination techniques will be explained and demonstrated, with a video lecture series assessed via an electronic course management system. During the active learning portion of the course, students will demonstrate these techniques. Charting, interpretation of findings, and evaluation of common clinical entities, especially as related to medications, will be integrated into these activities. This course is taught as an institute. (15-48-2)

PHRC 5150—Nonprescription Therapies
This course discusses the use of nonprescription therapies including drug and nondrug treatments. Patient education information, potential drug interactions, and recommended treatments will also be discussed. (48-0-3)

PHRC 5230—Pharmacodynamics III
The third course in the pharmacodynamics sequence of classes, this course applies the principles of biochemistry, physiology, and pathophysiology to help students understand drug actions at the receptor, cellular, and system levels under normal physiological and pathological conditions. It covers agents used to treat metabolic disorders, such as diabetes, and drugs influencing the endocrine system. This course also introduces CNS pharmacology as it pertains to the pharmacological treatment of psychological disorders. Prerequisites: PHRC 4210, 4410, and 4420 (64-0-4)

PHRC 5240—Pharmacodynamics IV
The fourth course in the pharmacodynamics sequence of classes, this course applies the principles of biochemistry, physiology, and pathophysiology to help students understand drug actions at the receptor, cellular, and system levels under normal physiological and pathological conditions. This course initially focuses on drugs acting either peripherally or centrally to treat pain and inflammation. The remainder of the course covers anti-infective agents including the antibacterials, antifungals, and antiviral drugs. Prerequisites: PHRC 4210, 4410, and 4420 (64-0-4)

PHRC 5300—Social and Behavioral Pharmacy
Sociological, psychological, and behavioral aspects of pharmacy practice are discussed to help students understand patients' perspectives of health and illness, as well as their implications for pharmacists' roles. Variability in patients' individual needs, relationships with health care providers, and medication use behavior are explored. Prerequisite: PHRC 4300 (32-0-2)

PHRC 5330—Communication in Patient Care
This course focuses on communication models, effective patient interaction, and the role of communication in modern pharmacy practice. Specific communication strategies to help foster therapeutic relationships with patients in various settings are presented. Issues related to conflict resolution, active listening, distortion and bias, and cultural competency are explored. Prerequisites: PHRC 4300 and 5300 (32-0-2)

PHRC 5350—Research Design and Statistics
Different aspects of research methodology and design are covered in this course. Students are expected to survey statistical applications to understand and evaluate clinical, biomedical, and health care services research. (48-0-3)

PHRC 5380—Pharmacy Law
This course provides a framework for students to gain knowledge of the interplay between pharmacy and the law. It provides practical guidance to act lawfully, professionally, and ethically. The material covers federal and state statutes, rules and regulations, and case law with emphasis on understanding the laws affecting the practice of community and institutional pharmacy. Corequisite: PHRC 4300 (32-0-2)

PHRC 5410—Pharmacotherapy I
The overarching goal of the pharmacotherapy curricular component is to integrate concepts from previous courses in the Doctor of Pharmacy curriculum—including pathophysiology, pharmacokinetics, calculations, biopharmaceutics, and pharmacodynamics—into the selection of pharmacotherapy for specific disease states in specific patients and populations. The pharmacotherapy curricular components are divided into four courses. Pharmacotherapy I is the prerequisite for the remainder of the sequence, as it provides the foundation in clinical pharmacokinetic theory and application; introductory concepts required to develop, evaluate, monitor, and document a pharmacotherapeutic plan; and common health promotion areas pertinent to pharmacists. Prerequisites: PHRC 4200, 4210, 4220, 4250, 4410, and 4420 (48-0-3)

PHRC 5420—Pharmacotherapy II
Pharmacotherapy II is the second of four courses in the pharmacotherapy curricular component. Material presented in this course continues to integrate concepts from previous courses in the curriculum (pathophysiology, pharmacokinetics, calculations, biopharmaceutics, and pharmacodynamics) and builds upon the preceding pharmacotherapy course. The course is divided into disease-state modules and focuses on the development, monitoring, and evaluation of pharmacotherapeutic plans through application of clinical pharmacokinetic principles, assessment of physical findings, laboratory values, adverse
into the laboratory sessions. The weekly classroom assessment techniques and interpretation are interwoven skills in an interactive learning environment. Physical allow pharmacy students to integrate their knowledge and behavioral issues. Patient care plans are systematically encompass therapeutic, communication, legal, and social- patient cases that allow students to draw upon knowledge and outpatient settings. Team building activities to hone communication skills in both simulated inpatient medication safety, and critical care (including adult cardiac life support). Students will have the opportunity to acquire a body of knowledge about the drugs that will provide the foundation by which pharmacists practice pharmaceutical care. (8-60-1.5)

PHRC 5580—IPPE: Community I
Students are exposed to the role and responsibilities of the professionally oriented community pharmacist and the importance of effective communication among pharmacist, patients, and other health care providers. On-site experience provides basic knowledge of the drug distribution process in a community pharmacy. Legal, ethical, and practice issues in pharmacy are discussed during classroom activities. (8-60-1.5)

PHRC 5680—IPPE: Community II
This course is a continuation of PHRC 5580. Students are exposed to the role and responsibilities of the professionally oriented community pharmacist and the importance of effective communication among pharmacist, patients, and other health care providers. On-site experience provides basic knowledge of the drug distribution process in a community pharmacy. Legal, ethical, and practice issues in pharmacy are discussed during classroom activities. (8-60-1.5)

PHRL 5710—Patient Care Management Laboratory I
This is the first of three in the patient care management (PCM) sequence of laboratories. PCM I covers the following specific pharmacotherapeutic topics (parallel to those in PHRC 5420): anticoagulation, cardiovascular disease, renal disease (including anemia), pediatrics, medication safety, and critical care (including adult cardiac life support). Students will have the opportunity to hone communication skills in both simulated inpatient and outpatient settings. Team building activities are incorporated throughout the course to enhance professionalism and communication skills among health care professionals. The laboratory uses realistic, integrated patient cases that allow students to draw upon knowledge acquired from all other courses in the curriculum. Cases encompass therapeutic, communication, legal, and social-behavioral issues. Patient care plans are systematically documented and communicated based on patient cases. This course emphasizes decision-making processes that allow pharmacy students to integrate their knowledge and skills in an interactive learning environment. Physical assessment techniques and interpretation are interwoven into the laboratory sessions. The weekly classroom component of the course theory provides students with interprofessional interactions, patient encounters, and additional active learning exercises to complement laboratory activities. Students are assessed for their knowledge of commonly used medications throughout the course. (0-28-1)

PHRC 6250—Pharmacodynamics V
The fifth course in the pharmacodynamics sequence of classes, this course applies the principles of biochemistry, physiology, and pathophysiology to understand drug actions at the receptor, cellular, and system levels under normal physiological and pathological conditions. It covers antineoplastic agents and immunomodulators. The remainder of the course introduces students to the principles of toxicology and poison management. Prerequisites: PHRC 4210, 4410, and 4420 (48-0-3)

PHRC 6260—Clinical Pharmacology
This course provides the student with the background necessary for the clinical sciences and helps students acquire a body of knowledge about the drugs that will provide the foundation by which pharmacists practice pharmaceutical care. (64-0-4)

PHRC 6350—Pharmacy Management
An overview of management theories, human resources, and financial management applied to pharmacy operations is provided in this course. Elements of supervision, management, and leadership are discussed in an effort to help students develop the skills needed to operate a pharmacy effectively. Prerequisite: PHRC 4300 (48-0-3)

PHRC 6370—Pharmacoeconomics and Outcomes Research
This course provides an overview of the theories and methodologies of pharmacoeconomics and outcomes research. Application of the allocation of limited health care resources in clinical practice, the pharmaceutical industry, and managed care are explored using examples from the primary literature. Prerequisite: PHRC 5350 (32-0-2)

PHRC 6380—Public Health and Pharmacy Practice
This course covers public health foundations, concepts, and tools as they apply to pharmacy practice. Social determinants of health, health disparities, and cultural competencies, as well as their impact on population health, are emphasized. Skills related to epidemiology, pharmacoepidemiology, surveillance, and risk assessment are discussed. The course also explores models of pharmacy-run public health programs. Prerequisites: PHRC 4300 and 5300 (32-0-2)

PHRC 6430—Pharmacotherapy III
Pharmacotherapy III is the third of four courses in the pharmacotherapy curricular component. Material
presented in this course continues to integrate concepts from previous courses in the curriculum (pathophysiology, pharmacokinetics, calculations, biopharmaceutics, and pharmacodynamics) and builds upon the preceding pharmacotherapy courses. The course is divided into disease-state modules and focuses on the development, monitoring, and evaluation of pharmacotherapeutic plans through application of clinical pharmacokinetic principles, assessment of physical findings, laboratory values, adverse drug effects, drug interactions, and patient education. Prerequisite: PHRC 5410 (96-0-6)

PHRC 6440—Pharmacotherapy IV
Pharmacotherapy IV is the fourth and final course in the pharmacotherapy curricular component. Material presented in this course continues to integrate concepts from previous courses in the curriculum (pathophysiology, pharmacokinetics, calculations, biopharmaceutics, and pharmacodynamics) and builds upon the preceding pharmacotherapy courses. The course is divided into disease-state modules and focuses on the development, monitoring, and evaluation of pharmacotherapeutic plans through application of clinical pharmacokinetic principles, assessment of physical findings, laboratory values, adverse drug effects, drug interactions, and patient education. The class concludes with a high-stakes practicum in which students must demonstrate competence in select course outcomes. Prerequisites: PHRC 5410 (96-0-6)

PHRC 6540—Pharmacy Practice Seminar
The College of Pharmacy Seminar course is the culmination of the student’s medical information evaluation skills pathway. This seminar includes research of a given topic, a scientific paper describing research outcomes, a professional poster, and platform presentations. Presentations will be made to peers and health care professionals, providing valuable experience in presentation ability and in medical information resource utilization. Prerequisites: PHRC 4550, 5350, and 5570 (16-0-1)

PHRC 6580—IPPE: Health System
Students are exposed to various aspects of institutional pharmacy practice including drug storage, drug security, and policies and procedures. On-site experience provides knowledge and skills in an interactive learning environment. Processes that allow pharmacy students to integrate their knowledge and skills systematicaly documented and communicated based on legal, and social-behavioral issues. Patient care plans are systematically documented and communicated based on patient cases. This course emphasizes decision-making processes that allow pharmacy students to integrate their knowledge and skills in an interactive learning environment. Physical assessment techniques and interpretation are interwoven into the laboratory sessions. Students are assessed for their knowledge of commonly used medications throughout the course. (0-28-1)

PHRL 6730—Patient Care Management Laboratory III
This is the third of three in the patient care management (PCM) sequence of laboratories. PCM III covers the following specific pharmacotherapeutic topics (parallel to those in PHRC 6430): infectious diseases (including HIV) and cancer, with a focus on health-system pharmacy. The weekly classroom component of the course theory exposes students to interprofessional interactions, patient encounters, and additional exercises to complement laboratory activities. Students will have the opportunity to hone communication skills in both simulated inpatient and outpatient settings. Team building activities are incorporated throughout the course to enhance professionalism and communication skills among health care professionals. The laboratory uses realistic, integrated patient cases that allow students to draw upon knowledge acquired from all other courses in the curriculum. Cases encompass therapeutic, communication, legal, and social-behavioral issues. Patient care plans are systematically documented and communicated based on patient cases. This course emphasizes decision-making processes that allow pharmacy students to integrate their knowledge and skills in an interactive learning environment.
Physical assessment techniques and interpretation are interwoven into the laboratory sessions. Students are assessed for their knowledge of commonly used medications throughout the course. (0-28-1)

PHRC 7610/7620/7630/7640/7650/7660—Required Advanced Pharmacy Practice Experiences
Each required advanced pharmacy practice experience consists of a four-week, full-time (40 hours per week), off-campus experience in a supervised pharmacy practice environment. In these settings, students apply didactic instruction, develop competencies, and enhance their knowledge of patient care management. The required experiences include internal medicine, ambulatory care, community patient care, and acute patient care. **Prerequisite:** Successful completion of all didactic coursework (0-160-4)

PHRC 7610—APPE: Internal Medicine
The Internal Medicine Advanced Pharmacy Practice Experience (APPE) is a four-week, full-time (minimum 40 hours per week), out-of-classroom, supervised, inpatient experience emphasizing nondistributive, direct patient care and clinical aspects of pharmacy practice. The Internal Medicine APPE is designed to further refine skills in therapeutics, pharmacokinetics, drug information retrieval and evaluation, verbal and written communication, patient assessment, and case presentations as they apply to adult patients. Students apply therapeutic knowledge: identify drug-related problems; develop competency in pharmacy practice; and enhance knowledge of disease management of common diseases such as hypertension, congestive heart failure, diabetes, renal failure, etc. As members of a health care team, students apply these principles while developing effective, least-toxic, most-economical pharmacological regimens and establishing caring patient relationships in an inpatient setting. **Prerequisite:** Successful completion of all didactic coursework (0-160-4)

PHRC 7620—APPE: Ambulatory Care
The Ambulatory Care Pharmacy Practice Experience (APPE) is a four-week, full-time (minimum 40 hours per week), out-of-classroom, supervised, experience emphasizing nondistributive, direct patient care and clinical aspects of caring for pharmacy patients in the ambulatory care setting. Students will actively participate in obtaining patient medical and medication histories, evaluating drug therapies, developing pharmacy care plans, assessing patients, monitoring patients’ therapeutic outcomes, consulting with other health care providers, and providing education to patients and health care professionals. Students will apply and synthesize didactic information to the activities of a pharmacist as they develop their professional maturity and judgment skills. Students will apply therapeutic knowledge, identify drug-related problems, develop competency in pharmacy practice, and enhance knowledge of disease management of common diseases such as hypertension, venous thromboembolism, diabetes, hyperlipidemia, etc. As members of a health care team, students will apply these principles while developing effective, least-toxic, most-economical pharmacological regimens and establishing caring patient relationships in an ambulatory care setting. **Prerequisite:** Successful completion of all didactic coursework (0-160-4)

PHRC 7630—APPE: Community Patient Care I
The Community Patient Care I Advanced Pharmacy Practice Experience is the first of two four-week, full-time (minimum 40 hours per week), out-of-classroom, supervised, experiences emphasizing nondistributive, direct patient care in the outpatient, community setting. In this APPE, students will apply and synthesize didactic information to the activities of a pharmacist as they develop their professional maturity and judgment skills. Students will select one specialty from multiple offerings to complete this requirement. The course focuses on technical skills in the distribution of prescriptions and the practice of medication therapy management. **Prerequisite:** Successful completion of all didactic coursework (0-160-4)

PHRC 7640—APPE: Community Patient Care II
The Community Patient Care II Advanced Pharmacy Practice Experience is the second of two four-week, full-time (minimum 40 hours per week), out-of-classroom, supervised, experiences emphasizing direct patient care in the outpatient, community setting. In this APPE, students will apply and synthesize didactic information to the activities of a pharmacist as they develop their professional maturity and judgment skills. Students will select one specialty from multiple offerings to complete this requirement. The course focuses on technical skills in the distribution of prescriptions and the practice of medication therapy management. **Prerequisite:** Successful completion of all didactic coursework (0-160-4)

PHRC 7650—APPE: Acute Patient Care I
The Acute Patient Care I Advanced Pharmacy Practice Experience is the first of two four-week, full-time (minimum 40 hours per week), out-of-classroom, supervised, experiences emphasizing direct patient care in the inpatient, acute setting. In this APPE, students will apply and synthesize didactic information to the activities of a pharmacist as they develop their professional maturity and judgment skills. Students will select one specialty from multiple offerings to complete this requirement. Students will be exposed to the role and responsibilities of a professionally oriented pharmacist. Students participate as active members of a health care team. **Prerequisite:** Successful completion of all didactic coursework (0-160-4)
PHRC 7660—APPE: Acute Patient Care II
The Acute Patient Care II Advanced Pharmacy Practice Experience is the second of two four-week, full-time (minimum 40 hours per week), out-of-classroom, supervised, experiences emphasizing direct patient care in the inpatient, acute setting. In this APPE, students will apply and synthesize didactic information to the activities of a pharmacist as they develop their professional maturity and judgment skills. Students will select one specialty from multiple offerings to complete this requirement. Students will be exposed to the role and responsibilities of a professionally oriented pharmacist. Students participate as active members of a health care team. Prerequisite: Successful completion of all didactic coursework (0-160-4)

PHRC 7670/7680/7690—Required Advanced Pharmacy Practice Experience: Selectives
The Selective Advanced Pharmacy Practice Experience is a four-week, full-time (minimum 40 hours per week), out-of-classroom, supervised experience that may emphasize direct or non-direct patient care in an outpatient, inpatient, or office-based setting. Students complete a total of three selective (elective) experiences in a pharmacy practice specialty area that will allow them to obtain broader experiences. Elective experiences include, but are not limited to, administration, advanced hospital cardiology, critical care, drug information, geriatrics, home infusion, informatics, managed care, medication therapy management, nutritional support, pediatrics, pharmacokinetics, psychiatry, research, and veterinary pharmacy. Prerequisite: Successful completion of all didactic coursework (0-160-4)

PHRC 7801—Curricular Review I
The primary goal for the Curricular Review course series is to assess and strengthen student knowledge and skills developed during the four-year pharmacy curriculum. In Curricular Review I, students will start preparing for the NAPLEX by completing assigned practice questions and doing a practice NAPLEX-like exam. Prerequisite: PHRC 6440 (16-0-0)

PHRC 7802—Curricular Review II
In this course, students will continue preparing for the NAPLEX by completing assigned practice problems in the areas of pharmacotherapy and by completing several practice NAPLEX-like examinations. Prerequisite: PHRC 6440 (16-0-0)

PHRC 7803—Curricular Review III
Students will continue preparing for the NAPLEX by completing assigned practice problems and by completing a required pre-NAPLEX examination. Students will be provided with an individual pre-NAPLEX ID for one-time use. During the on-campus portion of the course, a NAPLEX review course is provided. Prerequisite: PHRC 6440 (16-0-0)

PHRC 7801—Curricular Review I
The primary goal for the Curricular Review course series is to assess and strengthen student knowledge and skills developed during the four-year pharmacy curriculum. In Curricular Review I, students will start preparing for the NAPLEX by completing assigned practice questions and doing a practice NAPLEX-like exam. Prerequisite: PHRC 6440 (16-0-0)

PHRC 7802—Curricular Review II
In this course, students will continue preparing for the NAPLEX by completing assigned practice problems in the areas of pharmacotherapy and by completing several practice NAPLEX-like examinations. Prerequisite: PHRC 6440 (16-0-0)

PHRC 7803—Curricular Review III
Students will continue preparing for the NAPLEX by completing assigned practice problems and by completing a required pre-NAPLEX examination. Students will be provided with an individual pre-NAPLEX ID for one-time use. During the on-campus portion of the course, a NAPLEX review course is provided. Prerequisite: PHRC 6440 (16-0-0)

PHRC 7801—Curricular Review I
The primary goal for the Curricular Review course series is to assess and strengthen student knowledge and skills developed during the four-year pharmacy curriculum. In Curricular Review I, students will start preparing for the NAPLEX by completing assigned practice questions and doing a practice NAPLEX-like exam. Prerequisite: PHRC 6440 (16-0-0)

PHRC 7802—Curricular Review II
In this course, students will continue preparing for the NAPLEX by completing assigned practice problems in the areas of pharmacotherapy and by completing several practice NAPLEX-like examinations. Prerequisite: PHRC 6440 (16-0-0)

PHRC 7803—Curricular Review III
Students will continue preparing for the NAPLEX by completing assigned practice problems and by completing a required pre-NAPLEX examination. Students will be provided with an individual pre-NAPLEX ID for one-time use. During the on-campus portion of the course, a NAPLEX review course is provided. Prerequisite: PHRC 6440 (16-0-0)

Elective Courses
PHRE 5001—Curricular Practical Training (CPT)
This course offers students additional opportunities to observe and emulate the roles and responsibilities of pharmacists in a pharmacy setting, as well as learn to effectively communicate with patients, pharmacists, and health care providers, gaining knowledge of the role of the pharmacist. Students will participate in a pharmacy environment to expand their knowledge of medication preparation; distribution; and interactions with insurers, prescribers, and patients, beyond the expectation of the IPPE rotation. (16-0-0)

PHRE 5105—Overview of Consulting Pharmacy Practice
This course is intended to provide an overview of geriatric consulting statutes that regulate the activity of the consultant pharmacist, the HCFA survey guidelines, the types of facilities required to have a consultant pharmacist, and monitoring of patient’s medication. Prerequisite: PHRC 5420 (48-0-3)

PHRE 5107—Current Topics in Pharmaceutical Sciences
This course covers special topics selected by faculty members and visiting scientists. The goal of each topic is to provide the student with an understanding of, and an appreciation for, current problems and procedures underlying the pharmaceutical sciences discipline. Prerequisite: Topic dependent, please see course coordinator for details. ([16–32]-0-[1–2])

PHRE 5113—Current Topics in Pharmaceutical Sciences
This course covers special topics selected by faculty members and visiting scientists. The goal of each topic is to provide the student with an understanding of, and an appreciation for, current problems and procedures underlying the pharmaceutical sciences discipline. Prerequisite: Topic dependent, please see course coordinator for details. ([16–32]-0-[1–2])

PHRE 5117—Cardiovascular Risk Factors
This course is designed to provide the student with the background knowledge necessary for the clinical sciences, information related to cardiovascular risk factors, and the foundation from which pharmacists practice pharmaceutical care. The course reviews all major classes of cardiovascular risk factors and discusses evidence-based therapy. The rationale of prevention, lifestyle modifications, and current therapies for the treatment of common and silent cardiovascular risk factors are also addressed. Attention is given to specific clinical studies regarding new strategies to prevent and treat risk factors associated with cardiovascular disease. (32-0-2)
PHRE 5121—Entrepreneurship and Strategic Management
This course provides the students with complementary knowledge in management and leadership by familiarizing students with topics such as operation management, value creation in pharmacy services, labor law, and emotional intelligence, helping them to become more cognizant of the legal, ethical, social, and business aspects of decision making. The student will have the opportunity to think in concrete terms and to propose solutions to common situations encountered during the course of delivering pharmacy services. At the same time, students will be able to identify their own strengths and areas in need of improvement and define their roles as future entrepreneurs. (32-0-2)

PHRE 5123—Individualized Pharmacotherapy
This course will give an overview of the field of individualized (or personalized) pharmacotherapy, which involves the systematic use of information about each individual patient to select or optimize the patient's preventative and pharmacotherapeutic care. The course discusses individual differences in drug response to tailor drug therapy based on each individual patient's needs. Prerequisites: PHRC 4210, 4220, 5230, and 5240 (16-0-1)

PHRE 5203—Consumer Health Informatics and Web 2.0 in Health Care
This course provides an introduction to, and overview of, the consumer health informatics and Web 2.0 applications used in health care. It explores the development of consumers as ePatients and health information seekers, using tools such as patient-controlled electronic health records as well as the fluid nature of Web 2.0 in medicine. Prerequisite: PHRC 4550 (32-0-2)

PHRE 5215—Advanced Pharmaceutical Compounding
The course will provide advanced training in the art, science, and technology of pharmaceutical compounding. Prerequisite: PHRL 4130 (32-0-2)

PHRE 5221—Introduction to Molecular Medicine
This course discusses gene defects and diseases that originate at the molecular level, basic principles of gene expression, recombinant DNA-derived pharmaceuticals, and modern diagnostic and therapeutic approaches that are currently used to fight genetically determined diseases. (32-0-2)

PHRE 5223—Drugs of Abuse
The primary purpose of this elective course is to provide pharmacy students with an understanding of the pharmacology of drugs of abuse. Specifically, the types of substances abused, the patterns of abuse, the methods/routes of drugs of abuse, the pertinent toxicokinetics of these substances, the pharmacologic/toxicologic mechanism(s), the clinical manifestations of intoxication and/or withdrawal, the treatment of drug intoxication/withdrawal, and the societal impact of drug abuse will be discussed. Prerequisites: PHRC 5410 and 5420 (32-0-2)

PHRE 5225—Principles of Neuropharmacology
This course covers the principles of membrane support and bioelectricity, synaptic transmission, and recent molecular biological approaches and techniques that have revolutionized the understanding of membrane channels. Prerequisites: PHRC 5410 and 5420 (32-0-2)

PHRE 5227—Pharmacoethics
This course is designed to introduce students to bioethical issues encountered in health care, with emphasis on ethical problems related to pharmacy. Students explore issues arising from advances in biotechnology, resource allocation, research using human subjects, informed consent, the function of ethics committees, and the right to privacy as they affect the legal rights and responsibilities of patients, health care providers, and policy makers. (32-0-2)

PHRE 5241—Advances in Central Nervous System Pharmacology
This course reviews recent developments in the understanding of selected CNS neurotransmitter/neuropeptide receptor systems with particular emphasis on their relevance to the actions of psychopharmacological agents. It focuses on the neuroanatomy, neurophysiology, and pathophysiology of specific neurotransmitter/neuropeptide systems and examines the interaction of these systems in the expression of CNS effects. Prerequisites: PHRC 4210, 4220, and 5230 (32-0-2)

PHRE 5243—Fundamentals of Pharmacognosy
This course will provide an overview of medicinal drugs derived from plants and other natural sources. The major classes of medicinally active natural products, their origin (nomenclature + taxonomy), structure, biosynthesis, and mode of action will be covered. The naturally derived constituents and their therapeutic efficacy will be discussed. (32-0-2)

PHRE 5245—Geriatric Patient Care Management
This course is to address real-life pharmacotherapeutic cases related to geriatric patients. The course requires the application of the knowledge acquired from all previous courses in the curriculum. The course is organized and sequenced based on disease states that include problems ranging from therapeutic to social-behavioral issues related to the disease state. The course will allow students to integrate the knowledge and apply the skills obtained from all previous courses to develop decision-making and disease management processes. This course is an online elective course that utilizes the case study teaching method. (32-0-2)
PHRE 5311—Pharmaceutical Marketing
An overview of drug and pharmaceutical care development and distribution systems is provided in this course. It gives students knowledge of the practice of marketing, develops market research skills, and shows how to formulate marketing plans and strategies as they apply to the profession of pharmacy and the pharmaceutical industry. **Prerequisite:** PHRC 4300. (32-0-2)

PHRE 5321—Strategic Marketing
This course places emphasis on application of marketing theory and methods in the profession of pharmacy and the pharmaceutical industry. The aims of the course are to improve students' knowledge of the practice of marketing, to develop market research skills, and to formulate marketing plans and strategies. (32-0-2)

PHRE 5345—Pharmacists, Pharmaceuticals, and the Media
This course will explore how various forms of media have portrayed pharmacists over the years. It will also investigate how pharmaceuticals and other drugs are reported by the press and are presented by the entertainment industry. Students will discuss the content of articles. The phenomena and occurrence of drug effects (drug-taking experiences) are examined, integrating information from both pharmaceutical and social sciences, to study how and why drugs are used. Historical and cross-cultural examples are employed in this dialogue on the nature and meaning of drug-taking experiences and their influence on drug-taking behaviors. (32-0-2)

PHRE 5385—Pharmacy Law Seminar
This seminar of pharmacy law topics is designed to promote the application of law to practice and enhance critical thinking, communication, writing, and social perspective. It will cover timely and controversial issues including controlled substances, duty to warn, the FDA, and the pharmaceutical industry. **Prerequisites:** PHRC 4300 and 5380 (32-0-2)

PHRE 5389—Pharmacy Law of Puerto Rico
This course teaches the laws and regulations governing pharmacy in Puerto Rico, including the material manufacturing, distribution, and dispensing of medications in the commonwealth. (32-0-2)

PHRE 5391—The Nuclear Pharmacy Experience
This course covers and explains what a nuclear pharmacy is and the responsibilities, activities, and knowledge required in order to function as a nuclear pharmacist. The course places emphasis on radiopharmaceuticals (radioactive medication), their mechanisms of action, dose ranges, methods of compounding, and ultimate role in the diagnosis and treatment of diseases. (32-0-2)

PHRE 5401—Current Topics in Sociobehavioral and Administrative Pharmacy
Specialized topics dealing with current issues, procedures, and policies related to sociobehavioral pharmacy are covered in this course. ([16–48]-0-[1–3])

PHRE 5411—Current Topics in Pharmacy Practice
This course discusses topics on current issues, procedures, and policies related to pharmacy practice. Topics can vary from semester to semester. (32-0-2)

PHRE 5417—Veterinary Pharmacotherapy
This course explores the most common animal diseases encountered in veterinary medicine and presents current pharmacotherapeutic approaches for these conditions as they relate to the practice of community and clinical pharmacy. (32-0-2)

PHRE 5427—Introduction to Pharmacometrics: Modeling and Simulation
Introduction to Pharmacometrics: Modeling and Simulation (IPMS) will expose the student to cutting-edge tools and techniques used to answer complicated problems in drug development and utilization. IPMS leverages information and knowledge from core biomedical and pharmaceutical courses together with mathematical modeling and simulation and clinical data from patients or published in the literature. Students will be required to synthesize the data to create models and perform simulations to answer problems with drug therapy. The course also includes hands-on training using standard modeling and simulation software. (32-0-2)

PHRE 5429—Antimicrobial Stewardship
Antimicrobial stewardship aims to optimize clinical outcomes while minimizing unintended consequences of antimicrobial use, including development of drug toxicity, selection of pathogenic organisms, and emergence of antimicrobial resistance. Principles of antimicrobial stewardship and concepts related to the management of infectious pathogens are the emphasis of this course. Upon completion of this course, students will be prepared to practice as a pharmacist in the forthcoming post-antibiotic era. (32-0-2)

PHRE 5445—Leadership, Engagement, and Development (LEAD)
This course provides an in-depth look at the behaviors and skills needed to be effective as leaders. Students are exposed to a variety of leadership theories and styles within the context of student leadership development. Communication styles, teamwork, cultural competence, and conflict management are examined within the interpersonal context. Course materials and activities challenge students to connect theory to practice and enhance communication skills through the use of student presentations on topics related to collaborative and
interprofessional experiences. **Prerequisites:** PHRC 4580 and PHRC 4680 (16-0-1)

**PHRE 5511—Survey of Complementary Therapies**
In this course, students will be provided with information about complementary therapies, which are frequently seen or could be recommended for various disease states. Nutritional supplements, herbal remedies, homeopathic remedies, and others will be studied in this course. The proper dosing, side effects, and drug and disease state interactions will also be considered in recommending these therapies. (32-0-2)

**PHRE 5563—Rounding with Pharmacy Residents**
The course will expand the student’s knowledge base on selected topics covered in therapeutics and pathophysiology I and II, as well as other related hospital topics. This will be achieved by working through patient and hospital management problems and developing individual pharmacotherapeutic plans while taking into consideration therapeutic, economic, and operational aspects. **Prerequisite:** PHA 5610 (32-0-2)

**PHRE 5613—Pediatric Pharmacotherapy**
This course introduces the student to pharmacotherapy of common pediatric diseases. The course will expand on topics addressed in therapeutics/pathophysiology II and present more complex pharmacotherapy issues relating to pediatrics. **Prerequisites:** PHRC 4300, 5300, and 6430 (32-0-2)

**PHRE 5619—Pharm.D./D.M.D. Interprofessional Experience**
This interprofessional education (IPE) course will allow pharmacy students and dental students to work together in caring for the HIV-infected population. Students will be conducting medication reconciliation for HIV-infected patients at a dental clinic. Students will observe dental procedures and provide education on medication efficacy, medication side effects, and the importance of medication adherence to dental students. Students will also educate patients on proper oral hygiene and medication adherence. Students will be expected to be at the dental clinic approximately four hours per week for 10 weeks. Didactic lectures will address overall health management of patients with HIV infections. **Prerequisite:** PHRC 5420 (16-48-2)

**PHRE 5633—Introduction to Health Promotion and Education**
This course explores why and how pharmacists get involved with health promotion and education programs. It identifies the steps involved in the development of these programs, as well as resources needed. Applicability to vulnerable populations is emphasized. Students are expected to develop a health promotion and education program. **Prerequisite:** PHRC 4300 (32-0-2)

**PHRE 5637—History of Pharmacy**
This course reveals the proud heritage of the profession of pharmacy and its service to humanity. Significant drug discoveries will be examined and individuals who contributed to the evolution of pharmacy will be discussed. Minerals, selected drugs, and plants of historical value will be described. Evolution of pharmacy associations, education, pharmaceutical research, and manufacturing will be presented. (32-0-2)

**PHRE 5639—Clinical Neuropsychopharmacology**
This course will incorporate lecture, classroom discussion, student presentations, and clinical monitoring of a patient with a neurological or a psychiatric disorder. The course is designed to introduce students to advanced concepts in the pharmaceutical care of the mentally ill patient. **Prerequisites:** PHRC 5410 and 5420 (32-0-2)

**PHRE 5641—Applied Secondary Database Analysis**
This course will give students the opportunity to apply the skills learned in the research design and biostatistics course by completing a retrospective research project using a federal secondary database. By the end of the course, students will have written a basic research protocol, completed a mock Institutional Review Board application, become familiarized with the basic structure and methodology of the United States National Health and Nutrition Examination Survey (NHANES) database, prepared a dataset, conducted descriptive and basic statistical analyses, written an abstract, and presented a scientific poster to a small audience. **Prerequisite:** PHRC 5530 (32-0-2)

**PHRE 5991—Research in Pharmacy Practice**
Students, under the direction of one or more pharmacy practice faculty members, will perform individual research projects. Projects may involve direct patient care or translational research (e.g., pharmacokinetics, pharmacogenomics). Semester credits must be negotiated with the adviser and approved by the department chair prior to the start of any work. Students will be involved in both the planning and execution of the research project. (0-[48–144]-[1–3])

**PHRE 5993—Literature Research in Pharmaceutical Sciences**
This course provides students with an opportunity to work under the direct supervision of one or more faculty members. Students will be assigned directed readings, evaluations, and analysis of scientific literature in the fields of pharmacology, pharmaceutics, biopharmaceutics, pharmacokinetics, drug delivery systems, pharmaceutical technology, biotechnology, toxicology and others. Students will be mentored and trained on how to retrieve scientific information, build a hypothesis, write papers, and write reviews. With the professor, students are involved in planning and executing an approved research project.
using basic techniques of scientific research. The student will be awarded 3 or 4 semester credits on the basis of 48 laboratory hours per credit. (0-[144–192]-[3–4])

PHRE 5995—Research in Sociobehavioral and Administrative Pharmacy I
This course consists of individual work conducted by students under the direction/supervision of one or more faculty members. The research may include planning, analysis, and execution of a project. Prerequisite: PHRC 4300 (0-[48–144]-[1–3])

PHRE 5997—Research in Sociobehavioral and Administrative Pharmacy II
This course is a continuation of PHRE 5995 (Research in Sociobehavioral and Administrative Pharmacy I). Prerequisite: PHRC 4300, 5350, and 5995 (0-[48–192]-[1–4])

PHRE 5999—Research in the Pharmaceutical Sciences
In this course, students work under the direction/supervision of one or more faculty members in a research laboratory. Students are involved in planning and executing an approved research project using basic techniques of scientific research. Students will be awarded 3 or 4 semester credits on the basis of 48 laboratory hours per credit. (0-[144–192]-[3–4])

Master of Science (M.S.) in Pharmaceutical Affairs

The Master of Science (M.S.) in Pharmaceutical Affairs is a two-year graduate program designed for people interested in the acquisition of knowledge and skills associated with pharmaceutical agents. The degree will prepare students for managerial or sales positions in the pharmaceutical industry, or positions in academia, contract research organizations, managed care organizations, health care systems, and governmental and nongovernmental agencies. Graduates will be able to critically analyze issues related to the production and use of pharmaceuticals and act as leaders in the field. The M.S. in Pharmaceutical Affairs will also act as a bridge for students interested in additional preparation prior to pursuing a Pharm.D. or Ph.D. degree.

This master's degree program will be housed at the NSU Miami Campus, located near the Florida Turnpike and Kendall Drive. Off-campus housing is available in the area.

Admissions Requirements
The Master of Science in Pharmaceutical Affairs program bases its selection of candidates on academic performance, Pharmacy College Admission Test (PCAT) or Graduate Record Exam (GRE) scores, personal interviews, written applications, and letters of reference.

1. Prior to matriculation, applicants must have received a baccalaureate degree from a regionally accredited college or university. A baccalaureate degree in any field of study is acceptable, as long as all prerequisites are met.

2. Applicants must complete the following prerequisite coursework at a regionally accredited college or university with a grade of 2.0 or higher on a 4.0 scale.

<table>

PHRE 6703—Residency Interviewing Preparatory Seminar (RIPS)
This course is a Pass/Fail elective course offered to fourth-year pharmacy students who are applying to a residency program. The course will focus on improving a student's interviewing and presentation skills. The course will also help students in developing their curricula vitae, personal statements, and letters of intent. Due to the interactive nature of the course, it will not be broadcasted to other sites. Prerequisite: P4 standing (16-0-1)

PHRE 6997—Travel Study Program
Special topics relevant to the profession of pharmacy will be covered. The goal of each travel study program is to provide the student with an overview, understanding, and appreciation for pharmaceutical and medical practices practiced outside the United States. (48-0-3)

PHRE 7695—Advanced Pharmacy Practice Experience: Selective IV
This is an optional Advanced Pharmacy Practice Experience for students who have completed all nine required APPEs. This option provides additional depth or breadth of practice knowledge and skills. It is an additional APPE option only and will not count as a required APPE or elective course. Prerequisite: Successful completion of all didactic coursework and college approval (0-160-4)
Advanced Sciences (choose two of the following courses: genetics, cellular biology, molecular biology, microbiology, or biochemistry) .... 6

Humanities/Social and Behavioral Sciences/Other Electives

- Social and Behavioral Sciences ......................... 3
- Humanities ..................................................... 3
- Electives in either discipline ........................... 9*

TOTAL 64

* Ethics, micro or macroeconomics, and general/life science statistics are highly recommended and may substitute for up to 9 humanities and social and behavioral sciences elective credits.

3. Applicants must have a minimum cumulative GPA of 2.5 or higher on a 4.0 scale.

4. Applicants must submit official scores from the PCAT or GRE.

- PCAT scores must be no more than three years old at the time of application. Applicants should take the PCAT no later than January prior to the expected date of matriculation. Candidates may register online at pcatweb.info, or call 800-622-3231 with any questions.

- GRE Scores must be no more than three years old at the time of application. Applicants should take the GRE no later than April prior to the expected date of matriculation. You may register online at gre.org, or call 1-609-921-9000 if you have any questions.

5. Two letters of reference from a pre-professional committee—or, if such a committee does not exist, letters of reference from one science professor and one liberal arts professor—are necessary.

Foreign Pharmacy Graduates

Foreign pharmacy graduates may be eligible for admission with

1. a Bachelor of Pharmacy degree or a Bachelor of Science degree in Pharmacy from an accredited institution
2. completion of the coursework below with a grade of 2.0 or higher on a 4.0 scale

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

TOTAL 29

Foreign pharmacy graduates must also complete numbers 3, 4, and 5 under the main Admissions Requirements.

Application Procedures

Candidates for admission must submit the following by June 15:

1. a completed electronic application (available on our website at pharmacy.nova.edu/masters) with a nonrefundable application fee of $50 (U.S.)
2. official transcripts from all colleges and universities attended (A maximum of 6 credits may be transferred from other accredited graduate institutions.)
3. official PCAT or GRE scores, not more than three years old at the time of interview
4. two letters of reference

Proof of English proficiency, if applicable, is required of applicants. The following standardized tests currently satisfy NSU College of Pharmacy English requirements for nonnative English speakers:

- Test of English as a Foreign Language (TOEFL)*: score of 213 or above on a computer-based test or 80 or above on the Internet-based test (toefl.org)
- International English Language Testing System (IELTS)*: score of 6.0 or higher on the test module (ielts.org)

* TOEFL and IELTS scores may be no more than two years old at the time of the interview.

Candidates who have taken college courses in the United States may also prove English proficiency by completing, with a grade of 2.0 or higher on a 4.0 scale, two college-level English composition courses at a regionally accredited college or university in the United States.

All admissions materials and foreign evaluations must be mailed to

Nova Southeastern University
Enrollment Processing Services (EPS)
College of Pharmacy Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Interview Process

A personal interview is part of the admissions process; however, being interviewed is not a guarantee of admission. Upon receipt of the completed application, a review will be made to determine if the applicant will be granted an interview. Not all applicants will be granted an interview. The Office of Admissions will notify selected applicants for interviews.

Notice of Acceptance

Notice of acceptance or other action by the committee on admissions will be on a “rolling” or periodic schedule. Early completion of the application process is in the best interest of the applicant. Admission to the college is contingent upon successful completion of all prerequisite
coursework prior to the first day of the semester. Proof of completion is required.

**Transcripts**
After acceptance, final and official transcripts from all colleges and universities attended, and/or final and official documents, must be received within 90 calendar days from the start of the term. If final and official transcripts and/or documents are not received by that time, the student will not be allowed to continue class attendance. In addition, financial aid will not be disbursed to a student until he or she provides all the necessary documents required to be fully admitted as a regular student.

**Foreign Coursework**
Coursework taken at foreign institutions must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org
- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com
- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University.

All admissions materials and foreign evaluations must be mailed to
Nova Southeastern University
Enrollment Processing Services (EPS)
College of Pharmacy Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

**Program Requirement**
All students must have ongoing access to a computer and an active account with an Internet service provider. Entering students must purchase an iPad for assignments and assessments. NSU will provide access to email, online databases, and library resources.

**Computer Requirements**
In addition to an iPad, students must have ongoing access to a computer capable of connecting to the Internet and playing streaming video files. Online course notes and discussions will be provided to the student through an online course management system.

**Tuition: M.S. in Pharmaceutical Affairs Program**
All tuition and fees are subject to change by the board of trustees without notice.

Annual tuition for 2016–2017 is U.S. $25,500. Tuition for 2017–2018 will be posted on our website when available.

**Fees and Deposit—All Programs**
- Acceptance and Preregistration Deposit—$1,000. This deposit is required to reserve the accepted applicant’s place in the entering, first-year class. This deposit will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is due within three weeks of an applicant’s acceptance.
- Health Professions Division General Access Fee—$145. This fee is required annually.
- NSU Student Services Fee—$1,050. This fee is required annually.
- College of Pharmacy Fees—Additional fees will be incurred for immunization training, pharmacy testing, and other college-approved activities. These fees will likely not exceed $500 over the course of the program.

The first semester’s tuition and fees, less the $1,000 deposit, are due on or before the first day of classes. Tuition for each subsequent semester is due on or before the first day of classes. Students will not be permitted to register or attend classes until their financial obligations have been met. The financial ability of applicants to complete their training at the college is important. Applicants should have specific plans for financing their professional education. This should include tuition, fees, living expenses, iPad and computer-related expenses, health insurance, books, equipment, travel to and from experiential sites, and other miscellaneous expenses.

Each student is required to carry adequate personal medical and hospital insurance. For more information about NSU’s required health insurance, visit the website at nova.edu/bursar/health-insurance.

**Course of Study**
The degree program will provide a strong science preparation for those interested in doctoral-level graduate programs in pharmacy and other science fields. Students will be better prepared to further pursue the doctoral-level career paths currently being offered nationwide.

Except for the Medical Terminology review course offered online, all other courses will be offered on campus or via videoconferencing. Some courses will be combined with
existing Pharm.D. and Ph.D. courses, while others will be stand-alone, master's degree-specific courses (see curriculum outline). M.S. students will be assessed differently when appropriate.

In the final year, each student will choose one of two culminating experience courses—Applied Secondary Database Analysis or Analytic Systematic Review Project. These are designed to integrate and assess the student's ability to engage in evidence-based decision making. The program must be completed within five academic years from the date of matriculation.

### Graduation Requirements

To receive a degree, a student must fulfill the following requirements:

- satisfactorily complete the program of study with a minimum cumulative GPA of 3.0 out of 4.0
- satisfactorily complete one of the culminating experience courses listed under Course of Study
- satisfactorily meet all financial obligations to the university
- submit an application for degree/diploma to the registrar's office by the posted deadline (Applications received after the deadline will not be considered for that year's commencement ceremony.)

### Curriculum Outline

The curriculum is currently under review and will be revised as needed. These courses are representative of the overall requirements of the program at the time of publication.

PHRM 5410—Physiology and Pathophysiology I
This two-semester course reviews the physical and chemical processes occurring in the human body that are responsible for the maintenance of health and the pathophysiology of disease. Topics covered during the first semester include membrane and cellular physiology, genetic diseases, and the physiology and pathophysiology of the integumentary, musculoskeletal, nervous, lymphatic, and cardiovascular systems. The second semester (PHRM 5420) addresses the physiology and pathophysiology of the digestive, urinary, respiratory, endocrine, and reproductive systems. (64-0-4)

PHRM 5420—Physiology and Pathophysiology II
This two-semester course reviews the physical and chemical processes occurring in the human body that are responsible for the maintenance of health and the pathophysiology of disease. The second semester reviews the physiology and pathophysiology of the digestive, urinary, respiratory, endocrine, and reproductive systems. (64-0-4)

HPH 7210—Bioethics: Principles of Life Science Research
This course provides a structured approach for identifying, analyzing, and resolving ethical issues in medicine and the life sciences. Students analyze and discuss traditional philosophical theories regarding the nature of moral good. They will apply these theories to critical issues and selected case studies involving experiments with human subjects, organ transplantation, in vitro fertilization, the use of animals in research, the collection and publication of research data, conflicts of interest, and other topics of current concern. Students will explore the personal values, professional standards, and institutional guidelines that define the roles and responsibilities of the health care practitioner and researcher. (48-0-3)

HPH 7300—Biostatistics I
This course is the first of a two-course sequence focusing on inferential statistics for students interested in conducting quantitative research in the health sciences. It enables students to gather data and apply experimental design models toward solving practical problems and improving the efficiency of formulating and providing health care services. (48-0-3)

Pharmacy—Required Courses
PHRM 5000—Medical Terminology
This online course will provide an overview of medical terminology. Upon completion, students will demonstrate proficiency in the medical terminology required to be successful in pharmacy education. (8-0-0)

PHRM 5001—Health Economics
This course will introduce students to the economic analysis of health care markets and the production of health. It covers a variety of topics, including the determinants of health; the supply of, and demand for, health care services; the impact of insurance on the demand for health care services; the role of government in health care markets; the market for pharmaceuticals; and the economic evaluation of health care programs. (48-0-3)

PHRM 5021—Population Health and Public Policy
This graduate research seminar introduces students to (1) the fundamental concepts and frameworks used for the study of population health and public policy, (2) the financing and managing of health systems at the local and international levels, and (3) the formulation and analysis of public health policies. The course will emphasize the intersection of public health and the determinant of drug use and pharmacy-related policies. Students will have the opportunity to analyze and critically evaluate existing health policies, public health actions, and reforms. The
course will be highly interactive. Students are expected to contribute and participate in the discussion of current research, case studies, and policies. Student learning will be assessed through oral exams, written assignments, presentations, and an analytical paper. This course should provide skills for the conceptualization of research projects addressing current health issues related to pharmacy.  

PHRM 5110—Pharmaceutics I  
Pharmaceutics I emphasizes the theories and applications of underlying physicochemical principles in preparation of pharmaceutical dosage forms. It also emphasizes biopharmaceutics principles, as well as drug development and approval processes. (48-0-3)  

PHRM 5150—Nonprescription Therapies  
This course discusses the use of nonprescription therapies, including drug and nondrug treatments. Patient education information, potential drug interactions, and recommended treatments will also be discussed. (48-0-3)  

PHRM 5200—Pharmacy Calculations  
Pharmacy Calculations includes the study of different methods used by the pharmacist in the process of solving the mathematical problems typically found in the practice of the profession of pharmacy. This course also emphasizes metric and common systems conversions, fundamentals of measurements, percentages, dose calculation, specific gravity, dilution, concentration, and dosage adjustment. (16-0-1)  

PHRM 5210—Pharmacodynamics I  
This is the first course in the pharmacodynamics sequence. This course applies the principles of organic chemistry in order to understand drug actions at the molecular level. It introduces students to the basic pharmacokinetic principles (absorption, distribution, metabolism, and elimination) as it pertains to pharmacology. The remainder of the course covers physiological receptors and key pharmacogenomics concepts. (48-0-3)  

PHRM 5220—Pharmacodynamics II  
This is the second course in the pharmacodynamics sequence. This course applies the principles of biochemistry, physiology, and pathophysiology to help students understand drug actions at the receptor, cellular, and system levels under normal physiological and pathological conditions. It focuses on the drugs that act on the autonomic nervous system, cardiovascular system, and blood components. Prerequisites: PHRM 5210 and PHRM 5410 (48-0-3)  

PHRM 5229—Product Development and Industrial Pharmacy  
This course provides the student with the essential information about the various stages of the new drug approval process and drug development, including pre-formulation, comparison studies, suitability of pharmaceutical excipients, and formulation. Additionally, it provides the student with the principles of pharmaceutical processing, such as filtration, milling, mixing, drying, and compression of pharmaceutical solids. The course also deals with the production and quality control of tablets, capsules, liquid dosage forms, semi-solid dosage forms, and sterile products. Coverage includes the science of packaging materials, production management, quality assurance, and regulations in the pharmaceutical industry, including validation, good manufacturing practice, and FDA guidelines for stability of pharmaceutical dosage forms. (64-0-4)  

PHRM 5300—Pharmacy and the U.S. Health Care System  
This course covers concepts related to the structure and function of the United States health care system. Emphasis is placed on the analysis of issues associated with personnel; the finance, organization, and regulation of the health care system; and the provision of pharmacy services in the context of the health care enterprise. (32-0-2)  

PHRM 5550—Introduction to Drug Information Resources and Health Informatics  
This course provides a detailed review of the fundamental tools necessary to identify the quality of health care information available in primary, secondary, and tertiary resources. Students learn the strengths and weaknesses of the various references and how to apply their use in practice. Active learning experiences include retrieving scientific literature, utilizing electronic resources, performing literature searches, and formulating responses to drug information requests. Students also learn fundamental aspects of health informatics including basic terminology and tools (e.g., electronic health records, e-prescribing, and clinical decision support systems), the role of data analytics and visualization, and both the benefits and limitations associated with the use of health information technology. (32-0-2)  

PHRM 5570—Biomedical Literature Evaluation  
This course provides a framework to guide the student through the thought processes necessary to evaluate and synthesize primary literature using an evidence-based approach. Through didactic and application-based learning, students become proficient in literature evaluation techniques to assess therapeutic value and applicability in patient care. Prerequisite: PHRM 5550 (32-0-2)
PHRM 5601—Teaching Certificate I
This course is part one of a two-part teaching certificate series and will prepare students to pursue teaching careers. Topics such as instructional design, delivery methods, learning assessment, and teaching innovation will be included. The student will be able to demonstrate and practice delivering content and skills to different types of students at both the undergraduate and graduate levels. Learning technologies for distance learning will be evaluated and explored as they apply to pharmaceutical sciences and affairs. (16-0-1)

PHRM 5602—Teaching Certificate II
This course is part two of a two-part teaching certificate series and will prepare students to pursue teaching careers. Topics such as instructional design, delivery methods, learning assessment, and teaching innovation will be included. The student will be able to demonstrate and practice delivering content and skills to different types of students at both the undergraduate and graduate levels. Learning technologies for distance learning will be evaluated and explored as they apply to pharmaceutical sciences and affairs. (16-0-1)

PHRM 5641—Applied Secondary Database Analysis
This course will give students the opportunity to apply the skills learned in the research design and biostatistics course by completing a retrospective research project using a federal secondary database. By the end of the course, students will have written a basic research protocol, completed a mock Institutional Review Board application, become familiarized with the basic structure and methodology of the United States National Health and Nutrition Examination Survey (NHANES) database, prepared a dataset, conducted descriptive and basic statistical analysis, written an abstract, and presented a scientific poster to a small audience. (16-0-1)

PHRM 5642—Analytic Systematic Review Project
This course will provide a culmination and integration of the student's skills with health-related, epidemiological, and medical information. Outcomes include research of a given topic, a scientific paper describing research products, a professional poster, and platform presentations. Presentations will be made to peers and health professionals, providing valuable experience in presentation ability and in medical information resource utilization. (32-0-2)

PHRM 5701—Master's Graduate Seminar I
This is a weekly lecture series required of all graduate students throughout their course of study and research. Speakers will include faculty members and guests, as well as students presenting aspects of their own research. (16-0-1)

PHRM 5702—Master's Graduate Seminar II
This is a weekly lecture series required of all graduate students throughout their course of study and research. Speakers will include faculty members and guests, as well as students presenting aspects of their own research. (16-0-1)

• three letters of reference
  - Letters must be from professors or supervisors in the applicant's field of study.
• all official transcripts and foreign evaluations, if applicable (See 2 under Application Procedures for more details.)

Admissions Requirements
Candidates will be recruited for the Ph.D. program with degrees in fields related to the sciences. Successful applicants will be required to comply with the guidelines outlined below.
1. All applicants must have earned a baccalaureate degree from an accredited institution of higher education.
2. The applicant should have earned a cumulative GPA equal to a 3.0 or better on a 4.0 scale.
3. All applicants must submit
   • a Ph.D. application
   • scores for the Graduate Record Examination (GRE)
     - Scores must be less than five years old.
     - The NSU code is 5522.
   • a Ph.D. application
   • scores for the Graduate Record Examination (GRE)

Application Procedures
Applicants must apply for matriculation into the fall semester. The Office of Admissions processes applications on a rolling basis; therefore, it is in the best interest of the applicant to apply early. In order to be considered for admission, students must complete the application form and submit supporting documents and a nonrefundable fee of $50 (U.S.). All applications and required documents must be submitted by March 1.
1. Applicants must apply for admissions electronically by using the interactive, web-based application at pharmacy.nova.edu/phd.
2. Coursework taken at foreign institutions must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com

- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant's responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly to NSU's Enrollment Processing Services.

3. In order to be considered for admissions, applicants must submit all required documents to the NSU Enrollment Processing Service at the address below.

Nova Southeastern University
Enrollment Processing Service
3301 College Avenue
P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

4. Upon receipt of the completed application and all required documents, the Committee on Admissions will review and select applicants for a personal interview. Applicants will be notified of the day and time of the scheduled interview. **Being granted an interview does not guarantee admission into the program.**

Social and Administrative Pharmacy Sequence

**Program Description**

The Health Professions Division at Nova Southeastern University requires all graduate students who are enrolled in health-related Ph.D. programs, including pharmacy, to take a series of core courses in their first and second years. Pharmacy graduate students must select one of three concentrations to focus their graduate studies upon: Social and Administrative Pharmacy, Drug Development (Pharmaceutics), or Molecular Medicine and Pharmacogenomics. Research topics available to students are consistent with the expertise of faculty members in the College of Pharmacy (COP) at NSU. In addition, the Ph.D. program is consistent with the criteria for accreditation set by the Commission on Colleges of the Southern Association of Colleges and Schools.

The Social and Administrative Pharmacy sequence focuses on coursework and research skills that address the dynamic and complex nature of the use and distribution of pharmaceutical products and the provision of pharmacy services. Students who select this sequence are expected to choose one of two tracks: 1) Sociobehavioral and Cultural Pharmacy or 2) Pharmacy Economics and Outcomes. Students who pursue either track in this sequence will
Social and Administrative Pharmacy Curriculum Sequence

The curriculum may be revised to better meet the demands of the profession. These courses are representative of the overall requirements of the program at the time of publication and are subject to change.

Notes:  • Qualifying exams will commence during the summer semester of the second year.
  • Fourth and subsequent years are as necessary (maximum seven years).
  • Graduation from the program requires the preparation and successful defense of a dissertation.

**Drug Development (Pharmaceutics) Sequence**

**Program Description**
The Health Professions Division at Nova Southeastern University requires all graduate students who are enrolled in health-related Ph.D. programs, including pharmacy, to take a series of core courses in their first and second years. Pharmacy graduate students must select one of three concentrations to focus their graduate studies upon: Social and Administrative Pharmacy, Drug Development (Pharmaceutics), or Molecular Medicine and Pharmacogenomics. Research topics available to students are consistent with the expertise of faculty members in the College of Pharmacy (COP) at NSU. In addition, the Ph.D. program is consistent with the criteria for accreditation set by the Commission on Colleges of the Southern Association of Colleges and Schools.

The Drug Development (Pharmaceutics) sequence emphasizes the coursework, laboratory, and literature research skills that are integral to the theory and practice associated with the incorporation of drug entities into the forms and formulations that best deliver the drugs to the site of the intended medical action. Students who pursue this sequence will be primarily under the tutelage of faculty members in the department of pharmaceutical sciences, a group that has expertise in pharmaceutics-related disciplines. Particular areas of expertise include a variety of drug formulations and novel drug delivery systems.

**Course of Study**
Students are required to take a minimum of 60 credits, at least 36 of which must be in didactic coursework. An average GPA of 3.0 or higher is expected in the didactic work. Coursework aimed at correcting an academic deficiency in a student's background will not count toward program requirements. Both a written or comprehensive and an oral qualifying examination are also required to advance to candidacy. Research, culminating in a successfully defended dissertation, is required of all students in their respective areas.

At the completion of this course of study and research, students will be able to
  • demonstrate the knowledge base expected at the Ph.D. level in a pharmacy specialty
  • design and conduct independent research that adds to the understanding of their pharmacy specialty
  • prepare and defend rational and structured proposals seeking support for their research
  • prepare and present lucid reports on their own research

Molecular Medicine and Pharmacogenomics Sequence

Program Description
The Health Professions Division at Nova Southeastern University requires all graduate students who are enrolled in health-related Ph.D. programs, including pharmacy, to take a series of core courses in their first and second years. Pharmacy graduate students must select one of three concentrations to focus their graduate studies upon: Social and Administrative Pharmacy, Drug Development (Pharmaceutics), or Molecular Medicine and Pharmacogenomics. Research topics available to students are consistent with the expertise of faculty members in the College of Pharmacy (COP) at NSU. In addition, the Ph.D. program is consistent with the criteria for accreditation set by the Commission on Colleges of the Southern Association of Colleges and Schools.

The Molecular Medicine and Pharmacogenomics sequence emphasizes the coursework, laboratory, and literature research skills that are integral to elucidation of the mechanism of action of drugs and the extent and characteristics of those actions. Students who pursue this sequence will be primarily under the tutelage of faculty members in the department of pharmaceutical sciences, a group that has expertise in areas such as pharmacology, medicinal chemistry, toxicology, and biochemistry. Particular areas of expertise include cardiovascular pharmacology, molecular pharmacology, anti-inflammatory steroids, and cancer pharmacology.

Course of Study
Students are required to take a minimum of 60 credits, at least 36 of which must be in didactic coursework. An average GPA of 3.0 or higher is expected in the didactic work. Coursework aimed at correcting an academic deficiency in a student’s background will not count toward program requirements. Both a written or comprehensive and an oral qualifying examination are also required to advance to candidacy. Research, culminating in a successfully defended dissertation, is required of all students in their respective areas.

At the completion of this course of study and research, students will be able to

- demonstrate the knowledge base expected at the Ph.D. level in a pharmacy specialty
- design and conduct independent research that adds to the understanding of their pharmacy specialty
- prepare and defend rational and structured proposals seeking support for their research
- prepare and present lucid reports on their own research

Ph.D. Program Course Descriptions

HPD Core Courses

HPH 7210—Bioethics: Principles of Life Science Research
This course provides a structured approach for identifying, analyzing, and resolving ethical issues in medicine and the life sciences. Students analyze and discuss traditional philosophical theories regarding the nature of moral good. They will apply these theories to critical issues and selected case studies involving experiments with human subjects, organ transplantation, in vitro fertilization, the use of animals in research, the collection and publication of research data, conflicts of interest, and other topics of current concern. Students will explore the personal values, professional standards, and institutional guidelines that define the roles and responsibilities of the health care practitioner and researcher.

HPH 7300—Biostatistics I
This course is the first of a two-course sequence focusing on inferential statistics for students interested in conducting quantitative research in the health sciences. It enables students to gather data and apply experimental design models toward solving practical problems and improving the efficiency of formulating and providing health care services.
PHRP 7001—Health Economics
This course will introduce students to the economic analysis of health care markets and the production of health. This course covers a variety of topics including the determinants of health; the supply of, and demand for, health care services; the impact of insurance on the demand for health care services; the role of government in health care markets; the market for pharmaceuticals; and the economic evaluation of health care programs. (48-0-3)

PHRP 7004—Advanced Physical Pharmacy
This course presents application of underlying physical principles to formulate and develop various pharmaceutical products. The course describes physical principles in both solid and non-solid states. Students will learn how basic physical principles are applied in development of current and novel pharmaceutical solids, semi-solids, and homogeneous and heterogeneous systems. Moreover, the course describes the importance, properties, and application of different polymer systems, new drug carriers, and rheology modifiers in developing current and novel dosage forms. Drug stability and solubility and approaches to enhance the solubility of poorly soluble drugs will also be discussed. (48-0-3)

Ph.D. Program Courses

PHRP 7002/7007/7010/7011/7014/7202/7217/7218/7225/7230/7303—Graduate Seminar
The purpose of this course is to equip students with the necessary tools so that they can prepare and present lucid reports on their own research, as well as the research of others. The course will consist of weekly lectures that will be required of all graduate students throughout their course of study and research. Speakers will include faculty members and guests, as well as students presenting aspects of their research. (16-0-1)

PHRP 7006—Clinical Pharmacology: Pharmacodynamics Principles and Cardiovascular Pharmacology
This course will apply the principles of organic chemotherapy, biochemistry, physiology, and pathophysiology to understand drug actions at the receptor, cellular, and systems levels under physiological and pathological conditions. Special emphasis will be placed on students' understanding of determinants of drug absorption, distribution, physiological receptors, drug-receptor interaction, drug metabolism, and elimination. This course will also focus on the drugs that act on the autonomic nervous system, cardiovascular system, and blood components as well. The rationale for the use of these therapeutic agents; their effects on cells, tissues, organ systems, and patients; the mechanisms underlying these effects; the therapeutic value of specific drug effects; and the adverse effects of the drugs will be addressed as well. (64-0-4)
of biopharmaceutics and pharmacokinetics to the design of controlled release and targeted drug delivery systems. Emphasis is on bioequivalence and bioavailability of traditional pharmaceutical dosage forms and novel drug delivery systems, including the assessment of biosimilars. (48-0-3)

PHRP 7013—Internship
This is a course designed to provide students with an introduction to research in industry or an institutional setting. Students will work one-on-one with their supervisor to become familiar with cutting-edge research and problem-solving in industry and institutions. Ultimately, the underlying purpose of this experience is to expose students to the research and environment that exist in industry and various institutions. (48-0-3)

PHRP 7020—Experimental Statistics and Informatics
This course provides an overview of the principles of experimental statistics and informatics that are relevant to the experimental design of studies, as well as interpretation and processing of the information garnered from these studies, in the biomedical sciences, but particularly in the area of molecular medicine and pharmacogenomics. (16-0-1)

PHRP 7021—Population Health and Public Policy
This graduate research seminar introduces Ph.D. students to (1) the fundamental concepts and frameworks used for the study of population health and public policy, (2) the financing and managing of health systems at the local and international levels, and (3) the formulation and analysis of public health policies. The course will emphasize the intersection of public health and the determinant of drug use and pharmacy-related policies. Students will have the opportunity to analyze and critically evaluate existing health policies, public health actions, and reforms. The course will be highly interactive. Students are expected to contribute and participate in the discussion of current research, case studies, and policies. Student learning will be assessed through oral exams, written assignments, presentations, and an analytical paper. This course should provide skills for the conceptualization of research projects addressing current health issues related to pharmacy. (48-0-3)

PHRP 7023—Pharmaceutical Marketing
This course is intended to provide the graduate student with an in-depth understanding of the global development and marketing of pharmaceuticals with an emphasis on the U.S. system. (48-0-3)

PHRP 7025—Pharmacy Management and Finance
This course provides an overview of management theories, human resources, and financial management applied to pharmacy and health care institution operations. Elements of supervision, management, and leadership are discussed in an effort to help students develop the skills needed to operate a pharmacy effectively. Also covered are finance topics such as capital costs, profit analysis, cost structures, budgeting, payment for services rendered, and accounting. (48-0-3)

PHRP 7030—Research
This course provides an introduction to research in industry or institutional settings. Students will work one-on-one with their supervisor to become familiar with cutting-edge research and problem-solving in industry and institutions. Ultimately, the underlying purpose of this experience is to expose students to the research and environment that exist in industry and various institutions. (48-0-3)

PHRP 7050—Journal Club
This course gives graduate students the opportunity to read, interpret, and present literature critically to fellow peers, postdoctoral students, and faculty members. The course will allow development of high-quality written and oral critiques of peer-reviewed journal publications. This course helps students stay abreast of current knowledge in the field, develop presentation skills, and promote department unity. (16-0-1)

PHRP 7060—Pharmaceutical Sciences Research Design
The purpose of this course is to provide an analysis of the study designs most commonly employed in experimental research with emphasis in basic and clinical pharmacological research. Completion of the course is expected to enable students to understand the considerations that go into selecting qualitative, quantitative, and mixed methods of research design. The course prepares students to select the most appropriate design to better answer a specific research question, as well as to understand the strengths and limitations of such design. (48-0-3)

PHRP 7114—Molecular and Cellular Pharmacodynamics
This course is a study of the considerations in operating and regulating cellular processes by manipulating receptors for therapeutic advantage through coupled signaling pathways. Recent developments in this technique as it applies to the treatment of disease will be presented. Prerequisites: Clinical Pharmacology (PHRC 4230) or equivalent. (48-0-3)

PHRP 7201—Graduate Research
This course develops student skills in conducting research projects. Students will work independently, under the guidance of their faculty mentor. Skills for development may include, but are not limited to, developing research hypotheses, conducting a literature review, devising instrumentation, validating instruments, conducting an
experiment, collecting data, analyzing data, and writing reports. The course may be taken more than once. Typically, students focus on hypotheses development and literature review projects in the first semester and data collection or field work for a pilot project in the second semester. ([32–48]-0-[2–3])

PHRP 7203—Social Measurement and Techniques
This course introduces students to the concepts of advanced measurement theory and methods used in research. It acquaints students with cutting-edge models in measurement theory and methods, as well as with the application of computer software used to implement those methodologies. After completing the course, students should be prepared to begin working on advanced applications of measurement in the sociobehavioral sciences. (48-0-3)

PHRP 7204—Research Techniques and Instrumentation
This course will augment the student’s rotation experiences with a broader view of state-of-the-art technologies and instruments used in pharmaceutical sciences research. It will allow the student to read the literature with greater understanding as methodological terminology begins to have more meaning. It is meant to be a broad survey of technologies, not provide a deep background in any specific technology. (48-0-3)

PHRP 7205—Advanced Quantitative Methods
This course exposes students to selected advanced empirical methods useful in social, behavioral, economic, and administrative research and provides them with hands-on experience in conducting empirical research. Within this context, this course covers a variety of topics including linear programming, network models, utility and game theory, panel data methods, instrumental variables methods, and propensity score matching approaches. The course will be presented in an application context. Examples from social, behavioral, economic, and administrative studies will be used to illustrate key ideas and methods. Prerequisites: HPH 7300 and HPH 7310 (48-0-3)

PHRP 7206—Pharmaceutical Formulations
This course features current information on the science and technology involved in drug formulation. Process development is discussed. The course emphasizes formulations development based on physicochemical properties of the therapeutic agent and excipients, including small molecules and polymers, and the mathematical relationships of drug disposition. This course covers the utilization of pharmaceutical principles, such as physicochemical and pharmacokinetic properties of drugs for the design and formulation of conventional pharmaceutical dosage forms such as powders, tablets, capsules, creams, ointments, suppositories, solutions, suspensions, emulsions, sterile products, and biological products that meet the requirements of therapeutic efficacy, stability, and safety. Prerequisites: First-year courses of the Ph.D. program (48-0-3)

PHRP 7207—Secondary Data Analysis of Pharmacy-Related Sources
This course guides the student through the intricacies of utilizing secondary data for research. The emphasis is on utilizing sources of previously collected data that deal with pharmacy-related issues, including administrative, socio-behavioral, and clinical themes. Methodological issues arising from the various analytic approaches (e.g., meta-analysis, case-control analysis, content analysis) will be identified and discussed. (48-0-3)

PHRP 7208—Advanced Pharmacokinetics
This course will explain the model development techniques that can be utilized for complex pharmacodynamic systems. Advanced data analysis techniques and modern pharmacokinetic theory will be discussed. (48-0-3)

PHRP 7209—Pharmacoeconomics
This course provides an overview of pharmacoeconomics and some of the health outcome measurements that apply to health/pharmacy-related disciplines. The course is designed to focus on methodological principles of pharmacoeconomics analyses and the strengths and weaknesses of specific methods. Practical examples for successful implementation of these concepts are discussed. (48-0-3)

PHRP 7211—Theories of Health-Seeking Behavior
This course covers social and behavioral theories related to medication use, health services utilization, provider patient communication, and other health-seeking behaviors. Students will examine and apply select health behavior theories at the individual, interpersonal, and community level. They will examine research conducted using the theories, with emphasis in the pharmacy field. Students are expected to apply theories in defining research questions, in research design, and in data analysis. (48-0-3)

PHRP 7212—Advances in Drug Delivery
This course provides current information on the science and technology of novel drug delivery systems. Particularly, it emphasizes the development and evaluation of controlled and targeted drug delivery systems based on physiochemical properties of the therapeutic agent and polymer and pharmacokinetics. Coverage includes material on the advantages, disadvantages, and limitations of advanced drug delivery over traditional methods. Recent advances in drug delivery will be presented and discussed. (48-0-3)
PHRP 7213—Epidemiology of Drug Use, Abuse, and Misuse
This course is designed to introduce doctoral students to the epidemiology of drug use, misuse, and abuse. The course focuses on drug use, misuse, and abuse as social phenomena and deals with the history of drug use and regulatory attempts in America; pharmacology and use-patterns related to specific drugs; use, abuse, and misuse as medical, psychological, and social concepts; drug importation, manufacture, and distribution (including both the legal and illegal drug industries); perspectives on the etiology of drug use/abuse; drug abuse prevention and educational programs; and approaches to drug abuse treatment. (48-0-3)

PHRP 7214—Industrial Pharmacy and Pharmaceutical Technology
This course provides students with the principles of pharmaceutical processing such as filtration, milling, mixing, drying, and compression of pharmaceutical solids. It also deals with the production and quality control of tablet, capsule, liquid dosage forms, semisolids, and sterile products. Coverage includes the science of packaging materials, production management, quality assurance, and regulations in the pharmaceutical industry—such as validation, good manufacturing practice (GMP), and FDA guidelines for stability of pharmaceutical dosage forms. (48-0-3)

PHRP 7215—Graduate Research
This course will provide the fundamentals of writing research and program grants for funding agencies in the health field. It will include an overview of the different funding sources. The students will be introduced to a wide variety of calls/announcements for applications. They will be provided with multiple hands-on experiences and exercises. They will be expected to write a grant for a research project and for a program in response to a current call for application. (48-0-3)

PHRP 7216—Polymers
This course presents basic concepts and properties of polymers as related to formulation, development, and design of pharmaceutical dosage forms and products. It describes how basic principles of polymers—structural, physical, chemical, and mechanical properties—can be utilized in modifying and developing current and novel pharmaceutical products. Moreover, the course highlights important areas of polymer applications in controlled drug delivery, targeted drug delivery, tissue engineering, nanotechnology, and medical devices. (48-0-3)

PHRP 7220—Advanced Pharmacogenomics and Molecular Medicine
This course is designed to give pharmacy Ph.D. students an in-depth knowledge and understanding of the cellular and molecular bases that have evolved as the basis of human diseases. The course offers state-of-the-art molecular biological concepts to apply toward understanding of molecular bases of individual variation, its application to drug response, and possible new interventions. The students will be able to understand and apply the knowledge of modern molecular biological techniques for diagnostics and detection of infection and gene defects, as well as finger printing, transgenesis, biopharming, immunotherapies, and the ever-developing field of gene therapy and regenerative medicine. (48-0-3)

PHRP 7221—Graduate Research
This research course is designed to provide guidance to students through the complete research process, from formulation of a topic to data collection and analysis to completion of a final report. Students are encouraged to present research findings at appropriate professional conferences. (48-0-3)

PHRP 7222—Applied Pharmacology
This course builds on the Pharmacodynamics Principles and Cardiovascular Pharmacology course, as well as the Molecular and Cellular Pharmacology course. Students will use pharmacology principles to study the effects of therapeutic agents on the central nervous system, the endocrine system, the gastrointestinal system, blood, and blood-forming organs. The course will address the rationale for the use of therapeutic agents; their effects on cells, tissues, organ systems, and patients; the mechanisms underlying these effects; the therapeutic value of specific drug effects; the limitation of the use of the agents; and the adverse effects of drugs. (48-0-3)

PHRP 7224—Elective: Advances in Central Nervous System Pharmacology
This course reviews recent developments in the understanding of select CNS neurotransmitter/neuropeptide receptor systems with particular emphasis on their relevance to the actions of psychopharmacological agents. It focuses on the neuroanatomy, neurophysiology, and pathophysiology of specific neurotransmitter/neuropeptide systems and examines the interaction of these systems in the expression of CNS effects. (48-0-3)

PHRP 7226—Journal Club
This course provides graduate students with an opportunity to critically read, interpret, and present research literature. The audience will be fellow peers, postdoctoral students and faculty members. Students will prepare and present high-quality written and oral critiques of peer-reviewed publications in the biomedical field. This course will help students stay abreast of current knowledge in their, as well as their colleagues, fields of research; develop presentation skills; and promote interdisciplinary interactions. (16-0-1)
PHRP 7228—Principles of Pharmaceutical Analysis
This course explores the fundamentals of pharmaceutical analysis. This includes the principles of pharmaceutical analysis techniques and their applications in pharmaceutical research and development (both academic and industrial). It is crafted to give students a solid conceptual ground to understand how a particular analytical technique works. The course is designed to enable students to critically evaluate instrumentation choices when needed and to select the appropriate tools. (48-0-3)

PHRP 7229—Product Development and Industrial Pharmacy
This course provides the student with the essential information about the various stages of the new drug approval process and drug development, including pre-formulation, comparison studies, suitability of pharmaceutical excipients, and formulation. Additionally, this course provides the student with the principles of pharmaceutical processing, such as filtration, milling, mixing, drying, and compression of pharmaceutical solids. It also deals with the production and quality control of tablets, capsules, liquid dosage forms, semi-solid dosage forms, and sterile products. Coverage includes the science of packaging materials, production management, quality assurance, and regulations in the pharmaceutical industry, including validation, good manufacturing practice, and FDA guidelines for stability of pharmaceutical dosage forms. (64-0-4)

PHRP 7235—Elective: Cardiovascular Risk Factors
This course is designed to provide the student with the background knowledge necessary for the clinical sciences, information related to cardiovascular risk factors, and the foundation from which pharmacists practice pharmaceutical care. The course reviews all major classes of cardiovascular risk factors and discusses evidence-based therapy. The rationale of prevention, lifestyle modifications, and current therapies for the treatment of common and silent cardiovascular risk factors are also addressed. Attention is given to specific clinical studies regarding new strategies to prevent and treat risk factors associated with cardiovascular disease. (48-0-3)

PHRP 7240/7241—Written Comprehensive and Oral Qualifying Exams
This course consists of a series of written and oral exams that are based on the didactic coursework and research that Ph.D. students have been exposed to during their first two years in the program. These exams will be prepared by the faculty members who have taught them thus far. The underlying purpose of this course is to ascertain if the Ph.D. students are suitable candidates to continue in the program. (0-0-0)

PHRP 7245—Principles of Pharmaceutical Analysis
This course explores the fundamentals of pharmaceutical analysis. This includes the principles of pharmaceutical analysis techniques and their applications in the pharmaceutical research and development (both academic and industrial). It is crafted to provide students with a solid conceptual ground to understand how a particular analytical technique works. It is designed to enable students to critically evaluate instrumentation choices when needed and to select the appropriate tools. (48-0-3)

PHRP 7250—Advanced Topics in Pharmaceutical Sciences
This course offers a survey of cutting-edge techniques and discoveries that are germane to the pharmaceutical sciences, particularly in the area of pharmaceutics. (48-0-2)

PHRP 7324/7325/7326/7328/7420/7421/7424/7425/7426/7524/7525/7526—Dissertation Research
This course consists of independent, full-time research on an approved dissertation problem mentored by a major adviser. The research effort will continue until the problem is solved or resolved to the satisfaction of the mentor and the student's dissertation committee. Certification for graduation requires an oral defense of the written dissertation resulting from this research endeavor. (128-0-8)

PHRP 7800—Dissertation Defense
This course will serve as the concluding evaluation for all Ph.D. students. It consists of an oral defense of the dissertation that was written to present the significance, methods, and findings of the dissertation research project. The defense, which is open to the public, requires the student to demonstrate a firm grasp of the research area and to defend the dissertation and its research before the Dissertation Committee. After successful defense, the student becomes eligible for conferral of the Ph.D. degree. (0-0-0)
Student Organizations

Student Government Association (SGA)

Student Government Association (SGA) is the official voice of all students. The organization is open to all students and welcomes proposals and participation from the entire student body. Its responsibilities include collecting and expressing student opinion, dispensing funds for student activities, acting as liaison for the student body, promoting pharmacy, supporting organization and class activities, and working to improve the quality of life for students at the College of Pharmacy.

Other Organizations

Many student organizations addressing various professional and practice-related interests are also open for student membership including:

- Academy of Managed Care Pharmacy (AMCP)
- Alpha Zeta Omega (AZO)
- American Pharmacists Association—Academy of Student Pharmacists (APhA-ASP)
- American Society of Consultant Pharmacists (ASCP)
- Christian Pharmacists Fellowship International (CPFI)
- College of Psychiatric and Neurologic Pharmacists (CPNP)
- Florida Society of Health-System Pharmacists (FSHP)
- International Pharmaceutical Students Federation (IPSF)
- International Society for Pharmacoeconomics and Outcomes Research (ISPOR)
- Jewish Pharmacy Student Organization (JPSO)
- Kappa Psi (ΚΨ)
- National Community Pharmacists Association (NCPA)
- Phi Delta Chi (PDC)
- Phi Lambda Sigma (PLS)
- Rho Chi
- Student College of Clinical Pharmacy (SCCP)
- Student National Pharmaceutical Association (SNPhA)

College of Pharmacy Faculty

Biochemistry

Chair and Professor: R. E. Block | Professors: E. E. Groseclose, K. V. Venkatachalam | Associate Professor: W. G. Campbell

Microbiology

Chair and Professor: K. Davis | Professors: D. Burris, H. E. Laubach | Associate Professor: B. Mayi

Physiology

Chair and Professor: W. Schreier | Professor: Y. Zagvazdin | Assistant Professor: A. Mashukova

Pathology

Chair and Professor: E. Murdock | Professor: B. Jones | Assistant Professor: A. Villa

Pharmaceutical Sciences

Sociobehavioral and Administrative Pharmacy

Pharmacy Practice

Experiential Sites
The following institutions are affiliated with the College of Pharmacy for experiential education.

• 5th Street Pharmacy
  Okeechobee, Florida
• Advocate Lutheran General Hospital
  Parkridge, Illinois
• A.G. Holley State Hospital
  Lantana, Florida
• All-Med Infusion Services
  Miami Lakes, Florida
• All-Med Specialty Pharmacy

College of Pharmacy
College of Optometry
Mission Statement

The mission of the College of Optometry is to educate and train optometric physicians to practice at the highest level of proficiency, integrity, and professionalism and to provide a multidisciplinary environment that encourages and supports scholarship, community service, and lifelong learning.

Administration

David Loshin, O.D., Ph.D., FAAO (Dipl.)
Dean

Josephine Shallo-Hoffmann, Ph.D., FAAO
Associate Dean for Academic Affairs

Michael Bacigalupi, O.D., M.S., FAAO
Assistant Dean for Student Affairs

Linda Rouse, O.D., FAAO
Assistant Dean for Finance and Operations

Barry Frauens, O.D., FAAO
Chair, Clinical Education

Joseph Sowka, O.D., FAAO (Dipl.)
Chair, Didactic Education

Optometry

Sight is one of our most precious gifts and the optometric physician is dedicated to the preservation and enhancement of this gift. The optometric physician, through academic and clinical training, is able to examine, diagnose, treat, and manage disorders and diseases of the visual system and associated structures. Optometry is constantly evolving as a profession to enable optometric physicians to broaden their scope as the primary eye-care practitioner.

The profession of optometry offers many challenges and rewards to those willing to devote themselves to serving others through a lifetime of study and dedication to excellence.

Today’s optometrists practice in urban and rural communities throughout the nation, in individual or group practices, hospital settings, centers for vision research, and in the public health service. They also take part in teaching, research, and public health. Nova Southeastern University College of Optometry stands alone as the only optometric academic institution in the state of Florida.

Furthermore, the college benefits from the integrated multidisciplinary health care programs of the university’s Health Professions Division, represented by optometry, osteopathic medicine, dental medicine, pharmacy, and allied health and nursing. Nova Southeastern University takes pride in the optometry degree program, which provides a strong didactic and clinical education.

Accreditation

The Doctor of Optometry Program at the Nova Southeastern University College of Optometry is fully accredited by The Accreditation Council on Optometric Education (ACOE). The ACOE (243 North Lindbergh Avenue, St. Louis, Missouri; telephone number 800-365-2219) is the accrediting body for professional degree programs offered by all optometric institutions in the United States.

Admissions Requirements

The College of Optometry selects students based on the candidate’s application content, preprofessional academic performance, Optometry Admissions Test (OAT) scores, letters of evaluation, and a personal interview. The requirements are summarized below.

1. Minimum of 90 semester credit hours

Prior to matriculation, applicants must have completed a minimum of 90 semester hours (30 of which must be taken at a four-year institution) of specified coursework at a regionally accredited college or university. Only exceptional candidates for admission will be considered without a Bachelor of Science degree. There is no requirement that a student must have majored in a specific area; however, a background in biological sciences is recommended. The dean is empowered to evaluate the total qualifications of every student and to consider any unusual circumstances.

2. Prerequisite course requirements

The college requires the students to earn a grade of 2.0 or better in each of the following required subjects:

- calculus—3 semester hours
- physics, including laboratory—8 semester hours
- biology, including laboratory—8 semester hours
• general chemistry, including laboratory—8 semester hours
• organic chemistry, including laboratory—4 semester hours
• microbiology—3 semester hours
• biochemistry—3 semester hours
• anatomy/physiology—3 semester hours
• social/behavioral sciences or humanities courses, in any combination—15 semester hours
• English (composition, literature)—6 semester hours

Note: Upon review of a student's individual case, the committee on admissions may require additional coursework and testing as a condition of acceptance.

3. Optometry Admission Test
All applicants are required to submit official Optometry Admission Test scores (must be no more than two years old).

Application Process
The college participates in the Optometry Centralized Application Service (OptomCAS) for the receipt and processing of all applications. OptomCAS takes no part in the selection of students. The Office of Admissions works on a rolling admissions basis. Applications are accepted from July 1 to April 1 via the OptomCAS centralized application service. Entering students are admitted to the program for the fall term only. Each applicant must submit a completed application from OptomCAS, the supplemental application, and a nonrefundable fee of $50. Since applications received early in the application cycle will be given priority consideration, it is in the best interest of the prospective student to complete the applications early.

Listed below are the necessary steps to complete the application process.

The application for admission must be submitted electronically through an interactive, web-based application, which can be accessed at optomcas.org.

This application includes
• completed OptomCAS application
• official transcripts from the registrars of all colleges and universities attended submitted electronically or mailed directly by the college or university
• OAT scores (must be no more than two years old)
• letters of recommendation according to the OptomCAS procedures (may be submitted electronically or mailed directly to OptomCAS)

Upon completion of this centralized application, Nova Southeastern University's College of Optometry requires a secondary application. This application will be sent to the applicant via email upon notification from OptomCAS. The email will contain a link to access the secondary application online.

The applicant should submit the following materials to NSU:
• completed secondary application
• nonrefundable application fee of $50

The deadline date for submitting the secondary application for NSU's College of Optometry is April 1.

Optometry Admission Test
All applicants are required to take the Optometry Admission Test. This online examination evaluates an applicant in the following areas: quantitative reasoning, reading comprehension, biology, general chemistry, physics, and organic chemistry. It can be taken any time by making an appointment with a Prometric Testing Center. Applicants must wait 90 days before repeating test administrations.

Test information is available at
Optometry Admission Test
211 East Chicago Avenue
Chicago, IL 60611
Telephone: 800-232-2678
Website: ada.org/oat

Interview Process
A personal interview is a part of the application process. However, being interviewed is not a guarantee of admission. Upon completion of the applicant's file, a review will be made to determine if the candidate will be granted an interview. Not all applicants will be granted an interview, and only those applicants whose files are complete will be considered. The Office of Admissions will notify selected candidates of the date and time of the interview.

Notice of Acceptance
Notice of acceptance will be on a rolling or periodic schedule. Early completion of the application process is in the best interest of the student.

Reapplicants
If you are reapplying to Nova Southeastern University's College of Optometry, please take time to answer these additional questions. In order to fully consider your application, it will be necessary for you to submit the answers to these questions (on a separate sheet of paper) with your secondary application.

• Why are you interested in reapplying to Nova Southeastern University's College of Optometry?
• What have you been doing since your last application to Nova Southeastern University’s College of Optometry?
• What changes in your application make you a more competitive candidate?

Tuition and Fees
• Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $30,802 for Florida residents and $34,605 for out-of-state residents. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.
• Eligible students must request in-state tuition on their application. For tuition purposes, a student’s Florida residency status (in-state or out-of-state) will be determined at initial matriculation and will remain the same throughout the entire enrollment of the student at NSU. Accordingly, tuition will not be adjusted as a result of any change in residency status after initial enrollment registration.
• Acceptance fee is $250. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be deducted from the first tuition payment, but is not refundable in case of withdrawal. It is payable within two weeks of the applicant’s acceptance.
• Deposit is $750, due April 15, under the same terms as the acceptance fee.
• College laboratory/equipment fee is $50 per year, due at time of registration.

The financial ability of applicants to complete their training is important because of the limited number of positions available. Applicants should have specific plans for financing four years of professional education. This should include provision for tuition, living expenses, books and equipment, travel, and miscellaneous expenses.

Financial Aid
The function of the Student Financial Assistance Program at Nova Southeastern University is to help as many qualified students as possible to complete their optometric education. Various loans, scholarships, and grants are available to qualified students to help ease the high cost of an optometric education. These financial assistance programs are described in a variety of separate university publications.

Undergraduate/O.D. Dual Admission Program
Nova Southeastern University Health Professions Division has established a dual admission program with the NSU Halmos College of Natural Sciences and Oceanography for a select number of highly motivated, qualified students interested in pursuing both undergraduate and professional studies in optometry. This allows students to receive their doctoral degree in optometry in seven years. Students must maintain a 3.0 GPA and achieve acceptable scores on the Optometry Admission Test (OAT). Students will spend three years in the undergraduate school and will be awarded a B.S. degree from the Halmos College upon completion of the first year of professional education at the NSU College of Optometry. Students will receive the O.D. (Doctor of Optometry) degree after four years of training at NSU College of Optometry.

For information and requirements, please contact
Nova Southeastern University
Halmos College of Natural Sciences and Oceanography
Office of Admissions
3301 College Avenue
Fort Lauderdale, Florida 33314-7796

Transfer Students
Circumstances may warrant that a student enrolled in one optometric college seeks to transfer to another institution. Any individual wishing to transfer to Nova Southeastern University College of Optometry must meet the following criteria.

The applicant must
1. complete a formal application (supplemental application) to the NSU College of Optometry Office of Admissions by April 1
2. meet all admissions requirements to NSU College of Optometry, which include submitting official transcripts of all college courses taken, NBEO scores (if taken), and letters of evaluation
3. be in good standing at the transferring institution as documented by a letter from the dean of the transferring institution
4. supply a written statement outlining reasons for request for transfer
5. complete a personal interview

Upon approval of a transfer request, the students will be notified in writing of their standing at NSU and the requirements that they must complete.

Before being permitted to enter clinical rotations at NSU, the transferring student will have to complete and pass the preclinical proficiency examination administered by the NSU College of Optometry.

Decisions on transfer applications are made by the dean’s office. The decision will be based on factors that include, but are not limited to, academic record, circumstances leading to the transfer request, available space, and admissions standards. The College of
Optometry will evaluate such credit and grant that which is appropriate. Send application and documentation to

Nova Southeastern University
Enrollment Processing Services
College of Optometry, Office of Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Promotion, Suspension, Dismissal, and Readmission
The policies for promotion, suspension, dismissal, and readmission are outlined in the College of Optometry Student Handbook, which is revised, updated, and distributed annually to all optometry students.

Requirements for Graduation
In order to be eligible for the degree of Doctor of Optometry, each student shall
1. have satisfactorily completed the program of study required for the degree, including all assignments, as outlined in this catalog
2. have satisfactorily met all financial and library obligations
3. have passed Part I and taken Part II of the National Board Examination (international students can be exempted from taking Part II by the dean of student affairs or his designee), documented by sending a copy of test scores, certified by the NBEO, to the dean or his designee
4. have obtained a baccalaureate degree
Note: Upon the successful completion of the second year of optometric study, the College of Optometry may award a baccalaureate degree to those who do not possess a baccalaureate degree, and who have completed 90 credit hours of undergraduate work.
5. attend in person the commencement program, at which time the degree is conferred

The college reserves the right, and the student, by his or her act of matriculation, concedes to the college the right to require withdrawal at any time the college deems it necessary to safeguard its standards of scholarship, professional behavior, and compliance with regulations or for other reasons as are reasonably appropriate.

Course of Study
The Doctor of Optometry degree is awarded after successful completion of four years of professional study. The didactic focus of the first two years is in the basic sciences, including biochemistry, microbiology, anatomy, physiology, pharmacology, optics, and the vision sciences. Some of the basic science courses are taught in combined classes with other health care students. Concurrently, students initiate the study of general optometric theory and methods; general pathology; and the diagnosis, treatment, and management of binocular vision anomalies and ocular disease in preparation for direct patient care in our primary care clinic.

In the third academic year, students study contact lenses, pediatric, geriatric, and rehabilitative optometry and develop a deeper understanding and ability to diagnose, treat, and manage increasingly complex conditions concerning anomalies of vision development and ocular disease. Additionally, students begin training in the primary care clinic by providing direct patient eye care.

The fourth year of the academic program is entirely clinical with intensive training in university-based or affiliated primary, secondary, and tertiary care facilities. These include clinics dealing with contact lenses, pediatrics, binocular vision, low vision, and geriatric issues. Students also receive training in medical/surgical tertiary care settings. By the completion of the program, our students have been trained to be optometric physicians capable of providing quality eye care.

Extended (Five-Year) Doctor of Optometry Degree
The College of Optometry has instituted an extended program leading to the Doctor of Optometry (O.D.) degree. The extended program is designed for individuals who are returning to school after an absence, are changing professional fields, or who require a lighter course load initially because of family or other obligations. Students in the extended program take courses with the full time students but with a reduced course load. Coursework covered in the first two years of the traditional full-time program is covered in three years in the extended program. The last two years of both programs are identical. The curriculum and graduation requirements for the extended and full-time programs are the same. The enrollment for the extended program is limited. The dean of the College of Optometry will make the final determination on eligibility for the extended program.

Tuition for 2016–2017 (subject to change by the board of trustees) is $24,701 for Florida residents and $27,815 for out-of-state residents for the first three years. Tuition reverts to the regular rate for the fourth and fifth years.

Student Organizations
The College of Optometry Student Government Association (OSGA) is the official voice of all optometry students. The OSGA welcomes input and participation from the entire student body. Its responsibilities include collecting and expressing student opinion, dispensing funds for student activities, acting as liaison for the student body, promoting optometry, supporting club and class activities, and working to improve the quality of life for students at the College of Optometry.
Other Organizations—Many other student organizations addressing various professional and practice-related interests are open for student membership, including the following:

- American Academy of Optometry
- American Optometric Student Association (AOSA)
- Beta Sigma Kappa (BSK)
- Canadian Association of Optometry Students (CAOS)
- College of Optometrists in Vision Development (COVD)
- Fellowship of Christian Optometrists (FCO) International
- Florida Optometric Student Association (FOSA)
- Gold Key International Optometric Honor Society
- National Optometric Student Association (NOSA)
- Nova Optometric Practice Management Association (NOPMA)
- Optometric Student Association for Ocular Disease (OSAOD)
- Student Volunteer Optometric Services to Humanity (VOSH)
- Honors Program

**Master of Science in Clinical Vision Research Graduate Program**

NSU College of Optometry has a two-year, 45-credit, all-online Master of Science in Clinical Vision Research (CVR) program. This program is designed to help optometrists, optometric educators, optometric students, and other professionals enhance their ability to perform clinical research. This innovative program includes curricula leading to a master of science in CVR. The program requirements may be completed at home or a library at times convenient to the student.

**Core Courses**

- CVR 7200—Clinical Research Ethics
- CVR 7300—Fundamentals of Biostatistics
- CVR 7310—Principle of Statistical Inference
- CVR 7400—Clinical Research Design
- CVR 7500—Information Science for Clinical Research
- CVR 7600—Introduction to Research Funding and Proposal Development
- CVR 7700—Presentation, Evaluation, and Publication of Clinical Vision Research
- CVR 7800—Ethical and Legal Issues in Human Subject Research
- CVR 8210—Visual Health and International Development
- CVR 8220—Epidemiology

To be admitted to the Master of Science in Clinical Vision Research program, applicants must have completed one of the following:

- earned a previous clinical (e.g., O.D., D.O., M.D.) or graduate degree
- earned a baccalaureate degree with a minimum grade point average of 3.0
- NSU third-year optometry students who have passed part I of the NBEO

Applicants with coursework taken at institutions outside of the United States must have the coursework evaluated for United States equivalence.

Applicants whose grade point average is below 3.0 must achieve a minimum average score of 1100 on the Graduate Record Examination (GRE). An average score in the 50th percentile or higher on either the OAT or MCAT may be substituted.

Applicants from countries in which English is not the official language are required to submit scores from the Test of English as a Foreign Language (TOEFL) with a score of 79.

For further information regarding the program, call (954) 262-1101 or 877-640-0218 or access our website at optometry.nova.edu/cvr, where an application can be downloaded.

Applications should be sent to

Nova Southeastern University
Enrollment Processing Services
College of Optometry, Graduate Program Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $555 per credit hour.
## Traditional Four-Year Program Curriculum Outline

The curriculum is revised and modified frequently to meet the demands of the profession. These courses are representative of the overall requirements of the program at the time of publication.

**Fourth Year Total Semester Hours: 35.0**

* Successful completion of these courses can lead to a Bachelor of Science degree in Vision Science.

** This course is offered to part of the class each semester.

*** Three-month terms—order of courses will vary. Timing of clinical externships will vary based upon student selections and clinic schedules. This curriculum represents the courses at the time of the printing of this catalog and is subject to change.

+ This course is a service learning course.

* Successful completion of these courses can lead to a Bachelor of Science degree in Vision Science.

** Timing of clinical externships will vary based upon student selections and clinic schedules. This curriculum represents the courses at the time of the printing of this catalog and is subject to change.

+ This course is a service learning course.
College of Optometry Course Descriptions

Note: Listed at the end of each entry are lecture hours, laboratory hours, and semester hours.

Medical Sciences
The following courses listed are taught by College of Medical Sciences faculty members.

OPT 1011—Histology and Embryology
This course presents a general overview of microscopic anatomy with an emphasis on the basic cells and tissues morphology necessary for the understanding of the histology of the eye and surrounding tissues. The microscopic anatomy is correlated with both gross anatomy and physiological processes. This course also serves as a foundation for understanding diseased cells and tissues. Lectures are supplemented with light and electron microscopic projection slides. The slides are used to train students to recognize the tissues by their microscopic appearance. Slide sets are available to students on CDs distributed by the student government. (18-0-1)

OPT 1134—Gross Anatomy: Head and Neck
This course presents the study of the general anatomical and functional features of the major systems of the human body. These include the skeletal system, muscular system, peripheral nervous system, respiratory system, cardiovascular system, digestive system, and urogenital system. In addition, the latter part of the course includes a detailed study of the anatomical and functional features of the head and neck region. (54-36-4)

OPT 1233—Biochemistry
This course will enable the student to describe and understand the biochemical components of the human body and the metabolism of these components. The biochemical basis of ocular functions will be emphasized where appropriate. (54-0-3)

OPT 1323—Microbiology
Microbiology is taught using several approaches. The basic biology of microorganisms is covered followed by a general medical approach to each disease. Special emphasis is placed on taxonomy, physiology, pathogenesis, diagnosis, and treatment. Infectious agents are presented in specific groups: bacteria, viruses, fungi, and parasites, with an emphasis on infections of the eye. (54-0-3)

OPTC 2023—General Neuroanatomy
This course will examine the structural, functional, and developmental features of the human nervous system with reference to different disease states. (36-18-2.5)

OPTC 2144—General Physiology
The purpose of this course is to provide the student with an understanding of the physical and chemical factors and processes responsible for the development, progression, and procreation of life. The course will be presented from an organ systems approach. The areas covered will be basic cellular physiology, skeletal muscle, the cardiovascular system, the nervous system, the renal system, the respiratory system, the gastrointestinal system, and the endocrine system. (72-0-4)

OPTC 3033—General Pathology
The course consists of a study of fundamental concepts of pathology (general pathology) and systemic pathology (consideration of particular organ systems such as cardiovascular diseases, pulmonary diseases, etc.), supplemented by demonstrations and clinicopathological discussions on selected diseases. The emphasis will be given in this course on ocular manifestations of systemic diseases whenever relevant. (54-0-3)

OPTC 3244—General Pharmacology I
This course will provide the student with a thorough understanding of the classes of drugs commonly used in clinical practice. Emphasis will be on the mechanism of action, clinical indications, side effects, important drug interactions, and the basic pharmacokinetics of each drug class. (72-0-4)

OPTC 4022—General Pharmacology II
This course will provide the students with a thorough understanding of the classes of drugs commonly used in clinical settings. Emphasis will be on the mechanism of action, clinical indications, side effects, important drug interactions, and the basic pharmacokinetics of each drug class. (27-0-1.5)

Optometric Basic Sciences

OPT 1443—Theoretical Optics I
The course covers principles of geometric optics, examples, and optometric applications. The major topics are the propagation of light; laws of reflection and refraction; prism; refraction at curved surface; object-image relationship in thin lenses, cylindrical lenses, thick lenses, and lens systems; reflection at plane; and curved surfaces. The emphasis is to use required laws, principals, relationships, and formulas to solve problems. (54-0-3)

OPTL 1443—Theoretical Optics I Lab
The purpose of this course is to learn how to set up an experiment in the area of geometrical optics, the collection and plotting of data, the use of that data in calculations to
OPT 1511*—Psychophysical Methodology
Principles of classical psychophysical methodologies are detailed. These include demonstrations and exercises performed by the students. The fundamentals of signal detection theory and Fourier analysis and spatial vision are introduced in terms of their application to the practice of optometry. (18-0-1)

OPT 1612—Health Systems, Economics, Policy, and Ethics
This course discusses the organization of clinical and public health systems; public health responsibilities for optometrists; health services financing; the health workforce; health policy; licensing and regulation of optometry; ethical issues in optometry; disaster preparedness; abuse reporting and infectious disease control; and current issues in public health optometry. (36-0-2)

OPT 1721—Clinical Optometric Procedures
The course is designed specifically for the extended optometry students during the winter semester of their first year. It includes didactic introduction and clinical application of basic optometric skills such as visual acuity, pupillary distance, extraocular motilities, color vision, stereopsis, case history, noncontact tonometry, autorefration, confrontation visual fields, and hand neutralization. The students are also assigned to clinic observation of the third-or fourth-year students. (18-0-1)

OPT 1724—Optometric Theory and Methods I
This course begins the optometric theory and methods sequence. Topics covered include basic clinical anatomy and optics, visual acuity, case history, refractive conditions, prescription writing, keratometry, retinoscopy, basic biomicroscopy of the anterior segment, and case analysis. Basic color vision, extra ocular motility, and stereo acuity theory and testing are also presented. (36-0-2)

OPTL 1724—Optometric Theory and Methods I Lab
This lab gives the student practical experience with the topics presented in OPT 1724. Students will be performing case history, visual acuity and IPD measurement, keratometry, retinoscopy, noncontact subjective refraction, color vision testing, stereo acuity testing, EOM testing, and basic biomicroscopy of the anterior segment. (18-0-1)

OPT 1831—Contemporary Issues in Optometry
This course will introduce the contemporary issues in optometry, to familiarize future doctors of optometry with the opportunities and challenges ahead. (18-0-1)

OPT 2223*—Theoretical Optics II
This course is a continuation of Theoretical Optics I. The primary emphasis will be given to the wave theory of optics including light and light sources, radiometry and photometry, light absorption, light as waves, interference, diffraction, polarization, aberrations, and image quality of the eye. The emphasis is to use required laws, principals, relationships, and formulas to solve problems. (54-0-3)

OPTL 2223*—Theoretical Optics II Lab
The purpose of this course is to learn how to set up an experiment in the area of physical optics, collect and plot data, use that data in calculations to identify some unknown variables, and write an adequate lab report. There will be application and demonstration of concepts and material presented in the Theoretical Optics II lecture. (0-18-1)

OPT 2323*—Visual Optics
The eye as optical system: optical and physical components of the eye. Schematic eye models, refractive error correction, dioptrics of the eye, stimulus to accommodation, retinal image size and quality, purkinje images, entoptic phenomena, presbyopia, aphakia, intraocular implants, and ocular radiation effects. (36-0-2)

OPT 2422*—Ocular Anatomy
Gross and microscopic anatomy of the eye and adnexa. Relationships between tissues; the vascular supply to the eye; the anatomy of the visual pathway; and the embryonic origin of ocular tissues. Eye dissections teach the functional relations between ocular tissues. (36-0-2)

OPT 2522*—Visual Neurophysiology
Concepts of visual neurophysiology needed to understand normal visual perception, probable source of visual symptoms associated with various eye and CNS disorders, underlying principles of new clinical diagnostic tests for eye and CNS disease, and current neurophysiological research as it relates to the clinical practice of optometry. (36-0-2)

OPT 2622*—Ocular Motility
The aim of this course is to provide an introduction to the ocular motor systems and normal eye movement physiology. The ocular motor systems and the laws relating to it are detailed in terms of normal neurophysiology and neuroanatomy. Information from basic research on eye movements is synthesized to detail normal eye movements and differentiate them from pathology. (36-0-2)

OPT 2724—Optometric Theory and Methods II
This course continues the optometric theory and methods sequence with emphasis on intermediate clinical procedures. Topics covered include tonometry, near refraction and presbyopia, objective and subjective refraction, phorias and vergences, and introductory case analysis. (36-0-2)
OPTL 2724—Optometric Theory and Methods II Lab
Application and skills necessary to perform ocular examinations stressed in OPT 2724. (0-54-1.5)

OPT 3122*—Ocular Physiology
General physiological principles and processes. Typical physiologic function of ocular tissues are discussed and contrasted with the outcomes of abnormal physiology as well as the physiological relationship of ocular tissues and the mechanisms of ocular functions. (36-0-2)

OPT 3344A*—Psychophysics/Monocular Sensory Processes I
This course is a survey of spatial and temporal monocular visual performance, emphasizing perceptual aspects of brightness, contrast sensitivity, spatial and temporal resolution, and flicker. Color vision—both theoretical and practical aspects—are covered in depth. Various testing techniques and frequently encountered abnormalities are discussed in the context of clinical optometric practice. (36-0-2)

OPT 3344B*—Psychophysics/Monocular Sensory Processes II
This course is a continuation of MSP I and includes motion perception and form and pattern recognition. Theories of visual perception are discussed. Normal development, including the emmetropization process, is emphasized. Facial recognition is introduced. The course culminates in a study of art as a way to apply our knowledge of visual sensory processing and perception. (36-0-2)

OPT 3434*—Ophthalmic Optics I
Theoretical and practical aspects of corrective lens design in the optical correction of ametropia: physical and optical characteristics of ophthalmic lens materials, aberrations, specifications of lens powers, ophthalmic prism, lens decentration, and multifocal lens design. Selection of lenses and frames. (54-0-3)

OPTL 4234*—Ophthalmic Optics II Lab
This course offers hands-on training in measuring frame dimensions, pupillary distance, segment height, fitting center height, and vertex distance, as well as fabricating and adjusting spectacles and making simple frame repairs. An introduction to the extensive variety of progressive addition lenses available, and the methods for correcting vertical imbalance, is also provided. (0-36-1)

OPTL 4322*—Introduction to Binocular Vision
Sensory aspects of binocular vision, neurophysiological foundations. Visual direction, the horopter, binocular fusion, rivalry, stereopsis, aniseikonia, motion in depth, binocular visual neurophysiology, normal development of binocular vision, strabismic and anisometropic amblyopia, and normal and anomalous retinal correspondence. Clinical, research-oriented tests and treatments for abnormal binocular visual function. (36-0-2)

OPTL 2724—Optometric Theory and Methods III Lab
This course continues the optometric theory and methods sequence with emphasis on intermediate clinical procedures. Topics covered include binocular indirect ophthalmoscopy, fundus biomicroscopy, gonioscopy, dilation and irrigation, exophthalmometry, and trial frame refraction. This course will allow students to increase clinical case analysis and efficiency, as well as the time spent with electronic medical record keeping. (36-0-2)

OPT 4122*—Ocular Pharmacology
Drugs used in the eye or capable of exerting a pharmacological or toxicological effect on the eye; routes of administration, pathophysiological processes, and treatment regimens. (36-0-2)

OPT 4234*—Ophthalmic Optics II
This course is the second semester of the two-semester ophthalmic optics tract, which explores both the theoretical and practical aspects of corrective lens design. Topics this semester include absorptive lenses and lens coatings, prescribing for anisometropia and aniseikonia, optical principles of low vision devices, optics of contact lenses, and vision in the workplace and protective eyewear. (54-0-3)

OPTL 3624—Optometric Theory and Methods III
Application and skills necessary to perform clinical testing using examination procedures stressed in OPT 3624. (0-54-1.5)

OPT 4122*—Ocular Pharmacology
Drugs used in the eye or capable of exerting a pharmacological or toxicological effect on the eye; routes of administration, pathophysiological processes, and treatment regimens. (36-0-2)

OPTL 4322*—Introduction to Binocular Vision
Sensory aspects of binocular vision, neurophysiological foundations. Visual direction, the horopter, binocular fusion, rivalry, stereopsis, aniseikonia, motion in depth, binocular visual neurophysiology, normal development of binocular vision, strabismic and anisometropic amblyopia, and normal and anomalous retinal correspondence. Clinical, research-oriented tests and treatments for abnormal binocular visual function. (36-0-2)

OPT 4433—Anomalies of Binocular Vision I
The primary goal of this course is to prepare the student, as a primary care optometric physician, to recognize, examine, and properly manage patients with functional ocular motor, accommodative, and vergence disorders. Accommodative and vergence mechanisms, such as lens
prescribing and vision therapy, are also discussed, along with a logical, evidence-based approach to the treatment of non-strabismic binocular vision disorders. (54-0-3)

OPTL 4433—Anomalies of Binocular Vision I Lab
Application of concepts and material presented in Anomalies of Binocular Vision I lecture OPT 4433. (0-36-1)

OPT 4524—Optometric Theory and Methods IV
This course is intended to assist students in the mastery of knowledge needed by a Doctor of Optometry. While this course should help you prepare for future licensing exams, nothing in this course, including the lectures and discussions, coursework, study guides, teaching notes, or other materials, should be believed or understood to use actual confidential exam items from licensing exams. All material in this course has been prepared in good faith to comply with the highest ethical standards of the profession. (36-0-2)

OPTL 4524—Optometric Theory and Methods IV Lab
This course provides practical experience with advanced optometric testing procedures including three-mirror and scleral depression and automated visual fields, as well as trial frame experience. Students will practice with electronic health records and incorporating the techniques of a comprehensive exam into an efficient and complete exam sequence. Practice time for the preclinical proficiency exam will be included. (0-54-1.5)

OPT 4634—Diagnosis and Pharmacological Management of Glaucoma and Vitreoretinal Disease
This course examines the diagnosis and management of diseases of the ocular posterior segment, including glaucoma and diseases of the retina, vitreous, and posterior uvea. The course is weighted 40 percent glaucoma and 60 percent vitreoretinal disease. Emphasis is placed upon the advanced optometric management of these diseases. The role of the optometrist in the therapeutic management of these diseases is maximized to the fullest extent of optometric training. (72-0-4)

OPT 4721—Nutrition in Eye Care
This course will include a basic overview of human nutrition, including macro- and micro-nutrients in the diet. A specific emphasis will be placed on nutrients with respect to ocular health, including the carotenoids; the essential fatty acids omega 3 and 6; vitamins A, C, D, and E, and the B vitamins; zinc, selenium, and other trace elements; and other nutrients known to play a role in ocular disease (coenzyme Q10, alpha lipoic acid, taurine, magnesium, etc.). We will examine nutrition from an evidence-based perspective, using landmark studies as a framework for discussion. Body mass index, glycemic index, and obesity will be discussed as they relate to systemic and ocular disease. (18-0-1)

OPT 4811—Epidemiology
A study of basic principles of epidemiology with emphasis on the epidemiology of vision disorders. Topics include disease models, rates and indices, descriptive and analytic studies, screening concepts, major eye studies, control of infectious disease, investigation of an outbreak, epidemiology of vision disorders, and the use of epidemiology in clinical decision making. (18-0-1)

OPT 4951A—Community Outreach I
This course discusses the social and behavioral determinants of health and disease; population trends and emerging needs; cultural aspects in eye care; health promotion, education, and prevention; and community program planning, monitoring, evaluation, and theory of screening. (18-0-1)

OPT 4951B—Community Outreach II
This course is a continuation of OPT 4951A. The following topics are covered: social and behavioral determinants of health and disease, population trends and emerging needs, cultural aspects in eye care, health promotion, health education, prevention, community program planning, monitoring, and evaluation. (18-0-1)

OPT 5022—Anomalies of Binocular Vision II
Etiology and visual effects of strabismus and amblyopia. Covers testing, analysis; diagnosis; management of strabismus and amblyopia; and use of lenses, prisms, and vision therapy to ameliorate strabismus and amblyopia. (36-0-2)

OPTL 5022—Anomalies of Binocular Vision II Lab
Application of concepts and material presented in Anomalies of Binocular Vision II lecture OPT 5022. (0-36-1)

OPT 5122—Contact Lenses I
The primary goal of this course is to provide an introduction to contact lens evaluation and fitting with emphasis on clinical experiences encountered in a primary care optometric practice. A laboratory is an integral adjunct to the course. Refractive surgery alternatives will supplement the curriculum. (36-0-2)

OPTL 5122—Contact Lenses I Lab
Training will be provided in prescription assessment (autorefractor), corneal testing (autokeratometry, topography, and pachymetry), hydrogel (HG) contact lens (CL) care, insertion and removal of HG CLs, evaluation of spherical and toric HG CLs on the eye, the use of specialty HG CLs, and verification of gas permeable (GP) CLs. (0-36-1)
OPT 5233—Ocular and Systemic Eye Disease: Diagnostic, Medical, and Pharmacological Management
This course covers systemic diseases that may present with ocular findings, including key systemic clinical manifestations. Physical presentation, laboratory and imaging evaluation, spectrum of treatment modalities (including ocular and systemic pharmacologic treatment and nutritional supplementation), and interdisciplinary management are covered in detail. (54-0-3)

OPT 5322—Clinical Medicine: Diagnosis and Pharmacologic Management of Systemic Diseases
This course presents an overview of systemic disorders that are pertinent to the practice of clinical optometry. Attention is given to those medical conditions that are commonly encountered in optometric practice—those that may present with ocular manifestations and those that are of significant importance to medicine in general. Lectures are delivered, where possible, by board-certified specialists or other recognized experts in the different medical subspecialties. Discussions strive to focus on the pathophysiology, presenting signs and symptoms, diagnostic testing, and general management of the various clinical entities. (36-0-2)

OPTL 5322—Physical Diagnosis Laboratory: Testing, Pharmacologic Aspects, and Injection Techniques
Physical Diagnosis Laboratory will offer a hands-on experience in many of the diagnostic techniques employed in the work-up of systemic conditions. There will be an emphasis on those conditions that can present in the primary eye care setting. These will include the physical exam, neurological screening, and in-office lab tests. Injection procedures and anaphylaxis management will also be covered. (0-18-0.5)

OPT 5411—Clinical Gerontology
Discusses aging from sociological, psychological, and biophysical perspectives; reviews diagnosis, management of visual conditions, ocular diseases of older adults, and role of optometrists as members of multidisciplinary health care team providing services to community-based, institutionalized geriatric patients. (18-0-1)

OPT 6122—Contact Lenses II
Advanced lens applications in specialty cornea and contact lens practice. Options for presbyopia, astigmatism, anterior segment disease, myopia, corneal thinning disorders, keratoconus, and corneal surgery. (36-0-2)

OPTL 6122—Contact Lenses II Lab
Training will be provided in GP CL care, insertion, and removal of corneal and mini-scleral GP CLs; evaluation of spherical GP CLs on the eye; verification of toric GP CLs; and modification of GP CLs. (0-36-1)

OPT 6233—Neuro-Eye Disease: Diagnostic, Medical, and Pharmacological Management
This course covers the diagnosis, management, and treatment of ocular abnormalities seen in patients with neurological disease. Clinical diagnostic imaging studies—including nuclear magnetic imaging, computerized tomography, and vascular ultrasonography—are presented for both ocular and central nervous system neuropathology. Clinical work-up, surgical referral indications, and systemic/ocular pharmaceutical treatment are covered in detail. (54-0-3)

OPT 6322—Rehabilitative Optometry: Low Vision
This course will present low vision topics, including etiology, demographics, case history, acuity measurement, magnification, magnifiers, telescopes, psychosocial implications, functional testing, functional implications, technology, and driving implications. Lectures, laboratories, and assigned reading will be used to explore an interdisciplinary approach to low vision rehabilitation, including the role of the optometrist in examination, prescribing, fitting, and training of low vision devices, as well as the role of many other professionals and resources. (36-0-2)

OPTL 6322—Rehabilitative Optometry: Low Vision Lab
Application and demonstration of concepts and material presented in Rehabilitative Optometry lecture OPT 6322. (0-36-1)

OPT 6522—Practice Management
This course provides the student with an introduction to basic business concepts and the application of these concepts to optometric practice management. Topics covered include accounting, finance, marketing, management, human resources, operations management, business law, practice valuation and purchase, practice start up, and financial planning. Students will also learn the value of networking and how to create a resume and cover letter. (36-0-2)

OPT 6633—Pediatric Optometry and Learning-Related Vision Problems
An introduction to the theory and methods of examining, diagnosing, and managing children and individuals suffering from learning-related vision problems. (54-0-3)

OPTL 6633—Pediatric Optometry and Optometric Management of Learning-Related Vision Problems
This lab course includes infant, toddler, and preschool optometric examinations; developmental testing; computerized oculomotor diagnostic testing; visual perceptual testing; visual perceptual assessment; and management. (0-18-0.5)
OPT 9997—Special Care Clinic Elective
This course deals with patient examinations in an advanced ophthalmic care setting under the supervision of appropriately credentialed faculty members. Clinical care is delivered in either the glaucoma service or diabetes and macular disease service with subsequent discussion of pathophysiology, differential diagnoses, and patient-appropriate management. Integration of didactic knowledge with clinical care is emphasized. (0-8-1)

OPT 9998—Board Review
(18-0-1)

Optometry Clinical Education

OPT 7111—Primary Care Clinic I
Patient examinations in a primary care setting under supervision of residents, faculty members: refractive conditions, visual system disorders. Grand rounds, journal reviews, case reports, and advanced ophthalmic techniques. Also included in this course is a review and discussion of patient data leading to proper clinical diagnosis and patient management. Emphasizes integration of knowledge gained in didactic courses with clinical examples. (0-80-2.5)

OPT 7112—Clinic Conference
Adjunct to Primary Care Clinic I. Review and discussion of patient data leading to proper clinical diagnosis and patient management. Lectures and small group discussions emphasize integration of knowledge gained in didactic courses with clinical case examples. (10-0-1)

OPT 7122—Primary Care Clinic II
Continuation of Primary Care Clinic I. (0-144-2.5)

OPT 7132—Primary Care Clinic III
This course provides experience in a clinical setting for students, under the direct supervision of certified optometric physicians, to evaluate and manage the vision disorders and ocular health conditions of patients. This includes refractive, binocular, ocular health, and visual pathway conditions. In addition, the student will learn to apply appropriate management and treatment protocols. (0-144-2.5)

OPT 7146—Primary Care Clinical Externship
The clinical program provides direct patient-care experience in primary care optometric practice with an emphasis on primary care under the supervision of clinical preceptors. Assignments related to independent learning will further contribute to the students’ learning. (0-320-5.5)

OPT 7151—Optical Services Rotation I
In this introductory rotation in the clinic’s optical service, the third-year student begins to apply ophthalmic dispensing procedures learned during the second year Ophthalmic Optics lecture and laboratory to the day-to-day workings of the optical. The purpose of the student’s presence in the optical is to expand and reinforce his or her knowledge of ophthalmic optics and its application and significance in patient care. (0-24-0.5)

OPT 7161—Optical Rotation II
This second optical rotation allows the third-year student to apply a greater scope of learned ophthalmic dispensing procedures to the day-to-day workings of the optical. The purpose of this rotation is to reinforce the knowledge of ophthalmic optics and its application and significance in patient care. (0-36-0.5)

OPT 7162—Seminars in Laser and Surgical Ophthalmic Care
This course is a series of learning modules encompassing surgical and laser procedures of the ocular adnexa, anterior segment, and posterior segment of the eye. Patient selection and preparation, preoperative care, and postoperative care will be emphasized. Surgical techniques, procedures, complications, and expected outcomes will be presented by experts in each respective area. (18-0-1)

OPT 7171—Optical Rotation III
This third rotation in the clinic’s optical dispensary, the third-year student continues to apply his or her learned ophthalmic dispensing procedures to the day-to-day workings of the optical, building on the experience of the previous semesters and working more independently. Additionally, practice management concepts are introduced. The purpose of this rotation is to expand and enhance the student’s knowledge of ophthalmic optics and its application in patient care by meeting the visual needs of patients. (0-36-0.5)

OPT 7214—Cornea and Contact Lens Externship
The clinical program provides experience in cornea and contact lens patient care and practice management and emphasizes the use of special tests, procedures, and scholarly activities relevant to this specialty. (0-240-4)

OPT 7224—Pediatric and Binocular Vision Externship
This clinical program provides exposure to pediatric optometry and binocular vision patient care with emphasis on diagnosis and treatment of functional vision disorders. It includes administration of specialty test procedures and vision therapy for the enhancement of functional skills. (0-240-4)

OPT 7233—Vision Rehabilitation and Geriatrics Externship
Low vision rehabilitation and geriatric vision care in traditional and educational settings for the visually impaired. Exposure to vision-enhancing devices. (0-160-2.5)
OPT 7308—Medical/Surgical Clinical Externship
Diagnosis, management, and treatment of patients in a medical/surgical setting. Pre- and post-operative care, evaluation and comanagement of patients with systemic health anomalies and medical conditions such as glaucoma. Observation of medical eye care. (0-480-8)

OPT 7408—Clinical Elective Rotation
An opportunity for the student to gain additional clinic experience from a choice of primary care, secondary care, or tertiary care clinic sites. (0-480-8)

OPT 7501—Current Topics in Practice Management
Explore current practice options in optometry including: starting from scratch, purchasing a practice, or joining a practice. Learn the proper techniques for successful coding and billing in today's managed care economy. Understand the importance of patient communication, networking, community involvement, and third party participation. Analyze today's market and the student's personal financial goals to develop a plan for successful practice. (18-0-1)

OPT 9991—High-Performance Vision/Sport Vision (elective)
As declining reimbursements and Internet vendors continue to chip away at the traditional profit centers for optometrists, many O.D.s are looking for ways to remain competitive. Specialized services have attracted the attention of many practices looking to differentiate themselves. As a future practicing optometrist, if you have a passion for providing the very best in vision care services to athletes and others who require excellence in their hobbies, recreational activities, or careers (e.g., law enforcement, aviation, dance, etc.), helping these patients enhance their vision and improve their visual-cognitive-motor performance abilities can be a rewarding and profitable niche. This course will present 14 hours of “nuts and bolts” training in testing procedures, equipment, needs, training procedures, marketing and public relations, specialty contact lenses, eye injuries and ocular first aid, concussion, fees, and the multidisciplinary approach to working with these exciting and challenging patients. (18-0-1)

*Successful completion of these courses can lead to a Bachelor of Science degree in Vision Science.
College of Health Care Sciences
College of Health Care Sciences

Vision
The College of Health Care Sciences will be recognized as a local, national, and international leader in health-care education through excellence and innovation in teaching, scholarship, and service.

Mission
The College of Health Care Sciences strives to provide professionals with the skills necessary for the diagnosis, treatment, and prevention of disease and disability in order to assure optimum health conditions in the community and beyond. With an unwavering commitment to ethical practice and in support of the Nova Southeastern University Core Values, the college endeavors to advance research, scholarship, and the development of leadership skills utilizing traditional educational methods, distance learning, and innovative combinations of both to achieve its educational goals.

Administration
Stanley Wilson, Ed.D., PT, CEAS
Dean

Peter Taylor, Ph.D.
Associate Dean, Academic Affairs

Director, Doctor of Health Science Program

C. Richard Finley, Ed.D., PA-C, DFAAPA
Program Director, Physician Assistant—Fort Lauderdale

Jorge Han, M.D., RVT, RDMS, RDMS
Director, Bachelor of Science—Medical Sonography—Fort Lauderdale
College of Health Care Sciences Programs

The College of Health Care Sciences is committed to providing the highest quality education to students in a variety of health care disciplines. The college offers the following programs and degree options:

**Department of Anesthesia**
- Anesthesiology Assistant, M.S., Fort Lauderdale
- Anesthesiology Assistant, M.S., Tampa

**Department of Audiology**
- Audiology, Au.D., Fort Lauderdale
- Audiology, Au.D., United Kingdom

**Department of Cardiopulmonary Sciences**
- Respiratory Therapy, Postprofessional B.S.R.T., Online Program
- Respiratory Therapy, First-Professional B.S.R.T.

**Department of Health and Human Performance**
- Athletic Training, B.S.
- Exercise and Sport Science, B.S.

**Department of Health Sciences**
- Cardiovascular Sonography, B.S., Tampa
- Medical Sonography, B.S., Fort Lauderdale
- Health Science, B.H.Sc.
- Health Science, M.H.Sc.
- Health Science, D.H.Sc.
- Health Science, M.H.Sc./D.H.Sc. Dual Degree
- Health Science, Ph.D.

**Department of Occupational Therapy**
- Occupational Therapy, M.O.T.
- Occupational Therapy, O.T.D., Tampa
- Occupational Therapy, Dr.O.T.
- Occupational Therapy, Ph.D.

**Department of Physical Therapy**
- Entry-Level D.P.T., Fort Lauderdale
- Entry-Level D.P.T., Tampa
- Hybrid Entry-Level D.P.T., Tampa
- Physical Therapy T-D.P.T.
- Physical Therapy, Ph.D.

**Department of Physician Assistant**
- Physician Assistant, Fort Lauderdale
- Physician Assistant, Fort Myers
- Physician Assistant, Jacksonville
- Physician Assistant, Orlando

**Department Speech Language Pathology**
- Speech-Language and Communication Disorders, B.S., Fort Lauderdale
- Speech-Language Pathology, M.S., Fort Lauderdale
- Speech-Language Pathology, SLP.D., Fort Lauderdale

Rachel Williams, Ph.D.  
Coordinator, Speech-Language Pathology, SLP.D. Program
Expenses and Financial Aid

Students should anticipate spending approximately $3,000 for books and $19,000 per academic year for living expenses. The primary financial responsibility for a student’s education rests with the student and his or her family, but economic circumstances for some families may make it necessary for the student to obtain assistance from other sources. The purpose of the Student Financial Assistance Program at Nova Southeastern University is to help as many qualified students as possible to complete their health professions education. Various loans, scholarships, and grants are available to qualified students to help ease the high cost of a health professions education. These assistance programs are described in a variety of separate university publications. The demands of these programs limit the number of hours a student can work at an outside job. During the months of clinical rotations, it is difficult or impossible for the students to work.

Transfer Credits

Any students wishing to transfer from another university into a College of Health Care Sciences program must provide the following:

• official transcripts from all colleges or universities previously attended, sent directly to Nova Southeastern University College of Health Care Sciences Office of Admissions

• a letter of recommendation to the department chair or program director of the program in which the applicant is currently enrolled

Transfer credits, if awarded, will be given pending transcript evaluation and for courses that are directly applicable to courses outlined in the curriculum of the allied health department or program in which the student is applying. All transfer credit decisions will be made at the discretion of the department chair or program director.

Promotion, Suspension, Dismissal, and Readmission

The policies for promotion, suspension, dismissal, and readmission are outlined in the College of Health Care Sciences Student Handbook, which is revised, updated, and distributed annually to all students.

Department of Anesthesia

Master of Science in Anesthesia—Fort Lauderdale

Anesthesiologist Assistants (AAs), also known as anesthetists, are highly educated and skilled allied health professionals who work under the supervision of physician anesthesiologists to develop and implement anesthesia care plans. AAs work exclusively within the anesthesia care team environment as described by the American Society of Anesthesiologists (ASA). AAs possess a premedical background and a baccalaureate degree, and also complete a comprehensive didactic and clinical program at the graduate level. AAs are trained extensively in the delivery and maintenance of quality anesthesia care as well as advanced patient monitoring techniques. The goal of AA education is to nurture the transformation of qualified student applicants into competent health care practitioners who aspire to practice in the anesthesia care team.

The 27-month AA course of study consists of an intensive academic and didactic program that will prepare the student to function within the anesthesia care team. The students will get an extensive clinical training experience that will consist of a minimum of 2,000 clinical hours that encompass all aspects of anesthesia care for the surgical patient. Upon completion of the course of study, students will have earned a Master of Science (M.S.) in Anesthesia degree from NSU.

Students are trained in state-of-the-art AA facilities. Our classroom features high-definition technology—providing crisp visual presentation of course materials—and video recording capabilities, which allow students to review course lectures. The student’s educational experience is enhanced by two of the largest fully functional operating rooms. The NSU AA programs are the only ones in the country to have four high-fidelity anesthesia simulators (two adult, one pediatric, and one infant). A student library, lounge, and study center area complete the AA facilities.

The first year of study focuses on the foundations of anesthesia practice through classroom, mock operating room scenarios and studies, and laboratory work. Clinical experience during the first year will increase as the year
progresses. The senior year (semesters 5, 6, and 7) will consist of clinical rotations assigned in two-week and four-week intervals. During the senior year, clinical rotations are full time and involve all specialty areas in anesthesia, including general surgery, pediatrics, obstetrics and gynecology, otolaryngology, orthopedics, neurosurgery, ophthalmology, genito-urinary surgery, vascular surgery, cardiac surgery, thoracic surgery, transplantation, and trauma. Clinical rotations include days, evenings, nights, weekends, and on-call—depending upon the rotation.

Nova Southeastern University’s Master of Science in Anesthesia program will prepare the student for the national certification exam administered by the National Board of Medical Examiners under the auspices of the National Commission for the Certification of Anesthesiologist Assistants. The certification process involves successfully completing the Certifying Examination for Anesthesiologist Assistants for initial certification, registration of continuing medical education credits every two years, and successful completion of the Examination for Continued Demonstration of Qualifications every six years.

Accreditation
The Master of Science in Anesthesia program at NSU is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP: 25400 U.S. Highway 19 North, Suite 158, Clearwater, Florida 33763, 727-210-2350).

Mission
The mission of the M.S. in Anesthesia is to prepare students for lifelong learning and leadership roles that will benefit the health care community. The educational process will be committed to training and educating competent anesthetists who will embrace the anesthesia care team to provide safe, quality, and compassionate anesthesia care for all degrees of illness for the surgical patient.

Vision
The M.S. in Anesthesia at Nova Southeastern University will provide state-of-the-art educational facilities and environment, which will allow anesthesiologist assistant students to cultivate into health care providers who are driven by compassion and guided by science to provide the best and safest patient care. It will be locally, nationally, and internationally recognized as an authority and primary source for anesthesiologist assistant information and services related to promoting the practice of delivering safe and quality anesthesia as a member of the anesthesia care team. The faculty members and students will be recognized as leaders within the profession through our collective service to the American Academy of Anesthesiologist Assistants (AAAA) and other professional organizations.

The Master of Science in Anesthesia program is dedicated to developing a well-rounded practicing AA. The faculty and current students are dedicated to the following program objectives:

- develop vigilant, knowledgeable, skilled, and compassionate anesthesia care providers who are capable of functioning within the anesthesia care team model in the delivery of all perioperative anesthesia services
- inspire and prepare the future leaders in our profession for service in local, state, and national organizations that shall advance the utilization and practice of anesthesiologist assistants
- advance anesthesiologist assistant education through the application of state-of-the-art technology and evidence-based learning practices that continue to support our student learning objectives
- develop highly skilled, interdisciplinary, and culturally sensitive faculty members who model professionalism and exemplify ethical practice, effective communication, and organizational leadership
- support the mission and goals of Nova Southeastern University—including our department, college, and division—in the provision of scholarship, service, teaching, and patient care

Admissions Requirements
Prospective Master of Science in Anesthesia students are selected by the Committee on Admissions (COA), which considers the overall qualities of the applicant. Areas of consideration include interpersonal skills, personal motivation, knowledge and understanding of the AA profession and the anesthesia care team, academic performance and level of achievement, life experiences, and recommendations. Personal interviews are offered to the most qualified applicants to assess interpersonal and communication skills, altruistic attitude, maturity, and commitment to the AA profession and anesthesia care team model.

Other requirements include
1. baccalaureate degree from a nationally recognized and regionally accredited college or university, including above average performance in courses required in a premed curriculum (refer to the following required courses)

Required Courses
- General biology with lab or Anatomy and physiology with lab (two semesters)
- General chemistry with lab (two semesters)
- Organic chemistry with lab (one semester)
- Biochemistry (one semester)
- General physics with lab (two semesters)
• Calculus (one semester)
• English composition (one semester)

Preferred Courses—Not Required
• Anatomy with lab (one semester)
• Physiology (one semester)
• Organic chemistry (a second semester)
• Microbiology* (one semester)
• Cell and molecular biology* (one semester)

One semester is equal to 1.5 quarter hours.

Note: A grade of 2.0 (C) or better is required in all prerequisite classes.

*An advanced course in Microbiology or Cellular and Molecular Biology is preferred and would meet one semester of the General Biology requirement.

2. official transcripts of all undergraduate and graduate coursework

3. a minimum cumulative GPA of 2.75 on a 4.0 grading scale; minimum GPA of 3.0 preferred

4. Graduate Record Examination (GRE) or Medical College Admissions Test (MCAT) scores (taken within the past five years) taken early enough for official scores to be received by admissions office by the supplemental application due date of February 15

The NSU code number is 5522. GRE information can be obtained from gre.org. Information for the MCAT is at aamc.org/students/mcat.

5. three letters of recommendation from people familiar with applicant's prior academic performance, potential, character, work habits, and suitability for graduate study leading into a career in clinical practice

6. at least eight hours of documented anesthesia exposure by observation in the operating room

7. summary of an article published in a current anesthesia journal

The applicant who has graduated from a college or university in a country where English is not the primary language, regardless of United States residency status, must have a Test of English as a Foreign Language (TOEFL) score of 600 or higher for the written test (or equivalent score for the computer-based test), an International English Language Testing System (IELTS) score of 6.0, or a Pearson Test of English—Academic (PTE—A) score of 54. An official set of scores must be sent to Nova Southeastern University directly from the Educational Testing Service in Princeton, New Jersey.

Computer Requirements
All students are required to have a computer with the following minimum specifications:

• Pentium or AMD at 1.00 GHz or equivalent Macintosh processor
• 2 GB RAM
• video and monitor capable of 1024 x 768 resolution or better
• full duplex sound card and speakers
• high-speed wireless Internet connection with Internet service provider
• Windows XP or NT or MAC OS
• Microsoft Office 2000 with PowerPoint, Word, and Excel minimum
• printer capability

Application Procedures
Applicants for admission must submit to EPS, or be responsible for submission of

1. a completed application form, along with a $50, nonrefundable application fee, accepted July 15 to March 15

2. A completed online admissions application

The Master of Science in Anesthesia program has partnered with CASAA, the Central Application Service for Anesthesiologist Assistants. To apply, visit our page on the CASAA website, casaa.liaisoncas.com.

3. three evaluation forms—supplied in the application package or by request—from supervisors or colleagues, clinical or non-clinical

4. official transcripts sent directly from all previously attended undergraduate, professional, and graduate institutions

5. all coursework from international institution(s), if applicant attended or is a graduate of any international institution(s)

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed following.

• World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

College of Health Care Sciences—Department of Anesthesia
It is the applicant's responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Health Care Sciences, Department of Anesthesia Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

6. complete resume or curriculum vitae
7. copies of national and professional certifications or licenses by a recognized certifying body (if applicable)
8. summary of an article published in a current anesthesia journal (form supplied in application package)
9. evidence of eight hours documented anesthesia exposure (form supplied in application packet)

The Committee on Admissions will not consider an application until all required fees, credentials, transcripts, and evaluations have been received by the EFS.

Personal Interviews
Once your application is complete, the Committee on Admissions will decide whether or not your application is strong enough to warrant an invitation for a personal interview. Interviews are conducted at the Nova Southeastern University main location and are by invitation only. Interviews will be held from November through March. An invitation to interview is not a guarantee of admission. Notice of acceptance or action by the committee on admissions will be on a rolling or periodic schedule; therefore early completion of the application is in the best interest of the student.

Tuition and Fees
Tuition for 2016–2017 (subject to change by the board of trustees without notice): $41,200. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.

1. Acceptance Fee—$500. This fee is required to reserve the accepted applicant’s place in the entering firstyear class, but is not refundable in the event of a withdrawal. It is payable within two weeks of an applicant’s acceptance.
2. Deposit—$250. This is due February 15, under the same terms as the Acceptance Fee.
3. Preregistration Fee—$250. This is due April 15, under the same terms as the Acceptance Fee.

The first semester's tuition and fees, less the $1,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met. The financial ability of applicants to complete their training at the college is important because of the limited number of positions available in each class. Applicants should have specific plans for financing 27 months of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses. Each student is required to carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

4. Anesthesiologist Assistant Clinic Support Charge—$475/semester.

Requirements for Graduation
In order to be eligible to graduate with the Master of Science in Anesthesia degree, students must

• successfully complete all academic and clinical courses and degree requirements
• satisfactorily meet all financial and library obligations
• attend in person the commencement program at which the degree is conferred
M.S. in Anesthesia—Fort Lauderdale Curriculum

Start Date: June
Length: 27 months
Degree: Master of Science in Anesthesia
Total Credit Hours: 105
Total Clinical Hours: 2,000

All courses with the MHS prefix (except MHS 5103) will be taken online.

Curriculum is subject to change as directed by the department.
M.S. in Anesthesia—Fort Lauderdale Course Descriptions

ANES 5001—Clinical Anesthesia I
Developmental skills and foundations of the clinical practice of anesthesia are gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Participation and responsibilities increase through the year as knowledge and skills develop. (3 credits)

ANES 5002—Clinical Anesthesia II
This course is a continuation of ANES 5001. Developmental skills and foundations of the clinical practice of anesthesia are gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Participation and responsibilities increase through the year as knowledge and skills develop. (3 credits)

ANES 5621—Principle of Airway Management I
This course will provide an opportunity to learn and appreciate structure, function, pathophysiology, disease, and management of the human airway. The basic and advanced principles of elective and emergent airway management, including equipment and techniques, will be covered. Examination, recognition, techniques, and management involved in pediatric and adult difficult airways will be discussed. Course will correlate with laboratory work for a better understanding and use of bag/mask ventilation, oral and nasal airways, oral and nasal intubation techniques, lightwands, fiberoptic intubations, double lumen tubes, surgical airways, and application of laryngeal mask airway. (2 credits)

ANES 5622—Principle of Airway Management II
This course is a continuation of ANES 5621. This course will provide an opportunity to learn and appreciate structure, function, pathophysiology, disease, and management of the human airway. The basic and advanced principles of elective and emergent airway management, including equipment and techniques, will be covered. Examination, recognition, techniques, and management involved in pediatric and adult difficult airways will be discussed. Course will correlate with laboratory work for a better understanding and use of bag/mask ventilation, oral and nasal airways, oral and nasal intubation techniques, lightwands, fiberoptic intubations, double lumen tubes, surgical airways, and application of laryngeal mask airway. (2 credits)

ANES 5048—Medical Terminology
This is a self-study, online course. Use of medical language for appropriate and accurate communication in patient care. Course includes terminology and symbols, word formation, body systems and disease terms, abbreviations, and procedures. (1 credit)

ANES 5081—Introduction to Clinical Anesthesia
Prepares and educates the student to work within the anesthesia care team. Introduction to induction, maintenance, and emergence from anesthesia. Includes history of anesthesia, types of anesthesia, universal precautions and infection control, layout of the operating room, sterile fields and techniques, interacting with patients, starting intravenous catheters and arterial cannulae, obtaining arterial blood samples, and application of ASA-standard monitors. Students will use an anesthesia simulator to gain the basic knowledge and usage of monitors. (2 credits)

ANES 5301—Anesthesia Laboratory I
A state-of-the-art laboratory and anesthesia simulator will prepare the student for the usage and complete understanding of the monitors and practice of anesthesia. Students will apply their didactic knowledge to scenarios on the anesthesia simulator. Patient modalities—such as pulse oximetry, capnography, and blood pressure monitoring systems—are explored. Laboratory experiments will develop students’ understanding of anesthesia delivery systems, various types of breathing circuits, fresh gas flow effect, theory of dilutional methods of cardiac output monitoring, and relations between mean circulatory filling pressures and central venous pressure. A vascular sonography lab will allow a unique and comprehensive understanding of transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (3 credits)

ANES 5302—Anesthesia Laboratory II
This course is a continuation of ANES 5301. A state-of-the-art laboratory and anesthesia simulator will prepare the student for the usage and complete understanding of the monitors and practice of anesthesia. Students will apply their didactic knowledge to scenarios on the anesthesia simulator. Patient modalities—such as pulse oximetry, capnography, and blood pressure monitoring systems—are explored. Laboratory experiments will develop students’ understanding of anesthesia delivery systems, various types of breathing circuits, fresh gas flow effect, theory of dilutional methods of cardiac output monitoring, and relations between mean circulatory filling pressures and central venous pressure. A vascular sonography lab will allow a unique and comprehensive understanding of transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (3 credits)
ANES 5303—Anesthesia Laboratory III
This course is a continuation of ANES 5302. A state-of-the-art laboratory and anesthesia simulator will prepare the student for the usage and complete understanding of the monitors and practice of anesthesia. Students will apply their didactic knowledge to scenarios on the anesthesia simulator. Patient modalities—such as pulse oximetry, capnography, and blood pressure monitoring systems—are explored. Laboratory experiments will develop students' understanding of anesthesia delivery systems, various types of breathing circuits, fresh gas flow effect, theory of dilutional methods of cardiac output monitoring, and relations between mean circulatory filling pressures and central venous pressure. A vascular sonography lab will allow a unique and comprehensive understanding of transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (3 credits)

ANES 5304—Anesthesia Laboratory IV
This course is a continuation of ANES 5303. A state-of-the-art laboratory and anesthesia simulator will prepare the student for the usage and complete understanding of the monitors and practice of anesthesia. Students will apply their didactic knowledge to scenarios on the anesthesia simulator. Patient modalities—such as pulse oximetry, capnography, and blood pressure monitoring systems—are explored. Laboratory experiments will develop students' understanding of anesthesia delivery systems, various types of breathing circuits, fresh gas flow effect, theory of dilutional methods of cardiac output monitoring, and relations between mean circulatory filling pressures and central venous pressure. A vascular sonography lab will allow a unique and comprehensive understanding of transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (3 credits)

ANES 5328—ECG for Anesthesiologist Assistants
This course presents a comprehensive approach to perioperative emergency and advanced cardiac life support, including monitoring, interpretation, and management of pathologic conditions affecting the circulatory and pulmonary systems. Relevant anatomy, physiology, neurophysiology, pharmacology, and medical equipment will be included. Emphasis is placed on rhythm strip analysis and evidenced-based perioperative applications. (3 credits)

PHS 5400—Physiology
Clinically relevant physiologic principles of the major organ systems covered in Anatomy. Pathological changes that occur in the human physiology in the disease process. (3 credits)

ANA 5420—Anatomy
Gross structures of the human body. Integrates topographic and radiographic anatomy to stress the application and importance of clinical anatomy. Develops the knowledge of the human anatomy necessary for the practice of the profession. (5 credits)

ANES 5462—Pharmacology for Anesthesia I
Emphasizes drugs specifically related to the practice of anesthesia, including inhaled anesthetics, opioids, barbiturates, benzodiazepines, anticholinesterases and anticholinergics, neuromuscular blockers, adrenergic agonists and antagonists, nonsteroidal anti-inflammatory drugs, antidyshyrmatics, calcium channel blockers, diuretics, anticoagulants, antihistamnines, and antimicrobials. (2 credits)

ANES 5463—Pharmacology for Anesthesia II
This course is a continuation of ANES 5462. Emphasizes drugs specifically related to the practice of anesthesia, including inhaled anesthetics, opioids, barbiturates, benzodiazepines, anticholinesterases and anticholinergics, neuromuscular blockers, adrenergic agonists and antagonists, nonsteroidal anti-inflammatory drugs, antidyshyrmatics, calcium channel blockers, diuretics, anticoagulants, antihistamnines, and antimicrobials. (2 credits)

ANES 5601—Applied Physiology for Anesthesia Practice I
Pathophysiology in a systems approach—cardiovascular, pulmonary, renal, neuro, metabolic, and endocrine. Emphasizing hemodynamics, Starling forces, pulmonary responses, renal hemodynamics, temperature regulation, blood gases/pH, and maternal and fetal physiology. Also emphasizes those systems that affect evaluation and planning for anesthesia and that are affected by the administration of anesthesia. (3 credits)

ANES 5602—Applied Physiology for Anesthesia Practice II
This course is a continuation of ANES 5601. Pathophysiology in a systems approach—cardiovascular, pulmonary, renal, neuro, metabolic, and endocrine. Emphasizing hemodynamics, Starling forces, pulmonary responses, renal hemodynamics, temperature regulation, blood gases/pH, and maternal and fetal physiology. Also emphasizes those systems that affect evaluation and planning for anesthesia and that are affected by the administration of anesthesia. (2 credits)

ANES 5801—Principles of Instrumentation and Patient Monitoring I
Practical principles, application, and interpretation of various monitoring modalities including ECG, invasive and noninvasive blood pressure, oximetry, cardiac output, respiratory gas analysis, respiration, and
instruments as they pertain to anesthesia practice. Also includes intraoperative neurophysiology monitoring, temperature, renal function, coagulation/hemostasis, neuromuscular junction, transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (2 credits)

ANES 5802—Instrumentation and Monitoring II
This course is a continuation of ANES 5801. Practical principles, application, and interpretation of various monitoring modalities, including ECG, invasive blood pressure, oximetry, cardiac output, respiratory gas analysis, respiration, and instrumentation, as they pertain to anesthesia practice will be discussed. The course also includes intraoperative neurophysiology monitoring, temperature, renal function, coagulation/hemostasis, neuromuscular junction, transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (1 credit)

ANES 5901—Anesthesia Principle and Practices I
Principles involved in the formulation of anesthetic plans based upon data obtained during the preoperative evaluation. Includes the formulation and practices of different anesthetic plans and techniques as related to specific surgical procedures and pathophysiology. (2 credits)

ANES 5902—Anesthesia Principle and Practices II
This course is a continuation of ANES 5901. Principles involved in the formulation of anesthetic plans based upon data obtained during the preoperative evaluation. Includes the formulation and practices of different anesthetic plans and techniques as related to specific surgical procedures and pathophysiology. (3 credits)

ANES 5903—Anesthesia Principle and Practices III
This course is a continuation of ANES 5901. It discusses the principles involved in the formulation of anesthetic plans based upon data obtained during the preoperative evaluation and includes the formulation and practices of different anesthetic plans and techniques as related to specific surgical procedures and pathophysiology. (2 credits)

ANES 6001—Clinical Anesthesia III
Encompasses the student's clinical experience in required rotations through all sub-specialty areas of anesthesia. Clinical rotations are assigned in two-week and four-week intervals and will require being on-call during some nights and weekends. Clinical practice of anesthesia is gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Monthly required readings are assigned. Monthly comprehensive examinations are administered. Each course's grade is composed of clinical evaluations and comprehensive examination scores. (13 credits)

ANES 6002—Clinical Anesthesia IV
This course is a continuation of ANES 6001. Encompasses the student's clinical experience in required rotations through all sub-specialty areas of anesthesia. Clinical rotations are assigned in two-week and four-week intervals and will require being on-call during some nights and weekends. Clinical practice of anesthesia is gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Monthly required readings are assigned. Monthly comprehensive examinations are administered. Each course's grade is composed of clinical evaluations and comprehensive examination scores. (15 credits)

ANES 6003—Clinical Anesthesia V
This course is a continuation of ANES 6002. Encompasses the student's clinical experience in required rotations through all sub-specialty areas of anesthesia. Clinical rotations are assigned in two-week and four-week intervals and will require being on-call during some nights and weekends. Clinical practice of anesthesia is gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Monthly required readings are assigned. Monthly comprehensive examinations are administered. Each course's grade is composed of clinical evaluations and comprehensive examination scores. (12 credits)

ANES 6110—Anesthesia Review
Lectures, required readings, and discussions with faculty members, visiting faculty members, and current residents on clinical and research topics. Includes correlation of case management and complications. (1 credit)

ANES 6200—Clinical Practice in Anesthesia
This course is a continuation of ANES 6130. Developed for the student who requires additional clinical training. Developmental skills and foundations of the clinical aspects of anesthesia are gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Participation and responsibilities increase through the year as knowledge and skills develop. (2 credits)

MHS 5205—Writing for Medical Publications
This course provides a study and review of quality medical writing techniques, issues, and procedures with emphasis on cultivating personal style and content. Focus will be on writing for peer- and evidence-based publications. (3 credits)

ANES 5101—Student Lecture Series I
This course provides the opportunity for students to explore a special topic of interest under the direction of a faculty member. Arrangements are made directly with the appropriate faculty member and the program director. Topic exploration is governed by the needs of the program.
and the educational goal of the student. Possible topics involve clinical and nonclinical aspects of the practice of medicine in the United States. (1 credit)

**ANES 5102—Student Lecture Series II**
This course is a continuation of ANES 5101. (1 credit)

**ANES 5104—Principles of Life Support**
This course provides for the certification of Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS). It will focus on the assessment and management of adults, children, and infants in cardiopulmonary crisis. ACLS and PALS certification will be obtained during this semester. (3 credits)

---

**Master of Science in Anesthesia—Tampa**

Anesthesiologist Assistants (AAs), also known as anesthetists, are highly educated and skilled allied health professionals who work under the supervision of physician anesthesiologists to develop and implement anesthesia care plans. AAs work exclusively within the anesthesia care team environment as described by the American Society of Anesthesiologists (ASA). AAs possess a premedical background and a baccalaureate degree, and also complete a comprehensive didactic and clinical program at the graduate level. AAs are trained extensively in the delivery and maintenance of quality anesthesia care as well as advanced patient monitoring techniques. The goal of AA education is to nurture the transformation of qualified student applicants into competent health care practitioners who aspire to practice in the anesthesia care team.

The 27-month AA course of study consists of an intensive academic and didactic program that will prepare the student to function within the anesthesia care team. The students will get an extensive clinical training experience that will consist of a minimum of 2,000 clinical hours that encompass all aspects of anesthesia care for the surgical patient. Upon completion of the course of study, students will have earned a Master of Science in Anesthesia degree from NSU.

Through close, personal interaction with highly qualified faculty members and the latest available anesthesia technology, the first year (semesters 1, 2, 3, and 4) encompasses an in-depth course of study in the fundamentals of anesthesia. Clinical experience during the first year will increase as the year progresses. The didactic curriculum, complemented by simulation learning, will provide the student with the necessary skills to meet the clinical objectives of the curriculum. The senior year (semesters 5, 6, and 7) will consist of clinical rotations assigned in two-week and four-week intervals. During the senior year, clinical rotations are full time and involve all specialty areas in anesthesia, including general surgery, pediatrics, obstetrics and gynecology, otolaryngology, orthopedics, neurosurgery, ophthalmology, genito-urinary surgery, vascular surgery, cardiac surgery, thoracic surgery, transplantation, and trauma. Clinical rotations include days, evenings, nights, weekends, and on-call—depending upon the rotation.

Nova Southeastern University’s Master of Science in Anesthesia program will prepare the student for the national certification exam administered by the National Board of Medical Examiners under the auspices of the National Commission for the Certification of Anesthesiologist Assistants. The certification process involves successfully completing the Certifying Examination for Anesthesiologist Assistants for initial certification, registration of continuing medical education credits every two years, and successful completion of the Examination for Continued Demonstration of Qualifications every six years.

**Accreditation**
The Master of Science in Anesthesia program at NSU is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP: 25400 U.S. Highway 19 North, Suite 158, Clearwater, Florida 33763, 727-210-2350).

**Mission**
The mission of the Master of Science in Anesthesia is to prepare students for lifelong learning and leadership roles that will benefit the health care community. The educational process will be committed to training and
educating competent anesthetists who will embrace the anesthesia care team to provide safe, quality, and compassionate anesthesia care for all degrees of illness for the surgical patient.

Vision
The Master of Science in Anesthesia at Nova Southeastern University will provide state-of-the-art educational facilities and environment, which will allow anesthesiologist assistant students to cultivate into health care providers who are driven by compassion and guided by science to provide the best and safest patient care. It will be locally, nationally, and internationally recognized as an authority and primary source for anesthesiologist assistant information and services related to promoting the practice of delivering safe and quality anesthesia as a member of the anesthesia care team. The faculty members and students will be recognized as leaders within the profession through our collective service to the American Academy of Anesthesiologist Assistants (AAAA) and other professional organizations.

The Master of Science in Anesthesia program is dedicated to developing a well-rounded practicing AA. The faculty and current students are dedicated to the following program objectives:

• develop vigilant, knowledgeable, skilled, and compassionate anesthesia care providers who are capable of functioning within the anesthesia care team model in the delivery of all perioperative anesthesia services

• inspire and prepare the future leaders in our profession for service in local, state, and national organizations that shall advance the utilization and practice of anesthesiologist assistants

• advance anesthesiologist assistant education through the application of state-of-the-art technology and evidence-based learning practices that continue to support our student learning objectives

• develop highly skilled, interdisciplinary, and culturally sensitive faculty members who model professionalism and exemplify ethical practice, effective communication, and organizational leadership

• support the mission and goals of Nova Southeastern University, including our department, college, and division, in the provision of scholarship, service, teaching, and patient care

Admissions Requirements
Prospective M.S. in Anesthesia students are selected by the Committee on Admissions (COA), which considers the overall qualities of the applicant. Areas of consideration include interpersonal skills, personal motivation, knowledge and understanding of the AA profession and the anesthesia care team, academic performance and level of achievement, life experiences, and recommendations. Personal interviews are offered to the most qualified applicants to assess interpersonal and communication skills, altruistic attitude, maturity, and commitment to the AA profession and anesthesia care team model.

Other requirements include
1. baccalaureate degree from a nationally recognized and accredited college or university, including above average performance in courses required in a premed curriculum (refer to the following required courses)

Required
• English (3 semester hours or 4 quarter hours)
• General biology with lab or Anatomy and physiology with lab (6 semester hours or 9 quarter hours)
• General chemistry with lab (6 semester hours or 9 quarter hours)
• Organic chemistry with lab (3 semester hours or 4 quarter hours)
• Biochemistry (3 semester hours or 4 quarter hours)
• General physics with lab (6 semester hours or 9 quarter hours)
• Calculus (3 semester hours or 4 quarter hours)

Preferred but not required
• Cell and molecular biology (1 semester hour)
• Organic chemistry II (a second semester)

Note: A grade of 2.0 (C) or better is required in all prerequisite classes.

2. official transcripts of all undergraduate and graduate coursework
3. a minimum cumulative GPA of 2.75 on a 4.0 grading scale; minimum GPA of 3.0 preferred
4. Graduate Record Examination (GRE) or Medical College Admissions Test (MCAT) scores (taken within the past five years) taken early enough for official scores to be received by admissions office by the supplemental application due date of February 15

The NSU code number is 5522. GRE information can be obtained from gre.org. Information for the MCAT is at aamc.org/students/mcat.

5. three letters of recommendation from people familiar with applicant’s prior academic performance, potential, character, work habits, and suitability for graduate study leading into a career in clinical practice

6. at least eight hours of documented anesthesia exposure by observation in the operating room
7. summary of an article published in a current anesthesia journal

The applicant who has graduated from a college or university in a country where English is not the primary language, regardless of United States residency status, must have a Test of English as a Foreign Language (TOEFL) score of 600 or higher for the written test (or equivalent score for the computer-based test), an International English Language Testing System (IELTS) score of 6.0, or a Pearson Test of English—Academic (PTE—A) score of 54. An official set of scores must be sent to Nova Southeastern University directly from the Educational Testing Service in Princeton, New Jersey.

Computer Requirements
All students are required to have a computer with the following minimum specifications:
- Pentium or AMD at 1.00 GHz or equivalent Macintosh processor
- 256 megabytes RAM
- video and monitor capable of 1024 x 768 resolution or better
- CD-ROM drive
- full duplex sound card and speakers
- Internet connection with Internet service provider (DSL, cable, or satellite highly recommended)
- 800 x 600 or higher resolution
- Windows XP or NT or MAC OS or better
- Microsoft Office 2000 with PowerPoint, Word, and Excel minimum
- printer capability

Application Procedures
Applicants for admission must submit to EPS, or be responsible for submission of
1. a completed application form, along with a $50, nonrefundable application fee, accepted July 15 to February 15
2. three evaluation forms—supplied in the application package or by request—from supervisors or colleagues, clinical or non-clinical
3. official transcripts sent directly from all previously attended undergraduate, professional, and graduate institutions
4. all coursework from international institution(s), if applicant attended or is a graduate of any international institution(s)

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed following.
- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org
- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com
- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Health Care Sciences, Department of Anesthesia Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

5. complete resume or curriculum vitae
6. copies of national and professional certifications or licenses by a recognized certifying body (if applicable)
7. summary of an article published in a current anesthesia journal (form supplied in application package)
8. evidence of eight hours documented anesthesia exposure (form supplied in application packet)

The Committee on Admissions will not consider an application until all required fees, credentials, transcripts, and evaluations have been received by the EPS.

Personal Interviews
Once your application is complete, the Committee on Admissions will decide whether or not your application is strong enough to warrant an invitation for a personal interview. Interviews are conducted at the Nova Southeastern University Tampa Campus and are by invitation only. Interviews will be held from December through March. An invitation to interview is not a guarantee of admission. Notice of acceptance or action by the committee on admissions will be on a “rolling” or periodic schedule; therefore early completion of the application is in the best interest of the student.

Tuition and Fees
Tuition for 2016–2017 (subject to change by the board of trustees without notice): $41,200. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.
1. **Acceptance Fee**—$500. This fee is required to reserve the accepted applicant’s place in the entering first-year class, but is not refundable in the event of a withdrawal. It is payable within two weeks of an applicant’s acceptance.

2. **Deposit**—$250. This is due February 15, under the same terms as the Acceptance Fee.

3. **Preregistration Fee**—$250. This is due April 15, under the same terms as the Acceptance Fee.

The first semester's tuition and fees, less the $1,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met. The financial ability of applicants to complete their training at the college is important because of the limited number of positions available in each class. Applicants should have specific plans for financing 27 months of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses. Each student is required to carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

**Requirements for Graduation**

In order to be eligible to graduate with the Master of Science in Anesthesia degree, students must

- successfully complete all academic and clinical courses and degree requirements
- satisfactorily meet all financial and library obligations
- attend in person the commencement program at which the degree is conferred

Curriculum is subject to change as directed by the department.

M.S. in Anesthesia—Tampa Course Descriptions

ANET 5001—Clinical Anesthesia I
Developmental skills and foundations of the clinical practice of anesthesia are gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Participation and responsibilities increase through the year as knowledge and skills develop. (1 credit)

ANET 5002—Clinical Anesthesia II
This course is a continuation of ANET 5001. Developmental skills and foundations of the clinical practice of anesthesia are gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Participation and responsibilities increase through the year as knowledge and skills develop. (3 credits)

ANET 5003—Clinical Anesthesia III
This course is a continuation of ANET 5002. Developmental skills and foundations of the clinical practice of anesthesia are gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Participation and responsibilities increase through the year as knowledge and skills develop. (5 credits)

ANET 5004—Clinical Anesthesia IV
This course is a continuation of ANET 5003. Developmental skills and foundations of the clinical practice of anesthesia are gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Participation and responsibilities increase through the year as knowledge and skills develop. (3 credits)

ANET 5101—Student Lecture Series I
This seminar-style course expands upon previous anesthesia coursework as part of a three-course series. Learners will research topics pertinent to the practice of anesthesia and participate in podium presentations of their findings using visual aids. Through the course activities, learners will develop their oral communications skills and ability to synthesize medical literature. Topics are assigned by the course instructor. (1 credit)

ANET 5102—Student Lecture Series II
This course is a continuation of ANET 5101 and will follow the same format. In this second course of the student lecture series, learners will select their own topic of research with guidance from the course instructor. This course will develop the learners’ ability to select an appropriate research topic, as well as expand their knowledge of anesthesia. Podium presentations using visual aids are required. (1 credit)

ANET 5103—Student Lecture Series III
This course is a continuation of ANET 5102 and will follow the same format. In this third course of the student lecture series, learners will select an anesthesia case and perform a case study analysis. Emphasis will be on the development of reflective learning practices and critical thinking skills. Podium presentations using visual aids are required. (1 credit)

ANET 5621—Principle of Airway Management I
This course will provide an opportunity to learn and appreciate structure, function, pathophysiology, disease, and management of the human airway. The basic and advanced principles of elective and emergent airway management, including equipment and techniques, will be covered. Examination, recognition, techniques, and management involved in pediatric and adult difficult airways will be discussed. Course will correlate with laboratory work for a better understanding and use of bag/mask ventilation, oral and nasal airways, oral and nasal intubation techniques, laryngoscopes, surgical airways, and application of laryngeal mask airway. (2 credits)

ANET 5622—Principle of Airway Management II
This course is a continuation of ANET 5621. This course will provide an opportunity to learn and appreciate
structure, function, pathophysiology, disease, and management of the human airway. The basic and advanced principles of elective and emergent airway management, including equipment and techniques, will be covered. Examination, recognition, techniques, and management involved in pediatric and adult difficult airways will be discussed. Course will correlate with laboratory work for a better understanding and use of bag/mask ventilation, oral and nasal airways, oral and nasal intubation techniques, lightronds, fiberoptic intubations, double lumen tubes, surgical airways, and application of laryngeal mask airway.

ANET 5048—Medical Terminology
This is a self-study, online course. Use of medical language for appropriate and complete communication in patient care. Course includes terminology and symbols, word formation, body systems and disease terms, abbreviations, and procedures. (1 credit)

ANET 5081—Introduction to Clinical Anesthesia
Prepares and educates the student to work within the anesthesia care team. Introduction to induction, maintenance, and emergence from anesthesia. Includes history of anesthesia, types of anesthesia, universal precautions and infection control, layout of the operating room, sterile fields and techniques, interacting with patients, starting intravenous catheters and arterial cannulae, obtaining arterial blood samples, and application of ASA-standard monitors. Students will use an anesthesia simulator to gain the basic knowledge and usage of monitors. (2 credits)

ANET 5301—Anesthesia Laboratory I
A state-of-the-art laboratory and anesthesia simulator will prepare the student for the usage and complete understanding of the monitors and practice of anesthesia. Students will apply their didactic knowledge to scenarios on the anesthesia simulator. Patient modalities—such as pulse oximetry, capnography, and blood pressure monitoring systems—are explored. Laboratory experiments will develop students' understanding of anesthesia delivery systems, various types of breathing circuits, fresh gas flow effect, theory of dilutional methods of cardiac output monitoring, and relations between mean circulatory filling pressures and central venous pressure. A vascular sonography lab will allow a unique and comprehensive understanding of transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (1 credit)

ANET 5302—Anesthesia Laboratory II
This course is a continuation of ANET 5301. A state-of-the-art laboratory and anesthesia simulator will prepare the student for the usage and complete understanding of the monitors and practice of anesthesia. Students will apply their didactic knowledge to scenarios on the anesthesia simulator. Patient modalities—such as pulse oximetry, capnography, and blood pressure monitoring systems—are explored. Laboratory experiments will develop students' understanding of anesthesia delivery systems, various types of breathing circuits, fresh gas flow effect, theory of dilutional methods of cardiac output monitoring, and relations between mean circulatory filling pressures and central venous pressure. A vascular sonography lab will allow a unique and comprehensive understanding of transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (2 credits)

ANET 5303—Anesthesia Laboratory III
This course is a continuation of ANET 5302. A state-of-the-art laboratory and anesthesia simulator will prepare the student for the usage and complete understanding of the monitors and practice of anesthesia. Students will apply their didactic knowledge to scenarios on the anesthesia simulator. Patient modalities—such as pulse oximetry, capnography, and blood pressure monitoring systems—are explored. Laboratory experiments will develop students' understanding of anesthesia delivery systems, various types of breathing circuits, fresh gas flow effect, theory of dilutional methods of cardiac output monitoring, and relations between mean circulatory filling pressures and central venous pressure. A vascular sonography lab will allow a unique and comprehensive understanding of transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (1 credit)

ANET 5304—Anesthesia Laboratory IV
This course is a continuation of ANET 5303. A state-of-the-art laboratory and anesthesia simulator will prepare the student for the usage and complete understanding of the monitors and practice of anesthesia. Students will apply their didactic knowledge to scenarios on the anesthesia simulator. Patient modalities—such as pulse oximetry, capnography, and blood pressure monitoring systems—are explored. Laboratory experiments will develop students' understanding of anesthesia delivery systems, various types of breathing circuits, fresh gas flow effect, theory of dilutional methods of cardiac output monitoring, and relations between mean circulatory filling pressures and central venous pressure. A vascular sonography lab will allow a unique and comprehensive understanding of transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (2 credits)

ANET 5328—ECG for Anesthesiologist Assistants
Basic and advanced ECG interpretation using simulators to understand an overview of heart anatomy, function, and neurophysiology. (1 credit)
PHST 5400—Physiology
Clinically relevant physiologic principles of the major organ systems covered in Anatomy. Pathological changes that occur in the human physiology in the disease process. (3 credits)

ANAT 5420—Anatomy
Gross structures of the human body. Integrates topographic and radiographic anatomy to stress the application and importance of clinical anatomy. Develops the knowledge of the human anatomy necessary for the practice of the profession. (5 credits)

ANET 5462—Pharmacology for Anesthesia I
Emphasizes drugs specifically related to the practice of anesthesia, including inhaled anesthetics, opioids, barbiturates, benzodiazepines, anticholinesterases and anticholinergics, neuromuscular blockers, adrenergic agonists and antagonists, nonsteroidal anti-inflammatory drugs, antidyshrhythmics, calcium channel blockers, diuretics, anticoagulants, antihistamines, and antimicrobials. (2 credits)

ANET 5463—Pharmacology for Anesthesia II
This course is a continuation of ANET 5462. Emphasizes drugs specifically related to the practice of anesthesia, including inhaled anesthetics, opioids, barbiturates, benzodiazepines, anticholinesterases and anticholinergics, neuromuscular blockers, adrenergic agonists and antagonists, nonsteroidal anti-inflammatory drugs, antidyshrhythmics, calcium channel blockers, diuretics, anticoagulants, antihistamines, and antimicrobials. (2 credits)

ANET 5601—Applied Physiology for Anesthesia Practice I
Pathophysiology in a systems approach—cardiovascular, pulmonary, renal, neuro, metabolic, and endocrine. Emphasizing hemodynamics, Starling forces, pulmonary responses, renal hemodynamics, temperature regulation, blood gases/pH, and maternal and fetal physiology. Also emphasizes those systems that affect evaluation and planning for anesthesia and that are affected by the administration of anesthesia. (3 credits)

ANET 5602—Applied Physiology for Anesthesia Practice II
This course is a continuation of ANET 5601. Pathophysiology in a systems approach—cardiovascular, pulmonary, renal, neuro, metabolic, and endocrine. Emphasizing hemodynamics, Starling forces, pulmonary responses, renal hemodynamics, temperature regulation, blood gases/pH, and maternal and fetal physiology. Also emphasizes those systems that affect evaluation and planning for anesthesia and that are affected by the administration of anesthesia. (2 credits)

ANET 5801—Principles of Instrumentation and Patient Monitoring I
Practical principles, application, and interpretation of various monitoring modalities including ECG, invasive and noninvasive blood pressure, oximetry, cardiac output, respiratory gas analysis, respiration, and instrumentation as they pertain to anesthesia practice. Also includes intraoperative neurophysiology monitoring, temperature, renal function, coagulation/hemostasis, neuromuscular junction, transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (2 credits)

ANET 5802—Principles of Instrumentation and Patient Monitoring II
This course is a continuation of ANET 5801. Practical principles, application, and interpretation of various monitoring modalities including ECG, invasive and noninvasive blood pressure, oximetry, cardiac output, respiratory gas analysis, respiration, and instrumentation as they pertain to anesthesia practice. Also includes intraoperative neurophysiology monitoring, temperature, renal function, coagulation/hemostasis, neuromuscular junction, transesophageal and transthoracic echocardiography, cerebrovascular testing, and venous and peripheral arterial testing. (1 credit)

ANET 5901—Anesthesia Principle and Practices I
Principles involved in the formulation of anesthetic plans based upon data obtained during the preoperative evaluation. Includes the formulation and practices of different anesthetic plans and techniques as related to specific surgical procedures and pathophysiology. (2 credits)

ANET 5902—Anesthesia Principle and Practices II
This course is a continuation of ANET 5901. Principles involved in the formulation of anesthetic plans based upon data obtained during the preoperative evaluation. Includes the formulation and practices of different anesthetic plans and techniques as related to specific surgical procedures and pathophysiology. (3 credits)

ANET 5903—Anesthesia Principle and Practices III
This course is a continuation of ANET 5902. It discusses the principles involved in the formulation of anesthetic plans based upon data obtained during the preoperative evaluation and includes the formulation and practices of different anesthetic plans and techniques as related to specific surgical procedures and pathophysiology. (2 credits)

ANET 6001—Clinical Anesthesia III
Encompasses the student’s clinical experience in required rotations through all sub-specialty areas of anesthesia. Clinical rotations are assigned in two-week and four-week intervals and will require being on-call during some nights.
198  

College of Health Care Sciences—Department of Anesthesia

and weekends. Clinical practice of anesthesia is gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Monthly required readings are assigned. Monthly comprehensive examinations are administered. Each course’s grade is composed of clinical evaluations and comprehensive examination scores. (13 credits)

ANET 6002—Clinical Anesthesia IV
This course is a continuation of ANET 6001. Encompasses the student’s clinical experience in required rotations through all sub-specialty areas of anesthesia. Clinical rotations are assigned in two-week and four-week intervals and will require being on-call during some nights and weekends. Clinical practice of anesthesia is gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Monthly required readings are assigned. Monthly comprehensive examinations are administered. Each course’s grade is composed of clinical evaluations and comprehensive examination scores. (15 credits)

ANET 6003—Clinical Anesthesia V
This course is a continuation of ANET 6002. Encompasses the student’s clinical experience in required rotations through all sub-specialty areas of anesthesia. Clinical rotations are assigned in two-week and four-week intervals and will require being on-call during some nights and weekends. Clinical practice of anesthesia is gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Monthly required readings are assigned. Monthly comprehensive examinations are administered. Each course’s grade is composed of clinical evaluations and comprehensive examination scores. (11 credits)

ANET 6110—Anesthesia Review I
Lectures, required readings, and discussions with faculty members, visiting faculty members, and current residents on clinical and research topics. Includes correlation of case management and complications. (1 credit)

ANET 6200—Clinical Practice in Anesthesia
This course is a continuation of ANET 6130. Developed for the student who requires additional clinical training. Developmental skills and foundations of the clinical aspects of anesthesia are gained through one-on-one supervised instruction in the operating room and other ancillary anesthetizing locations. Participation and responsibilities increase through the year as knowledge and skills develop. (12 credits)

MHS 5103—Principles of Life Support
Provides for the certification in Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS). Courses will focus on assessment and management of adults, children, and infants in a cardiopulmonary crisis. Pediatric and Advanced Cardiac Lifesaving will be obtained during this semester. (3 credits)

MHS 5205—Writing for Medical Publications
This course provides a study and review of quality medical writing techniques, issues, and procedures with emphasis on cultivating personal style and content. Focus will be on writing for peer- and evidence-based publications. (3 credits)

For information about the NSU AA specialization, or to request an AA admissions application packet, please contact the NSU admissions office at:
Nova Southeastern University  
Health Professions Division  
Anesthesiologist Assistant  
3200 South University Drive  
Fort Lauderdale, Florida 33328-2018  
(954) 262-1101 or 800-356-0026, ext. 21101

Department of Audiology

Audiology Program Overview

The Department of Audiology offers the Doctor of Audiology (Au.D.) degree program. The postbachelor's, on-campus Au.D. degree program is a 119-credit, rigorous academic curriculum, which combines basic science and professional coursework with applied clinical training. Students acquire their clinical competencies from experiences in diverse practice settings. Faculty members and clinical preceptors mentor students and model professional excellence. After receiving a doctoral degree in audiology, graduates are prepared for all aspects of clinical practice as well as for positions of professional leadership.

The Doctor of Audiology (Au.D.) degree establishes audiologists in a clearly defined and prominent role within the hearing health care delivery system and strengthens their position as autonomous practitioners. The degree provides the academic foundation and diverse clinical experiences necessary to enter professional practice today and in the future. Audiologists specialize in the evaluation, diagnosis, management, and treatment of children and adults of all ages with auditory and vestibular disorders. At Nova Southeastern University, the Audiology Department benefits from the integrated interprofessional health care programs of the university's Health Professions Division.

Doctor of Audiology students experience a clinically focused professional doctoral program where students complete a rigorous academic curriculum coupled with extensive clinical experiences.

Accreditation

The Department of Audiology is dually accredited by the Council on Academic Accreditation (CAA) of the American Speech-Language-Hearing Association (ASHA) and the Accreditation Commission for Audiology Education (ACAE). Graduates will have completed the academic and clinical requirements necessary to be eligible to apply for a license as an audiologist, pursue board certification in audiology from the American Board of Audiology, and, if they choose to adhere to the clinical supervisory requirements, the Certificate of Clinical Competence from ASHA.

Admissions Requirements

Postbaccalaureate Degree

Prospective doctor of audiology students are selected by an admissions committee based on preprofessional academic performance, written application, letters of recommendation, submission of Graduate Record Examination (GRE) scores no older than five years, and a personal interview. Preference will be given to students with a cumulative grade point average (GPA) of 3.2 or higher.

The Department of Audiology requires that

• prior to matriculation, applicants must have completed a bachelor's degree from a regionally accredited college or university
• all applicants must show evidence of computer skills through coursework or self-study prior to the end of the first term (Students may obtain instruction through the NSU Student Microcomputer Laboratory or other training facilities.)
• all NSU Au.D. students meet the requirements outlined in the Essential Functions of the Au.D. Student document upon admission and while matriculating

A course in Normal Language Development is required prior to taking Pediatric Audiology. If a student did not complete this course as an undergraduate, he or she can take it during the Au.D. course of study. However, it will require a separate registration and tuition.

The university reserves the right to modify any requirements on an individual basis as deemed necessary by the dean of the College of Health Care Sciences. The college reserves the right, and the student, by his or her act of matriculation, concedes to the college the right to require his or her withdrawal any time the college deems it necessary to safeguard its standards of scholarship, conduct, and compliance with regulations or for such other reasons as are deemed appropriate. The dean and the chair of the Audiology Department reserve the right to require the student’s withdrawal at any time for the above-mentioned reasons.

United Kingdom Program

The NSU Department of Audiology offers a program in the United Kingdom for audiologists with master's degrees in audiology. The Doctor of Audiology (Au.D.) is a clinically focused professional degree. The United Kingdom program is designed for the working professional. The content is designed to augment and expand the academic and professional experience that the working professional has achieved.

• An applicant for the program in the United Kingdom must have completed a master's degree in audiology from a regionally accredited college or university. Students are selected by a committee on admissions based on previous academic performance, written application, and letters of recommendation.
• All applicants must show evidence of computer skills through coursework or self-study prior to the end of the first term. Students may obtain instruction through the NSU Student Microcomputer Laboratory or other training facilities.

• Further information on the programs in the United Kingdom is available at nova.edu/aud.

Transfer Students
Individuals seeking to transfer to the NSU on-campus, entry-level Doctor of Audiology Program must submit an application and follow the application and admissions process. The Department of Audiology will consider the transfer of up to nine graduate credits from another academic institution. Eligibility for course transfer requires a grade of B or better and must be accompanied by an official course description. Credits must be earned within six years prior to program admission.

Computer Requirements
All students are expected to have a computer with Microsoft PowerPoint, Word, and Excel software. Some programs used to augment coursework require a computer with the Windows operating system.

Application Procedures
Applicants for admission must submit or be responsible for submission of

1. a completed application form along with a $50, nonrefundable application fee
2. three letters of recommendation from professors and/or supervisors (must use the NSU Department of Audiology evaluation form)
3. official transcripts sent directly from all previously attended undergraduate, professional, and graduate institutions to the following address in its entirety:
   Nova Southeastern University
   Enrollment Processing Services
   Department of Audiology Admissions
   3301 College Avenue, P.O. Box 299000
   Fort Lauderdale, Florida 33329-9905.
4. Graduate Record Examination (GRE) scores (taken within five years of the date of application)

The audiology committee on admissions will not consider an application until all required fees, credentials, test scores, transcripts and recommendations have been received by the Office of Admissions.

Notice of acceptance or action by the committee on admissions will be on a “rolling” or periodic schedule; therefore early completion of the application is in the best interest of the student.

Personal Interviews
Completed applications are reviewed by the committee on admissions and invitations are extended for a personal interview to those applicants applying for the on-campus, entry-level Au.D. program who meet the initial admission criteria. Interviews for the on-campus postbachelor’s degree program are held on campus and provide the student with an opportunity to meet faculty members and students and visit the campus. Virtual interview media is available if necessary.

Inquiries should be directed to
   Audiology Admissions Counselor
   Nova Southeastern University
   3200 South University Drive
   Fort Lauderdale, Florida 33328-2018
   Phone: (954) 262-1101
   877-640-0218
   Fax: (954) 262-2282
   nova.edu/aud

Tuition and Fees
Payment of tuition and fees is expected at the time of registration. Students receiving financial aid are responsible for making sure that they have completed all applications for financial aid and that it has been granted.

• The annual tuition for 2016–2017 postbachelor’s on-campus Doctor of Audiology program is $21,975 (subject to change by the board of trustees without notice).

Tuition for the United Kingdom Au.D. program is $656 per credit hour (subject to change by the board of trustees without notice).

• A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.

• Upon acceptance, students planning to enroll are required to complete an “Intent to Enroll” form with a nonrefundable deposit of $500. This advance payment will be deducted from the tuition payment due at registration.

The financial ability of applicants to complete their training is important because of the limited number of positions available. Applicants should have specific plans for financing four years of professional education. This should include provision for tuition, living expenses, books, and related expenses.

Requirements for Graduation
In order to be eligible for the postbachelor’s, on-campus Doctor of Audiology degree, each student must

1. satisfactorily complete the 119-credit hour program of study and related clinical placements required for the degree with an overall minimum GPA of 2.7
2. satisfactorily complete the department’s knowledge and skills markers
3. fulfill all obligations to the university
4. ensure that all incomplete grades have been removed and passing grades are on file in the registrar’s office
5. successfully complete a clinical externship experience
6. apply for a diploma
7. attend the commencement program at which the degree is conferred

The United Kingdom post-master’s degree program is 34 credit hours. Students must successfully complete these credit hour requirements with a grade of 80 percent or better, meet all program and library financial obligations, and apply for a diploma.

Total Credit Hours: 34
Audiology Course Descriptions

AUD 5003—Neuroanatomy for Audiology
This course provides an introduction to the gross structure of the brain and spinal cord and the functional relationship of their parts, with emphasis on the auditory and vestibular peripheral and central nervous systems. (1 credit)

AUD 5070—Research Methods I: Introduction
This course will provide students the opportunity to learn about and discuss the importance of outcomes measurement and clinical research in audiology. Students locate information, evaluate the rigor of the source and document, and synthesize the professional literature on a topic of their choosing. (3 credits)

AUD 5301—Diagnostics I: Audiologic Diagnosis Across the Life Span
This course covers the components of the basic audiological examination, including, but not limited to, case history, otoscopy, pure tone threshold evaluation, speech threshold evaluation, speech recognition evaluation, classical site-of-lesion tests, basic immittance, test result interpretation, and test battery interpretation. Audiologic screening and procedural modifications for special populations including pediatrics will also be discussed. Hypothetical cases will be presented. (3 credits)

AUD 5301L—Diagnostics I Lab
This lab is designed to provide an opportunity for students to practice audiological evaluation methods. Students will conduct components of the basic audiological examination, including, but not limited to, case history, otoscopy, pure-tone air and bone threshold evaluation, speech audiometric testing, basic immittance, masking procedures, and test interpretation. (1 credit)

AUD 5302—Acoustics and Instrumentation
Students will study properties of sound and conduct sound analyses. They will also learn about and conduct audiometric calibration procedures. (3 credits)

AUD 5303—Psychoacoustics and Speech Perception
Students will study normal human auditory sensation and perception. Changes in auditory sensation and perception that occur as a function of sensorineural hearing loss, and their implications for hearing aid processing, audiologic evaluation, and treatment will be discussed. (2 credits)

AUD 5304—Anatomy and Physiology of the Auditory and Vestibular Mechanisms
This course will provide detailed study of the anatomy and physiology of the outer ear, middle ear, inner ear, and central auditory pathways. The vestibular peripheral system and the vestibular CNS pathways are described. (3 credits)

AUD 5402—Introduction to Auditory Electrophysiology
Basic procedures for acquiring and interpreting auditory electrophysiologic tests are discussed. This course describes the use of auditory brainstem-evoked response testing for threshold and neuro-otologic diagnosis. (3 credits)

AUD 5403L—Introduction to Electrophysiology Lab
This lab supplements AUD 5402 and AUD 5404, providing students with practical assignments. (1 credit)

AUD 5404—Introduction to Vestibular Evaluation
Basic procedures and interpretation for vestibular assessment, including electro/videonystagmography and bedside evaluations, are discussed. (2 credits)

AUD 5405—Overview of Amplification I
This course is designed to provide an introduction to amplification. The content of this course includes historical perspectives on amplification; functions and features of amplification systems and their components; methods of fitting; verification; and analyses of these systems. The course also includes basic concepts in counseling. (3 credits)

AUD 5405L—Amplification Lab I
This lab supplements AUD 5405, providing students with practical assignments. (1 credit)

AUD 6310—Adult Audiologic Rehabilitation
This course focuses on audiological intervention and remediation strategies for adults and elderly individuals with auditory communication handicaps. Emphasis will be placed on the importance of a multiprofessional approach. (3 credits)

AUD 6402—Diagnostics II Site-of-Lesion Assessment
This course is designed to review basic immittance testing and introduce advanced immittance testing, acoustic reflex and reflex decay testing procedures, formula masking, and otoacoustic emissions. Case studies will be utilized. (2 credits)

AUD 6402L—Diagnostics II Laboratory
This lab is designed to develop student competency with audiology test procedures, such as immittance, masking, and otoacoustic emissions. (1 credit)

AUD 6404—Auditory and Vestibular Pathologies
Students will study pathologies affecting the conductive, sensory, neural, and balance mechanisms. Methods for their differential diagnosis will be discussed. Case studies will be reviewed. (4 credits)
AUD 6406—Overview of Amplification II
In this course, the student begins to integrate theoretical and practical concepts of fitting and verification. Components and features available on contemporary hearing instruments are presented. (3 credits)

AUD 6406L—Amplification Lab II
This lab supplements AUD 6406, providing students with practical assignments. (1 credit)

AUD 6408—Introduction to Auditory Processing Evaluation and Treatment
This course is designed to introduce students to auditory processing evaluation and treatment. Anatomy and physiology of the central auditory nervous system will be discussed. Tests for the evaluation of auditory processing and patterns of delay will be presented. (2 credits)

AUD 6502—Hearing Conservation
Students will study the impact of noise from a physiological perspective. Students will study, conduct, and interpret noise surveys. Various service delivery models from industry, schools, military, and other sites will be discussed. The basic elements of an effective hearing conservation program will be discussed. The relevant legislation mandating such programs will be presented. (2 credits)

AUD 6503—Topics in Audiology
Current topics in assessment, management, and treatment of hearing and balance are examined. (2 credits)

AUD 6504—Implantable Hearing Technologies
This course is designed to provide students with an understanding of different implantable auditory devices for adults and children. Information covered in class will include, but is not limited to, candidacy for implantation, basic understanding of the surgery and surgical risks of implants, pre- and post-audiometric test measures to determine benefit, programming, and troubleshooting. (2 credits)

AUD 6508—Introduction to Tinnitus Evaluation and Management
This course is designed to introduce students to tinnitus evaluation and treatment. Anatomy and physiology of the central auditory nervous system and associated subcortical and cortical structures are presented. Past and emerging theories on tinnitus will be discussed. The evaluation and treatment of both subjective and objective tinnitus will be presented. (2 credits)

AUD 6510—Clinic I
Participation in supervised auditory and vestibular evaluation, management, and treatment. Weekly meetings with supervisors and/or documentation is required. (1 credit)

AUD 6511—Clinic II
Participation in supervised auditory and vestibular evaluation, management, and treatment. Weekly meetings with supervisors and/or documentation is required. (2 credits)

AUD 6512—Clinic III
Participation in supervised auditory and vestibular evaluation, management, and treatment. Weekly meetings with supervisors and/or documentation is required. (2 credits)

AUD 7030—Aging and the Auditory/Vestibular System
United Kingdom Program Only: Students will be provided with an overview of gerontology with emphasis given to differentiation between the normal aging process and pathological changes related to auditory and vestibular disorders. (3 credits)

AUD 7050—Research Methods II: Applications
Students will study research design, data collection, analysis, and evaluation. The ability to comprehend, analyze, and critically evaluate professional literature will be emphasized. Students will design clinically based research to test a clinical hypothesis or document treatment effectiveness. (3 credits)

AUD 7071—Biochemistry and Pharmacology for Audiology
The biochemistry of the ear will be described, and with that as a foundation, the mechanisms, side effects, drug interactions, and toxicity of these drugs will be examined. (2 credits)

AUD 7075—Counseling in Audiology
This course is designed to explore theories of counseling related to the management of individuals with auditory and vestibular disorders. Different approaches for interacting with patients and their families, individually and in groups, will be addressed. (3 credits)

AUD 7078—Ethics for Audiologists
Theories of ethics and applications to audiology in the clinical, research, and academic arenas. Analysis of ethical scenarios and dilemmas. (1 credit)

AUD 7079—Coding and Reimbursement for Audiology
Students will be introduced to evaluation, treatment, and diagnosis codes relative to audiology practice. Third party reimbursement policies, procedures, and guidelines will be discussed. (1 credit)

AUD 7080—Practice Management for Audiology
In this course, students examine basic principles involved in the development and management of audiology practice within the framework of different models of health care delivery. Legal and ethical issues in practice management will be discussed. (3 credits)
AUD 7081—Business Management and Leadership  
United Kingdom Program Only: In this course, students examine basic principles involved in the development and management of audiology practice within the framework of different models of health care delivery. Legal and ethical issues in practice management will be discussed. (3 credits)

AUD 7100—Advanced Seminar in Amplification  
This course is designed to provide advanced information on the theoretical and practical concepts of fitting, verification, and analyses of amplification systems. Counseling techniques are discussed. (2 credits)

AUD 7101—Advanced Seminar in Amplification  
United Kingdom Program Only: This course is designed to provide advanced information on the theoretical and practical concepts of fitting, verification, and analyses of amplification systems. (3 credits)

AUD 7120—Electrophysiology: Auditory  
Students will study cochlear physiologic and auditory neurophysiologic evaluation procedures, including evoked responses for all latencies and otoacoustic emissions. Interpretation of test results will be discussed in relation to underlying anatomy and physiology. (3 credits)

AUD 7121—Advanced Auditory Electrophysiology  
United Kingdom Program Only: Students will study auditory neurophysiologic evaluation procedures, including evoked responses for all latencies and otoacoustic emissions. Interpretation of test results will be discussed in relation to underlying anatomy and physiology. (3 credits)

AUD 7130—Pediatric Audiology  
This course is designed to provide a review of normal and abnormal auditory development in children. Audiologic assessment, management, and treatment of neonates, infants, and young children will be discussed. Evaluation procedures for the difficult-to-test patient will be explored. (3 credits)

AUD 7135—Pediatric Audiologic Rehabilitation  
This course details the aspects related to the provision of audiolologic rehabilitation services to children with hearing loss. It includes such topics as models of information processing during communication, development of auditory speech and language skills in children with hearing loss, provision of effective counseling and guidance to families, and provision of assessment and intervention services for the development of speech and language skills in the home and school environments. (3 credits)

AUD 7160—Advanced Vestibular Evaluation and Treatment  
Students will study the anatomy and physiology of the peripheral and central vestibular mechanisms and the integration of the human equilibrium system. Disorders of vestibular function will be studied. Vestibular evaluation procedures will be presented. Vestibular rehabilitation and balance therapy programming and therapy techniques will be discussed and evaluated. (3 credits)

AUD 7161—Genetics of Hearing Impairment  
United Kingdom Program Only: Students will study the basic concepts of genetics and its relation to hearing loss. They will also learn about the hereditary syndromes and birth defects associated with hearing impairments. Additionally, they will gain knowledge about audiologic counseling and interpretation of genetic data. (3 credits)

AUD 7180—Diagnostics III: Integration of Audiologic Test Results  
United Kingdom Program Only. Students will study advanced auditory evaluation with an emphasis on integration of audiologic test results leading to management and treatment strategies. (3 credits)

AUD 7190—Case Studies I  
Students critically analyze and present cases that require integration of information from throughout the curriculum. (2 credits)

AUD 7201—Case Studies II  
Students critically analyze and present cases that require integration of information from throughout the curriculum. (1 credit)

AUD 7607—Internship I  
Off-campus placement in hospital, agency, or private practice setting(s). Students must meet the schedule required by the facility to which they are assigned. Supervisory meetings are scheduled periodically. (3 credits)

AUD 7608—Internship II  
Off-campus placement in hospital, agency, or private practice setting(s). Students must meet the schedule required by the facility to which they are assigned. Supervisory meetings are scheduled periodically. (3 credits)

AUD 7610—Externship I  
Full-time placement in an audiology externship position. (8 credits)

AUD 7611—Externship II  
Full-time placement in an audiology externship position. (8 credits)

AUD 7612—Externship III  
Full-time placement in an audiology externship position. (8 credits)

AUD 7613—Internship III  
Off-campus placement in hospital, agency, or private practice setting(s). Students must meet schedule required by facility to which they are assigned. Supervisory meetings are scheduled periodically. (3 credits)
The Department of Health Science is an interdisciplinary group of programs designed for health professionals with the desire to advance academically, administratively, or clinically within their profession. Offering distance education from the undergraduate to the doctoral level is consistent with the university's and college's commitment to lifelong learning. The department offers the Bachelor of Health Science (B.H.Sc.) and Master of Health Science (M.H.Sc.) Programs in an exclusively online format. The department also offers two innovative doctoral programs. The Doctor of Health Science (D.H.Sc.) and the Ph.D. in Health Science programs are offered via online and intense compressed residential format. These are postprofessional degrees targeted at health professionals trained at the master's degree level. These programs attract active clinicians, clinician administrators, and health professions educators. A combined M.H.Sc./D.H.Sc. degree is an option also available.

The department also houses two preeminent, on-campus, entry-level programs. The Bachelor of Science in Cardiovascular Sonography is located at our Tampa, Florida, location. The Bachelor of Science in Medical Sonography is offered on our main campus in the greater Fort Lauderdale, Florida, area. Both programs are supported by state-of-the-art teaching laboratories and both programs offer a concurrent enrollment in the Master of Health Science program to qualified applicants.

- Bachelor of Health Science (B.H.Sc.)—online
- Bachelor of Science—Cardiovascular Sonography (B.S.)—entry-level, on-campus, Tampa
- Bachelor of Science—Medical Sonography (B.S.)—entry-level, on-campus, Fort Lauderdale
- Master of Health Science (M.H.Sc.)—online
- Accelerated Dual Admission M.H.Sc./D.H.Sc.—online with some residency requirements

- Doctor of Health Science (D.H.Sc.)—online with some residency requirements
- Doctor of Philosophy (Ph.D.) in Health Science—online with some residency requirements

Upon successful completion of the B.H.Sc. program, students are eligible to apply for admission to continue their education in health sciences in the Master of Health Science (M.H.Sc.) program and, later, the Doctor of Health Science (D.H.Sc.) or the Ph.D. in Health Science program. Each of these programs is an online degree program, with the M.H.Sc. having no residency requirement and the D.H.Sc. having a requirement for students to complete two one-week summer institutes.

Computer Requirements
All students in the department are required to have access to a desktop or laptop computer meeting the minimum requirements listed below:

- Windows (7 or 8) or Mac OS S version 10.7 or above
- Microsoft Office software to include Word, Powerpoint, and Excel
- headphones, microphone, camera, and video conferencing capabilities
- broadband access
- suggested options: surge protection and appropriate back-up options

Tablets and smartphones, while very useful, may not be sufficient for all program uses. Additional minimum computer requirements can be found at https://www.nova.edu/publications/it-standards.
Master of Health Science Program for Health Professionals

The Master of Health Science (M.H.Sc.) Program is a distance education program designed to provide health professionals with the theoretical and academic training necessary to enhance career mobility and professional advancement.

Health professionals practicing today in urban and rural communities throughout the nation are highly recognized as valuable members of the health care team who make quality care more accessible while reducing costs. These health care professionals are playing a prominent and respected role in providing community medical service. An increasing number of employers are seeking master's-level, academically prepared professionals to fill expanded roles that include clinical specialization, health education, research, and health care administration.

The M.H.Sc. didactic curriculum provides education in a variety of health-related topics. The practical component of the program will be tailored to the individual interest and goal of the graduate student. Under faculty guidance, students will demonstrate increased understanding in their chosen area of study.

The M.H.Sc. program is designed for working nonphysician clinicians and health professionals who have graduated from an accredited health program, as well as health care managers and administrators.

Admissions Requirements

The Department of Health Science Committee on Admissions considers the overall qualities of the applicant. Areas of consideration include personal motivation, quality and length of prior health care experience, academic performance and level of achievement, life experiences, and personal recommendations. The M.H.Sc. Program will admit clinical and administrative health care professionals with diverse undergraduate and professional education, health care work history, health care administrative experience, and life experiences who have made a demonstrated capacity to pursue a rigorous course of master's degree study and increasingly responsible positions in the health care arena.

Prospective M.H.Sc. students are selected by considering the overall qualities of the applicant through application content, academic performance and level of achievement, prior clinical health care experience or one to three years of responsible administrative health care experience, life experiences, letters of evaluation, and personal motivation. In special circumstances, a personal interview may be required. Prior to matriculation into the program, applicants must hold a bachelor's degree from a regionally accredited college or university with a minimum cumulative grade point average (GPA) of 2.75 or higher on a 4.0 scale.

Prior clinical health care experience or one–three years of health administrative experience is required. The M.H.Sc. is a postprofessional degree designed for health practitioners, clinicians, and administrators from a wide variety of disciplines. The commonality exhibited by our students is one–three years of responsible health care administrative managerial or supervisory experience and/or the practice of a recognized health occupation that requires registration, certification, or licensure. The successful applicant's health professional experience emphasizes the delivery of clinical services to individuals (e.g., physician assistant, physical therapist, dental hygienist, registered nurse, vascular sonographer, radiology technician, respiratory therapist, etc.). The successful applicant's health administrative experience includes individuals who act as professional administrators in a variety of health care settings.

Applicants who qualify under the clinical health professional pathway will document their eligibility through state and/or national registration, certification, or licensure in a clinical health field. Applicants who qualify under the health administration pathway will document their experience with an organizational chart showing their position in a health care organization and a letter of reference from a supervisor attesting to their experience and level of responsibility. Administrative applicants will submit a 500 to 1,000 word essay describing their personal and career goals.

All applicants must show evidence of computer skills though coursework or self-study skills prior to the end of the first term. Students may obtain instruction through the NSU Microcomputer Laboratory or other training facilities.

The university reserves the right to modify any requirement on an individual basis as deemed necessary by the dean of the College of Health Care Sciences.

In order to be considered for admission, applicants must submit the following prior to matriculation:

- official transcripts of all coursework attempted at all colleges and universities must be forwarded, by institutions attended, to the Enrollment Processing Services, Master of Health Science Program
- It is the responsibility of the applicant to ensure that arrangements are made for these transcripts to be sent to Nova Southeastern University Enrollment Processing Services College of Health Care Sciences M.H.Sc. Program 3301 College Avenue, P.O. Box 299000 Fort Lauderdale, Florida 33329-9905
• completion of a bachelor’s degree from a regionally accredited allied health program with a minimum cumulative grade point average of 2.75 or higher on a 4.0 point scale

• national professional certification or licensure (if applicable)

• current state license, registration, or certification (if applicable)

• two letters of evaluation from supervising physicians or managers (Additional letters of recommendation are encouraged.)

To be eligible for consideration for admission, applicants applying under the administrative pathway must have a minimum of three years of verifiable managerial experience in health care administration. This experience should be readily identifiable on the applicant’s resume. A letter of recommendation from the applicant’s current supervisor detailing the applicant’s length and level of managerial experience must be submitted with the application.

A personal interview with the committee on admissions may be required in some cases (phone interview may be substituted).

All interview expenses are the responsibility of the applicant.

The university reserves the right to modify any requirements on an individual basis as deemed necessary by the dean of the College of Health Care Sciences.

The college reserves the right, and the student, by his or her act of matriculation, concedes to the college the right to require his or her withdrawal at any time the college deems it necessary to safeguard its standards of scholarship, conduct, and compliance with regulations or for such other reasons as are deemed appropriate.

The dean and M.H.Sc. program director reserve the right to require the student’s withdrawal at any time for the above-mentioned reasons.

**Tuition and Fees**

Tuition for academic year 2016–2017 is $410 per credit hour. An NSU student services fee of $1,050 is required annually. Tuition waivers and discounts for NSU students and staff and faculty members will be in accordance with published policy and administered through the dean of the College of Health Care Sciences. Tuition, fees, and payment schedules are subject to change without notice.

**Application Procedures**

The M.H.Sc. program provides admission opportunities throughout the year. Applications may be submitted year round.

Once accepted, a start date will be assigned to the student after personal advisement. There are four start dates per year: January, April, July, and October. The student has a maximum of three years from the start date to complete the degree course of study and apply for the M.H.Sc. degree. Before the applicant can be reviewed for possible admission, the following must be submitted:

• a completed M.H.Sc. application form

• a $50, nonrefundable application fee

• official transcripts of all coursework attempted at all colleges and universities must be forwarded, by institutions attended, to the Enrollment Processing Services, Master of Health Science Program Admissions.

It is the responsibility of the applicant to ensure that arrangements are made for these transcripts to be sent.

• a final official transcript, covering all of the applicant’s work, must be forwarded to the Office of Admissions prior to matriculation

• two letters of evaluation from professional supervisors

These evaluators, preferably supervising clinicians, should know the applicant’s personal character and scholastic, clinical, and work abilities. (An applicant to the Health Care Leadership concentration must submit a letter from his or her supervisor documenting the applicant’s level of experience/responsibility as a health care administrator/manager.)

• official copies of all professional certifications, registrations, licenses or relevant credentialing materials

• complete CV or resume

All documents must be received at least one month prior to the anticipated start date and must be sent to the address below.

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences, M.H.Sc. Program
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

In special circumstances, a personal interview with members of the committee on admissions may be requested or required. A phone interview may be substituted. Upon the receipt of the completed application and required credentials, the Department of Health Science committee on admissions will recommend to the dean and the M.H.Sc. program director those applicants to be considered for acceptance into the program.
Foreign Coursework
Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org
- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com
- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Health Care Sciences, Department of Health Science Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

Nondegree-Seeking Application Procedures/Policy
A nondegree-seeking student is one who wishes to take one or more courses in the Master of Health Science program and, at the time of application, does not intend to seek the Master of Health Science degree.

Nondegree-seeking students must submit
1. a completed M.H.Sc. application form along with a $50, nonrefundable application fee
2. official college, certificate, and/or diploma-based transcripts from all undergraduate institutions attended, sent directly from the institution to EPS (This includes official documentation of receiving a bachelor’s degree from a regionally accredited college/university. A minimum GPA of 2.75 on a 4.0 grading scale is required in the applicant’s bachelor’s degree.)
3. one letter of recommendation from an individual (other than a relative or friend), such as a supervisor or a community associate.

Due to the limited number of seats available in the program, preference for admission and registration priority will be given to degree-seeking students. Nondegree-seeking students can take a maximum of 9 credits of M.H.Sc. coursework. Enrollment in these courses as a nondegree-seeking student does not guarantee acceptance into the M.H.Sc. program or any other NSU program.

If, after taking classes in the M.H.Sc. program, a nondegree-seeking student decides to pursue the M.H.Sc. degree, the student must resubmit an application as a degree-seeking student. The applicant must meet ALL of the admissions requirements for the M.H.Sc. degree program. A nondegree-seeking student who, after taking M.H.Sc. courses, decides to apply as a degree-seeking student, may request transfer credit for courses taken as a nondegree-seeking student, in accordance with the credit transfer policy of the M.H.Sc. program.

Requirements for Graduation
To be eligible to receive the M.H.Sc. degree, students shall
- be of good moral character
- satisfactorily complete the program of 37 hours (minimum) of study required for the degree with an average grade of B or a GPA of 3.0 on a 4.0 scale
- successfully complete the M.H.Sc. practicum
- receive a recommendation by the M.H.Sc. program director to the dean of the College of Health Care Sciences

Graduation ceremony attendance is not a requirement for distance education students. It is, however, an option that the department encourages and that takes place once a year (in August).

Students with a cumulative GPA of 3.74 or higher are eligible to receive the degree with honors. Students with a cumulative GPA of 4.0 are eligible to receive the degree with high honors.

Course of Study
The M.H.Sc. Program requires a minimum of 37 semester hours of study to be completed. This includes required core courses. All students are required to have individualized curriculum advisement upon acceptance.

Transfer of up to 6 credit hours of acceptable graduate study is permitted upon approval. These graduate courses must have a grade of B or better and must be approved by the M.H.Sc. program director and dean of the College of Health Care Sciences. The dean reserves the right to require, in special cases, more than the minimum of 37 semester hours. Transferred courses cannot have been credited toward a previous degree.

Classes are organized and based on accepted distance learning designs and formats.
Continuous Enrollment
The program requires students to enroll in at least one course per semester for the duration of their M.H.Sc. studies. If a student needs to take a semester off during the academic year, a formal request for a leave of absence shall be submitted to the program director and will be subject to approval.

Continuing Services
The program is designed to be completed in three years. Continuing services fees will be imposed after 36 months in the program. All students must finish the program within five years of the date of acceptance, or they will be dismissed. After the 36th month in the program, students will be enrolled in continuing services at a cost of $990 per semester.

Curriculum Outline—Master of Health Science Program

The curriculum involves completion of a minimum of 37 credit hours that must be completed in each of the two categories of courses (didactic and practical). There is some flexibility in curriculum design to accommodate students’ overall interests, employment, and educational goals. Educational counseling and advisement is always available to assist in the planning and registration process.

### Health Law Concentration Curriculum

This concentration is offered through a partnership with the NSU Shepard Broad College of Law. **Students in this concentration should consider themselves in a locked-step schedule.** For the health law concentration, two residential institutes are required on the main campus. These summer institutes are one–two days long.
MHS 5510 Research Methods 3
MHS 5530 Principles and Practice of Management in Health Care 3

**Forensic Investigative Technology Concentration Curriculum**
This concentration will provide specialization training in the burgeoning field of forensic investigation. Students will be exposed to investigative and analysis techniques used during criminal investigations. Completing this concentration requires 40 credits, as detailed below. All courses are delivered and organized as distance learning.

### Concentration for Recognition

In order to gain recognition in the Forensic Investigative Technology concentration of the M.H.Sc. program, the student must complete all five concentration courses for 15 total hours. Those completing the concentration will be recognized with appropriate credentials. If you have any questions of how this may apply to your M.H.Sc. completion, contact the program or your academic adviser for assistance.

### Leadership in Health Care Concentration Curriculum

This concentration will provide specialization training to meet the increasing demand for qualified leaders in the health care industry's growing field of leadership in health care. Beginning in the winter of 2010, M.H.Sc. distance students will have the option of completing electives or a concentration in Leadership in Health Care. Completing this concentration requires 37 credits, as detailed below.

### Concentration for Recognition

In order to gain recognition in the Leadership in Health Care concentration of the M.H.Sc. program, the student must complete all five concentration courses for 15 total hours. Those completing the concentration will be recognized as such with appropriate credentials. If you have any questions of how this may apply to your M.H.Sc. completion, contact the program or your academic adviser for assistance.
**Health Care Risk Management, Patient Safety, and Compliance Concentration Curriculum**

This concentration is designed for health care professionals seeking to enter, or be promoted in, the rapidly expanding field of health care risk management, patient safety, and compliance. The courses in this concentration will prepare graduates with the skills and background necessary to reduce medical errors, control adverse events, and implement a quality improvement and patient safety initiative. Completing this concentration requires 37 credits, as detailed below.

<table>

**Concentration for Recognition**

In order to gain recognition in the Health Care Risk Management, Patient Safety, and Compliance concentration of the M.H.Sc. program, the student must complete all 5 concentration courses for 15 total hours. Those completing the concentration will be recognized as such with appropriate credentials. If you have any questions of how this may apply to your M.H.Sc. completion, contact the program or your academic adviser for assistance.

**Clinical Research Concentration Curriculum**

This concentration is designed for health care professionals who are involved with clinical research or who desire to enter the field of clinical research. This concentration will also be of benefit to those graduate students who desire to go on to a Ph.D. program. The courses in this concentration will prepare graduates with the skills and background necessary to apply statistical data, apply the principles of qualitative or quantitative research, and present research findings through the thesis process. Students must complete all 39 credits, as detailed below.

<table>

### Concentration for Recognition

In order to gain recognition in the Clinical Research concentration of the M.H.Sc. program, the student must complete all five concentration courses for 15 total hours, as well as 12 hours of practical coursework. Those completing the concentration will be recognized as such with appropriate credentials. If you have any questions of how this may apply to your M.H.Sc. completion, contact the program or your academic adviser for assistance.

### Bioethics Concentration Curriculum

This concentration is designed for those allied health professionals who want to be prepared for full participation in medical-ethical decision making. The study of ethical theory and application is an important feature of professional development for the master's degree-prepared allied health professional. **Note:** All courses are delivered and organized as distance learning. Students must complete all 42 credits as detailed below.

Concentration for Recognition

In order to gain recognition in the Bioethics concentration of the M.H.Sc. program, the student must complete all six concentration courses for a total of 20 total hours, as well as the four core courses (12 hours) and the 10 hours of practical coursework as outlined above. Those completing the concentration will be recognized as such with appropriate credentials. If you have any questions of how this may apply to your M.H.Sc. completion, contact the program or your academic adviser for assistance.

Master of Health Science Course Descriptions

**Didactic Core Component Courses**

**Required Courses**

MHS 5003—Current Trends and Cultural Issues in Health Care
This course serves to familiarize the student with current trends and cultural issues in health care that may impact the patient, the health care system, or the ability to deliver high-quality health care. Discussion and analysis of current and cultural topics facing those who work in health care will be explored. (3 credits)

MHS 5205—Writing for Medical Publication
This course provides a study and review of quality medical writing techniques, issues, and procedures with emphasis on cultivating personal style and content. Focus will be on writing for peer and evidence-based publications. (3 credits)

MHS 5501—Epidemiology and Biostatistics
The ability to understand the conceptual and practical aspects of biostatistics and epidemiology in health care is critical to understanding research and analyzing population data about disease. This survey course will improve the ability of the student to understand and apply these concepts. (3 credits)

MHS 5510—Research Methods
This course is designed to enable participants to develop skills in reading and critically evaluating published research by using the scientific model. The advantages and disadvantages of quantitative and qualitative research methods will be compared and contrasted. Research articles will be collaboratively analyzed to develop an appreciation of potential methodological problems and their implications for evidence-based professional practice. (3 credits)

MHS 5521—Ethical Issues in Health Care
The student will examine the ethical issues that confront health care providers and patients. The medical scientific, moral, and socioeconomic bases of these issues and the decision-making processes that providers and patients engage in are analyzed. Topics will include informed and voluntary consent, the role of institutional review boards, euthanasia, the allocation of scarce resources. (3 credits)

MHS 5530—Principles and Practice of Management in Health Care
This course will discuss the various principles of management and its associated issues as they relate to the modern health care professional. The course will explore topics such as concepts of organizational management, decision making, strategic planning, resource management and allocation, conflict, and the concept of power. (3 credits)
Elective Courses

MHS 5103—Principles of Advanced Life Support
Introduction to the accepted principles of the advanced life support measures used in adult medical, traumatic, and pediatric emergencies. Includes a review of the most common emergency situations encountered and provides hands-on practical training that will assist the clinician in developing the skills required to stabilize patients with life-threatening conditions. (3 credits)

MHS 5112—Bioterrorism and Weapons of Mass Destruction
Students will review the effects of warfare and bioterrorism on populations, with emphasis on low-intensity conflict and dispersion of chemical and biological weapons in populated areas. Discussions will be devoted to the ecological, sociological, environmental, and general health effects. (3 credits)

MHS 5211—Contemporary Issues in Nutrition
Covers a variety of general concepts and contemporary discussions in the area of nutrition as it applies to personal health. Many of the concepts learned in this course can be applied to the patient counseling and advisement health care professionals are asked to perform. (3 credits)

MHS 5400—Directed Studies
This course provides the opportunity for students to explore a special topic of interest under the direction of a faculty member. Arrangements are made directly with the appropriate faculty member and the program director. Topic exploration is governed by the needs of the program and the educational goals of the student. Possible topics involve clinical and non-clinical aspects of the practice of medicine in the United States. (1–9 credits)

MHS 5535—Issues in Health Care Leadership
This course requires the student to solve a simulated problem facing a simulated health care organization, addressing its impact on all aspects of the health care institution. Students will describe their leadership philosophy based on recognized leadership theory and how this will play a role in achieving an effective solution to the proposed problem. The course will employ interactive technology to disseminate information on the weekly evolution of the simulated problem. The course culminates in a detailed analysis of the problem, which includes proposed solutions for corrective and preventive measures, potential intended and unintended consequences, and evidence of the student's leadership philosophy. (3 credits)

MHS 5537—Health Care Leadership Quality Assurance/Risk Management
The student will examine health care quality assurance and risk management in the United States and the methods that are utilized to achieve improvements in health care organizations. Upon completion of this course, the student will be prepared to implement continuous quality improvement and performance improvement in management and performance systems by interpreting and understanding of data available to devise, generate, and apply quality performance improvement programs. (3 credits)

MHS 5541—Health Care Systems and Conflict
This introductory course will assist learners to blend conflict-resolution theories, models, and skills into realistic strategies that can be used in a health care setting. The attitudes, knowledge, and skills from this course can be applied to those who deliver, receive, and manage health care. The strategies will be applicable to working with diverse populations, including people with different cultural backgrounds, genders, personalities, positions of power, and agendas. Types of negotiation strategies in order to move toward a collaborative situation will also be addressed. (3 credits)

MHS 5542—Health Care Education
This course explores the various theories and applications of adult education in the practice of training, preprofessional education, and postprofessional education of medical personnel. Critical analysis of the different methods of teaching and training health care professionals is accomplished through discussion, research, investigation, journal development, and assignments. (3 credits)

MHS 5543—Educational Theories and Psychology
This course explores the history and evolution of educational theories and their role in the development of curriculum and instruction related to health care education. (3 credits)

MHS 5544—Curriculum and Instruction in Health Care
Using the principles of curriculum development and related research, students will develop a plan for a unit of instruction for a health care course that includes a need assessment, use of resources, implementation specification, material development, and assessment of instructional effectiveness. (3 credits)

MHS 5545—Assessment and Evaluation in Health Care
This course provides an overview of student and program evaluation and assessment methods in health care education. This course will consider multiple assessment models used in clinical settings, from traditional written assessments to alternative assessment methods such as OSCEs, portfolios, and simulated patients. Students will develop an evaluation/assessment plan tailored to their professional situations. (3 credits)
MHS 5546—Health Care Finance
This course introduces the fundamental theory and concepts of health care finance, focusing on relevant applications to a wide variety of health care settings. Emphasis will be placed on the understanding of key issues in order to provide the tools necessary for clinicians to function within a health care environment. Concentration is on managerial, rather than production, accounting perspective. Major topics include principles of accounting, budgeting, analysis of financial statements, activity-based costing, responsibility accounting, and provider payment and reimbursement systems. The student will be required to prepare a formal paper on a health care finance topic. (3 credits)

MHL 2030—Risk Management
This course focuses on the legal importance of risk management programs for health care institutions. In doing so, it examines the keys to organizing and implementing successful risk management programs. It also focuses on considerations for developing effective risk management programs, evaluating them, and addressing specific risk areas, including those arising in managed care and integrated health care delivery systems. Prerequisite: MHL 1020 (2 credits)

MHL 1030—Administrative Law
This course explores the role of administrative law in health care and the effects of federalism and constitutional issues in that context. Students will review the sources of law for health care providers (institutions, organizations, and individuals). In doing so, they will chart the overlapping, and sometimes conflicting, roles of federal and state legal regulation and study the implications and effects of the various types of laws that govern the provision of health care—administrative agency regulations, constitutional provisions, statutes, and court decisions. (3 credits)

MHL 1010—Institute on Campus I (1 credit)

MHL 1020—Legal Research Methods and Reasoning
The law is never static. Coupled with its ever-increasing role in the governance of health care institutions and health care practitioners, this truism means that health care practitioners and administrators may need to obtain, review, and apply newly issued laws or legal decisions in their day-to-day activities. This course will enable students to find the law, to read and understand legal statutes and regulations, and to understand the analytic process lawmakers and lawyers use. (4 credits, includes 1-credit, on-campus institute)

MHL 1060—Tort and Contract Law
This course provides a detailed introduction to the legal principles and major concepts of tort law and contract law, focusing on legal claims and disputes in the health care context. Prerequisite: MHL 1020 (2 credits)

MHL 2000—Institute on Campus II (1 credit)

MHL 2030—Risk Management
This course focuses on the legal importance of risk management programs for health care institutions. In doing so, it examines the keys to organizing and implementing successful risk management programs. It also focuses on considerations for developing effective risk management programs, evaluating them, and addressing specific risk areas, including those arising in managed care and integrated health care delivery systems. Prerequisite: MHL 1020 (2 credits)

MHL 1090—Law Accreditation/Licensing
This course provides a detailed examination of the legal aspects of two credentialing concepts—accreditation and licensure—in both the individual health care practitioner setting and the institutional setting. Students will examine the primary goal of these concepts (i.e., protecting the public), how accreditation differs from licensure, and how they interrelate. Prerequisite: MHL 1020 (2 credits)

MHL 1080—Law of Patients Rights and Advocacy
Over the last century, the law governing medicine has seen a shift from paternalism to respect for patients as the decision makers. Beginning with the development of the bedrock legal principles of informed consent, this course will examine the legal aspects of the patients’ rights movements and will trace the status of patients’ legal abilities to control their treatment. Part of the course will be devoted to the existence of, substance of, and reasons for patients’ rights statutes specific to hospital and nursing home settings. Prerequisite: MHL 1020 (2 credits)

MHS 5801—Applied Anatomy for Kinesiology
This course will address medical terminology and anatomy as they pertain to the kinesiology of each joint. The course lays the foundation for understanding the relevant anatomical and physical biomechanics of sports. (3 credits)

MHS 5802—Sports Injury Rehabilitation Principles
This course will use the knowledge of biomechanics to understand the nature of traumatic and overuse injuries in athletes. Rehabilitation concepts as well as specific programs for athletes will be covered. (3 credits)

MHS 5810—Certified Strength and Conditioning Specialist Preparation
This course is a review of the material and preparation necessary for this national certification examination. CPR required prior to registration. (3 credits)

MHS 5546—Health Care Finance
This course introduces the fundamental theory and concepts of health care finance, focusing on relevant applications to a wide variety of health care settings. Emphasis will be placed on the understanding of key issues in order to provide the tools necessary for clinicians to function within a health care environment. Concentration is on managerial, rather than production, accounting perspective. Major topics include principles of accounting, budgeting, analysis of financial statements, activity-based costing, responsibility accounting, and provider payment and reimbursement systems. The student will be required to prepare a formal paper on a health care finance topic. (3 credits)

MHS 2021—Pharmaceutical Law
This course is designed to provide an understanding of the pharmaceutical industry and the role of the various stakeholders involved. Topics will touch upon the legal, regulatory, policy, business, scientific, and ethical issues
related to the industry. A selection of topics will be covered and may include the drug discovery process, drug promotion, drug distribution from manufacture through dispensing, insurance and reimbursement, controlled substances, negligence and malpractice, licensing and certification, health informatics, antitrust, and intellectual property rights. Government agencies including the FDA, CMS, DEA, and state licensing boards will be discussed throughout the course. (3 credits, includes 1-credit, on-campus institute)

MHS 5611—Firearms, Fingerprints, and Other Impression Evidence
This course will provide students with a broad overview of the impression evidence discipline in forensic science. Topics discussed will include firearms and tool mark examination and microscopy, footwear and tire track examination, and latent fingerprints. Current courtroom challenges such as Daubert issues related to impression evidence will also be discussed. Students will be evaluated on the concepts learned based on practical exercises, tests, a final exam, and a research paper. (3 credits)

MHS 5612—Forensic Analysis of Trace and Drug Evidence
This course will be divided into two sections: trace evidence and drugs. In the first segment, the course will cover the different drugs of abuse, the controlled substances act, dependency, and the forensic analysis of these samples. The trace evidence segment will include basic microscopy, fibers, paint, glass, fractures, hairs, explosives, and arson. Concepts will be solidified via case studies. (3 credits)

MHS 5613—Crime Scene
This course will provide students with an in-depth understanding of the various steps to processing a crime scene. These will include scene documentation, evidence collection and preservation, and interpretation. In addition, scene safety and current courtroom challenges will be discussed. (3 credits)

MHS 5614—Technology That Revolutionized Criminal Investigations
This course will provide students with a survey of the field of forensic genetics in an understandable manner. Topics will include presumptive testing, a history of serological analyses, and the beginning of the era of DNA technology including RFLP and AMPFLP analysis. Newer methods of typing such as Short Tandem Repeat (STR), Y-chromosome STR, SNP analysis, mitochondrial sequencing, and mini-STRs will be explored. Case studies and examples of these methods will be examined and investigated empirically. This course is an invaluable tool for criminal investigators, attorneys, and those students planning to work in the forensic genetics field. (3 credits)

MHS 5615—Overview of Crime Laboratory Management
A review of process management, work flow, and future growth will be discussed. This course will provide students with a survey of manpower, quality assurance, safety, and budgeting issues, as well as what job requirements are needed to perform various jobs from crime scene detective to DNA analyst. Accreditation, certification, and outside review of laboratory performance will be explored. The C.S.I. effect and its impact on the modern forensic laboratory will be examined. The competing interests of case analysis, prosecution, and investigation will be detailed. (3 credits)

MHS 5539—Health Care and Regulatory Compliance
This course will cover recent developments in compliance regulations resulting from federal and state laws governing health care in various settings including HIPPA and HITECH. Students will learn about the seven essential elements of an effective compliance program and how to implement them. Course topics include setting up and maintaining a compliance program, the role of the health care compliance officer, investigating, reporting, enforcement, and discipline. Students will have the opportunity to explore a case study on ethics in compliance and to develop sample compliance forms and policies that can be used in a variety of health care settings. (3 credits)

MHS 5540—Enterprise Risk Management
This course provides a framework for the implementation of enterprise risk management as a means for implementation of a comprehensive risk management process and plan that encompasses the entire enterprise, crossing departmental barriers. Course topics include enterprise risk management and its evolution, risk financing methods, contract management, claims management, environmental compliance, human research, peer review and credentialing, due diligence in business transactions, consent to treatment, advent of discovery rules, and the
MHS 5908—Applied Statistics
This course is an introduction to applied statistics and data analysis. Topics include collecting and exploring data, basic inference, simple and multiple linear regressions, analysis of variance, nonparametric methods, and statistical computing. (3 credits)

MHS 5992—Qualitative Research Methods
This course explores the development and application of qualitative research designs and methods. It considers a broad array of approaches, from exploratory narratives to focused comparison case studies, for investigating plausible alternative hypotheses. The focus is on analysis, not data collection. (3 credits)

MHS 5991—Quantitative Research Methods
This course develops logical, empirically based arguments using statistical techniques and analytical methods. Elementary statistics, probability, and other types of quantitative reasoning useful for description, estimation, comparison, and explanation are covered. Emphasis is on the use and limitations of analytical techniques in planning practice. (3 credits)

MHS 5904—Research Ethics
This seminar-based course explores techniques for recognizing, analyzing, and resolving ethical dilemmas facing health care professionals and biomedical researchers in today's highly regulated environment. Professional conduct topics include authorship, conflict of interest, data acquisition and management, and the protection of human subjects and animals involved in research programs. (3 credits)

MHS 5906—Developmental Writing
This course provides students with the opportunity to assimilate the skills required to communicate in academic settings both orally and in writing. The purpose of this course is twofold. First, the course will acquaint students with the guidelines that will assist them in creating well-crafted academic communication. Second, it will give students the opportunity to practice their communication skills and receive feedback from colleagues and instructors. The primary focus of the course is the thesis process. (3 credits)

MHS 5528—Technological Advances in Medicine and the Impact on Ethics
The advancement of science and the invention of new medical technologies present new challenges for traditional bioethics. Scientific advances in cloning, stem cell research, genetic engineering, genetic testing, reproductive technologies, and genomics have profound impacts on the individual and society. In this course, students will explore controversies in bioethics arising from these new technologies, as well as have the opportunity to debate these issues, applying bioethical theories and principles. (3 credits)

Practical Components
MHS 5309—U.S. Health Policy
This course will explore how U.S. health policy is made and the interests and roles of various stakeholders and state, local, and federal governments. Students will analyze health policies and discern what impact proposed and executed health policies will have on health care entities, groups, individuals, and health care practice. Students will gain the skills necessary to conduct a policy analysis that examines a health care or public health issue or concern. (5 credits)

MHS 5207—Practicum
The practicum is a cumulating experience for M.H.Sc. students. Under supervision of an M.H.Sc. faculty adviser, students will develop community-based health education or health promotion and disease prevention interventions with underserved and/or nontraditional populations. (5 credits)
Practical Components—Clinical Research Concentration Only

MHS 5995—Thesis I
This course is intended for students planning to conduct research in a variety of different settings. Its topics include case studies, interviews, documentary evidence, and participant observation and survey research. The primary goal of the course is to assist students in preparing their formal thesis proposal. The instructor must approve the proposal. (3 credits)

MHS 5996—Thesis II
In this course, the student will carry out the proposed research (under the instructor's supervision) and conduct data analysis, which will culminate in a summary paper of the student's research findings. Prerequisite: MHS 5995 (3 credits)

MHS 5997—Thesis III
This course is dedicated to the formal writing of the student's thesis under the professor's supervision. Once the instructor accepts the paper, two other faculty members on the student's thesis committee will review it. Once the thesis has been reviewed and accepted, the student may register for MHS 5998. Prerequisites: MHS 5996 and MHS 5995 (3 credits)

MHS 5998—Thesis IV
In this course, the student prepares for oral defense of the thesis and revision of the thesis manuscript. Prerequisites: MHS 5995, MHS 5996, and MHS 5997 (3 credits)

Accelerated Dual-Degree M.H.Sc./D.H.Sc. Program

This accelerated dual-degree program was designed for accomplished, motivated health care practitioners educated at the bachelor’s degree level who desire a clinically applicable, postprofessional, interdisciplinary doctoral degree. The program is specifically appropriate for those practitioners who have a strong desire to teach within the health disciplines at the graduate level or assume advanced professional and institutional leadership roles within the health care delivery system.

The combined M.H.Sc./D.H.Sc. degree provides rigorous academic exposure to a wide range of topics pertinent to clinicians, health administrators, and health professions educators. These topics include epidemiology, health care finance, statistics and research methods, conflict resolution, leadership studies, professional writing, health policy, global health issues, evidence-based medicine, medical informatics, and medical quality assurance/risk management. Students have the opportunity to engage in capstone research experiences and internships within their home community.

Graduates are equipped with the knowledge, skills, and experience to expand their professional roles in both clinical and non-clinical arenas. Study is primarily nonresidential, and uses state-of-the-art online course platforms that permit synchronous and asynchronous learning experiences. Students are required to attend two one-week, on-campus institutes during the doctoral portion of their studies.

This accelerated track permits the motivated student to earn both a master's and a doctoral degree from our respected, regionally accredited research institution. The 82 credits of course content earned can be completed with three–seven years of study.

M.H.Sc./D.H.Sc. Accelerated Program
• total combined semester hours: 82
• 21 hours completed in the M.H.Sc. program
• 61 hours completed in the D.H.Sc. program
• M.H.Sc. degree awarded after completion of 44 credits (the 21 credits of the M.H.Sc. core courses, the D.H.Sc. ethics and research courses, a 4-credit D.H.Sc. course of the student’s choice, the DHS internship/practicum preparation course, and the D.H.Sc. Internship and D.H.Sc. Practicum courses)
• M.H.Sc. courses all taught through distance learning
• D.H.Sc. courses taught through distance learning and at required on-campus summer institutes
• chat sessions and threaded discussions, a regular part of the program, promote student-professor and student-student interaction

Admissions Requirements
Prior to matriculation, applicants must have completed a bachelor's degree from a regionally accredited college or university. Applicants should demonstrate a cumulative bachelor's degree GPA at or above a 3.0 on a 4.0 scale. Prior health care experience is required. The postprofessional M.H.Sc./D.H.Sc. dual-degree program is designed for
health practitioners and clinicians from a wide variety of disciplines. The successful administrative applicant will demonstrate at least five years of professional experience with increasing levels of responsibility in a health care setting. Professional experience will be documented by an organizational chart demonstrating the applicant's position within the organization and a letter of recommendation from a supervisor attesting to the applicant's level of responsibility within the organization. Health care administrators will also need to submit a statement concerning their career and professional goals within the health care environment. Fellowship or certification by a recognized health certifying body (e.g., FACHE) is desirable.

Beginning with the admission cycle for fall 2012, applicants will be required to take the GRE and submit their scores as part of the application process.

All applicants must show evidence of computer skills through coursework or self-study prior to the end of the first semester. Students may obtain instruction through the NSU microcomputer laboratory or other training facilities.

The university reserves the right to modify any requirement on an individual basis, as deemed necessary by the dean of the College of Health Care Sciences.

**Tuition and Fees**

Tuition for M.H.Sc. courses are $410 per semester hour for courses offered during the summer II and fall 2016 terms. Tuition for winter, spring, summer II, and fall 2017 terms will subsequently be posted on our website (nova.edu/cah/healthsciences/mhs).

Tuition for D.H.Sc. courses are $635 per semester hour for courses offered during the summer II and fall 2016 terms. Tuition for winter, spring, summer II, and fall 2017 terms subsequently will be posted on our website (nova.edu/cah/healthsciences/dhs).

An NSU student services fee of $1,050 is also required annually. All tuitions and fees are subject to change by the board of trustees without notice.

**Application Procedures**

Applicants for admission must submit to EPS, or be responsible for submission of,

1. a completed application form, along with a $50, nonrefundable application fee
2. two evaluation forms—supplied in the application package or by request—from supervisors or colleagues, clinical or nonclinical
3. official transcripts sent directly from all previously attended undergraduate, professional, and graduate institutions
4. all coursework from international institution(s), if applicant attended or is a graduate of any international institution(s)

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org
- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com
- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Health Care Sciences, Department of Health Science Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

5. complete resume or curriculum vitae
6. copies of national and professional certifications or licenses by a recognized certifying body (if applicable)

Complete applications and all admission documentation must be sent to

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences
M.H.Sc./D.H.Sc. Accelerated Track
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Phone: (954) 262-1101
877-640-0218
Fax: (954) 262-2282

Beginning with the admission cycle for fall 2012, applicants have been required to take the GRE and submit their scores as part of the application process.

**Computer Requirements**

All students are required to have a computer with the following minimum specifications:

- Pentium or AMD at 1.00 GHZ or equivalent Macintosh processor
- 256 MB RAM
- video and monitor capable of 1024 X 768 resolution or better
- CD-ROM drive
- full duplex sound card and speakers
- Internet connection with Internet service provider (DSL, cable, or satellite highly recommended)
- Windows XP or NT or MAC OS or better
- Microsoft Office 2000 or newer with PowerPoint, Word, and Excel minimum
- printer capability

### Requirements for Graduation

To be eligible to receive the M.H.Sc. and D.H.Sc. degrees, students must:

- be of good moral character
- satisfactorily complete the 21 credits in the M.H.Sc. and the 61 credits in the D.H.Sc. programs
- receive a recommendation by the M.H.Sc. and D.H.Sc. program directors to the dean of the College of Health Care Sciences

### Specific Requirements for Graduation for the M.H.Sc. in the Accelerated Dual-Degree M.H.Sc./D.H.Sc. Program for Students Matriculating on or After Fall 2009

Students are required to have 21 credits in the MHS core courses.

Total credits completed in the D.H.Sc. program: 61
Course Descriptions

Master of Health Science

MHS 5003—Current Trends and Cultural Issues in Health Care
This course serves to familiarize the student with current trends and cultural issues in health care that may impact the patient, the health care system, or the ability to deliver high-quality health care. Discussion and analysis of current and cultural topics facing those who work in health care will be explored. (3 credit hours)

MHS 5205—Writing for Medical Publication
This course provides a study and review of quality medical writing techniques, issues, and procedures with emphasis on cultivating personal style and content. Focus will be on writing for peer and evidence-based publications. (3 credit hours)

MHS 5211—Contemporary Issues in Nutrition
The course covers a variety of general concepts and contemporary discussions in the area of nutrition as it applies to personal health. Many of the concepts learned in this course can be applied to the patient counseling and advisement health care providers are asked to perform. (3 credit hours)

MHS 5400—Directed Studies in Medical Science
This course provides the opportunity for students to explore a special topic of interest under the direction of a faculty member. Arrangements are made directly with the appropriate faculty member and the program director. Topic exploration is governed by the needs of the program and the educational goals of the student. Possible topics involve clinical and non-clinical aspects of the practice of medicine in the United States. (3 credit hours)

MHS 5501—Epidemiology and Biostatistics
The ability to understand the conceptual and practical aspects of biostatistics and epidemiology in health care is critical to understanding research and analyzing population data about disease. This survey course will improve the ability of the student to understand and apply these concepts. (3 credit hours)

MHS 5530—Principles of Management in Health Care
This course will discuss the various principles of management and its associated issues as they relate to the modern health care professional. The course will explore topics such as concepts of organizational management, decision making, strategic planning, resource management and allocation, conflict, and the concept of power. (3 credit hours)

MHS 5541—Health Care Systems and Conflicts
This introductory course will assist learners to blend conflict resolution theories, models, and skills into realistic strategies that can be utilized in a health care setting. The attitudes, knowledge, and skills gained from this course can be applied to those who deliver, receive, and manage health care. The strategies will be applicable to working with diverse populations, including people of different cultural backgrounds, personalities, sex, positions of power, and agendas. Types of negotiation strategies to help move toward a collaborative situation will also be addressed. (3 credit hours)

MHS 5543—Educational Theories and Psychology
This course explores the history and evolution of educational theories and their role in the development of curriculum and instruction related to health care education. (3 credit hours)

MHS 5544—Curriculum and Instruction in Health Care Education
Using the principles of curriculum development and related research, students will develop a plan for a unit of instruction for a health care course that includes a needs assessment, use of resources, implementation specification, material development, and assessment of instructional effectiveness. (3 credit hours)

MHS 5545—Assessment and Evaluation in Health Care Education
This course provides an overview of student and program evaluation and assessment methods in health care education. This course will consider multiple assessment models used in clinical settings, from traditional written assessments to alternative assessment methods such as OSCEs, portfolios, and simulated patients. Students will develop an evaluation/assessment plan tailored to their professional situation. (3 credit hours)

MHS 5546—Health Care Finance
This course introduces the fundamental theory and concepts of health care finance focusing on relevant applications to a wide variety of health care settings. Emphasis will be placed on the understanding of key issues in order to provide the tools necessary for clinicians to function within a health care environment. Concentration is on managerial, rather than production, accounting perspective. Major topics include principles of accounting, budgeting, analysis of financial statements, activity-based costing, responsibility accounting, and provider payment and reimbursement systems. The student will be required to prepare a formal paper on a health care finance topic. (3 credit hours)
Doctor of Health Science

DHS 8000—Health Care for Diverse Populations/Professional Competencies in the Clinical Care of Diverse and Special Populations
This course focuses on issues and information relating to the general epidemiological concerns, health care disparities, and specific health and disease issues involved in the care of both culturally based diverse populations (African American, Native American, Asian and Asian sub-populations, and Latino-Hispanic populations), and other nonethnic special populations (homeless, uninsured, indigent, disabled, incarcerated, rural, inner city, GLBT, geriatric, pediatric, and others). (4 credit hours)

DHS 8010—Statistics and Research Methods
This course allows the student to develop understanding through critical analysis of the basic research methods used in health care. Students will be taught how to critically analyze medical information and perform effective literature reviews. (4 credit hours)

DHS 8030—Community Health Promotion and Disease Prevention
This course develops the knowledge and skills needed to work with communities to improve the health status of the community. Major topics will include health promotion and disease prevention. Special emphasis will be placed on the “Healthy People 2010” initiatives. (4 credit hours)

DHS 8040—Professionalism and Health Care Ethics
This course is an in-depth study of the concepts of health care ethics. The course of study analyzes the differences between ethics and law and examines the core values and beliefs of medical professionalism. Methods of ethical analysis and a review of current case studies will be used in critical discussions of ethical dilemmas faced by health care personnel in areas such as cloning, organ transplantation, and the implications of the Human Genome Project. The student will explore the personal values, professional standards, and institutional guidelines that define the roles and responsibilities of the health care practitioner. (4 credit hours)

DHS 8045—The Influence of Ethics and Culture on Global Health
Technology, research, and the advancement of health care interventions have produced impressive improvements in health outcomes for many. Unfortunately, these advancements have also led to inequalities in health status within and between countries, creating growing global ethical dilemmas. The world is faced with new challenges, such as the potential for pandemics, an aging population, a diminishing health care workforce, and the stresses of determining resource allocation. With these challenges comes a need to better understand the process of ethical reasoning and resolution, as this will be paramount for the development and maintenance of global health. Another dimension that must be considered in ethical decision making is the influencing factors of culture. Culture comprises the political, social, economic, religious, and ethnic norms and values of a society. Culture is instrumental in shaping bioethical policy worldwide, which necessitates its inclusion and consideration in all global ethical discussions. The purpose of this course is to provide an introduction to the principles and theories of ethics as applied to global health, and how culture influences ethical decision making. The course will examine some of the primary theories and principles in health care ethics including virtue, deontology, utilitarian, autonomy, justice, beneficence, and nonmaleficence. The course will explore many prominent global health issues and exemplify how greater knowledge and understanding of global ethics and culture is vital to effective and sound decision making. Topics that will be discussed in the course include ethical issues related to pandemic preparedness, end of life, human organ transplantation, clinical research in developing countries, human rights, resource allocation, and the effects of globalization on world health. It is anticipated that students will bring their own ethical dilemmas arising from their own experiences, cultures, and practices. (4 credit hours)

DHS 8080—Conflict Resolution in Health Care
This course examines and analyzes the nature and dynamics of human conflict within civil societies. Emphasis is placed upon conflicts within and among governments and public sector agencies and between the health provider, patients, and medical institutions. Students will be expected to take an active role in the course and develop their own strategies for dealing with conflict. A paper will be required that details and analyzes a conflict situation in the student's work or other environment and how the conflict was resolved. (4 credit hours)

DHS 8090—Health Policy, Planning, and Management
This course critically examines the dynamics of health care in the United States. The student is expected to analyze the health care industry and contrast nonprofit and for-profit health care delivery systems. A critical exploration of the ramifications of health care reform and the impact on institutions and individuals will be undertaken. The concepts of cost containment, and long-term care will be analyzed. (4 credit hours)

DHS 8095—Global Health Policy
Globalization affects all sectors, including health care, and understanding the key policy issues is essential in the study of global health. This course, taught from a clinical perspective, examines the health policy issues confronting international health organizations, governments, and specific populations. It reviews the processes that influence
the development and implementation of policies and examines specific topics related to HIV/AIDS, poverty and nutrition, infectious disease, smoking, concerns of women and children, and other global major health concerns. (4 credit hours)

DHS 8100—Alternative and Complementary Medicine
This course examines and analyzes alternative and complementary medicine and their impact on the health care industry. The approach to the subject is to present selected alternative and complementary medicine fields in an informative, nonjudgmental format. (4 credit hours)

DHS 8110—Community Environmental and Occupational Health
Issues such as air and water quality and waste management will be examined. OSHA will be examined and analyzed for its impact on health and health care. Trends in environmental and occupational health legislation will be examined for their impact potential. (4 credit hours)

DHS 8120—Doctoral Analysis
In this faculty-supervised project, the student will develop a paper using the objectives from the core courses and one elective as guidelines and references to form the basis of the paper. This will require research into teaching and learning methods as well as online and in-class comparisons. The outcome or final product will be an in-depth analysis of the information presented and the knowledge gained during the doctoral program. This paper will also include methods for improving the program of study in the D.H.Sc. department and detailed methods to be used to deliver the proposed changes. (2 credit hours)

DHS 8125—Preparation Forum
Students should enroll in this course within one to two semesters of matriculation into the D.H.Sc. program. This is a 1-credit course in which students work closely in a one-on-one fashion with the course instructor/mentor to develop appropriate learning objectives and experiential plans for the internship (DHS 8130) and a substantial developmental project for the practicum (DHS 8140). Together, the internship and practicum form the capstone of the program. Attention is also paid to appropriate preparation for the form and style of the written deliverables of the internship and practicum and appropriate timelines for completion. Successful completion of DHS 8125 will include the following: completion of APA-style quizzes, approval of topic for DHS 8130 at least one semester prior to enrollment, approval of topic for DHS 8140 one to two semesters prior to enrollment, and completion of an error-free proposal for DHS 8140 at least one to two semesters prior to enrollment. Students will be continuously enrolled in DHS 8125 until all three tasks are accomplished. (1 credit hour)

DHS 8130—Internship
This course is the capstone of the program. The student will perform an internship at a community health care institution, clinic, educational facility, etc., which is approved in the DHS 8125 course at least one semester prior to enrolling in DHS 8130. The student should spend a minimum of 80 clock hours learning skills from a mentor. Examples of acceptable internship experiences include teaching assistantships to learn on-site or online teaching skills, volunteering at nonprofit organizations to learn about particular topics in health promotion and disease prevention, or shadowing an executive to learn leadership and executive skills, among other experiences. Students on the global track must have an internship experience that has an international basis. The student will write a report that describes the institution, defines the population served, and details the health promotion activities observed. A critical evaluation should be made that details strengths, weaknesses, opportunities, and threats to the institution in order to analyze if the skills delineated are able to be learned. Prerequisite: DHS 8125 (5 credit hours)

DHS 8140—Practicum
The practicum is a written project that is developmental in nature. The practicum project must be approved in the DHS 8125 course one to two semesters prior to enrolling in DHS 8140. Enrollment in the practicum course must be preceded by a proposal that contains the project idea and a preliminary literature review, which will be written in the DHS 8125 course at least one to two semesters prior to enrolling in DHS 8140. The student will be required to choose a health promotion topic and create a health promotion program or educational resource that can be used for a community education program. An implementation and evaluation plan must be included in the final product. Examples of appropriate educational resources include developing a presentation for a national conference, developing a presentation for an in-service, or developing a course curriculum. Students on the global track must have an international basis for the project. Prerequisite: DHS 8125 (5 credit hours)

DHS 8150—Continuing Internship Services
This course is a continuation of DHS 8130. It is used when the student is given an incomplete grade and needs to finish his or her internship. (0 credit hours)

DHS 8160—Continuing Practicum Services
This course is a continuation of DHS 8140. It is used when the student is given an incomplete grade and needs to finish his or her practicum. (0 credit hours)
DHS 8170—Leadership in Health Care
This course explores the various methods of leadership and management, both in and out of health care, and their impact on productivity, profitability, and employee satisfaction. Critical analysis of the different types of leadership and management theories is given and the need for developing a leadership plan is explored. The student is expected to gain knowledge of the various types of leaders and systems and will be required to research and develop a paper on a specific leadership topic. (4 credit hours)

DHS 8180—Medical Writing
This course examines in practical terms the elements required for the successful publication of a journal article or clinical case review. Methods of document preparation, proper word and punctuation use, and the requirements for authors of biomedical journal articles will be discussed. (4 credit hours)

DHS 8190—Health Care Education
This course explores the various theories and applications of adult education in the practice of training, preprofessional education, and postprofessional education of medical personnel. Critical analysis of the different methods of teaching and training health care professionals is accomplished through discussion, research, investigation, journal development, and assignments. (4 credit hours)

DHS 8200—Independent Study A
This course is supervised by a faculty member and is a self-directed experience for the student. The student will be required to develop a proposal regarding the topic of study, a learning contract with specific objectives, and a plan of action to include methods of obtaining the information and the material produced to demonstrate an in-depth understanding of the subject areas. A faculty member will be assigned to the student for the supervised course. The purpose of this course is to allow the student to explore an area of interest in the field of health care or health sciences. The secondary benefit of the course is to allow the student, with the assistance of the faculty member, to develop and complete a doctoral level of study. Upon completion of the course, the student should be able to develop a proposal regarding a particular area of health sciences sufficient for doctoral level of study, develop a learning contract and self-directed course of study at the doctoral level, develop curriculum components for an educational program using self-directed study, describe information research during the completion of the objectives, and describe the methods of developing and successfully completing a self-directed course. (1–4 credit hours)

DHS 8250—Independent Study B
This course is supervised by a faculty member and is a self-directed experience for the student. The student will be required to develop a proposal regarding the topic of study, a learning contract with specific objectives, and a plan of action to include methods of obtaining the information and the material produced to demonstrate an in-depth understanding of the subject areas. A faculty member will be assigned to the student for the supervised course. The purpose of this course is to allow the student to explore an area of interest in the field of health care or health sciences. The secondary benefit of the course is to allow the student, with the assistance of the faculty member, to develop and complete a doctoral level of study. Upon completion of the course, the student should be able to develop a proposal regarding a particular area of health sciences sufficient for doctoral level of study, develop a learning contract and self-directed course of study at the doctoral level, develop curriculum components for an educational program using self-directed study, describe information research during the completion of the objectives, and describe the methods of developing and successfully completing a self-directed course. (1–4 credit hours)

DHS 8400—Global Health Issues
Global health care is an emerging priority for health professional education programs and clinical practice. It is essential for all health care professionals to understand the impact of global health issues on health care and international economic stability. This course explores the many facets of global health to expose the student to the complexity of the concepts that impact health care in developing and developed countries. (4 credit hours)

DHS 8700—Comparative International Health Systems
The purpose of this course is to provide an introduction to the principles, structure, and function of international health systems through a comparative analysis of various countries’ health care systems. The course will explore how national systems have evolved and how countries confront the emerging issues in health care. The course will explore and develop a systematic comparative analysis of the evolution, administrative structures, societal choices, financing, and provision of health care services in underdeveloped, developing, and developed countries. (4 credit hours)

DHS 8750—Patient Safety Medical Error
Leadership plays a key role in adopting practices to promote patient safety and leaders should have the skills necessary to be effective in the implementation of these practices. This course will focus on patient safety through a study of safety-oriented leadership, organizational culture, human factors, decision-making science, communication, and a systems approach to health care delivery. Current best practice models and the latest professional literature emphasizing patient safety will be featured. (4 credit hours)
DHS 8775—Survey of Health Law
This course is designed to introduce D.H.Sc. students to health law or law as it affects the professionals and institutions that deliver health care in the United States. The course focuses on the traditional areas of concern for courses on health law, including access to health care, the cost of health care, the quality of health care, and protection of the person of the patient. (4 credit hours)

DHS 8800—Health Care Informatics
This course will focus on available and future methodologies and technologies for the processing, archiving, analysis, and transmission of data, information, and knowledge in the medical and health care setting. (4 credit hours)

DHS 8810—Epidemiology and Global Health
This course emphasizes the underlying concepts of the epidemiologic approach as it relates to pertinent global health issues. The student will be introduced to principles and methods of epidemiologic research. These include study designs, measures of frequency, association, impact, and sources of error. Application to global health and public health strategies for disease prevention, surveillance, and controls are discussed. (4 credit hours)

DHS 8900—Narrative Medicine
There is great value in listening to patient narratives and reflecting upon what is communicated through these stories about health, illness, suffering, and recovery. In this course, students will explore written forms of patient narratives, as well as multimedia presentations, movies, music, song, and visual arts to improve their understanding of patient experiences. Students will learn how to enhance their own listening, self-reflection, and communication skills, and, in the process, they will develop narrative competencies that emphasize empathy, compassion, and other effective components of quality care. The course will explore ways in which a study of the medical humanities contributes to a deeper understanding of personal and social features that affect the quality of patient care. (4 credit hours)

HSP 9006—Concepts in Evidence-Based Medical Practice
This course provides a working knowledge of evidence-based medicine. Cases will be used as the backbone of this course to assist the student in analyzing data to justify the treatments used in clinical practice. Students will also learn how to critically appraise the literature, evaluate diagnostic test performance, design clinical pathways and standards of care, and implement evidenced-based medicine findings in their own clinical or administrative settings. (4 credit hours)

Doctor of Health Science (D.H.Sc.) Program

The D.H.Sc. has a two-concentration curriculum. One is the generalist concentration. The second is the generalist course of study with a concentration in global health studies. The generalist D.H.Sc. program requires completion of a minimum of 61 semester hours of coursework. This includes 48 semester hours didactic coursework, 11 semester hours practical coursework, and 2 semester hours for the Doctoral Objective Analysis. The generalist D.H.Sc. program with a concentration in global health studies also consists of 61 semester hours, with the majority of electives and the internship and practicum dedicated to global health topics.

The D.H.Sc. program is designed for completion in a distance learning format and requires only minimal on-campus time during two intensive, one-week, summer institute seminar sessions. The residential summer sessions are available at the NSU campuses or student educational centers, with the location varying from year to year.

The program curricula are designed to build upon the scientific and general knowledge of the health care professional while focusing on the overall health care picture. Leadership, policy, diversity, evidence-based medical practice, and alternative methods of treatment are but a few of the areas stressed in the generalist curriculum.

During the generalist course of study, the student must complete a practicum and internship approved by the D.H.Sc. program director in an area of health care such as leadership, education, policy, or delivery. Students selecting the global health concentration will focus their internship and practicum work in the global health arena. The internship is used to expose the student to an area of health care not commonly experienced in the student’s normal area of practice. Though they are two separate portions of the curriculum, the internship may be used as an area of research in preparation for undertaking the practicum.

The coursework is professor-paced using state-of-the-art, web-based delivery. The curriculum and coursework follow a standard 12-week semester calendar in conjunction with resident on-campus programs. At the standard pace
established by the program, the course of study can be completed in three years. It is required that all coursework be completed within seven years.

Admissions Requirements
Prospective D.H.Sc. students are selected by the Committee on Admissions, which considers the overall qualities of applicants and their suitability for this course of study. Areas of consideration include application content, academic record, prior health care experience, letters of evaluation, and personal motivation. In special circumstances, a personal interview with members of the committee on admissions may be required.

1. Prior to matriculation, applicants must have completed a master's degree from a regionally accredited college or university.

2. Applicants should demonstrate a cumulative master's degree G.P.A. at or above a 3.0 on a 4.0 scale to be eligible for regular admission. The Committee on Admissions will make a recommendation to the dean of the college as to any remedial coursework necessary for an applicant to achieve full admission.

3. Prior health care experience is required and is strongly considered in the admissions process. The D.H.Sc. is a postprofessional degree designed for advanced health practitioners, public health professionals, and health care administrators from a wide variety of disciplines. The commonality exhibited by our students is the expert practice of a recognized health occupation at a professional level, or five years of administrative experience in a health care organization with progressively increasing responsibilities over that time frame. The successful applicant's health profession may emphasize delivery of services to individual clients (e.g., PA, PT, R.N., LCSW, etc.) or be population based (M.P.H., M.H.A.). An appropriate level of professional practice is generally recognized by health professions licensure (e.g., R.N., PT), a national certification or registration (e.g., PA-C, RVT, RRT, CRNA, FACHE), a recognized health professions academic credential (e.g., M.P.H., M.S.N., M.S.W., M.H.A., M.B.A.), or a combination of the above. All questions regarding the appropriateness of an applicant's qualifications for admission can be discussed with the department chair or program director on an informal basis, but the official recommendations are made by the Committee on Admissions to the dean of the College of Health Care Sciences. The dean makes the final determination. Successful past applicants and graduates have included physicians, dentists, nurses, nurse practitioners, nurse midwives, physician assistants, master's degree-level social workers, physical therapists, occupational therapists, dental hygienists, and athletic trainers.

We have recently expanded the program to include health care administrators, and our graduates now include a hospital CEO and an assistant surgeon general of the U.S. Public Health Service.

4. All applicants must show evidence of computer skills through coursework or self study prior to the end of the first term. Students may obtain instruction through the NSU Student Microcomputer Laboratory, the D.H.Sc. Orientation Center, or other training facilities.

Application Procedures
All applicants for admissions must submit or be responsible for the submission of

1. a completed application form along with a $50, nonrefundable application fee

2. two letters of evaluation from supervisors or colleagues, clinical or nonclinical (An administrative/nonclinical applicant must include a letter from his or her direct supervisor describing the applicant's position and responsibilities within the organization.)

The evaluation form is supplied in the application package.

3. official transcripts sent directly from all previously attended undergraduate, professional, and graduate institutions to

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Phone: (954) 262-1101
877-640-0218
Fax: (954) 262-2282

4. an evaluation for U.S. institutional equivalence for all coursework from international institution(s), if applicant attended or is a graduate of any international institution(s)

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com

- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org
It is the applicant's responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Health Care Sciences, Department of Health Science Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

5. a complete resume or CV

6. copies of national and professional certifications or licenses by recognized certifying bodies

A writing sample may be required beginning in winter 2013.

Administrative/nonclinical applicants for admissions must also submit or be responsible for the submission of

- career and professional goal statement
- an organizational chart indicating the applicant’s position and area of authority in the employment organization

Completed applications must be sent to

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

The D.H.Sc. Office of Admissions works on a rolling admissions basis. Applications are accepted year round. To ensure that your application receives prompt consideration, you should apply early. All final documentation must be received by the EPS no later than one month prior to intended registration date.

The D.H.Sc. Committee on Admissions will not consider an application until all required fees, credentials, transcripts and test scores have been received by the EPS.

Tuition and Fees

Tuition for D.H.Sc. courses are $635 per semester hour for courses offered during the summer II and fall 2016 terms. Tuition for winter, spring, summer II, and fall 2017 terms subsequently will be posted on our website (nova.edu/cah/healthsciences/dhs). Additional expenses and fees may be incurred. Examples include, but are not limited to, travel to and from campus, graduation fees, and books. An NSU student services fee of $1,050 is required annually. All tuition and fees are subject to change by the board of trustees without notice.

Requirements for Graduation

To be eligible to receive the D.H.Sc. degree, students shall

- be of good moral character
- satisfactorily complete the program of 61 semester hours (minimum) of study required for the degree.
- successfully complete the D.H.Sc. internship and practicum, and doctoral analysis
- receive a recommendation by the D.H.Sc. program director to the dean of the College of Health Care Sciences

Curriculum Outline

Core Courses

Core Block One—16 credits

Four of the following courses are required. Either DHS 8090 or DHS 8095 may be used to fulfill the health policy requirement. Either 8040 or 8045 will fulfill the ethics requirement. Courses not taken as requirements may be used as electives.

Students interested in a global health concentration should take DHS 8045 and DHS 8095, either as core courses or as electives. Students matriculating after July 2007 should take at least one ethics course (either 8040 or 8045) and one health policy course (either 8090 or 8095), unless they obtain program director approval.

### Core Block Two—8 credits
Two of the following courses are required. The other courses may be omitted or used as electives.

Total 61

On-campus institutes—These one-week, summer sessions are held either on the main campus or at one of the NSU regional campuses. Two such institutes are required to complete the program for the D.H.Sc. degree. These institutes are required for both the generalist concentration and the conflict resolution concentration.

**Doctor of Health Science Course Descriptions**

**DHS 8000—Competencies in the Clinical Care of Diverse and Special Populations**
This course focuses on issues and information relating to the general epidemiological concerns, health care disparities, and specific health and disease issues involved in the care of both culturally based diverse populations (African American, Native American, Asian and Asian sub-populations, and Latino-Hispanic populations) and other nonethnic special populations (homeless, uninsured, indigent, disabled, incarcerated, rural, inner city, GLBT, geriatric, pediatric, and others). (4 credit hours)

**DHS 8010—Statistics and Research Methods**
This course allows the student to develop an understanding through critical analysis of the basic research methods used in health care. Students will be taught to critically analyze medical information and perform effective literature reviews. (4 credit hours)

**DHS 8030—Community Health Promotion and Disease Prevention**
This course develops the knowledge and skills needed to work with communities to improve health status of the community. Major topics will include health promotion and disease prevention. Special emphasis will be placed on the Healthy People 2010 initiatives. (4 credit hours)

**DHS 8040—Professionalism and Health Care Ethics**
This course is an in depth study of the concepts of health care ethics. The course of study analyzes the differences between ethics and law and examines the core values and beliefs of medical professionalism. Methods of ethical analysis and review of current case studies will be used in critical discussions of ethical dilemmas faced by health care personnel in areas such as cloning, organ transplantation, and the implications of the Human Genome Project. The student will explore the personal values, professional standards, and institutional guidelines that define the roles and responsibilities of the health care practitioner. (4 credit hours)

**DHS 8045—The Influence of Ethics and Culture on Global Health**
Technology, research, and advancement of health care interventions have produced impressive improvements in health outcomes for many. Unfortunately, these advancements have also lead to inequalities in health status within and between countries, creating growing global ethical dilemmas. The world is faced with new challenges, such as the potential for pandemics, an aging population, a diminishing health care workforce, and the stresses of determining resource allocation. With these challenges comes a need to better understand the process of ethical reasoning and resolution, as this will be paramount for the development and maintenance of global health. Another dimension that must be considered in ethical decision making is the influencing factors of culture. Culture comprises the political, social, economic, religious, and ethnic norms and values of a society. Culture is instrumental in shaping bioethical policy worldwide, which necessitates its inclusion and consideration in all global ethic discussions. The purpose of this course is to
provide an introduction to the principles and theories of ethics as applied to global health and how culture influences ethical decision making. The course will examine some of the primary theories and principles in health care ethics including virtue, deontology, utilitarian, autonomy, justice, beneficence, and nonmaleficence. The course will explore many prominent global health issues and exemplify how greater knowledge and understanding of global ethics and culture is vital to effective and sound decision making. Topics that will be discussed in the course include ethical issues related to pandemic preparedness, end of life, human organ transplantation, clinical research in developing countries, human rights, resource allocation, and the effects of globalization on world health. It is anticipated that students will bring their own ethical dilemmas arising from their own experiences, cultures, and practices. (4 credit hours)

DHS 8080—Conflict Resolution in Health Care
This course examines and analyzes the nature and dynamics of human conflict within civil societies. Emphasis is placed on conflicts within and among governments and public sector agencies and between the health provider, patients, and medical institutions. Students will be expected to take an active role in the course and develop their own strategies for dealing with conflict. A paper will be required that details and analyzes a conflict situation in the student’s work or other environment and how the conflict was resolved. (4 credit hours)

DHS 8090—Health Policy, Planning, and Management
This course critically examines the dynamics of health care in the United States. The student is expected to analyze the health care industry and contrast nonprofit and for-profit health care delivery systems. A critical exploration of the ramifications of health care reform and the impact on institutions and individuals will be undertaken. The concepts of cost containment and long-term care will be analyzed. (4 credit hours)

DHS 8095—Global Health Policy
Globalization affects all sectors, including health care, and understanding key policy issues is essential in the study of global health. This course, taught from a clinical perspective, examines the health policy issues confronting international health organizations, governments, and specific populations. It reviews the processes that influence the development and implementation of policies and examines specific topics related to HIV/AIDS, poverty/nutrition, infectious disease, smoking, concerns of women and children, and other major global health concerns. (4 credit hours)

DHS 8100—Alternative and Complementary Medicine
This course examines and analyzes alternative and complementary medicine and their impact on the health care industry. The approach to the subject is to present selected alternative and complementary medicine fields in an informative, nonjudgmental format. (4 credit hours)

DHS 8110—Community Environmental and Occupational Health
Issues such as air and water quality and waste management will be examined. OSHA will be examined and analyzed for its impact on health and health care. Trends in environmental and occupational health legislation will be examined for their impact potential. (4 credit hours)

DHS 8120—Doctoral Analysis
In this faculty member-supervised project, and the capstone of the program, the student will develop a paper using the objectives from the core courses and one elective as guidelines and references to form the basis of the paper. This will require research into teaching and learning methods, as well as online and in-class comparisons. The outcome or final product will be an in-depth analysis of the information presented and the knowledge gained during the doctoral program. This paper will also include methods for improving the program of study in the D.H.Sc. program and detailed methods to be used to deliver the proposed changes. (2 credit hours)

DHS 8125—Preparation Forum
Students should enroll in this course within one to two semesters of matriculation into the D.H.Sc. program. This is a 1-credit course where students work closely in a one-on-one fashion with their course instructor/mentor to develop appropriate learning objectives and experiential plans for the internship (8130) and a substantial developmental project for the practicum (8140). Together, the internship and practicum form the capstone of the program. Attention is also paid to appropriate preparation for the form and style of the written deliverables of the internship and practicum and appropriate timelines for completion. Successful completion of this course will include completion of APA-style quizzes, approval of topic for DHS 8130 at least one semester prior to enrollment, approval of topic for DHS 8140 one to two semesters prior to enrollment, and completion of an error-free proposal for DHS 8140 at least one to two semesters prior to enrollment. Students will be continuously enrolled in DHS 8125 until all three tasks are accomplished. (1 credit hour)

DHS 8130—Internship
This course is the capstone of the program. The student will perform an internship at a community health care institution, clinic, educational facility, etc., which is approved in the DHS 8125 course at least one semester prior to enrolling in DHS 8130. The student should
spend a minimum of 80 clock hours learning skills from a mentor. Examples of acceptable internship experiences include teaching assistantships to learn on-site or online teaching skills, volunteering at nonprofit organizations to learn about particular topics in health promotion and disease prevention, or shadowing an executive to learn leadership and executive skills, among other experiences. Students on the global track must have an internship experience that has an international basis. The student will write a report that describes the institution, defines the population served, and details the health promotion activities observed. A critical evaluation should be made that details strengths, weaknesses, opportunities, and threats to the institution in order to analyze if the skills delineated are able to be learned. Prerequisite: DHS 8125 (5 credit hours)

DHS 8140—Practicum
The practicum is a written project that is developmental in nature. The practicum project must be approved in the DHS 8125 course one to two semesters prior to enrolling in DHS 8140. Enrollment in the practicum course must be preceded by a proposal that contains the project idea and a preliminary literature review, which will be written in the DHS 8125 course at least one to two semesters prior to enrolling in DHS 8140. The student will be required to choose a health promotion topic and create a health promotion program or educational resource that can be used for a community education program. An implementation and evaluation plan must be included in the final product. Examples of appropriate educational resources include developing a presentation for a national conference, developing a presentation for an in-service, or developing a course curriculum. Students on the global track must have an international basis for the project. Prerequisite: DHS 8125 (5 credit hours)

DHS 8150—Continuing Internship Services
This course is a continuation of DHS 8130. It is used when the student is given an incomplete grade and needs to finish his or her internship. (0 credit hours)

DHS 8160—Continuing Practicum Services
This course is a continuation of DHS 8140. It is used when the student is given an incomplete grade and needs to finish his or her practicum. (0 credit hours)

DHS 8170—Leadership in Health Care
This course explores the various methods of leadership and management, both in and out of health care, and their impact on productivity, profitability, and employee satisfaction. Critical analysis of the different types of leadership and management theories is given and the need for developing a leadership plan is explored. The student is expected to gain knowledge of the various types of leaders and systems and will be required to research and develop a paper on a specific leadership topic. (4 credit hours)

DHS 8180—Medical Writing
This course examines in practical terms the elements required for the successful publication of a journal article or clinical case review. Methods of document preparation, proper word and punctuation use, and the requirements for authors of biomedical journal articles will be discussed. (4 credit hours)

DHS 8190—Health Care Education
This course explores the various theories and applications of adult education in the practice of training, preprofessional education, and postprofessional education of medical personnel. Critical analysis of the different methods of teaching and training health care professionals is accomplished through discussion, research, investigation, journal development, and assignments. (4 credit hours)

DHS 8200—Independent Study A
This course is a self-directed, faculty-supervised experience for the student. The student will be required to develop a proposal regarding the topic of study, a learning contract with specific objectives, and a plan of action that includes methods of obtaining the information and the material produced, thus demonstrating an in-depth understanding of the subject areas. A faculty member will be assigned to the student for the supervised study and will follow the approved learning contract for successful completion of the course. The purpose of this course is to allow the student to explore an area of interest in the field of health care or health sciences. The secondary benefit of the course is to allow the student, with the assistance of the faculty member, to develop and complete a doctoral-level course of study. Upon completion of the course, the student should be able to develop a proposal regarding a particular area of health sciences sufficient for doctoral level of study, develop a learning contract and self-directed course of study at the doctoral level, develop curriculum components for an educational program using self-directed study, describe information research during the completion of the objectives, and describe the methods of developing and successfully completing a self-directed course. (1–4 credit hours)

DHS 8250—Independent Study B
This course is a self-directed, faculty-supervised experience for the student. The student will be required to develop a proposal regarding the topic of study, a learning contract with specific objectives, and a plan of action that includes methods of obtaining the information and the material produced, thus demonstrating an in-depth understanding of the subject areas. A faculty member will be assigned to the student for the supervised course. The purpose of this course is to allow the student to explore an area of interest in the field of health care or health sciences. The secondary benefit of the course is to allow the student, with the assistance of the faculty member, to develop and complete a doctoral-level study. Upon completion of the
course, the student should be able to develop a proposal regarding a particular area of health sciences sufficient for doctoral level of study, develop a learning contract and self-directed course of study at the doctoral level, develop curriculum components for an educational program using self-directed study, describe information research during the completion of the objectives, and describe the methods of developing and successfully completing a self-directed course. (1–4 credit hours)

DHS 8400—Global Health Issues
Global health care is an emerging priority for health professional education programs and clinical practice. It is essential for all health care professionals to understand the impact of global health issues on health care and international economic stability. This course explores the many facets of global health to expose the student to the complexity of the concepts that impact health care in developing and developed countries. (4 credit hours)

DHS 8700—Comparative International Health Systems
The purpose of this course is to provide an introduction to the principles, structure, and function of international health systems through a comparative analysis of various countries' health care systems. The course will explore how national systems have evolved and how countries confront the emerging issues in health care. It will explore and develop a systematic comparative analysis of the evolution, administrative structures, societal choices, financing, and provision of health care services in underdeveloped, developing, and developed countries. (4 credit hours)

DHS 8750—Patient Safety Medical Error
Leadership plays a key role in adopting practices to promote patient safety, and leaders should have the skills necessary to be effective in the implementation of these practices. This course will focus on patient safety through a study of safety-oriented leadership, organizational culture, human factors, decision-making science, communication, and a systems approach to health care delivery. Current best practice models and the latest professional literature emphasizing patient safety will be featured. (4 credit hours)

DHS 8775—Survey of Health Law
This course is designed to introduce D.H.Sc. students to health law, or law as it affects the professionals and institutions that deliver health care in the United States. The course focuses on the traditional areas of concern for courses on health law, including: 1) access to health care; 2) the cost of health care; 3) the quality of health care; and 4) protection of the patient. (4 credit hours)

DHS 8800—Health Care Informatics
This course will focus on available and future methodologies and technologies for the processing, archiving, analysis, and transmission of data, information, and knowledge in the medical and health care setting. (4 credit hours)

DHS 8810—Epidemiology and Global Health
This course emphasizes the underlying concepts of the epidemiologic approach as it relates to pertinent global health issues. The student will be introduced to principles and methods of epidemiologic research. These include study designs, measures of frequency association, impact, and sources of error. Application to global health and public health strategies for disease prevention, surveillance, and control are discussed. (4 credit hours)

DHS 8900—Narrative Medicine
There is great value in listening to patient narratives and reflecting upon what is communicated through these stories about health, illness, suffering, and recovery. In this course, students will explore written forms of patient narratives, as well as multimedia presentations, movies, music, song, and visual arts to improve their understanding of patient experiences. Students will learn how to enhance their own listening, self-reflection, and communication skills, and, in the process, they will develop narrative competencies that emphasize empathy, compassion, and other effective components of quality care. The course will explore ways in which a study of the medical humanities contributes to a deeper understanding of personal and social features that affect the quality of patient care. (4 credit hours)

HSP 9006—Concepts in Evidence-Based Medical Practice
This course provides a working knowledge of evidence-based medicine. Cases will be used as the backbone of this course to assist the student in analyzing data to justify the treatments used in clinical practice. Students will also learn how to critically appraise the literature, evaluate diagnostic test performance, design clinical pathways and standards of care, and implement evidenced-based medicine findings in their own clinical or administrative settings. (4 credit hours)

Capstone Course (all)

DHS 8120—Doctoral Analysis
In this faculty-supervised project, the capstone of the program, the student will develop a paper using the objectives from the core courses and one elective as guidelines and references to form the basis of the paper. This will require research into teaching and learning methods as well as online and in-class comparisons. The outcome or final product will be an in-depth analysis of the information presented and the knowledge gained during the doctoral program. This paper will also include methods for improving the program of study in the D.H.Sc. department and detailed methods to be used to deliver the proposed changes. (2 credit hours)
Doctor of Philosophy (Ph.D.) in Health Science Program

The Doctor of Philosophy (Ph.D.) in Health Science is a postprofessional, distance-based, research doctoral program designed for master's degree-prepared clinical health professionals, public health practitioners, and senior-level health care administrators. The focus of the Ph.D. in Health Science is to educate and graduate research practitioners with the skills and knowledge to conduct research in a complex society and environment, while focusing globally within the framework of health policy. The Ph.D. in Health Science requires 75 credits for completion. Students take courses through online delivery, with on-campus institutes. Successful completion of comprehensive exams is required before moving to the dissertation stage. The dissertation is 12 credits, with an on-campus oral defense. Students have up to seven years to complete the program.

The Doctor of Philosophy in Health Science is designed to provide a means of Ph.D. completion for working health care professionals currently at the master's degree level, increasing opportunities for health practitioners to earn a terminal degree in the field of health science with a core focus in research. It will prepare graduates to function both independently and interdependently within the clinical and non-clinical research environment and for advanced development of new knowledge in their fields of expertise. The Ph.D. in Health Science program challenges the student to examine the current state of health care; apply sophisticated knowledge of research design, biostatistics, and epidemiology to the literature of their core discipline; and initiate the design and follow up mechanisms for research in health care. Its professor-driven, student-centered online course delivery is coupled with a research practicum; a minimum of two one-week, on-campus institutes; a comprehensive examination, and a dissertation with oral defense.

Admissions Requirements

The Ph.D. program will admit health care professionals with diverse graduate education, professional level health care work history, and life experiences who have demonstrated capacity to pursue a rigorous course of graduate study and increasingly responsible positions in health care. Applicants interested in the Ph.D. in Health Science program will apply directly to the program. The Ph.D. Committee on Admissions will recommend prospective students for admission by considering the overall qualities of the applicant through Graduate Record Examination (GRE) scores, statement of intent, writing samples, letters of recommendation, and the personal interview.

1. All applicants must hold a master's degree or a professional doctorate (for example, Au.D., D.P.T., O.T.D., D.S.W., Dr.P.H., D.M.D., SLP.D., D.C.) from a regionally accredited college or university, prior to matriculation into the program.

2. Applicants must have a minimum cumulative master's degree or a professional doctoral GPA of 3.0 or better on a 4.0 scale.

3. It is recommended that applicants have official Graduate Record Examination (GRE) scores of 150 (verbal), 149 (quantitative), and 4 (analytical writing). GRE scores must be less than five years old at the time of matriculation into the Ph.D. program.

4. Prior health care or health research experience is required and is strongly considered in the admissions process. Applicants must submit a copy of their current state license and/or professional certification or verifiable documentation regarding this experience to the Office of Admissions.

The Ph.D. is a postprofessional degree designed for health practitioners, public health professionals, and health care administrators from a wide variety of disciplines. Students in this program must demonstrate expert practice of a recognized health occupation at a professional level, or have five years of administrative experience in a health care organization, with progressively increasing responsibilities during that time.

The successful applicant's health profession may emphasize delivery of services to individual clients (e.g., Au.D., PA, PT, OT, R.N., LCSW) or be population based (e.g., M.P.H., M.H.A.). An appropriate level of professional practice is generally recognized by health professions licensure (e.g., Au.D., R.N., PT, OT, RDH), a national certification or registration (e.g., PA-C, RVT, RRT, CRNA, FACHE), a recognized academic credential (e.g., M.P.H., M.S.N., M.S.W., M.H.A., M.B.A., M.A. or M.S. in Audiology, D.P.T., O.T.D.), or a combination of the above. The successful administrative or health care education applicant will demonstrate at least five years of professional experience with increasing levels of responsibility in a health care or health care education setting. Professional experience will be documented by an organizational chart demonstrating the applicant's position within the organization and a letter of recommendation from a supervisor attesting to the applicant's level of responsibility within the organization. Health care administrators or health care educators will also need to submit a statement concerning their career and professional goals within the health care environment. Fellowship or certification by a recognized health certifying body (e.g., FACHE, FNCSA, CISSN) is desirable.
All questions regarding the appropriateness of an applicant's qualifications for admission can be discussed with the department chair or program director on an informal basis, but the official recommendations are made by the Committee on Admissions to the dean of the College of Health Care Sciences, who makes the final determination.

5. Applicant must have a personal interview with the Ph.D. Interview Committee (telephonic or Skype interview is accepted, based on the applicant's needs).

Applicants must also provide

• two letters of recommendation supporting the applicant's aptitude and determination to complete this course of study (The letters should originate from professional colleagues/supervisors or from course instructors at the last school attended.)
• one writing sample that reflects master's or doctoral degree-level original work
• a written statement describing his or her interest in pursuing a Ph.D. in Health Science, past research experiences, dissertation research interests, and career goals
• a resume or curriculum vitae
• a completed application for admission along with official transcripts from all graduate study
• evidence of computer skills through coursework or self-study prior to the end of the first semester (Students may obtain instruction through the NSU Student Microcomputer Laboratory, the Health Science Online Orientation, or other training facilities.)

Application Procedures
The Ph.D. Office of Admissions admits for the fall and winter semesters. Applications are accepted year-round. All final documentation must be received at least 30 days prior to tentative enrollment.

Before the applicant can be reviewed for possible admission, the following must be submitted:

1. a completed application form along with a $50, nonrefundable application fee
2. official GRE scores, sent directly from the Educational Testing Service (ETS)
3. official transcripts sent directly from all previously attended professional and graduate institutions

Send all official documents (including GRE scores and transcripts) to

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

4. an evaluation for U.S. institutional equivalence for all coursework from international institution(s), if applicant attended or is a graduate of any international institution(s)

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed following.

• World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  Old Chelsea Station
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

• Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 (fax) • jsilny.com

• Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant's responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University's Enrollment Processing Services at the address listed here.

5. a complete resume or CV
6. copies of state, national, and professional certifications or licenses recognized by certifying bodies
7. two letters of recommendation stating that the applicant possesses the aptitude and determination to complete this course of study (The letters should originate from professional colleagues/supervisors or from course instructors at the last school attended.)
8. one writing sample that reflects master's or doctoral degree-level original work
9. a written statement describing the applicant's interest in pursuing a Ph.D. in Health Science, past research experiences, dissertation research interests, and career goals

Applicant must also have a personal interview with the Ph.D. Interview Committee. (A telephonic or Skype interview is accepted, based on the applicant's needs.)
Nonclinical applicants (health administrators and health educators) must also submit a letter of recommendation from a supervisor describing their position in the organization and the scope and duration of their responsibility, a personal statement describing their career goals, and an organizational chart. (This is not required for clinically licensed, registered, or certified applicants or for public health practitioners with a M.P.H.). Clinically qualified applicants should submit a copy of their registration, certification, and/or licensure.

**Important Note:** You must be accepted to the program no later than 21 days prior to the start of a semester in order to register for classes in that particular semester. If not, you will be placed on the accepted student list, but will not be able to start courses in that particular semester. In any case, you must register for your courses no later than 14 days prior to the start of the course in any semester.

The Ph.D. Committee on Admissions will not consider an application until all required fees, credentials, exam scores, transcripts, and documents, are received by the Office of Admissions.

### Transfer of Credits

Students matriculated in the Ph.D. program may petition for a transfer of credits into the program. These credits can be transferred from doctoral courses taken at regionally accredited colleges or universities. All courses to be transferred must be substantially equivalent to courses taught in the program, as determined by the program director and appropriate faculty members. A student who wishes to have a course taken at another institution reviewed for transfer credit must submit a copy of the course syllabus to the program office. Each petition for transfer credit will be reviewed on an individual basis.

### Tuition and Fees

Tuition for Ph.D. courses is $635 per semester hour for courses offered during the summer II and fall 2016 terms. (HSP 9010 will carry a charge of 2 credits.) Tuition for winter, spring, summer II, and fall 2017 terms subsequently will be posted on our website (healthsciences.nova.edu/healthsciences/phd). Additional expenses and fees may be incurred. Examples include, but are not limited to, travel to and from campus, graduation fees, and books. Students are responsible for purchasing any required textbooks and/or classroom materials. An NSU student services fee of $1,050 is required annually. Additionally, students must pay a registration fee of $25, or a deferment fee of $75 if a payment plan is selected, each semester. All tuition and fees are subject to change by the board of trustees without notice.

### Requirements for Graduation

To be eligible to receive the Ph.D. in Health Science degree, students must

- be of good moral character
- complete the minimum required coursework of 68 semester hours
- complete the research practicum
- pass all three questions on the comprehensive exam
- complete a dissertation based on original research in an area of the student's expertise or concentration, as approved by the program director and dissertation committee
- defend the dissertation, as determined by the dissertation committee, with verification of presentation or publication

### Computer Requirements

It is highly recommended that the student have access to a desktop or laptop consistent with the following:

- a recent generation of Microsoft Windows (7 or 8) or Apple OS (10.8 or above)
- Microsoft Office software to include Word, PowerPoint, and Excel
- headphones, microphone, camera, and video conferencing capabilities
- Internet broadband access
- surge protection and appropriate back-up options (recommended)

Tablets and smartphones, while very useful, may not be sufficient for all program uses.

Doctor of Philosophy in Health Science Course Descriptions

DHS 8030—Community Health Promotion and Disease Prevention
This course develops the knowledge and skills needed to work with communities to improve the health status of that community. Major topics will include health promotion and disease prevention. Special emphasis will be placed on the Healthy People 2010 initiatives. Students will be required to complete a paper of at least 20 pages based on an intervention strategy from Healthy People 2010. The paper will include an introduction, review of the literature, discussion, and conclusion in chapter form. Discussion boards are a required part of this course. (3 credits)

DHS 8080—Conflict Resolution in Health Care
This course examines and analyzes the nature and dynamics of human conflict within civil societies. Emphasis is placed on conflicts within and among governments and public sector agencies and between the health provider, patients, and medical institutions. Students will be expected to take an active role in the course and develop their own strategies for dealing with conflict. A paper will be required that details and analyzes a conflict situation in the student's work or other environment and how the conflict was resolved. (3 credits, on-campus institute)

DHS 8090—Health Policy, Planning, and Management
This course critically examines the dynamics of health care in the United States. The student is expected to analyze the health care industry and contrast non-profit and for-profit health care delivery systems. A critical exploration of the ramifications of health care reform and the impact on institutions and individuals will be undertaken. The concepts of cost containment and long-term care will be analyzed. The student will be expected to write a paper on health care reform and managed care that is at least 10 pages in length and provides an informed opinion on future directions of health care reform. The paper should address the question of what new directions managed care may take and what is the future of health care reform. (3 credits)

DHS 8170—Leadership in Health Care
This course explores the various methods of leadership and management, both in and out of health care, and their impact on productivity, profitability, and employee satisfaction. Critical analysis of the different types of leadership and management theories is given and the need for developing a leadership plan is explored. The student is expected to gain knowledge of the various types of leaders and systems and will be required to research and develop a paper on a specific leadership theory. (3 credits)

DHS 8810—Epidemiology and Global Health
This course emphasizes the underlying concepts of the epidemiologic approach as it relates to pertinent global health issues. The student will be introduced to principles and methods of epidemiologic research. These include study designs, measures of frequency, association, impact, and sources of error. Application to global health and public health strategies for disease prevention, surveillance, and control are discussed. (3 credits)

HSP 9006—Concepts in Evidence-Based Medical Practice
This course provides a working knowledge of evidence-based medicine. Cases will be used as the backbone of this course to assist the student in analyzing data to justify the treatments used in clinical practice. Students will also learn how to critically appraise the literature, evaluate diagnostic test performance, design clinical pathways and standards of care, and implement evidenced-based medicine findings in their own clinical or administrative settings. (3 credits)

HSP 9006—Biostatistics I
The application of quantitative techniques has expanded rapidly in medical decision making. The emphasis on evidence-based health care means that health care workers must be able to evaluate the results from published health care research studies. This course is the first of two courses designed to provide students with the knowledge of quantitative techniques. The course will cover descriptive statistics, parametric group comparison statistics, and basic nonparametric statistics and provide an introduction to linear modeling. (3 credits)

HSP 9010—Biostatistics II
The aim of this course is to enable students to appreciate the richness of statistical science and to invite them to the concept of probabilistic thinking. Statistics is the science of the future. Any technique that students are going to learn will help them to understand the unknown better, and in turn, will increase their success in other courses and in future professional careers.

Principles of statistical inference build upon the course Fundamentals of Biostatistics. The goals of this course are threefold: (1) introduce the basic concepts of probability as well as methods for calculating the probability of an event; (2) assist students in developing an understanding of probability theory and sampling distributions; and (3) familiarize students about inferences involving one or two populations, ANOVA, regression analysis, and chi-square tests. (3 credits)
HPH 7400—Research Design
This course will provide students with a fundamental understanding of the basic methods and approaches used in health care research. A major emphasis of the course will be on the conceptualization and design of research studies. The course will cover ethics, formulation of research questions, study design, reliability, validity, sampling, measurement, and interpretation of research findings. It will prepare students to critically evaluate published literature, and to design sound research studies. The course will be both theoretical and applied. Students will be challenged to apply the theoretical concepts presented in the classroom and in the readings to design a study to address a health-related issue of their choice. (3 credits)

HPH 7410—Qualitative Research Design
This course will focus primarily on the knowledge and skill competencies needed to conduct qualitative research successfully. In this pursuit, students will immerse themselves in the epistemological, theoretical, ethical, methodological, and procedural understanding of qualitative research; apply this knowledge to the conceptualization and conduct of qualitative research; report the findings of the research in the form of a research article; and appraise the quality of such qualitative research products. Upon completion of the course, students will demonstrate that they have mastered the basic competencies needed to create, plan, and complete a qualitative research dissertation. (3 credits)

HPH 7500—Philosophy of Science
This course will address classical issues in the philosophy of science including demarcation; the distinction between what science is and is not; hypothesis development, confirmation, and falsification; causation; and explanation. The course will also explore the ontological, epistemological, methodological, and axiological foundation of the major paradigms within which inquiry in the human services professions are located. Issues of congruence between research question selection and paradigm selection will also be addressed. (3 credits)

HPH 7600—Grant Writing
This course is designed to provide writing experiences that prepare the learner for manuscript and grant proposal submissions. This introductory experience into the grant process from proposal to funding to management will include project management, funding sources, and funding challenges. Other course requirements include a research proposal (manuscript) that is ready for submission for publication and development of a dissertation proposal. (3 credits)

HPH 7700—Test and Measurements
This course provides a foundation in the basic principles of measurement with a focus on how to assess and control for error through research design methods and statistical analysis. Students will explore test construction and parsimonious data analysis methods to develop an understanding for designing instruments and assessment tools. A focus on issues specific to measurement error in the medical sciences will also be examined throughout the course. (3 credits)

HSP 9001—Behavior Theories in Health Science
The purpose of this course is to understand health behavior theories to make decisions on appropriate theories that will guide dissertation research questions and methodology, data analysis, and interpretation. This course presents behavior theories commonly used in the analysis of health care sciences research data. Emphasis is on understanding and applying these concepts and techniques to a dissertation and other research data through writing in APA style. (3 credits)

HSP 9002—Survey Methodology
This course introduces students to a set of principles of survey methodology that are the basis of standard practices in the field. The course provides guidelines for developing survey objectives, designing survey studies, sampling respondents, and administering surveys. Emphasis is on the skills and resources needed to design and conduct a survey. (3 credits)

HSP 9004—Research Ethics
This course introduces students to ethics concepts as they apply to questions and challenges in conducting research with human subjects. The aim is to increase students’ awareness of, and ability to reason through, ethical issues that arise in human subjects research. The course will draw upon historical examples, codes, declarations, and other sources of ethical guidance, including discussions of contemporary controversies in human subjects research. (3 credits)

HSP 9007—Research Practicum
Research Practicum requires students to conduct a research activity under faculty member supervision. Objectives include developing the ability to critically review literature, abstract salient points from literature and present them cogently, summarize conceptual and methodological issues in the literature, formulate a research problem derived from the literature, derive research hypotheses from research questions, develop a research methodology, test stated hypotheses, implement research methodology, analyze and interpret data, and write research in APA style. (4 credits)
HSP 9010—Research Practicum Continued
Students who do not complete HSP 9007 in the required 16 weeks must enroll in HSP 9010. A charge of 2 credits for continuing service will be made to maintain the student's full-time status in the Ph.D. program. Students' progress through Research Practicum Continued will increase their total number of degree credits beyond the required 67. (2 credits, continuing service charge)

HSP 9008—Comprehensive Exam
The comprehensive examination is a written examination that students take after the completion of all the required Ph.D. in Health Science coursework and before beginning the dissertation phase of the Ph.D. program. It is designed to evaluate a student's ability to demonstrate that he or she is a suitable candidate for a Ph.D. degree. Successful completion of the comprehensive examination is required for students to move to advanced standing and begin dissertation research.

The comprehensive examination is given two times per academic year, during the summer and winter semesters, and takes place on the Nova Southeastern University Fort Lauderdale/Davie Campus. Students register with the Department of Health Science prior to attending one of the institutes to take the comprehensive exam and receive an examination number. Students who register for the comprehensive examination certify by this action that they are prepared to take the exam. However, participating in the comprehensive examination center does not mean that students will pass the comprehensive examination.

Students can withdraw from the comprehensive examination without a reason up to 10 days before the exam. Once this time has passed, students with circumstances beyond their control (such as sickness, car accident, family illness or other extenuating circumstances), must notify the Ph.D. program director at the earliest possible time and provide documentation to support their need to withdraw from the exam. Students who have obtained approval from the Ph.D. program director to withdraw from the comprehensive examination will be allowed to take the comprehensive examination at the next scheduled offering. Students who registered for the comprehensive examination and who fail to take the exam, or students who do not contact the program director requesting to be excused from the examination, will automatically fail the comprehensive examination. Students must take the comprehensive examination within one year of completion of all academic coursework. Students who fail to complete the requirements within the time frame will automatically fail the comprehensive examination. Students who have failed the comprehensive exam are referred to the Department of Health Science Committee for Student Progress (CSP) for possible dismissal from the Ph.D. program. The CSP then makes recommendations to the department chair. The department chair notifies the student of the decision by certified mail (return receipt requested) and by email with response requested. Students have the right to appeal the decision of dismissal from the Ph.D. program to the College of Health Care Sciences Appeals Committee within five business days of notification from the chair of their department.

The grading of the comprehensive examination is on a Pass/Fail basis. Students are notified of their results on the comprehensive examination by certified mail and copies of the letters are sent to students' NSU email accounts. Following the successful completion of the comprehensive examination, students can register for dissertation credits and begin the dissertation process.

Students are only allowed to take the complete comprehensive exam once and must pass all three categories to move forward to the dissertation phase of the Ph.D. program.

Students who fail all three categories have failed the comprehensive examination and are referred to the Committee for Student Progress (CSP) for possible dismissal from the program. Students who fail one or two of the three categories on the comprehensive examination have failed the exam, and are referred to the CSP. The CSP will examine the student's individual case and may recommend that the student be allowed to retake the failed category or categories at the next scheduled examination date. If a student is allowed to retake a failed category (or categories), he or she will have one opportunity to pass all failed categories. Failing one or two categories on a retake results in the student's second failure of the comprehensive examination.

All college-wide policies regarding academic honesty, the student progress committee, and appeals apply to the comprehensive exam.

Students are required to familiarize themselves with the academic standards and the academic honesty policy and procedure as described in the College of Health Care Sciences Student Handbook. (1 credit)

HSP 9011, 9012, 9013, 9014, 9015, and 9016—Dissertation
The dissertation is scheduled as six courses over two years. This includes the dissertation preparation seminar, proposal, dissertation, and oral defense. Students will conduct original research in an area of the student’s expertise or concentration, as approved by the program chair and dissertation committee, with verification of presentation or publication. The dissertation will culminate with an oral final defense, which will occur in person at the summer or winter institute, or on the main campus. The oral defense must be arranged at least 45 days in advance. Process and requirements are detailed in the Health Professions Division College of Health Care Sciences Dissertation Guide. (12 credits)
HSP 9017—Dissertation Continuation
For any additional semester after the initial six courses, students will register for a dissertation continuation course with a continuing service charge to maintain the students' full-time enrollment. At the end of each semester, students who demonstrate forward progress on their dissertation will earn a PR (in progress) grade. Students who do not demonstrate forward progress will earn an NPR (not in progress) grade. Students who earn an NPR grade in any dissertation course may register for the next semester, although they may not be eligible for federal funds. Students' progress through dissertation continuation may increase their total number of degree credits beyond the required 67. (2 credits, continuing service charge)

On-Campus Institutes
These one-week sessions are located either on NSU’s main campus in Fort Lauderdale, Florida, or the NSU campus in Tampa, Florida. Three institute courses, taken in a minimum of two institutes, are required to complete the Ph.D. degree. DHS 8080 and DHS 8170 will be offered as summer institutes. HSP 9007 will be offered as a winter institute.

Department of Occupational Therapy

Occupational Therapy Program Overview

Occupational therapists provide services to enhance participation and function in daily occupations, including self care, work, and leisure. Occupational therapists frequently work with individuals when performance has been interrupted or jeopardized by disease, injury, disability, life stress, or other factors. Therapy consists of clients' planned involvement in occupation—purposeful and meaningful activities—that positively influences their life adaptation. This involvement in occupation may be facilitated by supportive training, specialized equipment, environmental modification and/or problem solving to accomplish life tasks. The therapeutic process is founded upon the belief that individuals are the principal agents of their own adaptation, and through active involvement in occupation, can have a significant impact on their health status, and well-being.

The occupational therapist must be an expert in the knowledge of occupation, its role in health and adaptation, and its use in therapy. Occupational therapy practice requires the therapist to exercise increasingly complex, autonomous decision-making and problem-solving skills in multifactorial situations. The therapist must, therefore, be a critical thinker, capable of evaluating and synthesizing information from a variety of sources about a wide range of phenomena. Finally, the therapist should be a reflective practitioner able to evaluate his or her own clinical reasoning.

The NSU Department of Occupational Therapy offers an entry-level Master of Occupational Therapy (M.O.T.) degree, an entry-level Doctor of Occupational Therapy (O.T.D.), and two postprofessional degrees: a Doctor of Occupational Therapy (Dr.O.T.), and a Doctor of Philosophy (Ph.D.). The M.O.T. program is a full-time, campus-based entry-level program. The M.O.T. is designed so that a student may enter after completing an undergraduate or graduate degree from a regionally accredited college or university. The Dr.O.T. and Ph.D. are postprofessional OT degrees offered through distance education.

Master of Occupational Therapy Accreditation
The entry-level Master of Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, Maryland 20814-3449. ACOTE's telephone number, care of AOTA, is (301) 652-AOTA. Graduates of the program will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT certification examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.
Master of Occupational Therapy
Admissions Requirements

The Master of Occupational Therapy Program selects students based on grade point average (GPA), Graduate Record Examination (GRE) scores, a written essay, letters of evaluation, and an interview. Strong candidates will also demonstrate concern for people of diverse backgrounds, as well as the ability to use judgment, insight, and reasoning.

All applicants, including Occupational Therapy Assistant (OTA) applicants as described below, must

- complete a minimum of 40 volunteer hours with at least two different populations
- complete an undergraduate degree from a regionally accredited college or university
- have a minimum GPA of 3.0 on a 4.0 scale for the last two years of undergraduate study
- have social science and humanities prerequisite GPAs of 3.0 or better
- have a natural science prerequisite GPA of 2.75 or better

OTA applicants completing 60 upper-division credits in the NSU online Bachelor of Health Science program must

- earn an average of 3.0 or better in the Bachelor of Health Science upper-division courses

All applicants, including OTA applicants, must

- have a grade of 2.0 or better in all prerequisite courses
- submit GRE scores that are less than five years old for all three areas of the general test (quantitative, verbal, and analytic writing)

Preference will be given to applicants with a GRE verbal score of 143, a quantitative score of 141, and an analytical writing score of at least 3.5.

Master of Occupational Therapy
Application Procedures

The entry-level Master of Occupational Therapy (M.O.T.) program begins annually in May.

Candidates for admission to the M.O.T. program are responsible for the submission of an application via the Occupational Therapy Centralized Application Service (OTCAS). The OTCAS application deadline is January 2. Priority will be given to individuals whose applications have been verified in OTCAS by February 1. Applications are processed on a rolling or periodic basis. It is in the best interest of prospective students to complete their applications early because of the limited number of positions in the class. Applications received after the deadline date will be considered subject to space availability in the entering class.

Details and fees associated with OTCAS are available on the OTCAS website at otcas.org. After the Office of Admissions has been notified of completed application...
processing by OTCAS, students will be asked to submit a required, separate supplemental NSU M.O.T. application form by the deadline of March 2 for further consideration, along with a $50, nonrefundable application fee.

Official Graduate Record Examination (GRE) scores are required from within the last five years in all three areas of the general test: verbal, quantitative, and analytical writing.

The NSU institution code is 5522 and the department code is 0618.

GRE scores should be sent directly to the Office of Admissions.

Three letters of reference on NSU Master of Occupational Therapy forms from individuals (other than relatives) such as academic instructors and professors, health professionals, volunteer or work supervisors are required. One reference must be from an occupational therapist. Evaluations should be submitted on forms within the OTCAS system.

All applicants, except Occupational Therapy Assistants, must complete a minimum of 40 volunteer hours with at least two different populations. Documentation of volunteer hours must be submitted within the OTCAS system.

Upon receipt of all materials from OTCAS, the supplemental application, test scores, and applicable fees, the Committee on Admissions will select applicants to complete a video essay. Those selected will be notified in writing of the expectations and instructions for recording and submitting the video essay. An invitation to complete a video essay should not be construed by the applicant as evidence of acceptance.

If accepted, it is the responsibility of the applicant to ensure arrangements are made for final official transcripts from all undergraduate (including advanced, placement test scores), professional, and graduate institutions attended to be sent directly from each institution. All final transcripts, covering all of the applicants work, must be forwarded to

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences
Occupational Therapy Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Undergraduate/Occupational Therapy Department Dual Admission Program

Nova Southeastern University’s Health Professions Division has established a dual admission program with the university’s Office of Undergraduate Admissions for a select number of highly motivated, qualified students interested in pursuing both undergraduate and professional studies in occupational therapy. Candidates must maintain minimum cumulative NSU and science (all BIOL, CHEM, and PHYS courses) GPAs of 3.0 at all times throughout the program. Students will spend four years in an undergraduate school and will be awarded a bachelor's degree from that college. Students who successfully meet all of the application requirements, including a video essay, will be offered the opportunity to transition to the first year of education at Nova Southeastern University’s College of Health Care Sciences. Students will receive the Master of Occupational Therapy degree after completion of the M.O.T. program.

For more information and requirements, contact the NSU Office of Undergraduate Admissions, 3301 College Avenue, Fort Lauderdale, Florida 33314-7796.

Occupational Therapy Assistants are eligible to apply to the Master of Occupational Therapy (M.O.T.) program after completing a bachelor's degree from a regionally accredited college or university or from the online Bachelor of Health Science program at NSU. For more information about the B.H.Sc. online degree completion program, visit healthsciences.nova.edu/healthsciences/bhs or email bhsinfo@nova.edu.

Tuition and Fees

Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $29,290.

A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 also is required annually.

Acceptance and Preregistration Fee—$1,000. This fee is required to reserve the accepted applicant's place in the entering first-year class. This advance payment will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is payable within four weeks of an applicant's acceptance or by April 15, whichever comes first.

The first semester's tuition and fees, less the $1,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

The financial ability of applicants to complete their education at NSU is important because of the limited number of positions available in each class. Applicants should have specific plans for financing two-and-a-half years of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses.

It is required that each student carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.
Master of Occupational Therapy Course of Study

The academic discipline of occupational therapy draws upon and integrates a wide range of interdisciplinary topics. Theories that illuminate the understanding of occupation in human life, the role of occupation in health and adaptation, and the art and science of using activities as therapeutic agents create the foundation for the discipline.

As part of the regular curriculum, occupational therapy students are placed in fieldwork sites that require all students to be fingerprinted and subjected to a background check in accordance with regulations of the Child Care, Licensing and Enforcement Section, Bureau of Children's Services and Broward County, Florida. Additionally, some placement facilities may require criminal background checks and/or drug testing.

Students may, under supervision, provide occupational therapy services to patients seen in the university clinics as part of the regular course of study.

A felony conviction may affect a student's ability to be placed in fieldwork sites and a graduate's ability to sit for the National Board for Certification in Occupational Therapy, Inc. (NBCOT) certification examination or attain state licensure.

Requirements for Graduation

In order to be eligible for the M.O.T. degree, students shall

- be of good moral character
- have satisfactorily completed the program of study required for the degree (101 credits) with a minimum grade of 78 percent in each OCT course and 70 percent in anatomy, physiology, and neuroanatomy
- have satisfactorily met all financial and library obligations
- successfully complete Level II fieldwork within 24 months of completion of didactic courses
- attend in person the commencement program in the year that the diploma will be conferred

Entry-Level Doctor of Occupational Therapy Program—Tampa

Accreditation
The Doctor of Occupational Therapy Entry-Level Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE®) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number, c/o AOTA, is (301) 652-AOTA.

Graduates of the program will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of the exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT certification. Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

Through its innovative curricular design and delivery model, the entry-level Doctor of Occupational Therapy (O.T.D.) program prepares qualified students to become successful occupational therapy practitioners, managers, and leaders who are generalists with beginning specialization in a selected practice area. The program prepares students with knowledge and skills for competent entry-level, occupation-based practice; professional leadership; and the drive to remain contemporary in a variety of contexts for an ever-changing world—armed with a doctoral level of expertise and clinical reasoning applied to clinical specialization, research, theory explorations, leadership, program and policy development, administration, advocacy, and/or education. The entry-level O.T.D. program has a responsibility to the public to assure that its graduates can become fully competent and caring occupational therapists who are capable of providing benefit and doing no harm. Individuals admitted and retained in the O.T.D. program must possess the intelligence, integrity, compassion, humanitarian concerns, physical and emotional capacity, cognitive and communication skills, and professionalism necessary to practice occupational therapy. To this end, all entry-level O.T.D. students must meet the requirements outlined in the O.T.D. program’s Essential Functions Policy for Admission, Retention, and Graduation. To view the Essential Functions document, visit healthsciences.nova.edu/ot/orientation/forms/otd-essential-functions-policy.pdf.

As part of our vision, our departmental mission will seek to lead the profession and community through its contributions in educational leadership, community and professional service, lifelong learning, and scholarly endeavors.

Entry-Level Doctor of Occupational Therapy Admissions Requirements
The entry-level Doctor of Occupational Therapy (O.T.D.) program selects students based on grade point average (GPA), Graduate Record Examination (GRE) scores, written essays, letters of evaluation, and an interview. Strong candidates will also demonstrate concern for people of diverse backgrounds, as well as the ability to use judgment, insight, and reasoning.

All applicants, including Certified Occupational Therapy Assistants (COTAs), as applicable, must:

- complete an undergraduate or graduate degree from a regionally accredited college or university
- have a cumulative GPA of 3.0 or better on a 4.0 scale for each of the last two years of study
- have a prerequisite GPA of 3.0 or better on a 4.0 scale for each of the last two years of study
- have a grade of 2.0 or better in all prerequisite courses
- submit minimum GRE scores that are less than five years old for all three areas of the general test (verbal, quantitative, and analytical writing)
- complete a minimum of 40 volunteer hours in at least two different occupational therapy settings that provide services related to children and youth, work and industry, rehabilitation, health and wellness, mental health, productive aging, or another specified facility (or graduation from an accredited occupational therapy assistant program—volunteer hours do not apply to COTAs)
- submit entry-level Graduate Record Examination (GRE) scores, a written essay, and letters of recommendation
- demonstrate computer and word processing competency to include, but not limited to, World Wide web navigation, software and learning management system (e.g., BlackBoard) utilization, correspondence, database explorations, etc.
- have completed a Test of English as a Foreign Language (TOEFL) or a Pearson Test of English—Academic

**Entry-Level Doctor of Occupational Therapy Application Procedures**

Candidates for admission to the O.T.D. program are responsible for the submission of an application via the Occupational Therapy Centralized Application Service (OTCAS). The OTCAS application deadline is April. Applications are processed on a rolling or periodic basis. It is in the best interest of prospective students to complete their applications early because of the limited number of positions in the class. Applications received after the deadline date will be considered subject to space availability in the entering class. The application cycle for the entry-level Doctor of Occupational Therapy (O.T.D.) program begins annually in July.

Details and fees associated with OTCAS are available on the OTCAS website at otcas.org. After the Office of Admissions has been notified of completed application processing by OTCAS, students will be asked to submit a required, separate supplemental NSU O.T.D. application form for further consideration along with a $50, nonrefundable application fee by March 1.

Official Graduate Record Examination (GRE) scores are required from within the last five years in all three areas of the general test (verbal, quantitative, and analytical writing).

The NSU institution code is 5522 and the department code is 0618.

GRE scores should be sent directly to the Office of Admissions.

Three letters of reference on NSU entry-level Doctor of Occupational Therapy forms from individuals (other than relatives) such as academic instructors and professors, health professionals, or volunteer or work supervisors are required. One reference must be from an occupational therapist (not an occupational therapy assistant). Evaluations should be submitted on forms within the OTCAS system.

All applicants, except for Certified Occupational Therapy Assistants (COTAs), as applicable, must complete a minimum of 40 volunteer hours in at least two different OT practice settings. Some of these environments include hospitals, clinics, and private practices with a variety of populations. Forms for submission will be available within the OTCAS system. In the case of an occupational therapy assistant, graduation from an accredited occupational therapy assistant program can qualify for the 40 volunteer hours.

Upon receipt of all materials from OTCAS, the supplemental application, test scores, and applicable fees, the Committee on Admissions will select those applicants for interview. Those selected will be notified in writing of the time and place of the interview. An invitation to
appear for an interview should not be construed by the applicant as evidence of acceptance.

If accepted, it is the responsibility of the applicant to ensure arrangements are made for final official transcripts from all undergraduate (including advanced placement test scores), professional, and graduate institutions attended be sent directly from each institution. All final transcripts, covering all of the applicants work, must be forwarded to

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences
Occupational Therapy Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Matriculating students should be aware that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

Undergraduate/Occupational Therapy Department Dual Admission Program

Nova Southeastern University’s Health Professions Division has established a dual admission program with the university’s Office of Undergraduate Admissions for a select number of highly motivated, qualified students interested in pursuing both undergraduate and professional studies in occupational therapy.

Candidates must have a cumulative grade point average of 3.0 on a 4.0 scale. Students will spend four years in an undergraduate school and will be awarded a bachelor’s degree from that college. Students will then transition to the first year of education at Nova Southeastern University’s College of Health Care Sciences, Occupational Therapy Department—Tampa. Students will receive the Doctor of Occupational Therapy degree after completion of the entry-level Doctor of Occupational Therapy program.

For more information and requirements, contact the NSU Office of Undergraduate Admissions, 3301 College Avenue, Fort Lauderdale, Florida 33314-7796.

Occupational Therapy Assistants are eligible to apply to the entry-level Doctor of Occupational Therapy (O.T.D.) program after completing a bachelor’s degree from a regionally accredited college or university or from the online Bachelor of Health Science program at NSU.

For more information about the B.H.Sc. online degree completion program, visit healthsciences.nova.edu/healthsciences/bhs/index.html.

Tuition and Fees

Tuition for 2016–2017 (subject to change by the board of trustees without notice) for Florida residents and out-of-state students is $31,200.

A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 also is required annually.

Eligible applicants must request in-state tuition on their applications. For tuition purposes, a student’s Florida residency status (in-state or out-of-state) will be determined at initial matriculation and will remain the same throughout the entire enrollment of the student at NSU. Accordingly, tuition will not be adjusted as a result of any change in residency status after initial enrollment registration.

Acceptance Fee—$400. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is payable within two weeks of an applicant’s acceptance.

Preregistration Fee—$600. This is due eight weeks after acceptance or by April 15, whichever comes first, under the same terms as the Acceptance Fee.

The first semester’s tuition and fees, less the $1,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

The financial ability of applicants to complete their education at NSU is important because of the limited number of positions available in each class. Applicants should have specific plans for financing three-and-a-half years of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses.

It is required that each student carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

Entry-Level Doctor of Occupational Therapy Course of Study

The academic discipline of occupational therapy draws upon and integrates a wide range of interdisciplinary topics. Theories that illuminate the understanding of occupation in human life, the role of occupation in health and adaptation, and the art and science of using activities as therapeutic agents create the foundation for the discipline.
As part of the regular curriculum, occupational therapy students are placed in fieldwork sites that require all students to be fingerprinted and subjected to a background check in accordance with regulations of the Child Care, Licensing and Enforcement Section, Bureau of Children’s Services and Broward and Hillsborough Counties, Florida. Additionally, some placement facilities may require criminal background checks and/or drug testing.

Students may, under supervision, provide occupational therapy services to patients seen in the university clinics as part of the regular course of study.

A felony conviction may affect a graduate’s ability to sit for the National Board for Certification in Occupational Therapy, Inc. (NBCOT) certification examination or attain state licensure.

**Requirements for Graduation**

In order to be eligible for the O.T.D. degree, students shall
- be of good moral character
- have satisfactorily completed the program of study required for the degree (122 semester hours) with a minimum grade of 75 percent in each occupational therapy course
- successfully complete clinical internships and residency within 24 months of completion of didactic courses
- fulfill all financial and library obligations to the university
- attend in person the commencement program in the year that the diploma will be conferred

Note: Students will have time allotted for administrative purposes (bursar, financial aid, etc.) during on-campus time each semester

Total Credit Hours to Graduation: 122

Level I FWE: 360 Hours  
Level II FWE: 960 Hours  
Residency: 640 Hours  
Total Clinical Education Hours: 1,960 Hours

Postprofessional Doctoral Programs in Occupational Therapy

The Department of Occupational Therapy at NSU offers two postprofessional doctoral degrees: the postprofessional advanced practice doctorate—the Doctor of Occupational Therapy (Dr.O.T.), and the research doctorate—the Doctor of Philosophy (Ph.D.). Both of these doctoral programs are taught primarily by distance education with some on-campus time requirements. Applicants with master’s degrees are eligible for admission to the Dr.O.T. program or the Ph.D. program. All applicants must have completed an occupational therapy entry-level program and be eligible to practice as an occupational therapist within one year of initiating the program. Graduates of Nova Southeastern University’s M.O.T. Program with a GPA above 3.5 are assured consideration for admission to the Dr.O.T. program.

Graduates incorporate evidence-based practice, client-centered approaches, occupation-based practice, and best practice to meet society’s occupational needs.

Students are required to complete 39 credits of coursework.

Admissions Requirements
1. An applicant must have a bachelor’s or master’s degree in occupational therapy from regionally accredited or internationally recognized universities or colleges and be eligible to practice as an occupational therapist within one year of initiating the program. If applicant’s bachelor’s degree is in occupational therapy, applicant must also have 30 graduate credits, although a master’s degree (in any field) is preferred.

Foreign applicants must present the equivalent of a bachelor’s degree and evidence of successful completion of an OT educational program approved by WFOT. All foreign coursework must be evaluated by World Education Services, Inc. (wes.org), Josef Silny & Associates, Inc. (jsilny.com), or Educational Credential Evaluators, Inc. (ece.org).

Doctor of Occupational Therapy (Dr.O.T.)
The postprofessional Doctor of Occupational Therapy (Dr.O.T.) degree prepares occupational therapists to become leaders in the advanced practice of occupational therapy, health policy, and program development.
2. A minimum GPA of 3.0 on a 4.0 scale is required for admission.

3. An applicant must demonstrate writing proficiency, as determined by the program director.

4. Foreign applicants must also have a Test of English as a Foreign Language (TOEFL) score of 550 or higher for the written test or 213 or higher for the computer-based test, an International English Language Testing System (IELTS) score of 6.0, or a Pearson Test of English—Academic (PTE—A) score of 54.

The dean is empowered to evaluate the total qualifications of every student and to modify requirements in unusual circumstances.

The following courses are required to complete the program:

- Writing for Occupational Therapy—a credit/no-credit, approximately four-week, online course taken prior to the beginning of the first fall semester
- OCT 7005—Evidence-Based Practice and Critical Thinking in OT (3 credits)
- OCT 7101—Theory Development for Models of Practice (3 credits)
- OCT 7103—Occupation-Centered Practice (3 credits)
- OCT 7133—Advanced Policy Issues (3 credits)
- OCT 7302—Contextual Aspects of Occupational Performance (3 credits)
- OCT 7860—Leadership Development in Multiple Contexts (3 credits)
- OCT 7767—Community Program Development
- OCT 7791—Grant Practicum
- OCT 7909—Program Evaluation and Outcome Measurement (3 credits)
- OCT 7910—Capstone I
- OCT 7920—Capstone II
- OCT 7921—Capstone III

**Requirements for Graduation (Dr.O.T.)**

In order to be eligible for the Dr.O.T. degree, students shall

- complete 39 credits of coursework including all program core course requirements within six years
- former NSU M.O.T. students who graduated after November 2009 and began the Dr.O.T. program within two years of graduation are required to complete 36 credits
- have satisfactorily completed the program of study with a minimum overall GPA of 3.0, and a minimum grade of B in all coursework
- have successfully completed the capstone paper and residency
- have satisfactorily met all financial and library obligations

**Doctor of Philosophy (Ph.D.)**

The Doctor of Philosophy (Ph.D.) in Occupational Therapy is conferred in recognition of a demonstrated ability to master a specific field of knowledge and to conduct significant independent research. A minimum of 61 credits of graduate work beyond the master's degree level is required, including a research residency and a dissertation. A majority of the coursework can be completed by distance format except for Summer Research Institutes and four-day weekends in most semesters.

Admissions requirements include a GPA of 3.5 on a 4.0 scale. Graduate-level research methods and introductory statistics are prerequisite courses.

**Course of Study**

The following courses are required to complete the program:

- Writing for Occupational Therapy—a credit/no-credit, approximately four-week, online course taken prior to the beginning of the first fall semester
- HPH 7300—Fundamentals of Biostatistics (3 credits)
present dissertation research and findings at pregraduation symposium or professional conference or meeting

provide four copies of dissertation, bound in accordance with program requirements

submit dissertation to the University of Michigan's Dissertation Abstracts International (ProQuest/UMI)
satisfactorily meet all financial and library obligations

Admissions Requirements
1. Applicants must have a bachelor's or master's degree in occupational therapy from a regionally accredited university or college and be eligible to practice as an occupational therapist within one year of initiating the program. If the applicant's bachelor's degree is in occupational therapy, then the applicant's master's degree may be in any field. International applicants must present the equivalent of a bachelor's degree and evidence of successful completion of an OT educational program approved by WFOT.

2. Minimum Requirements
   • GPA of 3.5 on a 4.0 scale
   • graduate-level research methods course
   • introductory statistics course
   • master's degree

3. International applicants also must have a Test of English as a Foreign Language (TOEFL) score of 550 or higher for the written test or 213 or higher for the computer-based test, an International English Language Testing System (IELTS) score of 6.0, or a Pearson Test of English—Academic (PTE—A) score of 54.

4. All students will be required to have a computer that meets the recommended minimum specifications.

The dean is empowered to evaluate the total qualifications of every applicant and to modify requirements in unusual circumstances.

Application Procedures—Dr.O.T. and Ph.D.
Candidates for admission must submit or be responsible for submission of

1. a completed application form along with a $50, nonrefundable application fee
2. three recommendations from those who can evaluate the applicant's capability for doctoral study
3. a letter of application stating goals and reasons for wanting to pursue doctoral work
4. TOEFL, IELTS, or PTE—A scores (international students, if appropriate)
5. official college transcripts from all undergraduate and graduate institutions attended, sent directly to
Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences
Occupational Therapy Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905
All foreign coursework must be evaluated by World Education Services, Inc. (wes.org), Josef Silny & Associates, Inc. (jsilny.com), or Educational Credential Evaluators, Inc. (ece.org).

6. confirmation of initial certification by the National Board for Certification in Occupational Therapy
Foreign students who intend to do their dissertation research abroad may petition to be released from this requirement. Upon receipt of the completed application and required credentials, the committee on admissions will notify, in writing, applicants who are selected for interview. No applicant will be admitted to the Occupational Therapy Department without an interview, but an invitation to appear for an interview should not be construed by the applicant as evidence of acceptance. Notice of acceptance or other action by the committee on admissions will be on a “rolling” or periodic schedule. Early completion of the application is therefore in the best interest of the student.

Doctoral Tuition and Fees (Ph.D.)
1. Tuition for academic year 2016–2017 (subject to change by the board of trustees without notice) is $657 per credit hour.
2. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.
The first term’s tuition and fees are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

The financial ability of applicants to complete their training at the college is important because of the limited number of positions available in each class. Applicants should have specific plans for financing their professional education. This should include provision for tuition, living expenses, books and equipment, computer, travel, and miscellaneous expenses.

It is required that each student carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

Postprofessional O.T.D. Bridge to Ph.D. Program
This program offers another point of entry into the Ph.D. in Occupational Therapy program for occupational therapists who have earned a postprofessional O.T.D. degree. Students may transfer up to two core courses (6 credits) and up to two elective courses (6 credits) for a total of 12 credits. The decision to accept transfer courses and credits is made by the Ph.D. program director and one other Ph.D. committee member through transcript and syllabus review from the completed O.T.D. program.

Admission requirements, application procedures, course of study, program tuition and fees, and requirements for graduation completion are equivalent to those listed for the Ph.D. in Occupational Therapy program.

Computer Requirements
All students must have updated and relevant computer program skills and equipment to successfully participate in the curriculum.

Nonmatriculating Students
Nonmatriculating students may take up to two courses (6 credits). An application for nonmatriculating students and relevant transcripts are required as well as approval by an occupational therapy doctoral program director.
Occupational Therapy Course Descriptions

ANA 5420—Anatomy
Details human anatomy. Laboratory activities consist of student teams studying prosected cadavers, sections, bone sets, videotapes, radiographs, and models. (5 credits)

ANA 5423—Neuroanatomy
This course offers a study of the gross structure of the brain and spinal cord and the functional relationship among their parts. It emphasizes major motor and sensory pathways and integrative mechanisms of the central nervous systems. (3 credits)

ANA 5533—Neuroanatomy
Anatomy of central and peripheral nervous systems. Laboratory activities consist of student teams studying prosected cadavers, sections, radiographs, and models. (3 credits)

PHO 5400—Physiology
The course is intended to provide students in the occupational therapy program with an understanding of the basic physiochemical concepts and physiological principles underlying the development, maintenance, and propagation of human life. It provides an examination of the physiological processes essential for students in the College of Health Care Sciences, including discussion of clinical applications where appropriate. Topics covered include basic examinations of cellular processes, membrane mechanisms, muscle physiology, the cardiovascular system, the nervous system, renal physiology, the respiratory system, endocrinology, reproductive physiology, and gastrointestinal physiology. (3 credits)

OCT 5011—Occupational Performance and Participation Throughout the Life Span
This course explores the development of occupational performance skills throughout the life span by considering the interactions between contexts and environments, personal factors, and engagement in occupations. Through exploration of the meaning and development of their own occupations, as well as observation and interactions in the community, students prepare to analyze occupational performance of future patients and clients. (3 credits)

OCT 5013—Occupational Analysis
This course focuses on analyzing occupations and occupational performance. Through engagement in selected projects, students learn to analyze occupational demands. The meaning and significance of challenge, success, and competence in occupations are explored. Students learn to structure, adapt, plan, present, and assess occupations for therapeutic use. (2 credits)

OCT 5014—Introduction to Occupation
This course introduces concepts of human occupation and the framework for practice in occupational therapy. In addition, the course examines the history of occupational therapy's evolution and the associated influences of the social, political, and economic environment throughout the life span of the profession. (2 credits)

OCT 5015—Impact of Environment on Occupational Performance
This course focuses on the impacts of environments and contexts, including products and technology; natural environments; support and relationships; attitudes; and services, systems, and policies on occupational performance. Experiences in application of models and frames of reference to assessment of, and intervention with, environments and contexts are provided to prepare students for client-centered and evidence-based practice. (3 credits)

OCT 5101—Theoretical Foundations of Occupational Therapy Practice
This course is an examination of occupational therapy's philosophical and theoretical underpinnings. Emphasis is on understanding various theories, models, and frames of reference and their influence on practice and thinking. (2 credits)

OCT 5121—Impact of Human Conditions on Occupational Performance I
This course expands upon, and integrates information from, anatomy, medical terminology, and introduction to occupations. Students learn about intrinsic human factors affected by pathophysiological conditions and begin to make the link between these factors and occupational performance. (4 credits)

OCT 5123—Impact of Human Conditions on Occupational Performance II
This course expands and builds on the understanding of pathophysiological processes and conditions learned in OCT 5121. This course provides opportunity to apply concepts learned in context relative to the lives of individuals who are living with disorders/injuries to the immune, cardiopulmonary, urinary, gastrointestinal, endocrine, nervous, musculoskeletal, or neurocognitive systems. (4 credits)

OCT 5130—Human Interactions
This course focuses on development of therapeutic use of self when interacting with individuals, groups, and treatment teams. Through hands on experiences, the
student will learn how to design, participate in, and run occupation-based groups, as well as work within a treatment team. (2 credits)

OCT 5174—Research Methods
Students will learn about quantitative and qualitative research methodologies and analyses used in occupational therapy. This course will provide students with fundamental knowledge to become critical consumers of research literature and participants of the research process. (4 credits)

OCT 5800—Applied Kinesiology for Occupational Therapy
This course focuses on principles of biomechanics, joint kinematics, joint kinetics, and muscle function to enhance understanding of normal human motion. This course provides opportunity to develop skills in analysis and assessment of muscle strength, joint range of motion, and movement in context of occupational performance. (3 credits)

OCT 5963—Fieldwork Issues I
This course is designed to address fieldwork placement policies, professional behaviors, and relationship to curriculum design. Requirements to participate in level I and level II fieldwork placements will be covered. (1 credit)

OCT 6101—OT Practice for Mental Health and Wellness Practicum
This course consists of Level I fieldwork related to occupational therapy practice in settings focused on mental health and mental illness for populations across the life span. It provides students with opportunities to apply knowledge and skills from the classroom to contemporary settings. (1 credit)

OCT 6102—OT Practice Practicum
This course consists of Level I fieldwork related to practice in settings serving children and youth in educational, medical, and community settings. It provides students with opportunities to apply knowledge and skills from the classroom to contemporary settings. (1 credit)

OCT 6103—OT Practice Practicum
This course consists of Level I fieldwork related to occupational therapy practice in settings serving adults and older adults in medical and community settings. It provides students with opportunities to apply knowledge and skills from the classroom to contemporary settings. (1 credit)

OCT 6106—Occupational Therapy Practice for Mental Health and Wellness
This course focuses on the practice of occupational therapy for mental health and wellness in various settings across the continuum of care. Course content emphasizes occupation-based, client-centered assessment and interventions that empower client participation in context. Didactic, interactive, and fieldwork learning experiences are incorporated. (5 credits)

OCT 6107—Occupational Therapy Practice with Children and Adolescents
This course focuses on the practice of occupational therapy for children and adolescents in various settings across the continuum of care. Course content emphasizes occupation-based, client-centered assessment and interventions that empower client participation in context. Didactic, interactive, and fieldwork learning experiences are incorporated. (8 credits)

OCT 6108—Occupational Therapy Practice with Adults and Older Adults
This course focuses on the practice of occupational therapy for adults and older adults in various settings across the continuum of care. Course content emphasizes occupation-based, client-centered assessment and interventions that empower client participation in context. Didactic, interactive, and fieldwork learning experiences are incorporated. (8 credits)

OCT 6150—Professionalism and Management
Students will learn about the changing face of the U.S. health care delivery system and the regulatory and reimbursement mechanisms that affect delivery of OT services throughout the continuum of care. Particular emphasis will be placed on preparing students to assume varied roles within the U.S. health care system including manager/program director and supervisor. Students will develop the ability to recognize and respond to ethical and legal issues related to occupational therapy practice. (3 credits)

OCT 6175—Research Development Seminar
Student research teams will work with faculty mentors to develop a faculty-led research proposal that will include formulation of research questions, an analysis and synthesis of the supporting literature, selection of methodology and procedures, plan for design, data collection and analysis, and completion of a protocol to the Institutional Review Board. (2 credits)

OCT 6176—Research Practicum
This final MOT research course culminates in implementing an approved study. This course fulfills the requirement for students to implement one or more aspects of research methodology, which may include one or more of the following: designing research instruments, collecting data, and analyzing or synthesizing data. The course will include practical experience in disseminating research information through written research reports or preparing a manuscript for publication, then presentation of the research information. (2 credits)
OCT 6206—Occupational Therapy Practice for Mental Health and Wellness Practicum
This course, linked to OCT 6106—Occupational Therapy Practice for Mental Health and Wellness, provides experiences that enrich didactic coursework through supervised observation and participation in parts of the occupational therapy process with clients in hospitals, clinics, and/or community-based settings. Critical thinking and critical reasoning skills are emphasized. **Corequisite:** OCT 6106 (1 credit)

OCT 6207—Occupational Therapy Practice with Children and Adolescents Practicum
This course consists of Level I fieldwork related to practice in settings serving children and youth in educational, medical, and community settings. It provides students with opportunities to apply knowledge and skills from the classroom to contemporary settings. **Corequisite:** OCT 6107 (1 credit)

OCT 6208—Occupational Therapy Practice with Adults and Older Adults Practicum
This course consists of Level I fieldwork related to practice in settings serving adults and older adults in medical and community settings. It provides students with opportunities to apply knowledge and skills from the classroom to contemporary settings. **Corequisite:** OCT 6108 (1 credit)

OCT 6350—Professionalism and Leadership
This course will expose students to career leadership opportunities and responsibilities. Leadership theories, models, and other topics will be discussed and applied as they relate to the various roles that students may assume throughout their careers as occupational therapy practitioners. This course includes a one-week, Level I fieldwork with opportunity for exposure to varied professional leadership roles. (2 credits)

OCT 6980—Fieldwork Issues II
This second course in the Fieldwork Issues sequence builds on Fieldwork Issues I by continuing to emphasize the development of professionalism for fieldwork and eventual practice. Students reflect on their previous clinical experiences as they prepare for more advanced involvement in sites with adult patients. Mandatory training continues, as well as policy and procedure reinforcement. (1 credit)

OCT 6981—Fieldwork Experience II
Twelve-week supervised internship in approved practice setting. **Prerequisite:** Completion of M.O.T. formal coursework (12 credits)

OCT 6982—Fieldwork Experience II
Twelve-week supervised internship in approved practice setting. **Prerequisite:** Completion of M.O.T. coursework (12 credits)

OCT 7004—Continuing Capstone Residency
A student will only enroll in this course if more time is required to complete his or her capstone or residency requirements following completion of 3 credits of OCT 7930—Capstone III. (1–3 credits)

OCT 7005—Evidence-Based Practice and Critical Thinking in OT
This doctoral-level course is designed to provide students with the knowledge and skills to be consumers of evidence, so they can become evidence-based practitioners. Through readings and activities, students will learn the process of evidence-based practice. They will formulate a question of clinical relevance, search for current best evidence, critically assess the evidence, discuss how to implement the findings into practice, and have an opportunity to disseminate the findings by submitting the CAP assignment to the American Occupational Therapy Association. The course is intended to facilitate the development of skills in critical thinking, analysis, and synthesis of the literature. (3 credits)

OCT 7010—Theory Development for Models of Practice
Presents occupational therapy frames of reference, models of practice, their theoretical development, research, and application. Includes study of historical antecedents, sociopolitical context, and key theorists, researchers, and developers. (3 credits)

OCT 7101—The Health Professional as Academic Educator
This course examines the role of health professionals as academic educators in an entry-level occupational therapy program from the perspectives of faculty, higher education institutions, and professional organizations. **Required for Ph.D. students** (3 credits)

OCT 7104—Occupational Science
This course, required for Ph.D. students, presents an overview of conceptual frameworks, literature, taxonomies, and research strategies of occupational science. Topics will be examined from multidisciplinary perspectives on work, play, leisure, occupation, and contexts for occupation. Students will select an area for in-depth study. (3 credits)

OCT 7133—Advanced Policy Issues
In this course, students will analyze the effect public policy has on the practice of occupational therapy and consumers of occupational therapy services. Students will examine the various ways in which the occupational therapy professional can influence federal, state, and local policy throughout the various stages of policy development and implementation. Students will assume an advocacy role by meeting with state and/or federal elected representatives to increase and maintain the viability of the profession,
promote the relevance of the profession, and/or assure consumer access to occupational therapy practitioners. (3 credits)

OCT 7160—Special Topics in Occupational Therapy
This seminar for doctoral students only investigates timely topics of critical interest to health care providers. (3 credits) Elective

OCT 7180—Neurosciences Foundations of Occupational Performance
Focuses on the link between neuroscience and human occupational behavior. Current neuroscience research and hypotheses are compared and contrasted with current theoretical work in occupational therapy. Presents material from the clinical practice viewpoint so students learn to use the knowledge gained to enhance their clinical reasoning and occupation-centered practice. (3 credits) Elective

OCT 7211—Sensory Processing Basis of Occupational Performance
This course includes an examination of the theory and practice of sensory processing in occupational therapy in seminal literature, current research in neuroscience, and current practice-related research across the life span. Students will apply this knowledge in developing a project related to a specific age, diagnosis, or population. Prior knowledge and experience in this area of practice is helpful. (3 credits) Elective

OCT 7241—Infant and Child Mental Health
The course will provide framework for understanding the complex processes involved in mental health for infants and children, and how this relates to occupational performance. Clinical application of theoretical approaches and contextual influences will be considered for specific diagnostic classifications. (3 credits) Elective

OCT 7242—Occupational Therapy Practice with Autistic Spectrum Disorders
This course focuses on current findings regarding autistic spectrum disorders and how they affect occupational performance. Includes a review of relevant research and readings from multiple related fields. Specific programs for working with children and adolescents with autism will be examined. (3 credits) Elective

OCT 7244—Low Vision Across the Life Span
The course focuses on vision deficits throughout the life span and their impact on the occupations of individuals and caregivers. Students will review relevant anatomy, neuroanatomy, and various visual disorders. They will then explore and learn about evaluation of vision deficits and treatment implications through current practice and research findings. (3 credits) Elective

OCT 7302—Contextual Aspects of Occupational Performance
This course is a study of contexts as related to occupational performance for advanced practitioners. Concepts and theories related to the use of context as an enabler of participation are explored. Specifically, cultural, personal, temporal, virtual, physical, and social contexts are examined. Prerequisite: OCT 7010 (3 credits)

OCT 7767—Community Program Development
Evaluation and application of community organization and development theories to create occupational therapy interventions with underserved and/or nontraditional populations. Emphasizes outcome evaluation of both theory and practice. (3 credits)

OCT 7791—Grant Practicum
In this course, students will acquire skills necessary to develop a grant proposal and acquire funding for new and innovative programs, research, or education/training projects related to occupational therapy. Using an applied approach, students will learn to locate both online and conventional sources of funding at federal, foundational, and corporate levels in order to produce a finished proposal worthy of submission. (3 credits)

OCT 7792—Wellness and Health Promotion
This course examines occupational therapy's role in wellness and health promotion, disability postponement, and prevention in general. Students critically examine various practice models with a view toward developing and refining their own roles in these practice areas. (3 credits) Elective

OCT 7820—Applying Measurement Theory to Evaluation
Provides students with a general background in measurement theory and assists students to actively apply this information to the evaluation process in occupational therapy. The application component of the course addresses evaluation at both the individual and program levels. At the completion of this course, students can critically examine and select the most appropriate evaluation tools for various practice situations using the theory and principles of measurements. (3 credits)

OCT 7860—Leadership Development in Multiple Contexts
Course examines leadership as a critical component to one's future as an occupational therapy practitioner in a global, ever-changing environment. Students look at areas of need in the profession as well as leadership opportunities in their own careers. (3 credits)
OCT 7890—Independent Study
Individualized study under the supervision of assigned instructor. Requires permission of a doctoral program director. (1–3 credits) Elective

OCT 7909—Program Evaluation and Outcome Measurement
In this course, students will learn the process for evaluating the effectiveness of an intervention or a program. Students will develop an evaluation plan for an intervention or program of interest including identification of relevant outcomes and methods for systematically collecting, analyzing, and interpreting quantitative and/or qualitative information to inform decision making about the program or intervention. (3 credits)

OCT 7910—Capstone I
In the first course of a three-course capstone sequence, students will explore capstone ideas related to their professional interests. They will explore the literature to develop and articulate the background and need for the capstone project. They will identify a faculty mentor for the capstone project and develop the plan for the residency experience. (3 credits)

OCT 7911—Chronicity, Occupation, and Health
Explores the relationships among chronic disease and disability, occupational performance, occupational satisfaction, and personal wellness when living with a disability from the standpoint of the individual and of society. Students examine clinical, ethical, and advocate roles in the context of occupational therapy theory and professional practice standards. (3 credits) Elective

OCT 7920—Capstone II
In this second of the three-course capstone sequence, students will develop the capstone proposal with a faculty mentor, prepare the IRB protocol as applicable, and begin the residency experience to facilitate the development and implementation of the capstone project. (3 credits)

OCT 7921—Capstone III
During the third and final course of the capstone sequence, students will complete the residency experience and implement the capstone project. At the end of the semester, students will submit a final capstone paper, which is the culminating assignment in this course and the Dr.O.T. curriculum. In addition, students will develop a plan for dissemination and/or publication of the capstone project. (3 credits)

OCT 8945—Studies for the Qualifying Examination
For Ph.D. students who are preparing for, and taking, the Ph.D. qualification exam. (1 credit)

OCT 8946—Continuing Qualifying
Students will only enroll in this course following completion of 1 credit of OCT 8945 Studies for the Qualifying Examination, if more time is required to complete all qualifying requirements. (0 credit)

OCT 8950—Research Residency
Supervised research activity in a setting approved by the student's dissertation committee. Prerequisite: admission to candidacy (3 credits)

OCT 8951—Continuing Service for Residency
Students will only enroll in this course following completion of 3 credits of OCT 8950 Residency, if more time is required to complete all residency requirements. (0 credit)

OCT 8970—Doctoral Dissertation
Supervised original study of occupational therapy evaluation and intervention. Prerequisite: admission to candidacy (3 credits)

OCT 8971—Continuing Dissertation
This course requires the approval from the Ph.D. program director and fulfills the requirement for continuous enrollment while the student is working on the dissertation. (1–3 credits)

OTD 8101—Introduction to Didactic, Clinical, and Capstone Experiences
This course introduces concepts of human occupation and the framework for active participation in learning about evidence-based practice of occupational therapy. It formally introduces the student to the delivery model of the curriculum including the concept, the student's responsibilities during distance and face-to-face sessions, self directedness, and independence. The course also serves as a preservice training on safety and health precautions as well as fieldwork placement policies, professional behaviors, and relationship to curriculum design. Requirements to participate in Level I and Level II fieldwork placements and residency requirements are covered. (1 credit)

OTD 8102—Foundations of Occupational Therapy
This course traces the historical, philosophical, and theoretical underpinnings of occupational therapy as it evolved into contemporary practice. The student applies theories, models, and frames of reference in understanding how social, political, and economic factors continually influence current and future practice. Attention is given to interdisciplinary practice. (3 credits)

OTD 8103—Kinesiology of Occupations
This course promotes the understanding of normal human motion through skills learned in applying the principles of biomechanics, joint kinematics, joint kinetics, and muscle
function. Experiences in the analysis and assessment of movement, muscle strength, and joint range of motion provide the student with opportunities to articulate the connection between kinesiology and occupational performance. (3 credits)

OTD 8141—Development of Occupations across the Life Span
This course provides opportunities not only to learn the continuum of human development that influences health and independence across the life span, but also to refine observation, analysis, reflection, and communication skills. The course encourages the student to explore how culture, environment, spirituality, sex, and age influence human occupation. It includes field trips to selected facilities. (3 credits)

OTD 8142—Occupational and Contextual Analysis
This course focuses on analyzing occupations and occupational performance in different contexts, including applications of technology. The course provides opportunities for students to engage in and analyze the projects according to their occupational demands, as well as to learn the meaning of, and avenues for, success and occupational competence. Students not only learn to structure, adapt, plan, present, and assess occupations for therapeutic use, but also to articulate concepts and theories that influence engagement and participation, especially within cultural, personal, temporal, virtual, physical, and social contexts of occupational performance. (3 credits)

OTD 8143—Therapeutic Use of Self
This course provides hands-on experiences in applying the therapeutic use of self when interacting with individuals, groups, and treatment teams. Through the course, the student designs, participates in, and runs occupation-based groups, as well as works within a treatment team. (3 credits)

OTD 8151—Human Conditions and Occupation I
This course focuses on how pathophysiological conditions affect intrinsic human factors so that students can make the link between the factors and occupational performance. This course integrates information from Anatomy; Medical Terminology; and Introduction to Didactic, Clinical, and Capstone Experiences. (3 credits)

OTD 8152—Human Conditions and Occupation II
Building on the understanding of pathophysiological conditions learned in OTD 8151, this course expands the application of occupational concepts to people with disorders or injuries to the immune, cardiopulmonary, urinary, gastrointestinal, endocrine, nervous, musculoskeletal, and neurocognitive systems. (3 credits)

OTD 8161—Evidence and Occupational Therapy Practice
This is the first course in a four-course series on research. It provides students with fundamental knowledge that will help them to become critical consumers of research evidence. This course focuses on topics of relatedness of research and occupational therapy practice, critical appraisal of research evidence, and research critique of both quantitative and qualitative research. (3 credits)

OTD 8244—Innovations and Technology in Contemporary Occupational Therapy
Students will take a critical look at day-to-day occupations and state-of-the-art technology such as video games, computer-assisted interventions, nanotechnology, documentation, triangulation, thematic analyses and other software, robotics, etc. Within the light of person, environmental, occupation, and professional factors, the student identifies applications for a future-oriented innovative practice at any level of intervention within different contexts. (3 credits)

OTD 8262—Research Design
This course is the second of four in a series of evidence-based practice and research methods. Students develop a viable research proposal. At the end of the semester, students will complete a research proposal and have it ready to submit for IRB review. (2 credits)

OTD 8262L—Research Design Lab
Please see description of OTD 8262—Research Design. (1 credit)

OTD 8271—Occupational Therapy Interventions I: Psychosocial and Community
This course focuses on the application of the person-environment-occupation-performance (PEOP) model for occupational therapy evaluation and treatment with emphasis on wellness, prevention, and community-based therapy practice. It includes a Level I Fieldwork Experience. (6 credits)

OTD 8272—Occupational Therapy Interventions II: Children and Youth
Students apply the PEOP model in identifying barriers and supports for participation and engagement of children and youth with multiple conditions within the context of diverse environments. This course includes a Level I Fieldwork Experience. (10 credits)

OTD 8273—Occupational Therapy Interventions III: Physical Disabilities
This course is the final occupational therapy interventions course. It addresses evaluation and treatment of adult and older adult occupational performance in various environments. It includes a Level I Fieldwork Experience. (10 credits)
OTD 8281—Business of Practice and Management
This course allows students to view occupational therapy from a business perspective, preparing them for different roles in the U.S. health care system, including manager/program director, supervisor, and entrepreneur. Students will articulate responses to ethical and legal issues related to the profession using information they learn about delivery systems, regulatory systems, and reimbursement mechanisms that affect service delivery from referral to discharge. (3 credits)

OTD 8282—Professional Leadership
This course will introduce the student to the leadership responsibilities and opportunities inherent in becoming a member of a profession. Students will explore basic leadership theories and examine their own leadership strengths and opportunities to expand or improve upon, as well as apply applicable leadership theories and leadership self-analysis to the practical, contextual, and ethical dimensions that exist within the occupational therapy profession and contemporary practice. Emphasis will be placed on the occupational therapist's role in professional advocacy, professional associations, interprofessional collaboration, and role-emerging and nontraditional practice settings. (3 credits)

OTD 8363—Research Project I
This is the third in the series of four courses on evidence-based practice and research methods. In this course, the student implements an approved study or gains research experiences in faculty research projects or simulated research. The course includes practical experiences in preparing reports of presentations for disseminating research information. There is also an option of preparing a manuscript for publication. This course fulfills the requirement for students to implement one or more aspects of research methodology, possibly including designing research instruments, collecting data, and analyzing or synthesizing data. (2 credits)

OTD 8363L—Research Project I Lab
Please see description of OTD 8363—Research Project I. (1 credit)

OTD 8391—Fieldwork Experience II
This course is a 12-week, supervised internship in an approved practice setting. Prerequisite: completion of formal predoctoral certification courses (12 credits)

OTD 8392—Doctoral Certification and Introduction to Residency Program
Upon completion of all formal predoctoral certification and Level II Fieldwork Experiences, the student must pass a competency-based examination. After successfully passing the examination, the student has the opportunity, through this course, to reflect on the academic and clinical components of the curriculum, including planning for the culmination of the capstone project, and receives an introduction to the doctoral experiential component. Prerequisite: successful completion of 12 credits of Level II Fieldwork Experiences (0 credits)

OTD 8464—Research Project II: Reflections and Exit Colloquium
This is the final course of the four-course series of research methods. It culminates with the opportunity for the student to prepare the presentation of a capstone project to the community and to reflect on the entire experience leading to an O.T.D. degree. Prerequisite: completion of doctoral residency and research project (2 credits)

OTD 8493—Fieldwork Experience II
This course is a 12-week, supervised internship in an approved practice setting. Prerequisite: completion of formal predoctoral certification courses and OTD 8391. (12 credits)

OTD 8494—Doctoral Residency
This 16-week doctoral experiential component provides the student with the opportunity to develop advanced skills, e.g., beyond a generalist level in an approved specialization area for clinical practice skills. Other options include in-depth experience in one or more of the following research skills: administration, leadership, program and policy development, advocacy, education, or theory development. Prerequisite: doctoral certification (16 credits)

Specialized Course
These courses provide the student with the opportunity to select two courses of 3 credits each from the four specialized courses listed below. (3 credits)

OTD 8300—Occupational Science
This course presents an overview of conceptual frameworks, literature, taxonomies, and research strategies of occupational science. Topics will be examined from multidisciplinary perspectives on work, play, leisure, occupation, and contexts for occupation. Students will select an area for in-depth study.

OTD 8340—Wellness in Occupational Therapy
This course examines occupational therapy's role in wellness and health promotion, disability postponement, and prevention in general. Students critically examine various practice models with a view toward developing and refining their own roles in these practice areas.

OTD 8360—Applying Measurement Theory to Evaluation
Provides students with a general background in measurement theory and assists students in actively applying this information to the evaluation process in
occupational therapy. The application component of the course addresses evaluation at both the individual and program levels. At the completion of this course, students can critically examine and select the most appropriate tools for practice situations using the theory and principles of measurements.

OTD 8370—Sensory Processing Basis of Occupational Performance
This course provides examination of the theory and practice of sensory processing in occupational therapy through the original literature and current information from neuroscience and evidence-based practice found in articles and through interaction with classmates. Students will apply this knowledge to a specific group of individuals or to a curriculum plan. This is an advanced-level course. It is anticipated that students in this course will have some prior knowledge and experience in this area of practice.

HPH 7200—Research Ethics
Health care professionals are required to act morally and ethically. This course is designed to expand the student’s basic understanding of ethics to promote ethical awareness and enable students to derive better health care decisions that reduce risk of potential ethical consequence. By exposing students to bioethics and controversial ethical issues typically encountered in current health care practice, students practice making difficult decisions. Students will synthesize and implement strategies for applying morals, values, and ethics systematically in the various settings in which health care is delivered. Considering the perspectives of all stakeholders and the role of the health care provider, patient advocate, professional, and consumer of medical care, students will gain workable knowledge of contemporary ethical issues and appreciate that ethics permeate the majority of decisions made in health care. (3 credits)

HPH 7300—Fundamentals of Biostatistics
The application of quantitative techniques has expanded rapidly in medical decision making. The emphasis on evidence-based health care means that health care workers must be able to evaluate the results from published health care research studies. This course is the first of two courses designed to provide students with the knowledge of quantitative techniques. The course will cover descriptive statistics, parametric group comparison statistics, and basic nonparametric statistics, as well as provide an introduction to linear modeling. (3 credits)

HPH 7310—Principles of Statistical Inference
The focus of this course is on advanced and multivariate statistical methods. Topics include multiple regression, multivariate analysis of variance and covariance, factor analysis, discriminate analysis, cluster and canonical analysis, and related statistical procedures. Emphasis is on understanding and applying statistical concepts and techniques to research data as well as developing the ability to critically analyze research methods used in the scientific literature. Emphasis is on understanding and applying statistical concepts and techniques to research data within the health sciences. (3 credits)

HPH 7400—Research Design
This course will provide students with an understanding of the methods and approaches used in quantitative, health-related research. It will prepare students to be both consumers and producers of quantitative research. A major emphasis of the course will be on the conceptualization and design of research studies. Moreover, the course will cover ethics, formulation of research questions, research designs, reliability, validity, sampling, and measurement. It will also prepare students to critically evaluate published research articles. (3 credits)

HPH 7500—Philosophy of Science
This course will address classical issues in the philosophy of science, including demarcation, the distinction between what science is and is not, hypothesis development, confirmation and falsification, causation, and explanation. The course will also explore the ontological, epistemological, methodological, and axiological foundations of the major paradigms within which inquiry in the human services professions are located. Issues of congruence between research question selection and paradigm selection will also be addressed. (3 credits)

HPH 7600—Grant Writing and Publication
This course is designed to provide writing experiences which prepare the learner for manuscript and grant proposal submissions. This introductory experience into the grant process from proposal to funding to management will include project management, funding sources, and funding challenges. Other course requirements include a research proposal (manuscript) that is ready for submission for publication and development of a dissertation proposal. (3 credits)
Department of Physical Therapy

Physical Therapy Overview

Physical therapists are health care professionals who diagnose and treat movement dysfunction that results in physical impairment and disability. In addition to providing direct patient care services, physical therapists serve as administrators of physical therapy services, educators, and consultants. They screen people for potential risk for movement dysfunction in order to prevent impairment and disability and engage in critical inquiry to conduct and review research.

Physical therapists work in a range of settings including acute and subacute care hospitals, rehabilitation centers, outpatient clinics, home health, skilled nursing facilities, school systems, and industrial settings. Physical therapists work as employees of health care systems, may independently contract their services, or own and manage a private practice. In any setting, for every patient, physical therapists perform a history and physical examination; conduct assessments to determine a diagnosis; select, perform, and supervise appropriate physical therapy interventions; and monitor the effectiveness of treatment.

Physical therapists are licensed in all states and may practice without physician referral in most of them. They are integral members of health care teams in a variety of service systems who serve to improve and maintain the quality of life for millions of people. More than 900,000 people a day are helped by physical therapists to restore health, alleviate pain, and prevent the onset of disease.

Nova Southeastern University's Department of Physical Therapy prepares professional and postprofessional physical therapists with the skills, knowledge, and values to effectively practice, educate, lead, and conduct physical therapy education and research in interprofessional environments. The curricula foster clinical inquiry and reasoning, professionalism, and evidence-based practice. The programs facilitate accessibility to physical therapist education through innovative instructional delivery models and promote intellectual curiosity, reflection, and lifelong learning skills. Faculty members, students, and alumni actively participate in the profession through scholarship, service, collaboration, mentoring, and serving those in need of PT services locally, nationally, and globally.

Professional Doctor of Physical Therapy (D.P.T.)

Course of Study
The Professional Doctor of Physical Therapy (D.P.T.) Program at Nova Southeastern University is offered in two distinct formats: A traditional, campus-based D.P.T. program located on our main campus in greater Fort Lauderdale and a Hybrid D.P.T. program at our Tampa location. The traditional program in Fort Lauderdale is completed in three years, while the hybrid program in Tampa is completed over four years to accommodate those who need flexibility to work or for personal/geographical reasons.

Delivery Methods
1. Fort Lauderdale: Campus-based, using a combination of interactive classroom and online instruction, clinical lab skills training, and clinical education
2. Tampa: Blend of online and face-to-face instruction so that students have three weeks of structured online instruction followed by four days (Thursday–Sunday) of hands-on instruction and clinical interactions on our Tampa campus. Students do not have to live in Tampa to attend the Hybrid D.P.T. Program.

Students in both the full-time and the hybrid programs are admitted once annually, in the summer semester. The Fort Lauderdale program includes 40 weeks of full-time clinical education. In the Tampa hybrid program, clinical education is integrated into the classroom during on-campus institutes in the second and third years and occurs full time for 36 weeks in the fourth year of the program.

Accreditation Status
The Doctor of Physical Therapy Program at Nova Southeastern University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703-706-3245; email: accreditation@apta.org; website: http://www.capteonline.org. The entry-level Physical Therapy Program was granted its initial full accreditation by the Commission on Accreditation of Physical Therapy Education (CAPTE), of the American Physical Therapy Association in October 1996. In May of 2011, the Fort Lauderdale and the Tampa programs received a 10-year accreditation.

Nova Southeastern University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate's, baccalaureate, master's, educational specialist, doctorate, and professional degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Nova Southeastern University.
Admissions Requirements
The Professional Doctor of Physical Therapy Program selects students based on prior academic performance, education, work experience, references, interview score, written application, and letters of evaluation. Selection is also based on the following factors:

1. A bachelor’s degree from a regionally accredited college or university is required.
2. Applicants must achieve a minimum 3.0 cumulative, prerequisite, and science GPA on a 4.0 scale.
3. Students must complete all of the following prerequisite courses with a grade of C or better:
   - English composition or writing (one semester)
   - Introduction to statistics (one semester)
   - Psychology/sociology—two semesters (one general psychology and an additional psychology or sociology)

The following sciences must be taken in their respective departments. No applied or modified science courses will be accepted.
   - Biology, anatomy, and physiology (three semesters with at least two in anatomy and physiology—may be separate or combined)
   - Physics with laboratory (two semesters)
   - Chemistry with laboratory (two semesters)

4. All applicants are required to submit official scores from the Graduate Record Exam (GRE). Writing scores must be included. These test scores must be less than five years old. Students holding a master’s degree are not required to take the GRE.

5. All prerequisite courses must be completed before the first day of classes. No exceptions will be made.

Applicants must demonstrate evidence of computer skills. Upon review of a student’s individual record, the committee on admissions may require additional coursework and testing as a condition of acceptance.

The dean is empowered to evaluate the total qualification of every applicant and to modify requirements in unusual circumstances.

Computer Requirements
D.P.T. Program—Fort Lauderdale Campus
System Requirements
- Laptop computer with native camera
- https://www.nova.edu/publications/it-standards

Word Processing and Presentation Software
- Microsoft Office Suite or Apple iWork (pages, keynote, numbers)

NSU Student Technology Support
- The Office of Innovation and Information Technology (OIIT) offers a wide variety of technological resources to support NSU’s students.
  - nova.edu/oiit

Hardware Discounts/Free Software
- Personal computer discount pricing is available for NSU students through NSU.
- Free software is also available for download for our students.
- If you have problems with any of the programs available through the website, please contact the NSU Help Desk at (954) 262-HELP (4357).

Blackboard Help
- nova.edu/help/blackboard

Audio Capability
A quality external microphone is required. This can be a headset or microphone-only model. (Note: many laptops come with integrated microphones; these often offer inadequate sound quality.)

D.P.T. Program—Tampa Campus
System Requirements
- https://www.nova.edu/publications/it-standards
- Laptop computer
- Additional video card requirements: 3D hardware accelerated graphics card, minimum DirectX 9 (PC) or OpenGL 2.0 (Mac)

High Speed Internet Connection
- Broadband connection: At least 10–15 mbps

Word Processing and Presentation Software
- Microsoft Office Suite or Apple iWork (pages, keynote, numbers)

Photo Capability
- Camera device with the ability to produce still photos and a photo file; acceptable file formats are jpg (Note: many cell phones are capable of this, and are acceptable as long as the photo quality is adequate.)
- Photo editing software may be necessary to edit or format photos for assignments; acceptable software to use can be
  - Windows Photo Gallery (PC): free download at support.microsoft.com/en-us/help/18614/windows-essentials
  - iPhoto and Preview for Mac (both free or included with operating system)
Video Capability

• video camera device with ability to record video and produce a video file; acceptable file formats are wmv, mp4, and mov (Note: many photo cameras and cell phones have this capability. Either is acceptable, as long as the video quality is adequate.)

• webcam for the purposes of web-based communication with classmates or faculty members (Note: many laptops come with integrated webcams, which are acceptable.)

• video editing software may be necessary to edit or format videos for assignments
  – free examples for PC
    • YouTube Editor (youtube.com/yt/creators)
  – iMovie for Mac (included with operating system)
    • Mpeg Streamclip for Mac converts iMovie files to mp4 (squared5.com)

• video player software
  – Windows Media Player, QuickTime, Real Player

Audio Capability

• A quality external microphone is required. This can be a headset or microphone-only model. (Note: many laptops come with integrated microphones; these often offer inadequate sound quality.)

NSU Student Technology Support

• The Office of Innovation and Information Technology (OIIT) offers a wide variety of technological resources to support NSU’s students.
  • nova.edu/oit

Hardware Discounts/Free Software

• Personal computer discount pricing is available for NSU students through NSU.

• Free software is also available for download for our students.

• If you have problems with any of the programs available through the website, please contact the NSU Help Desk at (954) 262-HELP (4357).

Blackboard Help

• nova.edu/help/blackboard

Essential Functions of the D.P.T. Student

The professional PT programs have a responsibility to the public to assure that graduates can become fully competent and caring physical therapists who are capable of providing benefit and doing no harm. Individuals admitted and retained in these programs must possess the intelligence, integrity, compassion, humanitarian concerns, physical and emotional capacity, communication skills, and professionalism necessary to practice physical therapy. To this end, all entry-level D.P.T. students must meet the requirements outlined in the Essential Functions of the D.P.T. Student document on admission and while matriculating through the programs. To view the form, visit healthsciences.nova.edu/pt/forms/nsu-dpt-essential-functions.pdf.

Application Procedures

The Professional Doctor of Physical Therapy Programs at Nova Southeastern University uses the Physical Therapist Centralized Application Service (PTCAS). The PTCAS may take up to six weeks to verify supporting documents, therefore, early application is highly recommended. Note: The NSU Fort Lauderdale and Tampa programs have two separate portals in PTCAS.

1. Candidates for admission must complete the online PTCAS application between July 15 and December 15. All applicants to the entry-level D.P.T. program should apply online (ptcas.org). Separate applications are required for the Fort Lauderdale and Tampa programs.

2. Send the following supporting documents directly to PTCAS at the address following.
   a. an official transcript from the registrars of all colleges and universities attended, mailed directly to PTCAS by the college or university
   b. three completed evaluations on the required forms from individuals, other than relatives, such as academic instructors and professors, health professionals, work supervisors, or volunteer supervisors, at least one from a physical therapist

PTCAS
PO Box 9112
Watertown, MA 02471
Email: ptcasinfo@ptcas.org
Phone: (617) 612-2040

3. Once the PTCAS application has been received by Nova Southeastern University, a supplemental application will be made available online. Please follow the instructions to complete and submit the supplemental application and fee by the deadline of January 31. The supplemental application should be sent directly to Nova Southeastern University
   Enrollment Processing Services
   College of Health Care Sciences
   Physical Therapy Admissions
   3301 College Avenue, P.O. Box 299000
   Fort Lauderdale, Florida 33329-9905

4. Official Graduate Record Exam (GRE) scores (less than five years old) must be submitted to PTCAS. The NSU PT program code is 7741.
5. Once NSU receives the GRE scores, the supplemental application, and the $50 fee, the applicant's file will be reviewed by the admissions counselor. The applicant will not be considered for a possible interview until all of the requirements have been met.

Undergraduate/Professional Doctor of Physical Therapy Dual Admission Program

Nova Southeastern University Health Professions Division has established a dual admission program with Nova Southeastern University's Halmos College of Natural Sciences and Oceanography for a select number of highly motivated, qualified students seeking to pursue both an undergraduate degree and professional studies in physical therapy. Candidates must maintain a specified GPA and achieve acceptable scores on the Graduate Record Examination (GRE).

Students will be awarded a bachelor's degree from the Halmos College upon completion of degree requirements. Students will receive a Doctor of Physical Therapy degree upon completion of the three-year D.P.T. curriculum.

For complete information and requirements, contact the Office of Admissions, Halmos College of Natural Sciences and Oceanography, Nova Southeastern University, 3301 College Avenue, Fort Lauderdale, Florida 33314-7796.

Tuition and Fees

Tuition and fees are equivalent for the Fort Lauderdale and Tampa programs; however the three-year tuition is prorated over four years for the Tampa program.

- For Fort Lauderdale students, tuition for 2016–2017 is $28,200 per year.
- For Tampa students, tuition for 2016–2017 is $21,150 per year.
- Acceptance Fee is $1,000. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be deducted from the tuition payment due on registration day, but is nonrefundable in the event of a withdrawal. For students accepted on or before December 16, the acceptance fee is due January 2. For those accepted after January 2, the acceptance fee is due within 10 business days.
- A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.

All tuition charges and fees are subject to change by the board of trustees without notice. The first semester’s tuition and fees, less the $1,000 previously paid, are due on or before the appropriate registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

The financial ability of applicants to complete their training is important because of the limited number of positions available in each class. Applicants should have specific plans for financing three years of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses.

It is required that each student carry adequate personal medical and hospital insurance throughout the program. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

Requirements for Graduation

In order to be eligible for the D.P.T. degree, students must

- be of good moral character and uphold professional ethics and behavior
- complete all academic requirements, semester hours, and coursework including self assessment
- satisfactorily complete the program of study required, in sequence in prescribed time, with a minimum grade of 75 percent in all courses
- have satisfactorily met all financial and library obligations
- successfully complete the clinical internships
- complete a program portfolio
- successfully pass a comprehensive examination at the end of the didactic component of the program
- fulfill all professional activity requirements including professional association membership
- fulfill all community service requirements
- have satisfactorily complied with all university, Health Professions Division, College of Health Care Sciences, and Department of Physical Therapy policies and procedures including dress code and all student handbook policies and procedures
- attend in person the commencement program at which time the degree is conferred
- demonstrate professional behavior and required attendance throughout the program
- compliance with other requirements as advised
Physical Therapy Student Organizations

Student Council
The Physical Therapy Student Council is the official voice of all students. The organization is open to all students and welcomes proposals and participation from the entire student body. Its responsibilities include collecting and expressing student opinion, dispensing funds for student activities, acting as liaison for the student body, promoting physical therapy, supporting club and class activities, and working to improve the quality of life for physical therapy students.

Other Student Organizations
Many student organizations addressing various professional interests are open for student membership, including:
- American Physical Therapy Association
- The Student Assembly of the American Physical Therapy Association
- The Student Special Interest Group of the Florida Physical Therapy Association
- campus-based student clubs

**Total Credits for Program 116**

* Includes integrated patient experiences.

‡ Includes integrated clinical experiences.
Professional Doctor of Physical Therapy Course Descriptions

PHY 5400—Physiology
The course is intended to provide students in the Physical Therapy Program with an understanding of the basic physiochemical concepts and physiological principles underlying the development, maintenance, and propagation of human life. It provides an examination of the physiological processes essential for students in the College of Health Care Sciences and reference to clinical applications is made where appropriate. Topics covered include basic examinations of cellular processes, membrane mechanisms, muscle physiology, the cardiovascular system, the nervous system, renal physiology, the respiratory system, endocrinology, reproductive physiology, and gastrointestinal physiology. (3 credits)

ANA 5420—Anatomy
The study of structural and functional features of the human body addressed in both lecture and cadaver lab format. The student will have an anatomical basis for understanding and applying information presented in basic science and clinical courses and for understanding clinical problems. (5 credits)

PHT 5610—Clinical Applications of Anatomy for Physical Therapists
This course addresses anatomical knowledge specific to the practice of physical therapy. It is an in-depth study of joint anatomy including muscular attachments, ligamentous structures, neutral innervations, and contribution to movement. Palpation of key bony- and soft-tissue structures will be introduced. Corequisite: ANA 5420 (1 credit)

PHT 5611—Introduction to Physical Therapy
This course introduces the new PT student to the program and the PT profession. It addresses the history of physical therapy, the Guide to Physical Therapist Practice, and medical terminology. Professional socialization begins through introduction to ethical and professional standards (including decision making, supervision, and delegation) and state and federal laws governing PT practice (including issues requiring advocacy). Certifications required for clinical practice such as CPR, AIDS, etc. will be acquired. Students are required to join the American Physical Therapy Association. (3 credits)

PHT 6705—Essentials of Exercise Physiology, Health Promotion, and Wellness
Describes the response to exercise and training on the cardiac, pulmonary, musculoskeletal, neural, and endocrine systems of the human body. It explains nutritional considerations, as well as enhancing supplements, as they relate to exercise, athletics, and physical therapy. The various methods of training for increased strength, hypertrophy, power, cardiovascular fitness, and endurance, and the effects of physical activities and work-related stress on the human organism will be discussed. Energy liberation, circulation and respiration, physical work capacity, physical training, energy cost of various activities, nutrition and performance, temperature regulation, factors affecting performance and fitness, and the physiology of various sport activities will be covered. Students will gain the knowledge required for designing exercise programs in the general and special populations based on established needs for function and performance. The course will also explore the professional role of physical therapists as advocates of health, wellness, and prevention, including the following topics: Healthy People 2020 initiative; APTA’s Vision 2020; wellness theory/models; dimensions of wellness; holistic versus conventional medicine; outcome measurements of wellness and quality of life; screening for health, fitness, and wellness; and considerations for special populations. Upon completion of this course, students are encouraged to prepare for the National Strength and Conditioning Association (NSCA) Certified Strength and Conditioning Examination. (3 credits)

PHT 6707—Gerontology
Theories, research, and unique characteristics and behaviors related to aging, geriatric medicine, and physical therapy intervention will be explored in light of current health care trends, reimbursement, clinical practice, and predictions. Students will gain an understanding of relevant laws impacting PT practice with elderly populations and the obligations of PTs with respect to suspected abuse, neglect, or exploitation of elderly and dependent adults. The course will appropriately incorporate this content into interactions with patients/clients, facility staff members, and administrators. (1 credit)

PHT 6710—Clinical Skills I
Introduces students to basic PT examination and interventions in accordance with the patient management model found in the Guide to Physical Therapist Practice. Students will safely interact and communicate with patients including history taking and producing documentation of patient status. Safe performance of psychomotor skills such as patient postural assessments, positioning and draping, palpation addressing surface anatomy of the head, trunk and extremities, bed mobility, transfers, the use of assistive gait devices, vital signs monitoring, and patient guarding and handling techniques will be emphasized. An overview of the terms related to CPT-coding and reimbursement will be provided. The course will provide students with an understanding of how cultural beliefs are an integral part of clinical practice, giving students an opportunity to develop self-awareness, knowledge, and skills related to providing and promoting culturally competent patient care. (4 credits)
PHT 6715—Essentials of Biomechanics and Kinesiology
This is a foundational science course to introduce physical therapy students to the study of biomechanics and kinesiology. The students will integrate their anatomy knowledge of muscle and joint structures into the study of joint motion and functional movements. The course introduces the student to basic principles of biomechanics, which serves as the foundation for understanding kinesiology. The course will be structured by body parts: the upper extremity, the lower extremity, and the spine. Once the regional knowledge of kinesiology is understood, the final outcome of the course will be to learn and comprehend complex kinesiologic analysis: gait, posture, and functional movements. (3 credits)

PHT 6717—Systems Management I: Medical Pathology and Pharmacology
This course provides an introductory overview of medical pathology and pharmacology commonly seen by physical therapists in patients/clients across the life span. Students will be introduced to immunity, tissue response to injury, and healing processes. Students will also gain knowledge of signs and symptoms, pathogenesis, differential diagnosis, and pharmacological aspects of treatment of selected pathological disorders. Medical and pharmacological management of selected disorders will be introduced as well as prognosis associated with each disorder. Prescription, over-the-counter, and common herbal supplements will be included. Drug classification, pharmacokinetics, pharmacodynamics, mechanism of action, and indications for use will be addressed. Drug action, therapeutic dosage schedules, drug interactions, and common side effects will be brought into the clinical perspective of patient management. Recognition of expected drug effects, side effects, idiosyncratic reactions, and signs of abuse or noncompliance will be explored. Emphasis will be placed on the therapist's incorporation of pharmacotherapeutic knowledge into physical therapy patient/client management.

Application of the Disablement Model will be used to determine the effect of pathological disorders on functional ability. Students will also gain a brief understanding of the role of the physical therapist in prevention and treatment of selected pathological and biopsychosocial disorders. Discussion will take place regarding cultural and other factors affecting diagnosis, treatment, and prevention of pathological and biopsychosocial disorders currently affecting society. (3 credits)

ANA 5423—Neuroanatomy
This course offers a study of the gross structure of the brain and spinal cord and the functional relationship among their parts. It emphasizes major motor and sensory pathways and integrative mechanisms of the central nervous systems. (3 credits)

PHT 6700—Evidence-Based Practice I: Introduction to Research Methods and Data Analysis
This course allows the learner to gain skill in reviewing research literature. It includes an overview of the principles of measurement, reliability, and validity; an understanding of the four levels of measurement (nominal, ordinal, interval, and ratio); research ethics; and critical literature analysis. It employs a creative, problem-solving experience during which the student will develop a global understanding of the concepts and principles of research and begin to critically analyze health care research literature. The student will also begin to recognize the importance and role of research in clinical practice. (3 credits)

PHT 6720—Clinical Skills II
This course presents models for clinical decision making including the patient care management model as presented in the Guide to Physical Therapist Practice. Students will learn to safely apply assessment and intervention techniques that address range of motion and strength deficits. Safe performance of psychomotor skills such as goniometric measurements, MMT, therapeutic exercises, PNF, and tilt and standing table and parallel bars will be emphasized. (3 credits)

PHT 6721—The Health Care Educator
Teaching is an integral part of physical therapy practice and one of the foundations of a doctoring profession. This course explores both the theoretical basis and the practical techniques related to patient-related instruction, designing educational programs/in-services, evaluating program/teaching effectiveness, facilitating behavior change, creating professional presentations, and engaging in clinical education. Students will also explore learning styles and factors that impact learning across the life span, as well as the many issues that impact patient education, from both a health care professional and management perspective. Adult education theory, patient/therapist interaction, communication barriers, strategies for success, web-based patient education, documentation, federal laws and initiatives, and standards for patient education are some of the topics that will be examined. (1 credit)

PHT 6722—Integumentary PT
The structure and function of the integument is presented. Skin functions in homeostasis including protection, regulation of body temperature, sensory reception, water balance, synthesis of vitamins and hormones, and absorption of materials will be discussed. Students will safely perform physical therapy assessment and explore interventions for wounds and edema, based on the current literature, such as dressings, therapeutic massage, compression, and hydro and electrotherapeutic modalities. Assistive, adaptive supportive devices and equipment to prevent or relieve skin trauma will be addressed. At the end of this course, the students will be able to
evaluate, treat, and document disorders of the skin that are frequently treated by PTs. The students will also be able to determine whether a skin disorder needs referral to another appropriate health care provider. (2 credits)

PHT 6725—Cardiovascular and Pulmonary PT
This course provides an overview of the related pathologies and diagnostic and medical-surgical procedures of the cardiovascular and pulmonary systems. Physiological principles of exercise will be applied to cardiopulmonary examination and intervention for given pathologies. Students will demonstrate PT cardiovascular and pulmonary examination, procedures, treatment planning, documentation, and outcome measurement across all clinical settings and explore interventions related to exercise, functional activities, and airway clearance. The relevance of clinical laboratory values and medical/surgical diagnostics and interventions associated with cardiovascular and pulmonary dysfunctions will also be covered. Case studies are used in conjunction with lecture, and interactive teaching and learning to assist students in integrating didactic knowledge into simulated and real-life scenarios including laboratory skills Prerequisites: PHT 6705 and PHT 6714 (3 credits)

PHT 6807—Systems Management II:
Medical Issues in the Acute Setting
This course is a continuation of PHT 6717—Systems Management I: Medical Pathology and Pharmacology. Systems Management II has a two-fold purpose: 1) to present those body system pathologies not covered in PHT 6717, and 2) to specifically address medical and treatment issues found in acute care settings. Renal, urologic, hepatic, pancreatic, biliary, and gastrointestinal systems will be presented first. Students will gain knowledge of signs/symptoms, pathogenesis, differential diagnosis, and pharmacological aspects of treatment related to disorders in these systems. The second half of the course addresses physical therapy examination and management of the acute care patient. Included in this section are patient testing, condition diagnosis/prognosis, and patient disposition. Concomitant attention is given to issues of patient safety, management of the treatment environment, and proper use of specialized equipment. Treatment precautions, recognition of adverse responses, and emergency procedures will be emphasized. Case studies and laboratory sessions will focus on patient mobilization principles; interprofessional coordination of care; and acute nonsurgical, acute postsurgical, and medically complicated patient management. Adding further depth to the course will be discussions of biopsychosocial and cultural factors affecting the rehabilitation process. (3 credits)

PHT 6810—Musculoskeletal I
This is the first of three courses designed to introduce the entry-level D.P.T. student to the elements of patient/client management in the orthopedic setting. This course emphasizes the musculoskeletal system and follows both the sequence and nomenclature outlined in the Guide to Physical Therapist Practice including examination, evaluation, diagnosis, prognosis, intervention, and outcomes. Specific areas to be covered will include communication and history taking, systems review, symptom physiology, selection and administering tests and measures, principles of manual therapy, soft tissue/myofascial intervention, extremity and spine mobilization (non-thrust), common disorders and injuries, musculoskeletal radiology, and principles of musculoskeletal disorder/injury management. Students will acquire the cognitive, psychomotor, and affective skills necessary to conduct a general musculoskeletal examination and perform interventions relevant to physical therapy practice. At completion of this course, students will have acquired the requisite knowledge to learn advanced diagnoses and interventions covered in PHT 6820, PHT 6820L, PHT 6821, and PHT 6821L. Case studies will be utilized in conjunction with lecture, laboratory skill practice, and interactive teaching and learning methods to integrate didactic knowledge into real-life clinical scenarios. (2 credits)

PHT 6810L—Musculoskeletal I Lab
Laboratory sessions will emphasize the psychomotor and affective skills required to perform the examination and interventions addressed in PHT 6810. Corequisite: PHT 6810 (2 credits)

PHT 6814—Clinical Practicum I
This course includes classroom instruction and integrated clinical education (ICE) experiences. It concludes with a four-week, full-time clinical internship in a skilled nursing facility (SNF) setting. Classroom instruction focuses on orientation and preparation for both integrated and full-time clinical experiences. The ICE experiences employ a self-contained collaborative clinical education model where students are directly supervised in the clinic by academic faculty members. Students practice examination/evaluation and treatment skills learned in the curriculum concurrently and cumulatively throughout the course of the semester in underserved geriatric and other adult populations in an acute care hospital joint replacement unit, an outpatient clinic, and a skilled nursing facility. Emphasis during the ICE experiences is on developing skills in professional behavior, clinical safety, communication, therapeutic presence, assessment, examination, screening, basic treatment planning, and performance of basic skill interventions based primarily on Clinical Skills I with introduction of some of the skills in Clinical Skills II and cardiopulmonary. The four-week, full-time internship is a community-based clinical education experience in which students are directly supervised in an SNF by community-based clinicians in a 1:1 or 2:1 model based on facility preference. Emphasis during the internship is on developing confidence and competency in professional
behavior, clinical safety, communication, therapeutic presence, assessment, examination, treatment planning, patient/client education, reimbursement/billing, and performance of basic skill interventions and documentation with patients/clients scheduled on a repetitive basis over the course of four weeks. (3 credits)

PHT 6815—Physical Agents
This course will emphasize both cognitive and psychomotor knowledge related to electro- and thermo-modalities. Basic science information related to physiological effects, indications, and contraindications will be discussed. Lecture, interactive teaching, and lab practice will be used to assist students in integrating the didactic knowledge into simulated and real-life scenarios. (3 credits)

PHT 6802—Evidence-Based Practice II : Using Research to Inform Clinical Decision Making
In this course, students will be exposed to Sackett's model of evidence-based medicine in order to lay a foundation for understanding the global concept of evidence-based practice (EBP). Students will learn to use the PICO format to ask clinically relevant questions. Students will learn to locate sources of evidence, evaluate the evidence, and make recommendations based on the evidence. Students will also explore the work of the Philadelphia Panel, the Pedro scale, and Hooked on Evidence as methods for critiquing the literature. Lastly, students will contribute to APTA's Hooked on Evidence database. (3 credits)

PHT 6816—Neuroscience
This course provides the foundation knowledge necessary for patient/client management of patients with neuromuscular conditions through two modules: neurophysiology and motor control/motor learning. Students review the structure and function of the nervous system, emphasizing neurophysiological processes that relate to physical therapy and movement dysfunction. Principles of motor control and motor learning are discussed as they relate to normal human movement and movement dysfunction that result from neurologic disorders. Concepts of neuroplasticity and the recovery of function are also addressed. Classroom activities include case studies, group discussions, literature reviews, simulations, and lectures. Prerequisite: ANA 5423 (3 credits)

PHT 6817—Pediatrics I
This is the first of two pediatrics courses. This course introduces students to pediatrics as a specialty practice area in physical therapy. Students gain an understanding of typical infant and child development as it relates to movement and have the opportunity to practice observation and evaluation skills, including the use of standardized tools, to screen children for atypical and delayed development. Typical development is presented in the context of applying current motor control theories to predictable developmental sequences, motor progressions, and achievement of motor milestones. Using this foundation, students begin to analyze movement dysfunction exhibited in high-risk infants and children who have common childhood pathologies. Content is presented through lecture, lab, large and small group discussion, and community-based activities. (1 credit)

PHT 6819—Pediatrics II
This course focuses on the physical therapy management of the pediatric patient/client and the role of family-centered care. Students apply foundational knowledge and skills gained in Pediatrics I in the evaluation and treatment of atypical child motor dysfunction related to developmental delays; CNS damage; orthopedic conditions; respiratory conditions; sensory processing dysfunction; multisystem impairments; and congenital, neurological, and neuromuscular disorders. The course is designed to promote critical thinking and decision-making in physical therapy management of the pediatric client. Physical therapist practice patterns (examination, evaluation, diagnosis, prognosis, and evidence-based interventions) are applied in context. Management, incorporating use/need for assistive devices, technologies, adapted equipment (e.g., wheelchair prescription and seating), orthotics, and bracing and use of newer interventions for the pediatric patient/client are presented. Delegation and supervision of support personnel, legal/ethical issues related to delivery of care, documentation, interdisciplinary team management, cultural issues, reimbursement, and patient/family and teacher education are explored. Content is presented through lecture, lab, case studies, large and small group discussion, and community-based activities. (3 credits)

PHT 6820—Muscloskeletal II
Students will acquire the skills needed to manage and prevent disorders of the musculoskeletal system. Students will address relevant practice patterns as they relate to the upper/lower quarter, diagnostic classifications, ICD9 codes, examination, evaluation, diagnosis, prognosis, and interventions. Case studies are utilized in conjunction with lecture to assist students in integrating the didactic knowledge into simulated and real life scenarios. (3 credits)

PHT 6820L—Muscloskeletal II Lab
Emphasizes the psychomotor and affective skills required when providing the musculoskeletal interventions and tests addressed in PHT 6820. Students will acquire the psychomotor skills needed to manage and prevent disorders of the musculoskeletal system by addressing relevant practice patterns as they relate to the upper/lower quarter, ICD-9 codes, examination, evaluation, diagnosis, prognosis, and interventions related to these patterns. Corequisites: PHT 6820 (2 credits)
PHT 6813—Gender-Specific Issues in Physical Therapy

This course provides a review of diseases unique to the male and female body systems. Students will gain knowledge of gender-specific pathologic processes associated with selected diseases as well as disease-specific signs and symptoms. Common medical diagnostic and treatment approaches of gender-specific conditions are discussed, including both medical management and an introduction to physical therapy intervention. Changes to body systems during normal pregnancy will be discussed in addition to common pregnancy-related musculoskeletal problems. Topics will include male and female incontinence, prostate disease, erectile dysfunction, pregnancy-related movement dysfunction, pelvic floor dysfunction, urinary and fecal incontinence, lymph edema management, premenstrual dysphoric syndrome, female athlete triad, postmenopausal considerations, and osteoporosis. Students will be exposed to entry-level physical therapy examination techniques and interventions used to manage gender-specific diseases, including recognition of key subjective or historical information that may warrant a pelvic floor examination or referral to another professional. Basic examination and intervention techniques will be practiced in a simulated environment. (2 credits)

PHT 6821—Musculoskeletal III

This course is an evidence-based approach to the management of musculoskeletal disorders of the spine. Students will acquire the requisite skills necessary to examine, manage, and prevent musculoskeletal impairments; functional limitations; and disabilities of the spine. The course will address lumbar, thoracic, costal, cervical, sacroiliac, pelvic, temporomandibular, and headache disorders. Students are prepared for entry-level patient/client management including the ability to perform an examination, evaluation, diagnosis, prognosis, and the ability to select optimum interventions. Moreover, students will acquire the knowledge necessary to accurately disseminate information (verbal and written/documentated) related to the examination and management of spine disorders to patients and clients and across the broad range of health care disciplines. Case studies are utilized in conjunction with lecture and interactive teaching and learning to assist students in integrating the didactic knowledge into simulated and real-life scenarios. (2 credits)

PHT 6821L—Musculoskeletal III Lab

This course will emphasize the psychomotor and affective skills required when providing the associated musculoskeletal examination and interventions addressed in PHT 6821. Students are instructed and mentored in the selection and application of tests, measurements, and physical therapy interventions. Case studies are utilized in conjunction with interactive teaching and learning to assist students in integrating the techniques into simulated and real-life scenarios relevant to the musculoskeletal system. Corequisite: PHT 6821 (2 credits)

PHT 6824—Clinical Practicum II

This is the second of a self-contained clinical education model where students are directly supervised in the clinic by academic faculty members. Students concurrently practice the evaluation and treatment skills learned in the curriculum. (1 credit)

PHT 6830—Neuromuscular I

Neuromuscular Systems I addresses the examination and treatment of adults with neuromuscular disorders. Students apply knowledge from Neuroanatomy and Neuroscience to the clinical management of patients with neurological conditions. Neuromuscular Systems I provides the foundational concepts and clinical reasoning for choosing tests and measures used during PT examination of the neurological patient, including sensory and motor tests; examination of motor function, motor learning, and coordination; cranial nerves; functional mobility; self-care and activities of daily living; community function; arousal, attention, and cognition; and balance, gait, and disease-specific tests. The foundational concepts for procedural interventions related to neurorehabilitation will be addressed. These include indications, precautions, and contraindications, as well as evidence-based recommendations for therapeutic exercise; balance and gait retraining; manual techniques and facilitation; electric stimulation; mobility training; upper extremity reach, grasp, and manipulation training; positioning, supportive, and protective devices; wheelchairs; and community re-entry. Prerequisites: ANA 5423 and PHT 6816 (3 credits)

PHT 6830L—Neuromuscular I Lab

This course is the laboratory component of Neuromuscular Systems I which addresses the psychomotor skills needed for the examination and treatment of patients with neuromuscular disorders. The students will be exposed to a variety of clinical tests and measures including patient history; sensory testing (superficial, deep, and cortical sensations) by both peripheral nerve distribution and dermatome; myotome and manual muscle testing; motor function and coordination testing; balance, gait, and mobility testing; arousal, attention, and cognitive tests; environmental, home, and work/play barriers; self-care and home management (including ADLs and IADL testing); job/school/play reintegration testing; and assistiveadaptive device testing. Disease-specific tests and measures will also be performed. Psychomotor treatment skills will include balance and gait training, including body weight-supported treadmill training; therapeutic exercise to improve muscle performance, mobility, balance, and coordination for the neurological patient; functional training, self-care...
and home management in ADLs and IADLs; work/play integration; manual therapy techniques, positioning, and facilitation; and prescription and application of assistive and supportive devices; as well as physical agents and electrotherapeutic modalities. Prerequisites: ANA 5423 and PHT 6816 (2 credits)

PHT 6834—Clinical Practicum III
This is the final course in the clinical practicum series. The course consists of integrated clinical education experiences supervised by academic faculty members, followed by a four-week, full-time clinical education experience in a community-based, adult, outpatient clinic (primarily musculoskeletal), in which students are directly supervised by community-based clinicians in a 1:1 or 2:1 model. Emphasis is on developing confidence and competency in professional behavior, reimbursement/billing, clinical safety, communication, therapeutic presence, assessment, examination, treatment planning, patient/client education, and performance of basic skill interventions and documentation with patients/clients. (2 credits)

PHT 6835—Medical Screening and Differential Diagnoses for Physical Therapists
This course provides students with the opportunity to develop their skills to identify patients with medical conditions outside the physical therapy practice scope. The focus is differential diagnosis through history and physical exam and not physical therapy intervention. The differential diagnosis is between musculoskeletal conditions and medical/psychological conditions commonly seen in outpatient settings. The course emphasizes conditions that should not be treated by physical therapists or conditions that require physical therapy intervention in direct consultation with other health care professionals (mainly physicians, dentists, and psychotherapists). The course will cover common laboratory tests applied to physical therapy (blood tests, urine analysis, synovial fluid analysis, cerebral spinal fluid). The course will also discuss the findings of imaging tests in diseases affecting the musculoskeletal system. Students are encouraged to apply the information learned in this course in their clinical internships and discuss each topic among themselves and with the instructors. Prerequisites: PHT 6810 and PHT 6716 (3 credits)

PHT 6823—The Business of Physical Therapy
This course is devoted to understanding the structure and function of the United States health care delivery system. It explores the regulatory, economic, and financial responsibilities of the physical therapy manager in the utilization of human and material resources within a variety of health care environments. Students will develop knowledge and skills to effectively manage in various health care settings. (3 credits)

PHT 6906—Clinical Internship Orientation
This course will include all final preparation necessary for students to begin their Clinical Internship series. (0 credits)

PHT 6914—Neuromuscular II
Neuromuscular II integrates concepts from Neuroscience and Neuromuscular Systems I to engage students in the patient/client management of patients with neuromuscular dysfunction. Students are exposed to a variety of case studies, representing all adult neuromuscular practice patterns in the Guide to Physical Therapist Practice, to integrate and apply previously learned neuromuscular skills to patient scenarios. Emphasis is placed on clinical reasoning during all steps of patient/client management; the ability to apply evidence in practice, design, and execution of patient/client-related instruction; delegation to support personnel; and documentation of all aspects of care. This class also addresses primary, secondary, and tertiary prevention for patients with neuromuscular conditions. (2 credits)

PHT 6914L—Neuromuscular II Lab
This course is the laboratory component of Neuromuscular II. In it, students will perform all aspects of patient/client management including examination, evaluation, diagnosis, prognosis, development of a plan of care, procedural interventions, and outcome measurement. Students will apply these techniques to a variety of case studies, representing the scope of adult practice patterns in the Guide to Physical Therapist Practice. Neuromuscular II culminates in an intense, one-week laboratory experience, the Neuro Boot Camp, in which students work with real patients who have complicated neuromuscular disorders in a faculty-supervised setting. Students are responsible for performing a thorough examination, writing a comprehensive plan of care, performing procedural interventions, providing patient instruction, and communicating with caregivers. (2 credits)

PHT 6915—Prosthetics and Orthotics
Students will acquire the skills needed to manage movement-related problems in patients with amputations because of diabetes, burns, trauma, oncological problems, and genetic conditions. They will study upper and lower extremity prosthetics and orthotics and spinal orthotics. Orthotic needs associated with obesity, arthritis, pain, etc., will be addressed, as well. (3 credits)

PHT 6916—Clinical Internship I
This is the first of three senior, full-time, clinical affiliation courses. This course will provide senior physical therapy students with opportunities to practice clinical decision-making based on evidence and develop entry-level physical therapy skills for patient/client management in a variety of clinical settings on a full-time basis. Students will apply their knowledge, skills, attitudes, and behaviors
in community-based physical therapy settings. Through the clinical internship series, students will typically rotate through clinical placements in a variety of health care organizations; schedule modifications may be made to accommodate facility requirements or other needs. The goal of all placements is for student achievement of entry-level competency and professional behaviors in all settings. Students must complete at least one internship in an acute care/inpatient or subacute setting, a neurorehabilitation setting, and an outpatient setting. The remaining internships may be completed in the venue or setting of the student’s choice (outpatient clinics; rehabilitation hospitals or units; or specialty practices, such as pediatrics, sports, worker’s compensation/ergonomics, or women and men’s health) as available. During the full-time internship, students will focus on patient/client management models by performing patient examinations and evaluations and determining diagnoses, prognoses, and interventions (POC) within the context of the clinical setting utilizing the Guide to Physical Therapist Practice. It is expected that through the clinical internship series, students will demonstrate appropriate management skills of patient/clients across the life span or across the continuum of care commonly seen in physical therapy practice. Students are expected to demonstrate effective communication and documentation skills and to develop their professionalism consistent with the APTA core values, cultural competence, and ethical and legal practice. (5 credits)

PHT 6920—Applied Clinical Decision Making
Students apply problem solving heuristics, analyze case presentations of multifactor movement dysfunction, synthesize patient problem lists from collected data, develop intervention strategies, and evaluate the outcome of assessment and intervention decisions. The course integrates material from the foundational medical and clinical sciences and student clinical experiences. Accordingly, students demonstrate differential diagnosis and treatment planning across the life span as well as select and justify interventions, recommend referrals, and establish discharge dispositions.

Student learning and course participation is driven by mock and real clinical cases and clinical experiences. Content experts guide cognitive domain discussion and the decision-making process, assess the affective domain and compliance with professional ethical standards, and evaluate complex overt performance of psychomotor tasks. Students will develop initial plans for examination and assessment, perform assessments, analyze and interpret test results, prepare written intervention plans, perform interventions, and suggest potential outcome assessments. Students will justify and modify treatment plans to account for changes in the patients’ status. In addition, students will prepare and present a clinical case report to the assembled class at the conclusion of the term. Topics for the clinical cases and clinical experiences will cover a broad spectrum of conditions seen by physical therapists in the clinical setting. (4 credits)

PHT 6926—Clinical Internship II
This is the second of three senior, full-time clinical internships. Students will complete an extended internship in multifaceted health care organizations with the goal of bringing their skills to entry level for both inpatient and outpatient care. Students will also have the opportunity to choose a specialty area in physical therapy practice and complete a portion of the internship in that specialty area. See PHT 6916—Clinical Internship I for more details about the internship series. (6 credits)

PHT 6946—Wrap-up
The course provides a conclusion to the clinical internship series as well as the didactic portion of the curriculum. A comprehensive examination covering all topics addressed in the curriculum will be administered. Additionally, the management of the graduation process and commencement exercises will occur. (2 credits)

PHT 6936—Clinical Internship III
This is the final of three senior, full-time, clinical internships. Students will complete an extended internship in multifaceted health care organizations with the goal of bringing their skills to entry level for both inpatient and outpatient care. Students will also have the opportunity to choose a specialty area in physical therapy practice and complete a portion of the internship in that specialty area. See PHT 6916—Clinical Internship I for more details about the internship series. (5 credits)

PHT 6904—Independent Study Research Project
The student will complete a comprehensive literature review, case report, or research study on a topic approved by the student’s faculty adviser. The quality of the written assignment must be such that it is publication ready for a peer-reviewed journal or scholarly presentation. This course requires the permission of the program director. (1–3 credits)

PHT 6910—Independent Study
Individualized study completed under the supervision of an instructor. Requires permission of the program director (1–6 credits)
Hybrid Doctor of Physical Therapy Course Descriptions

PHY 5400—Physiology
The course is foundational and intended to provide students in the Physical Therapy Program with an understanding of the basic physiochemical concepts and physiological principles underlying the development, maintenance, and propagation of the human body. It provides an examination of the essential physiological processes with reference to clinical applications where appropriate. Topics covered include basic examinations of subcellular processes, membrane mechanisms, muscle physiology, connective tissue matrices, the cardiovascular system, the nervous system, renal physiology, the respiratory system, endocrinology, reproductive physiology, and gastrointestinal physiology. (3 credits)

ANA 5420—Anatomy
This foundational science course develops the knowledge of human anatomy necessary for the practice of the profession. It presents the anatomy of the human body in both lecture and lab format. Learning modes will be active and collaborative and involve models, dissection, and some work with basic imaging and virtual laboratories. It addresses gross structures and systems of the human body and integrates topographic and radiographic anatomy, stressing the importance to clinical practice. (5 credits)

PHTT 6705—Essentials of Exercise Physiology
Exercise physiology describes the response to exercise and training on the cardiac, pulmonary, musculoskeletal, neural, and endocrine systems of the human body. The various methods of training for increased strength, hypertrophy, power, cardiovascular fitness, and endurance, and the effects of physical activities and work-related stress on the human organism will be discussed. Energy liberation, circulation and respiration, physical work capacity, physical training, energy cost of various activities, nutrition and performance, temperature regulation, and factors affecting performance and fitness will be covered. Students will gain the knowledge required for designing exercise programs in the general and special populations based on established needs for function and performance. (3 credits)

PHTT 6741—Systems Management I
This course provides an introductory overview of medical pathology and pharmacology commonly seen by physical therapists across the life span. Students will be introduced to the medical management, pharmacological aspects, signs and symptoms, pathogenesis, and differential diagnosis of selected pathological disorders. Application of the ICF Model will be used to determine the effect of pathological disorders on functional ability. Drug classification, pharmacokinetics, pharmacodynamics, mechanism of action, and indications for use for selected medication classes will be addressed. Pharmacotherapeutic knowledge will be brought into the clinical perspective of physical therapy patient/client management. This class introduces students to patient care within inpatient environments, including management of medical equipment such as lines, tubes, catheters, and patient lift devices, as well as working with patients at the bedside. (3 credits)

PHTT 5610—Clinical Application of Anatomy for Physical Therapists
This course addresses anatomical knowledge specific to the practice of physical therapy. It is an in-depth study of musculoskeletal anatomy including bony landmarks, muscular attachments, ligamentous structures, and neutral structures. Palpation of key bony- and soft-tissue structures will be introduced. (1 credit)

PHTT 5611—Professional Issues in Physical Therapy
The professional roles and responsibilities of physical therapists provide a framework for discussion of contemporary health care issues and the history of the American Physical Therapy Association. Ethical principles, core values, standards of practice, and key professional documents that guide clinical practice serve as the basis for student socialization into the profession of physical therapy. This transition into the profession of physical therapy is celebrated symbolically during the White Coat Ceremony. This course also addresses the roles of physical therapists (patient manager, educator, consultant, critical inquirer, and administrator) in their professional development over time from novice to expert practitioner. Students analyze their roles as members of health care teams and determine the broader position of the profession in society. Additionally, this course introduces compliance issues related to clinical education to prepare students for clinical internship. (3 credits)

PHTT 6700—Introduction to Evidence-Based Practice
Evidence-based practice (EBP) integrates evidence from three sources to answer clinically relevant questions that deal with 1) research literature; 2) clinician knowledge, experience, and judgment; and 3) patient preferences, values, and circumstances. This course introduces the role of the physical therapist as a scientific, evidence-based practitioner of physical therapy and provides a foundation for the integration of critical inquiry and evidence-based practice throughout the curriculum. Emphasis will be on evidence from primarily quantitative research about diagnosis, prognosis, interventions, and outcomes. (3 credits)
PHTT 6715—Essentials of Biomechanics and Kinesiology
This is a basic science course to introduce physical therapy students to the study of biomechanics and kinesiology. The students will integrate their anatomy knowledge of muscle and joint structures into the study of joint motion and functional movements. The course introduces the student to basic principles of biomechanics, including kinetics, kinematics, and tissue biomechanics. Basic biomechanics serves as the foundation for understanding kinesiology. The study of kinesiology will be separated by body parts: kinesiology of the upper extremity, the lower extremity, and the spine. Once the regional knowledge of kinesiology is understood, the final outcome of the course will be to facilitate the students to learn and comprehend complex kinesiologic analysis: gait, posture, and functional movements. (3 credits)

PHTT 6716—Systems Management II
This course is a continuation of Systems Management I. This course provides an introductory overview of medical pathology and pharmacology commonly seen by physical therapists across the life span. Students will be introduced to the medical management, pharmacological aspects, signs and symptoms, pathogenesis, and differential diagnosis of selected pathological disorders. Application of the ICF Model will be used to determine the effect of pathological disorders on functional ability. Drug classification, pharmacokinetics, pharmacodynamics, mechanism of action, and indications for use of selected medication classes will be addressed. Pharmacotherapeutic knowledge will be brought into the clinical perspective of physical therapy patient/client management. Students will continue introductory skills of patient care within inpatient environments, including bed mobility, transfers, and management of medical equipment such as lines, tubes, and catheters during patient mobility. (3 credits)

PHTT 6701—Communication and Cultural Competence
This course explores concepts of cultural competence related to health care delivery, with students given an opportunity to actively incorporate principles of cultural competency to real-life situations. Interprofessional and interpersonal communication and group processes needed to function effectively as part of a team in the health care environment will also be presented. Communication (written, verbal, and nonverbal) methods used to enhance interactions with the patient/client, families, and other members of the health care team will be discussed and practiced. Discussions will include epidemiology and health care access issues as they relate to cultural barriers. (2 credits)

PHTT 6710—Clinical Skills I
This course introduces students to the basic clinical skills associated with physical therapy examination and evaluation, including administering culturally appropriate and age-related tests and measures including gait, balance, range of motion/muscle length, muscle strength, and functional performance testing, as well as producing documentation of these portions of an examination. Both psychomotor skills and clinical reasoning skills are addressed based on tests and measures in the Guide to Physical Therapist Practice. The course also provides opportunities for both integrated patient experiences in the classroom and integrated clinical experiences in the clinic under the close supervision of faculty members and lab assistants. (3 credits)

PHTT 6720—Clinical Skills II
This course integrates all three aspects of physical therapist interventions described in the Guide to Physical Therapist Practice, including a) coordination, communication, and documentation; b) patient-related instruction; and c) procedural interventions. Students will learn, practice, and apply basic procedural interventions (clinical skills), including therapeutic exercise, gait training, functional training in self-care and home management, and prescription/application of devices and equipment with emphasis on assistive devices and wheelchairs. Clinical Skills II provides opportunities for both integrated patient experiences in the classroom and integrated clinical experiences in the clinic under the close supervision of faculty members and lab assistants. (3 credits)

PHTT 6711—Principles of Documentation
This course introduces students to the principles of effective documentation for physical therapists. Because documentation is a critical component of every patient encounter, this course provides the foundations regarding different types of documentation (initial examination, treatment, progress, re-evaluation, and discharge notes) and varying forms of documentation (paper and electronic medical records), as well as legal and ethical guidelines regarding documentation for physical therapists. Students will apply these principles throughout the curriculum in all patient management courses. (1 credit)

PHTT 6722—Integumentary PT
Integumentary PT addresses the patient/client management of patients with integumentary dysfunction or those who have the potential for integumentary disorders as described in the Guide to Physical Therapist Practice. The course builds on the students’ knowledge of skin anatomy and physiology as related to skin structure, function, pathology, and tissue healing as well as the relationship of movement to the prevention and management of wounds. Topics include screening of the skin as a system as well as the examination, evaluation, diagnosis, prognosis, plan of
PHTT 6802—Application of Evidence-Based Practice
Evidence-based practice (EBP) integrates evidence from three sources to answer clinically relevant questions concerning 1) research literature; 2) clinician knowledge, experience, and judgment; and 3) patient values and circumstances. This course reviews and builds on content introduced in Introduction to Evidence-Based Practice, developing the role of the physical therapist as a scientific, evidence-based practitioner of physical therapy and continuing to integrate critical inquiry and evidence-based practice throughout the curriculum. Emphasis will be on the use of statistical tools in appraising evidence, as well as the introduction of more complex sources of evidence, such as systematic reviews, meta-analysis, Cochrane reviews, clinical prediction rules, and clinical practice guidelines. The role of qualitative and mixed-methods research designs also will be explored. (3 credits)

PHTT 6916—Patient/Client Management Post Amputation
This course focuses on the patient/client management of people with amputations, including examination, evaluation, diagnoses, prognoses, plan of care, interventions, and outcomes. Topics include the etiology, psychological considerations, medical management, and complications of amputations; physical therapy examination and evaluation of the acute and chronic patient; prosthetic fabrication, fit, and components; and physical therapy interventions to maximize patient outcomes. Students will also explore current literature to demonstrate an evidence-based approach to rehabilitation using prosthetics. This course also provides an introduction to the role of orthotic devices in patient/client management. The clinical indications and principles of orthotics presented in this course form the foundation for discussion of orthotic prescription and modification in subsequent patient management classes throughout the curriculum. (2 credits)

PHTT 6815—Physical Agents
This course will emphasize both cognitive and psychomotor knowledge related to the appropriate use of physical agents in physical therapy patient management. Basic science information related to physiological effects as well as indications and contra-indications for physical agents will be discussed. (3 credits)

PHTT 6823—The Business of Physical Therapy
Potential opportunities and career paths that can lead to mid-level and executive management positions for physical therapists are presented in the context of the complex world of contemporary health care organizations and their unique business models. Current issues that impact the roles of leaders and managers and their responsibilities in five different types of health care settings are presented. Students will prepare a program proposal, feasibility study, or business plan to address a need for physical therapy services. (3 credits)

PHTT 5423—Neuroanatomy and Neurophysiology
This course introduces physical therapy students to the study of the human nervous system's structures, pathways, connections, and functions. Students are introduced to basic anatomical and physiological principles of the brain, spinal cord, and peripheral nervous system and relate these structures to the clinical signs and symptoms of neurological dysfunction. Neuroanatomy and Neurophysiology serves as the basic scientific foundation for subsequent physical therapy coursework including motor control, Neuromuscular Systems I, and Neuromuscular Systems II. (3 credits)

PHTT 6813—Gender-Specific Issues in Physical Therapy
This course is an overview of pathology and musculoskeletal issues that impact the male and female body. Students will gain knowledge of anatomy and physiology, disease processes, and medical management of gender-specific pathology, as well as physical therapy interventions. Students will be educated on the musculoskeletal changes to the female body and other body systems during normal pregnancy. The topics that will be covered will include anatomy and physiology, urologic and colorectal dysfunction, pregnancy-related musculoskeletal issues, prostate disease, the female athlete, osteoporosis, and other gender-specific issues. The students will gain entry-level knowledge on how to interview and perform a basic evaluation and how to develop a plan of care related to gender-specific issues. Students will be able to implement basic treatment strategies for gender-specific issues while recognizing when it is appropriate to refer a patient to another professional for a more specialized pelvic floor examination. (2 credits)

PHTT 6725—Cardiovascular and Pulmonary PT
This course emphasizes physical therapy management (examination, evaluation, diagnosis, prognosis and plan of care, intervention, and outcomes) for patients with cardiovascular and pulmonary pathologies. Diseases within each system will be presented with specific reference to etiology, pathology, and current medical management. The course emphasizes the physical therapy examination, development of appropriate clinical decision making, and
utilization of evidenced-based interventions for people with these conditions. Concurrent didactic and laboratory sessions provide students with an opportunity to learn and practice examination, evaluation, and intervention skills when treating patients with cardiovascular and pulmonary dysfunction. (3 credits)

PHTT 6822—Health Promotion, Disease Prevention, and Wellness
This two-part course addresses two integral concepts in physical therapist practice: health promotion/disease prevention and education/instruction of patients, clients, and communities. In Unit 1, students explore health promotion, disease prevention, and wellness theories and models, including behavior-change theories and the factors that promote or impede change. Students apply the Healthy People 2030 and the APTA’s Vision 2020 initiatives to individuals and communities for primary, secondary, or tertiary prevention. In Unit 2, students explore principles of teaching and learning needed to plan and implement educational programs, in-services, or patient education, including learning theories, needs assessments, instructional strategies, and assessments of learning effectiveness. (2 credits)

PHTT 6816—Motor Control Across the Life Span
This course provides the foundational knowledge about motor control theory and practice across the life span. Principles of motor control and motor learning are discussed as they relate to normal human movement from birth through older adulthood, as well as movement dysfunction that results from neurologic pathology. Concepts of neuroplasticity and the recovery of function are also addressed. This class provides the foundations for neurologic and pediatric physical therapy practice through a review of normal human development, as well as the development and impairments of postural control, mobility, and the control of reach/grasp/manipulation. Classroom activities include lectures, case studies, lab simulations, and observation/analysis of normal childhood development postural control, mobility, and upper extremity function. 

Prerequisite: PHTT 5423 (3 credits)

PHTT 6810—Musculoskeletal I
This is the first of three courses designed to introduce the entry-level D.P.T. student to the elements of musculoskeletal orthopedic patient/client management. This course emphasizes the musculoskeletal system and follows both the sequence and nomenclature outlined in the Guide to Physical Therapist Practice including examination, evaluation, diagnosis, prognosis, intervention, and outcomes. Specific areas to be covered will include communication and history taking, systems review, symptom physiology, selection and administration of tests and measures, principles of manual therapy, soft tissue/myofascial interventions, extremity and spinal joint mobilization (non-thrust), common musculoskeletal disorders and injuries, musculoskeletal radiography/imaging, and principles of musculoskeletal disorder/injury management. Students will acquire the cognitive, psychomotor, and affective skills necessary to conduct a general musculoskeletal examination and perform interventions relevant to physical therapy practice across the life span and in various practice settings. At the completion of this course, students will have acquired the requisite knowledge to learn advanced diagnoses and interventions skills covered in PHTT 6820, PHTT 6820L, PHTT 6821, and PHTT 6821L. Case studies will be utilized with interactive teaching and learning methods to integrate didactic knowledge into real-life clinical scenarios. (2 credits)

PHTT 6810L—Musculoskeletal I Lab
Laboratory sessions will emphasize the psychomotor and affective skills required to perform the examination and interventions addressed in PHTT 6810. (2 credits)

PHTT 6820—Musculoskeletal II
This is the second of three courses designed to build upon the introduction to the elements of the musculoskeletal/orthopedic patient/client management. This course will emphasize the musculoskeletal system of the upper quarter and follows both the sequence and nomenclature outlined in the Guide to Physical Therapist Practice including examination, evaluation, diagnosis, prognosis, intervention, and outcomes. Specific areas to be covered will include upper quarter specific communication and history taking, selecting and administering tests and measures, principles of manual therapy including advanced mobilization (thrust and non-thrust), joint/region specific musculoskeletal disorders and injuries, joint/region specific radiography/imaging, and selected specific interventions. Students will acquire the skills necessary to conduct an examination of the upper quarter and perform interventions relevant to physical therapy practice required to manage and prevent disorders of the musculoskeletal system across the life span and in various practice settings. Case studies are utilized in conjunction with lecture to assist students in integrating the didactic knowledge into simulated and real-life scenarios. (3 credits)

PHTT 6820L—Musculoskeletal II Lab
Laboratory sessions will emphasize the psychomotor and affective skills required to perform the examination and interventions addressed in PHTT 6820. (2 credits)

PHTT 6835—Systems Management III: Differential Diagnosis for PT
This course reviews information related to differential diagnosis of the major body systems— including cardiovascular, pulmonary, hematological, gastrointestinal, renal and urinary, hepatic and biliary, endocrine, and
immune systems. It provides students with the opportunity to recognize and identify patients with medical conditions outside the scope of physical therapy practice. The focus is on differential diagnosis through thorough history taking and physical examination. The course will also discuss the findings of imaging tests in diseases affecting the musculoskeletal system including cancer, infection, cardiovascular disease, and inflammatory arthritis. Students are expected to apply the information learned in this course to their clinical internships and future practice. This course is taught under the assumption of direct access practice. (3 credits)

PHTT 6817—Pediatrics
This course focuses on the physical therapy management of the pediatric patient/client and role of family-centered care. In Motor Control Across the Life Span, students gained an understanding of typical infant and child development as it relates to movement. Using this foundation, students in this course will analyze movement dysfunction exhibited in high-risk infants and children who have common childhood pathologies. Atypical child motor dysfunction related to developmental delays; CNS damage; orthopedic conditions; respiratory conditions; sensory processing dysfunction; multisystem impairments; and congenital, neurological, and neuromuscular disorders content is covered to promote critical thinking and establishment of appropriate physical therapy management. Students become familiarized with commonly used pediatric screens, tests, and measurements. Guide to Physical Therapist Practice patterns (examination, evaluation, diagnosis, prognosis, and evidence-based interventions) are applied in context. Management incorporating use/need for assistive devices, technologies, adapted equipment (i.e., wheelchair prescription and seating), orthotics, and bracing, as well as use of newer interventions for the pediatric patient/client, are presented. Delegation and supervision of support personnel, legal/ethical issues related to delivery of care, documentation, interdisciplinary team management, cultural issues, reimbursement, and patient/family and teacher education are explored. Content is presented through lecture, lab, case studies, large and small group discussion, and community-based activities. Prerequisite: PHTT 6816 (3 credits)

PHTT 6821—Musculoskeletal III Lab
This is the third of three courses designed to build upon the elements of musculoskeletal/orthopedic patient/client management and will emphasize an evidence-based approach to the management of musculoskeletal disorders of the lower quarter. This course follows both the sequence and nomenclature outlined in the Guide to Physical Therapist Practice including examination, evaluation, diagnosis, prognosis, intervention, and outcomes. Specific areas to be covered will include lower quarter specific communication and history taking, selecting and administering tests and measures, principles of manual therapy including advanced mobilization (thrust and non-thrust), specific musculoskeletal disorders and injuries, specific radiography/imaging, and selected specific interventions. Students will acquire the skills necessary to conduct an examination of the lower quarter and perform interventions relevant to physical therapy practice required to manage and prevent disorders of the musculoskeletal system across the life span and the broad range of health care settings. Case studies are utilized in conjunction with lecture to assist students in integrating the didactic knowledge into simulated and real-life scenarios. (2 credits)

PHTT 6821L—Musculoskeletal III Lab
Laboratory sessions will emphasize the psychomotor and affective skills required to perform the examination and interventions addressed in PHTT 6821. (2 credits)

PHTT 6830—Neuromuscular Systems I
Neuromuscular Systems I addresses the examination and interventions for adults with neuromuscular disorders. Students will apply knowledge from Neuroanatomy and Neurophysiology and Motor Control Across the Life Span to the clinical management of patients with neuromuscular disorders. Neuromuscular Systems I provides the foundational concepts and clinical reasoning for choosing tests and outcome measures used during the PT examination of the neurological patient. These include sensory and motor tests and examination of motor function, motor learning, coordination, cranial nerve integrity, functional mobility, self-care, activities of daily living, community function, mental function, balance, gait, and disease-specific tests. The foundational concepts and clinical reasoning for procedural interventions related to neurorehabilitation will be addressed. These include indications and precautions, as well as evidence-based recommendations for therapeutic exercise; balance and gait retraining; facilitation; electric stimulation; mobility training; upper extremity reach, grasp, and manipulation training; positioning, supportive, and protective devices; wheelchairs; and community re-entry. (3 credits)

PHTT 6830L—Neuromuscular Systems I Lab
This course is the laboratory component of Neuromuscular Systems I, which addresses the psychomotor skills and clinical reasoning needed for the examination and treatment of patients with neuromuscular disorders. The students will become competent in performing and documenting a variety of clinical tests and outcome measures including patient history; sensory testing (superficial, deep, and cortical sensations); motor control; manual muscle testing; motor function and coordination testing; balance, gait, and mobility testing; mental function; environmental, home, and work/play barriers; self-care and home management (including ADLs and
IADL testing); job/school/play reintegration testing; and assistive/adaptive device testing. Students will demonstrate competence in psychomotor intervention skills such as balance and gait training, including body weight-supported treadmill training; therapeutic exercise to improve muscle performance, mobility, balance, and coordination for the neurological patient; functional training, self-care and home management in ADLs and IADLs; work/play integration positioning and facilitation; and prescription and application of assistive and supportive devices, as well as physical agents and electrotherapeutic modalities. Documentation of all aspects of care is also emphasized. (2 credits)

PHTT 6812—Topics in Clinical Education
This course is designed to prepare students for the full-time clinical internships that take place in the fall and winter semesters of their fourth year. Topics such as professional expectations related to the clinical setting, documentation, and goal setting will be covered. Students will be trained in the use of the clinical performance instrument (CPI) and educated on how to effectively use it for self-assessment and goal-writing. Federal and state practice regulations will be reviewed to ensure compliance in the clinic. Students will be introduced to the capstone project and expectations related to the clinical internship, including CPI assessments, in-service presentations, and student completion of the CSIF. The clinical education handbook will be reviewed and discussed in detail during this class. (2 credits)

PHTT 6914L—Neuromuscular Systems II Lab
This course is the laboratory component of Neuromuscular Systems II. In it, students will perform all aspects of patient/client management including examination, evaluation, diagnosis, prognosis, development of a plan of care, procedural interventions, and outcome measurement for individuals with various neurologic conditions. Students will apply these techniques to a variety of case studies, representing the scope of adult practice patterns in the Guide to Physical Therapist Practice. Neuromuscular Systems II culminates in an intense, one-week laboratory experience, the Neuro Boot Camp, in which students work with real clients who have complicated neuromuscular disorders in a faculty-supervised setting. Students are responsible for performing a thorough examination, writing a comprehensive plan of care, performing procedural interventions, providing patient instruction, and communicating with caregivers. (2 credits)

PHTT 6920—Applied Clinical Decision Making
The course focuses on developing and refining fourth-year D.P.T. students’ clinical reasoning skills by making thinking visible. We use a clinical reasoning framework that incorporates the Patient/Client Management Model, the ICF Framework, and Schön’s reflective practice elements to build students’ thinking and clinical decision-making routines. Students work under the guidance of expert clinicians skilled in empowering students to do the clinical reasoning themselves. Learning activities incorporate specific questions that target clinical reasoning strategies used for diagnosis; patient/client management; and ethical problem solving when faced with complex, ambiguous, uncertain, and unpredictable case scenarios and make clinical reasoning processes explicit to the students. Students’ clinical reasoning capabilities are developed through exercises that incorporate reflection, as well as critical, complex, and dialectical thinking skills. Online and face-to-face learning activities mimic real-life clinical scenarios where students are required to demonstrate their ability to adjust their examination and treatment techniques for medically complex patients based on changing patient responses during a treatment session and/or episode of care. (4 credits)

PHTT 6911—Clinical Internship I
The Hybrid D.P.T. program’s clinical internships occur in the fall and winter of a student’s fourth year, after completion of all didactic coursework and consists of three consecutive, full-time, supervised, clinical internships totaling 36 weeks. The goal of clinical internship placements is for student achievement of entry-level competency and professional behaviors in a variety of clinical settings. Students engage in patient/
client management, including examination, evaluation, determination of diagnosis, prognosis, and plan of care, as well as providing interventions. They practice clinical decision-making based on evidence, patient goals, and the experience of their clinical instructor(s). Students refine their knowledge, skills, attitudes, and behaviors in a variety of patient-care settings across adulthood or the life span and across the continuum of care commonly seen in physical therapy practice. They are expected to demonstrate progressive independence in managing patients of increasing complexity within each practice setting. Students are expected to demonstrate effective communication and documentation skills, professionalism consistent with the American Physical Therapy Association’s core values, and cultural competence, as well as ethical and legal practice appropriate to federal and state guidelines. (6 credits)

PHTT 6921—Clinical Internship II
The Hybrid D.P.T. program’s clinical internships occur in the fall and winter of a student’s fourth year, after completion of all didactic coursework. They consist of three consecutive, full-time, supervised, clinical internships totaling 36 weeks. The goal of a clinical internship placement is for student achievement of entry-level competency and professional behaviors in a variety of clinical settings. Students engage in patient/client management, including examination, evaluation, determination of diagnosis, prognosis, and plan of care, as well as providing interventions. They practice clinical decision-making based on evidence, patient goals, and the experience of their clinical instructor(s). Students refine their knowledge, skills, attitudes, and behaviors in a variety of patient-care settings across adulthood or the life span and across the continuum of care commonly seen in physical therapy practice. They are expected to demonstrate progressive independence in managing patients of increasing complexity within each practice setting. Students are expected to demonstrate effective communication and documentation skills, professionalism consistent with the American Physical Therapy Association’s core values, and cultural competence, as well as ethical and legal practice appropriate to federal and state guidelines. (6 credits)

PHTT 6931—Clinical Internship III
The Hybrid D.P.T. program’s clinical internships occur in the fall and winter of a student’s fourth year, after completion of all didactic coursework and consists of three consecutive, full-time, supervised, clinical internships totaling 36 weeks. The goal of clinical internship placements is for student achievement of entry-level competency and professional behaviors in a variety of clinical settings. Students engage in patient/client management, including examination, evaluation, determination of diagnosis, prognosis, and plan of care, as well as providing interventions. They practice clinical decision-making based on evidence, patient goals, and the experience of their clinical instructor(s). Students refine their knowledge, skills, attitudes, and behaviors in a variety of patient-care settings across adulthood or the life span and across the continuum of care commonly seen in physical therapy practice. They are expected to demonstrate progressive independence in managing patients of increasing complexity within each practice setting. Students are expected to demonstrate effective communication and documentation skills, professionalism consistent with the American Physical Therapy Association’s core values, and cultural competence, as well as ethical and legal practice appropriate to federal and state guidelines. (6 credits)

PHTT 6930—Wrap-up and Review
This final course in the curriculum provides students with a guided process for comprehensive review of the physical therapy curriculum, study strategies and preparation for the National Physical Therapy Examination (NPTE), summative assessment of the curriculum, preparation for employment as a physical therapist, and self-reflection on personal growth in the core values of the physical therapy profession. Activities include online review modules, self-assessment and practice examinations, a formal NPTE review course, outcomes data collection, presentation of the values portfolio, and preparation for commencement and job readiness. The class begins during clinical internships and culminates during the week prior to graduation. (1 credit)

PHTT 6904—Evidence in Practice Capstone Project
Evidence-based practice (EBP) integrates evidence from three sources to answer clinically relevant questions concerning 1) research literature; 2) clinician knowledge, experience, and judgment; and 3) patient preferences, values, and circumstances. This is the last of three courses in evidence-based practice. The focus of this course is on the integration of content from the entire curriculum and the application of evidence-based practice to a patient or clinical situation from a clinical education experience. (2 credits)
The Physical Therapy Department at Nova Southeastern University offers two postgraduate programs for practicing physical therapists: the clinical doctorate—or transition Doctor of Physical Therapy (T-D.P.T.), and the research doctorate—the Doctor of Philosophy in Physical Therapy (Ph.D.). These two distinct programs are designed to meet the diverse needs of physical therapists who are seeking to advance their education and skills from an accredited institution. Applicants with a baccalaureate or master's degree may be accepted for the T-D.P.T. program. Both programs are offered primarily in an online format to meet the needs of working professionals. There is an on-campus component for each core course taken, generally one–two days per course, per semester. Nova Southeastern University is a recognized leader of distance education and has a well-respected history of innovation and leadership in the health professions.

Transition Doctor of Physical Therapy Program (T-D.P.T.)
Given the increasingly complex health care environment and the growing body of knowledge in the physical therapy profession, entry-level education in physical therapy has shifted toward the clinical doctorate degree. The vision of the American Physical Therapy Association (APTA) is that by the year 2020, physical therapy will be provided by physical therapists who are doctors of physical therapy. In support of this vision, the Physical Therapy Department at Nova Southeastern University offers the transition Doctor of Physical Therapy (T-D.P.T.) Program. The transition D.P.T. program is a postprofessional curriculum designed to advance the knowledge, attitudes, and skills of practicing physical therapists to those commensurate with the current entry-level doctorate in physical therapy. This program focuses on the professional roles of the D.P.T., clinical reasoning and differential diagnosis, evidence-based practice, and patient/client management related to optimizing movement, function, and health. The degree awarded upon completion of the program is the Doctor of Physical Therapy degree.

Program Outcomes
The transition D.P.T. program will prepare physical therapists to

- demonstrate competent and relevant patient/client management skills across the continuum of care, including examination, evaluation, diagnosis, prognosis and plan of care, interventions, and outcome measurement
- synthesize current evidence and experience into clinical decision making, incorporating client beliefs, values, and abilities to promote effective and efficient treatment plans in a direct access, autonomous, health care environment
- engage in critical self-reflection/assessment and life-long learning to enrich core values of professionalism as defined by APTA, including altruism, accountability, compassion/caring, excellence, integrity, professional duty, and social responsibility in all professional roles
- integrate health promotion, fitness, wellness, and prevention with patients, groups, community, organizations, and society as educators, consultants, administrators, and collaborators
- conduct analysis of patient, organization, and community needs, abilities, and concerns from a systemic perspective to achieve measurable outcomes that demonstrate effective change

Admissions Requirements
The following are requirements for admission:

1. Applicants must have graduated from an entry-level physical therapy (PT) program that is accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE), or have a current physical therapy license in the United States. Graduates from physical therapy schools in other countries are also eligible after review of academic credentials by an appropriate agency and a review of their Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Pearson Test of English—Academic (PTE—A) scores.

2. Students who are within two months (60 days) of graduation from an entry-level PT program are also eligible for admission. These individuals must provide proof of graduation by the 61st day of their first T-D.P.T. semester or they will have to withdraw from classes until the subsequent semester, when and if proof of graduation is presented.

3. Applicants must have a grade point average of 75 percent or higher from the entry-level physical therapy coursework. If the GPA is lower than 75 percent, applicants must achieve a minimum score of 500 on both the verbal and quantitative portions (145 on the revised scale) of the Graduate Record Examination (GRE). The GRE is only required for students whose GPA is below 75 percent.

4. Selection of students for the transition D.P.T. program is based on a review of the application, prior academic performance, and three letters of recommendation. We
seek students who are motivated and self-directed learners, with strong oral and written communication and critical thinking skills.

5. Applicants can also apply to be nonmatriculated students in the T-D.P.T. program. Nonmatriculated students can take selected courses, but are not officially admitted to the program as degree-seeking students. To apply to be a nonmatriculated student, an applicant must submit a nonmatriculated application and provide proof that he or she has completed a physical therapy academic program. Official transcripts and records are not required for application as a nonmatriculated student, other than to show proof that the applicant is a graduate physical therapist. Students can take up to 12 credit hours as a nonmatriculated student. A nonmatriculated student that wants to matriculate into the T-D.P.T. program must submit an official matriculated student application, transcripts, and official credentialing evaluation (as appropriate) to the program office, as well as meet all entering requirements for a degree-seeking student. Once the applicant is accepted as a degree-seeking student, courses taken as a nonmatriculated student with an earned grade of 80 percent or higher will be counted toward the T-D.P.T. graduation requirements.

The dean is empowered to evaluate the total qualifications of every student and to modify requirements in unusual circumstances.

**Application Procedures**

Applicants must submit

- a completed application form along with a nonrefundable application fee of $50
- official transcripts from all undergraduate, professional, and graduate institutions attended, sent directly to Nova Southeastern University Enrollment Processing Services College of Health Care Sciences Physical Therapy Department Admissions 3301 College Avenue, P.O. Box 299000 Fort Lauderdale, Florida 33329-9905
- three letters of evaluation from individuals who can evaluate the applicant’s performance as a physical therapist and/or the applicant’s ability for doctoral studies (Letters of reference should be sent on an NSU applicant recommendation form—available on NSU’s website—or on letterhead.)
- official GRE scores and TOEFL, IELTS, or PTE scores, when appropriate

Students can transfer up to 6 semester hours (two classes) from another accredited postprofessional program based on the assessment by the Office of Admissions and the T-D.P.T. program director. The Office of Admissions evaluates all requests for transfer credits and assessment of professional credentials. After an evaluation of credentials, qualified applicants may be interviewed. Applications are accepted year-round.

**Foreign Coursework**

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc. Bowling Green Station P.O. Box 5087 New York, New York, 10274-5087 (212) 966-6311 • wes.org
- Josef Silny & Associates, Inc. 7101 SW 102nd Avenue Miami, Florida 33173 (305) 273-1616 • (305) 273-1338 fax • jsilny.com
- Educational Credential Evaluators, Inc. P.O. Box 514070 Milwaukee, Wisconsin 53203-3470 (414) 289-3400 • ece.org
- Foreign Credentialing Commission on Physical Therapy* (FCCPT) 511 Wythe Street Alexandria, VA 22314, USA (703) 684-8406 • fccpt.org
- International Consultants of Delaware, Inc. 3600 Market Street Suite 450 Philadelphia, PA 19104 (215) 222-8454, ext. 603 • icdeval.com

* This agency specializes in evaluation for U.S. PT licensure.

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Health Care Sciences, Department of Physical Therapy Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

**Transition D.P.T. Tuition and Fees**

Tuition for 2016–2017 is $515 per credit hour. An NSU student services fee—ranging from $175 to $350, dependent on number of credit hours taken—is required each semester, with a maximum fee of $1,050 due annually. Tuition is subject to change by the board of trustees without notice.

Students that have served as clinical instructors for NSU’s entry-level D.P.T. students can receive ‘vouchers’ that can be used for tuition for courses taken in the T-D.P.T. program.
T-D.P.T. students who are members of the American Physical Therapy Association (APTA) will receive a 15 percent tuition discount each term (with written proof of membership).

The first term’s tuition and fees are due at time of course registration. Tuition for each subsequent semester is due on or before the appropriate registration day.

Curriculum Overview
The transition D.P.T. program offers three semesters per year. These are winter (January–May), summer (May–July), and fall (August–December). The summer term is designated primarily for elective and selected patient/client management courses. Classes are designed using a hybrid model, meaning coursework is offered mostly online with on-campus time required each semester for every core course taken. The on-campus sessions are generally two days per course and occur midway through the semester (March, June, October). These sessions are mandatory for all students.

The curriculum is designed for working physical therapists, where students can enroll part-time (3–7 credit hours) or full time (8–12 credit hours). The required coursework and total number of hours needed to graduate vary depending on the previous educational background of each applicant. Applicants with a baccalaureate degree must complete 13 classes (45 credits), including 7 core courses and 6 elective courses. Applicants with a master’s degree from another university must complete seven core classes (27 credits). Applicants with an M.P.T. from Nova Southeastern University must complete six core courses (24 credits). Applicants with a Ph.D./Ed.D. degree must complete five core courses (20 credits). The patient/client management course requirement is waived for those holding an APTA specialty certification.

Requirements for Graduation
In order to graduate from the transition D.P.T. program, students must

- be of good moral character
- complete the required number of semester hours as outlined
- satisfactorily complete all program requirements for the degree within six years from the first date of classes
- have a minimum GPA of 80 percent for all T-D.P.T. coursework
- satisfactorily meet all financial and library obligations
- complete the T-D.P.T. exit survey

Course of Study
Applicants with a master’s degree take seven core courses (see below). Applicants with a baccalaureate degree as their highest degree take seven core courses (27 credits) and six electives (18 credits).

Seven Core Courses
- PHT 7215—Introduction to Clinical Reasoning, Differential Diagnosis, and Disablement Models (3 credits)
- PHT 7405—Professional Roles of the Doctor of Physical Therapy (4 credits)
- PHT 7415—Radiology and Pharmacology (4 credits)
- PHT 7605—Applying Research in Evidence-Based Practice (4 credits)
- PHT 7615—Advanced Differential Diagnosis (4 credits)
- PHT 7805—Contemporary Theories of Movement, Exercise, and Motor Learning (4 credits)
- One Patient/Client Management course (4 credits)

(Choice of seven practice areas: neuromuscular, manual therapy, geriatrics, pediatrics, women’s health, sports, or practice management)

Elective Courses (18 credits)
- Patient/Client Management courses may be taken as electives.
- PHT 7025—The Health Care Educator (3 credits)
- PHT 7065/7075—Independent Study: Case Report (1–3 credits)
- PHT 7975—The Physical Therapist in Home Health Care (3 credits)
- DHS 8100—Alternative and Complementary Medicine (4 credits)*
- MHS 5003—Current Trends and Cultural Issues in Health Care (3 credits)*
- MHS 5521—Ethical Issues in Health Care (3 credits)*

* These courses are offered through other programs within the College of Health Care Sciences and may be taken upon approval of the T-D.P.T. program director.

Applicants with a Master of Physical Therapy degree from NSU: six courses (24 credits)

- PHT 7405—Professional Roles of the Doctor of Physical Therapy (4 credits)
- PHT 7415—Radiology and Pharmacology (4 credits)
- PHT 7605—Applying Research in Evidence-Based Practice (4 credits)
• PHT 7615—Advanced Differential Diagnosis (4 credits)
• PHT 7805—Contemporary Theories of Movement, Exercise, and Motor Learning (4 credits)
• PHT 7815—Patient/Client Management (4 credits)
Applicants with a Doctor of Philosophy degree: five courses (20 credits)
• PHT 7605—Applying Research in Evidence-Based Practice (4 credits)

Transition D.P.T. Course Descriptions

Core Courses
PHT 7215—Introduction to Clinical Reasoning, Differential Diagnosis, and Disablement Models
Students explore the conceptual basis for effective clinical reasoning and differential diagnosis using the disablement model, clinical decision-making model, elements of patient/client management, and reflective practice theories. (3 credits)

PHT 7405—Professional Roles of the Doctor of Physical Therapy
This course explores the emerging roles of the physical therapist as a Doctor of Physical Therapy (D.P.T.). Emphasis is on the role of the D.P.T. in patient/community education; prevention and health promotion; and managing services through administration, consultation, and supervision. The class is organized into two modules: Module 1—Teaching/Learning and Health Promotion/Disease Prevention and Module 2—Managing Services Through Administration, Consultation, and Supervision. (4 credits)

PHT 7415—Radiology and Pharmacology
This course provides an overview of current radiological and pharmacological medical interventions so that physical therapists can recognize the indications and implications for medical diagnostic tests, including diagnostic imaging; augment information obtained from the physical therapy examination with information provided by the referral source; and communicate effectively with other health care providers regarding medical diagnosis and treatment. Course content is organized throughout the semester based in two subsections: diagnostic imaging and pharmacology. Students will synthesize information from these two key areas of medical management, including radiological/imaging exams and clinical pharmacology. (4 credits)

PHT 7605—Applying Research in Evidence-Based Practice
In this course, students will be exposed to Sackett’s model of evidence-based medicine in order to lay a foundation for understanding the global concept of evidence-based practice (EBP). Students will learn to use the PICO format to ask clinically relevant questions. Students will learn to locate sources of evidence, evaluate the evidence, and make recommendations based on the evidence. Students will also rate an article based on the PEDro Scale and be exposed to APTA’s PT NOW. (4 credits)

PHT 7615—Advanced Differential Diagnosis (4 credits)
• PHT 7805—Contemporary Theories of Movement, Exercise, and Motor Learning (4 credits)
• PHT 7815—Patient/Client Management (4 credits)

PHT 7415—Radiology and Pharmacology (4 credits)
• PHT 7615—Advanced Differential Diagnosis (4 credits)
• PHT 7805—Contemporary Theories of Movement, Exercise, and Motor Learning (4 credits)
• PHT 7815—Patient/Client Management (4 credits)
Patient/Client Management
Students expand their current scope of practice in one of seven practice areas or one of six manual therapy courses. This allows the practitioner to direct his or her learning to a defined practice area using the elements of patient/client management, including examination (tests and measures), evaluation, diagnosis, prognosis and plan of care, interventions, and outcome measurement. Each Patient/Client Management course provides both didactic and laboratory experiences to integrate theory with practice. There will be two or three days of intensive, hands-on training mid-way through the semester. Any student can also take additional practice areas as electives.

PHT 7825—Patient/Client Management—Neuromuscular
In this course, students will expand their current scope of practice in the neuromuscular practice area. This allows the practitioner to direct his or her learning to a defined practice area using the elements of patient/client management, including examination (tests and measures), evaluation, diagnosis, prognosis and plan of care, interventions, and outcome assessment. This Patient/Client Management course provides both didactic and clinical experiences to integrate theory with practice. There will be two days of intensive, hands-on training mid-way through the semester. (4 credits)

PHT 7835—Patient/Client Management—Women’s Health
Women consist of at least 50 percent of any given health care setting and have, at times, specific needs and consideration requiring physical therapy intervention. Drawing from the student’s present knowledge base of physical therapy diagnosis and intervention, this course will expand into women’s health topics including pregnancy, uro-gynecological and colorectal dysfunction, and the significance of estrogen across the life span. Students will closely examine the relationships of abdomino-pelvic anatomy, including the muscles of the abdominal core, and explore the impact of lifestyle/health choices on wellness of the woman for a lifetime. (4 credits)

PHT 7845—Patient/Client Management—Pediatric Practice
The focus of this course is to enhance the practicing physical therapist’s clinical decision making by application of evidence-based practice and current theories of motor development, motor control, and motor learning in the treatment of the pediatric client. Through utilization of the elements of the physical therapist patient/client management model (examination, evaluation, diagnosis, prognosis, and intervention), students will implement practical, efficient, and effective plans of care for managing children of all ages with various neurological disorders. Clinicians will use a patient-centered approach incorporating patient/family/education goals in the development of appropriate plans of care based on the ICF enablement and rehabilitation model for neurological rehabilitation. The goal of the course is to provide students with the conceptual basis, strategies, and methods likely to lead to improved pediatric patient outcomes. (4 credits)

PHT 7855—Patient/Client Management—Geriatric Practice
Through the utilization of the elements of the physical therapist patient/client management model (examination, evaluation, diagnosis, prognosis, and intervention), students will apply and advance clinical skills, strategies, and decision making for managing older adults with impairments, functional limitations, and disabilities. Students will practice identifying appropriate and relevant tests, assessments, evaluations, and interventions to be used with older adults who exhibit functional limitations; interpreting the findings of tests and measurements; augmenting findings with information from other members of the health care team; and developing comprehensive plans of care for older adults that are appropriate to the practice setting. Theories and research related to aging and geriatric physical therapy are explored in light of current health care trends and predictions. A case study format will be used to integrate comprehensive treatment planning and development of team strategies in order to address the needs of the older adult in various settings. (4 credits)

PHT 7865—Patient/Client Management—Sports Practice
Through the utilization of the elements of the physical therapist patient/client management model (examination, evaluation, diagnosis, prognosis, and intervention), students will apply and advance clinical skills, strategies, and decision making for managing athletes with impairments, functional limitations, and disabilities. Students will practice identifying appropriate and relevant tests, assessments, evaluations, and interventions to be used with athletes who exhibit functional limitations; interpreting the findings of tests and measurements; augmenting findings with information from other members of the health care team; and developing comprehensive plans of care for athletes that are appropriate to the practice setting. Theories and research related to sports medicine and orthopedic physical therapy are explored. A case study format will be used to integrate comprehensive treatment planning and development of team strategies to address the needs of athletes in various settings. (4 credits)

PHT 7875—Patient/Client Management—Practice Management
Effective practice management, generally in health care and specifically in physical therapy, requires a wide range of information and skills, the breadth and depth of which take many months, if not years, to master. It requires knowledge in critical areas—such as coding, billing, documentation requirements, statutory and regulatory
requirements, financial management, and human resource management—and the ability to utilize this knowledge on a consistent basis within the context of the daily operations of a physical therapy clinic or facility. Recognizing the amount of time available for this course and the inability to introduce and effectively instruct the student in all areas related to successful practice management, this introductory course is designed to provide students with a focused introduction to five key areas: position of profession in health care delivery system, CPT codes and RBRVS, documentation issues, regulatory compliance, and financial statement analysis. (4 credits)

Patient/Client Management—Manual Therapy Track

PHT 7435—Vertebral Column I (VC I)
This course will address orthopedic evaluation and intervention of the lumbar, thoracic, and cervical spine and address in detail the evaluation, diagnosis, prognosis, intervention, and outcome assessment of orthopedic disorders. The anatomy, physiology, biomechanics, and pathophysiology of all joints of the spine will be covered, emphasizing an evidenced-based approach to physical therapy and medical intervention of the joints of the spine. Patient examination and intervention will include manual therapy techniques, special tests, and exercises. Intervention methods will include classic manipulative therapy procedures for the spine (including traction), stability exercises, stretching/strengthening exercises, and directional preference exercises for common disorders of the vertebral column. The course will also address indications and contra-indications for manipulative therapy for neuromuscular and rheumatologic conditions. The campus session will focus on psychomotor skills, with the online portion focusing on theory. (5 credits)

PHT 7436—Vertebral Column II (VC II)
This course will address advanced manipulative therapy of the lumbar spine and sacroiliac joint. It will review the anatomy and biomechanics of the lumbar spine and address the anatomy and biomechanics of the sacroiliac (S-I) joint. Advanced examination (with a variety of special tests) and intervention techniques for the lumbar spine and sacroiliac joint will be covered. The manipulative therapy procedures provided for the lumbar spine will be more advanced in this course than those provided in VC I. The interventions for the lumbar spine will cover examination and intervention procedures requiring higher psychomotor skills than those covered in VC I. In addition, the course will cover examination and treatment of common lumbar/SI musculoskeletal disorders resistant to physical therapy intervention as well as uncommon lumbar/SI musculoskeletal syndromes that respond well to manipulative therapy. The campus session will focus on psychomotor skills, with the online portion focusing on theory. Recommended Prerequisite: PHT 7435 (4 credits)

PHT 7440—Vertebral Column III (VC III)
This course will address advanced manipulative therapy and review the anatomy and biomechanics of the cervical and thoracic spine and the rib cage. It will address advanced examination (with more variety of special tests than VC I) and intervention techniques for the cervical and thoracic spine and the rib cage. The manipulative therapy interventions will cover specific techniques for the upper cervical spine, as well as examination and intervention procedures for the cervical and thoracic spine, requiring higher psychomotor skills than those covered in VC I. In addition, the course will include examination and treatment of common cervical/thoracic musculoskeletal disorders resistant to physical therapy intervention as well as uncommon cervical/thoracic musculoskeletal syndromes that respond well to manipulative therapy. The campus session will focus on psychomotor skills, with the online portion focusing on theory. Recommended Prerequisite: PHT 7435 (4 credits)

PHT 7437—Peripheral Joints I (PJ I)
This course will address orthopedic evaluation and intervention of all peripheral joints of the body (shoulder, elbow, wrist/hand, hip, knee, and ankle/foot). This will include evaluation, diagnosis, prognosis, intervention, and outcome assessment of orthopedic disorders. The anatomy, physiology, biomechanics, and pathophysiology of all joints of the extremities will be discussed in detail. Physical therapy and medical intervention of the joints of the extremities will be addressed with focus on evidence-based practice. The course will cover a plan of care for patients with common neuromusculoskeletal disorders of upper and lower extremities. Intervention methods will cover classic manipulative therapy procedures for the peripheral joints (including distraction), stability exercises, stretching exercises, and strengthening exercises. The course will also address indications and contra-indications for manipulative therapy of neuromusculoskeletal and rheumatologic conditions. The campus session will focus on psychomotor skills, with the online portion focusing on theory. (4 credits)

PHT 7438—Peripheral Joints II (PJ II)
This course will address advanced manipulative therapy of the peripheral joints, reviewing the anatomy and biomechanics of these joints. It will include advanced examination (with more variety of special tests than PJ I) and intervention techniques for peripheral joints (including thrust techniques) that require higher psychomotor skills than those covered in PJ I. In addition, the course will cover examination and treatment of common peripheral musculoskeletal disorders resistant to physical therapy intervention as well as uncommon peripheral musculoskeletal syndromes that respond well to manipulative therapy. The campus session will focus on psychomotor skills, with the online portion focusing on theory. (3 credits)
PHT 7439—Soft Tissue Mobilization
This course will introduce and expand upon concepts and
techniques of soft tissue mobilization. It will specifically
address histology, pathohistology, neurophysiology, and
anatomy as it is applicable to the performance of manual
physical therapy in all forms. Students will be instructed
on various techniques for the extremities and the spine
and will learn to apply these techniques safely and appropriately
based on a variety of case scenarios and presentations.
Positional release techniques will be introduced as well
as the clinical application when applying soft tissue
mobilization. Examples and/or explanation of specific
exercises post-STM will be discussed, but the focus will
be maintained on the manual application. This course
will combine online instruction for didactic material
with an intensive, two-day laboratory course to emphasize
psychomotor skills. (4 credits)

PHT 7445—Manual Therapy Certification
This course is designed to prepare physical therapists for
the manual therapy certification competency exam offered
through the T-D.P.T. program at NSU. This course will
review manipulative therapy principles and application
as well as the anatomy, physiology, and biomechanics of
the spine and extremities. It will address evaluation and
management of musculoskeletal disorders and review
manual evaluation and treatment skills employed in the
management of musculoskeletal disorders. This course will
also review the theory and clinical skills from VC I, VC
II, VC III, PJ I, and PJ II. This course includes online and
on-campus components. The online portion will guide
students to review the theoretical course content addressed
on the competency exam, while the on-campus portion will
guide students in a review of psychomotor skills included
on the competency examination. The manual therapy
competency exam will take place on-campus and will
include a multiple choice and a practice examination.
After successful completion of the competency exam,
the student will receive a certification entitled Certified
Prerequisites: PHT 7435, PHT 7436, PHT 7440, PHT
7437, PHT 7438 (6 credits)

Electives

PHT 7025—The Health Care Educator
Patient education is an integral part of health care in every
setting, from patient treatment to health and wellness
promotion to injury and illness prevention. The focus of
this course is to explore the many issues that impact patient
education, from both a health care professional and a
management perspective. Adult education theory, patient/
therapist interaction, communication barriers, strategies for
success, web-based patient education, documentation, federal
laws and initiatives, and standards for patient education are
some of the topics students will examine. (3 credits)

PHT 7065/7075—Independent Study/Case Report
Students engage in individualized programs of study that
may include development of clinical programs and/or
management projects/proposals for implementation in their
clinical settings or developing and writing case reports based
on their own practices using guidelines from the American
Physical Therapy Association. The process of writing a case
report includes identification of an appropriate case, a review
of the literature, identification of valid and reliable outcome
measures, and documentation of the elements of patient/
client management: examination, evaluation, diagnosis,
prognosis and plan of care, and interventions. (1–3 credits)

PHT 7975—The Physical Therapist in
Home Health Care
This course addresses common issues affecting the physical
therapist in the evolving home care environment. The
student will develop an understanding of the various types
of home care organizations and identify optimal methods to
work effectively within each. Included in this course will
be a review of regulatory guidelines, assessment principles,
care planning, and identification and implementation of
targeted interventions to achieve successful outcomes.
Principles of interdisciplinary case management using
evidence-based standards of care will be reviewed for the
most common home care diagnoses. The common legal
and ethical principles including patient rights, abuse, and
neglect will also be addressed. (3 credits)

Additional electives are available through the D.H.Sc./
M.H.Sc. program. Prior approval must be granted by the
T-D.P.T. program director for registration in D.H.Sc./
M.H.Sc. courses.
Admissions Requirements

1. Applicants must be licensed physical therapists who are graduates of schools accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE). Graduates of physical therapy schools in other countries are also eligible with review of academic credentials by an appropriate agency and a review of TOEFL, IELTS, or PTE—A scores, when appropriate.

2. Selection of students for the physical therapy Doctor of Philosophy (Ph.D.) program is based on prior academic performance, clinical experience, and references. We seek students who have qualities such as assertiveness, initiative, leadership, self-understanding, openness, strong communication skills, and who are critical thinkers. Students must also be motivated and self-directed.

3. Applicants must hold either a bachelor's degree in physical therapy with a master's or doctoral degree, an entry-level master's degree (e.g., M.S.P.T., M.P.T.), or an entry-level doctoral degree (D.P.T.) in physical therapy.

4. Completion of the Graduate Record Examination (GRE) with writing component is required.

Computer Requirements

All students are required to have a computer that meets the specifications according to the Hardware Guidelines for Computing at NSU (https://www.nova.edu/publications/it-standards).

Application Procedures

Applicants must submit

1. a completed application form along with a nonrefundable application fee of $50
2. official transcripts from all undergraduate, professional, and graduate institutions attended, sent directly to
   Nova Southeastern University
   Enrollment Processing Services
   College of Health Care Sciences
   Physical Therapy Department Admissions
   3301 College Avenue, P.O. Box 299000
   Fort Lauderdale, Florida 33329-9905.

3. three letters of evaluation from individuals who can evaluate the applicant's performance as a physical therapist and the applicant's capability for doctoral studies (At least one reference should come from a faculty member of a physical therapy school with a terminal research doctoral degree.)

4. official GRE scores and TOEFL, IELTS, or PTE—A, scores, if appropriate
Foreign Coursework

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org
- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com
- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org
- Foreign Credentialing Commission on Physical Therapy*
  (FCCPT)
  511 Wythe Street
  Alexandria, VA 22314, USA
  (703) 684-8406 • fccpt.org
- International Consultants of Delaware, Inc.
  3600 Market Street
  Suite 450
  Philadelphia, PA 19104
  (215) 222-8454, ext. 603 • icdeval.com

* This agency specializes in evaluation for U.S. PT licensure.

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Health Care Sciences, Department of Physical Therapy Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

Doctoral Tuition and Fees

Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $625 per credit hour. An NSU student services fee of $1,050 maximum is also required annually.

The first term’s tuition and fees are due on registration day. Tuition for each subsequent semester is due on the appropriate registration day.

Requirements for Graduation

In order to be eligible for the Ph.D. degree, students shall

- be of good moral character
- complete a minimum of 60 semester hours of coursework beyond a master’s degree
- successfully pass the comprehensive examination
- satisfactorily complete the program requirements for the degree with a minimum grade of B in each course
- satisfactorily meet all financial and library obligations
- successfully complete and defend their dissertation and have it approved.

Students will have up to seven years to complete the degree requirements.

Course of Study

For students holding a master’s, entry-level master’s, or doctoral degree in physical therapy:

Students may transfer up to 6 credits from an accredited postprofessional or advanced degree program (doctoral level only). Final determination of acceptable transfer credits will be at the discretion of the program director.

Courses will be conducted in a distance-hybrid format and as independent study under faculty supervision. The distance education format enables students to continue their practice as physical therapists while earning the degree. The distance education program does require students to be in residence on campus twice per year for two days per registered course. Graduates will be awarded the Ph.D. degree upon satisfactory completion of all degree requirements.
Doctor of Philosophy in Physical Therapy Course Descriptions

Note: Listed after each entry are semester credits.

*Required core course

HPH 7200—Ethics
Health care professionals are required to act morally and ethically. This course is designed to expand the student’s basic understanding of ethics to promote ethical awareness and enable students to derive better health care decisions that reduce risk of potential ethical consequence. By exposing students to bioethics and controversial ethical issues typically encountered in current health care practice, students practice making difficult decisions. Students will synthesize and implement strategies for applying morals, values, and ethics systematically in the various settings in which health care is delivered. Considering the perspectives of all stakeholders and the role of the health care provider, patient advocate, professional, and consumer of medical care, students will gain workable knowledge of contemporary ethical issues and appreciate that ethics permeate the majority of decisions made in health care. (3 credits)*

HPH 7300—Biostatistics I
The application of quantitative techniques has expanded rapidly in medical decision making. The emphasis on evidence-based health care means that health care workers must be able to evaluate the results from published health care research studies. This course is the first of two courses designed to provide students with the knowledge of quantitative techniques. The course will cover descriptive statistics, parametric group comparison statistics, and basic nonparametric statistics, as well as provide an introduction to linear modeling. (3 credits)*

HPH 7310—Biostatistics II
The aim of this course is to enable students to appreciate the richness of statistical science and to invite them to the concepts of probabilistic thinking. Statistics is the science of the future. Any technique that they are going to learn will help them to understand the unknown better, and in turn, it will increase their success in other courses and in future professional careers. Principles of statistical inference build upon the Biostatistics I course. As such, a prerequisite for enrolling in this course is Biostatistics I. The goals of this course are threefold: (1) introduce the basic concepts of probability and methods for calculating the probability of an event, (2) assist students in developing an understanding of probability theory and sampling distributions, and (3) familiarize students about inferences involving one or two populations, ANOVA, regression analysis, and chi-square tests. (3 credits)*

HPH 7400—Research Design
This course will provide students with a basic understanding of the methods and approaches used in health-related research. A major emphasis of the course will be on the conceptualization and design of research studies. The course will cover ethics, formulation of research questions, study design, reliability, validity, sampling, measurement, and interpretation of research findings. It will prepare students to critically evaluate published literature and to design sound research studies. The course will be both theoretical and applied. Students will be challenged to apply the theoretical concepts presented in the classroom and in the readings to design a study to address a health-related issue of their choice. (3 credits)*

PHT 7010—Professional Issues in Physical Therapy and Health Care
Current issues facing the physical therapy profession. Students participate in group discussions and complete a written project on a selected topic. (3 credits)*

PHT 7020—Legal Issues in Health Care II
Students explore more global and controversial bioethical topics in the health care arena. Legal and ethical issues related to topics including animal and human research, genetic engineering, cloning, alternative medicine, life support, organ donation, and telemedicine are analyzed. Students will participate in group discussions, conduct interviews of local legal authorities, and complete written assignments on highly controversial health care practices. (3 credits)*

PHT 7030—Health Care Policy and Health Care Reform
Covers global issues of health care reform, examining the theories, methodologies of reform, the impact of each on physical therapy, and how practitioners can effect change. (4 credits)*

PHT 7111—Qualitative Research Methods
The focus of this course is to introduce students to qualitative research methods of inquiry. Phenomenological inquiry, grounded theory, ethnography, and other approaches to qualitative research will be examined. Students will gain understanding of the history of qualitative research, the philosophies that drive the various methodologies, strategies for data collection and analysis, ethical considerations, applications and implications of using qualitative research methods in physical therapy. Students will have the opportunity to experience qualitative data collection and analysis. (3 credits)
PHT 7112—Measurement Issues in Physical Therapy Research
The course is designed for the health professionals to gain an overview of measurement theory and methods. It will focus on problems and challenges of validity and reliability of measurement, and emphasize development, testing, and refinement of norms and criteria-referenced data collection instruments. It will help the student in the development of an analytical view of measurement issues. (3 credits)*

PHT 7120—Critical Inquiry
Students are required to evaluate research literature in a scientific and systematic way. Knowledge gained in this course will help in developing research proposals using different designs. This course is required for students entering with a bachelor's degree. **Prerequisites:** HPH 7300 and HPH 7310 (3 credits)

PHT 7113—Advanced Methods and Design
The focus of this course is to introduce the research design and analysis that is involved in advanced and multivariate statistical methods. Topics include multiple and logistic regression, multivariate analysis of variance, factor analysis, discriminate analysis, and time series analysis. Single subject design and research synthesis will also be introduced. Emphasis is on understanding and applying statistical concepts and techniques to research data as well as developing the ability to critically analyze research methods used in the scientific literature. (3 credits)

PHT 7130—Dissertation Research Seminar
The purpose of this course is to prepare students for writing their dissertations as the final requirement for completion of the Ph.D. Students will be guided in the development of a research question, related research design, data collection, and the appropriate statistical methods as steps toward developing an idea paper and a dissertation proposal. Attention will also be paid to how results of research might be presented and how the discussion portion of a dissertation should be approached. Various referencing methods will be discussed and the advantages and disadvantages of each presented. A variety of writing styles that are appropriate for scientific writing and various ways to improve dissertation writing will be examined. Students will be required to investigate the application of research designs to research problems in physical therapy by analyzing classmates’ research questions, proposed research designs, data collection methods, and proposed statistics. (3 credits)*

PHT 7140—The Therapist and Cultural Diversity
In this course, the impact of ethnocultural issues, policies, and procedures on the therapist will be assessed and analyzed. The complex issues of policy implementation and planning in dealing with ethnocultural issues will be explored. Continuation of PHT 6140. No prerequisite. (3 credits)

PHT 7200—Teaching and Learning in Physical Therapy
Examines the complexity of learning and behavioral change. Students explore their own learning styles as well as a variety of learning theories, including computer-based learning. (3 credits)*

PHT 7210—Patient Education
Applies teaching-learning theories to patient education issues. Students will complete a project related to teaching and learning for patient groups or for individual patient care. Offered as independent study as needed. **Prerequisite:** PHT 7200 (3 credits)

PHT 7300—Consulting Skills
The roles and skills of consultants. Students complete a paper on selected topics in consultation. (3 credits)

PHT 7310—Consulting as a Physical Therapist
Independent study course. Students apply consulting concepts to prepare a report on a hypothetical or actual consulting situation in physical therapy. (3 credits)

PHT 7400—Independent Study
Individualized study under the supervision of assigned instructor. Requires permission of program director. (1–10 credits)

PHT 7401—Independent Study
Individualized study under the supervision of assigned instructor. Requires permission of program director. (1–4 credits)

PHT 7420—Health Care Delivery Systems
Addresses issues in various health care systems where physical therapists work. Students discuss and complete a report on management of physical therapy services in selected delivery systems. (3 credits)

PHT 7430—Physical Therapy Management
Addresses management of fiscal and human resources. Students take part in discussions and complete a case study. (3 credits)
PHT 7500—Designing Educational Materials for CDs/DVDs
Students are initially exposed to concepts and principles underlying the design and development of courseware. Then students apply teaching and learning theories to the creation of courseware, on the topic of their choice, saved to a zip disk or CD. The goal of the course is for students become proficient in the analysis, design, development, implementation, and evaluation of effective courseware. (3 credits)

PHT 7510—Designing Educational Material for the Web
This course explores current concepts and principles of designing educational material for the web. Through “discovery learning,” students develop principles of multimedia design for the web, identify best and worst websites based on those principles, apply the newly acquired design principles to the development of individual home pages, and create a web-based course using WebCT. (3 credits)*

PHT 7700—Advanced Clinical Competency I
Students will enroll in an advanced clinical course of their choice. The course may be offered by the physical therapy program or in the form of a clinical certificate that is approved by the Doctoral Committee. (3 credits)

PHT 7710—Advanced Clinical Competency II
A project in the area of chosen clinical competency will be completed under the direction or agreement of the assigned mentor. (3 credits)

PHT 7720—Leadership
This online course explores leadership methods and theories in health care and physical therapy in a rapid changing environment. The student is expected to gain knowledge to be able to critically analyze leadership styles and compare and contrast leadership skills and management skills. (3 credits)

PHT 7740—Comprehensive Examination
Students in the Ph.D. program in physical therapy must take and pass the comprehensive examination (pass/fail) to be eligible to start the dissertation phase. To be eligible to take the examination, all core courses must be completed. The examination includes questions related to research, ethical and legal issues, health care policies, and professional issues. The student has six hours to complete the examination without using any resources. (0 credits)*

PHT 7800—Dissertation
Supervised, original project on a physical therapy-related topic will be completed under the supervision of the Dissertation Committee. (16 credits)*

PHT 7801—Research Seminar
This sequence of four, one credit courses is intended to prepare the student for the processes of analysis and understanding of the research literature, which is crucial to the dissertation process. These courses designed as one credit per semester are required during the first four semesters that students are taking courses in the physical therapy Ph.D. program. Other students in the program are encouraged to participate. These courses are designed to reinforce the material being presented in the research courses and to promote intellectual discussion on physical therapy science and scholarly works. Students will be required to read and discuss the research literature related to physical therapy illustrating the relationship of research design to statistical analysis and how researchers approach research questions and problems. Students must take 1 credit per semester for the first four semesters they are in the program. (1 credit)*
Physician assistants (PAs) serve as essential components of a medical system that continues to struggle to provide quality, affordable health care for all Americans. Their roles in the system will continue to grow as changes in health care indicate. Today, more than 100,000 individuals are in practice as PAs in the United States. PAs provide care that would otherwise be provided by physicians. PAs take medical histories, perform physical examinations, order and interpret tests, diagnose and treat illnesses, perform medical/surgical procedures, assist in surgery, and can write prescriptions in all states. PAs work in most medical specialties and in all types of communities. Many PAs practice family and internal medicine, and more than one-third are in towns with fewer than 50,000 residents.

The PA profession is one of the fastest growing health care professions. According to the Bureau of Labor statistics (BLS) U.S. Department of Labor, as published in the 2016–2017 Occupational Outlook Handbook, employment of PAs is expected to grow 30 percent from 2014 to 2024. It is the obligation of each physician/PA team to ensure that the PA's scope of practice is identified; that delegation of medical tasks is appropriate to the PA's level of competence; that the relationship of, and access to, the supervisory physician is defined; and that a process of performance evaluation is established. Adequate responsible supervision of the PA contributes to both high-quality patient care and professional growth.

The Department of Physician Assistant offers an innovative program that lasts 27 months. Upon successful completion of study, students will be awarded the master of medical science degree in physician assistant. The curriculum includes rigorous instruction in basic science subjects, followed by clinical medicine, physical diagnosis, clinical laboratory medicine, clinical pathophysiology, clinical procedures and surgical skills, electrocardiography, pharmacology, and others.

The clinical year is devoted to 12 months of training in nine required rotations. Students are required to complete six-week rotations in family medicine, emergency medicine, pediatrics, general surgery, and internal medicine. Students are also required to complete three-week rotations in women's health and behavioral medicine. In addition, students have three elective rotations in any area of medicine they wish to pursue. Two of the elective rotations are six weeks in length. The remaining elective rotation is four weeks in length.

Accreditation

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted Accreditation—Continued status to the Nova Southeastern University—Fort Lauderdale Physician Assistant Program sponsored by Nova Southeastern University—Fort Lauderdale. Accreditation—Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards.

Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The approximate date for the next validation review of the program by the ARC-PA will be March 2022. The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy.

Mission Statement

To provide a primary care training program designed for, and dedicated to, producing competent physician assistants who will provide quality health care in rural, urban, underserved, and culturally diverse communities; to increase the accessibility of quality health care in the primary care setting; to prepare students for lifelong learning and leadership roles; and to promote the physician assistant profession.

Admissions Requirements

Prospective students are selected on a rolling admissions basis. The Committee on Admissions (COA) considers the overall qualities of the applicant. Areas of consideration include interpersonal skills, personal motivation, knowledge and understanding of the PA profession, academic performance and level of achievement, life experiences, quality and length of prior health care experience, and recommendations/evaluations. Personal interviews are offered to the most qualified applicants to assess interpersonal and communication skills, maturity, integrity, altruistic attitude, and commitment to a PA career.

1. Applicants must have a minimum cumulative GPA of 3.0 and a minimum science GPA of 3.0 on a 4.0 grading scale at the time of application.

Successful applicants in the past have typically had both cumulative and science GPAs of 3.4 or higher, GRE
score (verbal, quantitative, and analytical) in the 40th percentile or higher in each of the three categories, and letters of recommendation from individuals with whom the applicant has had a professional working relationship in the health care field. Greater consideration will be given to applicants with prior patient-contact experience.

2. Prior to matriculation, applicants must have received a baccalaureate degree from a regionally accredited college or university. A baccalaureate degree in any field of study is acceptable as long as all prerequisites are met.

3. The college requires the students to earn a grade of C (2.0) or better in each of the following required courses:
   • college math (3 semester hours)
   • English (6 semester hours, including 3 of English composition)
   • humanities/arts (3 semester hours)
   • social sciences (9 semester hours)
   • general biology (or zoology), including laboratory (4 semester hours)
   • microbiology, including laboratory (4 semester hours)
   • general chemistry I and II, including laboratory (8 semester hours)
   • human anatomy and physiology (6 semester hours)
   • biochemistry or organic chemistry (3 semester hours)
   • genetics (3 semester hours)
   • medical terminology (1 semester hour)

Applicants are encouraged to complete their elective coursework in the areas of behavioral, physical, and social sciences or in the humanities. (Science prerequisites must be completed by end of the fall semester, prior to matriculation, and within 10 years of the application date.) Additionally, science prerequisites must be completed prior to being invited for a personal interview.

The following courses are recommended:
   • biochemistry or organic chemistry laboratory (1 semester hour)
   • Anatomy laboratory (1 semester hour)
   • Physiology laboratory (1 semester hour)
   • Introduction to Statistics (3 semester hours)

4. Graduates of foreign institutions where English is not the primary language of instruction must present transcripts showing at least 18 semester hours (or equivalent quarter hours) of study from a regionally accredited college or university in the United States. Of these 18 semester hours, 3 semester hours must be in English composition (courses do not include ESOL)
   • 3 semester hours must be in English literature (courses do not include ESOL)
   • 3 semester hours must be in public speaking (courses do not include ESOL)

The remaining 9 semester hours can be any course of the applicant’s choosing.

5. All applicants are required to submit official scores from the Graduate Record Examination (GRE) general test as part of the CASPA application. The test must have been taken within the past five years and must be taken early enough for official scores to be received in the admissions office by the supplemental application due date of January 31. Applications will not be considered complete without GRE scores. Testing information for the GRE may be obtained from gre.org or by telephone at (609) 921-9000. If multiple exams have been taken, only the most recent GRE scores will be considered.

6. Prior health care experience is highly recommended and is considered for admission. Those applicants who have prior health care experience must submit verifiable information about their experience. Those applicants with a formal certification in a health care field are considered more competitive.

**Computer Requirements**

All students are required to have a laptop computer and printer. The computer must have the following minimum specifications:
   • combo DVD and RW drive
   • sound capability and speakers
   • Internet connection with private Internet service provider (ISP) for universal access to the Internet
   • wireless capability
   • printer
   • webcam (internal or attached)

The following are recommended features:
   • Intel Core i5 or i7 processor
   • 4GB RAM (upgradeable to 6GB or more)
   • 250 GB hard disk or larger (7200 RPM)
   • Windows 7, SP1 or higher OR Mac OS X 10.6 or Mac OS X 10.7
   • Microsoft Office 2007 with PowerPoint, Word, and Excel minimum
   • surge suppressor electrical outlet
   • flash drive
Application Procedures

1. Apply to CASPA

The Physician Assistant Program participates in the Centralized Application Service for Physician Assistants (CASPA) for the receipt and processing of all applications. CASPA takes no part in the selection of students. CASPA application packets may be obtained and submitted online at caspaonline.org or by writing

CASPA
P.O. Box 9108
Watertown, MA 02471

The CASPA application deadline is December 1 in order to be considered for admission in June.

2. Send transcripts and letters of recommendation/evaluation to CASPA

All official college transcripts from all undergraduate, graduate, and professional institutions attended must be sent directly from the institutions.

Three letters of recommendation/evaluation must be sent to CASPA. One letter of recommendation/evaluation must be provided by an academic adviser, professor, coworker, supervisor, or similar individual. Two letters of recommendation/evaluation must be from health care professionals, one of which must be from a physician or PA with whom you have worked or volunteered. None of the letters should be from family, friends, or personal practitioners.

3. Report GRE scores directly to CASPA

Official Graduate Record Exam (GRE) scores must be admitted directly to CASPA as part of the CASPA application. The school code number for NSU’s PA—Fort Lauderdale program is 0947. The GRE must have been taken in the last five years and must be taken early enough for official scores to be available by the supplemental application deadline of January 15.

4. Complete Supplemental Application

Once the CASPA application has been received by Nova Southeastern University, a supplemental application will be made available online.

Your complete supplemental application must be received no later than January 15 in order to be considered for admission for the May entering class. Once we receive your GRE scores, supplemental application, and $50 fee, your file will be reviewed.

The applicant will not be considered for a possible interview until all of these requirements have been received by the EPS.

5. Competitive Interview Criteria

a. competitive cumulative and science GPA
b. competitive GRE score
c. three letters of recommendation (including one from a physician or physician assistant)
d. health care experience

Personal Interviews

Once your application is complete, the Committee on Admissions will decide whether or not your application is strong enough to warrant an invitation for a personal interview. Interviews are conducted on the Nova Southeastern University, Fort Lauderdale, Florida, campus and are by invitation only. Interviews are usually held during the months of October through February. An invitation to interview is not a guarantee of admission. Applicants will only be invited for an interview after demonstrating completion of all science prerequisites. Applicants will only be invited for an interview if all science prerequisites will be completed by December.

Current College Coursework

All prerequisite coursework must be completed by the end of May in order to be considered for the June entering class. If, at the time of application, coursework is in progress or anticipated, please identify these courses on the supplemental application. Applicants who have completed their science prerequisites will be favored for early interview invitations.

Transcripts

All applicants who are accepted must submit official transcripts from all schools attended to the NSU EPS Physician Assistant Admissions Office prior to matriculation. It is the responsibility of the applicant to ensure that arrangements are made for these transcripts to be sent.

Tuition and Fees

- Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $31,995. Tuition for 2017–2018 will be subsequently posted on our website (nova.edu/pa).
- Acceptance fee is $500. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be credited to the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is payable within two weeks of an applicant’s acceptance.
- Deposit is $500. This is due February 15, under the same terms as the acceptance fee.
- A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.
- A clinical support charge of $400 will be assessed in each of the three semesters of clinical training.
The first semester's tuition and fees, less the $1,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

Applicants should have specific plans for financing 27 months of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses. Each student is required to carry adequate health insurance. Students may avail themselves of the insurance plan obtainable through the university.

There are a limited number of part-time work-study assignments available. Due to the demands of the PA curriculum, the program discourages any outside employment.

Academic Promotions and Progression
The progress of each student through the curriculum requires continuous, satisfactory academic and professional performance. No student may advance to the clinical year of study without satisfactorily completing all of the requirements for the didactic year's courses. In addition, no student may complete the clinical year curriculum and graduate without satisfactorily completing all the requirements of the clinical year coursework.

Requirements for Graduation
In order to be eligible to graduate from the Physician Assistant Program, students shall
• successfully complete all academic and clinical courses and degree requirements
• have satisfactorily met all financial and library obligations
• attend in person the commencement program, at which time the degree is conferred

Academic Dismissal in the Physician Assistant Program
See the suspension/dismissal section of the student handbook.

Readmission Policy in the Physician Assistant Program
In selected cases, and only with the approval of the department chair and college dean, a student may be allowed to be noncompetitively matriculated with the next first-year class. It is emphasized that this only refers to those few students with special academic or personal issues.

Course of Study
The Physician Assistant Program curriculum is completed following a baccalaureate degree from a regionally accredited college or university in the United States. The comprehensive curriculum, completed in a consecutive manner, is oriented to primary care and prepares the student to practice in a wide variety of clinical settings. The first 14 months of study consist of basic sciences and clinically related didactic courses. All courses are required and must be successfully completed before advancing to the clinical year. During this time frame, students are generally in class from Monday through Friday, 8:00 a.m. to 5:00 p.m., although there are occasional evening and/or weekend hours. Because of its highly integrated and compact curriculum, the PA department requires matriculants to complete the entire curriculum at this campus. No advanced placement, transfer of credit, or credit for experiential learning will be granted.

The clinical year is devoted to 12 months of training in nine required rotations. Students are required to complete six-week rotations in family medicine, emergency medicine, pediatrics, general surgery, and internal medicine. Students are also required to complete three-week rotations in women's health and behavioral medicine. In addition, students have three elective rotations in any area of medicine they wish to pursue. Two of the elective rotations are six weeks in length. The remaining elective rotation is four weeks in length.

Each required rotation has assigned readings and learning objectives. At the end of each required rotation, a written comprehensive subject examination is administered and must be passed. During rotations, students will be supervised by licensed practitioners and will actively participate in patient assessments, perform common laboratory procedures, interpret common diagnostic examinations, and help manage common medical problems. The work hours during clinical rotations are set by the preceptor and can include evening and weekend hours. Students are required to work approximately 40 hours per week, however many rotation sites require students to work substantially more hours per week.

Upon completion of the course of study, students will be awarded the master of medical science degree in physician assistant. Graduates will be eligible to take the Physician Assistant National Certification Examination (PANCE) administered by the National Commission on Certification of Physician Assistants.

The role of the physician assistant requires a high level of expertise and responsibility. The applicant must possess the ability and desire to complete a rigorous academic and clinical program and make a commitment to continued learning.
## Curriculum Outline for the Master of Medical Science (M.M.S.) in Physician Assistant Program—Fort Lauderdale

Start Date: June  
Length: 27 months  
Degree: Master of Medical Science (M.M.S.) in Physician Assistant  
Didactic: 14 months  
Clinical: 13 months

### First Semester—Summer I (June–August)

Curriculum is subject to change as directed by the department.
Physician Assistant—Fort Lauderdale Course Descriptions

Note: Listed at the end of each entry are lecture clock hours, laboratory clock hours, and semester hours.

*Core competency course (Failure of a core competency course will result in automatic dismissal from the program. Students must successfully complete core competency courses prior to moving on to the next semester.)

ANA 5420—Anatomy
The study of structural and functional features of the human body addressed in both lecture and cadaver format. The student will have an anatomical basis for understanding and applying information presented in the basic science and clinical courses and for understanding clinical problems. Students will also learn integrated topographic and radiographic anatomy to stress the application and importance of clinical anatomy. (54-28-5)

MIC 5400—Microbiology
This course explores the relationship of microbes to human disease and the host-immune response. Characteristics and properties of clinically significant bacteria, viruses, fungi, and selected parasites as well as the prevention, control, and diagnostic laboratory tests of their associated specific infectious diseases. (52-0-3)

PAC 5000—Physical Diagnosis I*
The Physical Diagnosis I course is an introduction to clinical medicine. Students will acquire the knowledge and skills essential to obtain a comprehensive medical history and perform a complete, head-to-toe physical examination. Emphasis is placed on normal physical findings. The course emphasizes patient interviewing, acquiring a medical data base, and performing a comprehensive physical examination. A combination of lectures, discussions, case studies, and performance skills labs will be used to present and practice the necessary concepts and skills. Lab sessions are used to optimize teaching of concepts. The student will be required to demonstrate Competency-Based Learning during the performance of the required procedures and skills. 

Pac 5001—Introduction to the Physician Assistant Profession
This course will be taught in a hybrid format. Hybrid learning has been defined as the thoughtful fusion of face-to-face and online learning experiences. This course will provide a historical perspective of the PA profession, as well as content related to current trends and the political and legal issues affecting PA practice, both within the state and on a national level. This course will also discuss the physician-PA team relationship and the team approach in medicine. During this course, we will explore and participate in PA professional organizations and the roles these organizations play in the profession. (20-0-1)

PAC 5002—Medical Terminology
Use of medical language for appropriate and accurate communication in patient care. Students acquire a medical vocabulary, knowledge of medical terminology, and terminology reference material. (14-0-1)

PAC 5010—Clinical Applications*
This course serves as a cumulative evaluation of the student’s knowledge after completion of the initial 12 months of the didactic curriculum. Student competency will be evaluated by a comprehensive written examination and an OSCE practical examination. The course also reinforces concepts related to critical thinking and application of medical knowledge to clinical scenarios through the utilization of case studies and simulation exercises. (12-5-1)

PAC 5100—Physical Diagnosis II*
This course will build upon the skills learned in Physical Diagnosis I and will cover the essential skills for performing both complete and focused medical interviews and physical examinations. A combination of lectures, discussions, case studies, and performance skills labs will be used to present and practice the necessary concepts and skills. Lab sessions are used to optimize teaching of concepts. The student will be required to demonstrate competency-based learning during the performance of the required procedures and skills. Using the skills developed in Physical Diagnosis I, students learn to accurately integrate and record historical and physical findings in the correct written format. This course introduces the student to the concept of medical problem solving. Emphasis is on the correlation of historical information and physical findings to the process of formulating a differential diagnosis and treatment plan. Through case presentations and medical simulations, students will use knowledge acquired from previous and concurrent didactic courses to develop their problem-solving skills. Prerequisite for PAC 5200 (30-36-3)

PAC 5110—Clinical Medicine and Surgery I
Lectures, group discussions, case studies, evidence-based medicine, problem-based learning, online coursework, clinical simulation, web-based education, independent study, EKG, and diagnostic or radiological images interpretation are included in presentations. Medical and surgical entities of ophthalmology, dermatology, hematology, cardiovascular, and pulmonary disease, as well as disorders of the ears, nose, throat, and neck will be presented. Emphasis will be placed on symptoms and signs, diagnostic evaluation, and therapy. The focus will be on common diseases of medical and surgical nature that may be encountered in clinical practice. (120-0-8)
PAC 5129—Health Promotion and Disease Prevention
The course will focus on wellness through preventive interventions and services. This course emphasizes the responsibility for one's own health, the community's efforts to protect against disease, and environmental hazards. Epidemiology, risk factors, screening tests, and community resources are identified with each health issue presented. The course will also discuss the structures and administrative principles in health care organizations, the role of the practicing PA in unique environments including rural and underserved medicine, cultural issues in health care, reimbursement for services rendered, quality assurance, federal health care programs, and other issues involving patient care. (22-0-2)

PAC 5130—Clinical Laboratory Medicine I
Students will learn how to appropriately order and accurately interpret laboratory tests. These skills will help them diagnose common diseases related to major organ systems. (20-0-1)

PAC 5131—Clinical Laboratory Medicine II
Continuation of Clinical Laboratory Medicine I. Students will learn how to appropriately order and accurately interpret laboratory tests. These skills will help them diagnose common diseases related to major organ systems. (36-0-2)

PAC 5200—Physical Diagnosis III*
A combined lecture and laboratory format will be used to present the concepts and skills required to elicit a medical history and perform a physical examination for specific patient complaints. Small group and laboratory presentations will be used to refine the medical history concepts and physical examination skills acquired in Physical Diagnosis I and II. Instructional methods, including supervised clinical experience and patient simulations, will facilitate the students' integration of clinical information in order to diagnose disease and record historical and physical findings in written format. The course will expand on the skills essential for performing a thorough medical interview and physical examination and will enhance medical documentation skills. This course also continues to develop medical problem-solving skills. The student will be taught the concepts and skills necessary to develop a differential diagnosis and management plan for medical problems encountered in the primary care setting. Emphasis is on correlation of historical information, physical findings, and pertinent laboratory results to formulate a diagnosis. Through case presentations and medical simulations, the student will also utilize knowledge acquired from previous and concurrent didactic courses to develop these skills. (32-38-3)

PAC 5210—Clinical Medicine and Surgery II
This course covers common disease entities of major organ systems and primary care aspects of disease evaluation and treatments. Medical and surgical entities of gastroenterology, orthopedics, rheumatology, neurology, the reproductive system, endocrinology, and geriatrics will be presented. The focus will be on common diseases of medical and surgical nature that may be encountered in clinical practice. (120-0-8)

PAC 5219—Health Promotion and Disease Prevention
This course will focus on wellness through preventative interventions and services. Students will learn methods of promoting health and wellness initiatives in multiple settings including health care organizations and team-based practices. The course focuses on the importance of taking responsibility for one's own health, the community's efforts to protect against disease, and environmental hazards, as well as barriers to health promotion. Emphasis is placed on public health initiatives and resources available within the community. (45-0-3)

PAC 5229—Electrocardiography
Provides the foundation for learning to interpret 12-lead ECG tracings and applying those principles to evaluate the ECG tracings of common cardiac diseases, including the recognition of more subtle ECG abnormalities (30-2-2)

PAC 5310—Clinical Medicine and Surgery III
Clinical Medicine and Surgery III will be presented with pediatrics, nephrology/urology, emergency medicine, and surgery. Emphasis will be placed on symptoms and signs, diagnostic evaluation, and therapy. The focus will be on common diseases of medical and surgical nature that may be encountered in clinical practice. (112-0-7)

PAC 5311—Clinical Behavioral Medicine
Common psychosocial problems and disorders encountered by health care professionals. The course emphasizes the diagnosis and understanding of development of these behaviors, including the patient-clinician relationship, varieties of psychotherapy, communication skills, and appropriate interventions and treatment regimens, including relevant medications. (45-0-3)

PAC 5400—Clinical Pathophysiology
This course introduces the student to pathophysiologic concepts that form the biologic basis of disease. It builds on the knowledge gained in Human Anatomy and Physiology courses. However, physiologic concepts will be reviewed and emphasized in order for the student to fully appreciate the progression from the normal physiologic state to the diseased state with its resultant clinical signs and symptoms. The course begins with discussions of general biologic and pathologic processes such as immunity, inflammation, wound healing, pain, and neoplasia. The remainder of the course addresses disease-producing perturbations in the physiology, regulatory mechanisms, and anatomy within organ systems. (30-0-2)
PAC 5404—Legal and Ethical Issues in Health Care
This course is designed to introduce the students to the more important influences of the law and ethics on health care and the practice of medicine. (34-0-2)

PAC 5407—Clinical Pharmacology
At the completion of this course, students will be able to appropriately prescribe medications in various clinical settings. Preparation for appropriate prescribing and administration of medicines is accomplished by studying drug classifications, pharmacodynamic actions, and the rationale for therapeutic use of prescription and nonprescription medications. In addition, students will be able to describe the potential advantages and disadvantages of specific therapeutic regimens, universal indications and contraindications for usage, dosing schedules, and the relative cost of commonly prescribed medications. Common errors involving prescription writing will be discussed and practical exercises will require students to accurately write prescriptions and treatment orders. This course will enhance the fund of knowledge acquired in Pharmacology and Clinical Medicine and Surgery courses upon which to build during clinical rotations. It will also provide a general understanding of the clinical aspects of the pharmacological treatment of common illnesses and disease processes. (36-6-3)

PAC 5408—Clinical Genetics
This course prepares physician assistant students for medical practice in the age of genomics. Areas of focus include dysmorphology; family history with pedigree risk analysis; chromosomal abnormalities, single gene disorders, and familial cancer syndromes; genetic testing and screening; pharmacogenomics; gene therapy; and the genetic ethical, legal, and social issues (ELSI) impact on primary care. Students will hear from medical geneticists and genetic counselors about their role in patient care. Patients will present their diagnostic odyssey, so students will appreciate the importance of genetics and lifelong learning in primary care. (36-0-2)

PAC 5410—Complementary Medicine and Nutrition
Survey of human nutrition in health care, and the principles for maintaining good health through nutrition. Addresses health hazards associated with dietary deficiencies, obesity, fad dieting, food contamination, diet management of selected diseases, and functional roles of vitamins and minerals. Additionally, this course will address introductory concepts, procedures, education, potential integration, and licensing in alternative and complementary medicine. (30-0-2)

PAC 5412—Interpretation and Evaluation of Medical Literature
This course is designed to introduce the student to the process of interpretation and evaluation of the medical literature. The components of published medical papers and physician assistant-authored research papers are evaluated in this course. The course will be hybrid in that students will have online access via Blackboard and have face-to-face interactions. (30-0-2)

PAC 5460—Life Support Procedures and Skills
Introduction to the principles of advanced life support used in medical and surgical emergencies. Includes a review of the most common emergency situations encountered and provides hands-on practical training that will assist the student in developing the skills required to stabilize patients with life-threatening conditions. Includes certification in basic (BLS) and Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS). (24-40-3)

PAC 5510—Clinical Procedures and Surgical Skills
A combined lecture, discussion, case study, human patient simulation (HPS), and laboratory format will be used to present the concepts and skills required in performing common clinical procedures and surgical skills. The student will be required to demonstrate competency-based education in the performance of the procedures and skills required. The course is designed to prepare the student for the clinical procedures and surgical skills that will be performed on clinical rotations during the second year and real-world patient encounters. The course also will serve as the summative examination of competency-based skills. (58-28-5)

PAC 6301—Behavioral Medicine
This is a required, three-week rotation for Mental and Behavioral Health. This rotation takes place in outpatient and/or inpatient settings. The purpose of this rotation is to educate the physician assistant student in the diagnosis, management, and treatment of acute and chronic behavioral health problems seen in the behavioral health practice. (3-135-3)

PAC 6302—Women’s Health
This is a required, three-week rotation in obstetrics and gynecology. This rotation takes place in outpatient and/or inpatient settings. The purpose of this rotation is to educate the physician assistant student in the diagnosis, management, and treatment of acute and chronic problems related to women’s health, as well as pregnancy and the puerperium. (3-135-3)

PAC 6308—Clinical Elective III
This is a required four-week rotation for Elective III. This rotation takes place in outpatient and/or inpatient settings. The purpose of this rotation is to educate the physician assistant student in the diagnosis, management, and treatment of acute and chronic medical problems seen in the specialty practice. Elective rotations are provided to allow students to gain knowledge and skill in an area
of medicine that they have not experienced or to have additional exposure in an area of interest. (270-0-6)

PAC 6311—Surgery
This required, six-week rotation is conducted in both the clinical and hospital settings. The purpose of this rotation is to educate the physician assistant student in the diagnosis, treatment, and management of both the inpatient and outpatient surgical patient. Emphasis is placed on surgical disorders commonly encountered in various settings by the physician assistant. (270-0-6)

PAC 6313—Surgery
Required six-week rotation in outpatient and inpatient settings. Students learn to diagnose, treat, and manage the surgical patient. Emphasizes surgical entities commonly encountered in the primary care setting. (300-0-6)

PAC 6315—Emergency Medicine
This is a required, six-week rotation that takes place in the emergency department environment. The purpose of this rotation is to educate the physician assistant student in the diagnosis, management, and treatment of emergent, urgent, and nonurgent medical problems commonly encountered in the emergency department setting. (270-0-6)

PAC 6317—Pediatrics
This is a required, six-week rotation that takes place in outpatient and/or inpatient settings. The purpose of this rotation is to educate the physician assistant student in the diagnosis, management, and treatment of acute and chronic medical problems seen in pediatric practice. Emphasis is placed on growth and development from the infant to the adolescent. (270-0-6)

PAC 6318—Family Medicine
This is a required, six-week rotation that takes place primarily in the outpatient setting. The purpose of this rotation is to educate the physician assistant student in the diagnosis, management, and treatment of primary care patients. Emphasis is placed on the primary care needs of patients in rural and inner city communities. (270-0-6)

PAC 6401—Clinical Elective I
This is a required, six-week rotation for Elective I. This rotation takes place in outpatient and/or inpatient settings. The purpose of this rotation is to educate the physician assistant student in the diagnosis, management, and treatment of acute and chronic medical problems seen in the specialty practice. Elective rotations are provided to allow students to gain knowledge and skill in an area of medicine that they have not experienced or to have additional exposure in an area of interest. (270-0-6)

PAC 6402—Clinical Elective II
This is a required, six-week rotation for Elective II. This rotation takes place in outpatient and/or inpatient settings. The purpose of this rotation is to educate the physician assistant student in the diagnosis, management, and treatment of acute and chronic medical problems seen in the specialty practice. Elective rotations are provided to allow students to gain knowledge and skill in an area of medicine that they have not experienced or to have additional exposure in an area of interest. (270-0-6)

PAC 6500—Graduate Project
The Graduate Project is the capstone educational event for the program curriculum. It allows the student to demonstrate his or her ability to research and compile information and to present that information in two formats while working with his or her advising group: 1) presentation to peers of an evidence-based analysis of available research on a clinical question and 2) a written clinical review article suitable for publication in a peer-reviewed journal. (0-0-3)

PCO 5300—Biomedical Principles
Physiologic and biochemical basis for drug action. Basic biochemical pathways in which drugs intervene: metabolism, protein synthesis, and coagulation. Principles of pharmacokinetics: drug absorption, distribution, and metabolism are studied and applied to designing dosage regimens. (18-0-1)

PCO 5400—Pharmacology I
This course will provide the student a thorough understanding of the classes of drugs commonly used in clinical practice. The course includes an in-depth study of drugs that affect the autonomic nervous, renal, cardiovascular, and endocrine systems. Emphasis will be on the mechanism of action, clinical indications, side effects, contraindications, important drug interactions, and the basic pharmacokinetics of each drug class. (38-0-2)

PCO 5410—Pharmacology II
This course will provide the students with a thorough understanding of the classes of drugs commonly used in medical practice. The course includes an in-depth study of antimicrobial drugs, chemotherapeutic drugs, respiratory and gastrointestinal drugs, vitamins, and drugs affecting the central nervous system and inflammation. Emphasis will be on the mechanism of action, clinical indications, side effects, important drug interactions, and the basic pharmacokinetics of each drug class. (72-0-4)

PHS 5400—Physiology
The course provides an overview of physiological processes of critical importance to students in the College of Health Care Sciences. Topics covered include basic examinations of cellular processes, membrane mechanisms, muscle physiology, the cardiovascular system, the nervous system, renal physiology, the respiratory system, endocrinology, reproductive physiology, and gastrointestinal physiology. (54-0-3)
Physician assistants (PAs) serve as essential components of a medical system that continues to struggle to provide quality, affordable health care for all Americans. Their roles in the system will continue to grow as changes in health care indicate. Today, there are more than 100,000 nationally certified physician assistants in the United States. PAs provide care that would otherwise be provided by physicians. PAs take medical histories, perform physical examinations, order and interpret tests, diagnose and treat illnesses, perform medical/surgical procedures, assist in surgery, and can write prescriptions in all states. PAs work in most medical specialties and in all types of communities. Many practice family and internal medicine, and more than one-third are in towns with fewer than 50,000 residents. Forbes.com ranked physician assistant studies as the number one best master's degree for jobs in 2012. According to the Bureau of Labor statistics (BLS) U.S. Department of Labor, as published in the 2016–2017 Occupational Outlook Handbook, employment of PAs is expected to grow 30 percent from 2014 to 2024.

It is the obligation of each physician/PA team to ensure that the PA's scope of practice is identified; that delegation of medical tasks is appropriate to the PA's level of competence; that the relationship with, and access to, the supervisory physician is defined; and that a process of performance evaluation is established. Adequate responsible supervision of the PA contributes to both high-quality patient care and professional growth.

The Department of Physician Assistant—Fort Myers offers an innovative program that lasts 27 months. Upon successful completion of study, students will earn a master of medical science (M.M.S.) in physician assistant degree. The curriculum includes rigorous instruction in the basic sciences, clinical medicine, physical diagnosis, clinical laboratory medicine, clinical pathophysiology, clinical procedures and surgical skills, electrocardiography, radiology, clinical behavioral medicine, legal and ethical issues in health care, cultural issues in health care, interpretation and evaluation of medical literature, complementary medicine and nutrition, and clinical pharmacology.

During the clinical year of study, the student participates in clinical rotations throughout the state of Florida, primarily within 80–100 miles from NSU's Fort Myers Campus. These rotations include family medicine, internal medicine, pediatrics, gynecology and prenatal care, emergency medicine, and surgery, all complemented by two elective rotations and a selective rotation in one of the following areas: behavioral health, otorhinolaryngology, orthopedics, rural or underserved primary care medicine, or an internal medicine subspecialty. Each student should expect to complete one or more rotations in a rural or underserved area. This will likely entail traveling beyond the 80–100 mile radius of Fort Myers. For core rotations assigned by the program outside of the 100-mile radius, housing will be provided for the student. With a sound foundation in medical training, NSU graduates are prepared to work in many clinical areas, both in primary care and specialty medicine.

Accreditation
The NSU Physician Assistant Program—Fort Myers is accredited by the Accreditation Review Commission on Education for Physician Assistants, Inc., (ARC-PA). The NSU PA Program—Fort Myers was initially awarded provisional accreditation in 2005. The ARC-PA has granted Continued Accreditation to the Physician Assistant Program—Fort Myers, sponsored by Nova Southeastern University. Continued accreditation is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards. Continued Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The approximate date for the next validation review of the program, formerly the comprehensive review, by the ARC-PA will be March 2018. The department is a member of the Physician Assistant Education Association (PAEA).

Mission Statement
In keeping with the ideology of both Nova Southeastern University and the College of Health Care Sciences mission statements, the NSU Physician Assistant Program—Fort Myers endeavors to

- provide an educational experience that emphasizes primary medical care, and enables graduates to demonstrate competency and skill in a variety of clinical environments
- provide health care experiences in medically underserved communities
- prepare students for lifelong learning
- prepare students for leadership roles
- promote the physician assistant profession

Admissions Requirements
Prospective students are selected by the committee on admissions (COA), which considers the overall qualities of the applicant. Areas of consideration include interpersonal skills, personal motivation, knowledge and understanding of the PA profession, academic performance and level of achievement, life experiences, quality and length of prior health care experience, and recommendations/evaluations.
Personal interviews are offered to the most qualified applicants to assess interpersonal and communication skills, maturity, altruistic attitude, and commitment to a PA career.

Prior to matriculation, applicants must have completed a baccalaureate degree from a regionally accredited college or university.

The program requires the students to earn a grade of C (2.0) or better in each of the upper division courses. Applicants must have a minimum cumulative GPA of 3.0 and a minimum science GPA of 3.0 on a 4.0 grading scale. Successful applicants in the past have typically had cumulative grade point averages in the range of 3.0 to 3.3 and higher.

2. The college requires the students to earn a grade of C (2.0) or better in each of the following required courses:
- college math (3 semester hours)
- English (6 semester hours, including 3 of English composition)
- humanities/arts (3 semester hours)
- social sciences (9 semester hours)
- general biology (or zoology), including laboratory (4 semester hours)
- microbiology, including laboratory (4 semester hours)
- general inorganic chemistry I and II, including laboratory (8 semester hours)
- human anatomy and physiology (6 semester hours)
- biochemistry or organic chemistry (3 semester hours)
- medical terminology (1 semester hour)
- human genetics (3 semester hours)
- electives (43 semester hours) Applicants are encouraged to complete their elective coursework in the areas of behavioral, physical and social sciences, or the humanities.

Applicants are encouraged to complete their elective coursework in the areas of behavioral, physical, and social sciences or humanities. Upon review of a student’s record, the Committee on Admissions may require additional coursework and testing as a condition of acceptance.

The following courses are recommended:
- biochemistry or organic chemistry laboratory (1 semester hour)
- anatomy laboratory (1 semester hour)
- physiology laboratory (1 semester hour)
- Introduction to Statistics (3 semester hours)

Upon review of a student’s record, the Committee on Admissions may require additional coursework and testing as a condition of acceptance.

3. Graduates of foreign institutions or of institutions where English is not the primary language of instruction must present transcripts showing at least 18 semester hours (or equivalent quarter hours) of study from a regionally accredited college or university in the United States. Of these 18 semester hours,
- 3 semester hours must be in English composition (courses do not include ESOL)
- 3 semester hours must be in English literature (courses do not include ESOL)
- 3 semester hours must be in public speaking (courses do not include ESOL)

The remaining 9 semester hours can be any courses of the applicant’s choosing.

Prior health care experience is highly recommended and is considered for admission. Those applicants who have prior health care experience must submit verifiable information about their experience. Greater consideration will be given to applicants who have prior patient-contact experience.

All applicants are required to submit official scores from the Graduate Record Examination (GRE) general test to CASPA as part of the CASPA application. Our student code is 0951. The test must have been taken within the past five years and must be taken early enough for official scores to be received in the admissions office by the supplemental application due date of January 15. Applications will not be considered complete without GRE scores. Successful applicants in the past have typically had GRE scores (verbal, quantitative, and analytical writing) in the 40th percentile or higher in each of the three categories. Testing information for the GRE may be obtained from gre.org or by telephone at (609) 921-9000.

Computer Requirements

All students are required to have a laptop computer or tablet device with wireless Internet capability, a printer, and a webcam. Students must have access to Microsoft Office or its equivalent. Please see the Hardware Guidelines for Computing at NSU, available at https://www.nova.edu/publications/it-standards/#1, for more detail regarding minimum specifications.

The clinical year will require the student to track clinical experiences via a web-based program. Students may elect to keep handwritten copies of clinical experiences to input into their laptop or tablet device at a later date or may elect to use their laptop, tablet device, a Windows-compatible PDA, or a mobile phone with Internet connectivity to help aid in the clinical year tracking.
Application Procedures

1. Apply to CASPA
The Physician Assistant Program participates in the Centralized Application Service for Physician Assistants (CASPA) for the receipt and processing of all applications. CASPA takes no part in the selection of students. CASPA application packets may be obtained and submitted online at caspaonline.org or by writing

CASPA
P.O. Box 9108
Watertown, MA 02471

Questions regarding completion of the online application may be directed to CASPA’s email address, caspamfo@caspaonline.org, or by telephone at (617) 612-2080 or (617) 926-3571.

The CASPA application may be submitted as early as April 15, the year prior to the admission cycle. The CASPA application deadline is December 1 to be considered for admission in May/June of the following year.

2. Send transcripts and letters of recommendation/evaluation to CASPA
All official college transcripts from all undergraduate, graduate, and professional institutions attended must be sent directly from the institutions to CASPA.

Three letters of recommendation/evaluation must be sent to CASPA. The first letter must be from a physician or physician assistant. The second letter must be from a health care professional involved with direct patient care. The third may be from an individual such as an academic adviser, professor, coworker, or supervisor. None of the three letters may be from relatives or friends. Applications submitted without these letters will not be given consideration.

3. Report GRE scores directly to CASPA
Official Graduate Record Exam (GRE) scores must be admitted directly to CASPA as part of the CASPA application. The school code number for NSU’s PA—Fort Myers program is 0951. The GRE must have been taken in the last five years and must be taken early enough for official scores to be available by the supplemental application deadline of January 15.

4. Complete Supplemental Application
Once the CASPA application has been received by Nova Southeastern University, a supplemental application will be made available to the applicant online.

Your completed supplemental application must be received no later than January 15 in order to be considered for admission for the May/June entering class. Once we receive your GRE scores; copies of all professional certifications, registrations, licenses, or relevant credentialing materials; supplemental application; and $50 fee, your file will be reviewed. Completed applications are reviewed on a “rolling” or periodic basis.

The applicant will not be considered for a possible interview until the application from CASPA, the supplemental application (signed and dated), the nonrefundable, $50 supplemental application fee, and the Graduate Record Evaluation (GRE) test scores are received by the Nova Southeastern University Physician Assistant Office of Admissions.

Personal Interviews
Once your application is complete, the Committee on Admissions (COA) will decide whether or not your application is strong enough to warrant an invitation for a personal interview. Interviews are conducted on the Nova Southeastern University campus in Fort Myers, Florida, and are by invitation only. Interviews will be held from September through February. An invitation to interview is not a guarantee of admission. Notice of acceptance or action by the COA will be on a “rolling” or periodic schedule; therefore, early completion of the application is in the best interest of the candidate.

Current College Coursework
All prerequisite coursework must be completed by the end of May in order to be considered for the June entering class. If, at the time of application, some coursework is in progress or anticipated, please identify the courses on the supplemental application.

Transcripts
All applicants who are accepted must submit official transcripts of all coursework to the NSU EPS Physician Assistant admissions office prior to matriculation. It is the responsibility of the applicant to ensure that arrangements are made for these transcripts to be sent.

Tuition and Fees
- Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $31,995.
- Acceptance fee is $500. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is payable within two weeks of an applicant’s acceptance.
- Deposit is $250. This is due February 15, under the same terms as the acceptance fee.
- Preregistration fee is $250. This is due April 15, under the same terms as the acceptance fee.
- A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.
The Physician Assistant Program curriculum is completed in 27 months of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses. Each student is required to carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

Opportunity for a limited number of part-time work-study assignments is available. Due to the demands of the PA curriculum, the program discourages any outside employment.

**Requirements for Graduation**

In order to be eligible to graduate from the Physician Assistant Program, students must:

- successfully complete the program of study required for the degree with a minimum cumulative GPA of 2.0 (C)
- successfully complete all didactic and clinical coursework
- demonstrate professional behavior throughout the program
- satisfactorily meet all financial and library obligations
- attend, in person, the commencement program, at which time the degree is conferred

**Academic Dismissal in the Physician Assistant Program**

See the suspension/dismissal section of the student handbook.

**Readmission Policy in the Physician Assistant Program**

In selected cases, and only with the approval of the department chair and college dean, a student may be allowed to be noncompetitively matriculated with the next first-year class. It is emphasized that this only refers to those few students with special academic or personal issues.

**Course of Study**

The Physician Assistant Program curriculum is completed following attainment of a baccalaureate degree, including specified course prerequisites. The comprehensive curriculum, completed in a consecutive manner, is oriented to primary care and prepares the student to practice in a wide variety of clinical settings. The first 14.5 months of study consist of basic sciences and clinically related didactic courses. All courses are required and must be successfully completed before advancing to the clinical year. During this time frame, students are generally in class from Monday through Friday, 8:00 a.m. to 5:00 p.m., although there are occasional evening and/or weekend hours. Because of its highly integrated and compact curriculum, the PA program requires matriculants to complete the entire curriculum at the NSU Fort Myers Campus and will not grant requests for advanced placement, transfer of credit, or credit for experiential learning.

The clinical year is devoted to 12.5 months of training with required six-week rotations in family medicine, emergency medicine, pediatrics, prenatal care/gynecology, general surgery, and internal medicine; one six-week selective rotation of behavioral health, otorhinolaryngology, orthopedics, rural or underserved primary care medicine, or an internal medicine subspecialty; and one six-week and one four-week elective rotation that may include other selectives or specialties. All required rotations must be completed in Florida, primarily within 80–100 miles from NSU’s Fort Myers Campus. Each student will complete at least one rotation in a rural or underserved area. This will likely entail traveling beyond the 80–100-mile radius of Fort Myers, Florida. For core rotations assigned by the program outside of the 100-mile radius, student housing will be provided.

Each required rotation has assigned readings and learning objectives. At the end of each rotation, a written comprehensive examination is administered and must be passed. During rotations, students will be supervised by licensed practitioners and will actively participate in patient assessments, perform common laboratory procedures, interpret common diagnostic examinations, and help manage common medical problems. The work hours during clinical rotations are set by the preceptor and can include evening and weekend hours. Students are required to work a minimum of 40 hours per week, although many rotation sites require a greater student participation.

Upon completion of the course of study, students will have earned a master of medical science (M.M.S.) in physician assistant degree. Graduates will be eligible to take the Physician Assistant National Certification Examination (PANCE) administered by the National Commission on Certification of Physician Assistants (NCCPA).

The role of the physician assistant requires a high level of expertise and responsibility. The applicant must possess the ability and desire to complete a rigorous academic and clinical program and make a commitment to continued learning.
**Curriculum Outline for the Master of Medical Science (M.M.S.) in Physician Assistant Program—Fort Myers**

Start Date: May/June  
Length: 27 months  
Degree: Master of Medical Science (M.M.S.) in Physician Assistant  
Didactic: 14.5 months  
Clinical: 12.5 months

**Total Hours:** 52 2,390 55

Curriculum is subject to change as directed by the department.

*1 of 5 selectives required—may use other selectives as electives
Note: Listed at the end of each entry are lecture clock hours, laboratory clock hours, and semester hours.

PAN 5000—Anatomy
Gross structures of the human body. Integrates topographic and radiographic anatomy to stress the application and importance of clinical anatomy. Develops the knowledge of the human anatomy necessary for the practice of the profession. (55-38-5)

PAN 5002—Introduction to the Physician Assistant Profession
Introduces key concepts regarding the PA profession: an overview of the profession, the history of the development of the profession, the current status of the profession, physician assistant education, and current and future roles of the physician assistant. (16-0-1)

PAN 5003—Fundamentals of Medical Imaging
Introduces key concepts for the understanding of normal medical diagnostic imaging. Emphasis is placed on images of normal human body structures and organs. (18-0-1)

PAN 5005—Genetics
This course will introduce principles of medical genetics applied to the clinical practice of medicine within the scope of practice of physician assistants. Discussions will include the role of genetics in medicine; the basic structure and behavior of genes; genetic basics of human disease; the human genome; application of genetic science to cancer; and genetics in clinical medicine for diagnosis, treatment, and ethical considerations. (28-4-2)

PAN 5006—Electrocardiography
Provides the basics for learning to interpret normal ECG tracings and applying those principles to interpret the ECG tracings of common cardiac disease. (30-6-2)

PAN 5008—Health Promotion and Disease Prevention
Focus on wellness through preventive interventions and services. Emphasizes responsibility for one's own health, the community's efforts to protect against disease, and environmental hazards. Epidemiology, risk factors, screening tests, and community resources are identified with each health issue presented. (22-0-1)

PAN 5009—PA and Health Care Dynamics
This course focuses on the current status and issues regarding the physician assistant profession within the context of the U.S. medical system and today's health care workforce. It discusses the structures and administrative principles in health care organizations, the role of the practicing PA in unique environments with an emphasis on rural and underserved medicine, reimbursement for services rendered, quality assurance, risk management, patient safety and medical errors, federal health care programs, and other issues involving patient care. (18-0-1)

PAN 5100—Physiology
Clinically relevant physiologic principles of the major organ systems covered in Clinical Anatomy. Pathological changes that occur in human physiology in the disease process. (54-0-3)

PAN 5101—Clinical Pathophysiology
This course introduces the student to pathophysiologic concepts that form the biologic basis of disease. It builds on the knowledge gained in anatomy and physiology courses. However, physiologic concepts will be reviewed and emphasized in order for the student to fully appreciate the progression from the normal physiologic state to the diseased state with its resultant clinical signs and symptoms. (45-0-3)

PAN 5200—Microbiology
Relationship of microbes to human disease and the host-immune response. Characteristics and properties of clinically significant bacteria, viruses, fungi, and selected parasites as well as the prevention, control, and diagnostic laboratory tests of their associated specific infectious diseases. (45-0-3)

PAN 5300—Physical Diagnosis I
Principles and skills required to perform a complete medical history and physical examination. Emphasizes normal physical findings. Prerequisite for PAN 5310 (42-20-3)

PAN 5310—Physical Diagnosis II
Upon successful completion of the prerequisite PAN 5300, the students will build upon skills learned in Physical Diagnosis I. The student will have supervised practice of skills using simulated patient encounters. Integrating previously learned interviewing skills with principles from the clinical sciences, students elicit a comprehensive medical history, perform a complete physical examination, and formulate an initial diagnostic impression and diagnostic plan. Students are expected to continue to progress in recording information in written form and presenting the information orally to colleagues. Prerequisite for PAN 5320 (36-36-3)

PAN 5320—Physical Diagnosis III
Upon successful completion of the prerequisite PAN 5310, the student will continue to systematically learn abnormalities in the physical examination and specialty examination techniques. The student will have supervised
practice of skills using simulated patient encounters. Integrating previously learned interviewing skills with principles from the clinical sciences, students elicit a comprehensive medical history, perform a complete physical examination, and formulate an initial diagnostic impression and diagnostic plan. Students are expected to continue to progress in recording information in written form and presenting the information orally to colleagues. (50-30-4)

PAN 5400—History Taking and Communications Skills
This course prepares the student to perform a complete medical history, identifying appropriate communication skills needed for interaction with patients, families, and colleagues. (18-0-1)

PAN 5403—Legal and Ethical Issues in Health Care
Introduces the role that ethics and the law play in the practice of health care. Principles and concepts in determining correct actions both legally and ethically are reviewed. Topics include solving an ethical dilemma, ethical implications involved in genetic engineering, the impaired clinician, conflicts between providers, conflicts between clinician and patient, euthanasia, risk management, confidentiality, informed consent, patients' directives, and documentation. (45-0-3)

PAN 5409—Cultural Issues in Health Care
Introduction to the skills and insights necessary in promoting health and dealing with illness in diverse populations. Issues discussed include the need for effective communication with an understanding of societal and cultural factors and how they impact on health care efforts and use of the health care system. (30-0-2)

PAN 5410—Pharmacology I
Understanding the basis for pharmacologic intervention in patient care is the foundation for treatment of disease. Course begins an in-depth study of the pharmacodynamics of drugs used in the automatic nervous, renal, and cardiovascular systems. Mechanisms of drug action, clinical uses, side effects, contraindications and drug interactions, pharmacokinetic considerations for special patient populations. (38-0-2)

PAN 5411—Complementary Medicine and Nutrition
Survey of human nutrition in health care, and the principles for maintaining good health through nutrition. Addresses health hazards associated with dietary deficiencies, obesity, fad dieting, food contamination, diet management of selected diseases, and functional roles of vitamins and minerals. Additionally, this course will address introductory concepts, procedures, education, and licensing in alternative and complementary medicine. (18-0-1)

PAN 5419—Clinical Pharmacology
This course will advance the clinical skills of the student as they relate to the pharmacologic treatment of the patient. Specific topics will include the indicated medications in the treatment of common illnesses; their adverse effects; and drug interactions, dosage, and monitoring. (46-0-3)

PAN 5420—Pharmacology II
Mechanisms of action, clinical uses, side effects, contraindications, drug interactions, and pharmacokinetics of drugs utilized in the treatment of diseases of the major organ systems. Treatment of HIV, geriatric and neonatal pharmacology, the pharmacological principles of nutrition, over-the-counter agents, toxicology, drugs of abuse, prescription writing, and evaluation of drug literature. (72-0-4)

PAN 5423—Interpretation and Evaluation of the Medical Literature
This course is designed to introduce the student to the processes of searching, interpreting, and evaluating medical literature for the purposes of application within an evidence-based medicine framework, as well as within a research framework. The essential components of a well-written medical or research paper are presented. The process by which these papers are transformed into publications is described (including the concepts of article preparation and revision and the steps required for submission to a physician assistant or other medical journal). This course is designed to adequately prepare students to complete the Graduate Project (PAN 6601), which results in a written medical or research paper. (50-30-4)

PAN 5461—Life Support Procedures and Skills
Introduction to the principles of advanced life support used in medical and surgical emergencies. Includes a review of the most common emergency situations encountered and provides hands-on practical training that will assist the student in developing the skills required to stabilize patients with life-threatening conditions. Includes certification in basic (BLS) and Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS). (24-40-3)

PAN 5500—Clinical Medicine and Surgery I
Etiology, clinical manifestations, appropriate diagnostic evaluation, and the management of selected disease entities. (112-0-7)

PAN 5510—Clinical Medicine and Surgery II
Continuation of Clinical Medicine and Surgery I. Common disease entities of major organ systems and primary care aspects of disease evaluation and treatment. (120-0-8)

PAN 5520—Clinical Medicine and Surgery III
Continuation of Clinical Medicine and Surgery II. Disease entities of major organ systems. Lectures in primary care aspects of disease evaluation and treatment. (112-0-7)
PAN 5540—Clinical Behavioral Medicine
Common psychosocial problems and disorders encountered by health care professionals. Emphasizes the diagnosis and understanding of development of these behaviors, including the patient-physician relationship, varieties of psychotherapy, communication skills, and appropriate intervention and treatment regimens. (45-0-3)

PAN 5560—Clinical Procedures and Surgical Skills
Lectures and laboratory practicum introducing the clinical procedures and surgical skills used in the clinical setting: aseptic technique, operating room protocol, injections, knot tying and suturing techniques, venipuncture, arterial puncture, intravenous catheterization, nasogastric intubation, and urinary catheterization. This course is a prerequisite for clinical rotations. (44-24-3)

PAN 5560—Clinical Procedures and Surgical Skills
Lectures and laboratory practicum introducing the clinical procedures and surgical skills used in the clinical setting: aseptic technique, operating room protocol, injections, knot tying and suturing techniques, venipuncture, arterial puncture, intravenous catheterization, nasogastric intubation, and urinary catheterization. This course is a prerequisite for clinical rotations. (44-24-3)

PAN 5600—Clinical Laboratory Medicine I
Clinical laboratory utilization, rationale for selecting common diagnostic tests, interpretation of results, correlation between results and disease processes, and tests not available in the primary care setting that are necessary for diagnosis, treatment, and patient care. (36-4-2)

PAN 5610—Clinical Laboratory Medicine II
Continuation of Clinical Laboratory Medicine I. Students will learn how to appropriately order and accurately interpret laboratory tests. These skills will help them diagnose common diseases related to major organ systems. (32-0-2)

PAN 6310—Emergency Medicine
Required six-week rotation in hospital emergency department teaches students to recognize, assess, and treat acute and life threatening clinical problems. Emphasizes common primary care emergencies. (270-0-6)

PAN 6320—Family Medicine
Required six-week rotation in outpatient settings. Comprehensive primary care of the individual patient within the family unit. Emphasizes the primary care needs of patients in rural, or inner-city communities. (250-0-6)

PAN 6330—Internal Medicine
Required six-week rotation in outpatient and/or inpatient settings. Diagnosis, treatment, and management of acute and chronic medical problems seen in the internal medicine practice. Emphasizes the adult nonsurgical patient. (270-0-6)

PAN 6340—Pediatrics
Required six-week rotation in outpatient and/or inpatient settings teaches normal and abnormal growth and development, disease prevention, and basic health care in neonates through adolescence. Emphasizes primary care of the pediatric patient. (240-0-6)

PAN 6350—Prenatal Care and Gynecology
Required six-week rotation in outpatient and/or inpatient settings teaches perinatal care and treatment and gynecological diagnosis and management. Emphasizes primary care of the female patient including obstetrics. (270-0-6)

PAN 6360—Surgery
Required six-week rotation in outpatient and inpatient settings. Students learn to diagnose, treat, and manage the surgical patient. Emphasizes surgical entities commonly encountered in the primary care setting. (300-0-6)

PAN 6371—Selective I
In this selective, full-time, clinical rotation, students select one of four areas of medicine. The rotation provides an opportunity to investigate a behavioral health, otorhinolaryngology, orthopedics, rural or underserved primary care medicine, or internal medicine subspecialty. (270-0-6)

PAN 6376—Elective I
Elective, full-time, clinical rotation that provides an opportunity to investigate a clinical, medical, or surgical subspecialty area or gain more experience in primary care. Elective rotations provide opportunities to investigate a clinical subspecialty area or gain more experience in a required discipline. (270-0-6)

PAN 6381—Elective II
This is a four-week elective course rotation that will be completed at the end of the clinical year. Elective rotations provide opportunities to investigate a clinical subspecialty area or gain more experience in a required discipline. (160-0-4)

PAN 6601—Graduate Project
With the guidance of a faculty adviser, students will use the skills acquired in Publication Skills and Medical Research (MMS 5412) to create a graduate project. The project features topics in clinical or administrative medicine and consists of a comprehensive literature review and evaluation and completion of a publishable review paper. The project allows the student to demonstrate his or her ability to research and compile information and to present that information in a clear, written form. (4-90-3)
Physician assistants (PAs) serve as an essential component of a medical system that continues to strive to provide quality, affordable health care for all individuals. Their roles in the system will continue to grow as changes in health care indicate. Today, more than 100,000 individuals are in practice as PAs in the United States. PAs provide care that would otherwise be provided by physicians. PAs take medical histories, perform physical examinations, order and interpret tests, diagnose and treat illnesses, perform medical/surgical procedures, assist in surgery, and can write prescriptions in all states. PAs work in most medical specialties and in all types of communities. Many practice in primary care settings, and more than one-third are in towns with fewer than 50,000 residents. The PA profession is one of the fastest growing health care professions. According to the Bureau of Labor statistics (BLS) U.S. Department of Labor, as published in the 2016–2017 Occupational Outlook Handbook, employment of PAs is expected to grow 30 percent from 2014 to 2024.

It is the obligation of each physician/PA team to ensure that the PA's scope of practice is identified; that delegation of medical tasks is appropriate to the PA's level of competence; that the relationship of, and access to, the supervisory physician is defined; and that a process of performance evaluation is established. Adequate responsible supervision of the PA contributes to both high-quality patient care and professional growth.

The Department of Physician Assistant—Orlando offers a modern program that lasts 27 months. Upon successful completion of study, the student is awarded a Master of Medical Science degree in Physician Assistant. The curriculum includes rigorous instructions in basic science subjects, followed by clinical medicine, physical diagnosis, clinical laboratory medicine, clinical pathophysiology, clinical procedures, surgical skills, electrocardiography, radiology, and psychiatry. The student also takes courses in the Master of Medical Science program including health care law and ethics, epidemiology and biostatistics, research methodology, cultural issues in health care, publication skills, and medical research, as well as a graduate project.

During the clinical year of study, the student participates in clinical rotations predominantly in Central Florida. Required six-week rotations include family medicine, internal medicine, behavioral health, pediatrics, gynecology and prenatal care, emergency medicine, general surgery, and one selective of six weeks from one of the following areas: dermatology, geriatrics, otorhinolaryngology, or orthopedics. The clinical year contains one four-week elective rotation. With a sound foundation in medical training, NSU graduates are prepared to work in many clinical areas, both in primary care and specialty medicine.

Accreditation
The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted Accreditation—Continued status to the Nova Southeastern University—Orlando Physician Assistant Program sponsored by Nova Southeastern University—Orlando. Accreditation—Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards. Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The approximate date for the next validation review of the program by the ARC-PA will be March 2024. The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy.

Mission Statement
• to provide a high-quality training program designed for, and dedicated to producing, culturally competent physician assistants who will provide quality health care in rural, urban, underserved, and culturally diverse communities
• to provide an exemplary educational experience, which emphasizes primary medical care, yet will enable graduates to manifest competency and skill in a variety of clinical environments
• to inspire graduates to pursue lifelong learning
• to foster leadership qualities, which will enable graduates to improve access to quality, affordable health care
• to heighten the stature of the physician assistant profession by training quality graduates

Program Goals
1. Maintain a first-time PANCE pass rate above the national average.
2. Maintain PANCE scores in each of the content areas at or above the national average.
3. Maintain an attrition rate below 10 percent and a graduation rate above 90 percent.
4. Assure all graduates meet the program-defined graduate competencies, which align with the PA Core Competencies, as endorsed by AAPA, PAEA, and NCCPA.
Admissions Requirements
Prospective students are selected by the Committee on Admissions (COA), which considers the overall qualities of the applicant. Areas of consideration include interpersonal skills, personal motivation, knowledge and understanding of the PA profession, academic performance and level of achievement, life experiences, quality and length of prior health care experience, and recommendations/evaluations. Personal interviews are offered to the most qualified applicants to assess interpersonal and communication skills, maturity, altruistic attitude, and commitment to a PA career.

1. Prior to matriculation, applicants must have completed a bachelor's degree of their choice from a regionally accredited college or university in the United States. Degrees conferred greater than 10 years prior to the application date will not be accepted without 18 semester hours (or equivalent quarter hours) of prerequisites or upper division science classes for science majors (typically defined as a course number beginning with a 3 or a 4) within the previous five years. The program requires the students to earn a grade of \( C \) (2.0) or better in each of the upper division courses. Applicants must have a minimum cumulative GPA of 3.0 and a minimum science GPA of 3.0 on a 4.0 grading scale at the time of application and continuing through matriculation.

2. The college requires the students to earn a grade of \( C \) (2.0) or better in each of the following required courses:
   - college algebra or higher (3 semester hours, not including statistics)
   - English composition (3 semester hours)
   - English literature (3 semester hours)
   - humanities/arts (3 semester hours)
   - social sciences (9 semester hours)
   - general biology (or zoology), including laboratory (4 semester hours)
   - general microbiology, including laboratory (4 semester hours)
   - general chemistry I and II, including laboratory (8 semester hours)
   - human anatomy and human physiology (3 semester hours of each subject or 6 semester hours of combined subject courses)
   - biochemistry or organic chemistry (3 semester hours)
   - introductory statistics (3 semester hours)
   - medical terminology (1 semester hour)

The required science courses must be specifically for science majors and must be completed within 10 years of application date. Introductory and survey courses are not accepted. Applicants are encouraged to complete their elective coursework in the areas of behavioral, physical, and social sciences or the humanities. CLEP placement exams are not accepted for science prerequisites. Upon review of an applicant’s record, the Committee on Admissions may require additional coursework and testing as a condition of acceptance.

The following courses are recommended:
   - biochemistry or organic chemistry laboratory (1 semester hour)
   - anatomy laboratory (1 semester hour)
   - physiology laboratory (1 semester hour)

Upon review of a student’s record, the Committee on Admissions may require additional coursework and testing as a condition of acceptance.

3. Graduates of foreign institutions where English is not the primary language of instruction must present transcripts showing at least 18 semester hours (or equivalent quarter hours) of study from a regionally accredited college or university in the United States. Of these 18 semester hours,
   - 3 semester hours must be in English composition (courses do not include ESOL)
   - 3 semester hours must be in English literature (courses do not include ESOL)
   - 3 semester hours must be in public speaking (courses do not include ESOL)

The remaining 9 semester hours must be upper-level science courses for science majors of the applicant’s choosing.

4. All applicants are required to have official scores from the Graduate Record Examination (GRE) general test submitted directly to the NSU PA Office of Admissions. The test must have been taken within the past five years and must be taken early enough for official scores to be received in the admissions office by the supplemental application due date of February 15. Applications will not be considered complete without GRE scores. Testing information for the GRE may be obtained from gre.org or by telephone at (609) 921-9000.

Prior health care experience is highly recommended and is considered for admission. Those applicants who have prior health care experience must submit verifiable information about their experience.

Computer Requirements
All students are required to have a laptop computer (PC preferred) and a printer. The computer must have the following minimum specifications:
   - Intel core i5 or i7
   - sound capability and speakers
• Internet connection with private Internet service provider (ISP) for universal access to the Internet
• wireless capability
• combo DVD and RW drive
• printer
• internal or external webcam

The following are recommended features:
• Windows 7 or higher OR Mac OS X version 10.7 or higher
• Microsoft Office 2007 with PowerPoint, Word, and Excel minimum
• surge suppressor
• flash drive

Application Procedures

1. Apply to CASPA
The Physician Assistant Program participates in the Centralized Application Service for Physician Assistants (CASPA) for the receipt and processing of all applications. CASPA takes no part in the selection of students. CASPA applications are available online at caspaonline.org.

Questions regarding completion of the online application may be directed to CASPA’s email address, caspainfo@caspaonline.org, or by telephone to (617) 612-2080.

The CASPA application may be submitted as early as April 16, the year prior to the admission cycle. The CASPA application deadline is January 15 to be considered for admission in June.

2. Send transcripts and letters of recommendation/evaluation to CASPA
All official college transcripts from all undergraduate, graduate, and professional institutions attended must be sent directly from the institutions to CASPA.

Three letters of recommendation/evaluation must be sent to CASPA or the application will not be considered. One letter of recommendation/evaluation must be sent from an individual (other than a relative or friend) such as an academic adviser, professor, coworker, or supervisor. Two letters of recommendation/evaluation must be from health care professionals (neither of which can be a practicing relative or friend), one of which must be from a physician or assistant.

3. Report GRE scores directly to CASPA
Official Graduate Record Exam (GRE) scores must be admitted directly to CASPA as part of the CASPA application. The school code number for NSU’s PA—Orlando program is 0964. The GRE must have been taken in the last five years and must be taken early enough for official scores to be available by the supplemental application deadline of February 15.

4. Complete Supplemental Application
Once the CASPA application has been received by Nova Southeastern University, a supplemental application will be mailed to the applicant.

5. Send Supplemental Application
Send the completed supplemental application to EPS at the address below.

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences
Department of Physician Assistant Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905
Phone: (954) 262-1101 or 877-640-0218
Fax: (954) 262-2282

Your complete supplemental application must be received no later than February 15 in order to be considered for admission for the June entering class. Once we receive your GRE scores; copies of all professional certifications, registrations, licenses, or relevant credentialing materials; your supplemental application; and the nonrefundable, $50 application fee, your file will be reviewed. Completed applications are reviewed on a “rolling” or periodic basis.

The applicant will not be considered for a possible interview until the application from CASPA, the supplemental application (signed and dated), the $50 supplemental application fee, and the Graduate Record Evaluation (GRE) test scores are received by the Nova Southeastern University Physician Assistant Office of Admissions.

Personal Interviews
Once your application is complete, the Committee on Admissions (COA) will decide whether your application meets program criteria to warrant an invitation for a personal interview. Interviews are conducted at Nova Southeastern University’s Orlando Campus, and are by invitation only. An invitation is not a guarantee of admission. Notice of acceptance or action by the COA will be on a “rolling” or periodic schedule; therefore, early completion of the application is in the best interest of the applicant.

Inquiries should be directed to

Nova Southeastern University
Department of Physician Assistant—Orlando
Coordinator of Student Services and Recruitment
4850 Millenia Boulevard
Orlando, Florida 32839-6012
Phone: (954) 262-1101 or 877-640-0218
Fax: (954) 262-2282
Current College Coursework
All prerequisite coursework must be completed by the end of May in order to be considered for the June entering class. If, at the time of application, some coursework is in progress or anticipated, please identify the courses on the supplemental application.

Transcripts
All applicants who are accepted must submit official transcripts of all coursework to the NSU EPS Physician Assistant Admissions Office prior to matriculation. It is the responsibility of the applicant to ensure that arrangements are made for these transcripts to be sent.

Tuition and Fees
• Tuition for 2016–2017 (subject to change by the board of trustees without notice) $31,995. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.
• A clinical support charge of $400 will be assessed in each of the three semesters of clinical training.
• Acceptance fee is $500. This fee is required to reserve the accepted applicant’s place in the entering first-year class, but is not refundable in the event of a withdrawal. It is payable within two weeks of an applicant’s acceptance.
• Deposit is $250. This is due February 15, or within two weeks of an applicant’s acceptance, whichever is the latest, under the same terms as the Acceptance Fee.
• Preregistration fee is $250. This is due March 15, or within two weeks of an applicant’s acceptance, whichever is the latest, under the same terms as the Acceptance Fee.

The first semester’s tuition and fees, less the $1,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met. The financial ability of applicants to complete their training at the college is important because of the limited number of positions available in each class.

Applicants should have specific plans for financing 27 months of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses. Each student is required to carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

Due to the demands of the PA curriculum, the program discourages any outside employment. The program does not allow working for NSU or any of the associated clinical training sites.

Requirements for Graduation
In order to be eligible to graduate from the Physician Assistant Program, students must
• successfully complete all academic and clinical courses and degree requirements
• have satisfactorily met all financial and library obligations
• attend, in person, the commencement program, at which time the degree is conferred

Academic Dismissal in the Physician Assistant Program
See the suspension/dismissal section of the student handbooks.

Remediation Policy
The Nova Southeastern University Physician Assistant Program—Orlando is an intense academic experience. Students will encounter both written and performance-based examinations. In specific courses, (Physical Exam/diagnosis, Clinical Medicine, and Surgery, etc.) all blocks of instruction must be successfully passed by the student in order to pass the entire course.

All students are aware of their performance at the end of every test. If a student fails to demonstrate the required competencies for a specific exam or block of instruction, he or she will be notified and certain actions shall be taken. Students will receive email notification of failed grades from the academic coordinator. The student will meet with his or her academic adviser and/or the course director/instructor in order to discuss the academic situation and develop a plan of action for improving his or her academic deficiencies. The student will review the plan of action for improvement and grade sheets and sign them. Students will coordinate a retesting date with the course director and that will be within seven calendar days of the test failure or a mutually agreed upon date. The student must be proactive in coordinating additional study/tutoring time before the retest.

If the student successfully passes the retest, the student will receive a maximum score of 75 percent with an E.

If the student fails to demonstrate mastery of the course objectives by failing the retest, the student’s case will be forwarded to the Committee on Student Progress for further review and possible academic and administrative action. Recommendations will be referred to the department chair for final disposition.
Course of Study

The Physician Assistant Program curriculum is completed following an acceptable bachelor’s degree. The comprehensive PA curriculum, completed in a consecutive manner, is oriented to primary care and prepares the student to practice in a wide variety of clinical settings. The first 15 months of study consist of basic sciences and clinically related didactic courses. All courses are required and must be successfully completed before advancing to the next semester or the clinical year. During this time frame, students may be in class from Monday through Friday, 8:00 a.m. to 8:00 p.m., additionally, there may be occasional weekend hours. Because of its highly integrated and compact curriculum, the PA department requires matriculants to complete the entire curriculum at NSU. Therefore, no requests for advanced placement, transfer of credit, and credit for experiential learning will be considered.

The clinical year is devoted to 12 months of clinical training with required six-week clinical rotations in family medicine, internal medicine, emergency medicine, behavioral health, pediatrics, prenatal care/gynecology, general surgery, as well as a selective rotation in orthopedics, dermatology, geriatrics, or otorhinolaryngology and a four-week elective. The rotations are as follows:

- Emergency Medicine (six weeks)
- Family Medicine (six weeks)
- Internal Medicine (six weeks)
- Pediatrics (six weeks)
- Prenatal Care and Gynecology (six weeks)
- General Surgery (six weeks)
- Selective (six weeks in one of the following courses)
  - Geriatrics (six weeks)
  - Orthopedics (six weeks)
  - Dermatology (six weeks)
  - Otorhinolaryngology (six weeks)
- Behavioral Health (six weeks)
- Elective (four weeks)
- Graduate Project (each semester)

Each required rotation has assigned readings and learning objectives. At the end of each required rotation, a written, comprehensive subject examination is administered and must be passed. The six-week elective rotation requires the submission of documents as defined in the Orlando Clinical Handbook and rotation syllabi as related to the rotation. A comprehensive, written, summative examination is administered as a component of the four-week elective and must be passed. During rotations, students will be supervised by licensed practitioners and will actively participate in patient assessments, perform common laboratory procedures, interpret common diagnostic examinations, and help manage common medical problems as required by the program and the ARC-PA standards. Testing on required specialty rotations will occur on scheduled end-of-rotation days (EORs). OSCE, Pack Rat, and other testing may occur as scheduled during EORs. Comprehensive, computerized patient logs are to be completed and submitted as directed prior to EORs. Weekly Exam Master tests must be submitted to advisers at the scheduled times. The work hours during clinical rotations are set by the preceptor and can include evening and weekend hours. Students are required to work a minimum of 32 hours per week, however, many rotation sites require a greater student participation.

Upon completion of the course of study, students will have earned a Master of Medical Science (M.M.S.) in Physician Assistant degree. Graduates will be eligible to take the Physician Assistant National Certification Examination (PANCE) administered by the National Commission on Certification of Physician Assistants.

The role of the physician assistant requires a high level of expertise and responsibility. The applicant must possess the ability and desire to complete a rigorous academic and clinical program and make a commitment to lifelong learning and becoming a professional.
**Curriculum Outline for the Master of Medical Science (M.M.S.) in Physician Assistant Program—Orlando**

Start Date: June  
Length: 27 months  
Degree: Master of Medical Science (M.M.S.) in Physician Assistant  
Didactic: 15 months  
Clinical: 12 months

Physician Assistant—Orlando Course Descriptions

Note: Listed at the end of each entry are lecture clock hours, laboratory clock hours, and semester hours.

PAO 5000—Anatomy
Gross structures of the human body. Integrates topographic and radiographic anatomy to stress the application and importance of clinical anatomy. Develops the knowledge of the human anatomy necessary for the practice of the profession. (48-32-4)

PAO 5001—Pharmacodynamics
This course will provide the student with a thorough understanding of the basic pharmacodynamic and pharmacokinetic principles. Emphasis will be on basic terminology, receptor theory, pathways, absorption, distribution, elimination, and pharmacological effects. (16-0-1)

PAO 5002—Introduction to the Physician Assistant Profession
Introduces key concepts regarding the PA profession including an overview of the profession, the history of the development of the profession, the current status of the profession, physician assistant education, and current and future roles of the physician assistant. (16-0-1)

PAO 5003—Fundamentals of Medical Imaging
Introduces key concepts for the understanding of normal medical diagnostic imaging. Emphasis is placed on images of normal human body structures and organs. (28-0-2)

PAO 5005—Genetics
This course will introduce principles of medical genetics applied to the clinical practice of medicine within the scope of practice of Physician Assistants. Discussions will include the role of genetics in medicine, the basic structure and behavior of genes, genetic basics of human disease, the human genome, and application of genetic science to cancer, genetics in clinical medicine for diagnosis, treatment, and ethical considerations. (20-30-2)

PAO 5006—Electrocardiography
Provides the basics for learning to interpret normal ECG tracings and applying those principles to interpret the ECG tracings of common cardiac disease. (16-0-1)

PAO 5008—Health Promotion and Disease Prevention
Focus on wellness through preventive interventions and services. Emphasizes responsibility for one’s own health, the community’s efforts to protect against disease, and environmental hazards. Epidemiology, risk factors, screening tests, and community resources are identified with each health issue presented. The clinical correlation of these topics, in addition to the knowledge and clinical skills taught during the academic year, will be reiterated and re-enforced. (28-0-2)

PAO 5009—PA and Health Care Dynamics
This course focuses on the current status and issues regarding the physician assistant profession within the context of the U.S. medical system and today’s health care workforce. The course discusses the structures and administrative principles in health care organizations; the role of the practicing PA in unique environments, with an emphasis on rural and underserved medicine; reimbursement for services rendered; quality assurance; federal health care programs; and other issues involving patient care. (30-0-2)

PAO 5100—Physiology
Clinically relevant physiologic principles of the major organ systems covered in Clinical Anatomy. Normal physiologic processes of all major organ systems are emphasized in this course. (48-0-3)

PAO 5104—Clinical Pathophysiology
This course introduces the student to pathophysiologic concepts that form the biologic basis of disease. It builds on the knowledge gained in human anatomy and physiology courses. However, physiologic concepts will be reviewed and emphasized in order for the student to fully appreciate the progression from the normal physiologic state to the acute and chronic diseased state with its resultant clinical signs and symptoms. (46-0-3)

PAO 5200—Microbiology
Relationship of microbes to human disease and the host-immune response. Characteristics and properties of clinically significant bacteria, viruses, fungi, and selected parasites as well as the prevention, control, and diagnostic laboratory tests of their associated specific infectious diseases. (42-0-3)

PAO 5300—Physical Diagnosis I
Principles and skills required to perform a complete medical history and physical examination. Emphasizes normal physical findings. (22-44-3)

PAO 5310—Physical Diagnosis II
Students will build upon skills learned in Physical Diagnosis I. The student will have supervised practice of skills using simulated patient encounters. Integrating previously learned interviewing skills with principles from the clinical sciences, students elicit a comprehensive medical history, perform a complete physical examination, and formulate an initial diagnostic impression and diagnostic plan. Students are expected to continue to
progress in recording information in written form and presenting the information orally to colleagues. (20-36-3)

PAO 5320—Physical Diagnosis III
Students will continue to systematically learn abnormalities in the physical examination and specialty examination techniques. The student will have supervised practice of skills using simulated patient encounters. Integrating previously learned interviewing skills with principles from the clinical sciences, students elicit a comprehensive medical history, perform a complete physical examination, and formulate an initial diagnostic impression and diagnostic plan. Students are expected to continue to progress in recording information in written form and presenting the information orally to colleagues. (34-42-4)

PAO 5400—History Taking and Communications Skills
This course prepares the student to perform a complete medical history, identifying appropriate communication skills needed for interaction with patients, families, and colleagues. (20-20-2)

PAO 5404—Legal and Ethical Issues in Health Care
Introduces the role that ethics and the law play in the practice of health care. Principles and concepts in determining correct actions, both legally and ethically, are reviewed. Topics include solving an ethical dilemma, ethical implications involved in genetic engineering, the impaired clinician, conflicts between providers, conflicts between clinician and patient, euthanasia, risk management, confidentiality, informed consent, patients' directives, and documentation. (42-0-3)

PAO 5406—Cultural Issues in Health Care
Introduction to the skills and insights necessary in promoting health and dealing with illness in diverse populations. Issues discussed include the need for effective communication with an understanding of societal and cultural factors and how they impact on health care efforts and use of the health care system. (30-0-2)

PAO 5407—Clinical Pharmacology
This course will advance the clinical skills of the student as they relate to the pharmacologic treatment of the patient. Specific topics will include the indicated medications in the treatment of common illnesses; their adverse effects; and drug interactions, dosage, and monitoring. (18-0-1)

PAO 5408—Complementary Medicine and Nutrition
Survey of human nutrition in health care and the principles for maintaining good health through nutrition. Addresses health hazards associated with dietary deficiencies, obesity, fad dieting, food contamination, diet management of selected diseases, and the functional roles of vitamins and minerals. Additionally, this course will address introductory concepts, procedures, education, and licensing in alternative and complementary medicine. (28-0-2)

PAO 5410—Pharmacology I
Understanding the basis for pharmacologic intervention in patient care is the foundation for treatment of disease. This course is an in-depth study of the pharmacodynamics of drugs used in the autonomic nervous, renal, and cardiovascular systems. Mechanisms of drug action, clinical uses, side effects, contraindications and drug interactions, and pharmacokinetic considerations for special patient populations will also be discussed. (32-0-2)

PAO 5412—Publication Skills and Medical Research
The essential components of a well-written medical or research paper are presented. The process by which these papers are transformed into publications is described, including the concepts of article preparation and revision and the steps required for submission to a physician assistant medical journal. This course is designed to adequately prepare students to complete the Graduate Project (PAO 6500), which results in a written medical or research paper. (26-30-3)

PAO 5420—Pharmacology II
Mechanisms of action, clinical uses, side effects, contraindications, drug interactions, and pharmacokinetics of drugs used in the treatment of diseases of the major organ systems. Treatment of HIV, geriatric and neonatal pharmacology, the pharmacological principles of nutrition, over-the-counter agents, toxicology, drugs of abuse, prescription writing, and evaluation of drug literature. (64-0-4)

PAO 5421—Epidemiology and Biostatistics in Health Care
Overview of the methods in epidemiology and biostatistics commonly used in clinical research and practice. Addresses the evaluation of diagnostic procedures and the methodology for clinical description and trials and provides basic skills on critical reading of medical literature, based on these concepts. (44-0-3)

PAO 5422—Research Methodology
Emphasis and overview of the importance of data collection, research methods, and application of scientific thought to research findings. Designed to enable participants to develop skill in reading and critically evaluating medical literature and research. The advantages and disadvantages of quantitative and qualitative research methods are compared and contrasted. (24-0-2)

PAO 5460—Life Support Procedures and Skills
Introduction to the principles of advanced life support used in medical and surgical emergencies. Includes a review of the most common emergency situations encountered and provides hands-on practical training that will assist the student in developing the skills required to stabilize patients with life-threatening conditions. Includes certification in basic (BLS) and Advanced Cardiac Life
Support (ACLS), as well as Pediatric Advanced Life Support (PALS). (20-24-2)

PAO 5500—Clinical Medicine and Surgery I
Etiology, clinical manifestations, appropriate diagnostic evaluation, and the management of disease entities in ophthalmology, otorhinolaryngology, dermatology, cardiology, pulmonology, and hematology/oncology. (114-0-7)

PAO 5510—Clinical Medicine and Surgery II
Etiology, clinical manifestations, appropriate diagnostic evaluation, and the management of common disease entities of major organ systems and primary care aspects of disease evaluation and treatment in gastroenterology, rheumatology, immunology, endocrinology, orthopedics, OB/GYN, geriatrics, and neurology. (172-0-11)

PAO 5520—Clinical Medicine and Surgery III
Etiology, clinical manifestations, appropriate diagnostic evaluation, and the management of disease entities of major organ systems. Lectures in primary care aspects of disease evaluation and treatment in pediatrics, nephrology, emergency medicine, infectious diseases, and general surgery. (148-0-10)

PAO 5540—Clinical Behavioral Medicine
Common psychosocial problems and disorders encountered by health care professionals. Emphasizes the diagnosis and understanding of development of these behaviors, including the patient-clinician relationship, varieties of psychotherapy, communication skills, and appropriate intervention and treatment regimens. (44-0-3)

PAO 5560—Clinical Procedures and Surgical Skills
Lectures and laboratory practicum introducing the clinical procedures and surgical skills used in the clinical setting: aseptic technique, operating room protocol, injections, knot tying and suturing techniques, venipuncture, arterial puncture, intravenous catheterization, nasogastric intubation, and urinary catheterization. This course is a prerequisite for clinical rotations. (32-32-3)

PAO 5605—Clinical Laboratory Medicine
Clinical laboratory use, rationale for selecting common diagnostic tests, interpretation of results, correlation between results and disease processes, and tests not available in the primary care setting that are necessary for diagnosis, treatment, and patient care. Students will learn how to appropriately order and accurately interpret laboratory tests. These skills will help them diagnose common diseases related to major organ systems. (40-0-3)

PAO 6310—Emergency Medicine
Required six-week rotation in hospital emergency department teaches students to recognize, assess, and treat acute and life-threatening clinical problems. Emphasizes common primary care emergencies. (230-0-6)

PAO 6320—Family Medicine
Required six-week rotation in outpatient settings. Comprehensive primary care of the individual patient within the family unit. Emphasizes the primary care needs of patients in rural or inner-city communities. (240-0-6)

PAO 6330—Internal Medicine
Required six-week rotation in outpatient and/or inpatient settings. Diagnosis, treatment, and management of acute and chronic medical problems seen in the internal medicine practice. Emphasizes the adult, nonsurgical patient. (240-0-6)

PAO 6340—Pediatrics
Required six-week rotation in outpatient and/or inpatient settings teaches normal and abnormal growth and development, disease prevention, and basic health care in neonates through adolescence. Emphasizes primary care of the pediatric patient. (240-0-6)

PAO 6350—Prenatal Care and Gynecology
Required six-week rotation in outpatient and/or inpatient settings teaches prenatal care, treatment, gynecological diagnosis, and management. Emphasizes primary care of the female patient including obstetrics. (240-0-6)

PAO 6360—General Surgery
Required six-week rotation in outpatient and inpatient settings. Students learn to diagnose, treat, and manage the surgical patient. Emphasizes surgical entities commonly encountered in the primary care setting. (240-0-6)

PAO 6401—Clinical Elective I
Elective, full-time, clinical rotation that provides an opportunity to investigate a clinical, medical, or surgical subspecialty area or gain more experience in primary care. Each four-week elective may be taken sequentially at the same site or separately. (160-0-4)

PAO 6410—Behavioral Health
Required six-week rotation in outpatient and/or inpatient settings focusing on behavioral and mental health. Students learn to recognize, manage, and treat behavioral and/or mental disorders including addictions, personality disorders, mood disorders, and psychotic disorders in the primary care setting. (240-6-6)

PAO 6406—Selective
Choose one of the four following medical areas to take a six-week rotation in. (240-0-6)

Orthopedics
The six-week clinical practicum is intentionally flexible to meet the variety of patients that are likely to present during the rotation. Preceptorship is provided by an orthopedist credentialed at the clinical site. Primary emphasis will be on developing skills required to recognize and manage common problems seen in this specialty.
Dermatology
This six-week clinical practicum is intentionally flexible to meet the variety of patients that are likely to present during the rotation. Preceptorship is provided by a dermatologist credentialed at the clinical site. Primary emphasis will be on developing skills required to recognize and manage common problems seen in this specialty.

Otorhinolaryngology
This six-week clinical practicum is intentionally flexible to meet the variety of patients that are likely to present during the rotation. Preceptorship is provided by an otolaryngologist credentialed at the clinical site. Primary emphasis will be on developing skills required to recognize and manage common problems seen in this specialty.

Geriatrics
This six-week clinical practicum is intentionally flexible to meet the variety of patients that are likely to present during the rotation. Preceptorship is provided by a gerontologist credentialed at the clinical site. Primary emphasis will be on developing skills required to recognize and manage common problems seen in this specialty.

PAO 6498—Graduate Project I: Creation, Plan, and Preliminary Work
With the guidance of a faculty adviser, students will use the skills acquired in Publication Skills and Medical Research (PAO 5412) to create a graduate project. The project features topics in clinical or administrative medicine and consists of a comprehensive literature review and evaluation and completion of a publishable review paper. The project allows the student to demonstrate his or her ability to research and compile information and to present that information in a clear, written form.

Fall semester (0-0-1)

PAO 6499—Graduate Project II: Draft of Components
For additional information, please refer to course description for PAO 6498.

Winter semester (0-0-1)

PAO 6500—Graduate Project III: Final Paper and Poster Presentation
For additional information, please refer to course description for PAO 6498.

Final summer semester (0-0-1)

Department of Physician Assistant—Jacksonville

Physician assistants (PAs) serve as essential components of a medical system that continues to struggle to provide quality, affordable health care for all Americans. Their roles in the system will continue to grow as changes in health care indicate. Today, more than 100,000 individuals are in practice as PAs in the United States. PAs provide care that would otherwise be provided by physicians. PAs take medical histories, perform physical examinations, order and interpret tests, diagnose and treat illnesses, perform medical/surgical procedures, assist in surgery, and can write prescriptions in all states. PAs work in most medical specialties and in all types of communities. Many PAs practice family and internal medicine, and more than one-third are in towns with fewer than 50,000 residents. The PA profession is one of the fastest growing health care professions. According to the Bureau of Labor statistics (BLS) U.S. Department of Labor, as published in the 2016–2017 Occupational Outlook Handbook, employment of PAs is expected to grow 30 percent from 2014 to 2024.

It is the obligation of each physician/PA team to ensure that the PA’s scope of practice is identified; that delegation of medical tasks is appropriate to the PA’s level of competence; that the relationship with, and access to, the supervisory physician is defined; and that a process of performance evaluation is established. Adequate responsible supervision of the PA contributes to both high-quality patient care and professional growth.

The Physician Assistant Department offers an innovative program that lasts 27 months. Upon successful completion of study, students will be awarded the Master of Medical Science Degree in Physician Assistant. The curriculum includes rigorous instruction in basic science subjects, followed by clinical medicine, physical diagnosis, clinical laboratory medicine, clinical pathophysiology, clinical procedures and surgical skills, electrocardiography, pharmacology, radiology, and others. Students also take courses that include health care law and ethics, epidemiology and biostatistics, research methodology, and cultural issues in health care.

During the clinical year of study, the student participates in clinical rotations. These rotations include family medicine, internal medicine, pediatrics, gynecology and prenatal care, emergency medicine, behavioral medicine, and surgery, all complemented by two elective rotations. NSU graduates are prepared to work in many clinical areas, both in primary care and specialty medicine.

Accreditation
The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted Accreditation—Continued status to the Nova Southeastern University—Jacksonville Physician Assistant Program sponsored by Nova Southeastern University—Jacksonville.
Accreditation—Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards.

Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The approximate date for the next validation review of the program by the ARC-PA will be March 2022. The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy.

Mission Statement
To provide an exemplary educational experience, which emphasizes primary medical care, yet will enable graduates to manifest competency and skill in a variety of clinical environments; to develop the necessary skills to pursue lifelong learning; to foster leadership qualities, which will enable graduates to improve access to quality, affordable health care; and to heighten the status of the physician assistant profession.

Admissions Requirements
Prospective students are selected by the Committee on Admissions (COA), which considers the overall qualities of the applicant. Areas of consideration include interpersonal skills, personal motivation, knowledge and understanding of the PA profession, academic performance and level of achievement, life experiences, quality and length of prior health care experience, and recommendations/evaluations.

Personal interviews are offered to the most qualified applicants to assess interpersonal and communication skills, maturity, integrity, altruistic attitude, and commitment to the PA profession.

1. Applicants must have a minimum cumulative and a minimum science GPA of 3.0 on a 4.0 grading scale at the time of application, and must maintain that GPA throughout matriculation to be considered. Successful applicants in the past have, typically, had cumulative GPAs in the range of 3.3–3.5, GRE scores (verbal, quantitative, and analytical) in the 40th percentile or higher in each of the three categories, and letters of recommendation from individuals with whom the applicant has had a professional working relationship in the health care field.

2. Prior to matriculation, applicants must have received a baccalaureate degree from a regionally accredited college or university.

3. The college requires the students to earn a grade of C (2.0) or better in each of the following required courses:
   - college math (3 semester hours)
   - English (6 semester hours, including 3 of English composition)
   - humanities/arts (3 semester hours)
   - social sciences (9 semester hours)
   - general biology (or zoology), including laboratory (4 semester hours)
   - microbiology, including laboratory (4 semester hours)
   - general chemistry I and II, including laboratory (8 semester hours)
   - human anatomy and human physiology (6 semester hours)
   - biochemistry or organic chemistry (3 semester hours)
   - genetics (3 semester hours)

Applicants are encouraged to complete their elective coursework in the areas of behavioral, physical, and social sciences or in the humanities.

The following courses are recommended:
   - biochemistry or organic chemistry laboratory (1 semester hour)
   - anatomy laboratory (1 semester hour)
   - physiology laboratory (1 semester hour)
   - introduction to statistics (1 semester hour)
   - genetics laboratory (1 semester hour)

4. Graduates of foreign institutions where English is not the primary language of instruction must present transcripts showing at least 18 semester hours (or equivalent quarter hours) of study from a regionally accredited college or university in the United States. Of these 18 semester hours,
   - 3 semester hours must be in English composition (courses do not include ESOL)
   - 3 semester hours must be in English literature (courses do not include ESOL)
   - 3 semester hours must be in public speaking (courses do not include ESOL)

The remaining 9 semester hours can be any courses of the applicant’s choosing.

5. All applicants are required to submit official scores from the Graduate Record Examination (GRE) general test to the Office of Admissions. The test must have been taken within the past five years and must be taken early enough for official scores to be received in the admissions office by the supplemental application due date of February 15. Applications will not be considered complete without GRE scores. Testing information for the GRE may be obtained from gre.org or by telephone at (609) 921-9000.

Prior health care experience is highly recommended and is considered for admission. Those applicants who have prior health care experience must submit verifiable information about their experience.
**Computer Requirements**

Upon admission, all students are required to have a laptop computer and printer. **The computer must have the following minimum specifications:**

- 1.5 GHz minimum processor
- 1 GB RAM
- video and monitor capable of 1024 x 768 resolution or better
- CD-ROM or DVD drive
- full duplex sound card and speakers
- DSL or CABLE modem
- Internet connection with private Internet service provider (ISP) for access from home to the Internet
- Windows XP or above or Macintosh with Virtual Machine and Windows
- Microsoft Office 2003 or newer with PowerPoint, Word, and Excel minimum or compatible office suite
- Surge suppressor
- DVD/RW or CD/RW
- wireless Internet capability and wireless router

**Application Procedures**

1. Apply to CASPA

The Physician Assistant Program participates in the Centralized Application Service for Physician Assistants (CASPA) for the receipt and processing of all applications. CASPA takes no part in the selection of students. CASPA applications are submitted online at caspaonline.org or by writing to

   CASPA  
   P.O. Box 9108  
   Watertown, MA 02471

The CASPA application deadline is January 15 in order to be considered for admission in June.

2. Send transcripts and letters of recommendation/evaluation to CASPA

All official college transcripts from all undergraduate, graduate, and professional institutions attended must be sent directly from the institutions.

Three letters of recommendation/evaluation must be sent to CASPA. One letter of recommendation/evaluation must be sent from an individual (other than a relative or friend) such as an academic adviser, professor, or supervisor. Two letters of recommendation/evaluation must be from health care professionals, one of which must be from a physician or PA with whom you have worked, shadowed, or volunteered.

3. Report GRE scores directly to CASPA

Official Graduate Record Exam (GRE) scores must be admitted directly to CASPA as part of the CASPA application. The school code number for NSU’s PA—Jacksonville program is 0952. The GRE must have been taken in the last five years and must be taken early enough for official scores to be available by the supplemental application deadline of February 15.

4. Complete Supplemental Application

Once the CASPA application has been received by Nova Southeastern University, a supplemental application will be made available online. Your complete supplemental application must be received no later than February 15 in order to be considered for admission for the June entering class. Once we receive your GRE scores and supplemental application, your file will be reviewed. The applicant will not be considered for a possible interview until all of these requirements have been received by the EPS.

**Personal Interviews**

Once your application is complete, the Committee on Admissions will decide whether or not your application is strong enough to warrant an invitation for a personal interview. Interviews for the Jacksonville PA program are conducted at the NSU campus in Jacksonville, Florida, and are by invitation only. Interviews will be held from mid-September through mid-May. An invitation to interview is not a guarantee of admission. Notice of acceptance or action by the COA will be on a rolling or periodic schedule; therefore, early completion of the application is in the best interest of the applicant.

**Current College Coursework**

All prerequisite coursework must be completed by the end of May in order to be considered for the June entering class. If, at the time of application, coursework is in progress or anticipated, please identify these courses on the supplemental application.

**Transcripts**

All applicants who are accepted must submit official transcripts from all schools attended to the NSU EPS Physician Assistant Admissions Office prior to matriculation. It is the responsibility of the applicant to ensure that arrangements are made for these transcripts to be sent.

**Undergraduate/Physician Assistant Dual Admission Program—Jacksonville**

Nova Southeastern University’s College of Health Care Sciences has established an articulation agreement with Florida State College of Jacksonville for a select number of highly motivated, qualified students interested in pursuing professional studies in the Physician Assistant Program. Candidates must maintain a 3.0 grade point average during
the undergraduate years and achieve acceptable scores on the Graduate Record Examination (GRE).

The students will apply for admission to the PA program via CASPA. The CASPA application, supplemental application, and GRE scores must be received by NSU's Office of Admissions by the posted deadlines. Personal interviews are offered to the most qualified applicants to assess interpersonal and communications skills, maturity, altruistic attitude, and commitment to the PA profession. There is no guarantee of automatic admission to the PA program.

For more information and requirements, contact

Florida State College of Jacksonville
501 West State Street, Office 401H
Jacksonville, Florida 32202
(904) 632-3388

Tuition and Fees

- Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $31,995. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.
- A clinical support charge of $400 will be assessed in each of the three semesters of clinical training.
- Acceptance fee is $500. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be credited to the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is payable within two weeks of an applicant’s acceptance.
- Deposit is $500. This is due February 15, under the same terms as the Acceptance Fee.

The first semester’s tuition and fees, less the $1,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

Applicants should have specific plans for financing 27 months of professional education. This should include tuition, living expenses, books, equipment, and miscellaneous expenses. Each student is required to carry adequate health insurance. Students may avail themselves of the insurance plan obtainable through the university.

Due to the demands of the PA curriculum, the program discourages any outside employment.

Requirements for Graduation

In order to be eligible to graduate from the Physician Assistant Program, students shall
- have satisfactorily met all financial and library obligations
- attend, in person, the commencement program, at which time the degree is conferred

Academic Dismissal in the Physician Assistant Program

See the suspension/dismissal section of the student handbooks.

Readmission Policy in the Physician Assistant Program

In selected cases, and only with the approval of the department chair and college dean, a student may be allowed to be noncompetitively matriculated with the next first-year class. It is emphasized that this only refers to those few students with special academic or personal issues.

Course of Study

The Physician Assistant Program curriculum is completed following a baccalaureate degree from a regionally accredited college or university in the United States. The comprehensive curriculum, completed in a consecutive manner, is oriented to primary care and prepares the student to practice in a wide variety of clinical settings. The first 15 months of study consist of basic sciences and clinically related didactic courses. All courses are required and must be successfully completed before advancing to the clinical year. During this time frame, students are generally in class from Monday through Friday, 8:00 a.m. to 5:00 p.m., although there are occasional evening and/or weekend hours. Because of its highly integrated and compact curriculum, the PA program requires matriculants to complete the entire curriculum at this campus. No advanced placement, transfer of credit, or credit for experiential learning will be granted.

The clinical year is devoted to 12 months of clinical training with required clinical rotations in family medicine, emergency medicine, pediatrics, prenatal care/gynecology, surgery, and internal medicine. Students must also complete three elective rotations, for a total of nine clinical rotations. The required rotations and two of the elective rotations are six weeks in length. The remaining elective rotation is four weeks in length.

Each required rotation has assigned readings and learning objectives. At the end of each required rotation, a written, comprehensive subject examination is administered and must be passed. During rotations, students will be supervised by licensed practitioners and will actively participate in patient assessments, perform common laboratory procedures, interpret common diagnostic examinations, and help manage common medical problems. The work hours during clinical rotations are set by the preceptor and can include evening and weekend hours. Students
are required to work a minimum of 40 hours per week, however, many rotation sites require students to work substantially more hours per week.

Upon completion of the course of study, students will be awarded the Master of Medical Science degree in Physician Assistant. Graduates will be eligible to take the Physician Assistant National Certification Examination (PANCE) administered by the National Commission on Certification of Physician Assistants.

The role of the physician assistant requires a high-level of expertise and responsibility. The applicant must possess the ability and desire to complete a rigorous academic and clinical program and make a commitment to continued learning.

Curriculum Outline for the Master of Medical Science (M.M.S.) in Physician Assistant Program—Jacksonville

| Start Date: | June |
| Length:    | 27 months |
| Degree:    | Master of Medical Science (M.M.S) in Physician Assistant |
| Didactic:  | 15 months |
| Clinical:  | 12 months |

**Total Hours** 82 2,480 65

Curriculum is subject to change as directed by the program.
Note: Listed at the end of each entry are lecture clock hours, laboratory clock hours, and semester hours.

**PAJ 5000—Anatomy**
This course covers the gross structures of the human body. It integrates topographic and radiographic anatomy to stress the application and importance of clinical anatomy. Students will develop the knowledge of human anatomy necessary for the practice of the profession. (55-38-5)

**PAJ 5001—Pharmacodynamics**
This course will provide the student with a thorough understanding of the basic pharmacodynamic and pharmacokinetic principles. Emphasis will be on basic terminology, receptor theory, pathways, absorption, distribution, elimination, and pharmacological effects. **Prerequisite for PAJ 5410 (16-0-1)**

**PAJ 5002—Introduction to the Physician Assistant Profession**
This course introduces key concepts regarding the PA profession, including an overview of the profession and its organizations, the history of the profession, the current status of the profession, physician assistant education, and current and future roles of the physician assistant. (16-0-1)

**PAJ 5003—Fundamentals of Medical Imaging**
This course introduces key concepts for the understanding of normal medical diagnostic imaging. Emphasis is placed on images of normal human body structures and organs. (18-0-1)

**PAJ 5401—Medical Terminology**
Use of medical language for appropriate and accurate communication in patient care. Students acquire a medical vocabulary, knowledge of medical terminology, and terminology reference material. (0-25-1)

**PAJ 5005—Clinical Genetics**
This course provides an up-to-date, clinically relevant genetics course to prepare PA students for medical practice in the age of genomics. Areas of focus include molecular and developmental genetics; family history with pedigree risk analysis; inheritance patterns; genetic testing and screening; cancer genetics; complex diseases; pharmacogenetics; gene therapy; genetic ethical, legal, and social issues (ELSI) impact on primary care; and a current review of the Human Genome Project (HGP) and its impact on medicine. (26-0-3)

**PAJ 5006—Electrocardiography**
This course provides the basics for learning to interpret 12-lead ECG tracings and applying those principles to interpret the ECG tracings of common cardiac disease. (18-4-1)

**PAJ 5008—Health Promotion and Disease Prevention**
This course focuses on wellness through preventative interventions and services. Epidemiology, risk factors, health screening, and community resources for a variety of health issues are presented. Emphasis is placed on the community and health care practitioner's efforts to protect against disease and environmental hazards, as well as individual responsibility for one's health. (45-0-3)

**PAJ 5009—PA and Health Care Dynamics**
This course focuses on the current status and issues regarding the physician assistant profession within the context of the United States medical system and today's health care workforce. The course discusses the structures and administrative principles in health care organizations, the role of the practicing PA in unique environments such as rural and underserved medicine, reimbursement for services rendered, quality assurance, federal health care programs, reduction of medical errors, and other issues involving patient care. (30-0-2)

**PAJ 5100—Physiology**
Clinically relevant physiologic principles of the major organ systems covered in Clinical Anatomy. It will include the pathological changes that occur in human physiology in the disease process. **Prerequisite for PAJ 5101, 5102, 5500, 5510, 5520, 5600, and 5610 (54-0-3)**

**PAJ 5101—Clinical Pathophysiology**
This course covers pathological changes seen in disease states. It uses a major body system/organ approach. The etiology and progression from the normal physiological state to the diseased state with resultant clinical signs and symptoms is taught. (18-0-1)

**PAJ 5102—Clinical Pathophysiology II**
This course introduces the student to pathophysiologic concepts that form the biologic basis of disease. It builds on the knowledge gained in human anatomy and physiology courses. Physiological concepts will be reviewed and emphasized in order for the student to fully appreciate the progression from normal physiologic state to acute and chronic diseased state with its reluctant clinical signs and symptoms. This course builds on PAJ 5101. (34-0-2)

**PAJ 5200—Microbiology**
The course emphasizes the relationship of microbes to human disease and the host-immune response. Characteristics and properties of clinically significant bacteria, viruses, fungi, and selected parasites, as well as the prevention, control, and diagnostic laboratory tests of their associated specific infectious diseases, will be discussed. (34-0-2)
PAJ 5300—Physical Diagnosis I
The Physical Diagnosis I course is an introduction to clinical medicine. Students will acquire the knowledge and skills essential to perform a complete, head-to-toe physical examination. Emphasis is placed on normal physical findings. A combination of lectures, discussions, case studies, and performance skills labs will be used to present and practice the necessary concepts and skills. Lab sessions are used to optimize teaching of concepts. The student will be required to demonstrate competency-based learning during the performance of the required procedures and skills. This course prepares the student to perform a complete medical history, identifying appropriate communication skills needed for interactions with patients, families, and colleagues. Prerequisite for PAJ 5310 and 5320 (60-30-4)

PAJ 5310—Physical Diagnosis II
This course will build upon the skills learned in Physical Diagnosis I and will cover the essential skills for performing both complete and focused medical interviews and physical examinations. Using the skills developed in Physical Diagnosis I, students learn to accurately integrate and record historical and physical findings in the correct written format. This course introduces the student to the concept of medical problem solving. Emphasis is on the correlation of historical information and physical findings to the process of formulating a differential diagnosis and treatment plan. Through case presentations and medical simulations, students will use knowledge acquired from previous and concurrent didactic courses to develop their problem solving skills. (20-36-2)

PAJ 5320—Physical Diagnosis III
This course is a continuation of PAJ 5310. Small-group and laboratory presentations will be used to refine the medical history concepts and physical examination skills acquired in Physical Diagnosis I and II. Instructional methods, including supervised clinical experience and patient simulations, will facilitate the students' integration of clinical information in order to diagnose disease and record historical and physical findings in written format. The course will expand on the skills essential for performing a thorough medical interview and physical examination and will enhance medical documentation skills. This course also continues to develop medical problem-solving skills. Emphasis is on correlation of historical information, physical findings, and pertinent laboratory results to formulate a diagnosis. Through case presentations and medical simulations, the student will also use knowledge acquired from previous and concurrent didactic courses to develop these skills. (30-40-4)

PAJ 5310—Physical Diagnosis II
Understanding the basis for pharmacologic intervention in patient care is the foundation for treatment of disease. This course begins an in-depth study of the pharmacodynamics of drugs used in the automatic nervous, renal, and cardiovascular systems. Mechanisms of drug action, clinical uses, side effects, contraindications and drug interactions, and pharmacokinetic considerations for special patient populations are discussed. Prerequisite for PAJ 5507 (38-0-2)

PAJ 5420—Pharmacology II
Mechanisms of action, clinical uses, side effects, contraindications, drug interactions, and pharmacokinetics of drugs utilized in the treatment of diseases of the major organ systems will be discussed. Treatment of HIV, geriatric and neonatal pharmacology, the pharmacological principles of nutrition, over-the-counter agents, toxicology, drugs of abuse, prescription writing, and evaluation of drug literature will also be gone over. Prerequisite for PAJ 5507 (72-0-5)

PAJ 5500—Clinical Medicine and Surgery I
This course will encompass the etiology, clinical manifestations, appropriate diagnostic evaluation, and management of selected disease entities. (112-0-7)

PAJ 5504—Legal and Ethical Issues in Health Care
This course introduces the role that ethics and the law play in the practice of health care. Principles and concepts in determining correct actions both legally and ethically are reviewed. Topics include solving an ethical dilemma, ethical implications involved in genetic engineering, the impaired clinician, conflicts between providers, conflicts between clinician and patient, euthanasia, risk management, confidentiality, informed consent, patients' directives, documentation, and domestic violence. (34-0-2)

PAJ 5506—Cultural Issues in Health Care
This course offers an introduction to the skills and insights necessary in promoting health and dealing with illness in diverse populations. Issues discussed include the need for effective communication—with an understanding of societal and cultural factors and how they impact on health care efforts—and use of the health care system. (15-0-1)

PAJ 5507—Clinical Pharmacology
At the completion of this course, students will be able to appropriately prescribe medications in various clinical settings. Preparation for appropriate prescribing and administration of medicines is accomplished by studying drug classifications, pharmacodynamic actions, and the rationale for therapeutic use of prescription and nonprescription medications. In addition, students will be
able to describe the potential advantages and disadvantages of specific therapeutic regimens, universal indications and contraindications for usage, dosing schedules, and the relative cost of commonly prescribed medications. Students will administer a variety of medications using patient simulators and will observe the clinical response. Common errors involving prescription writing will be discussed and practical exercises will require students to accurately write prescriptions and treatment orders. (16-0-1)

PAJ 5508—Complementary Medicine and Nutrition
This course is a survey of human nutrition in health care and the principles for maintaining good health through nutrition. It addresses health hazards associated with dietary deficiencies, obesity, fad dieting, food contamination, diet management of selected diseases, and functional roles of vitamins and minerals. Additionally, this course will address introductory concepts, procedures, education, and licensing in alternative and complementary medicine. (30-0-2)

PAJ 5510—Clinical Medicine and Surgery II
This course is a continuation of Clinical Medicine and Surgery I. Common disease entities of major organ systems and primary care aspects of disease evaluation and treatment are discussed. (120-0-8)

PAJ 5512—Epidemiology/Interpretation and Evaluation of Medical Literature
This course is designed to introduce the student to the process of interpretation and evaluation of the medical literature. The components of published medical papers and physician assistant-authored research papers are evaluated in this course. (45-0-3)

PAJ 5520—Clinical Medicine and Surgery III
This course is a continuation of Clinical Medicine and Surgery II. It will include disease entities of major organ systems. Lectures in primary care aspects of disease evaluation and treatment will be given. (112-0-7)

PAJ 5540—Clinical Behavioral Medicine
Common psychosocial problems and disorders encountered by health care professionals are discussed. The course material emphasizes the diagnosis and understanding of the development of these behaviors, including the patient-clinician relationship, varieties of psychotherapy, communication skills, and appropriate intervention and treatment regimens. (45-0-3)

PAJ 5560—Life Support Procedures and Skills
Introduction to the principles of advanced life support used in medical and surgical emergencies. Includes a review of the most common emergency situations encountered and provides hands-on practical training that will assist the student in developing the skills required to stabilize patients with life-threatening conditions. Includes certification in basic (BLS) and Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS). (24-40-3)

PAJ 5570—Clinical Procedures and Surgical Skills
Lectures and laboratory practicum introducing the clinical procedures and surgical skills used in the clinical setting: aseptic technique, operating room protocol, injections, knot tying, and suturing techniques, venipuncture, arterial puncture, intravenous catheterization, nasogastric intubation, and urinary catheterization. (44-24-3)

PAJ 5600—Clinical Laboratory Medicine I
Clinical laboratory utilization; rationale for selecting common diagnostic tests; interpretation of results; correlation between results and disease processes; and tests not available in the primary care setting that are necessary for diagnosis, treatment, and patient care are discussed. (20-0-1)

PAJ 5610—Clinical Laboratory Medicine II
This course is a continuation of Clinical Laboratory Medicine I. Students will learn how to appropriately order and accurately interpret laboratory tests. These skills will help them diagnose common diseases related to major organ systems. (34-0-2)

PAJ 6310—Emergency Medicine
Required six-week rotation in hospital emergency department teaches students to recognize, assess, and treat acute and life-threatening clinical problems. Emphasizes common primary-care emergencies. (240-0-6)

PAJ 6320—Family Practice
Required six-week rotation in outpatient settings. The rotation focuses on comprehensive primary care of the individual patient within the family unit. Emphasizes the primary care needs of the patients in rural and inner-city communities. (240-0-6)

PAJ 6330—Internal Medicine
Required six-week rotation in outpatient and/or inpatient settings. The rotation focuses on the diagnosis, treatment, and management of acute and chronic medical problems seen in the internal medicine practice. The emphasis is on the adult nonsurgical patient. (240-0-6)

PAJ 6340—Pediatrics
Required six-week rotation in outpatient/inpatient settings. The rotation focuses on the normal and abnormal growth and development, disease prevention, and health care of the child from neonate through adolescence. It emphasizes the primary care of the pediatric patient. (240-0-6)
PAJ 6350—Prenatal Care and Gynecology
Required six-week rotation in outpatient and/or inpatient settings that teaches prenatal care and treatment and gynecological diagnosis and management. It emphasizes the primary care of the female patient and includes obstetrics. (240-0-6)

PAJ 6360—General Surgery
Required six-week rotation in outpatient and/or inpatient settings. The students will learn to diagnose, treat, and manage the surgical patient. It emphasizes the surgical conditions commonly encountered in the primary-care setting. (240-6-6)

PAJ 6375—Behavioral Medicine
This required, six-week rotation in outpatient and/or inpatient settings focuses on behavioral and mental health. Students learn to recognize, manage, and treat behavioral and/or mental disorders including addictions, personality disorders, mood disorders, and psychotic disorders in the primary care setting. (240-6-6)

PAJ 6380—Clinical Elective II
Six-week elective, full-time clinical rotation that provides an opportunity to investigate a medical or surgical subspecialty area or gain more experience in primary care. Each elective may be taken sequentially or separately, but not at the same clinical site. (240-6-6)

PAJ 6390—Clinical Elective III
This four-week elective rotation will be completed at the end of the clinical year. Elective rotations provide an opportunity to investigate a medical or surgical subspecialty area or gain more experience in a required discipline. (160-4-4)

Elective
(400-10-10)

PAJ 6600—Graduate Project
With the guidance of a faculty adviser, students will use the skills acquired in Epidemiology and Interpretation of the Medical Literature to create a graduate project. The project features topics in clinical or administrative medicine and consists of a comprehensive literature review and evaluation and completion of a publishable review paper. The project allows the student to demonstrate his or her ability to research and compile information and to present that information in a clear, written form. (20-0-3)

Department of Speech-Language Pathology

Master of Science in Speech-Language Pathology

The Master of Science in Speech-Language Pathology (M.S.) Program focuses on training speech-language pathologists to provide a full range of services to communicatively disordered clients in a variety of settings. The program provides scientifically based academic and clinical curricula to foster critical thinking and application of best practices. Course content is research-based and prepares the student to meet the requirements for the Certificate of Clinical Competence awarded by the American Speech-Language-Hearing Association (ASHA).

Accreditation

This program is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of ASHA.

Admissions Requirements

Prior to matriculation, applicants must have received a baccalaureate or graduate degree from a regionally accredited college or university with a minimum cumulative GPA of 3.2 on a 4.0 grading scale.

All qualifying applicants will have an application interview. Once admitted, all students must successfully complete a mandatory orientation on the Fort Lauderdale/Davie Campus.

Prior to matriculation, applicants must also have successfully completed (meaning, earned grades of B or better) all six of the following 3-credit prerequisite courses:

- CSAD 2010—An introductory course in the field of communication science and disorders
- CSAD 3020—Anatomy and Physiology of the Speech and Hearing Mechanism
- CSAD 3010—Phonetics
- CSAD 3040—Neuroanatomy and Physiology
- CSAD 3060—Speech and Language Development
- CSAD 4060—Audiology and Aural Rehabilitation

International Students

International students living in the United States must present verification of student visa or residency status. Due to the limited availability of ASHA-certified supervisors in other countries, students who live outside of the United States will not be eligible for admission to the M.S. program. Furthermore, students accepted to the program may not relocate outside of the United States before the completion of the degree.

Application Procedures

To apply, go to nova.edu/graduate and follow directions to complete the interest page. All prospective students must submit a completed application with a $50, nonrefundable fee (required for each application submitted to Nova Southeastern University).

Final, official transcripts from all previously attended, postsecondary institutions are required. Transcripts are to be forwarded directly from the issuing institution in a sealed envelope in order to be considered an official transcript. Applicants with transcripts from institutions that generate electronic transcripts can have them sent to electronictranscript@nova.edu. Photocopies and facsimiles will not be accepted as final, official transcripts.

Admissions decisions are based on degrees earned at regionally accredited institutions or an officially approved equivalent, such as an evaluation by one of the National Association of Credential Evaluation Services (NACES) approved agencies. The evaluation must include a course-by-course analysis and list all course subjects with United States semester credits and a GPA on a 4.0 scale.

All official application information must be sent directly from the submitting institution to NSU’s Enrollment Processing Services at the address below.

Nova Southeastern University
Enrollment Processing Services
College of Health Care Sciences
Department of Speech-Language Pathology
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

Applicants may be provisionally admitted based on a preliminary review of unofficial transcripts and/or program-specific admissions requirements. This admission, however, includes a condition that final and official transcripts, documents, and all other requirements for full admission must be received within 90 calendar days from the official start date of the term. If these final and official transcripts, documents, and/or requirements are not received by that time, the student will not be allowed to continue to attend class. Registration will be prohibited and other services may be suspended.
Tuition and Fees
Master of Speech-Language Pathology tuition for 2016–2017 (subject to change by the board of trustees without notice) is $1,195 per credit hour. An NSU student services fee of $350 is required per semester, not to exceed $1,050 annually. Tuition for 2017–2018 will subsequently be posted on our website (healthsciences.nova.edu/slp/master-speech-language-pathology.html).

Requirements for Graduation
To be eligible for graduation, all students must
- successfully complete all required courses
- successfully complete the required clinical experiences totaling a minimum of 400 accrued hours, including 25 hours of directed observation
- successfully complete the required capstone course
- successfully complete the required portfolio
- maintain a cumulative grade point average (CGPA) of 3.0 or higher
- successfully demonstrate the 2014 Standards and Implementation Procedures for the Certificate of Clinical Competence in Speech-Language Pathology (Standard IV: Knowledge Outcomes), required by ASHA
- complete the Praxis II Exam adopted by ASHA for the purposes of certification in speech-language pathology
- complete the application for degree and satisfy all College of Health Care Sciences and Nova Southeastern University financial obligations

Computer Requirements
Throughout the program, students will be required to conduct online library research, communicate via NSU email, and use word-processing programs for writing papers and clinical reports. Students are required to own a computer and obtain an Internet service provider (ISP) account.

**Total Credits for Degree Completion:** 52
Master of Science in Speech-Language Pathology Course Descriptions

Core Courses

SLP 6000—Diagnosis of Language and Speech Disorders
The course will provide procedures and techniques to assess speech and language status. The overall aim of the course is to build on the student’s understanding of the assessment process in communication disorders. Students are to develop the ability to interpret assessment information and to formulate appropriate diagnosis of the patients/clients we serve. A noncredit lab is included. (3 credits)

SLP 6011—Language and Learning Disorders in School-Aged Children and Adolescents
This course addresses the etiology, diagnosis, and treatment of language-learning delay/disorders, including developmental and acquired disorders, affecting school-age children through adolescence. Emphasis will be placed on a communication process model of evaluation and intervention with the implication of this integrated approach to facilitate reading, writing, speaking, listening, and thinking. The importance of the functional interrelationships among linguistic, cognitive, and affective functions and the social contexts within which they occur will be stressed. A variety of assessment and treatment procedures for use with this diverse clinical population will be discussed. Presentation of the paradigm shift from a traditional deficit model to an emergent literacy model with collaborative strategies to design and conduct curriculum-based assessment and interventions will be covered. Prerequisite: SLP 6012 (3 credits)

SLP 6012—Communication Disorders: Infancy–Preschool
This course covers identification, assessment, and intervention principles and procedures for young children who display or are at-risk for socio-communicative linguistic deficits. Emphasis is placed on family-centered, early-intervention, service delivery and the integrated intervention model for facilitation of communication and language skills. There will also be discussion of collaborative strategies and multidisciplinary teaming models for facilitating effective parent-professional partnerships. Prerequisite: CSAD 3030 (3 credits)

SLP 6015—Clinical Processes
This course will provide a base of knowledge and fundamental skills needed for beginning supervised clinical practice. It will review the basic aspects of delivery of treatment services for communication disorders, including communication skills, interpersonal skills, behavioral management skills, intervention strategies and processes, data management, and clinical writing skills. Emphasis will be placed on basic clinical intervention processes common to a variety of disorder areas. Prerequisites: SLP 6011, SLP 6020, and SLP 6060 (3 credits)

SLP 6020—Language Disorders in Adults
This course provides a knowledge base for evaluation and treatment of disorders of language in adults, including aphasia, closed-head injury, right hemisphere damage, and dementia. Prerequisites: CSAD 3040 and SLP 6070 (3 credits)

SLP 6025—Augmentative and Alternative Communication
This course will review the basic aspects of the field of augmentative communication, including aided and unaided symbols, strategies, and techniques. An overview of augmentative communication assessment and intervention principles and procedures will be presented. This course will address the needs of individuals with little or no functional speech across the life span, including etiologies such as severe aphasia, autism, cerebral palsy, dual sensory impairment, intellectual disability, progressive neurological diseases, and traumatic brain injury. Prerequisite: SLP 6012 and SLP 6020 (3 credits)

SLP 6030—Voice Disorders
This course reviews etiology and pathophysiology; case history; perceptual, acoustic, endoscopic, and aerodynamic diagnostic procedures; intervention approaches; and therapy techniques for individuals with functional, neurogenic, psychogenic and organic voice disorders and resonance disorders. Prerequisites: CSAD 3020, CSAD 3040, CSAD 3050, and SLP 6070 (3 credits)

SLP 6040—Fluency Disorders
Etiology, diagnosis, and management of children and adults with disorders of fluency (e.g., developmental stuttering, neurologically based stuttering, cluttering, and other nonfluent speech conditions) will be studied. (2 credits)

SLP 6050—Motor Speech Disorders
This course deals with education and training in the assessment and management of motor speech disorders across the life span. There will be discussion of the nature, etiology, diagnosis, and management of motor speech disorders with emphasis on differential diagnosis and treatment. Prerequisites: CSAD 3020, CSAD 3040, SLP 6060, and SLP 6070 (3 credits)

SLP 6055—Dysphagia
This course provides information about normal anatomy and physiology of the swallow. Using an evidence-based model, information about the evaluation and treatment of swallowing disorders is provided. Common etiologies
for dysphagia (e.g., neurogenic and head and neck cancer) are addressed for the adult population. An overview of pediatric dysphagia is provided. Current issues and controversial topics are discussed in a framework of questions students should consider. Examples of ethical questions in the management of swallowing are presented. Students are afforded the opportunity to view fiberoptic endoscopic evaluation of swallowing (FEES). Video views of normal and abnormal swallows through video fluoroscopic evaluation are provided through a noncredit required lab. **Prerequisite:** SLP 6050 (3 credits)

**SLP 6060—Articulation and Phonological Disorders**

This course provides a knowledge base for normal and disordered speech sound development. Theories of assessment and intervention are discussed and application, analysis, and comparison is stressed for all theories and approaches presented. A variety of procedures for identification and remediation of articulatory and phonologic disorders are presented. Traditional therapeutic techniques and current diagnostic and intervention strategies are highlighted. **Prerequisite:** SLP 6015 (3 credits)

**SLP 6070—Research Methods**

This course provides exposure to critical analysis of the field's literature with respect to research design and statistical application (3 credits)

**SLP 6075—Seminar in Professional Issues in Speech-Language Pathology**

The purpose of this course is to increase students' awareness and understanding of current professional issues pertaining to such matters as standards of ethics, scope of practice, legislative mandates affecting the professions, professional service delivery systems, health care reimbursement issues, state licensure, national certification, state teacher certification requirements, State Accomplished Practices for Educators, state education standards, job opportunities and interview strategies, participation in professional organizations, professional advocacy, and HIV/AIDS awareness. **Prerequisite:** SLP 6101 (3 credits)

**SLP 6078—Technological Application in Communication Science and Disorders**

This course provides an overview of technological applications used by professionals in speech-language pathology with an introduction to computer applications in the field. This course also provides the technological foundation necessary for students to complete the master's degree. (0 credits)

**SLP 6091—Multicultural and Counseling Issues**

This course will provide a forum for discussion regarding issues in the provision of services to multicultural populations. Counseling approaches for use with clients and/or families affected by communication problems will be explored through effective interpretation, information dissemination, and discussion. **Prerequisite:** SLP 6101 (3 credits)

**SLP 6200—Capstone**

Capstone is an online course designed to assist students in reviewing major content areas in the field of speech-language pathology in preparation for the national certification adopted by the American Speech-Language-Hearing Association (ASHA) for purposes of certification in speech-language pathology. It addresses approximately 18 major topic areas covering normal and disordered processes, professional issues, research methodologies and other content important to the profession. Students progress through the course at their own pace, reviewing online course materials, participating in discussion boards, and contributing to synchronous chats. **Students must take this class with their first externship experience.** (0 credits)

**Clinic Courses**

**SLP 6005—Diagnostics II Practicum**

Emphasis in this course is on analysis and interpretation of data and the impact on differential diagnosis. Lab class meetings are required. **Prerequisite:** SLP 6000 (1 credit)

**SLP 6101—Clinical Lab I Practicum**

This course has dual components. Students will provide treatment to assigned patients as well as attend weekly class meetings. Participation in a practicum involving direct patient contact will occur with supervised clinical practice performed in the treatment of speech, language, and hearing disorders. Development and application of appropriate treatment plans, collaborative supervisory meetings, self-analysis skills, research, and completion of written documentation is expected. Discussions on professional topics such as prevention, portfolio development, child/elder abuse and neglect, and case studies will be covered. **Prerequisite:** SLP 6015 (1 credit)

**SLP 6102—Clinical II Practicum**

In this practicum experience, students will move along the supervisory continuum working toward increased independence. Self-analysis of clinical skills and enhancement of acquired skills will be emphasized. Lab class meetings are required. **Prerequisite:** SLP 6102 (1 credit)

**SLP 6110—Externship: Adult**

The adult externship requires a full-time placement (based on a minimum of 32 hours/week for an entire semester) in an adult facility. The student will participate in all activities associated with an SLP position, including assessment and treatment of adults. Students will be supervised by an SLP who is ASHA certified and state licensed and by a university supervisor (site visitor). **Prerequisites:** SLP 6005 and SLP 6102 (1 credit)
(All students choose ONE from the following pediatric externships.)

SLP 6120—Externship: School
The school externship requires a full-time placement (based on a minimum of 32 hours/week for an entire semester) in a school setting. Students will participate in all activities associated with a school-based SLP position, including assessment and treatment of students in a pre-K–grade 12 school setting. Students will be supervised by an ASHA-certified, state-licensed school-based SLP and by a university supervisor (site visitor). Prerequisites: SLP 6005 and SLP 6102 (1 credit)

SLP 6130—Externship: Pediatric Non-School
The pediatric externship requires a full-time placement (based on a minimum of 32 hours/week for an entire semester) in a pediatric facility. The student will participate in all activities associated with an SLP position, including assessment and treatment of children. Students will be supervised by an SLP who is ASHA certified and state licensed and by a university supervisor (site visitor). Prerequisites: SLP 6005 and SLP 6102 (1 credit)

SLP 6140—Approved Program School Externship
The school externship requires a full-time placement (minimum of 32 hours/week for an entire semester) in a school setting with which NSU has a current legal affiliation. The school externship must be taken by students seeking Department of Education certification in speech-language pathology (SLP). Students will participate in all activities associated with a school-based SLP position, including assessment and treatment of students in a pre-K–grade 12 school setting. Students will be supervised by school-based clinical faculty (SLP) who are ASHA certified and state licensed and by a university supervisor (site visitor). Prerequisites: SLP 6005 and SLP 6102 (1 credit)

Electives
(All students choose TWO of the following.)

SLP 6013—Autism Assessment: A Communication-Based Perspective
This course will provide information about critical issues in assessing communication and language in children and adults with autism spectrum disorders (ASD). This course will focus on implementing effective evidence-based assessment strategies in order to develop appropriate communication goals and strategies for individuals with ASD. Lectures, case reports, and videotaped demonstrations. Prerequisites: SLP 6000 and SLP 6011 (3 credits)

SLP 6014—Autism Spectrum Disorders
This course will provide information and discussions about critical issues in teaching communication and language to children and adults with autism spectrum disorders (ASD). It will focus on implementing effective assessment and intervention strategies as well as developing appropriate communication programs for individuals with ASD. Lectures, case reports, videotaped demonstrations, and hands-on learning activities will be completed. Prerequisites: SLP 6011, SLP 6025, and SLP 6070 (3 credits)

SLP 6021—Cognitive Communication Disorders
This course provides a knowledge base for adult and pediatric, acquired and developmental, cognitive communication disorders. Topics include attention, memory, reasoning/problem solving, executive function, learning, processing, and language. The diagnosis and treatment of these deficits in patients at many levels of recovery will be discussed. Prerequisites: SLP 6011 and SLP 6020 (3 credits)

SLP 6037—Craniofacial Anomalies
This course provides a study of etiology, assessment, and remediation of communicative impairments in children and adults with craniofacial anomalies. Specific emphasis will be placed on articulatory and resonance disorders resulting from cleft lip and palate and velopharyngeal insufficiency and incompetence. Prerequisite: SLP 6030 (3 credits)

SLP 6045—Augmentative and Alternative Communication in Educational Settings
This course focuses on the implementation of augmentative and alternative communication (AAC) in educational settings. Learners will gain an understanding of the legal foundations of providing AAC devices and services in school settings. The course addresses strategies for AAC services that can be used to provide access to the general education curriculum for students with significant communication challenges. Language assessment and intervention strategies for AAC communicators are discussed. Issues and strategies to teach reading and writing skills are presented along with strategies for facilitating the development of social skills and friendships. Prerequisite: SLP 6025 (3 credits)

SLP 6057—Medical Aspects of Communication Disorders
The emphasis of this course will be to enhance the student's understanding of the relationships between speech-language pathologists, medical disciplines, and allied health disciplines. Understanding medical terminology, governing bodies of health care organizations, medical ethical dilemmas, and report writing for the medical model of treatment will be significant focuses of this course. Prerequisite: SLP 6015 (3 credits)
SLP 6080—Directed Research
This course provides students with an opportunity to develop clinically relevant research skills and gain hands-on experiences with research practices. Students work collaboratively with selected faculty members to plan and conduct their research projects. The scope and depth of the project varies according to the number of credits for which the course is taken. Students must secure faculty permission in advance of registering for this course. **Prerequisite:** SLP 6070 (1–6 credits)

SLP 6201 and SLP 6202—Special Topics
This course offers advanced study of selected theoretical, clinical, or professional issues in speech pathology and audiology. It may be taken for credit, CEU, or recertification. (1–3 credits)

**Doctor of Speech-Language Pathology (SLP.D.) Program**

The Department of Speech-Language Pathology offers the Doctor of Speech-Language Pathology (SLP.D.) degree program. The post-master's SLP.D. degree program is a rigorous and scientifically based, 53-credit, academic curriculum that is designed to enhance the continued academic education of speech-language pathologists pursuing an advanced doctoral degree.

Within the curriculum, the faculty incorporates current research, ethical decision-making, and models of best practice to foster knowledge, leadership, problem-solving skills, and research. Doctoral students are encouraged to analyze, synthesize, and apply research-based theory to their current work environment and through the development of the applied dissertation.

The program fulfills a commitment to the field of speech-language pathology by providing practicing clinicians with a variety of forums to expand their breadth of knowledge and clinical skills. It does this by allowing a flexible schedule for obtaining doctoral education and providing an environment that nurtures the development of current practitioners and future leaders.

**Admission Requirements**
Prospective students are selected by the Committee on Admissions, which considers the overall qualities of applicants and their suitability for this course of study. Areas of consideration include application content, academic record, ASHA certification and state licensure, letters of recommendation, and a personal interview. A personal interview is required with two members of the Committee on Admissions.

The Department of Speech-Language Pathology has the following requirements for applicants.

- Prior to matriculation, applicants must have completed a master's degree in Speech-Language Pathology from a regionally accredited college or university and a CAA accredited program.
- Applicants must obtain a cumulative master's degree GPA at or above a 3.2 on a 4.0 scale to be eligible for admission.

The university reserves the right to modify any requirements on an individual basis as deemed necessary by the dean of the College of Health Care Sciences. The college reserves the right, and the student, by his or her act of matriculation, concedes to the college the right to require his or her withdrawal any time the college deems it necessary to safeguard its standards of scholarship, conduct, and compliance with regulations or for such other reasons as are deemed appropriate. The dean and the chair of the speech-language pathology department reserve the right to require the student’s withdrawal at any time for the above-mentioned reasons.

**Application Procedures**
All applicants must submit or be responsible for the submission of

1. a completed admission application packet, including a $50, nonrefundable application fee made payable to Nova Southeastern University
2. official transcripts sent directly from all previously attended undergraduate, professional, and graduate institutions to
   Nova Southeastern University
   Enrollment Processing Services
   College of Health Care Sciences
   Doctor of Speech-Language Pathology (SLP.D.) Program
   3301 College Avenue, P.O. Box 299000
   Fort Lauderdale, Florida 33329-2282

3. an evaluation for U.S. institutional equivalence for all coursework from international institution(s), if applicant attended or is a graduate of any international institution(s)

4. Coursework taken at foreign institutions must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

   World Education Services, Inc.
   Bowling Green Station
   P.O. Box 5087
   New York, New York 10274-5087
   (212) 966-6311 • wes.org

   Josef Silny & Associates
   7101 SW 102 Avenue
   Miami, Florida 33173
   (305) 273-1616 • (305) 273-1338 fax • jsilny.com

   Educational Credential Evaluators
   P.O. Box 514070
   Milwaukee, Wisconsin 53203-3470
   (414) 289-3400 • ece.org

It is the applicant's responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to NSU's Enrollment Processing Services.

5. a complete résumé or CV

6. two professional letters of recommendation by two different individuals who can attest to the applicant's ability to succeed in a doctoral program

7. valid documentation of the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) and a copy of his or her current state SLP licensure

8. written responses to questions/essays provided in the application

9. a test score report showing that the applicant received a scaled score 391–396 on the Miller Analogies Test (MAT) or GRE scores of 1100 (combined Verbal and Quantitative scales only)

   The test must have been taken within the past five years.

10. All applicants must have a personal interview and must show evidence of computer skills through coursework or self-study prior to the end of the first term. Students may obtain instruction through the NSU Student Microcomputer Laboratory or other training facilities.

Tuition and Fees

Doctor of Speech-Language Pathology tuition for 2016–2017 (subject to change by the board of trustees without notice) is $1,195 per credit hour. An NSU student services fee of $1,050 is required annually. Tuition for 2016–2017 will subsequently be posted on our website (healthsciences.nova.edu/slp/doctor-speech-language-pathology.html).

Requirements for Graduation

To complete the Doctorate in Speech-Language Pathology program a student must

• attend the mandatory summer residency
• complete all required coursework
• attain an overall 3.0 GPA
• complete an applied dissertation
• submit a degree application form and payment of diploma fee
• fulfill all financial obligations to the university

All students must submit a degree application to nova.edu/registrar/instructions.

*Replaces ARC 8913 Research Elective.
Applied Dissertation (12 credits)

The applied dissertation is a detailed, accurate, and cohesive account of a scholarly investigation designed to answer a research question directed toward the improvement of practice in the field of speech-language pathology. Research is distinguished by a theory-to-practice model encompassing a diversity of disciplines. Each student is assigned a faculty committee to facilitate and supervise the process.

There are three benchmarks in the completion of the applied dissertation: (1) the concept paper, (2) the dissertation proposal and Institutional Review Board (IRB) approval, and (3) the final report.

Continuing Dissertation Services

If the program is not completed within 24 months, continuing dissertation services will begin on the 25th month. Students must enroll in ADS 8090 each semester between the 25th and 36th months of their program. In addition, students must enroll themselves in ADS 8091 each semester beginning the 37th month of their program in order to receive dissertation services from their committee chair and committee member until the completion of their applied dissertation.

Doctor of Speech-Language Pathology (SLP.D.) Course Descriptions

Year One

Fall Semester (5 credit hours)

SLPD 7000—Technology and Instrumentation in Communication Sciences

This course presents advanced applications in the use of computer hardware and software in communication sciences and disorders. Doctoral candidates will receive hands-on experience in the use, application, and configuration of software for distance-learning technologies for management of clients and for business issues. (1 credit)

SLPD 7030—Gerontology

This course will provide students with an overview of gerontology. The older adult population often present with complex, interacting issues. Thus, a holistic approach to patient care will be considered, encompassing biological, social, psychological, and cultural aspects related to aging. Analysis of day-to-day functioning of the aging patient will be covered. An emphasis will be placed on differentiation between normal aging processes and pathological changes related to speech pathology and communication disorders. Learning will take place via class lectures and discussions, experimental exercises, written case studies, student presentations, and panel discussions. Discussion of ethical issues related to aging will augment the learning process. (2 credits)

SLPD 7075—Counseling

Emphasis is on counseling approaches for use with clients with communication disorders and/or their families. Doctoral candidates will explore theories of counseling with an emphasis on management of individuals with communication disorders and their families. Doctoral candidates will experiment with different approaches to interacting with clients and their families individually and in groups. The cultural impact on the counseling process will be addressed. Doctoral candidates will participate in role-play situations for use with clients demonstrating a variety of audiological and/or speech-language problems. (2 credits)
Winter Semester (5 credit hours)

SLPD 7080—Business Management and Leadership
Doctoral candidates will learn business management principles as they relate to the conduct of speech-language or related professional practice in a variety of settings. Legal and ethical issues in practice management will be covered. Doctoral candidates preparing for personal and professional development will assess the skills and behaviors of the leader of change agent in terms of their own potential for growth and future leadership positions. (2 credits)

SLPD 7220—Advanced Seminar in Voice and Swallowing
This course is a doctoral-level course exploring best practices in voice and swallowing disorders. It is not designed to develop voice and swallowing clinicians, nor is it designed to impart the full breadth of information available in the areas of voice and swallowing disorders. Rather, this course is designed to enhance the students’ comprehension of the specialty areas of voice and swallowing disorders that were taught to them at the master’s degree level, expand their knowledge base of best practices in voice and swallowing disorders, and develop a working sense of the scope of practice in voice and swallowing. (3 credits)

Summer Semester (8 credit hours)

HPH 7400—Research Design
This course will provide students with a simple understanding of basic methods and approaches used in health care research. A major emphasis of the course will be on the conceptualization and design of research studies. The course will cover ethics, formulation of research questions, study design, reliability, validity, sampling, measurement, and interpretation of research findings. It will prepare students to critically evaluate published literature, and to design sound research studies. The course will be both theoretical and applied. Students will be challenged to apply the theoretical concepts presented in the classroom and in the readings to design a study to address a health-related issue of their choice. (3 credits)

HPH 7410—Qualitative Research Design
This course will focus primarily on the knowledge and skill competencies needed to conduct qualitative research successfully. In this pursuit, students will immerse themselves in the epistemological, theoretical, ethical, methodological, and procedural understanding of qualitative research. They will apply this knowledge to the conceptualization and conduct of qualitative research, report the findings of the research in the form of a research article, and appraise the quality of such qualitative research products. Upon completion of the course, students will demonstrate that they have mastered the competencies needed to create, plan, and complete a qualitative research dissertation. (3 credits)

ARC 8966—Applied Dissertation Seminar I—Concept Paper
The content of Applied Dissertation Service I—Concept Paper focuses on developing a preliminary literature review and formulating research questions. The committee chair and committee member roles are discussed. This service will culminate in the completion of the first corresponding benchmark: the concept paper. Credit for this seminar will be assigned following approval of the concept paper. (2 credits)

Year Two

Fall Semester (8 credit hours)

SLPD 7060—Genetics
This course will provide students with an overview of genetics. Doctoral candidates will be exposed to a general overview of genetics and investigate the spectrum of genetic syndromes common to clients with communication disorders. Doctoral candidates will study the embryologic development with an emphasis on normal and abnormal or interrupted development at various stages and outcomes. (2 credits)

SLPD 7220—Neuroscience/Neuropsychology and Communication Sciences
Neurological foundations of speech-language and cognitive disorders will be presented. The emphasis will be a study of neuropathological conditions and the speech-language disorders that result from these conditions. (3 credits)

SLPD 7300—Biostatistics I
The application of quantitative techniques has expanded rapidly in medical decision-making. The emphasis on evidence-based health care means that health care workers must be able to evaluate the results from published health care research studies. This course is the first of two courses designed to provide students with knowledge of quantitative techniques. The course will cover descriptive statistics; parametric, group-comparison statistics; and basic, nonparametric statistics. It will also provide an introduction to linear modeling. (3 credits)

Winter Semester (7 credit hours)

SLPD 7070—Pharmacology
The goal of this course is to introduce the doctoral candidates to the advanced science and clinical pharmacology that impacts the practice of speech-language pathology. The clinical use and understanding of the pharmacodynamics, pharmacokinetics, and the potential positive and negative outcomes of medications will be emphasized. Lectures, videos, and hands-on learning activities will be explored during the course. Doctoral candidates will learn the general principles of drug action, particularly as related to communicative function. The classes of drugs used in clinical practice will be examined
with emphasis on activity, mode of action, side effects, toxicity, and drug interactions. Case studies in the fields of speech-language pathology and audiology will be presented. (2 credits)

**Research Elective**

Students have the opportunity to select one of the three courses listed below, related to the research area of their dissertation topic. (3 credits)

**HPH 7310—Biostatistics II**

The aim of this course is to enable students to appreciate the richness of statistical science and to invite them to the concept of probabilistic thinking. Statistics is the science of the future. Any technique that they are going to learn will help them to understand the unknown better, and in turn, will increase their success in other courses and in future professional careers. Principles of statistical inference build upon the course of Biostatistics I. As such, a prerequisite for enrolling in this course is satisfactory completion of Biostatistics I. The goals of this course are threefold: (1) introduce the basic concepts of probability and methods for calculating the probability of an event; (2) assist students in developing an understanding of probability theory and sampling distributions; and (3) familiarize students about inferences involving one or two populations ANOVA, regression analysis, and chi-square tests. **Prerequisite:** HPH 7300 Biostatistics I (3 credits)

**HPH 7700—Test and Measurement**

This course provides a foundation in the basic principles of measurement with a focus on how to assess and control for error through research design methods and statistical analysis. Students will explore test construction and methods and parsimonious data analysis methods to develop an understanding for designing instruments and assessment tools. A focus on issues specific to measurement error in the medical sciences will also be examined throughout the course. (3 credits)

**HSP 9002—Survey Methodology**

This course introduces students to a set of principles of survey methodology that are the basis of standard practices in the field. It provides guidelines for developing survey objectives, designing survey studies, sampling respondents, and administering surveys. Emphasis is on the skills and resources needed to design and conduct a survey. (3 credits)

**Summer Semester (8 credit hours)**

**SLPD 7210—Advanced Seminar in Pediatric Development**

Theories and application of cognitive, social, psychological, and cultural development of children and adolescents will be examined. Current thinking will augment classical theory. Application of current thinking as well as therapeutic, teaching, and care-giving practices stemming from these ideas will be stressed. (3 credits)

**ARC 8967—Applied Dissertation—Proposal**

The content of Applied Dissertation Service II—Dissertation Proposal emphasizes the formulation and writing of the dissertation proposal and the process for Institutional Review Board (IRB) approval. Methodology and content for each of the proposal chapters are defined, including a thorough discussion of the role of the literature review to support or refute the dissertation topic. This service, focusing on scientific inquiry, will culminate in the completion of the second corresponding benchmark: the applied dissertation proposal. Credit for this seminar will be assigned following approval of the proposal. **Prerequisite:** ARC 8966 (5 credits)

**Year Three**

**Fall Semester (7 credit hours)**

**SLPD 7250—Advanced Seminar in Augmentative and Alternative Communication (AAC)**

This study area provides a discussion of the critical issues in augmentative and alternative communication and assistive technology, with a focus on self-determination, family-centered practices, and AAC outcomes. Students will gain experience with non-electronic communication displays, various input devices, and low-tech communication devices, as well as high-technology voice output communication aids. Current issues in ethics, funding, and the impact of culture on AAC are presented. A discussion of recent trends and future needs, as well as strategies for keeping up with new technology and a rapidly expanding knowledge base will be included. (3 credits)

**SLPD 7040—Supervision**

The identification and analysis of the processes of supervision along the continuum of supervision from support personnel to peer will be examined. Topics will include planning and executing the supervisory conference, data collection procedures, and evaluation. The research in the field of supervision will be examined with an emphasis on practical application. The impact of cultural diversity on supervision will be addressed. (3 credits)

**ADS 8090—Applied Dissertation Services I**

The applied dissertation is a detailed, accurate, and cohesive account of a scholarly investigation designed to answer a research question directed toward the improvement of practice in the field of speech-language pathology. Research is distinguished by a theory-to-practice model encompassing a diversity of disciplines. Each student is assigned a faculty committee to facilitate and supervise the process. (0 credits)
Winter Semester (5 credit hours)

ARC 8968—Applied Dissertation—Final Report
Applied Dissertation Service III involves data collection and implementation, the applied dissertation (i.e., final report), and the final approval process. Content and format issues, as well as recommendations for further research, are highlighted. Dissemination of the dissertation and possible outlets for publication are covered. This service will culminate in the completion of the third corresponding benchmark: the applied dissertation. Credits for this service will be assigned following approval of the applied dissertation. Prerequisite: ARC 8967 (5 credits)

ADS 8091—Applied Dissertation Services II
This course provides dissertation services for continuing doctoral students previously enrolled in ADS 8090 who did not complete the applied dissertation. ADS 8091 is also for currently enrolled students who are entering the 37th month of the doctoral program. Students are responsible for registering for ADS 8091. Service fees will apply. (1 credit)
College of Medical Sciences
Mission Statement
The mission of the College of Medical Sciences is to train students in the basic medical sciences and to prepare them for careers in health care and higher education. In accordance with this mission, the College of Medical Sciences offers a Master of Biomedical Sciences degree and provides basic science instructors for the colleges within the Health Professions Division.

Administration
Harold E. Laubach, B.S., M.S., Ph.D.
Dean
Lori B. Dribin, B.A., M.S., Ph.D.
Assistant Dean for Student Affairs

Degree Programs
In line with its mission, the College of Medical Sciences currently offers a Master of Biomedical Sciences (M.B.S.) degree program.

Accreditation
While there is no specific accreditation process for basic science or medical sciences, this portion of our educational process has always been evaluated by visiting accreditation teams of the several professions and has always received highest grades and commendation.

Admissions Requirements
In order to be considered for admission into the master's program, the student must meet the following requirements:

- completion of a bachelor's degree from a regionally accredited college or university
- completion of 3 semester hours with a minimum 2.0 grade point average in biochemistry
- completion of 8 semester hours with a minimum 2.0 grade point average in each of the following: general biology, general chemistry, organic chemistry, and general physics, all with laboratory, as well as six semesters of English
- a minimum cumulative GPA of 2.5 on a 4.0 scale.
- submit scores from one of the following: the Medical College Admission Test (MCAT) or the Dental Admission Test (DAT)

Scores may not be more than three years old.
It should be noted that many criteria, in addition to academic credentials, play a role in the admissions process to professional schools. While the biomedical science program does provide an opportunity for the student to demonstrate academic capability, it does not ensure admission to any professional school. Admission to the graduate program or completion of courses will not guarantee admission to any other program of Nova Southeastern University.

Application Procedures
Candidates for admission must submit
1. a completed application form along with a $50, nonrefundable application fee (Application deadline is April 1.)
2. official transcripts of all undergraduate, graduate, and professional coursework, submitted directly to
   Nova Southeastern University
   Enrollment Processing Services
   College of Medical Sciences, Office of Admissions
   3301 College Avenue, P.O. Box 29900
   Fort Lauderdale, Florida 33329-9905.
3. official reports of standardized test scores such as the MCAT or DAT, not more than three years old
4. one letter of recommendation from a preprofessional advisory committee, or, if this does not exist, two letters may be substituted from instructors who can testify to the student’s characteristics, integrity, application, and aptitude in science (If an applicant has been in the work world for a considerable period of time, two letters of recommendation may be substituted from employers who can testify to the student’s characteristics, integrity, application, and aptitude in science.)

Upon receipt of the completed application and required credentials, the committee on admissions will select those applicants to be interviewed. All applicants who are eventually accepted into the program must be interviewed. An invitation to appear for an interview should not be construed by the applicant as evidence of acceptance.

The dean of the College of Medical Sciences is empowered to evaluate the total qualifications of every student and to modify requirements in unusual circumstances.

The admission process to the graduate program in biomedical sciences is not related in any way to the admission process of any other program at Nova Southeastern University.

Schedule of Application for Admission Cycle
Applications will be accepted starting January 1, and the deadline is April 1 of the year of matriculation.

Tuition and Fees
1. Tuition for 2016–2017 is $39,368 (subject to change by the board of trustees). A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually. A microscope/lab fee of $100 is required of all students for the first year.

2. Acceptance fee is $500. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be deducted from the tuition payment due on registration day, but is not refundable in case of withdrawal. It is payable within two weeks of the applicant’s acceptance.

3. Preregistration fee is $500, due July 15, under the same terms as the acceptance fee.

The first semester’s tuition and fees, less the $1,000 previously paid, are due on or before registration day. Tuition for the subsequent semester is due on or before registration day for that semester. Students will not be admitted until their financial obligations have been met.

Transfer of Credits
Transfer credit of no more than 6 semester hours and waiver policies will be granted at the discretion of the dean, but shall be in accordance with the educational mission and objectives of the College of Medical Sciences.

- Transfers from one graduate college to another graduate college shall require that the last year of instruction be completed within a graduate college.
- Transfer credits shall be given only if the student is eligible for readmission to the previously attended graduate college.

Dismissal and Suspension
Students may be dismissed from the College of Medical Sciences if

- they earn less than an 80 percent grade in more than seven hours of classroom courses in any semester or overall, regardless of whether the course was repeated
- they do not maintain an overall average, at any time, of 80 percent in the program
- they fail a course during any semester
- they fail a course they are repeating
- they exceed a five-year limit for completing all graduation requirements for the Master of Biomedical Sciences program, exclusive of any approved leave of absence or withdrawal in good standing
- in the opinion of the dean, circumstances of a legal, moral, behavioral, ethical, or academic nature warrant such action, or if, in the dean’s opinion, there are factors that would interfere with or prevent them from meeting appropriate professional standards

A student may be suspended (removed from academic enrollment and/or revocation of all other privileges or activities and from the privilege to enter the campus for a specified period of time) if, in the opinion of the dean, the student has not attained the academic level and/or has deviated significantly from the standards of behavior established by the College of Medical Sciences.

Readmission Following Dismissal or Suspension
If a student is dismissed from the College of Medical Sciences, he or she may reapply to the dean for admission and will be considered, provided that he or she can present adequate evidence that the conditions and/or factors that caused the prior poor academic performance have changed significantly so that there is reasonable expectation that the applicant can perform satisfactorily if permitted to resume his or her studies.
Readmission will be solely at the discretion of the dean. The student's prior academic record will remain part of his or her overall academic record and will be recorded on the permanent transcript, but none of the prior grades will be calculated in the new grade point average.

If a student is suspended from the College of Medical Sciences, he or she may return to the college when, in the opinion of the dean, he or she can present adequate evidence that the conditions and/or factors that caused the suspension have changed significantly so that there is a reasonable expectation that the student can perform satisfactorily if permitted to resume his or her studies. The student's prior academic record will remain part of his or her overall academic record and will be recorded on the permanent transcript, but none of the prior grades for courses being retaken will be calculated in the new GPA.

Graduation Requirements
Degrees and/or certificates are awarded when the faculty believes the students have attained sufficient maturity of thought and proficiency as demonstrated by satisfactory completion of a prescribed number of courses.

To receive a degree, a student must fulfill the following requirements:

- be of good moral character
- satisfactorily pass all required examinations
- complete a minimum of 36 semester hours of coursework for the Master of Biomedical Sciences degree
- satisfactorily complete the program requirements for the degree, including all assignments, with a minimum GPA of 80 percent and with no course credit hours below 80 percent
- have satisfactorily met all financial and library obligations
- attend in person the commencement program, at which time the degree is awarded

Course of Study
The master of biomedical sciences is a full-time degree program that is completed in two years. Students are admitted in August every year. The program includes four semesters of on-campus study. Students select an adviser who directs their program of study. Coursework is completed along with students in the professional programs and select coursework is offered by the College of Medical Sciences. Many of the courses offered in the College of Medical Sciences are taught to students within other HPD colleges. Students will enroll in the seminar course each semester.

Student Organization
Student Council—The College of Medical Sciences Student Council is the official voice of all students in the college. The organization is open to all students and welcomes participation from the student body. Its responsibilities include expressing student opinions and dispensing funds for student activities.
The college offers courses for graduate credit within the other Health Professions Division colleges. Each course can be found listed under the appropriate college. Courses are identified by their College of Medical Sciences course number, with specific college-designation and number. Courses are titled in accordance with their titles in their specific college, and may bear no relationship with other courses in this list.

Note: Listed at the end of each entry are lecture clock hours, laboratory clock hours, and semester hours.

### Anatomy
Chairman and Professor: G. R. Conover | Professors: L. Dribin, N. Lutfi, A. Mariassy, C. Purvis, R. K. Yip | Associate Professor: P. Greeman | Assistant Professor: A. Ahmadi | Instructor: D. McNally

**ANA 5500—Neuroanatomy**
The study of the structure and function of the spinal cord, brain stem, and cerebrum. Primary emphasis is on major motor and sensory pathways, spinal and cranial nerves, and integrative mechanisms of the central nervous system. Laboratory studies include the use of CAT and MRI scans. (36-18-3)

**ANA 5713—Histology**
The study of microscopic and submicroscopic anatomy of the cells, tissues, and organs of the body combining lecture and laboratory. (36-36-3)

**ANA 5714—Medical Histology**
The study of the microanatomy of the cells, tissues, and organs of the body; correlating structure; and function. (36-36-3)

**ANA 5723—Neuroanatomy**
The study of the structure and function of the spinal cord, brain stem, and cerebrum. Primary emphasis is on major motor and sensory pathways, spinal and cranial nerves, and integrative mechanisms of the central nervous system. Laboratory studies include the use of CAT and MRI scans. (36-18-3)

**ANA 5727—Gross Anatomy**
The study of the structure and function of the human trunk, extremities, head, and neck. Course includes laboratory dissection of cadavers. (80-72-6)

**ANA 5744—Gross Anatomy**
The study of the structure and function of the human body. Emphasis on the detailed anatomy of the head and neck region. (56-54-5)

**ANA 6700—Special Topics**
Topics and hours to be arranged. (1 to 6 semester hours)

### Biochemistry
Chairman and Professor: R. E. Block | Professors: E. E. Groseclose, K. V. Venkatachalam | Associate Professor: W. G. Campbell

**BCH 5715—Medical Biochemistry**
Introduces functions of the important carbohydrates, lipids, nucleic acids, proteins, and properties of enzymes. Covers the pathways of normal metabolism and their controls. Genetics is introduced. DNA replication, transcription, and translation are discussed. Includes hemostasis with details of coagulation factors, nutrition and biochemical aspects of digestive, visual, musculoskeletal, and endocrine systems. (86-0-5.5)

**BCH 5735—Biochemistry**
Introduces the structures and functions of the carbohydrates, lipids, nucleic acids, and proteins. Covers the pathways of normal metabolism and their controls, as well as nutrition, digestion, and absorption. Includes biochemical aspects of the dental, neural, visual, respiratory, musculoskeletal, and endocrine systems. (72-0-5)

**BCH 6700—Special Topics**
Topics and hours to be arranged. (1 to 6 semester hours)

### Microbiology
Professors: K. Davis, H. E. Laubach | Associate Professor: B. Mayi

**MIC 1710—Dental Microbiology I**
Basic aspects of infections of the oral cavity, oral microbial ecology, and normal flora involving bacteria, fungi, and viruses are covered. (54-0-3)

**MIC 1711—Dental Microbiology II**
Essential principles of innate and acquired immunity including the immune response at mucosal surfaces, immune dysfunctions, and transplantation immunology are presented. (36-0-2)

**MIC 5727—Medical Microbiology I**
Comprehensive study of immunology and of disease producing micro-organisms. Covers the taxonomy, epidemiology, pathogenesis, diagnosis, and treatment of human pathogens. (102-0-5.5)
MIC 5031—Medical Microbiology II
Comprehensive study of disease producing micro-organisms covering the taxonomy, epidemiology, pathogenesis, diagnosis, and treatment of human pathogens. (24-0-1.5)

MIC 6700—Special Topics
Topics and hours to be arranged. (1 to 6 semester hours)

Pathology
Chairman and Assistant Professor: E. Murdoch | Professors: B. C. Jones, A. B. Trif | Assistant Professor: A. Varela

PTH 5500—General Pathology
The course is to provide the student with the basic pathologic processes of human disease, with a scientific foundation in etiology, pathogenesis, morphologic alterations, and effects of disease of the organ systems, and with an emphasis on bone pathology and relevant disease states that affect the orofacial region. (54-0-3)

PTH 6700—Special Topics
Topics and hours to be arranged. (1 to 6 semester hours)

Pharmacology
Chairman and Associate Professor: M. Parker | Professors: T. Panavelil, C. Powell | Assistant Professor: M. Zhao

PCO 5504—Pharmacology I
Introduces basic receptor theory, pharmacokinetics, and basic principles of drug action. Discusses mechanisms of action, indications, contraindications, and adverse reactions of drugs affecting major organ systems. (50-0-4)

PCO 5503—Pharmacology II
A continuation of PCO 5504—Pharmacology I, with particular emphasis on drugs used in oral medicines and dentistry as well as oral manifestations of systemic drugs. (48-0-3)

PCO 6700—Special Topics
Topics and hours to be arranged. (1 to 6 semester hours)

Physiology
Chairman and Professor: W. A. Schreier | Professors: H. N. Mayrovitz, S. Taraskevich, Y. Zagvazdin | Associate Professor: L. Lyons | Assistant Professor: A. Mashukova

PHS 5500—Physiology
Physiology covering organ systems, cell function, membrane functions, membrane translocation, electrophysiology, muscle physiology, neurophysiology, and the cardiovascular, renal, respiratory, gastrointestinal, endocrine, and nervous systems. (64-0-4)

PHS 5723—Medical Physiology I
The first semester of a two-semester course covering the study of general physiology (cell function, membrane translocation, electrophysiology, and muscle physiology), the autonomic nervous system, and cardiovascular physiology. (54-0-3)

PHS 5724—Medical Physiology II
The continuation of Medical Physiology I. This semester includes the study of renal, respiratory, endocrine, reproductive, gastrointestinal and nervous systems. (72-0-4)

PHS 6700—Special Topics
Topics and hours to be arranged. (1 to 6 semester hours)

Core Courses
COMS 5702—Seminar
Students and faculty members observe and present research seminars on selected topics. Topics and hours to be arranged. (1 to 4 semester hours)

COMS 6700—Special Topics
Coursework is designed to advance knowledge in a specific area of science. Topics and hours to be arranged. (1 to 6 semester hours)
College of Dental Medicine
Mission Statement

The mission of the College of Dental Medicine (CDM) is to educate students to become competent in all phases of the general practice of dental medicine, and postdoctoral residents to become proficient in their respective specialty fields. The CDM is committed to ensuring graduates’ excellence in the art and science of dental medicine and their commitment to independent, lifelong learning. This mission requires graduates to be knowledgeable in the biological sciences, clinically skilled, technologically proficient, compassionate, and sensitive to the needs of the public. The graduate will be competent to function as a member of, or in conjunction with, an interdisciplinary primary care health team.

The CDM fosters leadership and excellence in dental education through a commitment to:

- recruitment and retention of the highest caliber of self-motivated students, residents, and faculty members
- innovative teaching methods, research, scholarship, professionalism, and ethical principles
- continuing education
- service to the local, national, and international communities
- interdisciplinary research with a focus on biomaterials, regenerative medicine, clinical product testing, public health, and health services research

The CDM has a special commitment to educate students and residents to provide culturally sensitive care to the underserved and special needs populations.

Dental Medicine

If you are considering a career in dentistry, your education will focus on producing a competent, confident, and mature professional. You will be trained to function as a highly qualified primary care practitioner capable of delivering comprehensive dental care to patients of all ages.

For the highly trained and skilled dentist, career opportunities are almost limitless. The options can be fulfilling and rewarding. The skilled dentist may choose to practice individually in urban, suburban, or rural environments; join an established, respected, and successful practice; or may choose public service in governmental agencies or the military. The skilled dentist may opt to specialize with additional advanced education in such fields as endodontics, oral pathology, oral surgery, orthodontics, pediatric dentistry, periodontology, prosthodontics, public health dentistry, or oral radiology.

For rewards so great, the training is extensive and complete. The nationally recognized faculty of Nova Southeastern University College of Dental Medicine (NSU-CDM) will prepare you to take your place as a leader among oral health care providers. A dynamic career awaits a committed individual.
Accreditation
Our predoctoral programs in dentistry and postdoctoral programs in advanced education in general dentistry, endodontics, orthodontics, oral and maxillofacial surgery, periodontology, pediatric dentistry, and prosthodontics are accredited by the Commission on Dental Accreditation. The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611.

Facilities
The College of Dental Medicine uses the facilities of a $75 million physical plant of the university’s Health Professions Division. A separate building consisting of 70,500 square feet of space is for the sole use of the College of Dental Medicine and houses a clinic providing modern dental care; a postgraduate student dental clinic; a faculty intramural practice; a clinical simulation laboratory; laboratory facilities to support the clinics; seminar rooms; research laboratories; and offices for the dean, faculty members, administration, and staff members.

Predoctoral Program

Admissions Requirements
The College of Dental Medicine selects students based on preprofessional academic performance, Dental College Admission Test (DAT) scores, personal interview, written application, and letters of evaluation.

1. Prior to matriculation, applicants must have completed a minimum of 90 semester hours of coursework at a regionally accredited college or university. Not more than 60 semester hours from community or junior college will be applied to the 90-semester hour minimum.

2. Students should have a cumulative grade point average (GPA) of 3.25 or higher on a 4.0 scale. In addition, students should have a science grade point average of 3.25 or higher on a 4.0 scale. Students must have earned a grade of 2.0 or better in each of the following required courses:

   • Biology with lab (8 semester hours)
   • Chemistry with lab (8 semester hours)
   • Organic chemistry with lab (8 semester hours)
   • Physics with lab (8 semester hours)
   • Biochemistry (3 semester hours)
   • Microbiology (3 semester hours)
   • English (6 semester hours)

Suggested Additional Preparation
Courses should be selected to give students as broad and liberal an education as possible. However, applicants are encouraged to take these specific upper division courses in advanced sciences: anatomy, physiology, cell biology, molecular biology, histology, genetics, and immunology.

Courses in social sciences, principles of management, accounting, communication, foreign languages, art, and sculpture may contribute to a broad educational background.

Upon review of a student’s individual record, the Committee on Admissions may require additional coursework and testing as a condition of acceptance. The dean may evaluate an applicant’s qualifications and modify requirements in unusual circumstances. Inquiries should be directed to

Nova Southeastern University
Health Professions Division
Dental Admissions
3200 South University Drive
Fort Lauderdale, Florida 33328-2018
(954) 262-1101 • 877-640-0218

Transfer of Credit Policy
Circumstances may warrant that a student enrolled in one dental school seeks to transfer to another institution. Credits may only be transferred from a dental school accredited by the Commission on Dental Accreditation. The Office of the Associate Dean for Academic Affairs will evaluate a prospective transfer student’s coursework, which must be comparable to that of Nova Southeastern University College of Dental Medicine (NSU-CDM).

   • Transfer students from another dental school will be required to complete, at minimum, their last two years of instruction at the college granting the dental degree (i.e., NSU-CDM).

Transfer credits will be given consideration based upon the student’s academic standing, as well as documentation from the dean or dean’s designee of previous dental school(s).

   • Credit is only given for completed courses with a grade of 70 percent (C) or better from the applicant’s previous dental school(s).
Any dental student wishing to apply for transfer to Nova Southeastern University College of Dental Medicine must
1. make a formal application to Nova Southeastern University College of Dental Medicine
2. meet all the predoctoral admission requirements, which include submitting official transcripts of all college work (including dental school transcripts); DAT scores; National Board scores, if taken; and two letters of evaluation. (No transfer student will be accepted without an interview.)
3. be in good standing at the student’s current institution, as documented by a letter from the dean of that institution
4. supply a letter of recommendation from a faculty member of the transferring dental school
5. supply a written statement outlining the reasons for the request for transfer

Transfer applicants can refer to the NSU website for the Transfer Credit for Graduate and Professional Programs Policy. Decisions on transfers are made by the dean’s office. The decision will be based on factors which include, but are not limited to, academic record, circumstances leading to the transfer request, available space, and compliance with admissions standards.

Application Procedures
1. Nova Southeastern University College of Dental Medicine uses the American Association of Dental Schools Application Service (AADSAS). AADSAS takes no part in the selection of students. The application deadline for the AADSAS application is December 1, 2016, for the class entering August 2017.

Applications are available from
- American Association of Dental Schools Application Service (AADSAS)
  1625 Massachusetts Ave., NW
  Suite 600
  Washington, D.C. 20036-2212
  (202) 667-1886 • 800-353-2237

Applicants may also obtain their application through adea.org. Candidates may choose to either fill out an electronic application or download a paper application.

Materials to be mailed to AADSAS include the following:
- AADSAS application
- an official transcript from the registrar of each college or university in which the student was enrolled (mailed directly by the college to AADSAS)
- Dental College Admission Test (DAT) scores
- an evaluation by a preprofessional health adviser or committee from the applicant’s undergraduate institution. If this evaluation cannot be provided, three individual letters of evaluation are required from undergraduate instructors, two from science instructors, and one from a liberal arts instructor. If possible, these letters should be from faculty members who know the applicant’s scholastic abilities and personal character. Otherwise, they should be from people (nonrelatives) who can provide an evaluation to the Committee on Admissions.
- a letter of evaluation from a dentist is highly recommended but not required.

2. The applicant will be required to provide the following materials to the Office of Admissions by December 31:
- the supplemental application (electronically submitted to the College of Dental Medicine)
- a nonrefundable application fee of $50

Upon receipt of the completed application and the required credentials, the Committee on Admissions will select applicants for interview. Those selected will be notified in writing of the time and place. All applicants who are admitted by the college must be interviewed, but an invitation to appear for an interview should not be construed as evidence of acceptance. Notice of acceptance or other action by the Committee on Admissions will be on a “rolling” or periodic schedule; therefore, early completion of the application is in the best interest of the student.

Final official transcripts, covering all of the applicant’s work, must be forwarded to Nova Southeastern University, Enrollment Processing Services, College of Dental Medicine Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

Incomplete applications will not be considered. If your file will not be complete prior to the deadline, please attach a statement to the NSU-CDM Supplemental Application for Admission explaining what documents will be submitted after the deadline and the reason for their delay. Decisions to review late applications are at the discretion of the Committee on Admissions.

Tuition and Fees
- Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $63,597 for Florida residents and $64,106 for out-of-state students. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually. Eligible students must request in-state tuition on application. For tuition purposes, a student’s Florida residency status
(in-state or out-of-state) will be determined at initial matriculation and will remain the same throughout the entire enrollment of the student at NSU. Accordingly, tuition will not be adjusted as a result of any change in residency status after initial enrollment registration.

- Acceptance fee is $1,000. This fee is required to reserve the accepted applicant’s place in the entering first-year class. This advance payment will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. Candidates accepted on or after December 1 have 30 days to pay their acceptance fee. Candidates accepted on or after January 1 have 30 days to pay their acceptance fee. Applicants accepted on or after February 1 are required to submit their acceptance fee within 15 days. Applicants accepted after April 15 must pay their acceptance fee immediately.

- Preregistration fee is $1,000 and is due April 1, under the same terms as the acceptance fee.

- A microscope fee of $125 per year is required of all four-year predoctoral program students.

The first semester’s tuition and fees, less the $2,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

**Expenses and Financial Aid for Four-Year Predoctoral Programs**

Students should anticipate the following approximate expenses for books and learning materials:

- first year—$2,000
- second year—$1,800
- third year—$1,700
- fourth year—$1,600

Students should anticipate the following approximate expenses for instruments and equipment:

- first year—$13,000
- second year—$10,200
- third year—$4,200
- fourth year—$3,200

It is extremely important that applicants be committed to meeting their financial responsibilities during their four years of training. This should include tuition, living expenses, books, equipment, and miscellaneous expenses.

It is mandated that each student carry adequate personal medical and hospital insurance. Students may avail themselves of the medical and hospital insurance plans obtainable through the university.

Students will need to access an electronic device to meet program requirements. The university has computer labs; however, it is recommended that students have an electronic device of their choice.

**International Dental Graduate Program**

The College of Dental Medicine has a limited number of openings for graduates of non-U.S. dental schools who wish to earn a U.S. dental degree in order to qualify for licensure in the United States.

**Admissions Requirements**

The College of Dental Medicine selects students based on academic records, letters of evaluation, a computer-generated minimum score of 80 in the Test of English as a Foreign Language (TOEFL), a score of 6.0 on the International English Language Testing System (IELTS), or a score of 54 on the Pearson Test of English—Academic; a pass score on Part I of the National Board Dental Examination; a translated GPA of the American equivalent of a 3.0; a personal interview; a psychomotor bench test; and a clinical case presentation. The psychomotor bench test and clinical case presentation may include the following: Canadian wax carving examination, typodont tooth preparation and restoration in amalgam, and typodont tooth preparation for a full metal crown. The clinical case presentation will consist of an oral presentation related to a clinical scenario. Procedures in the bench test are subject to change.

In order to participate in the bench test, a qualifying score on the TOEFL, IELTS, or Pearson Test of English—Academic exam and the National Board of Dental Examination, Part I, must be received by the Office of Admissions prior to the date of the bench test examination. All materials needed for the above will be provided by NSU-CDM. The fee for this psychomotor bench test and clinical case presentation will be $2,500. This fee is in
addition to the tuition for the IDG program, should the applicant be selected for admission.

In order to qualify, the applicant must have received, prior to matriculation in this International Dental Graduate Program, a D.M.D., D.D.S., or their equivalent, from a non-U.S. dental school.

**Application Procedures**

1. The applicant should mail the following materials to the Enrollment Processing Services (EPS) by January 1.
   - the completed College of Dental Medicine application form for the International Dental Graduate Program
   - a nonrefundable application fee of $50
   - applicant’s official score from the Test of English as a Foreign Language (TOEFL), if applicable
   - applicant’s official score from the International English Language Testing System (IELTS), if applicable
   - applicant’s official score from the Pearson Test of English—Academic, if applicable

2. The applicant must arrange for one official transcript to be sent directly to the EPS by January 1, 2017, ONLY if coursework was taken at a U.S. institution. Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.
   - World Education Services, Inc.
     Attn: Documentation Center
     Bowling Green Station
     P.O. Box 5087
     New York, New York 10274-5087
     (212) 966-6311 • wes.org
   - Josef Silny & Associates, Inc
     7101 SW 102nd Avenue
     Miami, Florida 33173
     (305) 273-1616 • (305) 273-1338 fax • jsilny.com
   - Educational Credential Evaluators, Inc.
     P.O. Box 514070
     Milwaukee, Wisconsin 53203-3470
     (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Dental Medicine Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

3. Please request that the secretary of the National Board of Dental Examiners forward your scores for Part I and Part II (if taken) of the examination to the Office of Admissions.

The National Board of Dental Examiners is located at 211 East Chicago Avenue, Chicago, Illinois 60611.

4. Three letters of evaluation are required. They must be completed by dental school faculty members who are well acquainted with the applicant’s abilities or by individuals who can provide information relevant to the applicant’s potential.

All materials should be sent to

Nova Southeastern University
Enrollment Processing Services
College of Dental Medicine, Office of Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

**Tuition and Fees**

- Tuition for 2016–2017 (subject to change by the board of trustees without notice) is $68,822.
- A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.
- Acceptance/Preregistration fee is $2,000. This fee is required to reserve the accepted applicant’s place in the entering, first-year, international, dental graduate class. This advance payment will be deducted from the tuition payment due upon registration, but it is not refundable in the event of withdrawal.

The first semester’s tuition and fees, less the $2,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

**Expenses and Financial Aid for Three-Year Predoctoral Programs**

Students should anticipate the following approximate expenses for books and learning materials:

- first year—$1,800
- second year—$1,700
- third year—$1,600

Students should anticipate the following approximate expenses for instruments and equipment:

- first year—$20,200
- second year—$3,200
- third year—$3,200

Students will need to access an electronic device to meet program requirements. The university has computer labs; however, it is recommended that students have an electronic device of their choice.
It is extremely important that applicants be committed to meeting their financial responsibilities during their three years of training. This should include tuition, living expenses, books, equipment, and miscellaneous expenses.

It is mandated that each student carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

For all predoctoral students, the purpose of the Student Financial Assistance Program at Nova Southeastern University is to help as many qualified students as possible to complete their health professions education. Various loans, scholarships, and grants are available to qualified students to help ease the high cost of a health professions education. These financial assistance programs are described in a variety of separate university publications.

Opportunities for a limited number of part-time work assignments are available. However, the demands of a program of professional study limit the number of hours a student can work.

Policies Related to Academic and Student Affairs
The policies regarding suspension, dismissal, readmission and other academic and student policy issues are described in the College of Dental Medicine Predoctoral Student Handbook, which is revised, updated, and distributed annually to all predoctoral dental medicine students.

Graduation Requirements
To receive a D.M.D. degree from the College of Dental Medicine, every student must fulfill the following requirements:

• be of good moral character
• have demonstrated the ethical, personal, and professional qualities deemed necessary for the successful and continued study and practice of dental medicine
• have satisfactorily passed all required didactic and clinical courses and clinical rotations in the CDM curriculum
• have demonstrated ongoing and full-time learning of continued and comprehensive patient care, and attended all classes through the last day of his or her predoctoral program
• have satisfactorily completed all clinical requirements, experiences, and competency examinations
• have completed all coursework in the College of Dental Medicine within four years from the date of matriculation (exclusive of any approved leave of absence in good standing)
• have satisfactorily completed all assigned curriculum requirements for the D.M.D. degree with a numerical average of 70 percent or higher
• have passed the National Board Dental Examination (NBDE) Part I.
• have satisfactorily met all financial and library obligations
• have attended, in person, the commencement program at which the D.M.D. degree is awarded
• have complied with any other university or Health Professions Division graduation requirements

Degrees are not awarded solely upon the completion of any prescribed number of courses or upon passing a prescribed number of examinations but, in addition, when the faculty believes that the student has attained sufficient maturity of thought and proficiency. Matriculation and enrollment do not guarantee the issuance of a degree without satisfactorily meeting the aforementioned curriculum and degree requirements.

Course of Study
The College of Dental Medicine embodies a comprehensive didactic and group practice clinic model curriculum designed to graduate competent and compassionate clinicians devoted to comprehensive primary care of each patient.

The college is closely allied with Nova Southeastern University's College of Osteopathic Medicine and the other health professions colleges of the NSU Health Professions Division, in proximity as well as in academic collaboration.

Early introduction into clinical settings under the preceptorship of faculty members will enable the student to achieve a better understanding of the dynamics of the patient/dentist relationship. It also will reinforce classroom instruction in basic and behavioral sciences to allow for management and delivery of quality dental health care as a component of total body health.

Students will be taught the importance of teamwork in an efficient, modern health care delivery system.
### 2016–2017 Curriculum Outline

Calculations based on an 18-week semester (subject to change)

College of Dental Medicine Course Descriptions

Interdisciplinary Biomedical Sciences

Anatomy—Chair and Professor: G. R. Conover | Professors: L. Dribin, N. Lufti, A. Mariassy, C. Purvis, R. K. Yip | Associate Professor: P. Greenman | Assistant Professor: A. Ahmadi | Instructor: D. McNally

CDM 1000—Anatomy Lecture/Laboratory
This course includes a general study of anatomical and functional features of the major systems of the human body with a more detailed study of the anatomy and function of the head and neck regions. Radiographic anatomy is presented in detail throughout the entire course. Laboratory sessions include the study of prosected human cadavers.

CDM 1030—Histology and Embryology Lecture/Laboratory
In this course, the microscopic anatomy of cells, tissues, and organs of the body is presented and correlated with their functions. Basic physiological concepts and relevant areas in pathology are presented. This course includes an introduction to human embryology, with an emphasis on weeks one through eight. The laboratory sessions include the study of tissue specimens with light microscopes.

CDM 1130—Neuroanatomy Lecture/Laboratory
This course will introduce students to structural, functional, and developmental features of the human nervous system with an emphasis on clinical concepts. It serves as an introduction to neurology. Laboratory sessions include the study of human brain and spinal cord specimens and brain scans.

Biochemistry—Chair and Professor: R. E. Block | Professors: E. E. Groseclose, K. V. Venkatachalam | Associate Professor: W. G. Campbell

CDM 1025—Dental Biochemistry and Nutrition
This course includes concepts and principles of biochemistry of normal and pathologic human life processes. In addition, the principles of nutrition, biochemical roles of dietary constituents, digestion, and absorption are discussed.

Microbiology—Professors: K. Davis, H. Laubach, B. Mayi

CDM 1110—Microbiology
Presents basic medical aspects of bacteriology, virology, and mycology, and includes taxonomy, morphology, epidemiology, growth cycles, pathogenesis, and treatment. Emphasizes oral microbial ecosystems and biofilms.

CDM 1111—Immunology
This course presents basic knowledge of the cellular, molecular, and biochemical aspects of the immune system and immune responses, including how the various components integrate and work together to control infectious organisms. It includes how disturbances in the immune system can lead to disease, and how the system can be controlled therapeutically.

Pathology—Chair and Assistant Professor: E. Murdock | Professors: B. Jones, A. B. Trif | Assistant Professor: A. Varela

CDM 1125 and 2125—Pathology I and II
Covers the basic pathologic processes of human disease, with a scientific foundation in etiology, pathogenesis, morphologic alterations, and effects of diseases of the organ systems. Emphasizes bone pathology and relevant disease states that affect the orofacial region.

Pharmacology—Chair and Associate Professor: M. Parker | Professors: T. Panavelil, C. Powell | Assistant Professors: P. Rose, M. Zhao

CDM 2010—Pharmacology I
Introduces pharmacological concepts and principles, clinical indications, contraindications, risks, complications, and toxicity of drugs and pharmacological agents.

CDM 2130—Pharmacology II
Particular emphasis on the drugs and drug interactions important to the dentist as well as the principles and concepts of pharmacology and pharmacological actions and drug interactions.

Physiology—Chair and Professor: W. Schreier | Professors: H. Mayrovitz, P. S. Taraskevich, Y. Zagvazdin | Associate Professor: L. Lyons | Assistant Professor: A. Mashukova

CDM 1120—Physiology
This course reviews the physiological functions and regulation of the major human organ systems. Topics covered include basic cellular physiology, skeletal muscle, the cardiovascular system, the nervous system, the renal system, the respiratory system, the gastrointestinal system, and the endocrine system. Topics with direct relevance to dentistry, oral health, and disease are integrated into the content of the course. Specific examples include structural changes of the cell membranes in pemphigus vulgaris, the effect of local anesthetics on ionic current, and the effects of metabolic imbalances on oral health. The mechanisms
of relevant physiological and pathological processes in a variety of clinical conditions are discussed.

**Behavioral Science**—Adjunct Assistant Professor: M. Fimiani

**CDM 3080—Behavioral Science**
This course provides dental students with interviewing strategies, communication skills and an introduction to the theories and research pertaining to anxiety with specific interventions geared to reduce tension and fear. Students will be exposed to various interviewing and communication techniques as well as theories regarding the etiology of anxiety. Students will gain familiarity with psychological and physiological indices of arousal. It is the goal of this course to acquaint dental students with well established interventions including progressive muscle relaxation, systematic desensitization, biofeedback, hypnosis, and the relationship of anxiety/stress to pain syndromes.

**Department of Cariology and Restorative Dentistry** —

**CDM 1015—Clinical Experience Rotation I**
This clinical rotation in the D1 fall semester provides the student with early exposure and experience in the professional clinical dental environment, including observation of diagnostic methods, dental procedures, and patient-student-faculty interaction. D1 students are instructed in basic dental assisting skills and infection control principles, and may have the opportunity to implement these skills while assisting D3 and D4 students in the CDM predoctoral clinics. The content and experience in this course will be integrated with the content in the following courses: Ethics and Professionalism and Multidisciplinary Introduction to Record Keeping.

**CDM 1016—Clinical Experience Rotation II**
This clinical rotation in the D1 winter and D2 summer semesters gives the student continued and expanded exposure to the clinical dental environment in the CDM clinics. During this rotation, the D1 student’s knowledge of biomedical science, dental procedures, instrumentation, and record keeping is further integrated with the clinical setting. The content and experience in this course will be integrated with the content in the following courses: Ethics and Professionalism and Multidisciplinary Introduction to Record Keeping.

**CDM 1135—Multidisciplinary Introduction to Record Keeping**
This course will give first-year dental students hands-on experience with completing dental treatment records by making entries in a “chart” made for the student’s typodont. The students will participate in clinical exercises to generate their own dental records as well. The content in this course will be integrated with the content in the following courses: Clinic Experience I and II and Ethics and Professionalism.

**CDM 1203—Evidence-Based Dentistry I**
Students will be introduced to the fundamentals of evidence-based dentistry (EBD) and study design. This will include introductory information on EBD and online computer searches for scientific information. Students will learn how to use the main EBD websites and clinical query searches on PubMed. Online databases and search strategies will be presented. Clinical research designs such as case-control, case series, case report, cohort studies, and randomized controlled trial will be introduced. Concepts of study design, research methods, and literature review will be emphasized and critically compared.

**CDM 1155—Integrated Restorative Dental Sciences I Lecture**
The IRDS I lecture course is an integrated program that includes objectives from the following disciplines: dental anatomy, fundamentals of occlusion, biomaterials, cariology, and operative dentistry. This course presents the anatomical and functional differences of teeth, how they relate to each other, and the application of this knowledge to various phases of dentistry. It presents the characteristics differentiating each tooth and the variations that can occur from one patient to the next. The course will introduce concepts of anatomy and normal function of the stomatognathic system. While learning about the medical model of caries management, students will be introduced to dental caries: disease, diagnosis, preventive and remineralization treatments, prognosis, and outcomes. Understanding the role of caries risk assessment in restorative decisions, students will apply principles of minimally invasive dentistry. Students will learn about dental biomaterials, material selection, preparation design, and restoration. The IRDS course integrates the principles from these disciplines in order to prepare students for a comprehensive-care, competency-based, clinical curriculum.
CDM 1156—Integrated Restorative Dental Sciences I Laboratory
The IRDS I laboratory course is an integrated, hands-on program that runs concurrently with the lecture component and includes objectives from the following disciplines: dental anatomy, fundamentals of occlusion, dental biomaterials, cariology, and operative dentistry. This course presents the anatomical and functional differences of teeth, how they relate to each other, and the application of this knowledge to various phases of dentistry. It presents the characteristics differentiating each tooth and the variations that can occur from one patient to the next. The course will introduce concepts of anatomy and normal function of the stomatognathic system. Utilization of wax carving and add-on techniques are introduced. With an understanding of the role of caries risk assessment in restorative decisions and knowledge of the mechanical and physical properties of the dental materials, students will learn principles of cavity preparation; material selection; and proper use of amalgam, alginate, and gypsum. The IRDS I laboratory course integrates the principles from these disciplines in order to prepare students for a comprehensive-care, competency-based, clinical curriculum. Emphasis will be placed on teaching students how to develop the fine psychomotor skills that are necessary to practice dentistry.

CDM 1255—Integrated Restorative Dental Sciences II Lecture
The IRDS II course is an integrated program that includes objectives from the following disciplines: dental anatomy, fundamentals of occlusion, operative dentistry, dental biomaterials, cariology, and fixed prosthodontics. The course will continue building on concepts of anatomy and normal function of the stomatognathic system. While applying cariology principles, students learn about dental biomaterials; material selection; preparation; design; and proper use of amalgam, composite resin, glass ionomers, and casting metals (gold, etc.). This course will introduce the theory and principles of fixed prosthodontics, and its role in the overall treatment of the patient. The IRDS II course integrates the principles from these disciplines in order to prepare students for a comprehensive-care, competency-based, clinical curriculum. Emphasis will be placed on teaching students how to develop the fine psychomotor skills that are necessary to practice dentistry.

CDM 1266—Integrated Restorative Dental Sciences II Laboratory
The IRDS II laboratory course is an integrated, hands-on, simulation program and a continuation of the IRDS I laboratory course. It runs concurrently with the lecture component and includes objectives from the following disciplines: dental anatomy, fundamentals of occlusion, operative dentistry, dental biomaterials, cariology, and fixed prosthodontics. The IRDS II laboratory course integrates the principles from these disciplines in order to prepare students for a comprehensive-care, competency-based, clinical curriculum.

CDM 1357—Case-Based Integrated Restorative Sciences III Lecture and Laboratory
The IRDS III course is a continuation of the fall and winter IRDS courses. Course content from dental anatomy, fundamentals of occlusion, operative dentistry, dental biomaterials, cariology, prosthodontics, and record keeping are integrated into a case-based format utilizing knowledge and critical thinking skills obtained in the fall and winter semesters.

CDM 2025—IDG Integrated Restorative Dentistry Lecture and Laboratory
The lecture course presents the topic of diagnosis and treatment of carious lesions and other hard-tissue defects, principles of direct restorative dentistry, and fundamental concepts in the practice of restorative dentistry. The lecture component, in conjunction with the laboratory component, provides the foundation for the student to utilize the same knowledge and techniques that will be used in clinical application.

CDM 2175—QA/Recare Clinical Rotation I
The D2 student will work together with the Quality Assurance Dental Faculty to perform the treatment completion exams and the annual examination and assessment of recare patients in the Davie Predoctoral Clinic. The student will be required to review the patient chart prior to the appointment and perform a systematic chart review. The student will have the opportunity to observe, record, and evaluate restorations and pathology with faculty member assistance. This clinical experience will allow the student to practice the skills that he or she has learned in the D1 Multidisciplinary Record Keeping course and to continue to observe dentist-patient communication and time management prior to participating in comprehensive patient care clinic.

CDM 2241—Introduction to Comprehensive Treatment Planning
This course is designed to introduce sophomore students to the didactic basis of dental treatment planning while combining and integrating the course didactics with computer training using the electronic health record software system. The course will begin with the patient's screening admission process and will continue with the patient's data collection, including medical and dental histories, the extraoral and intraoral physical examination, and the evaluation of dental radiographs. Ultimately, students will gain a framework of reference from which to build a structured and systematic patient dental treatment plan that will ensure optimal patient care.

CDM 2242—Axium EHR Treatment Planning Module
This course is designed to train the sophomore students to understand and develop dental treatment plans using the electronic health record software system axiUm that
is currently used at NSU CDM. The students will use the knowledge from various dental disciplines to develop treatment plans for patient presentation while learning how to navigate the axiUm program.

CDM 2999—Clinic Prerequisite Orientation
This course will provide the student with clinic operations information, policies, protocols applicable to comprehensive-care clinics, and clinic rotations. Students will be oriented to the expectations of all clinical disciplines as they apply to comprehensive patient care and competency assessment and experiences. Students will also be oriented to the expectations of the Applied Patient Care Foundations courses and will be introduced to practice team leaders and patient care coordinators. Additionally, they will be required to complete recertification of BLS, Infection Control/Exposure Protocol, and technology updates; have passed NBDE Part I; and be responsible for any other clinic-related information, as needed.

CDM 3175 and CDM 4175—QA/Recare Clinical Rotation II and III
D3 and D4 students will perform periodic patient exams, including annual periodontal charting, medical/dental history review and update, caries risk assessment, and necessary radiographs for dental hygiene recare patients at the Davie clinic, and at off-site Comprehensive Care clinics. Students will review charts prior to clinic sessions in order to familiarize themselves with patients’ previous care. Preventive treatment protocols will be reviewed and assessed for patient compliance, and restorative treatment outcomes will be observed and reviewed with faculty members. This will provide students with opportunities to duplicate the periodic dental hygiene treatment/dental exam experience of that in private practice.

CDM 3241—Comprehensive Treatment Planning
This course is designed to continue with the didactics of comprehensive dental treatment planning while integrating computer training using the electronic health record software system. The course will begin reviewing the patient’s screening admission and data collection process and will continue with all the phases and sequencing of dental treatment planning. Practice management and ethical issues in treatment planning will also be discussed during the course. Students will have the opportunity to interact with faculty members and other classmates during patient case-based group discussions and seminars.

CDM 3500—Clinical Restorative Dentistry I
Under direct supervision of faculty members, in a team leader model, the student will incorporate the knowledge gained from didactic courses to provide comprehensive patient care. Following the medical model of caries management and principles of minimally invasive dentistry, the student will provide clinical services and dental restorations for patients using caries risk assessment, diagnosis, prevention, oral hygiene instruction, fluoride, sealants, laser diagnosis, remineralization techniques, tooth whitening procedures, amalgam, resin composites, and glass ionomers. In addition to developing the student’s skills in performing evidence-based restorative procedures, the overlying objectives of this course are restoration to health of the dental patient and the prevention of future dental caries for the patient.

CDM 3000—Applied Patient Care Foundations I
This course is designed to evaluate and assess the student’s ability to provide comprehensive patient care in a professional and ethical manner utilizing sound clinical judgment. Proper patient management skills, including organization, preparedness, and the ability to work independently, will also be assessed. Record keeping and the ability to follow instructions are integral skills evaluated in this course as well.

CDM 4002—Applied Patient Care Foundations II
This course is designed to evaluate and assess the student’s ability to provide comprehensive patient care in a professional and ethical manner utilizing sound clinical judgment. Proper patient management skills, including organization, preparedness, and the ability to work independently, will also be assessed. Record keeping and the ability to follow instructions are integral skills evaluated in this course as well.

CDM 4120—Regional Board Preparation Course
This course consists of a lecture and laboratory series that presents an overview of useful clinical techniques for students who will be taking various regional board dental examinations. The course presents didactic material as well as hands-on clinical simulation of examination parameters for procedures included in various regional board exams. Successful completion of this course should assist students taking regional board exams, but does not guarantee a passing grade on any regional board examination taken by a student.

CDM 4240—Advanced Comprehensive Treatment Planning
This course is designed to build upon the foundations of comprehensive dental treatment planning for application to more advanced treatment planning cases. Students will have the opportunity to interact with faculty members and other classmates during patient case-based group discussions and seminars.

CDM 4500—Clinical Restorative Dentistry II
Under direct supervision of faculty members, in a team leader model, the student will gain more experience in providing comprehensive patient care. Following the medical model of caries management and principles of minimally invasive dentistry, the student will provide clinical services and dental restorations for patients
using caries risk assessment, diagnosis, prevention, oral hygiene instruction, fluoride, sealants, laser diagnosis, remineralization techniques, tooth whitening procedures amalgam, resin composites, and glass ionomers. In addition to developing the student’s skills in performing evidence-based restorative procedures, the overlying objectives of this course are restoration to health of the dental patient and the prevention of future dental caries for the patient.

**CDM 4555—Dental Auxiliary Utilization**
The Dental Auxiliary Utilization (DAU) rotation course is designed to train dental students in the application of the concepts of four-handed dentistry, dental team, and ergonomics learned starting from the D1 year in the effective delivery of dental services in a comfortable and minimum-stress environment. Application of these concepts can later be applied to private practice. The student should become familiar with what is expected and required of the assistant, as well as the requirements for the operator and the assistant to work efficiently and effectively in completing all procedures.

**Department of Community and Public Health Sciences**—Chair, Interim Postgraduate Program Director, and Associate Professor: D. Ede-Nichols | Assistant Professors: R. Block, S. Ellen, F. Slavichak, B. Waterman | Clinical Instructors: A. Bezerra, M. Rampertaap | Adjunct Faculty Members: M. Ben-Shalom, N. Browner, A. Burch, A. Epstein, M. Fimiani, E. Klein, E. Suzuki

The community dentistry curriculum serves to introduce the pre- and postdoctoral student to the underserved population within our community—including patients with developmental, acquired, medical, and mental disabilities and the frail elderly. It also includes ethics, behavioral science, issues related to the dental profession, and practice management. The curriculum integrates the didactic and clinical education by incorporating extramural rotations, externships, community health fairs, and residency programs. In addition, NSU-CDM has created the Institute for Special Needs Dentistry, whose state-of-the-art clinic is located on NSU’s North Miami Beach Campus. The institute allows for the enhancement of clinical training of students while providing much-needed dental care to these underserved populations.

**CDM 1205—Primary Care and Public Health I**
This course will introduce students to fundamentals of public health and its relevance in dentistry. Health care delivery systems, as well as oral health status and disparities across the population, will be discussed. Students will be instructed on legal and ethical principles applied to public health. In addition, students will be given the opportunity to develop their own strategic plan involving a dental health initiative.

**CDM 2085—Introduction to Special Needs Dentistry**
Introduction to Special Needs Dentistry is a didactic course that will define special needs patients, focus on their oral health needs, and present methodology for overcoming the lack of care in this patient population.

**CDM 3090—Introduction to the Dental Profession**
Practice management and organizational theory, economic theory, and practical aspects of managing a dental practice.

**CDM 3140—Special Needs Dentistry**
CDM 3140 is a semester-long didactic course that presents a curriculum that introduces the predoctoral student to the pathophysiology of disabilities. The course will also demonstrate the management tools and techniques necessary for the provision of dental care to this underserved population in both the academic arena and the private practice setting.

**CDM 4060—Practice Management**
The course is a continuum of information supporting the understanding of the dental profession, with an emphasis on the business of dentistry, practice management, and medical/legal issues. Discussions about various practice models, business entities, taxation, accounting, and insurance options will be presented.

**CDM 4611—Community Dentistry Rotation**
The community dentistry rotation is designed to complement the didactic course CDM 3140, presented in the winter semester of the D3 year. D4 students will use the didactic information to evaluate, assess, and provide treatment for individuals with developmental and acquired disabilities, medically and psychologically compromised patients, and the frail elderly. The D4 students will become familiar with the medical chart, responding to requests for dental consult, and the behavioral management issues of treating those with special needs.

**CDM 4700—Extramural Primary Care Rotation**
This course is intended to provide senior dental students with the opportunity to receive instruction in providing patient-centered primary oral health care for underserved populations, including medically compromised patients and those with limited access to oral health services. This presents an opportunity for the students at NSU-CDM to broaden their exposure to providing comprehensive
dentistry in an extramural clinic environment. Students will also better understand the public health context for the care they will be providing. Students will complete a reflective observation activity at the end of their rotation. It may consist of reflective journaling, focus groups (face-to-face or electronic), a presentation, or case writing. This activity is intended to serve as a bridge between experiential and didactic learning, and to demonstrate critical thinking skills to prepare for and learn from service experiences.

CDM 416H—Honors in Special Needs Dentistry
Working alongside postgraduate residents, this elective honors program serves to train interested students in the provision of quality dental care for people with medical, psychological, and physical disabilities utilizing current accepted modalities such as behavior management, conscious sedation procedures and protocols, and operating room exposure.

Department of Diagnostic Sciences—Chair and Professor: M. A. Siegel | Section Vice Chair and Professor: P. Bradley | Professor: I. Velez | Associate Professors: M. Hogge, L. Solomon | Assistant Professors: E. Choi, L. Mejia | Adjunct Professors: J. Arenas, M. Lieberman, S. Mescher, D. Stern, M. Todd

CDM 1160—Oral Histology
This course is designed to provide broad exposure to the basic embryologic development and histology of anatomic structures that form the maxillofacial complex. Lecture and electronic images of the soft and calcified tissues that comprise the oral cavity will be used to illustrate these principles. Clinical procedures that depend on the understanding of these structures will be introduced.

CDM 2110—Radiology
Lecture course with a preclinical laboratory exercise, in order to prepare the student for the performance of clinical oral and maxillofacial radiology technique. Infection control and safety for operator and patient is stressed.

CDM 2120—Oral and Maxillofacial Diagnosis I
Lecture and demonstration course covers extraoral techniques with special emphasis on digital imaging. Lectures cover radiographic interpretation of developmental anomalies, caries, periodontal disease, periapical disturbances, and other anomalies.

CDM 2140—Introduction to Oral Medicine
Didactic course builds on and incorporates the knowledge base gained in the basic medical sciences. Focuses on a comprehensive medical history and physical examination of the head and neck, evaluation of medical laboratory tests, management of the medically compromised patient, medical emergencies, and requirements of the Occupational Safety and Health Administration.

CDM 2280—Internal Medicine for Dentists
This lecture course will expose D2 students to the applied principles of diagnosis of the medically complex patient and the translation of these principles into clinical practice. Students will be exposed to lectures given in a review of systems format. All lectures will present a specific system/disorder with emphasis on definition, epidemiology, pathophysiology and complications, clinical presentation, medical management, and dental management. Concepts of antibiotic premedication and medical consultation will be introduced. Each lecture will reinforce previously encountered concepts of pathology and physiology, translate these concepts into a clinical venue, and then apply dental management techniques that are necessary to safely manage patients in a clinical practice.

CDM 3010—Oral and Maxillofacial Diagnosis II
Didactic course focuses on the etiology, clinical, histologic, and radiographic appearance and treatment of specific disease entities involving the head and neck. Differential diagnosis is emphasized, giving clinical relevance to the discipline.

CDM 3011—Oral and Maxillofacial Diagnosis III
Continuation of CDM 3010, Oral Pathology I, didactic course focuses on the etiology, clinical, and histologic appearance and treatment of specific disease entities involving the head and neck. Differential diagnosis is emphasized, giving clinical relevance to the discipline.

CDM 3020—Oral Medicine
Didactic course continues and builds on the knowledge base gained in the basic medical sciences and Introduction to Oral Medicine. A comprehensive study of both hard and soft tissue lesions manifesting in the oral cavity and related head and neck structures is presented.

CDM 3021—Common Oral Conditions
A continuation of Introduction to Oral Medicine and Oral Medicine. The lectures are presented to develop the skills of interpreting a medical history through head and neck examinations and the dental management of the medically complex patient. The course will discuss the diagnosis and management of common oral and orofacial conditions as well as how to provide safe and effective oral health care for patients with life threatening medical disorders.

CDM 3650 and CDM 4650—Radiology Clinic I and II
Students perform radiographic techniques and interpretations in a clinical setting.

CDM 4020—Clinical Oral Medicine Case Presentations
Clinical manifestations of common systemic disorders are discussed to help students in making a tentative presumption diagnosis and developing a differential
diagnosis. Each student will prepare a PowerPoint presentation on a patient with an oral soft tissue lesion for presentation to his or her class. Self-assessment will be done at that time.

CDM 4170—Oral Manifestations of Disease
A case-based presentation of common conditions and diseases that patients will bring to the general practitioner. The goal is to review the physiology, clinical signs and symptoms, and the modifications to dental treatment that may be necessary. Also to be included are pharmacotherapeutics of common oral conditions, tobacco cessation, and recommendation for referrals to dental specialists.

CDM 4404H—Oral Medicine Honors
This honors course will allow students with a special interest in the discipline of oral medicine to increase their exposure to patient cases involving advanced decision-making and clinical management skills beyond the scope of the predoctoral curriculum.

CDM 425E—Forensic Odontology Elective
Forensic Odontology is an elective course offered to a limited number of D4 students. The course format is didactic and includes a lab component at the Medical Examiner's Office. Topics covered may include human identification, bite marks, mass disasters, and professional training, as well as other subjects.

CDM 426E—Cone Beam CT Elective
The basic concepts of cone beam CT (CBCT) are presented, including navigation through iCATVision software and clinical applications. Diagnosis of radiological findings is reviewed.

CDM 4222—Laser Dentistry (Elective)
The curriculum for this basic-level course includes education in the fundamental principles of laser use in dentistry, the use of lasers in multiple dental disciplines, and safety aspects of laser use.

CDM 2050—Endodontics Lecture
This course is an introduction to the theory and practice of endodontics. It presents the fundamental principles of the treatment of pulpal and periapical disease. Along with CDM 2060, it prepares the student to provide clinical endodontic treatment.

CDM 2060—Endodontics Laboratory
This course is an introduction to the actual treatment procedures required to treat pulpal disease. By carrying out procedures on extracted teeth from each tooth group, this course, along with CDM 2050, prepares the student to provide clinical endodontic treatment.

CDM 2250—Endodontics Clinical Lecture
This course serves to enhance the knowledge and understanding beyond the basic concepts for predoctoral students. The students’ ability to apply these concepts to their own patients and to recognize situations that are beyond their skills, thus requiring referrals, are developed and emphasized.

CDM 3621—Clinical Endodontics I
Junior dental students are taught clinical endodontic treatment of single-rooted and multitrooted teeth (premolars and molars). This includes diagnosing a tooth with pulpal problems as well as sequencing of endodontic treatment in the treatment plan. Proper documentation in the treatment record, anesthesia techniques, patient management, and root canal therapy are also discussed.

CDM 4621—Clinical Endodontics II
Senior dental students display proficiency and knowledge of anesthetic techniques, patient management, and endodontic treatment of single-rooted and multitrooted teeth (premolars and molars). They also manage endodontic emergencies. The completion of competency requirements demonstrates that students have reached the level of “safe starter” to treat basic endodontic cases in the practice of general dentistry.

CDM 400H—Honors Endodontics
The honors program offers students who are beginning their fourth year of dental school the opportunity to apply for honors courses in one of eight different specialties. Candidate selection will be based on the approval of the associate dean of academic affairs and the director of clinics, as well as criteria established by each participating department chair. Students who are selected will take part in postdoctoral-level seminars, case presentations, and research. Additionally, honors students will assist in the diagnosis, treatment planning, and care of complex patients. The specific format of each honors program course will be provided to students at the time their applications are submitted.

CDM 403E—Advanced Elective in Endodontics
This course provides an opportunity for fourth-year students to continue their endodontic experience at a more advanced level. Students will participate in seminars that stress clinical situations and may also attend graduate
surgery, TMJ surgery, pathology, and reconstruction surgery. This includes orthogenic 

Hands-on instruction will be provided chairside. Students 

incorporating pertinent review of the basic sciences. 

tooth extraction will be incorporated logically in sequence, 

year. Formal presentations to review the techniques of 

background begun in the second semester of the sophomore 

CDM 3040—Oral and Maxillofacial Surgery II 

This honors course will expand the clinical knowledge 

and experience of the D4 predoctoral student in oral and 

maxillofacial surgery, including providing the opportunity 

to participate in and be exposed to patients that require 

more difficult surgical extractions or implants and bone-

grafting surgery, as well as those with impacted teeth, 
odontogenic infections, or oral pathologic lesions. Students 

will also be exposed to more complex and modern practices 
in oral and maxillofacial surgery. This includes orthogenic 
surgery, TMJ surgery, pathology, and reconstruction surgery. 

CDM 3507—Clinical OMFS Rotation I 

Third-year students are assigned to clinical rotations to 

observe and to provide surgical treatment for patients 

requiring dentoalveolar surgery and the management of 
odontogenic infections. Proficiency in patient evaluation 

and surgical techniques is stressed. 

CDM 4505—Clinical Dental Emergency Rotation 

The fourth-year student will develop a systematic approach 

for evaluating a patient who presents with urgent dental 

or oral health concerns, acute pain, trauma, bleeding, 
infection, or swelling of the orofacial region. The student 

will complete a work-up of the patient's chief complaint; 
establish a diagnosis; present an emergency treatment 
plan and options; and, with patient-informed-consent, 
provide the treatment or an appropriate referral. Students 
on rotation will participate in a grand-rounds summary 
at the close of each session to review specific patients 

and techniques. 

CDM 4999—Advanced Techniques in Pain and 

Anxiety Control 

The goal of this course is to introduce the wide spectrum 
of pain and anxiety control available in dentistry. During 
this course, the student will establish a basic understanding 
of the additional techniques available to the dental 
practitioner to cope with the problems of anxiety and 
fear commonly found in dental patients. The advanced 
techniques learned are not only used for the purpose of 

aiding the fearful dental patient, but also in prevention of 
medical emergencies in the dental office by attenuating 
the potentially harmful effects associated with the stress 
response. Hands-on instruction will be provided. 

CDM 408H—Honors Program in Oral and 

Maxillofacial Surgery 

Department of Oral and Maxillofacial Surgery—Chair 

and Professor: S. Kaltman | Postgraduate Program and 
Research Director and Associate Professor: S. McClure | 
Predoctoral Director and Assistant Professor: A. Ospina | 
Director of Pediatric Craniomaxillofacial Surgery and 
Associate Professor: J. Portnof | Adjunct Professors: E. 
Lopez, M. Ragan, A. Sciar | Adjunct Associate Professors: 
J. Eisner, G. Freedman, M. Harris, J. Kaltman, K. Kaner, 
R. Katz, T. Koyama, M. Krohn, J. McCain, P. Richman, 
C. Schalit, D. Smith, T. Splaver, T. Tejera | Visiting 
Professors: B. Epker, S. Guttenberg, M. Pikos 

CDM 2040—Pharmacology, Analgesia, and 

Local Anesthesia I 

Didactic, lecture-oriented course that reviews the anatomy 
of the head and neck in relation to administration of local 

anesthesia. Topics covered include the pharmacology 
of local anesthetics and vasoconstrictors. Delivery 

and alternative anesthesia techniques are covered in this 
course. 

CDM 2150—Oral and Maxillofacial Surgery I 

A didactic, lecture-oriented course that is reinforced 
with hands-on practical sessions and demonstrations. 
Fundamentally, the predoctoral program is designed to 
prepare the student in oral and maxillofacial surgery 
as it relates to the practice of general dentistry. 
The major objective of this course is to provide introductory information on the full scope of oral and 
maxillofacial surgery. 

CDM 2170—Pharmacology, Analgesia, and 

Local Anesthesia II 

This is a didactic, lecture-oriented course that is reinforced 
with hands-on practical sessions and demonstrations, 
expanding on the background begun in CDM 2040. Topics 
include a review of local anesthesia techniques and basic 
information about alternative techniques of pain and 
anxiety control, such as oral sedation, nitrous oxide, IV 
sedation, and general anesthesia. 

CDM 3040—Oral and Maxillofacial Surgery II 

Didactic, lecture-oriented course expanding on the 
background begun in the second semester of the sophomore 
year. Formal presentations to review the techniques of 
tooth extraction will be incorporated logically in sequence, 
incorporating pertinent review of the basic sciences. 
Hands-on instruction will be provided chairside. Students 
will also be exposed to more complex and modern practices 
in oral and maxillofacial surgery. This includes orthogenic 
surgery, TMJ surgery, pathology, and reconstruction surgery. 

CDM 4999—Advanced Techniques in Pain and 

Anxiety Control 

The goal of this course is to introduce the wide spectrum 
of pain and anxiety control available in dentistry. During 
this course, the student will establish a basic understanding 
of the additional techniques available to the dental 
practitioner to cope with the problems of anxiety and 
fear commonly found in dental patients. The advanced 
techniques learned are not only used for the purpose of 

aiding the fearful dental patient, but also in prevention of 
medical emergencies in the dental office by attenuating 
the potentially harmful effects associated with the stress 
response. Hands-on instruction will be provided. 

CDM 408H—Honors Program in Oral and 

Maxillofacial Surgery 

This honors course will expand the clinical knowledge 
and experience of the D4 predoctoral student in oral and 
maxillofacial surgery, including providing the opportunity 
to participate in and be exposed to patients that require 
more difficult surgical extractions or implants and bone-

grafting surgery, as well as those with impacted teeth, 
odontogenic infections, or oral pathologic lesions. Students 
will also learn how to manage medically compromised 
patients. The student will be able to participate in didactic 
conferences and rounds at the hospital and observation
and assisting in the operating room. He or she will also be involved in emergency department patient management.

Department of Orthodontics and Dentofacial Orthopedics—Chair and Professor: A. Lifshitz | Director of Predoctoral Orthodontics and Dentofacial Orthopedics and Assistant Professor: C. Lin | Interim Director of Postgraduate Orthodontics and Dentofacial Orthopedics and Assistant Professor: R. Singer | Clinic Director and Associate Professor: S. Real | Associate Professor: S. Khatami | Assistant Professor: G. Contasti | Adjunct Faculty Members: M. Cooper, J. Coro, J. Ginzler, A. Kapit, B. Matta, M. Meister, J. Morrish, R. Shults

CDM 2005—Craniofacial Growth and Development
This course is intended to be an introductory course in craniofacial growth and development. Introductory and general concepts of somatic and craniofacial growth will be presented. Theories of craniofacial growth and development, the method of directional descent of the maxillary and mandibular complex, and correlation with the development of the occlusion will be included.

CDM 2200—Orthodontics Lecture/Laboratory
The orthodontics lecture course is designed to teach students to assess normal and abnormal growth and development, diagnosis and classification of malocclusion, and differentiation between limited and comprehensive orthodontic treatment. The orthodontics laboratory course is designed to teach principles and concepts used in treatment in orthodontics and dentofacial orthopedics. Laboratory skills are taught in orthodontic mechanotherapy, enabling students to participate in the clinical experience.

CDM 3605—Orthodontic Clinical Comanagement Program
The predoctoral student will work with the postgraduate orthodontic student in all phases of orthodontic care including examination, diagnostic record taking, analysis, diagnosis, differential diagnosis, and treatment planning. The predoctoral student will join the postgraduate student in the postgraduate clinic for patients' orthodontic appointments, assisting in all phases of clinical care.

CDM 414H—Honors Program in Orthodontics and Dentofacial Orthopedics
This optional Honors course provides the interested student with an opportunity to further his or her knowledge in limited, co-management orthodontic treatment with postgraduate residents and their patients through attendance at postgraduate diagnostic conferences and continued learning of orthodontic diagnosis and treatment planning.

Department of Pediatrics—Chair and Professor: R. Ocanto | Predoctoral Director and Assistant Professor: A. Noguera | Interim Postgraduate Director and Assistant Professor: V. Oramas | Professor: G. White | Associate Professors: J. Larumbe, O. Padilla | Assistant Professor: U. Kandalam | Adjunct Professors: D. Arnold, S. Ashley, N. Feliciano, R. Kashlan, C. Kitaigorodsky, E. Stelnicki, J. Vargas

CDM 2081—Introduction to Pediatric Dentistry
This course is a primer on the diagnosis and treatment planning of primary and mixed dentition patients. Emphasis will be placed on dental disease, etiology, and prevention, recognition and management of disorders common in childhood. This course prepares students for the second semester didactic and laboratory experience in pediatric dentistry.

CDM 2180—Pediatric Dentistry Lecture
Provides the student with an overview of "normacy" as well as the most common disorders and conditions in children. Diagnosis and treatment planning of pediatric patients with primary, transitional, and permanent dentitions are emphasized. This includes behavior management techniques, the development and morphology of the dentition, oral surgery and oral pathology, restorative and preventive procedures and materials, pulpal and periodontal therapy, traumatic injuries, space management, and oral habits. This course prepares students for their clinical interactions with children.

CDM 2190—Pediatric Dentistry Laboratory
The pediatric dentistry simulation laboratory sessions provide the student with basic knowledge and understanding of cavity preparation and restoration exercises with a variety of materials in the primary dentition. In addition, space maintenance and space analysis are reviewed during these laboratory sessions.

CDM 3525—Clinical Pediatric Dentistry Rotation I
This course includes the clinical application of preclinical pediatric dentistry skills in children and adolescents. All patients are treated in a comprehensive care format with emphasis in: 1) behavioral guidance; 2) record keeping, comprehensive diagnosis, and treatment planning; 3) prevention, including caries and risk assessment; and 4) restorative dentistry including composite and amalgam restorations in primary and mixed dentition. All clinical treatment is accomplished under the direct supervision of faculty members from the Department of Pediatric Dentistry.

CDM 4525—Clinical Pediatric Dentistry Rotations II
Clinical application of pediatric dentistry preclinical skills and clinical skills acquired during the D3 year are accomplished in a population of indigent children
attending extramural dental clinics in South Florida. All
patients are treated in a comprehensive care format with
emphasis in: 1) behavioral guidance; 2) record keeping,
comprehensive diagnosis, and treatment planning; 3)
prevention, including caries and risk assessment; 4)
restorative dentistry including composite and amalgam
restorations in primary and mixed dentition, anterior
composites, pulp therapy, and stainless steel crowns;
and 5) interceptive orthodontics (space analysis and
maintenance). All clinical treatment is accomplished
under the direct supervision of faculty members from the
Department of Pediatric Dentistry.

CDM 410H—Honors Program in Pediatric Dentistry
This course has been designed with the purpose of exposing
D4 students to activities that will enhance their knowledge
and skills in pediatric dentistry, specifically in the areas of
didactic and clinical expertise.

Department of Periodontology—Department Chair,
Postgraduate Director, and Associate Professor: M.
Hernandez | Predoctoral Director and Associate Professor:
S. Drukteinis | Professor: P. Murray | Associate
Professors: D. Bronstein, M. Elazizi, T. Koutouzis, W.
Parker, S. Vardar | Assistant Professors: B. Garcia,
M. Roth | Instructor: K. Wang | Adjunct Associate
Professors: M. Forrest, J. Ganeles, L. Garfinkel, T. Kang
| Adjunct Assistant Professors: L. Basceanu, D. Boden,
N. Dalal, N. DeTure, F. Figueroa, I. Freedman, I. Garazi,
D. Genet, I. Ginsberg, D. Glassman, A. Horowitz, G.
Jacobson, M. Liebman, E. Muller, N. Norkin, L. Ostroff,
M. Rosenbluth, S. Ross, L. Shapiro | Adjunct Clinical
Hygienists: L. Allen, J. Black, R. Charin, J. Hernandez,
L. Hochman, L. Jones, S. Kong, E. Mellman, S. Salzman,
M. Sepe, R. Shomet, J. Turcotte, N. Vult | Visiting
Professors: S. Stahl, J. Suzuki

CDM 1070—Periodontology I
This course provides an overview of periodontology and
defines basic terminology. The relationship of
anatomical structures relative to the periodontium;
recognition and assessment of health and disease of the
periodontium; introduction to histology of the gingival
crevices in health, disease, and periodontal pathology;
and the interrelationship between gingival microbiota,
the formation of dental plaque, and gingival disease are
discussed. Comprehensive periodontal examination and
transcription of clinical and radiographic findings into
records are also gone over, as well as an introduction to
periodontal diagnoses.

CDM 1185—Introduction to Clinical Periodontology
Gives students the opportunity to apply the knowledge
learned in Periodontology I and additional lectures in
Periodontology II, which involve understanding and
application of clinical data collection, examination of the
periodontium, and instrumentation techniques. Students
are required to apply their knowledge first on mannequins
in simulation lab and then with their classmates.

CDM 2030—Periodontology II
Review of normal structures: anatomic and histologic. The
earliest gingival inflammatory lesion: clinical signs and
symptoms. Gingivitis: clinical features, underlying etiology,
microbial shifts, and diagnosis and rationale for treatment.
Clinical, microbiologic, and histologic alterations in
response to local irritants, host responses, inflammation
and loss of attachment. The gingival and periodontal
abscess, the gingival lesion in AIDS, necrotizing ulcerative
gingivitis, and herpetic gingivostomatitis.

CDM 2160—Periodontology III
This course discusses etiology, histopathology, and
treatment of various periodontal lesions; phase I
nonsurgical periodontal treatment planning; and options
available for the treatment of acute, chronic, aggressive,
and refractory periodontitis, as well as mild, moderate,
and severe periodontitis; reevaluation of periodontal
treatment; and interdisciplinary considerations following periodontal
therapy as part of the periodontal treatment plan. The
course introduces the students to treatment to health,
initial periodontal therapy for periodontal maintenance,
prophylaxis, and scaling and root planning procedures,
while emphasizing the need for supportive periodontal
therapy and patient compliance. New paradigms of
periodontal treatment modalities are introduced.

CDM 2185—IDG Clinical
Periodontology Orientation
This course is a review for international dental graduates in
periodontal instrumentation, techniques, and management
of patient oral hygiene. Additionally, the course includes
training in protection of health care records (HIPAA) and
training in occupational safety (OSHA).

CDM 2501—Periodontology Clinic
The purpose of this course is to introduce the course
participant to the concepts of clinical periodontics
involving diagnostic procedures and execution of
treatment for patients on prophylaxis recalls (Type I
cases—gingivitis).

CDM 3030—Periodontology IV
This course discusses etiology, histopathology, and
treatment of periodontitis; phase II surgical periodontal
treatment planning; and options available for the treatment
of chronic, aggressive, and refractory periodontitis, as well
as treatment of refractory periodontitis. Indications and
modalities of periodontal surgery including, but not limited
to, treatment of furcations, osseous surgery, mucogingival
surgery, regenerative techniques, wound healing, use
of antibiotics in periodontal therapy, and periodontal
medicine are also presented.
CDM 3501—Clinical Periodontology I
The purpose of this D3 year in periodontics is to provide students with the basic knowledge and clinical experience to recognize and treat periodontal disease and develop a process for formulating a properly sequenced and effective periodontal treatment plan. Students perform periodontal therapies and integrate periodontal therapy within a comprehensive plan of care.

CDM 3503—Clinical Periodontology Rotation
The purpose of this year in periodontics is to provide students with the opportunity to assist in periodontal surgical procedures at the postgraduate periodontics level. Students will be exposed to different modalities of periodontal surgical procedures.

CDM 4501—Clinical Periodontology II
The purpose of this year in periodontics is to provide students with the basic knowledge and clinical experience to recognize and treat periodontal disease of the hard and soft tissues and develop a process for formulating a properly sequenced and effective periodontal treatment plan. In addition, students will be exposed to protocols related to implant placement and restoration in harmony with the maintenance of a healthy periodontium.

CDM 402H—Honors Program in Periodontics
This course provides predoctoral students with the opportunity of assisting and performing periodontal surgical procedures. The objectives of the course are to help students to understand surgical anatomy related to periodontal surgery and principles of periodontal surgery, and to understand indications and sequencing of different modalities of periodontal surgical procedures. In addition, students will perform periodontal surgery including crown lengthening, gingivectomy/gingivoplasty and frenectomy.

Department of Prosthodontics—Chair and Professor:

CDM 2070/CDM 2080—Fixed Prosthodontics Lecture/Laboratory I
These courses prepare students to appropriately use the terminology, instrumentation, and psychomotor skills associated with tooth preparation and provisionalization of single and multiple unit intra and extra coronal cast fixed prosthodontic restorations.

CDM 2095—Preclinical Removable Prosthodontics I Lecture
This course is designed to familiarize the student with all the aspects of the discipline of removable prosthodontics: theoretical, technical, and clinical, so he or she will be prepared to confidently and accurately provide removable prosthodontic treatment for the complete or partially edentulous patient in clinical practice. This course, in conjunction with the laboratory course, will provide the foundation of clinical removable prosthodontics.

CDM 2096—Preclinical Removable Prosthodontics I Laboratory
This laboratory course provides a simulated experience of using removable partial dentures and removable complete dentures to replace lost teeth and their associated structures. This course is designed to familiarize the student with all the aspects of the discipline of removable prosthodontics—theoretical, technical, and clinical—so he or she will be prepared to confidently and accurately provide removable prosthodontic treatment for the complete or partially edentulous patient in clinical practice.

CDM 2101—Dental Biomaterials Lecture II
At the end of this course, the students will be able to understand the optimum performance requirements, properties, and handling characteristics for specific dental materials, as well as understand the selection criteria based on clinical significance of the mechanical and physical properties of dental materials.

CDM 2197—Preclinical Removable Prosthodontics II Lecture
This lecture course presents theory and technique for using removable partial dentures and removable complete dentures to replace lost teeth and their associated structures. This course is designed to familiarize the student with all the aspects of this discipline of removable prosthodontics—theoretical, technical, and clinical—so he or she will be prepared to confidently and accurately provide removable prosthodontic treatment for the complete or partially edentulous patient in clinical practice. This course, in conjunction with the laboratory course, will provide the foundation of clinical removable prosthodontics.
CDM 2198—Preclinical Removable Prosthodontics II Laboratory
This laboratory course provides a simulated experience of using removable partial dentures and removable complete dentures to replace lost teeth and their associated structures. As a continuation of Preclinical Removable Prosthodontics Laboratory I from the previous semester, it includes simulated clinical and laboratory exercises to provide the foundation of clinical removable prosthodontics.

CDM 2260/CDM 2270—Fixed Prosthodontics Lecture/Laboratory II
The lecture course presents theory and technique of anterior and posterior fixed partial dentures, porcelain application, and treatment of endodontically treated teeth as they relate to the overall restorative treatment of the patient. This course, in conjunction with the laboratory course, provides the foundation for the student to use the same knowledge and techniques that will be used in clinical application.

CDM 2995—Clinical Practice of Dentistry Fundamentals
This combined lecture and laboratory course is an integrated program that includes objectives from the following disciplines: oral diagnosis, oral medicine, dental anatomy, fundamentals of occlusion, operative dentistry, dental biomaterials, cariology, endodontics, periodontics, pediatric dentistry, orthodontics and fixed prosthodontics, OMFS, and use of the EHR system. The clinical practice of dentistry program builds on the foundational knowledge learned in the D1 and D2 curriculum in order to prepare students for a comprehensive care competency-based clinical program. The course focuses on the application of the learning objectives obtained throughout the D1 and D2 curriculum. The student will be presented with de-identified patient cases and will be expected to prepare comprehensive treatment plans for the cases, as well as perform some of the necessary procedures in the simulation laboratory on typodonts.

CDM 3120—Implant Restorative Dentistry Lecture
This course is one of comparative implantology, which emphasizes the biological background related to implant systems. Demonstrations and case presentations will be provided. Evidence-based studies are referenced. Hands-on demonstrations of the use of implant parts is part of the course.

CDM 3130—Cosmetic Dentistry Lecture
This course provides formal lecture presentations in conjunction with preclinical laboratory hands-on exercises to prepare students with the necessary skills to perform esthetic dental procedures as discussed in lectures. The junior student will learn the sequence of diagnostic steps required for a successful planning and treatment of the esthetic zone, as well as different treatment modalities and indications of use for all ceramic and indirect composite resin systems for the posterior teeth. New technologies and systems will be discussed and students will have the option of presenting a treatment-planned case to their classmates and faculty members.

CDM 3131—Cosmetic Dentistry Laboratory
This course provides preclinical laboratory hands-on exercises to prepare students with the necessary skills to perform esthetic dental procedures as discussed in lectures. The junior student will learn the sequence of diagnostic steps and clinical procedures required for a successful planning and treatment of the esthetic zone, as well as different treatment modalities, along with indications of use for all ceramic and indirect composite resin systems for the posterior teeth.

CDM 3200—Laboratory and Clinical Applications of Occlusion
After completion of this clinic-laboratory course, the dental student will be able to perform impressions, obtain face bow records, obtain occlusal records, properly mount the casts in the articulator and perform an occlusal analysis in the clinical setting, and use these records for diagnostic purposes.

CDM 3260—Masticatory System Disorders: A Multidisciplinary Approach
This is an integrated approach to teaching dental students about the clinical evaluation and diagnosis of patients that present with pain and/or dysfunction in the masticatory system (temporomandibular disorders) and other related orofacial pain conditions. Multiple disciplines will present to allow students to have a complete understanding of the normal function of the masticatory system, occlusal analysis, and occlusal diagnosis and its effect on the TMD and the masticatory system. Students will utilize knowledge from the course to diagnose and make recommendations for patient treatment referrals from their own family of patients.

CDM 3410—Clinical Fixed Prosthodontics I
This clinical experience consists of preparing and placing anterior and posterior fixed partial dentures and single coronal restorations. Restorations may be of full gold, metal-ceramic, or all ceramic. Restorations on implants are an integral part of the clinical experience. CAD/CAM restorations are included in this clinical experience. All clinical treatment is accomplished under the direct supervision of faculty members. A clinical rotation with the postgraduate prosthodontics residents is part of this course.

CDM 3411—Clinical Removable Prosthodontics I
Clinical application of preclinical skills in complete and removable partial dentures, overdentures on
teeth, and implants are accomplished on patients. All patients are treated in the comprehensive care format with emphasis on the whole head and neck. All clinical treatment is accomplished under the direct supervision of faculty members.

CDM 3530—Evidenced-Based Dentistry in Clinical Practice
This lecture series presents historical aspects of the development of critical thinking in health care. The course provides the student with different sources for accessing scientific information and reviews scientific articles and principles in observational and epidemiological studies. It stresses the importance of evidenced-based cases and the principles of clinical decision-making and statistics methodology.

CDM 4277—CAD/CAM Restorative Dentistry
This lecture and hands-on laboratory course in CAD/CAM restorative dentistry presents an overview of digital dentistry. Students will learn about the systems for digital impression making and manufacture of restorations in the computer-assisted practice of the 21st century, including the CEREC (Sirona), E4D (PLANMECA), Encode (Biomet 3I), Procera Forte (Nobel BioCare), and 3M True Definition Scanner. Students will prepare teeth for CAD/CAM restorations. They will scan, design, mill, characterize, glaze, and cement CAD/CAM generated restorations.

CDM 4410—Clinical Fixed Prosthodontics II
This clinical experience consists of preparing and placing anterior and posterior fixed partial dentures and single coronal restorations. Restorations may be of full gold, metal-ceramic, all ceramic, or CAD/CAM generated. Restorations on implants are an integral part of the clinical experience. All clinical treatment is accomplished under the direct supervision of faculty members.

CDM 4411—Clinical Removable Prosthodontics II
Clinical application of preclinical skills in complete and removable partial dentures, overdentures on teeth, and implants are accomplished on patients. All patients are treated in the comprehensive care format with emphasis on the whole head and neck. All clinical treatment is accomplished under the direct supervision of faculty members.

CDM 412H—Honors Prosthodontics
Advanced students with a high interest in prosthodontics attend advanced prosthodontic seminars and gain advanced experience in clinical prosthodontics, treating more complex patients.

Dental Medicine Related Educational Programs
The College of Dental Medicine also offers the following programs:

D.O./D.M.D. Dual Degree Program
The D.O./D.M.D. Collaborative Degree Program is symbiotic with the missions of both NSU’s College of Osteopathic Medicine and College of Dental Medicine. Graduates of the dual program will prepare health care that will address preventive medicine, general dentistry, and access to care issues, while also meeting the needs of rural and underserved populations.

Applicants to either college may apply for participation in this collaborative program beginning as an entering D-1 student. The program requires six years of study, excluding medical residency or internship programs. Students successfully completing this program receive both a D.O. and a D.M.D. degree.

Policies related to student progress will follow the respective policies of the college within which the specific course is contained. Should there be conflicting policies or issues, the Student Progress Committee, composed of a joint cohort representing both programs, will convene and recommend a resolution. Students who decide to discontinue in the collaborative degree program may only continue in the program that they were originally admitted to. NSU is not responsible for delays in curriculum sequencing or advancement in the program should the student decide to discontinue in the collaborative degree program and continue in the program that he or she was originally admitted to.

D.M.D./Master's Degree in Health Law
Students seeking specialized knowledge in law as related to health care may apply for admission to the D.M.D./Master's Degree in Health Law Program. The master's degree in health law is an online program offered by NSU's Shepard Broad Law Center, requiring significant self-directed study and learning.

D.M.D./Master's Degree in Public Health
An academic track providing specialized knowledge in public health, leading to the M.P.H. degree, is available to the doctor of dental medicine student, and may enhance career prospects in government and private health care enterprises. This program may require 6–12 months of additional study beyond the four years needed for the D.M.D. program. Application may be made on successful completion of the first dental-school year.
D.M.D./Master’s or Doctoral Degree in Health Care Education

In the third dental year, applicants considering part-time or full-time teaching and administration in dental education and whose clinical competencies are current may apply for enrollment in either the master’s degree or doctoral degree in health care education programs. Candidates for the master’s degree in health care education will spend the year after dental school graduation in full-time study in education, while doctoral candidates will invest two to three years of study in education after receipt of the D.M.D. degree.

D.M.D./Master of Business Administration

The College of Dental Medicine (CDM) and the H. Wayne Huizenga College of Business and Entrepreneurship (HCBE) have partnered to create a dual-degree track. This track leads to the awarding of D.M.D. and Master of Business Administration (M.B.A.) degrees. The M.B.A. complements the D.M.D. program by providing specialized knowledge in business with 10 available concentration areas. The dual-degree track is available to all predoctoral students who are academically in good standing, have successfully completed their D1 year, and have permission from the dean of the College of Dental Medicine. Students may contact the HCBE program representative for details on this program. Completion of the M.B.A. may require 6–12 months of additional study beyond the four-year D.M.D. program.

Predoctoral Research Program

Students showing exceptional performance in basic sciences, laboratory, and clinical dentistry may be eligible to participate in the Predoctoral Research Program. Under the supervision of faculty members, these students will gain familiarity with the scientific method and engage in laboratory and clinical research.

Predoctoral Honors Peer Tutoring

Students with exceptional academic records may be eligible to offer peer tutoring assistance to predoctoral students in need of academic assistance. Peer tutors will receive transcript credit and an hourly wage for their time.

Predoctoral Honors Clinical Participation Program

Students with exceptional academic records may be eligible for special clinical experiences in the third and fourth years of predoctoral study in endodontics, oral surgery, orthodontics, pediatric dentistry, and restorative dentistry. Selection of such participants will be at the discretion of the department chairperson.

Research

The College of Dental Medicine’s research vision is to develop, advance, and disseminate knowledge of oral health sciences and related fields to benefit society. The college’s research program strives to promote our academic growth and scientific reputation through interdisciplinary research and the integration of basic, clinical, translational, public health, and educational research. By collaborating and sharing information with other units within the university, as well as other university, federal, and private organizations; enhancing our facilities; and recruiting distinguished faculty members, the college strives to be a global leader in research and education.

Our goal is to develop and sustain a research program of distinction by engaging our faculty members and students in research. Our research efforts are directed toward meeting the needs of the health sciences community, the underserved and special care populations, and the public at large. Current research at the College of Dental Medicine is focused around biomaterials, craniofacial anomalies and biology, evaluation of emerging therapeutics, regenerative medicine bioscience, epidemiology, and health services research.

The College of Dental Medicine has full-time research faculty members with degrees that include D.D.S./D.M.D. Ph.D.s and basic science Ph.D.s. The international experience of our faculty members and the opportunities for research exchange add strength and diversity to our research program.
Postdoctoral Programs

The College of Dental Medicine developed postdoctoral specialty training programs in several fields starting in the fall of 1997. There are training positions available in endodontics, orthodontics, pediatric dentistry, periodontology, prosthodontics, advanced education in general dentistry, and oral and maxillofacial surgery.

These programs are supervised by board-certified and educationally qualified dental specialists.

Lectures, seminars, and multidisciplinary conferences related to patients and their dental treatment, as well as in research, are conducted. Students also serve as instructors in the predoctoral laboratory and clinic. An original research project must be completed by each student. Upon successful completion of the program requirements, trainees receive certificates in their respective specialties.

Postdoctoral Core Courses

All postdoctoral students are required to take the following courses during their first year:

CDM 5000—Advanced Dental Radiology
Consideration of hard and soft tissue craniofacial imaging modalities, including MRI, tomography, and digital imaging.

CDM 5004—Advanced Oral Histology and Embryology
Cytological and developmental considerations in embryological, fetal, and neonatal human craniofacial growth and development.

CDM 5005—Introduction to Postdoc Education
This course is designed for postgraduate residents entering their first year of postgraduate education at the College of Dental Medicine. Topics covered include implant dentistry, caries risk management, professional relations, tobacco cessation, domestic violence, ethics, standards of care and informed consent, infection control, risk management, dental photography, and dental lasers.

CDM 5006—Fundamentals of Biostatistics
Analysis of descriptive and inferential statistics as used in contemporary biomedical research, including electronic-based statistical programs.

CDM 5002—Research Design
The objective of this course is to learn how to plan research projects, initiate the projects, and effectively present the findings. Critical evaluation of the literature about the field of interest will be emphasized.

CDM 5003—Advanced Microbiology and Cell Biology
This course offers graduate training in microbiology, including virology, bacteriology, microbial genetics, and microbial pathogenesis.

CDM 5008—Advanced Medical Physiology
This course gives a detailed examination of cells and their transport —cardiac, pulmonary, and acid base—as related to maintenance of oral health and onset of disease.

CDM 5109—Ethics and Jurisprudence
This course reviews hallmarks of dental professional ethics and aspects of the law that commonly impact on the daily practice of dentistry.

CDM 5102—Advanced Oral and Maxillofacial Pathology
Gross and histological specimen consideration in hard and soft tissue diseases of the oral and maxillofacial structures.

CDM 5103—Advanced Head and Neck Anatomy
Lecture Series
Didactic and dissection-based consideration of head and neck structure and function essential to advanced dental practice.

CDM 5104—Advanced Head and Neck Anatomy Lab Series
Laboratory-based consideration of head and neck structure and function essential to advanced dental practice.

CDM 5106—Advanced Systemic Oral Medicine and Pharmacology
This course expands on the predoctoral education regarding the topic of oral medicine. The seminars will discuss current and classic literature to help refine the skills of students in interpreting a medical history and dental management of medically complex patients.

CDM 8000—Advanced Dental Education Seminar Series
Postgraduate residents in their first postgraduate year attend this seminar series, which provides the opportunity for interdisciplinary learning at an advanced level. Presentations are given on topics related to advanced general dentistry, endodontics, oral and maxillofacial surgery, operative dentistry, orthodontics and craniofacial orthopedics, pediatric dentistry, periodontology, and prosthodontics followed by collegial discussion. Advanced treatment planning cases are also presented in a format that encourages interdisciplinary discussion of complex cases.
CDM 8001—Advanced Dental Education Seminar Series II
Postgraduate residents in their second postgraduate year attend this seminar series, which provides the opportunity for interdisciplinary learning at an advanced level. Presentations are given on topics related to advanced general dentistry, endodontics, oral and maxillofacial surgery, operative dentistry, orthodontics and craniofacial orthopedics, pediatric dentistry, periodontology, and prosthodontics followed by collegial discussion. Advanced treatment planning cases are also presented in a format that encourages interdisciplinary discussion of complex cases.

CDM 8002—Advanced Dental Education Seminar Series III
Postgraduate residents in their third postgraduate year attend this seminar series, which provides the opportunity for interdisciplinary learning at an advanced level. Presentations are given on topics related to advanced general dentistry, endodontics, oral and maxillofacial surgery, operative dentistry, orthodontics and craniofacial orthopedics, pediatric dentistry, periodontology, and prosthodontics followed by collegial discussion. Advanced treatment planning cases are also presented in a format that encourages interdisciplinary discussion of complex cases.

Additionally, postdoctoral students are required to take didactic and clinical courses within their respective area of specialization throughout their training.

Postdoctoral Specialties

POSTDOCTORAL COMMUNITY DENTISTRY
The Department of Community and Public Health Sciences offers an accredited, one-year Advanced Education in General Dentistry (AEGD 1) residency program with an optional second year (AEGD 2). The AEGD 1 program is housed in an eight-chair clinic at the North Miami Beach (NMB) campus. The AEGD 2 program, also located in NMB, is housed in an eight-chair clinic designed primarily for the care of individuals with special needs. The didactic portion of the program includes a core science curriculum designed to provide all postdoctoral students with an advanced interdisciplinary education and a detailed general practice curriculum for the AEGD students. The AEGD 2 program includes a didactic curriculum for the care of individuals with disabilities. Off-site rotations may be included to expand the range of experiences available. The program offers no stipend, however, professional liability insurance is provided.

CDM 8162—Advanced General Dentistry Seminar Series
This course will provide residents with an understanding of the principles and techniques used to assess and treat oral disease in human populations. It will provide an overview of the diagnostic and treatment techniques of the various dental specialty disciplines at a level appropriate for a graduate dentist and in a manner for that dentist to integrate the principles into the practice of general dentistry.

CDM 8050—AEGD Clinic I
Students will incorporate the knowledge gained from dental school training and didactic studies as they provide comprehensive, multidisciplinary, oral health care for patients using caries risk analysis, diagnosis, prevention, fluoride, sealants, oral hygiene instructions, amalgam, resin composites, ceramic, metals, glass ionomers, tooth whitening procedures, remineralization techniques, periodontal procedures, endodontic procedures, implant placements and restorations, surgical procedures, and replacement of teeth using fixed and removable prosthesis at a level of skill and complexity beyond that accomplished in predoctoral training.

CDM 8150 and CDM 8151 AEGD Clinic II
The Advanced Education in General Dentistry (AEGD 2) residency program is focused on the area of special needs dentistry. Special needs are defined as those individuals with developmental and acquired disabilities, the medically or physiologically compromised, and the frail elderly. The clinical experience is designed to refine and enhance the resident’s skills and scientific knowledge in the management and treatment of these patients. The AEGD 2 program is intended to prepare the general practice resident for involvement with the physical, emotional, and psychological issues faced by patients with mild to severe disabling conditions.

CDM 8060—Advanced Clinical Dentistry
This clinical course is designed to provide advanced training in general dentistry, including full-mouth prosthodontic rehabilitation, periodontal surgery, implant placement and restoration, endodontic therapy, pediatric dentistry, and oral surgery.

CDM 8061—Advanced Clinical Dentistry
This course is the second term continuation of the clinical course CDM 8060. It is designed to provide advanced training in general dentistry, including full-mouth prosthodontic rehabilitation, periodontal surgery, implant placement and restoration, endodontic therapy, pediatric dentistry, and oral surgery.
Postdoctoral Certificate in Advanced General and Special Needs Dentistry
The Department of Community and Public Health Sciences offers a one-year, postgraduate Certificate in Advanced General and Special Needs Dentistry. The goal of this certificate program is to provide the oral health practitioner with the skills to treat patients with special health needs. These needs may include those resulting from a range of developmental disabilities; acquired disabilities; or chronic, complex medical conditions.

Didactic and clinical training will prepare postgraduate students for patient evaluation and assessment of a patient's health and his or her cognitive and mobility status. The expectation is that students will become comfortable with, and proficient in, assessing patients' abilities to withstand and participate in their care, and providing services to patients with a range of intellectual, physical, or behavioral challenges.

Students' knowledge and patient-management skills, with respect to individuals with special health needs, is gained through an advanced, multidisciplinary approach working primarily with faculty members within the College of Dental Medicine, as well as additional resources in NSU and affiliated programs and sites. The program offers no stipend; however, professional liability insurance is provided.

Students in the Certificate in Advanced General and Special Needs Dentistry program are required to take the following postgraduate core courses:

**CDM 5000—Advanced Dental Radiology**
This course provides consideration of hard and soft tissue craniofacial imaging modalities, including MRI, tomography, and digital imaging.

**CDM 5002—Research Design**
The objective of this course is to learn how to plan research projects, initiate the projects, and effectively present the findings. Critical evaluation of the literature about the field of interest will be emphasized.

**CDM 5003—Advanced Microbiology and Cell Biology**
This course offers graduate training in microbiology, including virology, bacteriology, microbial genetics, and microbial pathogenesis.

**CDM 5006—Fundamentals of Biostatistics**
This course provides analysis of descriptive and inferential statistics as used in contemporary biomedical research, including electronic-based statistical programs.

**CDM 5008—Advanced Medical Physiology**
This course gives a detailed examination of cells and their transport—cardiac, pulmonary, and acid base—as related to maintenance of oral health and onset of disease.

**CDM 5102—Advanced Oral and Maxillofacial Pathology**
Gross and histological specimen consideration in hard and soft tissue diseases of the oral and maxillofacial structures are discussed.

**CDM 5103—Advanced Head and Neck Anatomy Lecture Series**
Didactic and dissection-based consideration of head and neck structure and function essential to advanced dental practice are discussed.

**CDM 5104—Advanced Head and Neck Anatomy Lab Series**
This course provides the laboratory-based consideration of head and neck structure and function essential to advanced dental practice.

**CDM 5106—Advanced Oral Medicine and Pharmacology**
This course expands on the predoctoral education in the topic of oral medicine. The seminars will discuss current and classic literature to help refine the skills of students in interpreting medical histories and in dental management of medically complex patients.

**CDM 5109—Ethics and Jurisprudence**
This course reviews hallmarks of dental professional ethics and aspects of the law that commonly impact on the daily practice of dentistry.

As part of a strong emphasis placed on attaining clinical experience and skills, the certificate program includes didactic instruction and participation in pertinent seminars; rounds; and case presentations regarding treatment planning, behavior modification techniques, and care coordination. The specific clinical training is tailored to the postgraduate students' educational and clinical backgrounds and their desired focus of interest. The program may afford students opportunities to participate in projects in the local public health community, as well as in community-based care activities. Students with interests in research activities and academic careers may have the opportunity to combine the Certificate in Advanced General and Special Needs Dentistry with the two-year Master of Science degree program available within the College of Dental Medicine.

**POSTDOCTORAL ENDOdontICS**
The postdoctoral program in endodontics is a 24-month certificate or 36-month master's degree program that balances clinical experience with didactic instruction in the relevant basic and clinical sciences.

The clinical portion of the program is microscopically oriented, providing the student with modern concepts of endodontic treatment including rotary NiTi instrumentation, electronic apex locators, guided tissue...
regeneration, ultrasonic instrumentation, use of digital radiography revascularization, and regeneration. Joint conferences with other disciplines—such as periodontics, prosthodontics, and pediatric dentistry—provide the student with a well-rounded basis to diagnose and treat conditions in the head and neck region.

The didactic portion of the program includes a core curriculum designed to provide all postdoctoral students with a basic interdisciplinary education and a detailed endodontic curriculum that concentrates heavily on knowledge of the literature. The program is designed to fulfill the specialty certification of the American Board of Endodontics. The program also includes research, teaching, and instruction by several well-known visiting professors.

In addition to the postdoctoral core courses offered during the first year of the program, all postdoctoral endodontic students are required to take the following courses:

CDM 5611–5618—Current Literature Review
These monthly seminars are devoted to the review of current endodontic literature and research from evidence-based journals. Full journals, as well as selected articles, are carefully reviewed and critically analyzed. This will help to provide the resident with knowledge of biomedical science and to appraise current technological development and research, assessing their scientific and clinical merit so that he or she can bring forward his or her classic literature knowledge as it correlates to the theory and modern practice of endodontics.

CDM 5621–5624—Classic Literature Review
These continual weekly seminars are devoted to the review of endodontic literature, related literature, and discussion of research methods. Selected articles in a particular topic are carefully reviewed and analyzed. The residents learn to read and evaluate scientific evidence that supports endodontic principles and practices from the past to modern day. Topics chosen range from the biological and pharmacological to the technical principles of nonsurgical endodontics in conjunction with multidisciplinary approaches.

CDM 5625–5628—Classic Literature Review
These continual weekly seminars are devoted to the review of endodontic literature, related literature, and discussion of research methods. Selected articles in a particular topic are carefully reviewed and analyzed. The residents learn to read and evaluate scientific evidence that supports endodontic principles and practices from the past to modern day. Topics chosen range from the biological and pharmacological to the technical principles of surgical endodontics in conjunction with multidisciplinary approaches.

CDM 5631–5638—Endodontic Topic and Case Presentation
Residents are expected to prepare four one-hour lectures (consisting of slides and handouts) on different topics approved by the postgraduate director pertaining or relating to the field of endodontics. They will present these lectures to their endodontic peers, classmates, and faculty members, who will then critically evaluate them. This will provide the resident with the training necessary to teach endodontics to practitioners and dental students of all levels. Following the topic presentation, the resident will present at least five cases, from start to finish, with at least one recall per case. Cases must include clinical photos, chief complaint, history (dental and medical), medications, radiographs (CBCT if necessary), sensitivity testing, probing, pre-op diagnosis, access, working lengths, photos through microscope, final clinical photos/radiographs, and post-op diagnosis (if different than pre-op). Throughout the case presentations, roundtable discussions will occur to enhance the learning experience. When the resident has completed the topic requirement, he or she will present surgery cases (from both externship and NSU), unusual cases, and board portfolio cases.

CDM 5641–5648—Transition to Private Practice
These seminars are devoted to the realities of private or corporate dental practice. Topics covered include goals, location, type of practices, legal structures, modes of practice, set-up of an office, rent vs. purchase, space needed with physical layout, contracts, finances, running the staff, insurance, and practice building. This will aid the resident in feeling competent upon entering the business world.

CDM 5651—Advanced Pulp Biology
This course will provide an advanced understanding of the physiology and cell biology of the dental pulp in a normal and diseased state, as well as in response to injury.

CDM 5652—Advanced Microbiology
This course will provide an advanced education of the microbiology of the oral tissues focusing on pulpitis, infection, disinfection, and asepsis in endodontics.

CDM 5653—Advanced Immunology
This course will provide an advanced understanding of the human innate and adaptive immune systems that are relevant to dentistry and endodontics.

CDM 5654—Understanding the Endodontic Disease
This course highlights the etiology and pathophysiology that gives rise to the clinical and radiographic expression of endodontic disease of infectious origin.

CDM 5661–5662—Mock Boards
These will empower the resident with the knowledge and skills to successfully complete the board certification
process, preparing the resident with a mock oral board examination administered by diplomates. The residents will be prepared to critically evaluate the dental literature and understand the importance of becoming a Diplomate of the American Board of Endodontics.

CDM 5671–5674—Endodontic Surgery
These courses will provide the resident with the knowledge of relevant biomedical sciences, clinical techniques, and new instruments and devices as they correlate to the theory and practice of surgical endodontics in accompaniment though surgical experiences.

CDM 5681—Endodontic Externship
This externship serves to educate the graduating endodontist with the knowledge and skills to diagnose, understand the basis of, and adequately interpret and treat—alone or in conjunction with other dental and medical practitioners—endodontic situations and their related diseases and to maintain the health of the attachment apparatus and integrity of the natural dentition. It provides residents with in-depth knowledge of relevant biomedical sciences as they correlate to the theory and practice of endodontics. It also provides residents with experience from a sufficient number of diagnostic cases, traumatic injuries, regeneration cases, and nonsurgical and surgical clinical experiences in other hospital settings and affords them the opportunity to work with and evaluate new instruments and techniques used to effectively treat medically compromised and special needs patients.

CDM 5685—Endodontic Surgical Externship
This externship serves to educate the graduating endodontist with the knowledge and skills to diagnose, understand the basis of, and adequately interpret and treat endodontic surgical situations to maintain the health of the attachment apparatus and integrity of the natural dentition. It will provide residents with surgical endodontics experience from a sufficient number of diagnostic and surgical clinical cases to result in proficiency in the practice of endodontics and prepare residents to effectively treat medically compromised and special needs patients. It will also afford students with the opportunity to work with and evaluate new instruments and techniques. During this externship, the student to faculty member ratio is one to one.

CDM 5695–5698—Teaching Enhancement/Methodology and Quality Assurance
These courses educate the graduating endodontist with knowledge and skills to diagnose, understand the basis of, and adequately interpret and treat—alone or in conjunction with other dental and medical practitioners—endodontic situations and their related diseases and to maintain the health of the attachment apparatus and integrity of the natural dentition. They provide the resident with in-depth knowledge of relevant biomedical sciences as they correlate to the theory and practice of endodontics and introduce in-depth advanced education in teaching methodology for the postgraduate resident.

Various teaching methodology will be presented to predoctoral residents, in forms including lectures and hands-on presentations, allowing them to demonstrate competency. Residents will be asked to evaluate endodontic outcomes (survival, success, failure, no change) through radiographs (CBCTs, periapicals-FMX’s and panorex’s) on the NSU College of Dental Medicine’s pool of ongoing patients.

POSTDOCTORAL OPERATIVE DENTISTRY
The Department of Cariology and Restorative Dentistry offers a 24- to 36-month postdoctoral training program that is designed to fulfill the certification requirements of the American Board of Operative Dentistry. Residents are simultaneously enrolled in the Operative Dentistry and the Master of Science (M.S.) programs. A Certificate in Operative Dentistry and a Master of Science (M.S.) are awarded upon completion of the required core didactic courses, clinical competency program, and research project (including successful defense of a thesis). The program has been developed to be consistent with the objectives set forth in the ADEA (formerly AADS) Curriculum Guidelines for Postdoctoral Operative Dentistry (J Dent Educ 1993; 57: 832-836).

The Postdoctoral Operative Dentistry Program provides each graduate student with an opportunity to enhance his or her knowledge in three main areas: research, clinical training, and teaching. Participants pursue highly intensive clinical training while simultaneously following a rigorous academic curriculum that is research oriented.

CDM 7660—Operative Dentistry Clinic I
Students will incorporate the knowledge gained from didactic studies as they provide clinical services and dental restorations for patients by using caries risk analysis, diagnosis, prevention, fluoride, sealants, oral hygiene instructions, amalgam, resin composites, ceramic, metals, glass ionomers, tooth-whitening procedures, remineralization techniques, laser diagnosis, and minimally invasive surgical procedures. The philosophy of the course is based on the medical model of caries management that includes caries risk assessment and formulation of the preventive treatment plan. The department stresses the importance of early diagnosis of both primary and secondary caries and those steps necessary to encourage reversal of those lesions before resorting to an irreversible surgical procedure. When surgical procedures are indicated, they will be performed following evidence-based standardized techniques taught in preclinical courses. The overlying goals of this course are restoration to health of the dental patient and the prevention of future dental caries.
CDM 7510—Advanced Cariology
This course is designed to standardize the first-year, advanced-operative residents in definition, diagnosis, and management of dental caries. The independent roles of all contributing factors and all preventive measurements will be discussed in detail. Assessing patients’ caries risk and the appropriate treatment models will be emphasized.

CDM 7703—Advanced Treatment Planning
The advanced dental treatment planning course applies the principles and guidelines for comprehensive dental treatment planning for in-classroom patients’ case-based presentations and group discussions. Postgraduate residents are expected to identify multidisciplinary cases on the clinic floor for a diagnostic work up including photographic documentation, mounted casts, and diagnostic wax-ups for the elaboration of treatment plans that will be presented in PowerPoint format and followed by class discussion.

CDM 7410—Classic Literature Review Seminar I
This is a continual weekly seminar devoted to the review of classic operative dentistry and related literature and discussion of research methods. Selected articles in a particular topic are carefully reviewed and analyzed. The residents learn to critically read and evaluate the scientific evidence that supports advanced restorative dentistry principles and practice.

CDM 7610—Evidence-Based Dentistry I
The Evidence-Based Dentistry I course is designed to present the fundamentals of evidence-based dentistry. The first part of the course includes principles of evidence-based dentistry, PICO exercises, question formulation, practical examples, and online databases and search strategies. Students learn how to use the EBD website, Cochrane Database, and clinical queries searches on PubMed. Additionally, clinical research designs (case-control design, case series, case report studies, cohort design, randomized controlled trial, and split mouth design) are introduced. Concepts of study design, research methods, and literature review are emphasized and critically compared. In the second part of this course, strategies for evaluating web-based health information will be highlighted. A critical study appraisal session of the main study designs is presented. The purpose of these sessions is to allow students to gain confidence in their own ability to assess research articles and overcome the misconception that the conclusions of an article are correct simply because it has been published. Students are exposed to concepts of surrogates and true endpoints, bias and confounding assessing the effectiveness of treatments, and conflicts of interest in published research. Published literature is used as a basis for developing critical review skills and application of concepts during discussion.

CDM 7664—Advanced Operative Dentistry Didactic
This lecture course presents the topic of diagnosis and treatment of carious lesions and other hard tissue defects, principles of direct restorative dentistry, and fundamental concepts in the practice of restorative dentistry. The lecture component, in conjunction with the laboratory component, provides the foundation for the student to utilize the same knowledge and techniques that will be used in clinical application.

POSTDOCTORAL ORAL AND MAXILLOFACIAL SURGERY
The program in oral and maxillofacial surgery is a four-year certificate program. Its objective is to prepare graduates for a successful and productive career in oral and maxillofacial surgery. The curriculum is designed to develop the clinical, academic, and communicative skills that will provide for diversified career options. The program is sponsored by the College of Dental Medicine (academic arm) and Broward Health Medical Center. At the completion of the program, an option to pursue a medical degree (M.D.) is available for eligible candidates through Florida International University College of Medicine. The program has been designed to give residents a broad academic and didactic experience in the complete spectrum of oral and maxillofacial surgery. Graduates of the program will be prepared to pursue a contemporary, full-scope oral and maxillofacial surgery practice and be prepared for licensure and the rigors of specialty board examination.

Four-Year Residency Curriculum
The first-year residency training is divided between oral and maxillofacial surgery, internal medicine, and anesthesia rotations. Four months are spent on the anesthesia service at Broward Health Medical Center, one month on pediatric anesthesia at Joe DiMaggio Children’s Hospital, two months on the internal medicine service, and five months on the oral and maxillofacial surgery service.

Six months of the second year are spent on the oral and maxillofacial surgery service encompassing the outpatient clinics and respective Broward Health and Memorial Hospital services. Residents will have increased responsibilities this year, including overseeing the first-year residents, IV sedation cases, and operating room responsibilities. The other six months are spent on trauma/general surgery and are divided equally between Broward General and Memorial Level I trauma centers.

The third year of the program consists of expanded clinical training in oral and maxillofacial surgery at Broward Health Medical Center. The resident will function on a junior level, with experiences and expectations consistent with this level of training. This year of training includes one month of implant reconstruction and eleven months of oral and maxillofacial surgery service.
During the fourth year of the program, each resident serves as chief resident at Broward Health Medical Center and Memorial Regional Hospital. The primary responsibility of the chief resident is to oversee management of the oral and maxillofacial surgery surgical service. This includes, but is not limited to, formulating the call schedule, arranging resident case coverage of clinical responsibilities, and preoperative/postoperative patient evaluation and treatment in conjunction with designated faculty members. Residents will have rotations in implant reconstruction, craniofacial/cleft lip/palate surgery, and facial plastics.

It is expected that each resident have an abstract or poster based upon his or her research efforts for presentation at a national meeting and at the NSU CDM research day. Upon completion of the residency program, graduates will receive a certificate of training in oral and maxillofacial surgery. It is expected that all graduates will be prepared for the American Board of Oral and Maxillofacial Surgery examination and possess clinical aptitude in the full scope of oral and maxillofacial surgery.

POSTDOCTORAL ORTHODONTICS

The Department of Orthodontics and Dentofacial Orthopedics offers a 30-month program. The program is fully accredited by the Commission on Dental Accreditation. Residents are simultaneously enrolled in the orthodontic program and the Master of Science (M.S.) program. Upon completion of all requirements, they will be awarded both an M.S. degree and a Certificate in Orthodontics. A certificate-only track is not offered. Residents register for and take the American Board of Orthodontics (ABO) written examination as part of the requirements. Residents fulfilling the graduation requirements of the program will be prepared to present cases for the ABO phase III clinical exam. U.S., Canadian, and International graduates are encouraged to apply.

The full-time faculty members of this program represent a broad variety of academic, research, and clinical interests. In addition, the program employs numerous adjunct clinical faculty members, ensuring that residents are exposed to the most current ideas and techniques in all aspects of orthodontics.

Residents will treat adults, adolescents, and children and experience a variety of contemporary appliances and treatment disciplines, including orthognathic surgery. Interdisciplinary and dental facial anomalies and Grand Rounds take place on a regular basis with other postgraduate residents and their respective faculty members and facilitate the need for the treatment planning of complex cases. A diagnostic conference with all faculty members occurs daily. All residents attend these conferences.

The curriculum consists of clinical and didactic courses given through the department, as well as a core curriculum in which all postgraduate residents are enrolled. Residents are expected to be available 8:00 a.m. to 5:00 p.m., Monday through Friday and certain evenings and weekends for scheduled conferences, lectures, and seminars. It is unlikely that an individual would have time for outside work while an orthodontic resident.

Clinical Orthodontics I–IX

These courses comprise the clinical component of the postgraduate orthodontic curriculum. Students will incorporate the knowledge gained from didactic studies as they provide orthodontic services for patients with a broad variety of malocclusions. Patients with typical malocclusions—those requiring early treatment, dentofacial orthopedics, orthognathic surgery, and/or interdisciplinary care—are selected as educational models. Techniques focus on standard edgewise technique including pre-torqued and pre-angulated brackets and lingual orthodontics. Various types of treatment approaches are presented.

Orthodontic Didactic

The orthodontic didactic courses include courses and seminars offered each semester. The courses follow the didactic process, fully developing a state-of-the-art understanding of contemporary orthodontics while being deeply built upon, the specialty's historic foundations. The structure of the orthodontic didactic component of the curriculum continually contributes to residents developing a knowledge base, including evidence-based science, of sufficient depth and breadth necessary for proficiency in modern orthodontics.

CDM 5060—Orthodontic Didactic I

The first year, summer semester, didactic course curriculum consists of specialized course seminars including Cephalometrics, Biomechanics I, Introduction to Clinical Orthodontics, Management of TMJ Disorders, Tweed Wire Bending, and the Graduate Research Seminar I. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessment of student learning.
CDM 5180—Orthodontic Didactic IV
The first year, spring semester, didactic course curriculum consists of specialized course seminars including Orthodontic Theory II, which focuses on the application of theory to diagnosis and treatment planning, and the Early Orthodontic Treatment seminar. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessments of student learning.

CDM 5160—Orthodontic Didactic II
The first year, fall semester, didactic course curriculum consists of specialized course seminars including Biomechanics II, Graduate Research Seminar II, and History of Orthodontics. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessments of student learning.

CDM 5080—Orthodontic Didactic III
The first year, winter semester, didactic course curriculum consists of specialized course seminars including Orthodontic Theory I, which focuses on the application of theory to diagnosis and treatment planning, and Craniofacial Growth and Development. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessments of student learning.

CDM 5180—Orthodontic Didactic IV
The first year, spring semester, didactic course curriculum consists of specialized course seminars including Orthodontic Theory II, which focuses on the application of theory to diagnosis and treatment planning, and the Early Orthodontic Treatment seminar. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessments of student learning.

CDM 5361—Orthodontic Didactic V
The second year, fall semester, didactic course curriculum consists of specialized course seminars including Orthodontic Theory III, which focuses on the application of theory to diagnosis and treatment planning; Orthodontics and Interdisciplinary Diagnosis and Treatment Planning I; and Surgical Orthodontics I. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessments of student learning.

CDM 5351—Orthodontic Didactic VI
The second year, winter semester, didactic course curriculum consists of specialized course seminars including Orthodontic Theory IV, which focuses on the application of theory to diagnosis and treatment planning; Orthodontics and Interdisciplinary Diagnosis and Treatment Planning II; and Surgical Orthodontics II. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessments of student learning.

CDM 5362—Orthodontic Didactic VII
The second year, spring semester, didactic course curriculum consists of specialized course seminars including Orthodontic Theory V, which focuses on the application of theory to diagnosis and treatment planning, and Orthodontics and Interdisciplinary Diagnosis and Treatment Planning III. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessments of student learning.

CDM 5371—Orthodontic Didactic VIII
The third year, fall semester, didactic course curriculum consists of specialized course seminars including Orthodontic Theory VI, which focuses on the application of theory to diagnosis and treatment planning, and Orthodontics and Interdisciplinary Diagnosis and Treatment Planning IV. Each seminar series provides an in-depth approach to the specific subject matter, with seminar syllabi outlining seminar topics, assignments, and outcome assessments of student learning.

POSTDOCTORAL PEDIATRIC DENTISTRY
The Department of Pediatric Dentistry offers a 24-month, postdoctoral training program in pediatric dentistry. The program is designed to prepare residents for specialty certification by the American Board of Pediatric Dentistry (ABPD). This university- and hospital-based program includes significant hospital and extramural affiliations in South Florida.

Postgraduate core courses provide first-year residents with a didactic foundation to support the wide range of clinical situations they will experience. Hospital rotations in Pediatric Medicine, General Anesthesia, and Pediatric Emergency Medicine provide residents with clinical experience and deeper understanding of pediatric hospital practice. Lectures, seminars, guest speakers, and literature reviews occur weekly. Residents are active participants in a regional, multidisciplinary craniofacial anomalies team.

Patients requiring hospitalization and general anesthesia are treated in two area hospitals. Conscious sedation is utilized when appropriate. A partial listing of topics covered in lectures and seminars includes behavior management, restorative dental procedures, selecting and prescribing medications, pulp therapy, trauma, treatment of patients with special health care needs, and emergency management. Additional requirements, including successful completion of a mandatory, independent research project, are necessary to graduate.

Students are trained in hospital and operating room protocol including the use of general anesthetics.

CDM 6000—Pediatric Dentistry Didactic I
The aim of the course is to provide the resident with an understanding of the basic principles and theories of child development and the age-appropriate behavior responses in the dental setting, as well as the objectives of various guidance methods such as principles of communication, informed consent, and objectives of sedation and general anesthesia as behavior guidance techniques. Students will
acquire a judicious integration of systematic assessments of clinically relevant scientific evidence.

CDM 5190—Pediatric Dentistry Didactic II
The aim of the course is to provide the resident with an understanding of the mechanisms and patterns of craniofacial growth and development from prenatal through adulthood. Students will learn and understand the different mechanisms and treatment options in the different malocclusion in the child and adolescent patient; be familiar with methods of prevention of dental caries and periodontal diseases in children and adolescents; understand the complexity of the caries disease and its different manifestations; learn to diagnose and treat different caries stages; know and do advanced technique in operative procedures; and know the indications and contraindications of pulpotomy and pulpectomy in primary dentition, as well as techniques for apexification and revascularization in young, permanent teeth.

CDM 6020—Pediatric Dentistry Didactic III
The aim of the course is to provide the resident with an understanding and treatment alternatives in different clinical situations such as orofacial injuries, periodontal diseases, craniofacial disorders, special needs care patients, and medically compromised patients. Students will acquire a judicious integration of systematic assessments of clinically relevant scientific evidence.

CDM 6110—Pediatric Dentistry Didactic IV
In this didactic course, a significant revision of the main areas in pediatric dentistry will be presented by different faculty members from the pediatric dentistry department and other disciplines at NSU. The residents will acquire a judicious integration of systematic assessments of clinically relevant scientific evidence.

CDM 5090—Pediatric Dentistry Clinic I
Residents will incorporate the knowledge gained from didactic studies as they provide pediatric dentistry services for infants, children, adolescents, and patients with special health care needs with a broad variety of oral and dental problems. They will collect patient data, including dental and medical histories and appropriate radiographs and photographs; organize data into coherent and viable treatment plans; and present treatment plans to patients and their families, faculty members, and fellow residents. After a case is treated, follow-up visits and presentations will be given at six months and annually.

CDM 6120—Pediatric Dentistry Clinic IV
Residents will incorporate the knowledge gained from didactic studies as they provide pediatric dentistry services for infants, children, adolescents, and patients with special health care needs with a broad variety of oral and dental problems. They will collect patient data, including dental and medical histories and appropriate radiographs and photographs; organize data into coherent and viable treatment plans; and present treatment plans to patients and their families, faculty members, and fellow residents. After a case is treated, follow-up visits and presentations will be given at six months and annually.

POSTDOCTORAL PERIODONTICS
The postdoctoral program in periodontics is a 36-month certificate program that fulfills the specialty requirements of the American Dental Association Commission on Dental Accreditation and the American Board of Periodontology. The resident may also elect to pursue the optional Master of Science in Dentistry degree, which may be earned concurrently with the certificate course of study. The program is open to dentists who have graduated (or will graduate) from an accredited United States or Canadian dental school or from an international dental school that provides an equivalent educational background and standing. Completion of a General Practice Residency, Internship, Advanced Education in General Dentistry, or other post-dental school professional activities are encouraged but not required.

The program consists of a didactic core curriculum in basic and behavioral sciences, a series of seminars in periodontology and implant dentistry, literature review seminars, periodontal prosthesis, and intravenous moderate sedation. Residents will participate as clinical instructors in the predoctoral periodontology clinic and perform research related to periodontology.
The program is designed so that, at the conclusion of the residents' training, they can provide comprehensive periodontal and implant dentistry care using a variety of surgical and nonsurgical modalities that encompass the full spectrum of the current state-of-the-art procedures. Residents participate in a variety of educational activities that prepare them for careers in clinical practice, education, or research, giving them the skills and knowledge to successfully pursue certification by the American Board of Periodontology.

CDM 6030—Advanced Clinical Periodontics I
This course offers clinical instruction related to the diagnosis, prognosis, and treatment of periodontal diseases.

CMD 6031—Foundation of Implant Dentistry
This course is designed to provide an advanced understanding of the fundamentals and principals of implant dentistry. It will provide the information necessary to allow first-year residents to utilize a team approach for placing and restoring the dentition with dental implants. During this course, first-year residents and faculty members will analyze and discuss the classic and current implant dentistry literature.

CDM 6032—Immunoregulation of Periodontal and Peri-Implant Diseases
This course integrates the knowledge of immunoregulation to wound healing and current treatment strategies. At the completion of this course, all the residents will understand the physiological, biochemical, and immunological regulation of healthy and diseased periodontal and peri-implant tissues. First-, second-, and third-year residents will also recognize the rationale of current materials and techniques used in periodontology and implant dentistry in relation to pathogenesis of periodontal and peri-implant diseases.

CDM 6033—Current Literature, Case Discussion, and Topic Presentation in Periodontics and Implant Dentistry
During this didactic course, first-, second-, and third-year residents will learn how to present a case and a topic using the material learned in seminars and core courses. This course will help residents to prepare for the In-Service exam and American Board of Periodontology Exam. At the completion of the course, residents will be able to stay up to date with the current literature in periodontics and implant dentistry.

CDM 6034—Classic Literature in Periodontology and Implant Dentistry
Classic Literature is a participatory seminar course for residents in periodontics in their first, second, and third year of training. Residents are responsible for obtaining, reading, abstracting, and understanding articles that have been identified as required reading. Additionally, residents are expected to be familiar with principles, materials, methods, and statistical analyses, which are necessary to understand the articles under discussion. Most importantly, residents are expected to collate the articles into a broader understanding, which becomes the basis for the therapy they provide to their patients. The seminar is led by a postgraduate resident on a rotating basis. The seminar leader is responsible for the planning and organization of the seminar, ensuring that the topic is covered in a logical basis with articles grouped into appropriate sections.

CDM 6035—Advanced Periodontics: Diagnosis and Treatment Planning
This course offers didactic instruction related to diagnosis and treatment of periodontal diseases. First-year residents and faculty members will discuss classic and current literature related to the diagnosis, prognosis, and nonsurgical and surgical treatment modalities of periodontal diseases. First-year residents will understand all the aspects related to periodontal examination, diagnostic, and photographs for case documentation.

CDM 6036—Advanced Clinical Periodontics IV
This course offers clinical instruction and demonstrations in the use of advanced periodontal and implant therapy. Residents will be exposed to multidisciplinary cases and will be able to make diagnosis and execute advanced treatment plans.

CDM 6070—Advanced Clinical Periodontics VII
This course will provide residents with a deep knowledge of quality patient care and allow them to become proficient in providing periodontal and implant surgical care. Also, it will help them develop the capabilities necessary to participate as members of the total health care team, as well as correlate the dental and medical literature with clinical practice.

CDM 6130—Advanced Clinical Periodontics II
This clinical course offers instruction related to the full scope of periodontal treatment planning. Residents will be exposed to diverse treatment modalities, including surgical and nonsurgical therapies.

CDM 6150—Advanced Clinical Periodontics V
This course offers clinical instruction in the treatment of advanced and complexes cases. Periodontal, prosthodontics, and implant therapy modalities will be emphasized.

CDM 6170—Advanced Clinical Periodontics VIII
This course is designed to offer instruction on clinical and practice management. Residents will be assessing their clinical outcomes and be able to understand the importance of continuity maintenance of their cases.
CDM 6230—Advanced Clinical Periodontics III
This clinical course provides instruction that will lead the resident to have sufficient number of diagnostic, nonsurgical, and surgical clinical experiences. It will also cover implant therapy as a treatment modality.

CDM 6250—Advanced Clinical Periodontics VI
This course is designed to offer clinical instruction in the treatment and patient management of complex cases in conjunction with other disciplines.

POSTDOCTORAL PROSTHODONTICS
The 36-month postdoctoral program combines clinical experience with didactic instruction leading to a Certificate in Prosthodontics. Students may also elect a course of study leading to a master's degree program. The certificate program satisfies the formal training requirements for eligibility for the American Board of Prosthodontics examination, and students are encouraged to pursue board certification. The program is fully accredited by the American Dental Association Commission on Dental Accreditation.

The didactic portion of the program includes a core curriculum designed to provide all postdoctoral students with a basic interdisciplinary education and a prosthodontics curriculum based on the review of classic and current dental literature, interdisciplinary seminars, and treatment planning presentations. The program also includes research, teaching, and continuing education courses by visiting faculty members.

The clinical portion of the program consists of extensive patient care within the different treatment modalities in prosthodontics (fixed, removable, and implant) and exposure to patients suffering from TMD or sleep-related disorders. It also encompasses the surgical placement of implants, as well as laboratory work supported by state-of-the-art technology and dental materials.

In addition to the postdoctoral core courses offered during the first year of the program, all postdoctoral prosthodontics residents are required to take the following courses:

CDM 7300—Advanced Fixed Prosthodontics Course
This course is designed to standardize and elevate the first-year, advanced prosthodontics resident’s clinical and laboratory knowledge in Fixed Prosthodontics. Techniques and skills required at a laboratory level to prepare and fabricate diagnostic wax-ups, single crowns, fixed partial dentures, and provisionalals will be covered. In addition, demonstrations and hands-on training are to be provided in the simulation laboratory on teeth preparations for indirect and direct restorations and electrosurgery techniques for tissue management.

CDM 5001—Advanced Dental Materials
This is an advanced course covering dental materials science, test methods, properties of dental materials, and clinical applications.

CDM 7000—Advanced Didactic Prosthodontics I
This course offers didactic instruction related to the diagnosis and treatment of the advanced prosthodontic patient. Residents will review the classic and current literature related to fixed, removable, and implant prosthodontics. Articles are selected and discussed among the residents and faculty members. Residents will learn to analyze, summarize, and apply the literature to their clinical practice. Ultimately, residents will learn how to elaborate comprehensive treatment plans based on evidence-based dentistry.

CDM 6090—Advanced Clinical Prosthodontics I
This course focuses on the clinical aspect of prosthodontics, including fixed, removable, and dental implant-related therapies. Residents provide comprehensive therapy beginning with the complete examination, diagnosis, treatment planning, and treatment of patients with advanced prosthetic needs.

CDM 7100—Advanced Didactic Prosthodontics II
This course offers didactic instruction related to diagnosis and treatment of advanced prosthodontic cases. Residents will be able to demonstrate integration of fixed, removable, and implant dentistry in comprehensive diagnosis and treatment planning. Residents will also review the classic and current literature related to advanced prosthodontics. Articles are selected and discussed among the residents and faculty members. Residents will learn to analyze and apply the literature to their clinical practice. Case presentations involving multidisciplinary patient care will integrate concepts in the comprehensive understanding and planning of advanced cases.

CDM 6190—Advanced Clinical Prosthodontics II
This course focuses on the clinical aspect of prosthodontics, including fixed, removable, and dental implant-related therapies. Residents provide comprehensive therapy beginning with the complete examination, diagnosis, treatment planning, and treatment of patients with advanced prosthetic needs. In addition, residents will start developing clinical skills relating to implant dentistry, including the placement and maintenance of dental implants.

CDM 7020—Advanced Didactic Prosthodontics III
Residents will continue to review all the concepts related to diagnosis, prognosis, and treatment planning of the prosthodontic patient in areas of fixed, removable, and implant prosthetics. This didactic course will also offer instructions on surgical and nonsurgical treatment modalities, including implant therapy.
CDM 6290—Advanced Clinical Prosthodontics III
This course focuses on the clinical aspect of prosthodontics, including fixed, removable, and dental implant-related therapies. Residents provide comprehensive therapy beginning with the complete examination, diagnosis, treatment planning, and treatment of patients with advanced prosthetic needs.

CDM 7120—Advanced Didactic Prosthodontics IV
This course provides in-depth knowledge related to the diagnosis, treatment, and prognosis of the advanced prosthodontic patient in areas of fixed, removable, and implant prosthodontics. Residents will continue reviewing the classic and current literature related to advanced prosthodontics. Articles are selected and discussed among the residents and faculty members. Residents will learn to analyze and apply the literature to their clinical practice. Case presentations involving multidisciplinary patient care will integrate concepts in the comprehensive understanding and planning of advanced cases.

CDM 7010—Advanced Clinical Prosthodontics IV
This course focuses on the clinical aspect of prosthodontics, including fixed, removable, and dental implant-related therapies. Residents provide comprehensive therapy beginning with the complete examination, diagnosis, treatment planning, and treatment of patients with advanced prosthetic needs. In addition, residents will start developing clinical skills relating to implant dentistry, including the placement and maintenance of dental implants.

CDM 7040—Advanced Didactic Prosthodontics V
This course offers didactic instruction related to diagnosis and treatment of advanced prosthodontic cases. Residents will be able to demonstrate integration of fixed, removable, and implant dentistry in comprehensive diagnosis and treatment planning. Residents will also review the classic and current literature related to advanced prosthodontics. Articles are selected and discussed among the residents and faculty members. Residents will learn to analyze and apply the literature to their clinical practice. Case presentations involving multidisciplinary patient care will integrate concepts in the comprehensive understanding and planning of advanced cases.

CDM 7110—Advanced Clinical Prosthodontics V
This course focuses on the clinical aspect of prosthodontics, including fixed, removable, and dental implant-related therapies. Residents provide comprehensive therapy beginning with the complete examination, diagnosis, treatment planning, and treatment of patients with advanced prosthetic needs.

CDM 7140—Advanced Didactic Prosthodontics VI
This course will offer advanced didactic information in the diagnosis and treatment of the advanced prosthodontic patient. Multidisciplinary approaches and modalities will be covered and instructed. This course offers a complete program on diagnosis, treatment planning, prognosis, and maintenance of comprehensive and prosthetically involved patients. Patient management and patient communication will be emphasized. Practice management will also be covered.

CDM 7210—Advanced Clinical Prosthodontics VI
(CRN 10043)
This course focuses on the clinical aspect of prosthodontics including fixed, removable, and dental implant-related therapies. Residents provide comprehensive therapy beginning with the complete examination, diagnosis, treatment planning, and treatment of patients with advanced prosthetic needs.

CDM 7030—Advanced Clinical Prosthodontics VII
(CRN 7030)
This course focuses on the clinical aspect of prosthodontics, including fixed, removable, and dental implant-related therapies. Residents provide comprehensive therapy beginning with the complete examination, diagnosis, treatment planning, and treatment of patients with advanced prosthetic needs.

CDM 7130—Advanced Clinical Prosthodontics VIII
(CRN 40448)
This course focuses on the clinical aspect of prosthodontics, including fixed, removable, and dental implant-related therapies. Residents provide comprehensive therapy beginning with the complete examination, diagnosis, treatment planning, and treatment of patients with advanced prosthetic needs.

Anticipated Expenses
Equipment costs for each program will be equal to or less than the average for all U.S. dental schools.

Admissions Requirements—Postdoctoral Programs
The College of Dental Medicine selects postdoctoral students based on application content, academic record, letters of recommendation, test scores (if applicable), and personal interview. Most of the postdoctoral programs utilize the PASS application process, with the exception of endodontics and Advanced General and Special Needs Dentistry. Applicants are required to complete an NSU College of Dental Medicine application for postdoctoral students for all specialties. Applicants should refer to dental.nova.edu for program-specific requirements.

Prior to matriculation, applicants must have completed a D.M.D., D.D.S., or an equivalent degree.
Application Procedures
Applicants must send all required materials listed to

Nova Southeastern University
Enrollment Processing Services
College of Dental Medicine, Office of Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

The deadlines for applications vary by program and can be found on the admissions website (dental.nova.edu).

1. the completed College of Dental Medicine application for postdoctoral students
2. a nonrefundable application fee of $50
3. an official transcript from each college, professional school, or university attended

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Attn: Documentation Center
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com

- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Dental Medicine Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

4. The applicant must provide an official letter of graduation from the dean or designee of that institution, supporting the granting of the dental degree from that institution.

The applicant must arrange for the following to be sent to NSU.
1. official test scores, if applicable
   a. AEGD applicants will need to submit National Board scores
   b. Orthodontic program applicants will need to submit Graduate Record Examination (GRE) scores
   c. Oral and Maxillofacial Surgery applicants will need to submit National Board of Medical Examiners Comprehensive Basic Science Examination scores.

2. three letters of recommendation (They must be completed by dental school faculty members who are well acquainted with the applicant’s abilities or by individuals who can provide information relevant to the applicant’s potential. Letters from friends or family members are not acceptable.) For those programs using the PASS application process, applicants may also submit up to five Personal Potential Indexes (PPI) with their PASS application.

Upon receipt of the completed application and the required credentials, the director of each postdoctoral program, along with the Committee on Admissions, will select applicants to be interviewed. Those selected will be notified in writing. Not all applicants will be granted an interview. All applicants who are admitted to the college must be interviewed, but an invitation to appear for an interview should not be construed as evidence of acceptance.

Postdoctoral Tuition and Fees

- Tuition for all postdoctoral programs for 2016–2017 (subject to change by the board of trustees without notice) is $44,100. A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually.

- Acceptance/Preregistration fee is $2,000. This fee is required to reserve the accepted applicant’s place in the entering first-year, postdoctoral class. This advance payment will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is payable within two weeks of an applicant’s acceptance.

The first semester’s tuition and fees, less the $2,000 previously paid, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met. It is extremely important that applicants be committed to meeting their financial responsibilities during their training. This should include tuition, living expenses, books, equipment, and miscellaneous expenses.

It is mandated that each student carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.
Master of Science in Dentistry

The goal of the Master of Science in Dentistry Program is to provide advanced training in research and research methodology to students, primarily those enrolled in one of the College of Dental Medicine’s postdoctoral programs. All master’s degree candidates are required to complete a core curriculum of courses, emphasis track courses, and a research thesis. Research in this program includes various aspects of craniofacial/oral health and disease. Graduates of this master’s degree program will be trained to think critically, enabling them to more readily pursue research activities and academic careers. For postdoctoral students enrolled in the master’s degree program, requirements for both postdoctoral program certification and the Master of Science in Dentistry program will be fulfilled concomitantly. It is anticipated that students who are accepted into the master’s degree program will complete the program requirements within two to three years. Final decisions regarding a student's participation in this master’s degree program are at the dean’s discretion.

Admissions Requirements
Those applying for entry into the Master of Science in Dentistry program as full, degree-seeking candidates must meet the following eligibility requirements:

1. Applicants must be matriculated in a CDM clinical training program.

2. Applicants are required to submit a letter of interest in this program articulating their career plan, capabilities, special achievements, etc., along with two letters of reference from individuals familiar with the candidate’s aptitude to perform adequately at a graduate level.

3. Applicants must complete and submit the application for admission to the program and submit a description of their proposed research projects.

Application Procedures
Applicants must send all required materials listed to

Nova Southeastern University
Enrollment Processing Services
College of Dental Medicine, Office of Admissions
3301 College Avenue, P.O. Box 299000
Fort Lauderdale, Florida 33329-9905

1. the completed College of Dental Medicine application

2. a nonrefundable application fee of $50

3. an official transcript from each college, professional school, or university attended

Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed following.

- World Education Services, Inc.

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service to Nova Southeastern University, Enrollment Processing Services, College of Dental Medicine Admissions, 3301 College Avenue, P.O. Box 299000, Fort Lauderdale, Florida 33329-9905.

4. an official letter of graduation from the dean or designee of the foreign institution, supporting the granting of the dental degree from that institution

The applicant must also arrange for the following to be sent to NSU.

1. official National Board scores (Please request the secretary of the National Board of Dental Examiners to forward all scores of the dental boards. The National Board is located at 211 East Chicago Avenue, Chicago, Illinois, 60611. Applicants who have not taken the National Boards must submit a letter of explanation.)

2. three letters of recommendation completed by dental school faculty members who are well acquainted with the applicant’s abilities or by individuals who can provide information relevant to the applicant’s potential

Upon receipt of the completed application and the required credentials, the director of each program, along with the Committee on Admissions, will select applicants to be interviewed. Those selected will be notified in writing. Not all applicants will be granted an interview. All applicants...
who are admitted to the college must be interviewed, but an invitation to appear for an interview should not be construed as evidence of acceptance.

Tuition and Fees
Tuition for 2016–2017 is $580 per credit hour. Tuition for 2017–2018 will subsequently be posted on our website (dental.nova.edu). A Health Professions Division general access fee of $145 is required each year. An NSU student services fee of $1,050 is also required annually. All tuition and fees are subject to change by the board of trustees without notice.

It is required that each student carry adequate personal medical and hospital insurance. Students may avail themselves of the hospitalization insurance plan obtainable through the university.

Course Descriptions
CDM 6200M—Effective Teaching, Learning, and Assessment Methodology
Faculty members in health care fields generally do not receive formal training to acquire teaching skills. This course will be beneficial for professional students who have the interest in pursuing an academic/teaching career. This course focuses on teaching and facilitating skills, and teaching competencies to prepare participants to be effective teachers in the future. Participants will also learn various types of student learning and assessment methods. This course will also inform participants concerning ethics and diversity in higher education, which enables them to interact with and teach diverse students appropriately.

For the participants interested in perusing faculty appointments, this course will enable an appreciation that education is an imperative part of people's lives. In order for students to attain quality education and learn thoroughly, they must have effective teachers. This course will help prepare students to fulfill that role.

CVR 7200—Bioethics and Ethical Issues in Health Care
Health care professionals are required to act morally and ethically. This course is designed to expand the student's basic understanding of ethics, promoting ethical awareness and enabling students to derive better health care decisions that reduce the risk of potential ethical consequences. Exposing students to bioethics and controversial ethical issues typically encountered in current health care allows them to practice making difficult decisions. Students will synthesize and implement strategies for applying morals, values, and ethics systematically in the various settings in which health care is delivered. Considering the perspectives of all stakeholders and the role of the health care provider, patient advocate, professional, and consumer of medical care, students will gain workable knowledge of contemporary ethical issues and appreciate that ethics permeate the majority of decisions made in health care.

CVR 7300—Biostatistics
This introductory statistical course will introduce elementary methods for presenting biological data in summary form, analyzing biological data, and designing experiments. It is not a mathematics course, so will not stress derivations of formulae but, rather, will emphasize the application of statistical ideas and methods to the analysis and interpretation of biological experiments and comparative data. The student will be able to assess a situation involving data analysis, state the null and alternative hypotheses proposed, decide on the correct statistical procedure to test the null hypothesis and the assumptions of the test used, calculate the statistic, assess its statistical significance, and interpret the data in light of the calculated result. Assessment of a student's performance will be done through the use of problem sets, quizzes, and a final exam.

CVR 7310—Fundamentals of Statistical Inference
This course is the second course in the biostatistics sequence and is intended for consumers of statistics in the biological and medical fields, as well as researchers. It will concentrate on the more advanced methods of statistical analysis that are typical of biological and medical applications of statistics. For this course, the student will need to be familiar with basic statistics and statistical techniques as presented in CVR 7300. Students will be using the statistical program JMP to perform statistical processing; therefore, students must have basic skills in the use of JMP.

CVR 7400—Clinical Research Design
This course will provide students with an understanding of the basic methods and approaches used in health-related research. A major emphasis of the course will be on the conceptualization and design of research studies. The course will cover ethics, formulation of research questions, study design, reliability, validity, sampling, measurement, and interpretations of research findings. It will prepare students to critically evaluate published research articles, to abstract information and interpret findings appropriately from the published literature, and to design sound research studies. The course will be both theoretical and practical. Students will be challenged to apply the theoretical concepts presented in the classroom and in the readings to design studies to address health-related issues of their choice.

CVR 7500 Information Science for Clinical Research
This course introduces the student to the concept of a literature review as it relates to the development of a research proposal. Students will specify a research problem and provide an appropriate review of the literature. This literature review will identify and discuss related research
that sets the proposed project within a conceptual and theoretical context. Students will learn to use reference sources (both electronic and hard copy) available in most public and academic libraries and/or via the Internet to locate and evaluate literature pertinent to clinical and basic vision science and basic research in related medical sciences. Use of evidence-based medicine as a research tool will be covered. Students will be expected to identify and effectively utilize all relevant information resources in their geographical area essential to the preparation of a thorough, high-quality literature review.

**CVR 7600—Introduction to Research Funding and Proposal Development**

This course enables the student to gain an in-depth understanding of the essential components of a well-written research proposal that addresses an identified scientific problem and the process for submitting the proposal to an agency/organization, requesting funding support to study the problem. Students will become familiar with a number of funding sources, including federal and state government and private foundations and corporations that support vision or dental research projects, and learn to use a variety of resources to target potential funding sources. They will become familiar with various grant-related terminology, as well as guidelines, rules, and regulations of awarding agencies, with particular focus on the National Institutes of Health (NIH) organization.

Students will be expected to come prepared to explore and discuss potential research areas they would like to study and to focus on ideas about projects to address their interests. They will be able to demonstrate their understanding of the essential components of a well-written proposal, including the significance statement, objectives and hypotheses, experimental design and methods, and the budget through class handouts, virtual discussions, and appropriate class activities related to the required readings.

**CVR 7800—Ethical and Legal Issues in Human Subjects Research**

This course introduces the ethical and regulatory aspects involved in human subject research. Students will gain understanding of the history that has shaped the rules that today govern research with human subjects, as well as be introduced to issues that researchers in the 21st century face. Students will become familiar with U.S. regulations that govern human subject research and the protection systems that are created as a part of those regulations. Issues related to research with a variety of vulnerable populations will also be discussed.

Students will be expected to come prepared to explore and discuss the variety of critical issues researchers face when they hope to conduct human subject research. They will be able to demonstrate an understanding of the key elements of informed consent documents, including statements required by U.S. regulations. Class activities related to the readings and CITI modules will permit students to gain an understanding of these topics while also completing the NSU required CITI program.

**CVR 7900 Introduction to Biomedical Writing**

This course will review the process of writing a research paper for a peer-reviewed scientific journal and provide practical experience in drafting, reviewing, and revising papers. The course will provide an overview of the content expected in each section of a biomedical paper, including writing skills and instructions for preparing a logical organization of relevant material written and presented in a clear, concise, and accurate manner. Students will prepare a first draft of a paper based on their own research, and receive feedback in the form of written comments from classmates and the instructor to help guide revisions. **Prerequisite:** Students are required to at least have preliminary results data to utilize in course assignments. For that reason, it is recommended that students defer enrollment in CVR 7900 until later semesters, once results are available. Please speak with instructor if there are extenuating circumstances.

**CVR 8220—Epidemiology**

This course provides a study of the basic principles of epidemiology with emphasis on the application of epidemiology to clinical practice.
College of Nursing
College of Nursing

Mission Statement
The mission of the Nova Southeastern University College of Nursing is to provide quality, professional undergraduate and graduate nursing education. We will prepare culturally sensitive and competent nursing leaders who have knowledge and skills that are relevant, futuristic, and responsive to rapidly changing health care trends. Courses are provided in an environment that fosters scholarly inquiry, professional values, interdisciplinary collaboration, and community partnerships.

Accreditation
The Bachelor of Science in Nursing, Master of Science in Nursing, and Doctor of Nursing Practice programs at Nova Southeastern University are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, 202-887-6791. The Doctor of Nursing Practice program’s initial accreditation visit with CCNE is planned for 2014.

Program Information
The College of Nursing offers Bachelor of Science in Nursing (B.S.N.) and Master of Science in Nursing (M.S.N.) degree programs, a Doctor of Nursing Practice (D.N.P.), and a Ph.D. in Nursing, with a focus on Nursing Education. The B.S.N. may be earned through the entry B.S.N. program for students who have completed NSU’s pre-nursing track or have already met the program’s general education requirements. The R.N. to B.S.N. and R.N. to M.S.N. completion programs are also available for licensed R.N.s holding an associate’s degree or diploma in nursing. The M.S.N. program offers three nonclinical concentrations—nursing education, nursing informatics, and health systems leadership. To obtain a clinical M.S.N. in an advanced practice registered nurse (A.P.R.N.) role, the college offers preparation for certification as a family nurse practitioner (FNP) or in geriatric acute care nurse practitioner (GAACNP). All programs focus on developing nursing professionals to assume leadership roles in the complex health care environment.

College Administration
Marcella Rutherford, Ph.D., M.B.A., M.S.N.
Dean, College of Nursing

Barbara E. Barrett, D.N.P., B.B.A., A.R.N.P.
Associate Dean, Academic Affairs (retiring 2017)

Andra Hanlon, Ph.D., A.R.N.P., CPNP-PC
Associate Dean, Academic Programs

Jo Ann Kleier, Ph.D., Ed.D., ACNP-BC
Associate Dean, Research and Program Compliance

Theresa Brahim, D.N.P., A.R.N.P.
Program Director, Entry B.S.N. Program—Miami

Susan Holland, M.S.N., NEd., R.N.
Program Director, Entry B.S.N. Program—Fort Myers

Denise Howard, D.N.P., M.S.N, R.N.
Program Director, R.N. to B.S.N., R.N. to M.S.N., and Nonclinical M.S.N. Programs

Tina Malone, D.N.P., A.R.N.P., FNP-C
Program Director, M.S.N.—A.P.R.N. Program—Tampa

C. Christine Orton, Ph.D., A.R.N.P.
Program Director, M.S.N.—A.P.R.N. Program—Palm Beach

Eglintine Rigaud, Ph.D., A.R.N.P., WHNP-BC
Interim Program Director, D.N.P. and Ph.D. Programs

Jeanne Siegel, Ph.D., A.R.N.P., FNP-BC
Program Director, Entry B.S.N. Nursing Program—Fort Lauderdale
The Master of Science in Nursing Program is an online degree program for graduates of Bachelor of Science programs with a major in nursing or other fields. Students who hold Registered Nurse (R.N.) licensure who enter the M.S.N. program without a B.S.N. degree, but with a B.S. or B.A. degree in another field, will be required to enroll in NSG 4900—Introduction to Graduate Studies in their first semester of admission to the M.S.N. program. This course is only offered in the fall term. Three concentrations are offered: nursing informatics, nursing education, and health systems leadership.

- Students can transform the landscape of patient care through Nursing Informatics. In a program that blends leadership skills with data management, students will learn how to catalyze the evolution of nursing through the evaluation and implementation of new technology. They will facilitate access to critical information, improving patient outcomes, while refining the health care experience for providers and recipients alike.

- The next generation of nursing professionals require quality instructors to flourish in the ever-changing field of health care. With courses focusing on clinical decision making and curriculum development, the Nursing Education concentration will prepare its students to provide future generations with the guidance they need. Students in this concentration will be prepared for career paths in staff development, vocational-technical training, or community college education. Graduates interested in teaching in B.S.N. or higher programs would then proceed through the Ph.D. in Nursing program, which focuses on nursing education.

- The Health Systems Leadership concentration can help students assume the leadership roles that they deserve. By studying quality initiatives and the business of health care, students will understand how to make complex decisions that improve patient care and employee morale. They will gain the skills needed to inspire peers and take their organizations to new heights.

All M.S.N. students take 15 semester hours of core foundational nursing courses online. Nonclinical M.S.N. students take an additional 21 semester hours of specialty courses, determined by their chosen concentration. This includes 3 semester hours in a face-to-face practicum experience, reinforcing the skills acquired throughout the program. Thus, a total of 36 semester hours are required to complete the nonclinical M.S.N. program. Courses are taught online by faculty members with advanced preparation and extensive experience in their respective fields. Additional elective courses may be taken by students with special interests. All concentrations serve as a foundation for doctoral study.

Admissions Requirements for Fall 2016 and Winter 2017 Entering Classes
Prospective students for the nonclinical Master of Science in Nursing are selected for admission based on application content, academic record, professional nursing licensure, and evaluation forms.

Admission to the M.S.N. program requires the following:
- a Bachelor of Science (B.S.) or a Bachelor of Arts (B.A.) degree from a regionally accredited college or university*

Nursing degrees must be accredited by the Accreditation Commission for Education in Nursing (ACEN) [formerly National League for Nursing Accrediting Commission (NLNAC)] or the Commission on Collegiate Nursing Education (CCNE).
- a B.S./B.A. GPA of 3.0 on a 4.0 scale

If the applicant has an associate's degree and a B.S.N. degree, the GPA of the two will be averaged.
- a current, active, and unencumbered, U.S. R.N. license

The license must remain current and unencumbered in the jurisdiction of the practicum throughout the program.
- completion of a college-level statistics course with a grade of C or better
- two references, completed by individuals other than relatives (suggested sources include professors, academic advisers, and professional nursing references)

* Students who enter the M.S.N. program without a B.S.N. will be required to enroll in NSG 4900—Introduction to Graduate Studies in their first semester. This course is only offered in the fall.

For more information, call the College of Nursing at (954) 262-1923 or 800-356-0026, ext. 21923.

Application Procedures for Fall 2016 and Winter 2017 Entering Classes
The NSU College of Nursing participates in the centralized applications service called NursingCAS. NursingCAS does not take part in student selection. The NursingCAS application may be obtained
- online at nursingcas.org
- by calling NursingCAS at (617) 612-2880
Tuition and Fees

Tuition for academic year 2016–2017 is $665 per credit hour. Tuition for 2017–2018 will subsequently be posted on our website (nursing.nova.edu/msn). An NSU student services fee of $1,050 is required annually. A Health Professions Division general access fee of $145 is also required each year.

Acceptance fee is $200. This fee is required to reserve the accepted applicant's place in the class. This advanced payment will be deducted from the tuition payment due by registration day, but is nonrefundable in the event of a withdrawal. It is due within two weeks of an applicant's acceptance.

All tuition and fees are subject to change by the board of trustees without notice.

The first semester's tuition and fees, less the $200 previously paid tuition deposit, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

Each student is required to carry adequate personal medical and hospital insurance. Students may purchase health insurance through NSU. Students who have adequate personal medical and hospital insurance may waive NSU's health insurance by filling out the Student Health Insurance Waiver available through the Bursar's Office (nova.edu/bursar/health-insurance).

Students are responsible for their own transportation to clinical agencies and other off-campus locations related to their program.

There are a number of national, state, and hospital grants available for the nursing student. Additionally, the growing shortage of nurses in the United States has driven down student loan interest rates, falling below typical offerings for other professions. The Office of Student Financial Assistance and the College of Nursing are eager to assist you in exploring all of your financial aid options. You can review scholarship opportunities at nursing.nova.edu/students/scholarships.html, and can speak to a financial aid representative by calling (954) 262-3380. Do not hesitate to ask us for help.

Academic Policies

The following academic policies apply to all students in the graduate nursing program.

Transfer Credits

No more than 6 graduate credits may be transferred into the M.S.N. program from other graduate programs. Courses will be evaluated for credit toward the M.S.N. degree by the program director, whose decision will be final. To be considered for credit, a course must have been taken at
The applicant is required to present adequate evidence that the factors that caused the prior inadequate academic performance have changed significantly so that there is reasonable expectation that the applicant can perform satisfactorily if permitted to resume his or her study. Readmission will be at the discretion of the program director.

Graduation Requirements
To receive a nonclinical M.S.N. degree, all students must fulfill the following requirements:

- successfully complete a minimum of 36 semester hours of coursework (for the M.S.N. specialty tracks of nursing education, health systems leadership, and nursing informatics)
- satisfactorily complete all program requirements for the degree with a grade of B- or higher
- apply for graduation
- have satisfactorily met all financial and library obligations
- receive a recommendation for graduation by the program director

Total Nursing Informatics Semester Hours 21
The Master of Science in Nursing (M.S.N.)—Advanced Practice Registered Nurse (A.P.R.N.) program is a hybrid degree program for the registered nurse (R.N.) with a bachelor's degree. Students who enter the M.S.N. program without a B.S.N. degree, but with a B.S. or B.A. degree in another field, will be required to enroll in NSG 4900—Introduction to Graduate Studies in their first semester of admission to the M.S.N. program. This course is only offered in the fall term. Two concentrations are offered: Family Nurse Practitioner (FNP) and Gero-Adult Acute Care Nurse Practitioner (GAACNP).

• Provide advanced treatment for patients across the life span. Understand the complex nature of maternal and pediatric care. As a Family Nurse Practitioner, you will be well-prepared to care for parents and children alike. This concentration is presented in a hybrid format at NSU’s Palm Beach and Tampa campuses.

• The Gero-Adult Acute Care Nurse Practitioner concentration is for those nurses interested in providing restorative care in rapidly changing clinical conditions. It will prepare nurses for advanced patient care and specialty practice. It is presented in an executive format (one weekend per month) at NSU’s Palm Beach campus.

All M.S.N. students take 15 semester hours of core foundational nursing courses online. GAACNP students take an additional 36 credits of specialty courses. FNP students take 37 credits of specialty courses.

Admissions Requirements for Fall 2016 and Winter 2017 Entering Classes
Prospective M.S.N.—A.P.R.N. students are selected for admission based on application content, academic record, professional nursing licensure, active clinical experience, and references.

Admission to the M.S.N.—A.P.R.N. program requires the following:
• a Bachelor of Science (B.S.) or a Bachelor of Arts (B.A.) degree from a regionally accredited college or university*

Nursing degrees must be accredited by the Accreditation Commission for Education in Nursing (ACEN) [formerly National League for Nursing Accrediting Commission (NLNAC)] or the Commission on Collegiate Nursing Education (CCNE).
• a B.S./B.A. GPA of 3.0 on a 4.0 scale

If the applicant has an associate's degree and a B.S.N. degree, the GPA of the two degrees will be averaged.
• a current, active, and unencumbered state of Florida R.N. license

This license must remain active, without discipline, and in the state of Florida, throughout the program.
• completion of a college-level statistics course (from a mathematics department) with a grade of C or better
• at least one year of current clinical experience (direct patient care)
• CV/résumé
• two references, completed by individuals other than relatives (suggested sources include professors and academic advisers, as well as at least one professional nursing reference)
• living within a 150-mile drive from the program campus

* Students who enter the M.S.N.—A.P.R.N. program without a B.S.N. will be required to enroll in NSG 4900—Introduction to Graduate Studies in their first semester. This course is only offered in the fall.

For more information, call the College of Nursing at (954) 262-1923 or 800-356-0026, ext. 21923.

Application Procedures for Fall 2016 and Winter 2017 Entering Classes
The NSU College of Nursing participates in the centralized applications service called NursingCAS. NursingCAS does not take part in student selection. The NursingCAS application may be obtained
• online at nursingcas.org
• by calling NursingCAS at (617) 612-2880

The deadline to complete and submit the NursingCAS and NSU applications will be July 15 for fall admission and November 15 for winter admission. The Office of Admissions works on a rolling basis. Applications are accepted year-round.

1. Send supporting documents to NursingCAS.
   a. All official college transcripts from undergraduate, graduate, and professional institutions attended must be sent to NursingCAS directly from those institutions.
   Send all transcripts to
   NursingCAS
   P.O. Box 9201
   Watertown, Massachusetts 02471
b. Coursework taken at a foreign institution must be evaluated for U.S. institution equivalence by an approved National Association of Credential Evaluation Services (NACES) organization, such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com

- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org

It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service.

c. Two recommendation forms must be completed by individuals other than relatives. (It is suggested that one letter be from a faculty member who can attest to the potential success of the student in the A.P.R.N. program and one be from the current employer.) Have accurate contact information for these individuals ready to be entered online during the application process.

d. M.S.N.—A.P.R.N. students must submit a copy of their active, unencumbered Florida R.N. license. The license must remain active and unencumbered in the state of Florida throughout the length of the program.

e. Applicants must submit a current CV or résumé.

2. Prospective students must submit an online application at apply.nova.edu.

Tuition and Fees

Tuition for academic year 2016–2017 is $700 per credit hour. Tuition for 2017–2018 will subsequently be posted on our website (nursing.nova.edu/aprn). An NSU student services fee of $1,050 is required annually. A Health Professions Division general access fee of $145 is also required each year. A lab fee of $100 is required annually as well.

Acceptance fee is $200. This fee is required to reserve the accepted applicant’s place in the class. This advanced payment will be deducted from the tuition payment due by registration day, but is nonrefundable in the event of a withdrawal. It is due within two weeks of an applicant’s acceptance.

All tuition and fees are subject to change by the board of trustees without notice.

The first semester’s tuition and fees, less the $200 previously paid tuition deposit, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

Each student is required to carry adequate personal medical and hospital insurance. Students may purchase health insurance through NSU. Students who have adequate personal medical and hospital insurance may waive NSU’s health insurance by filling out the Student Health Insurance Waiver available through the Bursar’s Office (nova.edu/bursar/health-insurance).

Students are responsible for their own transportation to clinical agencies and other off-campus locations related to their program.

There are a number of national, state, and hospital grants available for the nursing student. Additionally, the growing shortage of nurses in the United States has driven down student loan interest rates, falling below typical offerings for other professions. The Office of Student Financial Assistance and the College of Nursing are eager to assist you in exploring all of your financial aid options. You can review scholarship opportunities at nursing.nova.edu/students/scholarships.html, and can speak to a financial aid representative by calling (954) 262-3380. Do not hesitate to ask us for help.

Academic Policies

The following academic policies apply to all students in the graduate nursing program.

Transfer Credits

No more than 6 graduate credits may be transferred into the M.S.N. program from other graduate programs. Courses will be evaluated for credit toward the M.S.N. degree by the program director, whose decision will be final. To be considered for credit, a course must have been taken at an accredited graduate program and be the equivalent of a course offered in the student’s chosen track. The student must have earned a grade of B or higher in the course. The student must submit the syllabus of any course he or she is seeking credit for directly to the program director. Additional documentation may be required by the program director before credit may be granted. Only courses completed prior to matriculation in the M.S.N. program will be considered for transfer credit.
Progression Requirements
Students must complete all core M.S.N. nursing courses prior to enrolling in specialty nursing courses.

Students are required to be continuously enrolled in the program, taking at least one graduate course each term. All courses must be completed with a minimum grade of B- for credit to be received toward the M.S.N. degree. A course may be repeated once if a grade less than B- is obtained. Only one repeated course can be applied toward the M.S.N. degree. A second course with a grade less than B- will preclude completion of the program and the student will be dismissed from the program.

Graduation Requirements
To receive an M.S.N.—A.P.R.N. degree, all students must fulfill the following requirements:

- successfully complete a minimum of 51 semester hours of coursework
- satisfactorily complete the program requirements for the degree with a grade of B- or higher
- apply for graduation
- have satisfactorily met all financial and library obligations
- receive a recommendation for graduation by the program director

Total Gero-Adult Acute Care Nurse Practitioner Semester Hours  36

* This course has prerequisites.

**Course Descriptions**

**NSG 4900—Introduction to Graduate Studies**
This course is designed to assist the registered nurse with a non-nursing bachelor's degree to develop the knowledge and skills to transition into the Master of Science in Nursing (M.S.N.) program. The student will build upon current nursing experience and knowledge as well as previous baccalaureate education in order to demonstrate recommended competencies in baccalaureate nursing prior to beginning the M.S.N. coursework. (6 semester hours)

**NSG 5000—Advanced Nurse Role**
This course introduces the R.N. to the advanced nurse role as leader, collaborator, change agent, advocate for population health, and scholar. Theories of leadership, change, and decision making are explored and applied to health care delivery situations. Issues affecting population health—including communication, collaboration, information management, diversity, and ethics—are examined. Students are introduced to the importance of scholarship in the advanced roles of nursing. (3 semester hours)

**NSG 5101—Theory and Research**
This course examines the relationship of theory to research and practice and the use of data as a basis for decision making. Various approaches to the research process and the use of evidence in nursing practice are explored. Ethical considerations in research are presented. (3 semester hours)

**NSG 5111—Evidence and Practice**
This course focuses on the development, acquisition, evaluation, and use of interdisciplinary evidence in nursing practice, while incorporating strategies for protection of human subjects. Methods of disseminating evidence to improve practice outcomes are explored. (3 semester hours)
NSG 5130—Health Care Policy
This course focuses on providing present and future nurse leaders with an understanding of health policy, finance, and legislation on health care. Political advocacy and the health policy change process will be explored. (3 semester hours)

NSG 5230—Nursing Decision Making in Complex Health Care Systems
This course provides the student with an opportunity to utilize models, processes, and theoretical frameworks of decision making as a foundation for leadership activities in complex health care systems. Internal and external factors impacting decision making will be explored and analyzed. The influence of systems thinking, trend analysis, data, evidence quality, and interpersonal collaboration is examined. Ethical considerations of decision making are evaluated. (3 semester hours)

NSG 5240—Nursing Governance and Resource Management in Complex Health Systems
This course focuses on the perspective of nursing governance from a global to a unit level. Governance models, human resource management, work environments, and best practices related to health systems leadership are explored. Self-governance models and human resource strategies in the practice environments are designed and applied. Ethical and legal issues related to governance and resource management are included. (3 semester hours)

NSG 5250—Fiscal Management in Complex Health Systems
This course focuses on fiscal management impacting nursing practice and health care delivery. Students will develop foundational knowledge applicable to fiscal management and develop strategies to improve decision making. Students will apply fiscal management principles to a current issue. The relationship between fiscal and ethical responsibility is examined. (3 semester hours)

NSG 5270—Information Management and Data Analysis
This course provides the student with an opportunity to examine various health care informatics theories and policies related to the entire implementation process of information systems in a complex health care system. During the course, students will apply concepts learned to the ethical use of data, information, and knowledge in clinical practice and research. Students will also analyze the critical elements in the life cycle of information and patient-care technology systems. (3 semester hours)

NSG 5300—Nursing Curriculum Development
This course focuses on the process of curriculum development. Accreditation standards, trends in professional nursing practice, and economic and policy issues are analyzed within the context of curriculum development and program evaluation. Selected nursing and educational theories, educational research, principles, and techniques of curriculum development are explored. (3 semester hours)

NSG 5340—Nurse Leadership Roles in Complex Health Systems
This course focuses on nursing leadership roles within a complex health care system. The student will apply leadership, change, and organizational theories within a framework of systems thinking. Students will develop strategies for introducing and sustaining change. Ethical and legal concerns related to the nursing leadership role are explored. (3 semester hours)

NSG 5345—Foundations for Clinical Decision Making
This course builds on basic concepts of health assessment, pathophysiology, and pharmacotherapeutics. Physiologic changes, clinical manifestations, and drug therapy are integrated. Emphasis is on critical analysis of collected assessment data to support clinical decision making. This course provides the educator with the knowledge used when teaching learners clinical decision making. (6 semester hours)

NSG 5360—Nurse Educator Practicum
This course provides an opportunity for students to analyze, synthesize, and utilize all prior courses in an educational environment. Students are mentored by preceptors who are experienced in educational roles in various settings. (3 semester hours)

NSG 5370—Introduction to Educational Concepts
This course examines the conceptual basis and evidence-based educational research for teaching and learning. The relationships between learning outcomes, learning styles, instructional strategies, assignments, and activities in educational environments are identified. Strategies for promoting student success and classroom management are examined. Various educational environments are explored. Ethical considerations of instruction are included. (3 semester hours)

NSG 5380—Educational Concepts I: Principles of Evaluation
This course builds on the educational concepts introduced in NSG 5370. Students apply principles of evaluation to the learning outcomes developed in that course. Methods to assess and evaluate learning outcomes in various educational environments are explored. Evidence-based educational research that supports evaluation is explored. Legal and ethical concepts impacting evaluation are discussed. (3 semester hours)
NSG 5390—Educational Concepts II: Technology
This course assists students in synthesizing the educational concepts in the design and evaluation of courses and curricula. Instructional strategies related to the clinical setting are explored. Methods of evaluation of learning outcomes are developed. (3 semester hours)

NSG 5460—Quality Initiatives: Transforming Care
This course prepares the student with the knowledge and skills to promote safe, effective, timely, efficient, equitable, culturally responsive, patient-centered care. The course will focus on the trending of patient safety, quality, and risk management data over time by the use of performance improvement tools that provide analysis and assist with the future direction of the health care organization. (3 semester hours)

NSG 5470—Business and Economics of Health Care
This course introduces the student to basic economic concepts, principles, and theories used to analyze and evaluate a variety of health care issues. Students will utilize knowledge and skills to evaluate U.S. and international health care systems. (3 semester hours)

NSG 5490—Health Systems Leadership Nursing Practicum
This course provides an opportunity for the student to analyze, synthesize, and utilize all content from prior courses in a nursing leadership environment. Students are mentored by preceptors that are experienced in leadership roles in complex health systems. (3 semester hours)

NSG 5502—Advanced Health Assessment/Differential Diagnosis
This course builds upon baccalaureate knowledge and clinical mastery of health and physical assessment. Comprehensive physical, psychosocial, spiritual, and cultural assessments of individuals across the life span are emphasized. Clinical prevention and population health are incorporated into the assessment process. Assessment criteria are appreciated as underpinnings of differential diagnoses and plans of care. Prerequisite: NSG 5510 (4 semester hours: 3 theory, 1 practicum)

NSG 5501—Suture Workshop
This course covers principles and techniques related to the management of lacerations and bite wounds. Topics include wound assessment, mechanism of injury, normal wound healing, cleansing and irrigation, instruments and suture materials, special anatomic sites, alternative closures, tetanus and antibiotic prophylaxis, and suture removal. There is an on-site practice lab for suturing. Prerequisite: NSG 5510 (1 semester hour)

NSG 5510—Advanced Pharmacology
This course focuses on the use of pharmacotherapeutics across the life span. Medications used to treat and manage common illnesses and conditions are emphasized. Content includes indication, selection, adverse effects, and alternatives to medication therapy with the goal of the safe and effective prescription of pharmaceutical and alternative therapeutic agents for health maintenance, disease prevention, and management for individuals. The current health status, ethnic/racial origins, socioeconomic status, cultural/spiritual implications, gender, and changes that occur across the life span are addressed. Clinical decision-making, client education, and review of laws governing prescriptive authority for the advanced practice nurse are also emphasized. Prerequisite: NSG 5531 (4 semester hours)

NSG 5522—Family Nursing: Theory, Research, and Practice
This course examines the family structure, function, and process. Various theoretical frameworks and models are explored. Psychosocial, cultural, economic, gender, and spiritual variables and their impact on family life are analyzed. The domains and core competencies of nurse practitioner practice are introduced. Prerequisite: NSG 5502 (2 semester hours)

NSG 5531—Advanced Pathophysiology
This course focuses on the pathophysiological concepts that serve as a primary component of the foundation for clinical assessment, decision making, and management for advanced nursing practice. Changes associated with individuals of different racial origins, genders, and points across the life span are included. (4 semester hours)

NSG 5542—Primary Care of Adults I
This course focuses on the development of the domains and competencies of the FNP providing evidence-based health care for culturally/spiritually diverse adults and their families in the primary care setting. Concepts of advanced health assessment, pharmacology, and pathophysiology are incorporated in the multidisciplinary management of routine, chronic, and acute health problems in this population. Prerequisite: NSG 5502 (5 semester hours: 3 theory, 2 practicum)

NSG 5550—Primary Care of Adults II
This course focuses on the development of the domains and competencies of the FNP providing evidence-based health care for culturally/spiritually diverse older adults and their families in the primary care setting. Concepts of advanced health assessment, pharmacology, and pathophysiology are incorporated in the interdisciplinary management of routine, chronic, and acute health problems in this population. Prerequisite: NSG 5542 (5 semester hours: 2 theory, 1 practicum)
NSG 5560—Primary Care of Women
This course focuses on the development of the domains and competencies of the FNP, providing evidence-based health care for culturally/spiritually diverse female clients and their families in the primary care setting. Concepts of advanced health assessment, pharmacology, and pathophysiology are incorporated in the interdisciplinary management of routine, chronic, and acute health problems in this population. Prerequisite: NSG 5550 (3 semester hours: 2 theory, 1 practicum)

NSG 5570—Mental Health Across the Life Span
This course focuses on common mental health issues and counseling strategies relevant in the primary care setting. Emphasis is on the assessment and management of behavioral, developmental, and lifestyle issues across the life span and in culturally/spiritually diverse populations. Individual and family intervention strategies are presented. Prerequisite: NSG 5502 (2 semester hours)

NSG 5580—Primary Care of Infants, Children, and Adolescents
This course focuses on the development of the domains and competencies of the FNP, providing evidence-based health care for culturally/spiritually diverse infants, children, and adolescents and their families in the primary care setting. Concepts of advanced health assessment, pharmacology, and pathophysiology are incorporated in the interdisciplinary management of routine, chronic, and acute health problems in this population. Prerequisite: NSG 5550 (3 semester hours: 2 theory, 1 practicum)

NSG 5590—Family Nurse Practitioner Preceptorship
This course represents the culmination and integration of all previous coursework and provides an opportunity for the student to continue to master the domains and competencies of the FNP. Course content specifically addresses issues for professional practice needed for the graduate to enter the workforce as an advanced practice nurse. Prerequisite: All courses must be completed prior to enrolling in this course. (4 semester hours: 2 theory, 2 practicum)

NSG 5600—Nursing Informatics Practicum
This course provides students with the opportunity to perform the role and function of a professional informatics nurse specialist (INS) in a health care setting. The students develop their own field-based projects or participate in an ongoing project, as approved by course faculty members. Students apply nursing informatics principles to enhance health care outcomes. Students are mentored by preceptors that are experienced in nursing informatics in complex health systems. (4 semester hours)

NSG 5610—Advanced Practice in Nursing Informatics
This course provides students with the opportunity to complete an additional 50 hours of supervised practicum experience in order to be eligible to sit for the ANCC informatics certification examination. (2 semester hours)

NSG 5620—Gero-Adult Acute Care I
This course focuses on the development of the domains and competencies of the gero-adult acute care nurse practitioner in providing evidence-based health care for culturally/spiritually diverse adults in acute or specialty care settings. Concepts of advanced pathophysiology, advanced pharmacology, and advanced health assessment are incorporated in the multidisciplinary management of unstable acute and chronic health problems in this population. Content of the course will address health problems including infections; fever; fluid, electrolyte, and acid-base imbalances; and management of rapidly changing situations such as shock and drug toxicities, as well as altered mental states, wound management, and palliative care. (5 semester hours)

NSG 5630—Gero-Adult Acute Care II
This course focuses on the development of the domains and competencies of the gero-adult acute care nurse practitioner in providing evidence-based health care for culturally/spiritually diverse adults in acute or specialty care settings. Concepts of advanced pathophysiology, advanced pharmacology, and advanced health assessment are incorporated in the multidisciplinary management of unstable acute and chronic health problems in this population. Content of the course will address health problems including infections; fever; fluid, electrolyte, and acid-base imbalances; and management of rapidly changing situations such as shock and drug toxicities, as well as altered mental states, wound management, and palliative care. (5 semester hours)

NSG 5640—Gero-Adult Acute Care
Procedural Course
This course focuses on developing novice clinical competency in the performance and evaluation of selected skills and procedures most frequently encountered by an acute care nurse practitioner in caring for an acutely ill, unstable, adult patient. (2 semester hours)

NSG 5650—Gero-Adult Acute Care III
This course focuses on the development of the domains and competencies of the gero-adult acute care nurse practitioner in providing evidence-based health care for culturally/spiritually diverse adults in acute or specialty care settings. Concepts of advanced pathophysiology, advanced pharmacology, and advanced health assessment are incorporated in the multidisciplinary management of unstable acute and chronic health problems in this population. Content of the course will address health problems including infections; fever; fluid, electrolyte, and acid-base imbalances; and management of rapidly changing situations such as shock and drug toxicities, as well as altered mental states, wound management, and palliative care. (5 semester hours)
problems dealing with hematology, immunology, neurology, allergies, musculoskeletal trauma, and gastroenterology, as well as geriatric content addressing trauma, neglect, abuse, and sexuality. (5 semester hours)

NSG 5660—Gero-Adult Acute Care Integration Practicum
This course represents the culmination and integration of all previous coursework and provides an opportunity for the student to continue to master the domains and competencies of the gero-adult acute care nurse practitioner. Course content specifically addresses issues for professional practice needed for the graduate to enter the workforce as an advanced practice nurse. (5 semester hours)

MI 5121—Information Systems Leadership and Project Management in Health Care
This course introduces the fundamental principles of project management and leadership from an information technology perspective, with an emphasis on health care industry applications. These include project integration; health care leadership decision making; and the management of scope, time, cost, quality, human resources, communications, and risks. Discussion also includes project management software and organizational management aspects such as project planning, team building, organizational structure, control mechanisms, and developing strategies for the organization to adapt to change. (3 semester hours)

MI 5130—Database Systems in Health Care
This course covers basic to intermediate knowledge of the concept, design, and implementation of database applications in health care. Students will study tools and data models for designing databases such as E-R Model and SQL. The course also covers Relational DBMS systems such as Access, SQL Server, Oracle, and mySQL. Database connectivity design (essential in data-driven web development), database administration, XML, and data warehouse (support for decision-making) will also be introduced. Students will practice designing; developing; and implementing a test-relational, online, medical informatics database application (part of a recent federal research grant) through a comprehensive project that contains the above topics. (3 semester hours)

MI 5204—Clinical Decision Support Systems
With the increasing complexity of clinical medicine, clinical decision support systems have evolved to become essential cognitive prostheses for diagnostic and treatment purposes. Clinical decision support systems have been utilized in many areas of clinical medicine, nursing, pharmacy, health care administration, and research. This course introduces students to statistical and theoretical concepts underlying modern medical decision making, including Bayesian analysis. It then reviews the multiple methods for knowledge generation for CDSS systems. The course provides hands-on experience to students in performing Bayesian analysis of clinical problems and building and annotating computer-interpretable guidelines (CIGs). Current implementations of stand-alone and integrated CDSS will be evaluated. Techniques for planning and evaluation of CDSS implementation will be reviewed. Human factors, including work-flow integration and the ethical, legal, and regulatory aspects of CDSS use will be explored. (3 semester hours)

MI 5180—Human-Computer Interaction in Health Care Settings
The dynamics of human-computer interaction (HCI) directly impacts health care. This course will introduce the student to usable interfaces and the study of social consequences associated with the changing environment due to technology innovation. (3 semester hours)

MI 6410—Consumer Health Informatics
This course provides an introduction to consumer health informatics and web 2.0 applications used in health care. It explores the development of consumers as ePatients and tools such as patient-controlled electronic health records, as well as the fluid nature of web 2.0 in medicine. Students will learn from a combination of lectures and a hands-on approach of interacting directly with the tools and technologies discussed. (3 semester hours)
**Doctor of Nursing Practice (D.N.P.)**

The online Doctor of Nursing Practice (D.N.P.) program at Nova Southeastern University is a practice-focused terminal degree designed to serve post-M.S.N. nurse practitioners, nurse informaticists, clinical nurse specialists, nurse midwives, nurse anesthetists, nurse educators, and nurse managers/executives. The D.N.P. curriculum features a convenient, online format that builds on current M.S.N. programs by supporting evidence-based practice, quality improvement, and systems thinking, and reflects the Essentials of Doctoral Education for Advanced Nursing Practice (American Association of Colleges of Nursing, 2006).

Students may focus on a direct care role or an aggregate/systems/organizational role, such as informatics, nursing administration, or community health. They remain engaged in online coursework combined with face-to-face practicum experiences that culminate in the D.N.P. capstone project. Emphasizing practice that is innovative and based in evidence, the final project reflects the application of their research findings in their area of choice.

This online program attracts highly experienced faculty members with advanced preparation and extensive experience in the area of specialization. Faculty members work directly with students to achieve each student's professional nursing goals, and each student will be assigned an adviser to further assist with individualized program guidance. Graduates of the D.N.P. program are prepared to lead and engage in practical, clinically focused scholarship and research utilization.

**Admissions Requirements**

Prospective D.N.P. students are selected for admission based on application content, academic record, curriculum of completed required courses, professional nursing licensure, and evaluation forms. Individual student transcripts and writing samples are evaluated by select faculty members, the program director, and the associate dean of nursing.

Admission to the D.N.P. program requires

- a master's degree in nursing or a related field from a regionally accredited or internationally accredited school (Nursing degrees must be accredited by the National League of Nursing Accrediting Commission [NLNAC] or the Commission on Collegiate Nursing Education [CCNE].)*
- a minimum master's degree GPA of 3.0 on a 4.0 scale
- current U.S. R.N. license with no restrictions
- two reference forms from individuals other than relatives (suggested sources include professors, academic advisers, and professional nursing references)
- a writing sample (instructions on the following page)
- a CV/résumé
- official documentation of all supervised, postbaccalaureate practice hours
- on-campus attendance for two to three days per year

* Students who enter the D.N.P. program without an M.S.N. will be required to enroll in NSG 7299—Transition to D.N.P. in the first semester of admission to the program. This course is only offered in the fall.

**Application Procedures for Fall 2016 and Winter 2017 Entering Classes**

The NSU College of Nursing participates in the centralized application service called NursingCAS. NursingCAS does not take part in student selection. The NursingCAS application information may be obtained

- online at nursingcas.org
- by calling NursingCAS at (617) 612-2880

The deadline to complete and submit the NursingCAS application will be August 1 for fall admission and December 1 for winter admission.

1. Send supporting documents to NursingCAS.
   a. All official college transcripts from undergraduate, graduate, and professional institutions attended must be sent to NursingCAS directly from those institutions.

Send all transcripts to
NursingCAS
P.O. Box 9201
Watertown, Massachusetts 02471

b. Coursework taken at foreign institutions must be evaluated for U.S. institutional equivalence by an approved National Association of Credential Evaluation Services (NACES) organization such as one of the services listed below.

- World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

- Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com

- Educational Credential Evaluators, Inc.
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  (414) 289-3400 • ece.org
It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service.

c. Two evaluations/references must be completed by individuals other than relatives (suggested sources include professors, academic advisers, and professional nursing references).

d. Submit a writing sample (use APA 6th edition formatting, including headings for each section) directly to NursingCAS. Include the following information in your statement:

**Doctor of Nursing Practice**

Discuss a problem or issue you see in your professional practice today that needs to be addressed from a D.N.P. perspective. (250 words minimum)

**Goals**

Discuss your personal and professional goals related to the D.N.P. (250 words minimum)

e. Submit a current curriculum vitae/résumé.

f. Submit a copy of your active, unencumbered United States R.N. license. The license must remain current in the state in which the student’s capstone project is being conducted.

2. Prospective students must submit an online NSU application at apply.nova.edu.

3. Submit official documentation of all supervised, postbaccalaureate practice hours from any regionally or internationally accredited schools attended.

Documentation must be from the program director of the previous postbaccalaureate program and include the following information on university letterhead:

- date
- university name and department
- applicant’s full name
- date and title of degree earned
- specialization earned and total number of preceptor-verified clinical experience hours
- program director’s signature
- contact information for follow up, if necessary

**Tuition and Fees**

Tuition for academic year 2016–2017 is $895 per semester hour. Tuition for 2017–2018 will subsequently be posted on our website (nursing.nova.edu/dnp). An NSU student services fee of $1,050 is required annually. A Health Professions Division general access fee of $145 is also required each year.

Acceptance Fee is $500. This fee is required to reserve the accepted applicant’s place in the class. This advance payment will be deducted from the tuition payment due by registration day, but is not refundable in the event of a withdrawal. It is due within two weeks of an applicant’s acceptance.

All tuition and fees are subject to change by the board of trustees without notice.

The first semester’s tuition and fees, less the $500 previously paid tuition deposit, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

Each student is required to carry adequate personal medical and hospital insurance. Students may purchase health insurance through NSU. Students who have adequate personal medical and hospital insurance may waive NSU’s health insurance by filling out the Student Health Insurance Waiver available through the Bursar’s Office (nova.edu/bursar/health-insurance).

Students are responsible for their own transportation to clinical agencies and other off-campus locations related to their program.

There are a number of national, state, and hospital grants available for the nursing student. Additionally, the growing shortage of nurses in the United States has driven down student loan interest rates, falling below typical offerings for other professions. The Office of Student Financial Assistance and the College of Nursing are eager to assist you in exploring all of your financial aid options. You can review scholarship opportunities at nursing.nova.edu/students/scholarships.html, and can speak to a financial aid representative by calling (954) 262-3380. Do not hesitate to ask us for help.

**Academic Policies**

The following academic policies apply to all students in the graduate nursing programs.

**Transfer Credits**

No more than 6 graduate credits may be transferred into the D.N.P. program from other doctoral programs. Courses will be evaluated by the program director and the associate dean on an individual basis for credit toward the D.N.P. Their decision will be final. To be considered for credit, a course must have been taken at an accredited graduate program and be the equivalent of a course offered in NSU’s D.N.P. program. The student must have earned a grade of B or higher in the course. Students must submit the syllabus of any course for which they are seeking credit directly...
to the program director. Additional documentation may be required before credit may be granted. Only courses completed prior to matriculation into NSU's D.N.P. program will be considered for transfer credit.

Program Progression
Students are required to satisfactorily complete all required courses for the program with a grade of B or higher. A student who fails two courses in the program will be dismissed with the second failure.

Minimum Total Semester Hours 36

Students may focus on a direct care role or an aggregate/systems/organizational role such as informatics, nursing administration, or community health.

*These courses are practice-immersion courses that help students become experts in a practice field while the capstone project is carried out. Each course requires a minimum of 125 clinical practice hours.

D.N.P. graduates are required to complete 1,000 clinical practice hours post-Bachelor of Science in Nursing. Hours from the M.S.N. credited toward these practice hours must be verified by the university where the student completed the M.S.N. Students may be required to complete additional capstone hours in order to meet the 1,000-hour requirement. Students may enroll in NSG 7442: Capstone Continuing Matriculation until required hours are completed. All but 125 of the required 1,000 clinical hours must be completed prior to starting NSG 7450.

If an applicant is an R.N. or B.S.N. with a master's degree in another health-related field, he or she may enroll in a transitional course, NSG 7299, to meet M.S.N. essentials prior to the start of D.N.P. coursework. This course is only offered in the fall semester.

Students will work with an adviser to plan their individual program of study.

Graduation Requirements
- completion of all program requirements for the degree with a B or higher
- completion of all degree requirements within five years
- satisfaction of all financial requirements within the university
- application for graduation
- recommendation for graduation by the program director
Course Descriptions

NSG 7120—Health Care Policy
This course provides students with an understanding of health policy as it relates to health care delivery and nursing practice. Students will analyze public and health policy environments and processes at the local, state, national, and international levels. Students will explore the role of educational, political, and organizational health care leaders in the change process and in the formation of health care policy decisions. (3 semester hours)

NSG 7131—Epidemiology and Population Health
This course provides the student with a foundation in clinical prevention and population health. Students will be introduced to culturally proficient care in response to societal needs for improved health outcomes of individuals and populations. This course integrates clinical prevention, screening, behavior change, self-care, disease management, genetics, geriatrics, and cultural competency related to the health of populations. An emphasis will be placed on evidence-based clinical prevention and population health services. (3 semester hours)

NSG—7135 Health Care Information Systems and Outcomes Management
This course focuses on the evaluation and use of information systems technology in health care organizations. Students will explore processes used for collection, analysis, and tracking of quality and safety data. Students will learn information technology and research methods that collect appropriate and accurate data to generate evidence for practice. They will learn to inform and guide the design of databases to generate meaningful evidence for nursing practice. (3 semester hours)

NSG 7299—Transition to the Doctor of Nursing Practice Program
This course is designed to assist the B.S.N.-prepared registered nurse with a master's degree in a field other than nursing to develop the Master of Science in Nursing competencies required to transition into the Doctor of Nursing Practice (D.N.P.) program. The student will build upon current nursing experience and previous graduate education in order to demonstrate achievement of the essentials of M.S.N. education prior to beginning D.N.P. coursework. Students will complete 150 practicum hours. (6 semester hours)

NSG 7300—Roles, Collaboration, and Communication
This course focuses on key concepts related to the role of the Doctor of Nursing Practice in clinical and health care system settings. The nature and practice of biomedical, administrative, and population ethics, with an emphasis on the application of ethical and social justice frameworks for analysis and decision making for patients, systems, and populations experiencing ethical conundrums, is also discussed. Students identify topics for capstone projects. (3 semester hours)

NSG 7350—Leading in Complex Health Care Systems
This course focuses on principles of business, finance, economics, and leadership within health care systems. Students will investigate and analyze theories related to organizational behavior. They will also evaluate and integrate evidence-based practice to effect improvements in the dynamics of systems to better the delivery of health care. Emphasis is placed on using research to analyze the environment and to improve systems at the micro-, meso-, and macro-systems levels. The three major constructs of transformational leadership (self transformation, patient-centered transformation, and health systems transformation) will be explored related to health outcomes. (3 semester hours)

NSG 7400—Nursing Science for Clinical Practice
This course explores the scientific principles and philosophical underpinnings of nursing practice relevant to the role of the Doctor of Nursing Practice. Concepts, models, and theories from nursing and other disciplines will be applied to clinical practice problems. Students will analyze various approaches used in research and evaluate the quality of published research. Students will also develop search strategies to answer questions related to a selected topic of interest. (3 semester hours)

NSG 7430—Capstone I: Mentored Scholarship
The cornerstone course will provide students with the tools and the support they require to conduct a scholarly literature review and to develop a clear statement of the problem to be focused on throughout the capstone project. This course requires a minimum of 125 hours spent in clinical immersion. Clinical immersion objectives and activities are mutually developed by the student and faculty members and based on the standards and objectives provided by a professional nursing organization and certification exam, if available. Prerequisites: NSG 7300 and 500 documented clinical hours (3 semester hours)
NSG 7440—Capstone II: Project Plan
This course will provide students with the support and direction needed to develop a comprehensive, site-specific project plan in collaboration with the sponsoring facility. It requires a minimum of 125 hours spent in clinical immersion. Clinical immersion objectives and activities are mutually developed by the student and faculty members based on the standards and objectives provided by a professional nursing organization and certification exam, if available. **Prerequisite:** NSG 7430 (3 semester hours)

NSG 7441—Capstone III: Implementation
This capstone experience provides an opportunity for the student to execute the project plan in collaboration with the sponsoring site. The experience reflects the interest of the student and is designed to meet individual interests and career goals. This advanced practice allows the student to learn to manage time and resources, assess implementation issues, and utilize communication and collaboration while working with a clinical mentor to implement the project plan. A minimum of 125 hours spent in clinical immersion is required. Clinical immersion objectives and activities are mutually developed by the student and faculty members and based on the standards and objectives provided by a professional nursing organization and certification exam, if available. **Prerequisite:** NSG 7440 (3 semester hours)

NSG 7450—Capstone IV: Evaluation
This is the final component of the capstone experience. All but 125 of the required 1,000 clinical hours must be completed prior to starting NSG 7450. The course content, as in the other capstone experiences, reflects the interest of the student and is designed to meet individual student needs and career goals. This final course allows the student, with guidance from a mentor and faculty members, to complete the clinical project and analyze the scholarly written and oral report to disseminate and integrate new knowledge. The final product will reflect the student’s ability to employ effective communication and collaboration skills; to take a leadership role; to influence health care quality and safety; to evaluate practice; and to successfully negotiate change in health care delivery for individuals, families, populations, or systems across a broad spectrum of health care. A minimum of 125 hours spent in clinical immersion is required. Clinical immersion objectives and activities are mutually developed by the student and faculty members and based on the standards and objectives provided by a professional nursing organization and certification exam, if available. **Prerequisite:** NSG 7441 (3 semester hours)

NSG 7442—Capstone Continuing Matriculation
This course may be repeated up to four times, based on the number of hours needed to complete the required 1,000 hours. Clinical immersion objectives and activities are mutually developed by the student and faculty members and based on the standards and objectives provided by a professional nursing organization and certification exam, if available. (3 semester hours)

NSG 7500—Translating Evidence for Clinical Practice
This course provides essential skills for utilizing research to support practice change, including assessing practice-based problems, analyzing current evidence, proposing practice changes, and developing plans for implementing evidence-based practice concepts. The role of the advanced practice nurse in collaborative research and dissemination of findings is explored. Emphasis is on ethical, cultural, and financial implications of evidence-based practice and the synthesis of clinical evidence and knowledge translation for point-of-care decision making and identification of best practice. Students will understand the tools to develop, implement, and evaluate evidence-based clinical and administrative programs in nursing and health care delivery systems. The course will culminate in a systematic review of a body of research relevant to a selected topic of interest. (3 semester hours)

HPH 7300—Biostatistics
This course focuses on inferential statistics for students interested in understanding quantitative research in the health sciences. It is designed to enable students to apply experimental-design models toward solving practical problems and improving the efficiency of formulating and providing health care services. After successful completion, students will be able to match empirical research questions to statistical methods; apply hypothesis-testing models to experimental and quasi-experimental research questions; use appropriate probability distributions, including z, t, and F; estimate parameters with adequate confidence intervals; test hypotheses using a wide variety of statistical models; and use different versions of analysis of variance as applied to the health sciences. (3 semester hours)
Doctor of Philosophy in Nursing (Ph.D.)

The Doctor of Philosophy (Ph.D.) in Nursing, with a focus on Nursing Education, is an online degree program for graduates of accredited Master of Science programs who have a major in nursing and who hold U.S. Registered Nurse (R.N.) licensure.

The program is designed to prepare nurse scholars to conduct research supporting nursing education, to provide scholarly service at academic facilities and to the professional and health care communities as nurse educators, and to teach nurses and potential nurses in the academic and clinical setting. Graduates of the program will be able to assess, plan, implement, and evaluate teaching-learning strategies and use traditional, as well as advanced technological, educational strategies.

All students in the Ph.D. track take 9 semester hours of core courses. Courses within the College of Nursing include 12 semester hours of nursing science and nursing theory courses, 15 semester hours of advanced nursing research courses, 15 semester hours of higher education, and a minimum of 9 semester hours of dissertation.

The Doctor of Philosophy in Nursing degree is based on an interprofessional approach to education. The Health Professions Division of NSU provides seven courses that are offered in an interprofessional format with the College of Nursing and the departments of Occupational Therapy, Physical Therapy, and Health Science.

For further information, call the College of Nursing at (954) 262-1923 or 800-356-0026, ext. 21923.

Admissions Requirements for Fall 2017 Entering Class

Prospective Ph.D. in Nursing students are selected for admission based on application content, academic record, professional nursing licensure, and evaluation forms.

Admission to the Ph.D. program requires

• a current, active, and unencumbered United States R.N. license.

• an M.S. degree with a major in nursing or an M.S.N. from a regionally accredited college or university

Nursing degrees must be accredited by the Accreditation Commission for Education in Nursing (ACEN)—formerly the National League for Nursing Accrediting (NLNAC)—or by the Commission on Collegiate Nursing Education (CCNE).

• an overall GPA of 3.5 in the candidate’s master’s or post-master’s degree program in nursing

• two reference forms from individuals other than relatives (suggested sources include professors, academic advisers, and professional nursing references)

• a writing sample that includes an unpublished or published paper, using APA 6th edition formatting—including headings for each section

• a CV or résumé

Attendance is required at a mandatory, one-week summer institute that includes an orientation session. This summer institute is usually held the final week of May for all accepted students and students completing their first and second year.

Application Procedures for Fall 2017 Entering Class

The NSU College of Nursing participates in the centralized applications service called NursingCAS. NursingCAS does not take part in student selection. The NursingCAS application may be obtained

• online at nursingcas.org

• by calling NursingCAS at (617) 612-2880

The deadline to complete and submit the NursingCAS and NSU applications will be March 1 for fall admission. Applications are accepted year-round.

1. Send supporting documents to NursingCAS.

a. All official college transcripts from undergraduate, graduate, and professional institutions attended must be sent to NursingCAS directly from those institutions.

Send all transcripts to

NursingCAS
P.O. Box 9201
Watertown, Massachusetts 02471

b. Coursework taken at foreign institutions must be evaluated for U.S. institutional equivalence by an approved National Association of Credential Evaluation Services (NACES) organization such as one of the services listed below.

• World Education Services, Inc.
  Bowling Green Station
  P.O. Box 5087
  New York, New York 10274-5087
  (212) 966-6311 • wes.org

• Josef Silny & Associates, Inc.
  7101 SW 102nd Avenue
  Miami, Florida 33173
  (305) 273-1616 • (305) 273-1338 fax • jsilny.com
It is the applicant’s responsibility to have this coursework evaluated. An official course-by-course evaluation with a cumulative grade point average must be sent directly from the evaluation service.

c. Applicants must submit a current curriculum vitae or résumé.

d. Applicants must submit a copy of their active, unencumbered United States R.N. license. The license must remain current in the state in which the student is conducting his or her dissertation.

e. Two evaluations/references must be completed by individuals other than relatives (suggested sources include professors, academic advisers, and professional nursing references).

f. Applicants must submit a professional writing sample using APA 6th edition formatting, including headings for each section.

2. Prospective students must submit an online NSU application at apply.nova.edu.

Tuition and Fees
Tuition for academic year 2016–2017 is $895 per credit hour. Tuition for 2017–2018 will subsequently be posted on our website (nursing.nova.edu/phd). An NSU service fee of $1,050 is required annually. A Health Professions Division general access fee of $145 is also required each year.

Acceptance Fee is $500. This fee is required to reserve the accepted applicant’s place in the class. The advance payment will be deducted from the tuition payment due on registration day, but is not refundable in the event of a withdrawal. It is payable within the two weeks of an applicant’s acceptance.

All tuition and fees are subject to change by the board of trustees without notice.

The first semester’s tuition and fees, less the $500 previously paid tuition deposit, are due on or before registration day. Tuition for each subsequent semester is due on or before the appropriate registration day. Students will not be admitted until their financial obligations have been met.

Each student is required to carry adequate personal medical and hospital insurance. Students may purchase health insurance through NSU. Students who have adequate personal medical and hospital insurance may waive NSU’s health insurance by filling out the Student Health Insurance Waiver available through the Bursar’s Office (nova.edu/bursar/health-insurance).

Students are responsible for their own transportation to clinical agencies and other off-campus locations related to their program.

There are a number of national, state, and hospital grants available for the nursing student. Additionally, the growing shortage of nurses in the United States has driven down student loan interest rates, falling below typical offerings for other professions. The Office of Student Financial Assistance and the College of Nursing are eager to assist you in exploring all of your financial aid options. You can review scholarship opportunities at nursing.nova.edu/students/scholarships.html, and can speak to a financial aid representative by calling (954) 262-3380. Do not hesitate to ask us for help.

Academic Policies
The following academic policies apply to all students in the graduate nursing programs.

Transfer Credits
No more than 6 graduate credits may be transferred into the Ph.D. program from other doctoral programs. Courses will be evaluated by the program director and the associate dean on an individual basis for credit toward the Ph.D. Their decision will be final. To be considered for credit, a course must have been taken at an accredited graduate program and be the equivalent of a course offered in NSU’s Ph.D. program. The student must have earned a grade of B or higher in the course. Students must submit the syllabus of any course for which they are seeking credit directly to the program director. Additional documentation may be required by the program director before credit may be granted. Only courses completed prior to matriculation into NSU’s Ph.D. program will be considered for transfer credit.

Program Progression
Students are required to satisfactorily complete all required courses for the program with a grade of B or higher. A student who fails two courses in a program may be dismissed with the second failure.

Graduation Requirements
• completion of all program requirements for the degree with a B or higher
• completion of all degree requirements within seven years of matriculation into the program
• satisfaction of all financial requirements within the university
• application for graduation
• receipt of a recommendation for graduation by the program director

There is an annual, on-campus, one-week residency requirement.
Course Descriptions

NSG 7000—Theory Development
This course examines the nature of nursing knowledge and the development of its underpinnings. Selected approaches to concept/theory development, analysis, and evaluation are examined and applied. The linkages among theory, research, and practice in the development of nursing knowledge are explored. This course prepares students to select a theoretical framework for testing in their dissertation. (3 semester hours)

NSG 7120—Health Care Policy
This online course provides present and future nurse leaders with an understanding of health policy as it relates to health care delivery and nursing practice. This course will analyze health policy environments and the rules, structure, and settings where policy is developed, as well as the political, economic, technological, national, and global environments within which each setting operates. The students will analyze the interaction of the primary health policy individuals or groups including the health care purchasers, health care providers, third-party payers, consumers, special interest groups, and professional organizations. Students will assess the atmosphere in which policy is created and how compromise and bargaining shape policy decisions. Throughout the course, current policy initiatives involving health care delivery and nursing will be analyzed. The role of educational, political, and organizational health care leaders in the change process and in the formation of health care policy decisions will be a theme throughout this course. (3 semester hours)

NSG 7140—Theories of Education
This course is designed to enhance the student’s knowledge and application of educational theory. The relationship between nursing theory and educational theory is explored. Methods to test educational theories will be evaluated. (3 semester hours)

NSG 7150—Instructional Design and Curriculum Development
This course examines the process of curriculum development from faculty and administrative viewpoints. The relationship of learning theory to curriculum and instructional design will be explored. Curricula will be analyzed within the context of accreditation standards and program evaluation process. Instructional design models are assessed for applicability to a nursing course. A method to generate evidence related to instructional strategies is developed. (3 semester hours)

NSG 7210—Evidence-Based Evaluation
This course focuses on the exploration of the state of evaluation in today’s educational settings as they relate to nursing education. Critical assessment of issues related to evaluation in various educational environments is included. The integration and utilization of various evaluation methods in the curriculum is studied. Students will analyze, synthesize, and propose research on assessment and evaluation in nursing education. (3 semester hours)

NSG 7220—Higher Education Leadership
This online course focuses on a variety of topics of importance to nursing leaders in higher education. Students will examine the leadership demands specific to the higher education environments as well as personal application of these concepts. The structures and functions of college and university settings of all kinds will be explored. Students will investigate multiple dimensions of academic excellence including faculty members, students, administrators, programs and curricula, teaching and evaluation methods, and resources. These key components will be discussed in the context of educational accreditation. Current issues affecting higher education will also be discussed. (3 semester hours)

NSG 7230—Health Care Leadership
This online course provides an opportunity to present future nursing leaders with an understanding of health care leadership. This course applies leadership and decision-making principles to the health care environment as it relates to nursing practice, research, and quality. The course focuses on current and future leadership issues and trends, best practices, and characteristics of current nursing leaders in health care. Students will examine the opportunities and roles for nurse leaders; apply strategies for change related to nursing leadership, roles, function, and image; and develop a personal/professional nursing leadership development plan. (3 semester hours)

HPH 7700—Tests and Measurements
This course is designed to enhance the student’s knowledge and application of sound measurement principles and practices for assessing learning outcomes and evaluating and conducting research in nursing education. Students will analyze the relationship between research, practice, and psychometric issues. The course will provide a theoretical and practical foundation for choosing tests and measurements data available to applied researchers. (3 semester hours)
NSG 7250—Scholarship and Applied Research
This course is designed to develop a professional trajectory for scholarship as a member of the nursing discipline. Fundamental to this scholarship is Boyer's Model of Scholarship and a plan for research in the specialty of nursing education. Course requirements will include assessments of self and organizational scholarship in order to develop a plan for future contributions to the discipline. (3 semester hours)

NSG 7310—Doctoral Seminar I
This course provides the student with an opportunity to examine the dissertation process. The course focuses on structure and design of a concept for Ph.D. dissertation research that includes peer/colllegial review and scholarly discourse leading to a draft of chapter one of the proposal development. (1 semester hour)

NSG 7320—Doctoral Seminar II
This course provides the student with a continuation of the dissertation process. The course focuses on structure and design of Ph.D. dissertation research that includes chairperson review and scholarly discourse leading to proposal development. (1 semester hour)

NSG 7330—Doctoral Seminar III
This course provides an online comprehensive exams format and a continuation of the dissertation process. The course focuses on comprehensive exams and structure and design of Ph.D. dissertation research that includes chairperson review and scholarly discourse leading to proposal development. (1 semester hour)

NSG 7340—Dissertation
This course provides the student with the dissertation process. The course focuses on structure and design of Ph.D. dissertation research that includes dissertation chairperson and committee review from proposal development until the final defended dissertation. (minimum 9 semester hours)

HPH 7600—Grant Writing and Publications
This course is designed to provide writing experiences that prepare the learner for manuscript and grant proposal submissions. This introductory experience into the grant process from proposal to funding to management will include project management, funding sources, and funding challenges. Other course requirements include a research proposal (manuscript) that is ready for submission for publication and development of a dissertation proposal. (3 semester hours)

HPH 4080—Basic Biostatistics
This course is a primer for basic statistical methods that students may need before taking the degree program course HPH 7300 Biostatistics I. It is also recommended for Ph.D. students who find that they are not adequately prepared for Biostatistics I. The course focuses on the fundamentals of the use, interpretation, and presentation of numerical information. Statistical topics include the use of frequency distributions, measures of central tendency and variability, statistical graphs and charts, correlation and regression, hypothesis testing, t-tests, ANOVA, and conclusions that can be drawn from each type of analysis. (3 semester hours)

HPH 7200—Bioethics and Ethical Issues in Health Care
Health care professionals are required to act morally and ethically. This course is designed to expand the student's basic understanding of ethics to promote ethical awareness and enable students to derive better health care decisions, reducing the risk of potential ethical consequence. By exposing students to bioethics and controversial ethical issues typically encountered in current health care practice, students practice making difficult decisions. Students will synthesize and implement strategies for applying morals, values, and ethics systematically in the various settings in which health care is delivered. Considering the perspectives of all stakeholders and the role of the health care provider, patient advocate, professional, and consumer of medical care, students will gain workable knowledge of contemporary ethical issues and appreciate that ethics permeate the majority of decisions made in health care. (3 semester hours)

HPH 7300—Biostatistics
First of a two-course sequence focusing on inferential statistics for students interested in understanding quantitative research in the health sciences. It is designed to enable students to apply experimental-design models toward solving practical problems and improving the efficiency of formulating and providing health care services. After successful completion, students will be able to match empirical research questions to statistical methods; apply hypothesis-testing models to experimental and quasi-experimental research questions; use appropriate probability distributions, including $z$, $t$, and $F$; estimate parameters with adequate confidence intervals; test hypotheses using a wide variety of statistical models; and use different versions of analysis of variance as applied to the health sciences. (3 semester hours)
HPH 7310—Biostatistics II
This is the second of a two-course sequence focusing on inferential statistics for students interested in conducting quantitative research in the health professions. It is designed to enable students to gather data and apply experimental-design models toward solving practical problems and improving the efficiency of formulating and providing health care services. The focus in this second course is to train students to generate; interpret; and evaluate clinical, biomedical, and health care services regression models. Prerequisite is successful completion of Biostatistics I (HPH 7300). After successful completion of this course, students will be able to conduct empirical research using statistical methods; apply bivariate and multivariate regression hypothesis-testing models to experimental and quasi-experimental research questions; evaluate the assumptions of regression models; estimate and assess the impact of regressors in functional relationships; estimate parameters with adequate confidence intervals; transform variables in ordinary least squares from linear to quadratic, cubic, logarithmic, and other expressions; and measure the effect of nonquantitative variables. (3 semester hours)

HPH 7400—Quantitative Research Design
This course will provide students with a fundamental understanding of the basic methods and approaches used in health-related research. A major emphasis of the course will be on the conceptualization and design of research studies. The course will cover ethics, formulation of research questions, study design, reliability, validity, sampling, measurement, and interpretation of research findings. It will prepare students to critically evaluate published research articles, to extract information and interpret findings appropriately from the published literature, and to design sound research studies. The course will be both theoretical and applied. Students will be challenged to apply the theoretical concepts presented in the classroom and in the readings to design a study that addresses a health-related issue of their choice. (3 semester hours)

HPH 7410—Qualitative Research
This course will focus primarily on the knowledge and skill competencies you will need to conduct nursing education qualitative research successfully. In this pursuit, students will be immersed in the epistemological, theoretical, ethical, methodological, and procedural understanding of qualitative research, apply this knowledge to the conceptualization and conduct of nursing education qualitative research, report the findings of the research in the form of a research article, and appraise the quality of such qualitative research products. Upon completion of the course the student will have demonstrated that he or she has mastered the basic competencies needed to create, plan, and complete a nursing education qualitative research dissertation. (3 semester hours)

HPH 7500—Philosophy of Science
This online course covers schools of thought in philosophy of science. To address the need of laying the foundation for the generation and expansion of new professional knowledge that will guide evidence-based practice for the health professions, this course also covers topics on the acceptance of theories in the scientific community and epistemology of applied scientific inquiry. This course is designed to allow Ph.D. students in the health professions to gain appreciation for the philosophical underpinnings of unity in science, to be able to apply philosophical frameworks and epistemological paradigms in their future research, and to, eventually, become creative researchers in their areas of practice. (3 semester hours)
Health Professions Division
Faculty
Health Professions Division Faculty

Emeritus Faculty

Clarence L. Brumback
Emeritus Professor, Community Medicine
A.B., University of Kansas, 1936
M.D., University of Kansas, 1943
M.P.H., University of Michigan, 1948
Fellow, American College of Preventive Medicine

Raúl R. Cuadrado
Dean Emeritus, College of Health Care Sciences
Professor, Public Health
S.B., Yale University, 1961
B.S., Yale University, 1961
M.P.H., Yale University, 1965
Dr.P.H., University of Michigan, 1968
Ph.D., Honoris Causa in Health, Universidad Central del Este, 2000

William D. Hardigan
Emeritus Dean, Pharmacy
Professor, Pharmaceutical Sciences
B.S. (Pharm.), University of Wyoming, 1954
M.S., University of Wyoming, 1959
Ph.D., University of Arizona, 1973

Stanley B. Kaye
Emeritus Professor, Surgery
B.A., University of Arizona, 1949
D.O., University of Health Sciences College of Osteopathic Medicine, 1954
Fellow, American College of Osteopathic Surgeons

Harold Kirsh
Emeritus Professor, Surgery
D.O., Philadelphia College of Osteopathic Medicine, 1946
Fellow, American Osteopathic College of Proctology

Leonard A. Levy
Emeritus Professor, College of Osteopathic Medicine
B.A., New York University, 1956
D.P.M., New York College of Podiatric Medicine, 1961
M.P.H., Columbia University School of Public Health, 1967

Michael A. Longo
Emeritus Professor, Surgery
B.S., St. John’s University, 1942
D.O., University of Health Sciences College of Osteopathic Medicine, 1946
Fellow, American College of Osteopathic Surgeons

Ferol Menks Ludwig
Emeritus Professor, Occupational Therapy
B.S., Ohio State University, 1966
M.S., Ohio State University, 1971
Ph.D., University of Southern California, 1995
Fellow, American Occupational Therapy Association

Nancy Nashiro
Emeritus Professor, Occupational Therapy
B.A., University of Hawaii, 1961
B.S., University of Puget Sound, 1963
M.A., Southern Methodist University, 1982
Ph.D., Southern Methodist University, 1986
Fellow, American Occupational Therapy Association

Charles B. Radlauer
Emeritus Professor, Surgery
Adjunct Professor, Biomedical Informatics
M.D., George Washington University College of Medicine, 1961
Fellow, American College of Surgeons

Carol Niman Reed
Emeritus Professor, Occupational Therapy
B.S., University of Iowa, 1968
M.S., University of Texas, 1977
Ed.D., Nova Southeastern University, 1998
Fellow, American Occupational Therapy Association

Anthony J. Silvagni
Dean Emeritus, College of Osteopathic Medicine
Professor, Family Medicine
Professor, Public Health
Clinical Professor, Pharmacy Practice
B.S. (Pharm.), Philadelphia College of Pharmacy and Science, 1963
M.S. (Pharm.), Philadelphia College of Pharmacy and Science, 1966
Pharm.D., Philadelphia College of Pharmacy and Science, 1970
D.O., Philadelphia College of Osteopathic Medicine, 1982
Fellow, American College of Osteopathic Family Physicians
Fellow, American Foundation for Pharmaceutical Education

Sigmund Stahl
Emeritus Associate Dean and Professor, Dental Medicine
D.D.S., University of Minnesota School of Dentistry, 1947
M.S., University of Illinois, 1949
Fellow, American Association for the Advancement of Science
Fellow, American College of Dentists
Fellow, American Academy of Periodontology
Full-time Faculty

Mariem Abdou
Assistant Professor, Optometry
B.A., University of Delaware, 2009
O.D., Salus University, 2013

Miguel Acosta
Clinical Assistant Professor, Pharmacy Practice
Pharmacy Manager, NSU Clinic Pharmacy
B.S., University of South Florida, 1969
M.A., University of South Florida, 1977
M.B.A., University of Tampa, 1985
Pharm.D., University of Illinois, 2000

Ahmad K. Ahmadi
Assistant Professor, Anatomy
B.S., Florida International University, 1996
D.M.D., Nova Southeastern University, 2003

Sarah Alameddine
Clinical Assistant Professor, Pharmacy Practice
Adjunct Assistant Professor, Biomedical Informatics
B.S., Lebanese American University, 2010
Pharm.D., Lebanese American University, 2012

Aisy Aleu
Clinical Assistant Professor, Pharmacist
Pharm.D., Nova Southeastern University, 1998
M.B.A., Nova Southeastern University, 2003
R.Ph., Florida

Renee B. Alexis
Associate Professor, Obstetrics and Gynecology
B.S., Jacksonville University, 1989
M.D., University of Maryland School of Medicine, 1996
M.P.H., Nova Southeastern University, 2011

Winston L. Alexis
Assistant Professor, Obstetrics and Gynecology
B.S., Howard University, 1965
M.D., Howard University College of Medicine, 1969

Armando G. Alonso
Instructor, Psychiatry
D.O., Nova Southeastern University, 2012

Jamie Althoff
Assistant Professor, Optometry
B.S., Ferris State University, 2007
O.D., Michigan College of Optometry, 2007

Yarelis Alvarado
Assistant Professor, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2009

Goar Alvarez
Assistant Dean, Pharmacy Services and Assistant Professor, Sociobehavioral and Administrative Pharmacy
B.S., Florida A&M University, 1975
Pharm.D., Nova Southeastern University, 1994

Arvia Amini
Postgraduate Program Interim Director and Assistant Professor, Restorative Dentistry
D.M.D., Temple University, 1994

Deborah Amster
Assistant Professor, Optometry
B.S., State University of New York, 1997
O.D., New England College of Optometry, 2001
Fellow, American Academy of Optometry
Fellow, College of Optometrists in Vision Development

Stephanie Anderson
Assistant Professor, Physician Assistant Program—Fort Myers
B.S., The Ohio State University, 1979
M.D., Case Western Reserve University School of Medicine, 1983
J.D., University of Miami School of Law, 1999

Paula L. Anderson-Worts
Associate Professor, Family Medicine
Assistant Professor, Public Health
B.S., University of Miami, 1988
D.O., Nova Southeastern University, 1994
M.P.H., Nova Southeastern University, 2001

Stephen Andreades
Clinical Director
Assistant Professor, Physician Assistant Studies
B.S., Appalachian State University, 2004
M.S., Appalachian State University, 2005
M.M.S., Nova Southeastern University, 2008
Fellow, American Academy of Physician Assistants

Julia P. Andrews
Assistant Professor, Audiology
B.A., University of Florida, 2004
Au.D., Nova Southeastern University, 2008

Rais A. Ansari
Assistant Professor, Pharmaceutical Sciences
B.S., Lucknow University, 1976
M.S., Lucknow University, 1978
Ph.D., Kanpur University, 1985

John Antonelli
Professor, Prosthodontics
D.D.S., New York University College of Dentistry, 1976
Diplomate, American Board of Special Care Dentistry, 2004
M.S., Nova Southeastern University, 2005
Fellow, American Association of Hospital Dentistry

Jose Antonio
Assistant Professor, Exercise and Sport Science
B.S., The American University, 1984
M.S., Kent State University, 1987
Ph.D., The University of Texas Southwestern Medical Center, 1993

Sibel Antonson
Professor, Cardiology and Restorative Dentistry
D.D.S., Hacettepe University, 1992
Ph.D., Hacettepe University, 1999
M.B.A., Nova Southeastern University, 2007

Barbara Arcos
Chair and Associate Professor, Family Medicine
B.S., University of Florida, 1980
D.O., Nova Southeastern University, 1994
Graciela M. Armayor
Director, Curriculum Development
Assistant Professor, Sociobehavioral and Administrative Pharmacy
Pharm.D., University of Florida, 1987
M.S., Nova Southeastern University, 2006

Thomas P. Arnold
Professor, Basic Science
A.A., Palm Beach State College, 1978
B.S., University of Florida, 1982
Ph.D., University of South Florida, 1989

Cheryl G. Atherley-Todd
Assistant Professor, Family Medicine
B.S., McGill University, 1971
M.D., University of the West Indies School of Medicine, 1976
Certified Medical Director, Long-Term Care, 2013
Fellow, American Academy of Family Physicians, 2016

Michael Au
Assistant Professor, Optometry
B.S., Nova Southeastern University, 2008
O.D., Nova Southeastern University, 2012

Barbara Austen
Assistant Professor, Physician Assistant Studies
B.S., University of Nebraska Medical Center, 1994
M.S/M.P.A.S., University of Nebraska Medical Center, 1999

Llalando Austin
Program Director and Assistant Professor, Anesthesiologist Assistant
B.S., University of Central Florida, 2004
M.H.Sc., Nova Southeastern University, 2008
Ed.D. Nova Southeastern University, 2013

Kalumi Ayala
Assistant Professor, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2005

Michael Bacigalupi
Assistant Dean, Student Affairs
Assistant Professor, Optometry
B.S., University of Houston, 1991
O.D., University of Houston, 1993
M.S., Nova Southeastern University, 2007
Fellow, American Academy of Optometry

Annette Bade
Associate Professor, Optometry
B.A., Emory University, 1987
O.D., Southeastern University of the Health Sciences, 1993
Fellow, American Academy of Optometry

Camille Baldwin
Assistant Professor, College of Nursing
B.S., West Texas A&M University, 1996
M.S.N., Florida Atlantic University, 2006

Surbhi Bansal
Instructor, Optometry
B.S., University of Alberta, 2008

Tye Ed Barber
Assistant Professor, Family Medicine
B.A., University of South Florida, 1987
Ph.D., University of Florida, 1992
D.O., Nova Southeastern University, 2006

Barbara Barrett
Associate Dean, Academic Affairs, and Assistant Professor, College of Nursing
B.B.A., City University of New York, 1981
B.S.N., Barry University, 1991
M.S.N.—A.R.N.P., Florida International University, 2001
D.N.P., University of Miami, 2011
Ph.D., Nova Southeastern University, 2015

Kellie Thompson Bassion
Instructor, Optometry
B.S., University of Central Florida, 2009
O.D., Nova Southeastern University, 2013

Michelle Demory Beckler
Assistant Professor, Microbiology
B.A., Smith College, 2000
Ph.D., University of Virginia, 2008

Jennifer Bencsik
Director, Clinical Education, Cardiopulmonary Sciences
Assistant Professor, Cardiopulmonary Sciences
A.A.S., Sinclair Community College, 2003
B.S., Bellevue University, 2011
M.H.A., Bellevue University, 2012

Eulogio Besada
Professor, Optometry
B.S., University of Puerto Rico, 1979
M.S., University of Houston, 1982
O.D., University of Houston, 1989
Fellow, American Academy of Optometry

Anthony Bezerra
Clinical Instructor, Community Dentistry
D.D.S., University of Mexico Americana del Norte, 2000
Certificate—Dental Medicine, Nova Southeastern University, 2007

Anjali Bhasin
Assistant Professor, Internal Medicine
M.D., Baroda Medical College, 1995

Hua Bi
Associate Professor, Optometry
M.S., Peking University, 1998
Ph.D., University of Houston, 2006
O.D., University of Houston, 2006

Ava Katherine Bittner
Associate Professor, Optometry
B.S., Pennsylvania College of Optometry, 1997
O.D., Pennsylvania College of Optometry, 2001
Ph.D., Johns Hopkins School of Public Health, 2011
Fellow, American Academy of Optometry, 2009

Gregory Black
Chief, Primary Care Service
Assistant Professor, Optometry
B.S., University of Southern Indiana, 1989
O.D., Indiana University School of Optometry, 1996
Mary Tischio Blackinton
Associate Director, Hybrid D.P.T.
Program—Tampa, and Associate Professor
B.S./DPT, University of Maryland, 1983
M.S., Nova University, 1991
Ed.D., Nova Southeastern University, 2001
Geriatric Clinical Specialist, APTA, 2009
Certified Exercise Expert for Aging Adults, 2011

Cyril Blavo
Director and Professor, Public Health
Professor, Pediatrics
B.S., Abilene Christian University, 1979
M.S., Abilene Christian University, 1980
D.O., Texas College of Osteopathic Medicine, 1984
M.P.H. and T.M., Tulane University School of Public Health and Tropical Medicine, 1988
Fellow, American College of Osteopathic Pediatricians

Elise M. Bloch
Associate Professor, Occupational Therapy
B.S., New York University, 1980
M.S., Queens College, 1990
Ed.D., Florida International University, 2004

Robert E. Block
Assistant Professor, Community Dentistry
D.M.D. Tufts University School of Dental Medicine, 1982

Ronald E. Block
Professor and Chair, Biochemistry
B.S., College of Charleston, 1963
M.S., Clemson University, 1966
Ph.D., Clemson University, 1969

Elaine Bloom
Speech-Language Pathologist, Department of Speech-Language Pathology
B.S., Emerson College, 1962
M.S., Emerson College, 1968

David R. Boesler
Chair and Associate Professor, Osteopathic Principles and Practice
B.A., LaSalle University, 1981
M.S., Villanova University, 1983
D.O., Des Moines University College of Osteopathic Medicine and Surgery, 1988

Alicia R. Bolden
Assistant Professor, Physician Assistant Studies
B.S., University of Central Florida, 2002
M.S., University of Florida, 2005
Fellow, American Academy of Physician Assistants

Maria C. Bonilla
Assistant Professor, Endodontics
D.D.S., Menemerita Autonomous University of Puebla, 2001
Certificate—Endodontics, Autonomous University of Tlaxcala, 2007

Gabriela Bozutti
Assistant Professor, Prosthodontics
D.D.S., University of Buenos Aires, 1994
Certificate—Prosthodontics, Nova Southeastern University, 2009

Paul Bradley
Professor, Oral Medicine Diagnostic Sciences
B.D.S., University of Birmingham, 1959
M.B., B.S., University of London, 1966
M.D., University of London, 1989
F.D.S.R.C.S. (Eng), Royal College of Surgeons of England, 1985
F.D.S.R.C.S. (Edin), Royal College of Surgeons of Edinburgh, 1985
F.D.S.R.C.S. (Edin), Royal College of Surgeons of Edinburgh, 1988

Theressa Brahim
Program Director, Entry B.S.N.—Miami, and Assistant Professor, College of Nursing
B.S.N., Florida State University, 1973
M.S., Saint Thomas University, 1982
M.S.N., Barry University, 1990
D.N.P., University of Miami, 2010

Tambi Braun
Associate Professor, Department of Speech-Language Pathology
B.S., University of Witwatersrad, South Africa, 1998
M.S., Nova Southeastern University, 2002
SLPD, Nova Southeastern University, 2003

Abby Brodie
Associate Dean for Academic Affairs
Associate Professor, Cariology and Restorative Dentistry
B.S., University of Massachusetts, 1979
D.M.D., University of Pennsylvania, 1983
Fellow, American College of Dentists, 2007
Fellow, International College of Dentists, 2007
M.S., Nova Southeastern University, 2009

Steve E. Bronsburg
Assistant Professor, Biomedical Informatics
B.S., College of Misericordia, 1986
M.H.S.A., Florida International University, 1999
M.S., Nova Southeastern University, 2003
Ph.D., Nova Southeastern University, 2011

Diana Bronstein
Associate Professor, Periodontology
D.D.S., University of Saarland, 2000
M.S., Temple University, 2007
Certificate—Periodontology, Temple University, 2007

Thomas P. Brown
Assistant Professor, Family Medicine
D.O., Philadelphia College of Osteopathic Medicine, 1987
Lynne E. Bryant  
Professor, College of Nursing  
B.S.N., University of Maryland, 1976  
M.S.N., University of Pennsylvania, 1979  
Ed.D., Florida International University, 1997

T. Keith Burnham  
Assistant Professor, Physician Assistant Program—Jacksonville  
B.S.(Health Science), George Washington University, 1992  
B.S.(Physician Assistant), George Washington University, 1994  
M.P.A.S., University of Nebraska, 2000

Karen L. Butler  
Instructor, Correctional Medicine  
B.S., University of Michigan, 1978  
J.D., Thomas M. Cooley Law School, 1983  
M.D., Ross University School of Medicine, 2000  
M.Ed., University of West Florida, 2004

Lorilee Butler  
Chair and Assistant Professor, Physician Assistant Department—Orlando  
B.S., University of Nebraska Medical Center, 1992  
M.P.A.S., University of Nebraska Medical Center, 1997  
M.Ed., University of West Florida, 2004

Erin Byrne  
Clinical Assistant Professor, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2007

Joshua Caballero  
Associate Professor, Pharmacy Practice  
B.A., University of Florida, 1997  
Pharm.D., University of Tennessee, 2001

W. Grady Campbell  
Associate Professor, Biochemistry  
B.S., Emory University, 1991  
M.S., University of Tennessee, 1995  
Ph.D., University of Florida Medical School, 1998

Jennifer Canbek  
Program Director, D.P.T. Program  
Director, Postprofessional Advancement  
Associate Professor, Physical Therapy  
B.S., Maryville University—Saint Louis, 1998  
Ph.D., Nova Southeastern University, 2011

Ricardo C. Carrasco  
Program Director, Occupational Therapy Department—Tampa  
E.T.C., Pasig Catholic College, 1964  
B.S.C., San Beda College, 1968  
B.S.O.T., University of the Philippines, 1978  
M.S.Ed., University of the Philippines, 1982  
Ph.D., Union Institute and University, 1990  
Fellow, American Occupational Therapy Association, 1993

Manuel J. Carvajal  
Chair and Professor, Sociobehavioral and Administrative Pharmacy  
B.A., Florida Atlantic University, 1966  
M.S.A., University of Florida, 1969  
Ph.D., University of Florida, 1974

Ana Maria Castejon  
Associate Professor, Pharmaceutical Sciences  
B.S.(Pharm), Central University of Venezuela, 1990  
Ph.D, Central University of Venezuela, 1997

Rafael Castellon  
Predoctoral Co-Clinical Director and  
Associate Professor, Prosthodontics  
D.D.S., University of Guadalajara, 1997  
M.S., University of Minnesota, 2002

Robin Chard  
Professor, College of Nursing  
B.S.N., Florida International University, 1994  
M.S.N., Barry University, 1998  
Ph.D., Duquesne University, 2006

Ming-Shun Samuel Cheng  
Director, Ph.D. Program  
Associate Professor, Physical Therapy  
B.S., National Taiwan University, 1993  
M.S. Massachusetts General Hospital Institute of Health Professions, 1999  
Ph.D., Boston University, 2004

Diana Cherkiss  
Assistant Professor, Physician Assistant Studies  
B.S., University of Central Florida, 2004  
M.M.S., Nova Southeastern University, 2008  
Fellow, American Academy of Physician Assistants

Rebecca M. Cherney  
Associate Professor, Family Medicine  
B.S., University of Alabama, 1993  
D.O., Nova Southeastern University, 1997

Lance Cherry  
Assistant Professor, Hybrid D.P.T. Program  
B.S., University of Florida, 1985  
M.P.T., Emory University, 1990  
Certified Clinical Specialist, Orthopedics, American Board of Physical Therapy Specialities (OCS), 2003  
Ed.D., Columbia University, 2007

Eva Chiang  
Assistant Professor, Cardiology and Restorative Dentistry  
D.D.S., Havana University, Cuba, 1991

Judith Chin  
Postgraduate Director and Professor, Pediatric Dentistry  
D.D.S., Indiana University School of Dentistry, 1994

Eun Choi  
Assistant Professor, Oral Medicine Diagnostic Sciences  
M.S.D., Seoul National University (South Korea), 1995  
D.D.S., Nova Southeastern University, 2009

Jodi Clark  
Associate Professor, Health Science  
B.S., University of Miami, 1992  
M.D., University of Miami, 1996  
M.P.H., Florida International University, 2003

Michelle A. Clark  
Chair, Pharmaceutical Sciences  
B.A., Florida Atlantic University, 1990  
M.S., University of South Florida, 1995  
Ph.D., University of South Florida, 1996
Darren J. Cohen  
*Assistant Professor, Family Medicine*

B.S., Emory University, 2001  
D.O., Nova Southeastern University, 2005

Peter M. Cohen  
*Assistant Professor, Family Medicine*

B.A., University of South Florida, 1981  
D.O., Southeastern University of the Health Sciences, 1993

Stanley Cohen  
*Professor, Humanities*

B.S., Rutgers University, 1950  
M.Ed., Temple University, 1955  
Ed.D., Temple University, 1965

Joan Coke  
*Assistant Professor, College of Nursing*

B.S., Barry University, 1997  
M.P.H., Florida International University, 2002  
M.S.N.—A.R.N.P. Adult, Florida International University, 2005

Megan Colas  
*Clinical Director and Assistant Professor, Athletic Training*

B.S., Salisbury University, 2002  
M.S., Virginia Polytechnic Institute and State University, 2003  
Ph.D., Virginia Polytechnic Institute and State University, 2009

Rose M. Colón  
*Associate Professor, Health Science*

B.S., Psychology, University of Houston, 1992  
M.A., Psychology, University of Houston, 1995  
Ph.D., University of Houston, 1997

Frances M. Colón-Pratts  
*Clinical Assistant Professor, Pharmacy Practice*

Pharm.D., University of Puerto Rico, 2006

Luvencia Connor  
*Associate Professor, College of Nursing*

B.S.N., University of the Virgin Islands, 1991  
M.S.N., University of Phoenix, 2001  
Ed.D., Nova Southeastern University, 2015

Gerald Conover  
*Professor and Chair, Anatomy*

B.S., University of Michigan, 1964  
M.S., University of Michigan, 1967  
Ph.D., University of Michigan, 1969

Gisela Contasti  
*Assistant Professor, Orthodontics*

D.D.S., Universidad Central de Venezuela, 1976  
M.S., University of Texas Health Science Center, 1982

Nicole J. Cook  
*Assistant Professor, Public Health*

Assistant Professor, Disaster and Emergency Management  
B.A., Brandeis University, 1990  
M.P.A., New York University, 1995  
Ph.D., University of Miami, Miller School of Medicine, 2008

Albert E. M. Coombs  
*Clinical Director and Assistant Professor, Physician Assistant Program—Fort Myers*

B.S., George Washington University, 1981  
B.S./P.A., George Washington University, 1984  
M.A., Beaver College, 1992

Fellow, American Academy of Physician Assistants  
Fellow, Florida Academy of Physician Assistants  
Fellow, American Counseling Association  
Associate, American Psychological Association

Rachel Anastasia Coulter  
*Associate Professor, Optometry*

B.A., Duke University, 1983  
O.D., Pennsylvania College of Optometry, 1991  
Fellow, American Academy of Optometry  
Fellow, College of Optometrists in Vision Development  
Diplomate—Binocular Vision, Perception, and Pediatric Optometry, American Academy of Optometry

Tavis Craddock  
*Assistant Professor, Clinical Immunology*

Assistant Professor, Psychology and Neuroscience  
B.S., University of Guelph, 2002  
M.S., University of Alberta, 2008  
Ph.D., University of Alberta, 2012

Melanie A. Crandall  
*Associate Professor, Optometry*

B.S., Southern College of Optometry, 1977  
O.D., Southern College of Optometry, 1977  
M.B.A., Nova Southeastern University, 2000  
Fellow, American Academy of Optometry

Gary D. Cravens  
*Assistant Professor, Biomedical Informatics*

B.A., Indiana University, 1975  
M.S., Indiana University, 1979  
M.S., Indiana University, 1986  
M.S., Indiana University, 1992  
M.D., Indiana University, 1997  
M.S., Indiana University, 2013

Luigi Cubeddu  
*Professor, Pharmaceutical Sciences*

M.D., Central University of Venezuela, 1964  
Ph.D., University of Colorado, 1974

Jolanta M. Czerwinska  
*Director of Educational Technology*

Assistant Professor, Pharmaceutical Sciences  
M.A., University of Gdansk, 1981  
M.A., Ball State University, 1984  
Ph.D., University of Gdansk, 1993

Mariana D’Amico  
*Associate Professor, Occupational Therapy*

B.S., New York University  
M.S., Eastern Kentucky University  
Ed.D., Spalding University

Rick D. Davenport  
*Program Director, Ph.D. Program*

Assistant Professor, Occupational Therapy Department  
B.S.N., University of Florida, 1995  
M.H.S., University of Florida, 2000  
Ph.D., University of Florida, 2007
Jackie Davie  
Associate Professor, Audiology  
B.S., The Pennsylvania State University, 1994  
M.S., The Pennsylvania State University, 1996  
Ph.D., The Pennsylvania State University, 2005

Kelley L. Davis  
Director and Professor, Disaster and Emergency Management  
Professor, Microbiology  
Associate Professor, Public Health  
B.A., University of Kansas, 1997  
Ph.D., University of Missouri, 2003

Molly Davis  
Speech-Language Pathologist, Department of Speech-Language Pathology  
B.Ed., University of Toledo, 1996  
M.Ed., University of Toledo, 1999

Richard E. Davis  
Professor, Physician Assistant Studies  
B.S./PA., University of Oklahoma, 1981  
M.S., Troy State University, 1984  
Ed.D., Nova Southeastern University, 2001  
Fellow, American Academy of Physician Assistants

Thomas J. Decker  
Assistant Professor, Occupational Therapy  
B.S., Iowa State University  
B.S., Saint Ambrose University  
O.T.D., Rocky Mountain University of Health Professions

Michael J. DeFranco  
Clinical Assistant Professor, Orthopedic Surgery and Sports Medicine  
B.S., Fordham University, 1993  
M.D., Case Western Reserve School of Medicine, 2001

Hilda M. DeGaetano  
Assistant Dean, Preclinical Education  
Professor, Pediatrics  
B.S., New York Institute of Technology, 1988  
D.O., New York College of Osteopathic Medicine, 1992

Joseph S. DeGaetano  
Professor, Family Medicine  
B.S., New York Institute of Technology, 1988  
D.O., New York College of Osteopathic Medicine, 1992  
M.S., Nova Southeastern University, 2006

Marlon Demeritt  
Assistant Professor, Optometry  
B.S., Florida International University, 2000  
O.D., Nova Southeastern University, 2004  
M.B.A., Nova Southeastern University, 2015  
Fellow, American Academy of Optometry

Paul DeMuro  
Associate Professor, Sociobehavioral and Administrative Pharmacy  
B.A., University of Maryland, 1976  
J.D., Washington University, 1979  
M.B.A., University of California—Berkeley, 1986  
M.B.L., Oregon Health and Science University, 2012  
Ph.D., Oregon Health and Science University School of Medicine, 2015

Marcia Derby-Davis  
Associate Professor, College of Nursing  
B.S.N., Florida Atlantic University, 2000  
M.S.N., University of Phoenix, 2005  
Ph.D., Barry University, 2010

Lori DeSorbo  
Assistant Professor, Anesthesiologist Assistant  
B.S., Florida Atlantic University, 2001  
M.M.S., Emory University, 2004

Albert Despaigne  
Assistant Professor, Prosthodontics  
D.M.D., New York University, College of Dentistry, 1977

Richard Deth  
Professor, Pharmaceutical Sciences  
B.S., SUNY—Buffalo, 1970  
Ph.D., University of Miami, 1975

Lisa M. Deziel  
Dean, College of Pharmacy  
Associate Professor, Pharmacy Practice  
B.S. (Pharm.), Mercer University School of Pharmacy, 1983  
Pharm.D., Mercer University School of Pharmacy, 1984  
Ph.D., Nova Southeastern University, 2000  
Fellow, American Society of Health-System Pharmacists

Debbie Diamond  
Assistant Professor, College of Nursing  
B.S.N., Florida International University, 1999  
M.S.N., Barry University

Morton A. Diamond  
Medical Director and Professor, Physician Assistant Studies  
A.B., Cornell University, 1959  
M.D., State University of New York, 1963  
Fellow, American College of Physicians  
Fellow, American College of Cardiology  
Fellow, American Heart Association

Frederick DiCarlo  
Director of Academic and Faculty Support and Assistant Professor, Department of Speech-Language Pathology  
B.S., State University of New York—Buffalo, 1982  
M.S., Nova Southeastern University, 1996  
Ed.D., Nova Southeastern University, 2008

Jeffrey Doeringer  
Assistant Professor, Athletic Training  
B.S., East Stroudsburg University, 2006  
M.S., Ohio University, 2008  
Ph.D., Oregon State University, 2014

Rachelle Dorne  
Director and Associate Professor, Master of Occupational Therapy Program  
B.S., University of Wisconsin, 1975  
M.Ed., University of Washington, 1979  
Ed.D., Tennessee State University, 2004

Lori B. Dribin  
Assistant Dean for Student Affairs  
Professor, Anatomy  
B.A., Northwestern University, 1972  
M.S., Northwestern University, 1973  
Ph.D., Northwestern University, 1975
Saulius Drukteinis  
**Predoctoral Program Director**  
and **Associate Professor, Periodontology**  
D.M.D., Tufts University, 1999  
M.S., University of Alabama—Birmingham, 2003  
Ph.D., University of Alabama—Birmingham, 2012

Sandeep Dunbar  
**Chair, Occupational Therapy Department**  
**Assistant Dean, Professional Development**  
**Professor, Occupational Therapy Department**  
B.S., Loma Linda University, 1982  
M.S., New York University, 1983  
D.P.A., Nova Southeastern University, 2002  
Fellow, American Occupational Therapy Association

Anthony J. Dyda, Jr.  
**Associate Professor, Program Director, Ph.D. Program**  
B.A., Point Park College, 1979  
B.S./P.A., United States Air Force/Oklahoma University, 1981  
M.P.A.S., University of Nebraska Medical Center, 1997  
D.H.Sc., Nova Southeastern University, 2006  
Distinguished Fellow, American Academy of Physician Assistants

Diane Ede-Nichols  
**Chair, Interim Postgraduate Program Director, and Associate Professor Community Dentistry**  
**Associate Professor, Public Health**  
D.M.D., Fairleigh Dickinson University College of Dental Medicine, 1987  
M.H.L., Nova Southeastern University, 2004  
M.P.H., Nova Southeastern University, 2010

Melissa Edrich  
**Program Director and Assistant Professor, B.S.-SLCD Program, Department of Speech-Language Pathology**  
B.A., Florida Atlantic University, 1993  
M.S., Nova Southeastern University, 1996  
Ed.D., Nova Southeastern University, 2015

Traci-lyn Eisenberg  
**Director, Preclinical Education**  
**Assistant Professor, Family Medicine**  
B.S., Richard Stockton College, 2004  
D.O., Nova Southeastern University, 2011

Mohamad Elazizi  
**Assistant Professor, Periodontology**  
B.D.S., Al Azhar University, Egypt, 1996  
M.Sc., University of Pennsylvania, 2013  
Certificate—Periodontology, University of Pennsylvania, 2013

Steven A. Ellen  
**Assistant Professor, Department of Community Dentistry**  
D.D.S., NYU College of Dentistry, 1974

Sara Eltaki  
**Assistant Professor, Pharmacy Practice**  
Pharm.D., Ernest Mario School of Pharmacy Rutgers, The State University of New Jersey, 2008

Alexandra Espejo  
**Assistant Professor, Optometry**  
Optometra, Universidad de la Salle, Colombia, 1992  
O.D., Pennsylvania College of Optometry, 1996  
Fellow, American Academy of Optometry

Diane Esposito  
**Assistant Professor, College of Nursing**  
B.S.N., Bloomsburg University of Pennsylvania, 1987  
M.S.N., Adelphi University, 1996  
Ph.D., Barry University, 2013

Rogerio S. Faillace  
**Assistant Professor, Pediatrics**  
M.D., Fluminense Federal University, 1987  
B.S.N., Barry University, 1992

Laura Falco  
**Associate Professor, Optometry**  
B.S., State University of New York, 1995  
O.D., State University of New York, 1999  
Fellow, American Academy of Optometry

Lisa Farach  
**Chair, Cardiopulmonary Sciences**  
A.S., Broward College, 1992  
B.A., Florida Atlantic University, 1999  
M.S., Florida International University, 2009

Amir Farhangpour  
**Predoctoral Co-Clinical Director and Assistant Professor, Cariology and Restorative Dentistry**  
D.D.S., Creighton University, 1995

Greg Fecho  
**Assistant Professor, Optometry**  
B.A., Florida Atlantic University, 1995  
O.D., Nova Southeastern University, 2001

Harvey A. Feldman  
**Professor, Physician Assistant Studies**  
B.A., University of Pennsylvania, 1963  
M.D., University of Pennsylvania, 1967  
Fellow American College of Physicians American Society of Nephrology

Kira Fenton  
**Assistant Professor, Internal Medicine**  
B.S., University of Florida, 2003  
D.O., Nova Southeastern University, 2008

M. Isabel Fernandez  
**Professor, Public Health**  
**Professor, Preventive Medicine**  
B.A., Florida International University, 1978  
M.A., Michigan State University, 1981  
Ph.D., Michigan State University, 1986

Alicia Fernandez-Fernandez  
**Associate Professor, Physical Therapy**  
Diploma, University of Oviedo—Spain, 1997  
B.S. Health Sciences, Florida International University, 2000  
M.S. PT, Florida International University, 2002  
B.S. B.M.E, Florida International University, 2007  
D.P.T., Nova Southeastern University, 2010  
Ph.D., Florida International University, 2013

Phyllis Filker  
**Assistant Dean, Graduate and Community Education**  
**Associate Professor, Public Health**  
D.M.D., University of Florida, 1980  
M.P.H., Nova Southeastern University, 2012
Nathalie Findlater
Instructor, Optometry
B.S., University of Florida, 2010
O.D., Nova Southeastern University, 2015

Richard Finkel
Clinical Assistant Professor, Pharmaceutical Sciences
B.S. (Pharm.), University of Florida, 1956
Pharm.D., Southern University of the Health Sciences, 1992

C. Richard Finley
Program Director and Associate Professor, Physician Assistant Department—Fort Lauderdale
B.S.P.A., University of Cape Town, South Africa, 1978
M.A., New York University, 1983
SLPD, Nova Southeastern University, 2002

Hélène Fisher
Associate Professor, Department of
Speech-Language Pathology
B.S., University of Cape Town, South Africa, 1978
M.A., New York University, 1983
SLPD, Nova Southeastern University, 2002

Michael Flax
Postgraduate Program Director and Professor, Endodontics
D.D.S., Georgetown University School of Dentistry, 1980
Diplomate, American Board of Endodontics

Jay M. Fleisher
Associate Professor, Public Health
B.S., Richmond College, 1974
M.S. College of Staten Island, 1977
M.S., Columbia University, 1990
Ph.D., New York Institute of Environmental Medicine, 1994

Paul Fleisher
Assistant Professor, Cariology and Restorative Dentistry
D.D.S., Northwestern University, 1965

Mary Fletcher
Professor, Clinical Immunology
B.S., Technological College, 1959
M.A., University of Texas, 1961
Ph.D., Baylor University, 1966

Marie H. Florent-Carre
Assistant Professor, Family Medicine
Assistant Professor, Public Health
Director, Department of Rural and Urban Underserved Medicine
B.S., University of Florida, 1994
M.P.H, Florida International University, 1999
D.O., Nova Southeastern University, 2005

Gina Foster-Moumoutjis
Assistant Professor, Family Medicine
B.A., Harvard University, 2000
M.D., University of Miami, 2005

Joan Frater-Clarke
Assistant Professor, College of Nursing
M.P.H, Florida International University, 2000
M.S.N.—A.R.N.P., Florida International University, 2005

Barry Frauens
Associate Professor, Optometry
B.S., Wilkes College, 1985
O.D., Nova Southeastern University, 1996
Fellow, American Academy of Optometry

Elizabeth Frenzel Shepherd
Assistant Dean
Assistant Professor, Pharmacy Practice
B.S. (Pharm.), Long Island University, 1980
M.B.A., Florida International University, 1987
Pharm.D., Shenandoah University, 2012
Fellow, American Society of Consultant Pharmacists

Erica Friedland
Chair and Associate Professor, Audiology
Adjunct Faculty Member, Department of Speech-Language Pathology
B.S., University of Florida, 1990
M.S., Vanderbilt University, 1992
Au.D., Nova Southeastern University, 2001

Linda Fritsinger-Hearn
Assistant Professor, College of Nursing
B.S.N., Nova Southeastern University, 2006
M.S.N., Nova Southeastern University, 2009
Ed.D., Nova Southeastern University, 2016

Mark Gabay
Assistant Professor, Pediatrics
B.S., University of Arizona, 1999
D.O., Nova Southeastern University, 2005

Lori Gabric
Facilitator of Clinical Placements and Instructor, Department of Speech-Language Pathology
B.S., University of Central Florida, 2007

Patricia A. Gaffney
Associate Professor, Audiology
M.S., University of Pittsburgh, 2003
Au.D., University of Pittsburgh, 2005

Rashondia E. Gaines
Assistant Professor, Cariology and Restorative Dentistry
Director of Faculty Practice
B.A., Hampton University, 1994
D.D.S., Virginia Commonwealth University/Medical College of Virginia School of Dentistry, 1998
Certificate—AEGD, University of Missouri—Kansas City School of Dentistry, 1999

Sandrine Gaillard-Kenney
Assistant Dean, Undergraduate Education
Associate Professor, Department of Health Science
B.A., Universite de la Sorbonne Nouvelle, 1995
M.A., Universite de la Sorbonne Nouvelle, 1997
M.A., Universite de la Sorbonne Nouvelle, 1998
Ed.D, Nova Southeastern University, 2007

Audrey Galka
Chair and Associate Professor, Cariology and Restorative Dentistry
D.D.S., New York University, 1980
Robin Galley
Assistant Professor, Hybrid D.P.T. Program
Director of Clinical Education
B.S., Louisiana State University, 1999
M.S., Texas Woman's University, 2001
D.P.T., A.T. Still University, 2012
Certified Clinical Specialist—Orthopedics, American Board of Physical Therapy Specialties

Joann Gallichio
Assistant Professor, Hybrid D.P.T. Program
B.S., University of Scranton, 1997
M.S., University of Scranton, 1998
D.Sc., Rocky Mountain University of Health Professions, 2010

Peter M. Gannett
Associate Dean, Research and Graduate Education
B.S., University of Missouri—Columbia, 1977
Ph.D., University of Wisconsin—Madison, 1982

Jeffrey Garber
Assistant Professor, Restorative Dentistry
D.M.D., University of Pennsylvania, 1971

Bibiana Garcia
Assistant Professor, Periodontology
D.D.S., Colombian Odontological College, 1995

Nancy Gauvin
Instructor, Department of Speech-Language Pathology
B.S., University of Central Florida, 1996
M.S., Nova Southeastern University, 2002
Ed.D., Nova Southeastern University, 2016

David M. Gazze
Clinical Assistant Professor, Pharmaceutical Sciences
B.S., University of Pittsburgh, 1980
Ph.D., University of Pittsburgh, 1987

Michael Georgescu
Assistant Professor, Cariology and Restorative Dentistry
D.M.D., Boston University, 1987

Stephanie Kleyman Gernant
Assistant Professor, Pharmacy Practice
B.S., University of Missouri, 2008
M.S., Purdue University, 2015
Pharm.D., Ohio State University, 2012

Kelly Gillespie
Clinical Supervisor and Instructor, Department of Speech-Language Pathology
B.S., Marquette University
M.S., Marquette University

Nadine Girgis Hanna
Assistant Professor of Optometry
B.A., Washington University of St. Louis, 1999
O.D., Indiana University, 2003
Fellow, American Academy of Optometry

Elizabeth Gnagy
Instructor, Psychiatry
B.S., University of Maryland, 2008
D.O., Lake Erie College of Osteopathic Medicine, 2013

Antonio Godoy
Assistant Professor, Prosthodontics
D.D.S., Universidad de Carabobo, 1979
M.S., University of Maryland, 1984
Certificate—Maxillofacial Prosthodontics, University of Texas, 1990

Kelly Goebel
Associate Professor, College of Nursing
B.S.N., St. Joseph's College of Nursing, 1991
M.S.N., Loyola University of Chicago, 2003
D.N.P., University of South Florida, 2010

Marvin J. Golberg
Assistant Professor, Prosthodontics
D.D.S., University of Maryland, 1956

Tulia Gonzalez
Assistant Professor, Cariology and Restorative Dentistry
D.M.D., University Colegio Odontologico Colombiano, 1987

Harvey Gordon
Assistant Professor, Cariology and Restorative Dentistry
D.D.S., George Town School of Dentistry, 1968

Laurie Gordon-Brown
Assistant Professor, Cariology and Restorative Dentistry
D.M.D., University of Pennsylvania, 1980

Jessica Granata
Assistant Professor and Director of Clinical Services,
A.P.R.N. Program
M.S.N., Asuza Pacific University, 2009

Stephen G. Grant
Associate Professor, Public Health
B.Sc., University of Toronto, 1979
Ph.D., University of Toronto, 1985

Katherine Green
Instructor, Optometry
O.D., Illinois College of Optometry, 2015

Paul Greenman
Associate Professor, Anatomy
D.P.M., Pennsylvania College of Podiatric Medicine, 1992

Edye Elizabeth Groseclose
Professor, Biochemistry
Professor, Nutrition
B.S., University of Miami, 1965
Ph.D., University of Miami School of Medicine, 1978

Robert C. Grosz
Professor, Physician Assistant Studies
B.A., Adelphi University, 1964
M.S., Adelphi University, 1966
Ed.D., Nova University, 1974

Mauricio Guerrero
Assistant Professor, Prosthodontics
D.D.S., Pontifical Xavier University, 1989

Laura Gunder-McClary
Assistant Professor, Physician Assistant—Orlando
B.S., Medical College of Georgia, 1995
M.H.E., Medical College of Georgia, 1997
D.H.Sc., Nova Southeastern University, 2008
Martha Gutierrez Ramirez  
Assistant Professor, Cariology and Restorative Dentistry  
D.D.S., Colombian Odontological College, 1989

José C. Gutiérrez-Rocca  
Assistant Professor, Pharmaceutical Sciences  
B.S. Pharm. (Hons.), University of Texas—Austin, 1988  
Ph.D., University of Texas—Austin, 1993

Steven Haas  
Assistant Dean for Predoctoral Clinics  
Assistant Professor, Prosthodontics  
D.M.D., University of Pennsylvania, 1983  
Certificate—Advanced Graduated Studies in Prosthodontics, Boston University School of Graduate Dentistry, 1986  
J.D., Touro College Law Center, 1996

Stanley Hack  
Assistant Professor, Cariology and Restorative Dentistry  
D.D.S., University of Witwatersrand, Johannesburg, South Africa, 1974

Genevieve Hale  
Assistant Professor, Pharmacy Practice  
B.A., Rutgers University, 2009  
Pharm.D., Nova Southeastern University, 2013

Elizabeth M. Hames  
Assistant Professor, Geriatrics  
B.A., University of Miami, 1993  
M.A., University of Miami, 1995  
D.O., Nova Southeastern University, 2009

Teri Hamill  
Professor, Audiology  
B.A., University of Central Florida, 1982  
M.S., Florida State University, 1983  
Ph.D., Florida State University, 1986

Janet K. Hamstra  
Assistant Dean, Osteopathic Postgraduate Education  
Associate Professor, Internal Medicine  
B.A., Calvin College, 1980  
M.S., California State University, 1987  
Ed.D., University of California—Los Angeles, 1996

Jorge Han  
Program Director and Assistant Professor, Medical Sonography  
M.D., University Cayetano Heredia, 1981  
Ob-Gyn Specialist, University Cayetano Heredia, 1987

Andra Hanlon  
Associate Dean, Graduate Programs  
Professor, College of Nursing  
B.S.N., Georgetown University, 1972  
M.S., Rutgers University, 1987  
Post-masters Certificate, Marquette University, 2002  
Ph.D., Loyola Chicago, 2004

Patrick Hardigan  
Professor, Biomedical Informatics  
Professor, Public Health  
B.S., Ferris State College, 1987  
M.B.A., University of Wyoming, 1991  
Ph.D., University of Wyoming, 1996

Robert Hare  
Assistant Professor, College of Nursing  
B.S.N., Barry University, 2009  
M.S.N., Barry University, 2011

Delia Harper-Celestine  
Assistant Dean, Student and Alumni Services  
Assistant Professor, Medical Education  
Assistant Professor, Public Health  
B.S., Brooklyn College City University of New York, 1991  
M.P.H., New York University School of Education, 1997  
Ed.D, Nova Southeastern University, 2011

Tomas Havránek  
Research Associate/Instructor  
B.S., Comenius University in Bratislava, 2009  
M.S., Elizabeth University of Health and Social Sciences, Bratislava, 2011  
Ph.D., Slovak Academy of Sciences, 2015

Pinar Haytac  
Instructor, Optometry  
B.A., Dowling College, 2005  
O.D., Nova Southeastern University, 2015

Kelly Henson-Evertz  
Assistant Professor, College of Nursing  
B.S.N., Metropolitan State University, 2009  
M.A., St. Catherine University, 2011  
D.N.P., Chatham University, 2013

Alison Herman  
Assistant Professor and Academic Fieldwork Coordinator, Occupational Therapy  
Instructor, Public Health  
B.S., University of Florida, 1999  
M.P.H., Nova Southeastern University, 2007

Maria A. Hernandez  
Chair, Postdoctoral Program Director, and Associate Professor, Periodontology  
D.D.S., University of Carabobo, Valencia-Venezuela, 1998  
Certificate—Periodontics, University of Pennsylvania, School of Medicine, 2003  
Implant Fellowship, University of Pennsylvania, School of Medicine, 2004

Heather Hettrick  
Associate Professor, Physical Therapy  
B.S., University of Puget Sound, 1992  
M.S., Chapman University, 1995  
Ph.D., Nova Southeastern University, 2003

Brian Hierholzer  
Clinical Assistant Professor, Pharmacy Practice  
A.A., Santa Fe College, 1994  
Pharm.D., Nova Southeastern University, 2003

Cheryl J. Hill  
Professor, Physical Therapy  
B.S./P.T., Medical College of Virginia, 1973  
M.S., Nova University, 1979  
Ph.D., Nova Southeastern University, 2004  
D.P.T., A.T. Still University, 2011
Darren Hoffberger
Medical Director and Assistant Professor,
Cardiopulmonary Sciences
B.A., Florida Atlantic University, 1999
M.S., Florida International University, 2009

Maritzabel Hogge
Associate Professor, Oral Medicine Diagnostic Sciences
D.D.S., Pontificia Universidad Javeriana, 1998
M.S., University of North Carolina, 2008

Susan Holland
Program Director, Entry B.S.N.—Fort Myers,
College of Nursing
N.Ed., University of Central Florida
B.S.N., University of Central Florida, 2005
M.S.N., University of Central Florida, 2008
Ph.D., University of Phoenix, 2015

T. Lucas Hollar
Associate Professor, Public Health
B.A., Erskine College, 2000
B.A., Erskine College, 2000
Ph.D., Florida Atlantic University, 2008

Peter Holub
Associate Professor, Health Science
B.A., University of California—Berkeley, 1979
B.S., California College of Podiatric Medicine, 1982
D.P.M., California College of Podiatric Medicine, 1984
M.S., Pennsylvania State University, 2002
Ph.D., Nova Southeastern University, 2011

Denise Howard
Program Director, R.N. to B.S.N., R.N. to M.S.N.,
Nonclinical M.S.N. Programs, College of Nursing
B.S.N., Nova Southeastern University, 2008
M.S.N., Nova Southeastern University, 2010
D.N.P., Nova Southeastern University, 2014

James T. Howell
Professor, Rural Medicine
Professor, Public Health
Professor, Disaster and Emergency Management
B.S., St. John's University, 1962
M.D, New York Medical College, 1966
M.P.H., Harvard University School of Public Health, 1972

Chiu-jen Hsu
Assistant Professor, Prosthodontics
B.D.S., China Medical College, Taichung, Taiwan, 1988
D.D.S., New York University, 1992
Certificate—AEGD, Lutheran Medical Center, 1993
Certificate—Postgraduate Prosthodontics Program, Columbia
University, 1995
Certificate—Maxillofacial Prosthodontics Fellowship, Bronx VA
Medical College, 1996

Charles Huang
Assistant Professor, Pediatric Dentistry
Ph.D., Columbia University, 2001

Michael Imon
Assistant Professor, Anesthesiologist Assistant
M.A., California State University—Long Beach, 1973
M.M.Sc., Emory University, 1975
Ph.D., Emory University, 1980

Max Ito
Associate Professor, Occupational Therapy Program
B.S., University of Oklahoma, 1978
M.S., Kansas State University, 1981
Ph.D., University of Texas at Austin, 1994

Robin J. Jacobs
Associate Professor, Psychiatry and Behavioral Medicine,
Public Health, and Biomedical Informatics
B.S., University of New Mexico, 1991
M.S.W., San Diego State University, 1997
Ph.D., Florida International University, 2006
M.S., Nova Southeastern University, 2014
M.P.H., Nova Southeastern University, 2016

Pamela B. Jaffey
Associate Professor, Physician Assistant Studies
A.B., Columbia University, 1981
M.D., New York Medical College, 1986
Fellow, American Academy of Clinical Pathologists

Andrea Janoff
Associate Professor, Optometry
O.D., New England College of Optometry, 1986
Fellow, American Academy of Optometry

May Jarkas
Assistant Professor, Optometry
B.S., University of Waterloo, 2011
O.D., University of Waterloo, 2011
Residency—Pediatrics and Binocular Vision, Illinois College
of Optometry, 2015

Kenneth E. Johnson
Assistant Dean, Faculty Affairs
Chair and Professor, Obstetrics/Gynecology
Professor, Public Health
B.S., Florida State University, 1981
D.O., Southeastern University of the Health Sciences, 1991

Michelle Johnson
Assistant Professor, Family Medicine
Assistant Professor, Public Health
B.S., Florida International University, 1989
D.O., Midwestern University, 1996

Broderick Jones
Professor, Pathology
B.S., Tuskegee University, 1979
M.S., Tuskegee University, 1982
M.D., University of Miami, 1992

Renee S. Jones
Director, Preceptor Development
Assistant Professor, Pharmacy Practice
Pharm.D., Florida A&M University, 2005

Jennifer Jordan
Assistant Dean and Department Chair, Medical Education
Assistant Professor, Medical Education
B.S., University of South Florida, 1992
M.S., Nova Southeastern University, 1998
Ed.D., Nova Southeastern University, 2008

452 Health Professions Division—Full-time Faculty Members
Tina Joseph  
Assistant Professor, Pharmacy Practice  
Pharm.D., St. John’s University, 2013

Denise Josey  
Instructor, Preventive Medicine  
B.S., Atlantic Union College, 2002  
M.P.H., University of Medicine and Dentistry of New York, 2005  
M.D., Howard University, 2012

Steven Kaltman  
Associate Dean, Extramural and Hospital Affairs  
Chair and Professor, Oral and Maxillofacial Surgery  
D.M.D., University of Pittsburgh, 1973  
M.D., University of Health Sciences, Antigua, 2000

Umadevi Kandalam  
Assistant Professor, Research  
Ph.D., Andhra University, 1996  
M.S., Annamalai University, India, 1988

Lea Kaploun  
Associate Professor, Department of Speech-Language Pathology  
B.A., City University of New York—Brooklyn College, 1991  
M.S., City University of New York—Brooklyn College, 1993  
Ph.D., Columbia University Teacher’s College, 2008

Sonia F. Kay  
Assistant Professor, Occupational Therapy Program  
B.S., University of Florida, 1975  
M.S., University of Florida, 1976  
Ph.D., Nova Southeastern University, 2002

Peter Keller  
Executive Associate Dean for Academic and Clinical Resources  
Associate Professor, Cariology and Restoratıve Dentistry  
D.D.S., New York University College of Dentistry, 1967  
Fellow, International College of Dentists  
Fellow, American College of Dentists, 1998

Nickelle Kellough-Menendez  
Adjunct Clinical Associate Professor, Optometry

Steven Kelner  
Associate Dean of Institutional Affairs  
Professor  
D.M.D., University of Pennsylvania, 1979  
Certificate—Endodontics, University of Pennsylvania, 1986  
M.S. Marketing, Roosevelt University, 1996

Brianna Kent  
Chair and Assistant Professor, Health Science  
B.S.N., University of St. Thomas, 1979  
M.Ed., University of Houston, 1984  
Ph.D., Nova Southeastern University, 2006

Nile M. Khanfar  
Associate Professor, Sociobehavioral and Administrative Pharmacy  
B.S., Northwestern State University, 1987  
M.B.A., University of Louisiana, 2001  
Ph.D., University of Louisiana, 2005

Shiva Khatami  
Associate Professor, Orthodontics  
D.D.S., Shahid Beheshti University of Medical Science, 2001  
Certificate—Orthodontics and Dentofacial Orthopedics, University of Rochester, 2009  
Ph.D., University of British Columbia, CN, 2010

Evren Kilinc  
Associate Professor, Cariology and Restoratıve Dentistry  
D.D.S., Ege University, 1998  
Ph.D., Ege University, 2006

Philip K. Kim  
Instructor, Optometry  
O.D., Nova Southeastern University, 2015

David King  
Assistant Professor, College of Nursing  
Assistant Professor, Physician Assistant Program—Fort Myers  
Ph.D., University of South Florida, 2000

Scott L. Kjelson  
Director, Student Transitions  
Assistant Professor, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2014

Jo Ann Kleier  
Director, Nursing Research  
Professor, College of Nursing  
A.A.S., Shelby State Community College, 1982  
B.S.N., University of South Florida, 1985  
M.S.N., University of Miami, 1988  
Ed.D., Florida International University, 1997  
Ph.D, Barry University, 2002

Nancy Klimas  
Director, NSU-COM Institute for Neuro-Immune Medicine  
Chair, Department of Clinical Immunology  
Professor, Internal Medicine  
Professor Emeritus, University of Miami School of Medicine  
B.S., University of South Florida, 1976  
M.D., University of Miami, 1980

Jodi Kodish-Stav  
Director, Informatics  
Assistant Professor, Cariology and Restoratıve Dentistry  
D.D.S., Emory University, 1982  
Fellow, Academy of General Dentistry

Morey J. Kolber  
Associate Professor, Physical Therapy  
B.H.S., University of Miami, 1993  
M.S.P.T., University of Miami, 1995  
Ph.D., Nova Southeastern University, 2007

George Kolos  
Assistant Professor, Prosthodontics  
D.M.D., University of Alabama, 1987

Sarah Koplow  
Assistant Professor, College of Nursing  
B.S.N., University of Florida, 2005  
M.S.N., George Mason University, 2009  
Post-M.S.N.—A.P.R.N., University of Illinois—Chicago, 2013  
Ph.D., University of Illinois—Chicago, 2013
Theofilos Koutouzis  
Associate Professor, Periodontics  
D.D.S., Aristotle University, Greece, 1999  
Certificate—Periodontics, Gothenburg University, 2006  
M.S., University of Florida, 2011

Lawrence Krasne  
Associate Professor, Prosthodontics  
D.D.S., St. Louis University, 1954  
Fellow, International College of Dentistry  
Fellow, Royal Society of Health

Deirdre Krause  
Associate Professor, College of Nursing  
B.S.N., Hunter Bellevue College, 1976  
M.A., New York University, 1978  
Ph.D., University of Miami, 1991

Young M. Kwon  
Associate Professor, Pharmaceutical Sciences  
B.S., Oregon State University, 1997  
Ph.D., University of Utah, 2003

Leslie Kyrimes  
Instructor, Department of Speech-Language Pathology  
B.S., Nova University, 1991  
M.S., Nova Southeastern University, 1995  
Ed.S., Nova Southeastern University, 2014

Lynn Lafferty  
Assistant Professor, Family Medicine  
Assistant Professor, Nutrition  
B.S., University of Georgia, 1982  
M.B.A., University of Miami, 1987  
Pharm.D., Nova Southeastern University, 2006

L. Leanne Lai  
Professor, Sociobehavioral and Administrative Pharmacy  
B.S. (Pharm.), Kaohsiung Medical College, Taiwan, 1990  
Ph.D., University of Maryland, 1996

Nicole Laing  
Assistant Professor, College of Nursing  
B.S.N., Howard University, 2001  
M.S.N., Yale University, 2004  
D.N.P., Florida Atlantic University, 2011

Stefanie La Manna  
Coordinator, Clinical Services  
Associate Professor, College of Nursing  
A.S.N., Broward Community College, 1994  
B.S.N., Barry University, 1999  
M.S.N.—A.R.N.P., Barry University, 2001  
Ph.D., Barry University, 2009  
M.P.H., Kaplan University, 2015

Carol Lambdin-Pattavina  
Assistant Professor  
B.A., Towson University, 1994  
M.S., Florida International University, 2000  
Dr.O.T., Chatham University, 2009

Elaine D. Lara  
Assistant Professor, Prosthodontics  
D.M.D. equivalent degree, Odontologo, Universidad Central de Venezuela, 1999  
Certificate—Prosthodontics, Nova Southeastern University, 2003

Jose Larumbe  
Assistant Director and Associate Professor, Pediatric Dentistry  
D.D.S., Universidad Tecnologica de Mexico, D.F., 1975  
Certificate—Pediatric Dentistry, University of Boston, 1979

Cynthia Last  
Professor, Behavioral Science  
Ph.D., State University of New York—Albany, 1982

Jean J. Latimer  
Associate Professor, Pharmaceutical Sciences  
B.A., Cornell University, 1982  
Ph.D., State University of New York—Buffalo, 1989

Harold E. Laubach  
Dean, College of Medical Sciences  
Professor, Microbiology  
Professor, Public Health  
B.S., Southwestern Oklahoma State University, 1968  
M.S., Oklahoma State University, 1973  
Ph.D., Oklahoma State University, 1977

Adrienne Lauer  
Assistant Professor, Occupational Therapy  
B.S., Thomas Jefferson University, 1988  
M.S., Barry University, 1995  
Ed.D., Nova Southeastern University, 2001

Cristina Llerena Law  
Associate Professor, Optometry  
B.S., Florida International University, 1998  
O.D., Nova Southeastern University, 2006  
Fellow, American Academy of Optometry  
Diplomate, American Board of Optometry

Melissa Lazinski  
Assistant Professor, Hybrid D.P.T. Program  
B.H.S./P.T., University of Florida, 1999  
D.P.T., Regis University, 2010  
Certified Clinical Specialist—Orthopedics, American Board of Physical Therapy Specialties (OCS), 2007  
Certificate—Vestibular Rehabilitation, American Institute of Balance, 2009  
Certificate—Vestibular Rehabilitation, American Institute of Balance, 2011

Janet L. Leasher  
Director, Community Outreach, Optometry  
Professor, Optometry  
Associate Professor, Public Health  
B.S., Pacific University, 1983  
O.D., Pacific University, 1986  
M.P.H., Tulane University, 1999  
Fellow, American Academy of Optometry

Jermaine LeClerc  
Program Director and Assistant Professor, Anesthesiologist Assistant  
B.S., University of Miami, 2001  
M.S., Barry University, 2005  
M.H.Sc., Nova Southeastern University, 2008

So-Yeon Sharon Lee  
Assistant Professor, Optometry  
B.S., University of British Columbia, Vancouver, 2002  
O.D., Illinois College of Optometry, 2006  
Fellow, American Academy of Optometry
Roni Cohen Leiderman
Affiliated Professor, Child Development Specialist
Clinical Professor, Pediatrics
B.S., Boston University, 1972
M.S., Lesley College, 1974
Ph.D., Nova University, 1986

Andrea Levin
Assistant Professor, Pharmacy Practice
B.S., Nova Southeastern University, 2007
Pharm.D., Nova Southeastern University, 2009

Beata I. Lewandowska
Assistant Professor, Optometry
B.S., University of Florida, 2000
O.D., Ohio State College of Optometry, 2004

Charles Lewis
Assistant Professor, Health Science
B.A., Newberry College, 1969
P.A., Duke University, 1971
M.P.H., University of South Carolina School of Public Health, 1982
D.H.Sc., Nova Southeastern University, 2009

Randy Lichtman
Assistant Professor, Prosthodontics
D.D.S., Northwestern University, 1984

Abraham Lifshitz
Chair, Clinic Director, and Professor, Orthodontics
D.D.S., University of Mexico, 1981
M.S., University of Iowa, 1982

ChinYu Lin
Predoctoral Director and Assistant Professor, Orthodontics
D.D.S., National Yang-Ming University, 1987
M.S., Oral Biology National Defense Medical Center, 1992
Ph.D., University of California—San Francisco, 2000
Certificate(M.S.D.—Orthodontics, Saint Louis University, 2002

Fred Lippman
Chancellor, Health Professions Division
Professor, Community Medicine
Professor, Public Health
B.S. (Pharm.), Columbia University College of Pharmacy, 1958
Ed.D., Nova Southeastern University, 2003

Hal Lippman
Executive Associate Dean, Admissions and Student Affairs
Assistant Professor, Cariology and Restorative Dentistry
D.D.S., University of New York, 1975

Bini Litwin
Associate Professor, Physical Therapy
Director, T-D.P.T. Program
B.S./PT., State University of New York, 1966
M.B.A., Barry University, 1990
Ph.D., Nova Southeastern University, 2005
D.P.T., A.T. Still University, 2011

John E. Long
Medical Director and Assistant Professor, Physician Assistant Program—Jacksonville
M.D., George Washington University, 1987
Diplomate, American Board of Emergency Medicine, 1995
Fellow, American College of Emergency Physicians
Fellow, American Academy of Emergency Medicine

Sheila M. Longpré
Assistant Professor and Academic Fieldwork Coordinator,
Occupational Therapy Department—Tampa
B.A., Saginaw Valley State University, 1996
M.O.T., Eastern Michigan University, 2000

David S. Loskove
Dean, College of Optometry
Professor, Optometry
B.S., Rochester Institute of Technology, 1971
M.S., Ohio State University, 1974
O.D., Ohio State University, 1975
Ph.D., Ohio State University, 1977
Fellow, American Academy of Optometry

Joseph A. Loskove
M.D., Einstein College of Medicine, 1994

Jennie Q. Lou
Director and Professor, Biomedical Informatics
Professor, Internal Medicine
Professor, Public Health
B.H.Sc., McMaster University, 1984
M.D., Shanghai Medical University, 1987
M.Sc., McMaster University, 1992

Raquel Lozada Diaz
Clinical Assistant Professor, Pharmacy Practice
B.S., University of Puerto Rico, 1991
B.S., University of Puerto Rico, 1994
Pharm.D., Nova Southeastern University, 2011

Nicholas Lutfi
Professor, Anatomy
B.S., Central University of Venezuela, 1981
M.S., Barry University, 1996
D.P.M., Barry University, 1997

Eunice Luyegu
Curriculum Design Specialist and Assistant Professor,
College of Health Care Sciences
B.Ed., Kenyatta University, 1998
M.A., Ohio University, 2003
Ph.D., University of South Alabama, 2009

Anastasios (Tassos) Lymperopoulos
Associate Professor, Pharmaceutical Sciences
B.S., University of Patras, 1998
M.S., University of Patras, 2000
Ph.D., University of Patras, 2004

Leah Lyons
Associate Professor, Physiology
B.S., Florida Atlantic University, 1997
Ph.D., University of Miami, 2005

Barbara J. MacDougall
Instructor, College of Nursing
A.D.N., Miami-Dade Community College, 1984
B.S.N., University of Miami, 1989
M.S.N., Florida International University, 1994

Thomas Macfarland
Associate Professor, Disaster and Emergency Management
B.S., Western Kentucky, 1973
M.S., Western Kentucky, 1982
Ed.D., Nova University, 1986
Shirin Madzhidova  
Clinical Assistant Professor, Pharmacy Practice  
B.A., Florida International University, 2009  
Pharm.D., Nova Southeastern University, 2013

Rim Makhlouf  
Assistant Professor, Optometry  
B.S., McGill University, 2005  
O.D., University of Montreal, 2010

Lillian Arce-de Malavé  
Assistant Professor, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2001  
R.Ph., Puerto Rico  
R.Ph., Florida

Tina Malone  
Program Director, M.S.N.—A.P.R.N. Program—Tampa  
Assistant Professor, College of Nursing  
B.S.N., University of West Florida, 1998  
M.S.N., University of South Florida, 2004  
D.N.P., University of South Florida, 2011

Vivian Manjarres  
Assistant Professor, Endodontics  
D.D.S., Universidad Javeriana, Colombia, 1992  
Certificate—Endodontics, Baylor College of Dentistry, Texas, 1997

Stacey Maravent  
Director, Experiential Education  
Assistant Professor, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2002

Andrew T. Mariassy  
Professor, Anatomy  
B.S., University of California, 1969  
M.S., University of California 1972  
Ph.D., University of California, 1980

Julie Marin  
Director, Experiential Education  
Assistant Professor, Pharmacy Practice  
B.S., UPR Río Piedras Campus, 1985  
Pharmacy Technician, National College Bayamón, 1988  
Pharm.D., Nova Southeastern University, 2006

William H. Marquardt  
Associate Dean, Physician Assistant Education  
Chair, Physician Assistant Department  
Associate Professor, Physician Assistant Department  
B.S., University of Nebraska, 1976  
M.A., Central Michigan University, 1979  
Distinguished Fellow, American Academy of Physician Assistants

Blondel Martin  
Assistant Professor, College of Nursing  
B.S.N., University of Phoenix, 2006  
M.S.N., University of Phoenix, 2008  
Ph.D., Barry University, 2013

Bruce Martin  
Assistant Professor, Cardiovascular Sonography Program—Tampa  
B.A., University of Mississippi, 1981

Kristy Martinez  
Assistant Professor, College of Nursing  
B.S.N., Villanova University, 1997  
M.S.N., Walden University, 2013

Ana Karina Mascarenhas  
Associate Dean for Research  
Division Chief  
Professor, Public Health  
B.D.S., Goa Dental College and Hospital, University of Bombay, 1985  
M.P.H., University of Michigan, 1992  
D.P.H., University of Michigan, 1995

Anastasia Mashukova  
Assistant Professor, Physiology  
M.S., Novosibirsk State University, 2001  
Ph.D., International Graduate School of Neuroscience, 2006

Hady Masri  
Assistant Professor, Geriatrics  
B.S., University of Miami, 1999  
M.S., Nova Southeastern University, 2001  
D.O., Nova Southeastern University, 2005

David Mastropietro  
Assistant Professor, Pharmaceutical Sciences  
B.S., Massachusetts College of Pharmacy and Health Sciences, 1999  
Ph.D., Nova Southeastern University, 2014

Ashley Mathew  
Instructor and Academic Facilitator, Pharmaceutical Sciences  
A.S., College of DuPage, 1995  
Pharm.D., University of Illinois—Chicago, 1999

Bindu S. Mayi  
Associate Professor, Microbiology  
B.Sc., University of Bombay, 1988  
M.Sc., University of Bombay, 1991  
Ph.D., University of Missouri, 1998

Harvey N. Mayrovitz  
Professor, Physiology  
B.S., Drexel University, 1962  
M.S., Drexel University, 1966  
Ph.D., University of Pennsylvania, 1974

Odoo K. McCallum  
Administrator, Clinical Director, College of Health Care Sciences  
Assistant Professor, Physician Assistant Studies  
Adjunct Assistant Professor, Public Health  
B.S., Florida International University, 2000  
M.P.H., Maastricht University, 2004

Dennis P. McCarthy  
Associate Professor, Occupational Therapy  
B.S., Florida International University, 1995  
M.Ed., Florida Atlantic University, 2001  
Ph.D., University of Florida, 2005
Heather McCarthy  
Executive Medical Director, NSU-COM Clinical Skills and Simulation Center  
Assistant Professor, Medical Education  
Assistant Professor, Osteopathic Principles and Practice  
B.S., Florida Southern College, 1999  
D.O., Nova Southeastern University, 2004

Linda McCash  
Associate Professor, College of Nursing  
B.S., University of Florida, 1987  
M.S.N., University of South Florida, 1998  
Ph.D., University of South Florida, 2003

Shawn McClure  
Postgraduate Research Director and Associate Professor, Oral and Maxillofacial Surgery  
D.M.D., Temple University, 1999  
M.D., State University of New York, 2002

Robert McGory  
Associate Dean, Professional Program  
Associate Professor, Pharmacy Practice  
B.S., Cornell University, 1973  
B.S., University of Kentucky, 1979  
M.S., University of Kentucky, 1979  
Pharm.D., University of Minnesota, 1981

Debbie McGregor  
Associate Professor, College of Nursing  
B.S.N., Barry University, 1996  
M.S.N., Barry University, 1997  
Ed.D., Florida International University, 2007

Debra A. McNally  
Instructor, Anatomy  
B.S., Barry University, 1988  
M.S., Barry University, 2004

Brian Medlin  
Instructor, Psychiatry  
B.S., University of Pittsburgh, 2010  
D.O., Lake Erie College of Osteopathic Medicine, 2014

Lina Mejia  
Assistant Professor, Oral Medicine Diagnostic Sciences  
D.D.S., CES—Medellin, Colombia, 1999  
Advance Graduate Program in Oral Medicine, University of California, 2009

Arnold Melnick  
Professor, Pediatrics  
Professor, Public Health  
Professor, Medical Communications  
A.B., Temple University, 1941  
D.O., Philadelphia College of Osteopathic Medicine, 1945  
M.A., Temple University, 1948  
M.Sc., Philadelphia College of Osteopathic Medicine, 1953  
Fellow, American College of Osteopathic Pediatricians  
Fellow, American College of Osteopathic Obstetricians and Gynecologists

Deborah Mendelsohn  
Assistant Professor, Medical Sonography  
Ed.M., Long Island University, 1982

Gary J. Merlino  
Assistant Professor, Internal Medicine  
B.A., University of South Florida, 1986  
D.O., Southeastern University of the Health Sciences, 1992

Kristi Messer  
Assistant Professor, Disaster and Emergency Management  
Assistant Professor, Public Health  
B.A., University of Wisconsin, 1990  
M.P.H., University of North Carolina—Chapel Hill, 1994  
M.S.W., University of North Carolina—Chapel Hill, 1995

Miriam Metzner  
Academic Facilitator and Clinical Assistant Professor, Pharmacy Practice  
Pharm.D., University of Missouri, 1998

Chandra Mickles  
Associate Professor, Optometry  
B.S., University of Miami, 2002  
O.D., SUNY College of Optometry, 2009  
M.S., University of Alabama—Birmingham, 2012  
Fellow, American Academy of Optometry

Rafael Miguel  
Assistant Professor, Anesthesiologist Assistant  
M.D., Universidad de Cadiz, 1981

Steve Milhauser  
Assistant Professor, Prosthodontics  
D.D.S., University of Maryland, 1973

Timothy Miller  
Assistant Professor, Anesthesiologist Assistant  
B.S., Medical College of Georgia, 2001  
M.H.Sc., Nova Southeastern University, 2008

Timothy P. Miller  
Assistant Professor, Hybrid D.P.T. Program—Tampa  
B.S., Greensboro College, 2004  
D.P.T., Elon University, 2007  
Certificate—Geriatric Specialist, 2012

Margarita Miranda  
Academic Facilitator/Instructor, Pharmacy Practice  
B.S., University of Puerto Rico, 1963  
J.D., Universidad Interamericana de Puerto Rico, 1989

Christopher Mitchell  
Assistant Professor and Director, Bachelor of Health Science Programs  
B.A., Lynchburg College, 1989  
M.S., Nova Southeastern University, 1999

Mary Ellen Mitchell-Rosen  
Associate Professor, College of Nursing  
B.S.N., University of Delaware, 1977  
M.S.N., University of Phoenix, 2001  
Ph.D., Barry University, 2013

Mary Mites-Campbell  
Associate Professor, College of Nursing  
B.S.N., Florida International University, 1987  
M.S.N., Barry University, 1994  
Ph.D., Barry University, 2007
Monique Mokha
Program Director and Associate Professor, Exercise and Sport Science
B.S., Ohio University, 1989
M.S., University of Arkansas, 1992
Ph.D., Texas Woman’s University, 1997

Maria F. Montoya
Assistant Professor, Public Health
B.A., Florida Atlantic University, 2006
M.P.H., Florida International University, 2008
Ph.D., University of North Texas Health Science Center, 2015

Robert Moody
Assistant Professor, Cardiovascular Sonography Program, Tampa
B.S., Penn State University, 2002
M.S., Thomas Jefferson University, 2012

Pamela J. Moran-Walcutt
Assistant Professor, Family Medicine
B.A., Florida Atlantic University, 1996
D.O., Nova Southeastern University, 2009

Cynthia Moreau
Assistant Professor, Pharmacy Practice
B.S., University of Florida, 2010
Pharm.D., University of Florida, 2014

Mariana Morris
Professor, Clinical Immunology
Ph.D., University of Texas, 1974

Edwin A. Murdock
Chair and Assistant Professor, Pathology
B.S., United States Military Academy at West Point, 1975
M.D., Uniformed Services University of the Health Sciences, 1981
M.P.H., Johns Hopkins Bloomberg School of Public Health, 1989

Peter Murray
Director, Biological Research
Associate Professor, Periodontology
Ph.D., University of Birmingham, 2000

Max Nahon
Assistant Professor and Postgraduate Director, Prosthodontics
D.D.S., State University of New York—Buffalo, 1977
Certificate—Prosthodontics, Medical College of Georgia, 2000

Perla Najman
Assistant Professor, Optometry
B.A., Universidad de las Americas, 1976
O.D., Nova Southeastern University, 1999

Kenneth Namerow
Division Chief
Associate Professor and Chair, Endodontics
D.D.S., Fairleigh Dickinson University, 1985
Certificate—Endodontics, Columbia University, 1972

Lubov Nathanson
Assistant Professor, Clinical Immunology
M.S., Moscow State University, 1985
Ph.D., Weizmann Institute of Science, 1998

Alyssa R. Needleman
Associate Professor and Clinic Director, Audiology
B.A., University of Maryland, 1991
M.S., University of Texas—Dallas, 1993
Ph.D., University of Texas—Dallas, 1995

Howard Neer
Executive Associate Dean, Professional Affairs
Professor, Family Medicine
B.A., Miami University, 1949
D.O., Chicago College of Osteopathic Medicine, 1954
Fellow, American College of Osteopathic Family Physicians

Leon Nehmad
Associate Professor, Optometry
B.A., Rutgers University, 1979
M.S.W., City University of New York, 1984
O.D., State University of New York, 1991
Fellow, American Academy of Optometry

Guy M. Nehrenz
Associate Dean, Osteopathic Medical Education
Professor, Family Medicine
Professor, Health Science
B.S., University of St. Francis, 1989
M.A., University of Phoenix, 1992
Ed.D., Nova Southeastern University, 1995

Doris B. Newman
Assistant Dean, Osteopathic Clinical Education
Associate Professor, Osteopathic Principles and Practice
B.S., Texas Women’s University, 1986
D.O., University of New England College of Osteopathic Medicine, 1998
Fellow, American Academy of Osteopathy

Wren Newman
Chair and Assistant Professor, Department of Speech-Language Pathology
B.S., Ithaca College, 1975
M.S., University of Oklahoma Health Sciences, 1977
SLP.D., Nova Southeastern University, 2000

Gitana Ng
Assistant Professor, College of Nursing
B.S.N., Indiana University of Pennsylvania, 1977
M.S., University of Kentucky, 1980
Ph.D., Nova Southeastern University, 2015

Thuy-Lan Nguyen
Assistant Professor, Optometry
B.S., James Madison University, 1997
O.D., Nova Southeastern University, 2002

Linda C. Niessen
Dean, College of Dental Medicine
Professor
B.A., University of New Mexico, 1973
M.P.H., Harvard School of Public Health, Harvard University, 1977
D.M.D., Harvard School of Dental Medicine, Harvard University, 1977
M.P.P., John F. Kennedy School of Government, Harvard University, 1982
Enrique A. Nieves  
Assistant Professor, Pharmaceutical Sciences  
B.S.(Pharm), University of Puerto Rico, 1977  
M.S., University of Florida, 1982  
Ph.D., University of Florida, 1982

Virginia Noce  
Assistant Professor, Cariology and Restorative Dentistry  
D.D.S., West Virginia University, 1983

Leah Nof  
Professor, Physical Therapy  
M.S., University of Wisconsin, 1978  
Ph.D., Florida State University, 1994

Ariela Notzer  
Assistant Professor, Prosthodontics  
D.M.D., Hadassah Faculty of Dental Medicine, Hebrew University, 1987  
Residency—Prosthodontics, IDF Dental Center, 1996  
M.S., University of Florida, 2003

Alberto Noguera  
Predoctoral Director and Assistant Professor, Pediatric Dentistry  
D.D.S., Javeriana University, 1986  
Certificate—Advanced Education, Nova Southeastern University, 2006  
Certificate—Advanced Education General Dentistry, Nova Southeastern University, 2007  
Certificate—Pediatric Dentistry, Nova Southeastern University, 2009

Jennifer O'Brien  
Clinical Supervisor and Instructor, Department of Speech-Language Pathology  
B.S., The Richard Stockton College of New Jersey  
M.S., Rockhurst University

Romer A. Ocanto  
Chair and Professor, Pediatric Dentistry  
M.S.P.H., Boston University, 1984  
M.D., University of Florida, 1985  
D.D.S., Creighton University, 2000  
Fellow, American College of Dentists, 2007

Timothy O'Connor  
Assistant Professor, College of Nursing  
B.S.N., D'Youville College, 1986  
M.S., State University of New York—Buffalo, 1992  
Ph.D., State University of New York—Buffalo, 2015

Barbara O'Connor Wells  
Assistant Professor, Department of Speech-Language Pathology  
B.A., St. John's University, 1994  
M.A., St. John's University, 1996  
Ph.D., City University of New York—Graduate School and University Center, 2011

Terry Ogilby  
Coordinator, Clinical Services  
Associate Professor, College of Nursing  
B.S.N., University of South Florida, 1990  
M.S.N., University of South Florida, 1994  
M.P.H., University of South Florida, 1998  
Ph.D., Capella University, 2004

Maureen O'Hara  
Assistant Professor, Health Science  
B.Sc., California State Polytechnic University—Pomona, 1972  
M.A., California State University—Los Angeles, 2001  
D.H.Sc., Nova Southeastern University, 2007

Luana Oliveira-Haas  
Associate Professor, Cariology and Restorative Dentistry  
D.D.S., Federal University of Uberlandia, 1995

Ovidio Olivencia  
Assistant Professor, Physical Therapy  
B.S., University of California—Davis, 1999  
M.P.T., Nova Southeastern University, 2002  
D.P.T., A.T. Still University, 2011

Robert Oller  
Professor, Family Medicine  
Professor, Public Health  
B.A., University of California, 1965  
D.O., Kirksville College of Osteopathic Medicine, 1969

Hamid Omidian  
Professor, Pharmaceutical Sciences  
B.S., Tehran Polytechnic University, 1987  
M.S., Tehran Polytechnic University, 1990  
Ph.D., Brunel University, 1997

Victor Oramas  
Assistant Professor,  
D.D.S., 1997  
Certificate—AEGD, 1998  
Certificate—Pediatric Dentistry, 2005  
Diplomate, American Board of Pediatric Dentistry, 2014

Blanca I. Ortiz  
Assistant Dean, Puerto Rico Program  
Assistant Professor, Pharmacy Practice  
B.S.(Pharm), University of Puerto Rico, 1993  
Pharm.D., Nova Southeastern University, 2003

C. Christine Orton  
Program Director, M.S.N.—A.P.R.N. Program—Palm Beach Associates, College of Nursing  
B.S.N., University of Maryland, 1973  
M.S., Hampton University, 1998  
Ph.D., Hampton University, 2003

Ana M. Ospina  
Assistant Professor and Predoctoral Director, Oral and Maxillofacial Surgery  
Assistant Professor, Public Health  
D.D.S., Universidad de Antioquia, Colombia, 1997  
M.S., Nova Southeastern University, 2013  
AEGD, Nova Southeastern University, 2014

Melba Ovalle  
Medical Director, Assistant Program Director, and Associate Professor, Physician Assistant Studies  
B.S., Pace University, 1978  
M.D., Boston University, 1982
Raymond Ownby  
Chair, Psychiatry and Behavioral Medicine  
Professor, Biomedical Informatics  
Professor, Psychiatry  
Professor, Public Health  
B.A., Ohio University, 1973  
M.Ed., Ohio University, 1974  
Ph.D., Kent State University, 1980  
M.D., Northeastern Ohio University College of Medicine, 1992  
M.B.A., University of Miami, 2002

Edward E. Packer  
Assistant Dean, Clinical Affairs  
Chair and Professor, Pediatrics  
B.A., Rutgers University, 1971  
D.O., Philadelphia College of Osteopathic Medicine, 1976

Thomas A. Panavelil  
Professor, Pharmacology  
B.S., University of Kerala, India, 1979  
M.Sc., National Dairy Research Institute, India, 1983  
Ph.D., University of Miami School of Medicine, 1998

Naushira Pandya  
Chair and Professor, Geriatrics  
Project Director, Geriatric Education Center  
M.D., University College & Middlesex Medical School, 1979

Frederick A. Paola  
Medical Director and Professor, Physician Assistant Program—Fort Myers  
B.S., Stony Brook University, 1980  
M.D., Yale University School of Medicine, 1984  
Diplomate, American Board of Internal Medicine, 1987  
J.D., New York University School of Law, 1991

Panayotis Papatzimas  
Assistant Professor, Cariology and Restorative Dentistry  
D.D.S., Virginia Commonwealth University, 1991

Michael Parker  
Chair and Professor, Pharmacology  
B.A., University of San Diego, 1990  
Ph.D., University of Miami College of Medicine, 1999

William Parker  
Associate Dean, Advanced Educational Programs  
Associate Professor, Periodontology  
D.D.S., Medical School of Virginia School of Dentistry, 1977  
Certificate—Periodontics, Naval Postgraduate Dental School, Maryland, 1984  
Diplomate, American Board of Periodontology, 1989

Marianna Pascuita  
Assistant Director and Assistant Professor, Prosthodontics  
D.D.S., University of Venezuela, 1998

Kyrus E. Patch  
Program Director and Assistant Professor, Physician Assistant Program—Fort Myers  
B.S./P.A., Alderson-Broaddus College, 1977  
M.S., Alderson-Broaddus College, 2007  
Fellow, American Academy of Physician Assistants  
Fellow, Florida Academy of Physician Assistants

Arnie Patrick  
Instructor, Optometry  
B.A., Brooklyn College, 1975  
A.A.S., New York City Community College, 1977  
O.D., Nova Southeastern University, 1994

Michael Patten  
Assistant Professor, Prosthodontics  
D.D.S., University of Iowa, 1968  
Master in Comprehensive Training, University of Florida, 1984

Nicole Patterson  
Chief, Low Vision Services  
Associate Professor, Optometry  
B.S., Loras College, 1998  
A.A.S., New York City Community College, 1977  
O.D., Southern College of Optometry, 2002  
Fellow, American Academy of Optometry

Corey Peacock  
Assistant Professor, Exercise and Sport Science  
B.S., Ashland University, 2007  
M.Ed., Ashland University, 2008  
Ph.D., Kent State University, 2012

Cathy Peirce  
Director, Dr.OT Program  
Associate Professor, Occupational Therapy  
B.S., Ohio State University, 1974  
M.A., University of Southern California, 1984  
Ph.D., Nova Southeastern University, 2002

Dennis H. Penzell  
Associate Professor, Internal Medicine  
B.S., University of Maryland, 1974  
M.S., George Washington University, 1976  
D.O., New York College of Osteopathic Medicine, 1981

Anne Marie Pereira  
Assistant Professor, Prosthodontics  
D.D.S., Santa Maria University, 2003

Alina M. Perez  
Associate Professor, Public Health  
B.S., Florida Memorial College, 1985  
M.S.W., Barry University, 1988  
J.D., University of Miami, 1996  
M.P.H., University of South Florida, 2008

Alexandra Perez Rivera  
Assistant Professor, Sociobehavioral and Administrative Pharmacy  
Pharm.D., Nova Southeastern University, 2005  
M.S., University of Illinois—Chicago, 2008

Bruce B. Peters  
Professor, Internal Medicine  
Professor, Pediatrics  
B.A., Northwestern University, 1979  
D.O., Chicago College of Osteopathic Medicine, 1984
Stephen Pfister  
Associate Professor, Physical Therapy  
Director, Health Care Science Clinics  
B.S., University of Wisconsin, 1993  
M.S., University of Pittsburgh, 1998  
D.P.T., A.T. Still University, 2011

Luzan Phillpotts  
Assistant Professor, Family Medicine  
Assistant Professor, Public Health  
B.S., Florida International University, 1999  
D.O., Nova Southeastern University, 2006

Stacey M. Pinnock  
Assistant Professor, Public Health  
Adjunct Assistant Professor, Nutrition  
B.S., University of Western Ontario, 2005  
M.S.W., University of Toronto, 2007

Ioana Popovici  
Assistant Professor, Sociobehavioral and Administrative Pharmacy  
B.Sc., Babes-Bolyai University—Romania, 1997  
M.A., Florida International University, 2003  
Ph.D., Florida International University, 2007

Jason Portnof  
Pediatric Craniomaxillofacial and Surgery Director  
Associate Professor, Oral and Maxillofacial Surgery  
D.M.D., Nova Southeastern University, 2002  
M.D., Cornell University, 2006

Alessandra Posey  
Instructor, Sports Medicine  
B.S., Florida International University, 2006  
D.O., Lake Erie College of Osteopathic Medicine, 2011

Charles Powell  
Professor, Pharmacology  
B.S., Florida State University, 1983  
M.S., Florida A&M University, 1988  
Ph.D., Florida A&M University, 1996

Keith E. Proctor  
Instructor, Correctional Medicine  
B.S., University of West Florida, 2001  
M.P.H., University of South Florida, 2010  
D.O., Virginia College of Osteopathic Medicine, 2007

Peter R. Pugliese  
Assistant Professor, Cariology and Restorative Dentistry  
B.S., Ohio State University, 1960  
D.D.S., Ohio State University College of Dentistry, 1964

Cheryl Purvis  
Professor, Anatomy  
B.S., University of South Carolina, 1986  
Ph.D., University of Kentucky College of Medicine, 1998

Nicole Quint  
Clinical Faculty, Occupational Therapy  
B.S., University of Missouri, 1994  
M.O.T., Nova Southeastern University, 2003  
Dr.O.T., Nova Southeastern University, 2011

Harvey Quinton  
Assistant Professor, Cariology and Restorative Dentistry  
D.D.S., Howard University, 1978

Yasmin Qureshi  
Associate Professor, Osteopathic Principles and Practice  
B.S., Victoria University, 2000  
M.S., Victoria University, 2002  
M.P.T., Florida International University, 2006  
D.P.T., A.T. Still University of Health Sciences, 2009

Eric Raab  
Instructor, Psychiatry  
D.O., Nova Southeastern University, 2012

Silvia Rabionet  
Associate Professor, Sociobehavioral and Administrative Pharmacy  
B.A., Mount Holyoke College, 1979  
Ed.M., Harvard University, 1980  
Ed.D., Harvard University, 2002

John Rafalko  
Associate Professor, Physician Assistant Studies  
B.S., Towson State University, 1984  
A.A./P.A., Essex Community College, 1986  
M.S., Towson State University, 1992  
Ed.D., Nova Southeastern University, 2007  
Fellow, American Academy of Physician Assistants

M. Vic Rampertaap  
Assistant Professor, Prosthodontics  
D.D.S., Howard University, 1986

Arif M. Rana  
Director, Faculty Development  
Director, Medical Education Program  
Assistant Professor, Biomedical Informatics  
Assistant Professor, Medical Education  
Assistant Professor, Public Health  
B.A., Rutgers University, 1997  
M.S., University of Medicine and Dentistry of New Jersey, 2000  
M.Ed., Rutgers University, 2006  
Ph.D., University of Medicine and Dentistry of New Jersey, 2011  
Ed.S., Rutgers University, 2013  
M.S., Nova Southeastern University, 2014  
M.P.H., Nova Southeastern University, 2016

Sarah Ransdell  
Associate Professor, Health Science  
Adjunct Associate Professor, Public Health  
B.A., University of Kentucky, 1983  
M.S., University of Florida, 1985  
Ph.D., University of Florida, 1987

Hugh G. Rappa  
Professor, Physician Assistant Program—Jacksonville  
B.S., Queens College, 1978  
M.D., University of Padua, Italy, 1991  
Fellow, American Association of International Physicians  
Fellow, American Educators of Radiological Sciences  
Member, Pi Alpha Honor Society  
Member, Alpha Eta Society
Appu Rathinavelu  
Associate Dean, Institutional Planning and Development  
Professor, Pharmaceutical Sciences  
B.S., University of Madras, 1978  
M.S., University of Madras, 1980  
M.Phil., University of Madras, 1981  
Ph.D., University of Madras, 1985

Mutasem Rawas-Qalaji  
Associate Professor, Pharmaceutical Sciences  
B.Pharm., King Saud University, 1995  
Ph.D., University of Manitoba, 2006

Sergio Real-Figueroa  
Clinic Director and Associate Professor, Orthodontics  
Dentistry, University of Catolica, 1991  
Orthodontics, University of Catolica, 1995

Gustavo A. Reinoso  
Assistant Professor, Occupational Therapy  
B.S., National University of Litoral, 1994  
Ph.D., Nova Southeastern University, 2005

Violetta E. Renesca  
Assistant Professor, Clinical Immunology  
B.S.N., Nova Southeastern University, 2008  
M.S.N., Florida International University, 2012

José A. Rey  
Associate Professor, Pharmacy Practice  
Pharm.D., University of Florida College of Pharmacy, 1991  
M.S., Nova Southeastern University, 2009

Irma Rey  
Assistant Professor, Internal Medicine  
M.D., University of Miami, 1981

Sherrol Reynolds  
Associate Professor, Optometry  
B.A., University of Florida, 1991  
O.D., Nova Southeastern University, 1996  
Fellow, American Academy of Optometry

Eglintine Rigaud  
Interim Director, D.N.P. and Ph.D. Programs  
Assistant Professor, College of Nursing  
B.S.N., Hunter College, 1974  
M.S.N., Columbia University 1979  
Ph.D., Barry University, 2010

Jaime Weiner Riskin  
Clinical Assistant Professor, Pharmacy Practice  
B.S., University of Florida, 1998  
Pharm.D., Nova Southeastern University, 2003

Kenya M. Rivas-Valasquez  
Assistant Professor, Geriatrics  
B.S., Santo Tomas De Villanueva, 1985  
M.D., University of Los Andes, 1993

Mary Elizabeth Roberts  
Associate Professor, Department of Speech-Language Pathology  
B.S., Henderson State University, 1973  
M.S., University of Central Arkansas, 1985  
Ph.D., University of Southern Mississippi, 1994

Kaye Robertson  
Assistant Professor, Medical Education  
M.S., University of Illinois, 1972

Kathleen Rockefeller  
Associate Professor and Research Coordinator, Hybrid D.P.T. Program—Tampa  
B.A., State University College at Brockport, 1976  
M.S., Exercise Physiology, 1978  
Certificate—Physical Therapy, Columbia University, 1978  
M.P.H., University of Washington, 1990  
Sc.D., University of Massachusetts—Lowell, 2002

Jacqueline Rodena  
Assistant Professor, Optometry  
B.S., Florida State University, 1999  
O.D., Nova Southeastern University, 2004  
Fellow, American Academy of Optometry

Julie Rodman  
Associate Professor, Optometry  
B.A., Brandeis University, 1994  
O.D., New England College of Optometry, 1998  
M.S., Nova Southeastern University, 2014  
Fellow, American Academy of Optometry

Jorgelin Rodriguez  
Assistant Professor, Cariology and Restorative Dentistry  
D.M.D., Nova Southeastern University, 2006

Ricardo Rodriguez-Millan  
Academic Facilitator/Instructor, Pharmaceutical Sciences  
B.S., University of Puerto Rico, 1998  
M.D., Universidad Autonoma de Guadalajara, 2007

Cecilia F. Rokusek  
Assistant Dean, Research and Innovation  
Professor, Disaster and Emergency Management  
Professor, Family Medicine  
Professor, Nutrition  
Professor, Public Health  
B.A., Mount Marty College, 1975  
M.S., University of Nebraska, 1976  
Ed.D., University of South Dakota, 1983

Shari Rone-Adams  
Chair and Associate Professor, Physical Therapy  
Adjunct Associate Professor, Public Health  
B.S./B.T., University of Miami, 1985  
M.S., Nova University, 1988  
D.B.A., Nova Southeastern University, 2002

Joseph Roody  
Assistant Professor, Sports Medicine  
B.S., Florida International University, 2009  
D.P.T., Florida International University, 2012

Patricia Rose  
Assistant Professor, Pharmacology  
B.S., St. John’s University, 1980  
M.S., St. John’s University, 1996  
Ph.D., University of Vermont—Burlington, 2007

Janet L. Roseman  
Assistant Professor, Family Medicine  
B.S., Syracuse University, 1976  
M.S., Lesley College, 1978  
Ph.D., The Union Institute, 2001
Irving Rosenbaum  
Executive Dean for Administration, Health Professions Division  
Professor, Public Health  
B.A., State University of New York at Buffalo, 1971  
M.P.A., University of New York, 1974  
D.P.A., Nova University, 1984  
Ed.D., Nova Southeastern University, 2006

Rebecca Rosenthal  
Associate Professor, Physical Therapy  
B.S. PT, Sargent College, 1976  
M.S., University of Michigan, 1978  
J.D., Nova University, 1990  
D.P.T., A.T. Still University, 2011

Lynda Ross  
Instructor, Hybrid D.P.T. Program  
B.S., Northwestern University, 1984  
M.S., Northwestern University, 1996  
D.H.Sc., Midwest University, 2014  
D.P.T., Nova Southeastern University, 2015

Mark Roth  
Assistant Professor, Periodontology  
D.D.S., New York University, 1967  
Certificate—Periodontics, New York University, 1975

Linda S. Rouse  
Assistant Dean, Finance and Operations  
Assistant Professor, Optometry  
B.S., Stetson University, 1988  
O.D., Illinois College of Optometry, 1992  
Fellow, American Academy of Optometry

Leticia Rousso  
Instructor, Optometry  
O.D., Nova Southeastern University, 2015

Irina R. Rozenfeld  
Assistant Professor, Clinical Immunology  
Associate Faculty Member, College of Nursing  
B.S.N., Nova Southeastern University, 2008  
M.S.N., Florida International University, 2012

Brian Russ  
Assistant Professor, Physical Therapy  
B.S. PT, State University of New York—Buffalo, 1999  
FAAOMPT, Kaiser Permanente, 2005  
D.P.T., A.T. Still University, 2013

Marcella Rutherford  
Dean, College of Nursing  
B.H.S., Florida Atlantic University, 1990  
M.B.A., Florida Atlantic University, 1997  
M.S., Florida Atlantic University, 2003  
Ph.D., Florida Atlantic University, 2007

Terry Rzepkowski  
Assistant Professor, Basic Science  
B.S., Ithaca College, 1982  
M.S., Rocky Mountain University of Health Professions, 2000  
D.P.T., Rocky Mountain University of Health Professions, 2005

Suzanne Sagues  
Assistant Professor, Physician Assistant—Jacksonville  
B.S., University of Wisconsin, 2007  
B.S., Pace University, 2009  
M.S., Pace University, 2010

Heather Saifman  
Assistant Professor, College of Nursing  
A.S., Broward Community College, 1995  
B.S.N., Nova Southeastern University, 2006  
M.S.N., Florida Atlantic University, 2010

Luis Salgueiro  
Assistant Professor, Clinical Immunology  
D.V.M., Universidad del Zulia, 1990  
Ph.D., Universidad Central de Venezuela, 2004

Jesus Sanchez  
Associate Professor, Sociobehavioral and Administrative Pharmacy  
B.A., Universidad de Granada (Spain), 1993  
M.A., University of Miami, 1995  
Ph.D., University of Miami, 2001  
Ph.D., University of Granada (Spain), 2014

Susan Sanders  
Hygienist, Periodontology, Division of Surgical Sciences  
Miami Dade Community College, 1990

Mark Sandhouse  
Associate Dean, Administration  
Professor, Osteopathic Principles and Practice  
B.S., University of Miami, 1983  
D.O., Southeastern University of the Health Sciences, 1988  
M.S., Nova Southeastern University, 2013

Cristina E. Savu  
Assistant Professor, Internal Medicine  
B.S., Florida Atlantic University, 1996  
D.O., Nova Southeastern University, 2008

Amar Sayani  
Assistant Professor, Optometry  
O.D., Pennsylvania College of Optometry at Salus University, 2010

Michelle Saydar  
Assistant Professor, Anesthesiologist Assistant  
B.S., Georgia Institute of Technology  
M.M.Sc., Emory University

Sharmayn Sayers-Erfourth  
Instructor, Psychiatry  
B.S., University of Florida, 1993  
M.Ed., University of Maryland, 1996  
D.O., William Carey College of Osteopathic Medicine, 2014

Taner Cem Sayin  
Chair and Associate Professor, Endodontics  
D.D.S., Hacettepe University, 2000  
Ph.D., Hacettepe University, 2007

Judith P. Schaffer  
Assistant Professor, Family Medicine  
B.A., Boston University, 1976  
D.O., West Virginia School of Osteopathic Medicine, 1985
Debbie Glasser Schenk
Affiliated Professor, Child Development Specialist
B.A., Wellesley College, 1987
M.S., Nova University, 1991
Ph.D., Nova Southeastern University, 1996

Zoeanne Schinas
Assistant Professor, Optometry
B.S., Florida International University, 1999
O.D., Nova Southeastern University, 2004

James Schiuma
Assistant Professor, Cariology and Restorative Dentistry
D.D.S., New York University College of Dentistry, 1965

Catharine Scholl
Assistant Professor, Cardiovascular Sonography Program—Tampa
B.S., Oregon Institute of Technology, 2007
M.H.S., Chatham University, 2009

Wayne A. Schreier
Professor and Chair, Physiology
B.S., Southern Illinois University, 1977
M.S., University of California—Los Angeles, 1987
Ph.D., University of California—Los Angeles, 1991

Mark Schweizer
Assistant Professor, Cariology and Restorative Dentistry
D.D.S., University of Maryland, 1982
M.P.H., Nova Southeastern University, 2010

Sandi D. Scott-Holman
Assistant Professor, Family Medicine
B.S., Barry University, 1989
O.D., Nova Southeastern University, 1998

Matthew J. Seamon
Chair and Associate Professor, Pharmacy Practice
A.S., Nassau Community College, 1992
B.A., Florida Atlantic University, 1994
Pharm.D., University of Michigan, 1998
J.D., Nova Southeastern University, 2006

Kenneth Seger
Associate Professor, Optometry
B.S., University of California—Berkeley, 1973
O.D., University of California—Berkeley, 1975
M.S.C., University of Manchester, 1982
Fellow, American Academy of Optometry

Robert Seltzer
Predoctoral Director and Associate Professor, Endodontics
D.M.D., University of Pennsylvania, 1972
Certificate—Endodontics, University of Pennsylvania, 1976

Josephine Shallo-Hoffmann
Associate Dean, College of Optometry
Professor, Optometry
B.A., Columbia University, 1975
M.A., Rutgers University, 1978
Ph.D., Rutgers University, 1984
Fellow, American Academy of Optometry

Kelby Shamash
Instructor, Physical Therapy
B.S., University of the Sciences, 1999
M.P.T., University of the Sciences, 1999

Laurence Shapiro
Assistant Professor, Cariology and Restorative Dentistry
D.D.S., New York University, 1975

Daniel E. Shaw
Associate Professor, Psychiatry
Associate Professor, Biomedical Informatics
B.S., University of Florida, 1974
M.Ed., University of Florida, 1975
Ed.S., University of Florida, 1978
Ph.D., University of Florida, 1981

Donna Shaw
Assistant Professor, College of Nursing
B.S.N., University of Miami
M.S.N., University of Phoenix

Keiba L. Shaw
Associate Professor, Hybrid D.P.T. Program—Tampa
B.S., Syracuse University, 1990
M.P.T., Slippery Rock University, 1995
M.A., West Virginia University, 2002
Ed.D., West Virginia University, 2001
Graduate Certificate—Gerontology, University of South Florida, 2010
D.P.T., A.T. Still University, 2015

Diana Shechtman
Professor, Optometry
B.S., University of Florida, 1994
O.D., Nova Southeastern University, 1998
Fellow, American Academy of Optometry

Elizabeth Sherman
Assistant Professor, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2007

Jeanne Siegel
Program Director, Entry B.S.N.—Fort Lauderdale
Associate Professor, College of Nursing
B.S.N., Emory University, 1978
M.S.N., University of Miami, 2001
Ph.D., University of Miami, 2008

Michael Siegel
Professor and Chair, Diagnostic Sciences
D.D.S., Baltimore College of Dental Surgery, 1979
Certificate—Prosthodontics, Baltimore College of Dental Surgery, 1992
M.S., University of Maryland, 1995
Fellow, Academy of General Dentistry, 1986
Fellow, American College of Dentists, 2000
Fellow, Pierre Fauchard Academy, 2001
Fellow, International College of Dentists, 2006

Sharon Siegel
Chair and Associate Professor, Prosthodontics
D.D.S., Baltimore College of Dental Surgery, 1979
Certificate—Prosthodontics, Baltimore College of Dental Surgery, 1992
M.S., University of Maryland, 1995
Fellow, Academy of General Dentistry, 1986
Fellow, American College of Dentists, 2000
Fellow, Pierre Fauchard Academy, 2001
Fellow, International College of Dentists, 2006
Georgina Silva-Suarez  
Assistant Professor, Sociobehavioral and Administrative Pharmacy  
B.A., University of Puerto Rico, 2000  
M.P.H.E., University of Puerto Rico, 2006  
Ph.D., Florida International University, 2014

Tobin Silver  
Practicum Director and Associate Professor, Exercise and Sport Science  
Associate Professor, Nutrition  
B.S., University of Wisconsin—Eau Claire, 2003  
M.S., Barry University, 2005  
Ph.D., Purdue University, 2010

Suzana Simoes  
Assistant Professor, Physical Therapy  
B.S., Catholic University of Petropolis, 1993  
M.S., University of Miami, 2003  
D.P.T., Nova Southeastern University, 2006

Richard Singer  
Assistant Professor, Orthodontics  
D.M.D., Washington University  
M.S., Orthodontics, St. Louis University

Devada Singh-Franco  
Associate Professor, Pharmacy Practice  
B.S. (Pharm.), Arnold and Marie Schwartz College of Pharmacy, 1995  
Pharm.D., Arnold and Marie Schwartz College of Pharmacy, 2000  
R.Ph., New York  
R.Ph., Florida

Elliot M. Sklar  
Assistant Professor, Disaster and Emergency Management  
Assistant Professor, Family Medicine  
Assistant Professor, Public Health  
B.A., Concordia University, 2003  
M.S., Florida International University, 2006  
Ph.D., Florida International University, 2008

Jocelyn Slater  
Clinical Supervisor and Instructor, Department of Speech-Language Pathology  
B.A., Florida Atlantic University, 1998  
B.S., Florida Atlantic University, 1998  
M.S., Nova Southeastern University, 2006

Frank Slavichak  
Assistant Professor and Director, Community Dentistry  
D.D.S., Ohio State University, 1977

Joel Slingbaum  
Clinical Assistant Professor, Endodontics  
D.M.D., Tufts University, 1998  
Certificate—Endodontics, Nova Southeastern University, 2000

Kim Smith  
Assistant Professor, Physical Therapy  
B.S., Texas Christian University, 1988  
M.S.T., University of Miami, 1990  
D.P.T., A.T. Still University, 2013

Samuel K. Snyder  
Chair, Internal Medicine  
Professor, Nephrology  
A.B., Princeton University, 1973  
D.O., Philadelphia College of Osteopathic Medicine, 1980

Donald Sokolik  
Assistant Professor and Medical Director, Anesthesiologist Assistant  
B.A., Washington University, 1968  
M.D., Emory University, 1971

Lynn Solomon  
Associate Professor, Oral Medicine, Diagnostic Sciences  
D.D.S., State University of New York—Buffalo, 1995  
M.S., State University of New York—Buffalo, 2005

Lisa B. Soontupe  
Coordinator, Clinical Services  
Associate Professor, College of Nursing  
B.S., State University of New York—Downstate Medical Center, 1975  
M.A., New York University, 1977  
Ed.D., Nova Southeastern University, 2010

Joseph W. Sowka  
Professor, Optometry  
B.S., Cornell University, 1985  
B.S., Pennsylvania College of Optometry, 1987  
O.D., Pennsylvania College of Optometry, 1989  
Diplomate, American Academy of Optometry

Janet Sparker  
Assistant Professor, Physician Assistant Program—Fort Myers  
B.A./P.A., Lake Erie College, 1979  
B.S., College of Nursing Ursuline College, 1991  
Fellow, American Academy of Physician Assistants  
Fellow, Florida Academy of Physician Assistants

Lonette Spence  
Assistant Professor, Medical Sonography  
B.A., Oakwood University, 1994  
M.A.S., Fairleigh Dickinson University, 2005  
D.H.Sc., Nova Southeastern University, 2014

Robert C. Speth  
Professor, Pharmaceutical Sciences  
B.A., Western Maryland College, 1968  
M.A., Connecticut College, 1972  
Ph.D., Vanderbilt University, 1976

Francine Spigel  
Internship Supervisor and Instructor, Department of Speech-Language Pathology  
B.A., Montclair State University, 1966  
M.A., Montclair State University, 1975

Sally Jo Spooner  
Assistant Professor, College of Nursing  
B.S.N., Florida State University, 2001  
M.S.N., University of Phoenix, 2004  
D.H.Sc., Nova Southeastern University, 2008
Peter A. Sprague  
Associate Professor, Physical Therapy  
B.S., Quinnipiac College, 1993  
D.P.T., University of St. Augustine for the Health Sciences, 2009

Wendy Stav  
Managing Director and Professor, Occupational Therapy Department  
B.S., Quinnipiac University, 1991  
Ph.D., Nova Southeastern University, 2002  
Fellow, American Occupational Therapy Association

Jessica Steen  
Instructor, Optometry  
O.D., University of Waterloo, 2014  
Fellow, American Academy of Optometry

Jennifer Steinberg  
Director, Experiential Education  
Assistant Professor, Pharmacy Practice  
Pharm.D., University of Florida, 2005

Debra C. Steinkohl  
Assistant Professor, Family Medicine  
Assistant Professor, Public Health  
B.S./B.A., University of Florida, 1984  
M.H.S.A., Florida International University, 1985

Debra Feingold Stern  
Director, Clinical Education  
Associate Professor, Physical Therapy  
Adjunct Associate Professor, Public Health  
B.S./P.T., State University of New York—Buffalo, 1974  
M.S.M., Rolling College, 1977  
D.B.A., Nova Southeastern University, 2003  
D.P.T., A.T. Still University, 2011

Gabriel P. Suciu  
Associate Professor, Public Health  
Ph.D., Romanian Academy, 1999  
M.S.P.H., University of South Carolina, 2001

Elizabeth Swann  
Chair and Professor, Department of Health and Human Performance  
B.S./ESS, Texas State University, 1997  
M.A., University of Texas, 1999  
Ph.D., University of Southern Mississippi, 2001

Monees Syed  
Instructor, Preventive Medicine  
M.D., Deccan College of Medicine, 2005

P. Stephen Taraskevich  
Professor, Physiology  
B.A., University of California—Los Angeles, 1967  
M.A., University of California—Los Angeles, 1969  
Ph.D., University of California—Los Angeles, 1973

Peter Taylor  
Associate Dean of Academic Affairs and Assistant Professor, College of Health Care Sciences  
B.A., University of Maryland, 1991  
M.A., Georgetown University, 1993  
Ph.D., Brandeis University, 2000

Yin Tea  
Assistant Professor, Optometry  
B.S., University of California—Los Angeles, 1995  
O.D., Southern California College of Optometry, 1999  
Fellow, American Academy of Optometry

David L. Thomas  
Chair and Professor, Correctional Medicine  
Chair and Professor, Surgery  
Professor, Public Health  
A.B., University of Miami, 1966  
M.D., University of Miami School of Medicine, 1970  
J.D., Stetson University College of Law, 1995  
Ed.D., Nova Southeastern University, 2013

Kamilah Thomas-Purcell  
Assistant Professor, Nutrition  
Assistant Professor, Public Health  
B.S., University of Florida, 2001  
M.P.H., University of North Carolina, 2003  
Ph.D., University of South Florida, 2010

Jeffrey Thompson  
Professor, Prosthodontics, Division of Primary Care  
Ph.D., University of Florida, 1995

April Thomson  
Assistant Professor, Internal Medicine  
B.S., University of South Florida, 2002  
D.O., Nova Southeastern University, 2010

Stanislav Timofeev  
Assistant Professor, Cardiovascular Sonography Program—Tampa  
M.D., St. Petersburg State University Medical School, 1972  
Cardiology Specialist—St. Petersburg State University Medical School, 1975

Melissa Tovin  
Associate Professor, Physical Therapy  
B.S., New York University, 1988  
M.A., Columbia University, 1993  
Ph.D., Georgia State University, 1999

Almos Bela Trif  
Professor, Pathology  
M.D., University of Medicine and Pharmacy, 1976  
J.D., University Ali I. Cuza last, 1984  
Ph.D., University of Medicine and Pharmacy, 1995

Malav S. Trivedi  
Assistant Professor, Pharmaceutical Sciences  
B.S., North Gujarat University, 2008  
M.S., Northeastern University, 2010  
Ph.D., Northeastern University, 2013

Akiva Turner  
Associate Professor, Health Science  
B.A., California State University, 1989  
M.A., University of California—Los Angeles, 1991  
M.P.H., University of California—Los Angeles, 1992  
Ph.D., University of California—Los Angeles, 1994  
J.D., Benjamin Cardozo School of Law, Yeshiva University, 1999
Julie Tyler  
Associate Professor, Optometry  
B.A., Creighton University, 1992  
O.D., Indiana University School of Optometry, 1996  
Fellow, American Academy of Optometry

Nathan Unger  
Assistant Professor, Pharmacy Practice  
B.S., University of Florida, 2006  
Pharm.D., University of Florida, 2010

Jose Valdes  
Assistant Professor, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2012

Pradeep R. Vanguri  
Program Director and Associate Professor, Athletic Training  
B.S., East Carolina University, 1998  
M.S., North Carolina State University, 2000  
Ph.D., University of Alabama, 2005

Saynur Vardar  
Associate Professor, Periodontology  
D.D.S., Ege University, 1995  
Ph.D., Ege University, 2000  
Certificate—Periodontology, Boston University, 2010

Jorge Varela  
Academic Facilitator/Instructor, Pharmaceutical Sciences  
B.S., University of Florida, 1983  
B.S.A., University of Florida, 1985  
Pharm.D., University of Florida, 1989

Patricia Vargas  
Associate Professor, Medical Sonography  
B.H.Sc., Nova Southeastern University, 2006  
M.H.Sc., Nova Southeastern University, 2007

Archana Vatwani  
Assistant Professor, Physical Therapy  
B.A., University of St. Catherine, 2002  
D.P.T., Temple University, 2006  
M.B.A., Holy Family University, 2012

Juan Velasco  
Instructor, Cariology and Restorative Dentistry  
Certificate—AEGD, Nova Southeastern University, 2007

Ines Velez  
Professor and Director, Oral Medicine Diagnostic Sciences  
D.D.S., COC Columbia, 1979  
Certificate—University of Florida, 1984  
M.S., Universidad de los Andes, 1989  
M.S., Academy of Laser Dentistry USA, 1997  
Diplomate, American Board of Oral and Maxillofacial Pathology, 2000  
Fellow, American Academy of Oral Pathology, 1984

K. V. Venkataachalam  
Professor, Biochemistry  
B.S., Washington State University, 1983  
M.S., Washington State University, 1985  
Ph.D., Texas A&M University, 1991

Maria Vera-Nunez  
Assistant Professor, Clinical Immunology  
M.D., Universidad Nacional de San Agustin, 2004

Steven Vertz  
Associate Director and Instructor, Department of Speech-Language Pathology  
B.S., Abilene Christian University, 1982  
M.S., University of Mississippi, 1986

Chitra Paul Victor  
Assistant Professor, College of Nursing  
B.S.N., Christian Medical College, 1992  
M.S.N., Christian Medical College, 1998  
M.D., Indian Board of Alternative Medicines, 2005

Annabel Vila  
Assistant Professor, Physiology  
M.D., Central University of Villa Clara, 1988

Mani Vindhya  
Assistant Professor, Anesthesiology Assistant  
M.D., Yale University 2007

Rick Vogel  
Assistant Professor, Cariology and Restorative Dentistry  
D.D.S, New York University, 1979

Lori Vollmer  
Associate Professor, Optometry  
B.A., University of South Florida, 1990  
O.D., Nova Southeastern University, 2002  
Fellow, American Academy of Optometry

Robert Wagner  
Chair and Assistant Professor, Anesthesiology Assistant  
B.S., Florida A&M University, 1987  
M.M.Sc., Emory University, 1991  
M.P.H., University of Massachusetts, 2004

Sarah Wakefield  
Assistant Professor, Audiology  
B.S., The Pennsylvania State University, 2004  
Au.D., Nova Southeastern University, 2008

Elaine M. Wallace  
Dean  
Professor, Osteopathic Principles and Practice  
B.S., University of Mississippi, 1976  
D.O., University of Health Sciences College of Osteopathic Medicine, 1980  
M.S., University of Kansas, 2003  
M.S., Nova Southeastern University, 2008  
M.S., Nova Southeastern University, 2011

Jill A. Wallace-Ross  
Assistant Professor, Family Medicine  
Assistant Professor, Osteopathic Principles and Practice  
B.A., Florida Atlantic University, 1999  
D.O., Nova Southeastern University, 2007

Jacqueline Reese Walter  
Assistant Professor, Occupational Therapy Program  
B.S., Keuka College, 1997  
Ph.D., Nova Southeastern University, 2010
Kimberly Wang  
_Instructor, Periodontology_  
A.S., Santa Fe Community College, 1991

Barry Waterman  
_Assistant Professor, Community Dentistry_  
D.M.D., Tufts University, 1976

Paula A. Faria Waziry  
_Assistant Professor, Clinical Immunology_  
B.S., City College, 1997  
M.A., City College, 2002  
Ph.D., University of Miami, 2005

Nathan Weirich  
_Assistant Professor, Anesthesiologist Assistant_  
B.S., University of Florida, 2005  
M.H.Sc., Nova Southeastern University, 2008

Mirtha Montejo Whaley  
_Assistant Professor, Occupational Therapy_  
Department—Tampa  
B.S., University of Florida, 1968  
M.P.H., University of South Florida, 1993  
Ph.D., University of South Florida, 2007

Kerry L. Whitaker  
_Program Director and Assistant Professor, Physician Assistant Program—Jacksonville_  
A.A., Edison Community College, 1988  
B.S., University of Florida, 1993  
A.S., Kettering College of Medical Arts, 1997  
M.S.H.S., The George Washington University, 2004

Marline Whigham  
_Assistant Professor, College of Nursing_  
B.S.N., Florida Atlantic University, 2002  
M.S.N., University of Phoenix, 2007

George White  
_Professor, Pediatric Dentistry_  
D.D.S., State University of New York, 1967  
Ph.D., Massachusetts Institute of Technology  
D.B.A., American Century University

Albert W. Whitehead  
_Assistant Dean, Continuing Education, College of Dental Medicine_  
B.S., University of Nevada, 1985  
D.M.D., University of Pittsburgh, 1990  
M.Ed., University of Pittsburgh, 1994  
M.B.A., University of Pittsburgh, 1998

Nathan P. Widboom  
_Instructor, Osteopathic Principles and Practice_  
B.S., University of Wisconsin—Madison, 2006  
D.O., Touro University College of Osteopathic Medicine—California, 2012

Jani Wilkerson  
_Instructor, Psychiatry_  
B.S., Florida Atlantic University, 2006  
D.O., Nova Southeastern University, 2010

Margaret L. Wilkinson  
_Associate Dean, Preclinical Education_  
_Assistant Professor, Community Medicine_  
_Assistant Professor, Public Health_  
M.A., Michigan State University, 1967  
Ph.D., Kent State University, 1989

Sharon Willadsen  
_Assistant Professor, College of Nursing_  
B.S.N., Silver Lake College, 1988  
M.S.N., Marquette University, 1994  
Ph.D., Rush University, 2004

J. Keith Williams  
_Assistant Professor, Physician Assistant Studies_  
B.A., Western Connecticut State University, 1976  
B.S., University of Florida, 1983  
M.P.A.S., University of Nebraska, 2005  
Fellow, American Academy of Physician Assistants

Rachel Williams  
_Program Director, SLP.D. Program, and Associate Professor, Department of Speech-Language Pathology_  
B.A., University of Florida, 1992  
M.A., University of Central Florida, 1996  
Ph.D., Howard University, 2006

Donna Williams-Newman  
Coordinator, Clinical Services  
_Assistant Professor, College of Nursing_  
M.S.N. University of the West Indies, 2004  
D.N.P., University of Miami, 2011

Delfina Wilson  
_Assistant Dean, Student and Alumni Affairs_  
_Assistant Professor, Family Medicine_  
B.S., Mississippi State University, 2004  
M.A., Mississippi State University, 2005  
Ph.D., Mississippi State University, 2009

Stanley H. Wilson  
Dean, College of Health Care Sciences  
_Associate Professor, Physical Therapy_  
B.S., Howard University, 1981  
M.S., St. Thomas University, 1984  
Ed.D., Florida International University, 2000

William R. Wolowich  
_Assistant Professor, Pharmacy Practice_  
B.Sc. (Pharm.), University of Manitoba, 1988  
Pharm.D., State University of New York—Buffalo, 1993

Albert D. Woods  
_Associate Professor, Optometry_  
B.A., Western Washington University, 1982  
M.S., Florida Institute of Technology, 1986  
B.S., Pennsylvania College of Optometry, 1987  
O.D., Pennsylvania College of Optometry, 1990  
Fellow, American Academy of Optometry

Marylee Worley  
_Assistant Professor, Pharmacy Practice_  
B.S., Virginia Polytechnic Institute and State University, 2007  
Pharm.D., Temple University School of Pharmacy, 2012
Rick K. Yip  
Professor, Anatomy  
B.S., Southern Illinois University, 1975  
M.S., University of Arkansas, 1980  
Ph.D., Medical College of Wisconsin, 1985  
M.B.A., Nova Southeastern University, 2005

Samuel Yoders  
Director, Cardiovascular Sonography Program—Tampa  
B.S., University of Akron, 1985  
B.H.Sc., Nova Southeastern University, 2006  
M.H.Sc., Nova Southeastern University, 2008  
Ed.S., Nova Southeastern University, 2014

Yuri Zagvazdin  
Professor, Physiology  
B.S., Tyumen State University, 1982  
Ph.D., Sechenov Institute of Evolutionary Physiology &  
Biochemistry, National Academy of Sciences, 1989

Carole Zangari  
Associate Professor, Department of  
Speech-Language Pathology  
B.A., University of Pittsburgh, 1972  
M.Ed., College of New Jersey, 1983  
Ph.D., Purdue University—West Lafayette, 1992

Xiao Zeng  
Assistant Professor, Clinical Immunology  
B.S., Fuzhou University, 1981  
M.S., University of Wyoming, 1989  
Ph.D., Clarkson University, 1993

Bin Zhang  
Professor, Optometry  
M.D., Nanjing University, 1995  
M.S., Nanjing University, 1997  
Ph.D., University of Houston, 2003

Michelle Jamongjit Zhao  
Associate Professor, Pharmacology  
B.A., University of Texas, 2002  
Ph.D., University of Texas, 2006

Steven B. Zucker  
Associate Dean, Community Affairs  
Director, NSU AHEC Program  
Professor, Family Medicine  
Professor, Public Health  
Professor, Community Dentistry  
B.A., University of Pennsylvania, 1969  
D.M.D., University of Connecticut School of  
Dental Medicine, 1973  
M.Ed., University of Hartford, 1973

Adjoint/Clinical/Visiting Faculty

Mick Abae  
Clinical Assistant Professor, Obstetrics and Gynecology  
B.S., Fairleigh Dickinson University, 1977  
M.S., Fairleigh Dickinson University, 1979  
M.D., New York Medical College, 1984

Nuzhat A. Abbasi  
Clinical Assistant Professor, Internal Medicine  
M.D., Fatima Jinnah Medical College, 1973

Mohammed Abdallah  
Clinical Assistant Professor, Surgery  
B.S., Upsala College, 1988  
D.O., Chicago College of Osteopathic Medicine, 1992

Alia Abdulla  
Clinical Assistant Professor, Surgery  
B.S., University of Miami, 2002  
D.O., Nova Southeastern University, 2007

Ibrahim Abi-Rafeh  
Clinical Assistant Professor, Psychiatry  
B.S., American University of Beirut, 1983  
M.D., Universidad Tecnologica de Santiago, 1986

Anthony A. Abouhanna  
Clinical Assistant Professor, Family Medicine  
B.S., University of South Florida, 1992  
D.O., Nova Southeastern University, 2002

Susan Abrams  
Visiting Assistant Professor, Research  
Ph.D., University of Miami, 1994

Lauren Abratt  
Clinical Assistant Professor,  
Physical Medicine and Rehabilitation  
B.S., Nova Southeastern University, 2003  
D.O., Nova Southeastern University, 2008

Jose J. Abreu  
Clinical Assistant Professor, Obstetrics and Gynecology  
B.S., University of Miami, 1984  
M.D., Thomas Jefferson Medical College, 1988

John L. Abt  
Clinical Associate Professor, Family Medicine  
B.A., Boston University, 1979  
D.O., New York College of Osteopathic Medicine, 1983

Yaw O. Abu  
Clinical Assistant Professor, Pulmonary Medicine  
M.D., University of Ghana Medical School, 1988

Amarilis Acevedo-Cruz  
Clinical Associate Professor, Psychiatry  
B.A., University of Puerto Rico, 1981  
M.A., University of California, 1985  
Ph.D., University of California, 1989

Miguel A. Acevedo-Segui  
Clinical Assistant Professor, Family Medicine  
B.S., University of Puerto Rico, 1984  
M.D., University of Puerto Rico School of Medicine, 1988
Robyn M. Ache
Clinical Assistant Professor, Surgery
B.S., University of South Florida, 2000
D.O., Nova Southeastern University, 2006

Felix N. Acholonu
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., City College of New York, 1976
M.S., Columbia University, 1976
M.D., State University of New York College of Medicine, 1981

Joshua Ackerman
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., Washington University, 2001
M.D., American University of the Caribbean, 2005

Ronald T. Ackerman
Clinical Associate Professor, Obstetrics and Gynecology
B.A., Hofstra University, 1974
M.D., Medical Universidad de Guadalajara, 1978

Rodolfo Acosta
Adjunct Assistant Professor, Prosthodontics
D.D.S., University of Valle, 1992

Marijke H. Adams
Adjunct Faculty Member, Pharmaceutical Sciences
B.S., University of Florida, 1979
Pharm.D., Virginia Commonwealth University, 1991
Ph.D., Virginia Commonwealth University, 1991
Fellow of the American Foundation for Pharmaceutical Education (AFPE)

Rajesh Agarwala
Clinical Assistant Professor, Nephrology
M.D., Kasturba Medical College, 2003

Shino B. Aguilera
Clinical Assistant Professor, Dermatology
B.S., University of California, 1993
D.O., Western University of Health Sciences, 1999

Ashik N. Ahmad
Clinical Assistant Professor, Pediatrics
B.S., Vassar College, 1997
M.D., State University of New York, 2001

Sultan S. Ahmed
Clinical Associate Professor, Family Medicine
M.D., Dacca University, Bangladesh, 1978
P.A., Bayley Seton Hospital, 1988

Paul Ajamian
Adjunct Clinical Associate Professor, Optometry
B.S., University of Vermont, 1976
O.D., New England College of Optometry, 1980

Alan B. Aker
Adjunct Clinical Associate Professor, Optometry
M.D., New York Medical College, 1976
Ophthalmology, North Shore University Hospital, 1980

Asfa S. Akhtar
Clinical Associate Professor, Family Medicine
B.S., University of Alabama, 1994
D.O., Nova Southeastern University, 2000

Salah F. Al-Andary
Clinical Assistant Professor, Internal Medicine
B.S., American University of Beirut, 1987
M.D., American University of Beirut, 1991

Arthur L. Albers
Clinical Assistant Professor, Urology
B.A., University of South Florida, 1976
D.O., Philadelphia College of Osteopathic Medicine, 1980

Oscar A. Alea
Clinical Assistant Professor, Pediatrics
M.D., Universidad Central del Este, 1986

Sherene P. Alexander
Clinical Assistant Professor, Internal Medicine
M.D., University of Miami, 1997

Samantha Alford
Clinical Assistant Professor, Preventive Medicine
B.S., Union College, 1991
D.O., State University of New York Health Science, 1998
M.P.H., Nova Southeastern University, 2010

Syed Imran Ali
Clinical Assistant Professor, Cardiology
M.D., Dow Medical College, 1992

Suha Alkadry
Clinical Assistant Professor, Pediatrics
M.D., University of Jordan, 1992

Alina M. Alonso
Clinical Assistant Professor, Preventive Medicine
B.S., Barry University, 1978
M.D., Universidad Autonoma de Ciudad Juarez, 1984

Noel Alonso
Clinical Associate Professor, Preventive Medicine
B.A., University of Miami, 1992
M.S., Barry University, 1994
M.D., St. George's University School of Medicine, 1998

Raul Alonso
Clinical Assistant Professor, Cardiology
M.D., University of Miami School of Medicine, 1995

Barret I. Alpert
Clinical Associate Professor, Family Medicine
B.S., City University of New York—Brooklyn College, 1963
D.O., Chicago College of Osteopathic Medicine, 1967

Carol Altermann
Adjunct Clinical Hygienist Instructor, Periodontology
A.S., Santa Fe Community College, 1982

Lynda Altman
Clinical Assistant Professor, Family Medicine
B.S., Adelphi University, 1980
M.D., Ross University School of Medicine, 1986

Scott E. Altschuler
Clinical Assistant Professor, Internal Medicine
B.S., Carnegie Mellon University, 1997
M.D., University of Boston, 2002
M.S., University of Virginia, 2007
Devon Alvarez  
Clinical Assistant Professor, Pediatrics  
B.S., University of Central Florida, 2004  
M.S.N., Florida Atlantic University, 2012

Israel D. Alvarez  
Clinical Assistant Professor, Pediatrics  
M.D., La Universidad Nacional Pedro Henriquez Urena, 1983

Jose Alvarez  
Clinical Assistant Professor, Pulmonary Medicine  
M.D., Universidad De Costa Rica, 1980

Dhruv Amin  
Clinical Assistant Professor, Internal Medicine  
B.S., Tufts University, 2004  
D.O., New York College of Osteopathic Medicine, 2010

Edy Amisial  
Clinical Instructor, Obstetrics and Gynecology  
M.D., Universite d’Etat Haiti, 1998

Saint Amofah  
Community Assistant Professor, Public Health  
M.D., University of Ghana, 1990  
M.B.A., University of Miami, 2001

Laura M. Amon  
Adjunct Assistant Professor, Physician Assistant Studies  
B.S./P.A., Saint Francis College, 1989  
M.S., Alderson-Broaddus College, 1995  
Fellow, American Academy of Physician Assistants

Maria Anchundia  
Clinical Assistant Professor, Pediatrics  
M.D., University of Guayaquil, 1990

Phyllis D. Anderson-Wright  
Clinical Assistant Professor, Correctional Medicine  
B.A., Rutgers College, 1976  
D.O., University of Medicine and Dentistry of New York, 1993

Michael P. Angelillo  
Clinical Instructor, Internal Medicine  
M.D., La Universidad Tecnologica De Santiago, 1983

Eugenio Angueira-Serrano  
Clinical Assistant Professor, Internal Medicine  
B.S., Oral Roberts University, 1988  
M.D., Universidad Portoricens, 1992

Vibhuti A. Ansar  
Clinical Assistant Professor, Family Medicine  
M.D., American University of the Caribbean School of Medicine, 2001

Robert Antoine  
Clinical Assistant Professor, Psychiatry  
M.D., Ross University, 1983

Maryellen Antonetti  
Adjunct Assistant Professor, Physician Assistant Studies  
B.S./P.A., Nova Southeastern University, 1996  
M.P.H., Nova Southeastern University, 1996  
Fellow, American Academy of Physician Assistants

Frances J. Aquino  
Clinical Instructor, Internal Medicine  
M.D., Cadiz University, 1984

Alberto Aran  
Adjunct Clinical Associate Professor, Optometry  
B.S., Spring Hill College, 1976  
M.D., Tulane University, 1982

Lisa Ard  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., University of South Alabama, 1999  
Ph.D., University of South Alabama, 2004

Marc A. Arel  
Clinical Associate Professor, Pediatrics  
B.A., University of Miami, 1992  
M.D., University of Miami School of Medicine, 1997

Jorge A. Arenas  
Adjunct Assistant Professor, Diagnostic Sciences  
D.M.D., Nova Southeastern University, 2006

Jason Argiro  
Clinical Assistant Professor, Internal Medicine  
B.A., University of Delaware, 2006  
D.O., New York College of Osteopathic Medicine, 2010

Soledad Arguelles-Borge  
Adjunct Faculty Member, Department of Speech-Language Pathology  
M.S., Nova Southeastern University, 1992  
Ph.D., Nova Southeastern University, 1996

Charles A. Arkin  
Clinical Assistant Professor, Internal Medicine  
M.D., University of Tennessee School of Medicine, 1964

Dan Arnold  
Clinical Assistant Professor, Pediatric Dentistry, Division of Developmental Sciences  
D.D.S., University of Kentucky College of Dentistry, 1968  
M.S., University of Nebraska, 1970

Judith D. Aronson-Ramos  
Clinical Assistant Professor, Pediatrics  
B.A., Dartmouth College, 1982  
M.D., University of Miami School of Medicine, 1990

Jose F. Arrascue  
Clinical Assistant Professor, Nephrology  
M.D., Cayetano Medical University, 1973

Rosa Artola  
Clinical Assistant Professor, Internal Medicine  
B.S., Florida International University, 2002  
D.O., Nova Southeastern University, 2008

Sharon Ashley  
Adjunct Associate Professor, Pediatric Dentistry, Division of Developmental Sciences  
M.D., Hahnemann Medical College, 1976  
M.P.H., University of California, 2000  
M.B.A., Claremont University, 2003
Steven L. Attermann  
Clinical Assistant Professor, Internal Medicine  
B.S., Union College, 1979  
D.O., University of Medicine and Dentistry of New Jersey, 1984

Julia Aucoin  
Adjunct Faculty Member, College of Nursing  
B.S.N., Louisiana State University Health Sciences Center, 1979  
M.N., Louisiana State University Health Sciences Center, 1988  
D.N.S., Louisiana State University Health Sciences Center, 1997

Alberto Augsten  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., Florida International University, 2002  
Pharm.D., Nova Southeastern University, 2009

Peter Averkiou  
Clinical Assistant Professor, Pediatrics  
B.S., Sophie Davis School of Biomedical Education, 1985  
M.D., Albany Medical College, 1988

Melissa Aversa  
Adjunct Faculty Member, Physical Therapy  
M.S., Nova Southeastern University, 2009  
D.P.T., Nova Southeastern University, 2011

Liliana M. Awan  
Clinical Assistant Professor, Family Medicine  
M.D., Universidad Iberoamericana, 1998

Glen K. Axelson  
Clinical Instructor, Pathology  
B.S., Michigan State University, 1997  
M.S., Barry University, 1999  
D.O., Chicago College of Osteopathic Medicine, 2003

George P. Azar, Jr.  
Clinical Assistant Professor, Pulmonary Medicine  
B.A., Villanova University, 1978  
M.D., Ross University School of Medicine, 1984

Hanan Azer  
Adjunct Faculty, Physician Assistant Studies  
A.A., Lehigh Carbon Community College, 1996  
Pharm.D., Temple University, 2000  
Consultant Pharm Degree, University of Florida, 2001

Kara Bacchus-Sidman  
Adjunct Clinical Associate Professor, Optometry  
B.S., Stetson University, 1991  
O.D., Southern College of Optometry, 1995

Douglas M. Baird  
Clinical Assistant Professor, Family Medicine  
D.O., Kirksville College of Osteopathic Medicine and Surgery, 1965

Japheth J. Baker  
Clinical Assistant Professor, Internal Medicine  
D.O., Lake Erie College of Osteopathic Medicine, 2008

Matt Dane Baker  
Adjunct Faculty Member, Health Science  
B.S., Drexel University, 1983  
Certificate—Physician Assistant, Drexel University, 1983  
B.A., Richard Stockton College, 1983  
M.S., St. Joseph’s University  
D.H.Sc., Nova Southeastern University, 2007

Gilda Baldwin  
Adjunct Assistant Professor, Health Science  
M.M.S., Nova Southeastern University, 2002  
D.H.Sc., Nova Southeastern University, 2006

Emilio Balius  
Adjunct Clinical Associate Professor, Optometry  
O.D., University of Houston College of Optometry, 1991

Anaisys M. Ballesteros  
Clinical Assistant Professor, Family Medicine  
B.S., Florida International University, 1994  
D.O., Texas College of Osteopathic Medicine, 1999

Pami L. Ball-Pella  
Clinical Assistant Professor, Family Medicine  
B.S., Worcester State College, 1995  
B.S.N., Pace University, 2000  
M.S.N., Pace University, 2001

Stephen Balshi  
Adjunct Instructor, Prosthetics  
M.S., Drexel University, 2005

Thomas Balshi  
Adjunct Professor, Prosthetics  
D.D.S., Temple University, 1972

Meher H. Banjee  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., Topiwala National Medical College, India, 1975  
M.S., All India Institute of Speech and Hearing, India, 1977  
Ph.D., Louisiana State University, 2007

Nancy Banks  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., University of Central Missouri, 1976  
M.S., University of Central Missouri, 1978

Ahmed H. Barhoush  
Clinical Associate Professor, Obstetrics and Gynecology  
M.D., University of Cairo, 1966

Elizabeth J. Barice  
Clinical Associate Professor, Preventive Medicine  
Community Assistant Professor, Public Health  
B.S., University of Florida, 1963  
M.D., Stanford University, 1976  
M.P.H., Harvard University, 1980

Fritz G. Barionette  
Adjunct Instructor, Biomedical Informatics  
B.S., Hodges University, 2008  
M.S., Nova Southeastern University, 2011
James Barna  
Clinical Assistant Professor, Surgery  
B.A., Manhattanville College, 1979  
M.D., Yeshiva University, 1985

Celia Barreiro-Blanco  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Arizona State University, 1992  
M.S., Nova Southeastern University, 1994

Luis Barreras  
Clinical Assistant Professor, Hematology/Oncology  
B.S., University of Florida, 1976  
M.D., University of Miami, 1981

Jacqueline E. Barrett  
Clinical Assistant Professor, Psychiatry  
B.S., Florida International University, 1987  
M.D., Wayne State University, 1993

Jose E. Barros  
Clinical Assistant Professor, Internal Medicine  
M.D., Universidad De Chile, 1999

Nabil A. Barsoum  
Clinical Associate Professor, Family Medicine  
M.D., Cairo University, 1972

Melissa Barthold  
Adjunct Faculty Member, College of Nursing  
R.N., Illinois Masonic Medical Center School of Nursing, 1970  
M.S.N., Loyola University of Chicago, 1999  
D.N.P., Loyola University of Chicago, 2015

Liana Basceanu-Sarbu  
Adjunct Assistant Professor, Periodontics  
D.D.S., New York University, 1989

Hal J. Bashein  
Clinical Assistant Professor, Urology  
B.S., University of Georgia, 1981  
D.O., Southeastern University of the Health Sciences, 1986

Jorge L. Bastos  
Clinical Assistant Professor, Pediatrics  
M.D., Instituto Superior de Ciencias Medicas, 1986

Paul D. Batson  
Adjunct Clinical Assistant Professor, Optometry  
O.D., University of Alabama, School of Optometry, 1998

Patricia A. Baumann  
Clinical Assistant Professor, Orthopedic Surgery  
B.S., Cornell University, 1987  
M.S., University of Miami, 1990  
D.O., Nova Southeastern University, 1994

Ashley C. Bayer  
Clinical Assistant Professor, Pediatrics  
B.S., University of Florida, 2002  
D.O., Nova Southeastern University, 2008

Michael W. Bays  
Clinical Assistant Professor, Internal Medicine  
B.S., Ferris State University, 1978  
D.O., Michigan State University, 1986

Ali A. Bazzi  
Clinical Assistant Professor, Cardiology  
B.S., Bradley University, 1981  
M.D., American University of the Caribbean, 1984

Erin Beasley  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Florida State University, 1994  
M.S., Nova Southeastern University, 1999

Linda Beaulieu  
Adjunct Faculty Member, Cardiovascular Sonography Program—Tampa  
M.S., Mountain State University, 2007

Maria A. Behnam-Terneus  
Clinical Instructor, Pediatrics  
B.S., Nova Southeastern University, 2005  
D.O., Nova Southeastern University, 2009

Carlos Bejar  
Clinical Assistant Professor, Nephrology  
M.D., Universidad Central del Este, 1987

Francisco E. Belette  
Clinical Assistant Professor, Hematology/Oncology  
B.S., Haverford College, 1982  
M.D., University of Illinois, 1986

Laura E. Bell  
Clinical Instructor, Family Medicine  
B.S., St. Leo’s College, 1982  
M.S., University of Southern California, 1994  
M.P.A., University of Florida, 2000

Michael D. Bell  
Clinical Associate Professor, Pathology  
B.A., Cornell University, 1981  
M.D., Dartmouth Medical School, 1985

Maryellen V. Benito  
Clinical Assistant Professor, Family Medicine  
B.S., City College of New York, 2003  
D.O., New York College of Osteopathic Medicine, 2010

Shaughn C. Bennett  
Clinical Assistant Professor, Family Medicine  
B.S., University of Florida, 1974  
M.S., Florida International University, 1982  
D.O., Southeastern University of the Health Sciences, 1986

Maayan Ben-Shalom  
Adjunct Instructor, Community Dentistry  
Columbia University College of Dental Medicine, 2009

Inaki G. Bent  
Clinical Instructor, Internal Medicine  
B.S., Florida State University, 2003  
M.S., Barry University, 2005  
M.B.A., Nova Southeastern University, 2010  
D.O., Nova Southeastern University, 2010

Robert L. Bentz II  
Clinical Associate Professor, Ophthalmology  
B.S., Ohio State University, 1974  
D.O., Philadelphia College of Osteopathic Medicine, 1978
Roberto Beraja  
Clinical Assistant Professor, Ophthalmology  
M.D., Universidad de Costa Rica, 1980

Victor Beraja  
Clinical Assistant Professor, Surgery  
M.D., Escuela Autonoma de Ciencias Medicas, 1982

Don H. Bercuson  
Clinical Assistant Professor, Internal Medicine  
B.S., Northwestern University, 1971  
M.D., University of Miami School of Medicine, 1975

Stephen Berger  
Adjunct Assistant Professor,  
Cariology and Restorative Dentistry  
D.D.S., Georgetown University, 1973

Steven A. Berley  
Clinical Assistant Professor, Family Medicine  
D.O., University of Health Sciences, 1982

Charles Berlin  
Adjunct Professor, Audiology  
B.A., City University of New York—Brooklyn College  
M.S., City University of New York—Brooklyn College  
Ph.D., City University of New York—Brooklyn College

Arthur L. Berman  
Clinical Instructor, Internal Medicine  
D.O., Kirksville College of Osteopathic Medicine, 1981

Barry S. Berman  
Clinical Assistant Professor, Hematology and Oncology  
B.S., Emory University, 1984  
M.S., Emory University, 1984  
M.D., University of South Florida, 1988

Stuart A. Berman  
Adjunct Faculty, Endodontics  
D.D.S., Fairleigh Dickinson University, 1966  
Certificate—Endodontics, Columbia University, 1972

Ernest Bertha  
Clinical Associate Professor, Pediatrics  
B.A., Rutgers College, 1978  
M.D., Far Eastern University, 1984  
M.B.A., University of South Florida, 1996

Sandra Bertman  
Clinical Associate Professor, Medical Humanities  
B.A., Vassar College, 1958  
Ed.M., Boston University, 1964  
Ph.D., The Union Institute, 1988

Stephen A. Besh  
Clinical Assistant Professor, Hematology/Oncology  
B.S., Louisiana State University, 1986  
M.D., Louisiana State University Medical School, 1990

Nhu T. Beteta  
Adjunct Clinical Instructor, Optometry  
University of Miami, 2003  
B.S., Nova Southeastern University, 2005  
O.D., Nova Southeastern University, 2007

Daphnie Bharadwa  
Adjunct Faculty Member, College of Nursing  
B.S.N., University of Puerto Rico, 1977  
M.Ed., University of Phoenix, 1999  
M.S.N., University of Phoenix, 2006  
D.N.P., University of Massachusetts, 2012

Nisha Bhatt  
Clinical Assistant Professor, Internal Medicine  
B.S., Rutgers University School of Business, 2000  
M.D., Tufts University School of Medicine, 2004

Michael M. Bibliowicz  
Clinical Assistant Professor, Otorhinolaryngology  
B.S., University of Florida, 1979  
D.O., Ohio University College of Osteopathic Medicine, 1984

Daniel R. Bieda  
Clinical Assistant Professor, Family Medicine  
B.A., University of Washington, 1987  
D.O., Nova Southeastern University, 1997

Jefry Biehler  
Clinical Associate Professor, Pediatrics  
B.S., Oklahoma Christian College, 1980  
M.D., University of Oklahoma, 1984  
M.P.H., University of Oklahoma, 1993

Tony Bien-Aime  
Clinical Assistant Professor, Family Medicine  
M.D., State University of Haiti, 1983

David N. Bimston  
Clinical Associate Professor, Surgery  
B.A., Washington University, 1988  
M.D., New York University School of Medicine, 1992

Shark M. Bird  
Clinical Instructor, Geriatrics  
M.D., Marshall University, 1996  
B.S., Ball State University, 1990

Benham Birgani  
Clinical Assistant Professor, Family Medicine  
B.A., The Union Institute, 1988  
D.O., Southeastern University of the Health Sciences, 1993

Allan J. Birnbaum  
Clinical Assistant Professor, Internal Medicine  
B.A., Rutgers State University, 1975  
D.O., College of Osteopathic Medicine and Surgery, 1979

Brian J. Bixler  
Clinical Assistant Professor, Family Medicine  
B.S., Western Kentucky University, 1996  
M.D., University of Cincinnati, 2000

Nicole H. Bixler  
Clinical Assistant Professor, Family Medicine  
B.S., Ball State University, 1996  
M.B.A., Saint Joseph University, 2000  
D.O., Philadelphia College of Osteopathic Medicine, 2002

Wayne Bizer  
Clinical Professor, Ophthalmology  
B.A., University of Louisville, 1966  
D.O., Chicago College of Osteopathic Medicine, 1972  
Fellow, American Osteopathic College of Ophthalmology

D.O., Pikeville College of Osteopathic Medicine, 2003

Efren Buitrago  
Clinical Assistant Professor, Surgery  
M.D., Universidad Nacional de Colombia, 1989

Wilma Bulkin-Siegel  
Clinical Assistant Professor, Medical Education  
M.D., University of Pennsylvania, 1958

Allan Burch  
Adjunct Assistant Professor, Community Dentistry  
D.D.S., Medical College of Virginia, 1967

Jon P. Burdzy  
Clinical Assistant Professor, Family Medicine  
B.A., Purdue University, 1993  
D.O., Nova Southeastern University, 1998

Janine E. Burgher-Jones  
Clinical Assistant Professor, Family Medicine  
B.S., Georgia State University, 1982  
M.D., Medical College of Georgia, 1986

Timothy M. Burke  
Clinical Assistant Professor, Family Medicine  
B.S., University of Florida, 1996  
D.O., Nova Southeastern University, 2002

Cathy A. Burnweit  
Clinical Professor, Surgery  
B.A., Dartmouth College, 1977  
M.D., Harvard Medical School, 1981

Darin L. Bush  
Clinical Assistant Professor, Family Medicine  
B.S., University of New England, 1995  
D.O., University of New England College of Osteopathic Medicine, 2000

Louis J. Butera  
Clinical Assistant Professor, Neurology  
B.S., Temple University, 1967  
D.O., Philadelphia College of Osteopathic Medicine, 1978

Mercedes D. Cabaleiro  
Clinical Assistant Professor, Surgery  
M.D., Universidad Central del Este, 1994

Ana Cabrera  
Adjunct Faculty Member, College of Nursing  
B.S.N., Florida International University, 1999  
M.S.N., Barry University, 2007  
D.N.P., Barry University, 2010

Francoeur Cadet  
Clinical Assistant Professor, Internal Medicine  
B.A., University of Florida, 1997  
M.P.H., University of Florida, 2000  
D.O., Nova Southeastern University, 2005

Angel R. Cadiz  
Clinical Assistant Professor, Pediatrics  
B.S., The Ohio State University, 1972  
M.D., University of Zaragoza, 1979

Adriana Cadilla  
Clinical Assistant Professor, Pediatrics  
B.A., University of Florida, 2001  
M.D., Ponce School of Medicine, 2005
Matthew Caines  
Adjunct Faculty, Health Science  
B.A., Wilkes University, 2005  
M.P.H., A.T. Still University, 2010  

Kevin D. Cairns  
Clinical Assistant Professor, Physical Medicine and Rehabilitation  
M.D., New York Medical College, 1999

George L. Caldwell, Jr.  
Clinical Assistant Professor, Orthopedic Surgery  
M.D., Bowman Gray School of Medicine, 1988

Richard H. Callari  
Clinical Assistant Professor, Otolaryngology  
B.A., Boston University, 1981  
M.D., Medical College of Virginia, 1985

Sandy R. Calle  
Clinical Assistant Professor, Pediatrics  
B.S., Florida State University, 2001  
M.D., Florida State University College of Medicine, 2007

Aldo A. Calvo  
Clinical Assistant Professor, Family Medicine  
B.A., Florida International University, 1992  
D.O., Nova Southeastern University, 1996

Pablo J. Calzada  
Community Associate Professor, Public Health  
D.O., Southeastern University of the Health Sciences, 1993  
M.P.H., University of South Florida, 2001

Eric S. Cameron  
Clinical Assistant Professor, Pediatrics  
B.A., Washington Square College, 1967  
M.D., State University of New York, 1971

Julian Cameron  
Clinical Assistant Professor, Orthopedic Surgery  
B.A., Morehouse College, 1996  
M.D., University of Miami, 2000

Errol E. Campbell  
Clinical Assistant Professor, Internal Medicine  
M.D., University of the West Indies, 1985

Maureen Campbell  
Clinical Assistant Professor, Family Medicine  
B.A., University of South Florida, 1985  
D.O., Southeastern University of the Health Sciences, 1986

Shawn P. Cannon  
Clinical Assistant Professor, Internal Medicine  
B.S., New York Institute of Technology, 1988  
D.O., New York College of Osteopathic Medicine, 1992

Jeffrey B. Cantor  
Clinical Assistant Professor, Orthopedic Surgery  
B.S., Muhlenberg College, 1983  
M.D., University of Medicine and Dentistry of New Jersey, 1987

G. Patricia Cantwell  
Clinical Professor, Pediatrics  
B.S., College of St. Elizabeth, 1974  
M.D., Wake Forest University, 1981

Edward A. Capone  
Clinical Assistant Professor, Family Medicine  
D.O., Chicago College of Osteopathic Medicine, 1976

Mariaeleana P. Caraballo  
Clinical Associate Professor, Family Medicine  
B.S., University of Miami, 1981  
D.O., Nova Southeastern University, 1998

Adriana R. Carcamo  
Adjunct Clinical Instructor, Optometry  
Florida International University, 2005  
B.S., Nova Southeastern University, 2009  
O.D., Nova Southeastern University, 2011

Angelica Cardenas Mansur  
Adjunct Instructor, Cardiology and Restorative Dentistry  
D.M.D., Nova Southeastern University, 2003

Lysette Cardona  
Community Assistant Professor, Public Health  
B.S., University of Puerto Rico, 1979  
M.D., University of Puerto Rico Medical School, 1983  
M.P.H., Tulane University School of Public Health and Tropical Medicine, 1988  
M.H.S.A., Barry University, 2005

Marjorie Caro  
Clinical Assistant Professor, Psychiatry  
M.D., Universidad Central del Este, 1995

Mouvielle Caro Gracia  
Clinical Instructor, Psychiatry  
M.D., Universidad Iberoamericana, 2001

Dominic Carreira  
Clinical Assistant Professor, Orthopedic Surgery  
B.A., University of Notre Dame, 1995  
M.D., University of Illinois, 2000

Maria J. Carreon  
Clinical Assistant Professor, Infectious Disease  
B.S., University of the Philippines, 1979  
M.D., University of the Philippines College of Medicine, 1983

Eddy H. Carrillo  
Clinical Assistant Professor, Surgery  
M.D., La Universidad de San Carlos, 1977

Ingrid D. Carter  
Clinical Assistant Professor, Osteopathic Principles and Practice  
B.S., Florida State University, 1995  
D.O., Western University Health Sciences College of Osteopathic Medicine, 2002

Damian Casadesus  
Clinical Assistant Professor, Internal Medicine  
M.D., Instituto Superior de Ciencias Medicas, 1994  
Ph.D., Niigata University, 2007

Alberto A. Casaretto  
Clinical Assistant Professor, Internal Medicine  
B.A., Tufts University, 1991  
M.D., Tufts University School of Medicine, 1995
James H. Caschette
Clinical Associate Professor, Otorhinolaryngology
B.A., University of Buffalo, 1959
D.O., Philadelphia College of Osteopathic Medicine, 1963

Cheryl L. Case-Diaz
Clinical Associate Professor, Internal Medicine
M.D., University of Miami, 2001

Patrick Casimir
Adjunct Instructor, Biomedical Informatics
B.S., Nova Southeastern University, 2001
M.S., Nova Southeastern University, 2010

Ricardo R. Castillo
Clinical Instructor, Psychiatry
B.A., National Institute of Panama, 1958
M.D., National University of Mexico School of Medicine, 1968

Robert Castro
Clinical Assistant Professor, Cardiology
B.S., Loyola Marymount University, 1999
D.O., Western University of Health Sciences, 2005

Joseph D. Catino
Clinical Assistant Professor, Surgery
M.D., American University of the Caribbean, 1999

Paul Cawley
Adjunct Instructor, Biomedical Informatics
B.S., Millersville University, 1974
M.S., Villanova University, 1978

Jason S. Cesario
Clinical Instructor, Obstetrics and Gynecology
B.S., University of Florida, 2000
M.D., St. George's University, 2007

Robin L. Chaize
Clinical Assistant Professor, Pediatrics
B.S., State University of New York, 1992
D.O., New York College of Osteopathic Medicine, 1999

Kerry E. Chamberlain
Clinical Assistant Professor, Hematology/Oncology
B.S., Oral Roberts University, 1979
D.O., Kirksville College of Osteopathic Medicine, 1983

Joseph C. Chan
Clinical Associate Professor, Infectious Disease
B.A., University of California College of Letters and Sciences, 1973
M.D., University of California School of Medicine, 1977

Igor Chaplik
Clinical Assistant Professor, Dermatology
B.S., University of Miami, 1994
D.O., Nova Southeastern University, 2000

Glenn S. Chapman III
Clinical Assistant Professor, Neuromusculoskeletal
B.S., University of Central Florida, 1994
D.O., Des Moines University Osteopathic Medical Center, 2002

Ronnie Charin
Adjunct Hygienist, Periodontology
R.D.H., Fairleigh Dickinson University, 1967

Hakan S. Charles-Harris
Clinical Assistant Professor, Surgery
M.D., University of the West Indies, 1989

Nelson Charlie
Clinical Assistant Professor, Dermatology
B.S., Tulane University, 1992
M.D., Universisatis Yalensis, 1996

David G. Chase
Clinical Assistant Professor, Pulmonary Medicine
M.D., University of Mississippi, 1976

Alejandro Chediak
Clinical Associate Professor, Pulmonary Medicine
B.S., University of Miami, 1978
M.D., University of Dominica, 1981

Joshua P. Chen
Clinical Assistant Professor, Pediatrics
B.S., University of California, 2001
M.D., Boston University, 2011

Renai Chen
Visiting Faculty Member, Optometry
M.D., Wenzhou Medical University

Eric S. Chenven
Clinical Assistant Professor, Urology
B.A., Brandeis University, 1992
M.D., Albert Einstein College of Medicine, 1996

Paola A. Chernomoretz
Clinical Assistant Professor, Pediatrics
M.D., University of Buenos Aires, 2000

Daniel E. Chervony
Clinical Assistant Professor, Psychiatry
M.D., Universidad Autonoma de Ciudad, 1984

C. Lynn Chevalier
Adjunct Faculty Member, Health Science
B.S., College of St. Rose, 1977
M.S., The State University at Albany, 1980
Graduate Certificate—Public Health, University of North Carolina—Chapel Hill, 2001
M.P.H., University of Massachusetts—Amherst, 2004
D.H.Sc., Nova Southeastern University, 2007

Joseph I. Chi
Clinical Instructor, Internal Medicine
B.S., Tulane University, 1984
M.D., Tulane School of Medicine, 1988

Diana M. Chiong
Clinical Assistant Professor, Internal Medicine
B.S., Rutgers University, 1998
D.O., Nova Southeastern University, 1996

Michael A. Chizner
Clinical Professor, Cardiology
B.A., New York University, 1970
M.D., Cornell University Medical College, 1974

Michael P. Choi
Clinical Assistant Professor, Surgery
B.S., Tulane University, 1993
D.O., Nova Southeastern University, 1999
Rajiv R. Chokshi
Clinical Associate Professor, Internal Medicine
M.B.B.S., B.J. Medical College, 1976

Bryan Ciervo
Adjunct Faculty Member, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2002
M.B.A., Nova Southeastern University, 2015

Ari Ciment
Clinical Assistant Professor, Pulmonary Medicine
M.D., Rush University Medical College, 2001

Matthew G. Clarke
Clinical Instructor, Surgery
B.S., University of Michigan, 1999
M.D., Universitas Brunensis, 2004

Kevin Clauson
Adjunct Associate Professor, Biomedical Informatics
B.S., University of Tennessee, 1995
Pharm.D., University of Tennessee, 2000

Romulo Clavelo
Clinical Instructor, Family Medicine
M.D., Instituto Superior de Ciencias Medicas, 1986

Cynthia C. Clayton
Clinical Associate Professor, Pediatrics
B.A., Smith College, 1964
M.D., New York University, 1967

Joshua Cleland
Adjunct Faculty, Ph.D. Program, Physical Therapy
B.S., Notre Dame College, 1998
M.P.T., Notre Dame College, 2000
Ph.D., Nova Southeastern University, 2006

William L. Cody
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., Memphis State University, 1972
M.D., University of Tennessee Center of Health Sciences, 1982

Julio Coello
Clinical Associate Professor, Obstetrics and Gynecology
B.M.H., Ciclo Educativo Tarquil, 1967
M.D., Saint James Catholic University of Guayaquil, 1975

Janis S. Coffin
Clinical Associate Professor, Family Medicine
B.S., Metropolitan State College, 1994
D.O., University of Health Sciences, 1998

Daniel L. Cohen
Clinical Associate Professor, Gastroenterology
B.A., Columbia University, 2000
M.D., New York University School of Medicine, 2004

David Cohen
Clinical Assistant Professor, Internal Medicine
M.D., Instituto Superior de Ciencias Medicas, 1991

Devra Cohen
Adjunct Instructor, Public Health
B.A., Vassar College, 1981
M.P.H., Yale University, 1985

Ellen Cohen
Adjunct Faculty Member, Department of Speech-Language Pathology
B.S., Nova University, 1988
M.S., Nova University, 1990

Jacob Cohen
Clinical Instructor, Surgery
M.D., University of Bologna, 1978

Jason A. Cohen
Adjunct Instructor, Disaster and Emergency Management
B.S., Nova Southeastern University, 2006
M.S., Nova Southeastern University, 2009

Jules J. Cohen
Clinical Assistant Professor, Family Medicine
B.A., Temple University, 1961
D.O., Philadelphia College of Osteopathic Medicine, 1965

Robyn Cohen
Adjunct Hygienist Clinical Instructor, Periodontology
A.S., Broward College Dental Health, 1999

Steven D. Cohen
Clinical Assistant Professor, Internal Medicine
M.D., Loyola Stritch School of Medicine, 1974

Steven W. Cohen
Clinical Assistant Professor, Family Medicine
B.S., University of Florida, 1987
D.O., Southeastern University of the Health Sciences, 1991

Stephanie A. Colavito
Clinical Assistant Professor, Internal Medicine
B.A., Mount Holyoke College, 1988
M.D., St. George’s School of Medicine, 2000

Victoria Coleman-Miller
Clinical Assistant Professor, Preventive Medicine
B.A., Marymount College, 1973
J.D., Nova University, 1987

Douglas Colman
Clinical Assistant Professor, Family Medicine
B.S., Michigan State University, 1975
D.O., Des Moines College of Osteopathic Medicine & Surgery, 1978

Viviana Colmegna
Clinical Assistant Professor, Psychiatry
M.D., National University of La Plata, 1982

Felton E. Combust, Jr.
Clinical Instructor, Family Medicine
B.S., Delta State University, 1974
M.D., University of Mississippi Medical Center, 1978

Robert Comperatore
Clinical Professor, Surgery
M.D., University of Buenos Aires, 1971

Eileen M. Conaway
Clinical Assistant Professor, Family Medicine
B.A., University of Virginia, 2004
D.O., Edward Via Virginia College of Osteopathic Medicine, 2010

Adjunct Faculty, Sociobehavioral and Administrative Pharmacy
Pharm.D., Nova Southeastern University, 1998

Douglas W. David
Clinical Assistant Professor, Family Medicine
B.S., Ohio State University, 1977
M.S., Ohio State University, 1980
D.O., Ohio University College of Osteopathic Medicine, 1987

Jacqueline David
Clinical Assistant Professor, Internal Medicine
B.A., Boston College, 1982
D.O., Nova Southeastern University, 2008

Jean W. Davis
Adjunct Faculty, Health Science
B.S., Rutgers University, 1992
M.S., Rutgers University, 1994
Ed.D., Nova Southeastern University, 1998

Jennifer A. Davis
Clinical Assistant Professor, Pediatrics
B.A., Wellesley College, 1988
M.D., New York Medical College, 1997

Lance G. Davis
Clinical Instructor, Pathology
B.A., Chaminade University, 1978
M.D., American University of the Caribbean, 1987

Margaret Davis
Adjunct Faculty, Health Science
B.S., Troy University, 1982
M.A., University of Phoenix, 1996
M.S., University of Phoenix, 2002
D.H.Sc., Nova Southeastern University, 2008

Robert Davis
Adjunct Clinical Associate Professor, Optometry
O.D., Pennsylvania College of Optometry, 1970

Mark H. Dawson
Clinical Associate Professor, Family Medicine
M.D., Louisiana State University School of Medicine, 1976
M.B.A., Louisiana State University, 1995

Juan M. D’Brot
Clinical Assistant Professor, Pulmonary Medicine
M.D., Cayetano Heredia University Medical School, 1980

Pallavi B. Deliwala
Clinical Assistant Professor, Pediatrics
M.D., Seth G.S. Medical College, 1969

Michael De Lucca
Community Assistant Professor, Public Health
M.H.M., St. Thomas University, 1988

Alejandro Del Valle
Clinical Associate Professor, Internal Medicine
B.S., Boston University Sargent College of Allied Health Profession, 1997
D.O., New York College of Osteopathic Medicine, 2001

Michael DeNardis
Clinical Instructor, Obstetrics and Gynecology
B.S., University of Michigan, 1996
D.O., Kirksville College of Osteopathic Medicine, 2002

Sara DeNardis
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., University of Wisconsin, 1995
D.O., Des Moines University College of Osteopathic Medicine, 2000

Brian DenBeste
Adjunct Clinical Assistant Professor, Optometry
O.D., Illinois College of Optometry, 1980

Misha Denham
Clinical Assistant Professor, Internal Medicine
B.S., University of Florida, 1991
M.S., Barry University, 1994
D.O., Nova Southeastern University, 2002

Mohan Deochand
Clinical Assistant Professor, Neurology
M.D., University of Havana, 1983

Vladimir Derenoncourt
Clinical Assistant Professor, Family Medicine
B.S., University of Miami, 1989
D.O., Nova Southeastern University, 1996
John J. Desmond
Clinical Assistant Professor, Family Medicine
B.S., University of Georgia, 1992
M.S., University of Georgia, 1995
M.D., Medical College of Georgia, 2000

Lesly Desrouleaux
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., City University of New York, 1977
M.D., Albert Einstein College of Medicine, 1981

Christopher DeTure
Clinical Assistant Professor, Periodontology
D.M.D., University of Florida, 1996

Venu G. Devabhaktuni
Clinical Assistant Professor, Pediatrics
M.D., Nagarjuna University, 1981

Uttma Dham
Adjunct Faculty Member, Cariology and Restorative Dentistry
D.M.D., Nova Southeastern University, 2003

Karl Marx Dhana
Clinical Assistant Professor, Internal Medicine
B.S., Florida International University, 1993
M.D., University of Miami School of Medicine, 1998

Kabbinamane V. Dharmappa
Clinical Assistant Professor, Pediatrics
M.D., Bangalore University, 1972

Jose J. Diaz
Clinical Assistant Professor, Physical Medicine and Rehabilitation
B.A., Baruch College, 1994
D.O., New York College of Osteopathic Medicine, 2001

Maria A. Diaz
Clinical Instructor, Internal Medicine
B.S., Barry University, 1988
Pharm.D., University of Florida, 1992
D.O., Nova Southeastern University, 1998

Miguel A. Diaz
Clinical Assistant Professor, Cardiology
B.S., University of Miami, 1997
M.D., University of Miami, 2001

Tony Diaz
Clinical Instructor, Orthopedic Surgery
B.A., University of Miami, 1988
D.O., Southern University of the Health Sciences, 1992

Frank R. Don Diego
Clinical Professor, Family Medicine
B.A., Rutgers University, 1972
M.D., Jefferson Medical College, 1981

Jessie Dieguez-Arseault
Clinical Assistant Professor, Pediatrics
B.S., Florida International University, 2004
M.D., St. George's University, 2008

Robert L. DiGiovanni
Clinical Professor, Internal Medicine
B.A., The Johns Hopkins University, 1978
D.O., Kirksville College of Osteopathic Medicine, 1982

Michael Digney
Adjunct Instructor, Oral and Maxillofacial Surgery, Division of Surgical Sciences
D.D.S., Georgetown University, 1985

Paula Dilanchian
Clinical Assistant Professor, Internal Medicine
B.S., University of Utah, 1986
Pharm.D., Idaho State University, 1996
D.O., Nova Southeastern University, 2007

Jeanette Dilan-Koetje
Clinical Instructor, Internal Medicine
B.S., Loyola University, 1993
D.O., Midwestern University, 2005

Oliver R. DiPietro
Clinical Assistant Professor, Internal Medicine
B.S., McGill University, 1976
M.D., University of Sherbrooke Medical School, 1980

Sandra Discala
Adjunct Faculty Member, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2007

Jordan J. Ditchek
Clinical Associate Professor, Radiology
B.S., Massachusetts Institute of Technology, 1991
M.D., Cornell University Medical College, 1995

Jon H. Dodds
Community Associate Professor, Public Health
B.S., State University of New York, 1969
M.Ed., Temple University, 1971
Ph.D., Syracuse University, 1975
M.P.H., University of Miami, 1991

Michelle A. Doldren
Adjunct Assistant Professor, Public Health
B.S., Howard University, 1999
M.P.H., University of South Florida, 2001
Ed.D., Nova Southeastern University, 2010

John Dolen
Adjunct Faculty Member, Community Dentistry
B.A., University of Maryland, 1968

Manny Dominguez
Adjunct Assistant Professor, Biomedical Informatics
B.S., Tampa College, 1992
M.B.A., University of Sarasota, 1994
Ph.D., Nova Southeastern University, 2000

Sonya Dominguez
Clinical Assistant Professor, Family Medicine
B.S., Brown University, 1995
M.D., Universitas Brunensis, 2002
Audeanne Donaldson  
Adjunct Faculty Member, College of Nursing  
B.S.N., Florida Atlantic University, 2002  
M.S.N., Florida Atlantic University, 2005  
Ph.D., Barry University, 2010

Theresa Doolittle  
Adjunct Assistant Professor, Physician Assistant Studies  
B.A., University of California, 1982  
M.P.H., Northeastern University, 1996  
D.H.Sc., Nova Southeastern University, 2008

Malcolm Dorman  
Clinical Professor, Surgery  
B.S., Fairleigh Dickinson University, 1963  
M.D., Chicago Medical School, 1967

David W. Dorton  
Clinical Assistant Professor, Dermatology  
B.S., University of South Florida, 1986  
D.O., Southeastern University of the Health Sciences, 1991

James Doty  
Clinical Assistant Professor, Surgery  
B.S., University of Massachusetts, 1992  
M.D., Boston University School of Medicine, 1996

Barry Doublestein  
Clinical Associate Professor, Family Medicine  
Southeast Regional Coordinator, Nova Southeastern University College of Osteopathic Medicine  
B.A., Albion College, 1976  
M.A., Northeast Missouri State University, 1986  
D.S.L., Regent University, 2009

Marilyn Douglas  
Clinical Instructor, Occupational Therapy  
B.S., University of Florida, 1990

Jeffrey Dresner  
Clinical Assistant Professor, Internal Medicine  
B.S., Rensselaer Polytechnic Institute, 1976  
M.S., State University of New York, 1978  
M.D., New York Medical College, 1982

Martin J. Drost  
Clinical Assistant Professor, Internal Medicine  
B.S., Iowa State University, 1990  
M.D., Southern Illinois University School of Medicine, 1994

Joanna Drowos  
Clinical Assistant Professor, Preventive Medicine  
Community Assistant Professor, Public Health  
B.S., University of Miami, 1999  
M.P.H., Nova Southeastern University, 2002  
D.O., Nova Southeastern University, 2004

Michael F. Drusano  
Clinical Assistant Professor, Family Medicine  
B.A., Johns Hopkins University, 2001  
M.D., University of Maryland, 2007

Ana M. Duarte  
Clinical Professor, Dermatology  
B.S., University of Miami, 1983  
M.D., University of Miami School of Medicine, 1988

Jacqueline DuBose  
Clinical Assistant Professor, Family Medicine  
B.S., Arkansas State University, 1980  
M.D., Medical College of Georgia, 2006

Robert H. Dudley  
Clinical Assistant Professor, Family Medicine  
B.S., University of Florida, 1993  
M.D., University of Miami School of Medicine, 1997

Rhaisa Dumenigo  
Clinical Assistant Professor, Psychiatry  
M.D., Universidad Central del Este, 1983

Mark Dunbar  
Adjunct Clinical Associate Professor, Optometry

George T. Duncan  
Adjunct Faculty, Health Science  
B.S., University of Miami, 1970  
M.S., Florida Atlantic University, 1983  
Ph.D., Florida International University, 1996

Stephanie Duncan-Garcia  
Clinical Assistant Professor, Family Medicine  
B.A., Immaculata College, 1995  
D.O., Philadelphia College of Osteopathic Medicine, 1999

Indira Dupotey-Rubi  
Adjunct Faculty Member, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2012

Gladys Dupuy  
Clinical Assistant Professor, Obstetrics and Gynecology  
D.O., Nova Southeastern University, 1997

Debora Duro  
Clinical Associate Professor, Pediatrics  
M.D., Pontificia Universidade Catolica do Rio Grande do Sul, 1996  
M.S., Florida International University, 2000

Richard Dycus II  
Adjunct Assistant Professor, Physician Assistant Studies  
B.S., Stetson University, 1993  
M.B.S., Barry University, 1995  
D.O., Nova Southeastern University, 2000

Aason C. Earles  
Clinical Assistant Professor, Internal Medicine  
B.S., Marshall University, 2000  
M.S., Marshall University, 2002  
D.O., Pikeville College, 2008

Brian E. Earley  
Clinical Associate Professor, Family Medicine  
B.A., DePauw University, 1995  
D.O., Kirksville College of Osteopathic Medicine, 2000

Robert Easton  
Adjunct Clinical Assistant Professor, Optometry  
O.D., University of Houston, 1982

Albert H. Eaton  
Clinical Assistant Professor, Family Medicine  
B.S., Oregon College of Education, 1979  
M.Div., Bethel Theological Seminary, 1984  
Ph.D., Scholae Psychologicae Fullerianae, 1995
Pamela Ebmeier
Adjunct Clinical Assistant Professor, Optometry
O.D., University of Missouri at St. Louis, 1992
Pharm.D., University of Puerto Rico College of Pharmacy, 1998

Martha S. Echols
Clinical Assistant Professor, Medical Education
B.A., Cleveland State University, 1973
M.Ed., Ashland University, 1991
Ph.D., Ohio University, 1998

Christina M. Ecker
Clinical Assistant Professor, Pediatrics
B.S., Long Island University, 1994
D.O., Nova Southeastern University, 2005

David S. Edwards
Clinical Assistant Professor, Family Medicine
B.A., Tufts University, 2003
M.D., Tufts University, 2007

Parham Eftekhari
Clinical Assistant Professor, Nephrology
B.A., Emory University, 2000
M.S., Nova Southeastern University, 2002
D.O., Nova Southeastern University, 2006

Rachel S. Eidelman
Clinical Assistant Professor, Cardiology
B.S., Texas Lutheran College, 1992
M.D., University of Texas Medical Branch—Galveston, 1997

Shirley Ekwall
Adjunct Faculty, Nutrition
Ph.D., M.S., University of Cincinnati, 1978
M.S., University of California, 1996

Nicole B. Elharar
Adjunct Faculty Member, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2012

Matthew J. Elias
Clinical Assistant Professor, Dermatology
B.A., Tulane University, 1998
D.O., Nova Southeastern University, 2003

Trevor E. Elmquist
Clinical Associate Professor, Ophthalmology
B.A., University of South Florida, 1974
M.S., University of South Florida, 1977
D.O., University of Health Sciences College of Osteopathic Medicine, 1981

Andres Endara-Bravo
Clinical Assistant Professor, Internal Medicine
M.D., Pontificia Universidad Catolica del Ecuador, 2001

Norbert N. Engelman III
Clinical Assistant Professor, Family Medicine
B.S., Ohio State University, 1984
D.O., Ohio University College of Osteopathic Medicine, 1990

Glenn H. Englander
Clinical Assistant Professor, Internal Medicine
B.S., State University of New York at Buffalo, 1977
M.D., University of Vermont, 1982

Christine Englestad
Clinical Instructor, Preventive Medicine
B.S., University of Maryland, 1973
M.S., Florida Atlantic University, 2001

Ingrid Epelman De Dora
Adjunct Assistant Professor, Endodontics
D.D.S., University of Buenos Aires, 1993
Certificate—Endodontics, University of Buenos Aires, 2002
Certificate—Endodontics, Nova Southeastern University, 2009

Alan Epstein
Adjunct Clinical Instructor, Community Dentistry
D.D.S., Howard University, 1970

Mark Epstein
Clinical Associate Professor, Pediatrics
A.B., Harvard University, 1980
M.D., Mt. Sinai School of Medicine, 1984

Rudy Escarri
Clinical Assistant Professor, Internal Medicine
M.D., University of Miami School of Medicine, 1993

David Esguerra
Clinical Assistant Professor, Dermatology
B.A., Emory University, 1992
D.O., University of New England College of Osteopathic Medicine, 1997

Ricardo K. Espaillat
Clinical Assistant Professor, Psychiatry
B.S., Calasanz School, 1988
M.D., Technological Institute of Santo Domingo, 1988

Martha L. Espinoza
Adjunct Faculty, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2005

Yanick P. Eugene-Dauphin
Clinical Assistant Professor, Infectious Disease
M.D., National University of Haiti School of Medicine, 1979

Helen Ewing
Adjunct Associate Professor, Health Science
B.S.N., University of Calgary, 1990
M.S.N., University of Calgary, 1995
D.H.Sc., Nova Southeastern University, 2004

James Fabian
Adjunct Clinical Assistant Professor, Optometry
O.D., Northeastern University, New England College of Optometry, 2005

Stuart P. Farber
Clinical Assistant Professor, Surgery
B.A., George Washington University, 1971
M.D., George Washington University, 1975

David Farcy
Clinical Assistant Professor, Family Medicine
B.A., Texas Tech University, 1996
M.D., Universidad Autonoma de Guadalajara, 2000

Shahnaz Fatteh
Clinical Assistant Professor, Internal Medicine
B.A., Emory University, 1987
M.D., Medical College of Georgia, 1991
Ronald B. Fauer
Clinical Assistant Professor, Urology
B.A., Franklin and Marshall College, 1966
M.D., Columbia University College of Physicians and Surgeons, 1970

Hamid R. Feiz
Clinical Assistant Professor, Internal Medicine
M.D., Universidad Iberoamericana, 1999

Michael D. Feldman
Clinical Assistant Professor, Family Medicine
B.S., Temple University Pharmacy School, 1983
D.O., Southeastern University of the Health Sciences, 1987

Edward Fellows
Clinical Assistant Professor, Cardiology and Restorative Dentistry
D.D.S., McGill University, 1962

Maciej Ferenc
Clinical Assistant Professor, Family Medicine
B.S., University of Scranton, 1994
M.D., University of Medicine and Dentistry of New Jersey, 1998

Lisa A. Ferreira
Clinical Assistant Professor, Pediatrics
B.A., College of Holy Cross, 1984
D.O., Philadelphia College of Osteopathic Medicine, 1989

Michelle Ferreira
Clinical Assistant Professor, Neurology
B.S., Nova Southeastern University, 2002
D.O., Nova Southeastern University, 2006

Gustavo Ferrer-Gonzalez
Clinical Assistant Professor, Pulmonary Medicine
M.D., Superior de Ciencias Medicas de Santiago de Cuba, 1994

Raymond G. Ferrero III
Community Assistant Professor, Public Health
B.A., Florida State University, 1991
J.D., Nova Southeastern University, 1995

Bradley S. Feuer
Clinical Professor, Family Medicine
B.S., University of Miami, 1980
D.O., New York College of Osteopathic Medicine, 1986
J.D., University of Miami School of Law, 1990

Carolina E. Fiamengo
Clinical Assistant Professor, Pediatrics
M.D., La Pontificia Universidad Catolica del Ecuador, 2006

Charles Ficco
Adjunct Clinical Associate Professor, Optometry
B.A., Colorado College, 1989
O.D., Nova Southeastern University, 1995

Nicole Fields
Clinical Assistant Professor, Pediatrics
B.S., Hampton University, 2002
M.S., Hampton University, 2004
D.O., Philadelphia College of Osteopathic Medicine, 2008

Steven Fields
Clinical Associate Professor, Internal Medicine
B.A., Brown University, 1978
M.D., Hahnemann University, 1982

Fabrienne Figueroa
Adjunct Associate Professor, Periodontics
D.D.S., Universidad Central de Venezuela

Karem I. Figueroa
Clinical Assistant Professor, Internal Medicine
M.D., Universidad Nacional De Trujillo, 2005

Veronica Figueroa
Clinical Instructor, Obstetrics and Gynecology
B.S., University of Puerto Rico, 2000
M.D., Universitatis Portoricensis, 2006

Maria Fimiani
Adjunct Assistant Professor, Community Dentistry
Adjunct Faculty Member, Center for Psychological Studies
B.A., Auburn University, 1995
M.S., Nova Southeastern University, 1999
Psy.D., Nova Southeastern University, 2002

Howell Findley
Adjunct Clinical Associate Professor, Optometry
O.D., University of Alabama College of Optometry, 1981

Jaime Fine
Adjunct Professor, Occupational Therapy
B.S., University of Florida, 1994
M.S., University of Florida, 1996

Allen Finkelstein
Clinical Assistant Professor, Family Medicine
D.O., West Virginia College of Osteopathic Medicine, 1981

Mark S. Finkelstein
Clinical Associate Professor, Radiology
B.A., University of Miami, 1976
D.O., Philadelphia College of Osteopathic Medicine, 1980

Armanda Finley
Clinical Instructor, Internal Medicine
D.O., West Virginia School of Osteopathic Medicine, 2010

Ana I. Fins
Visiting Assistant Professor, Behavioral Science
M.S., University of Miami, 1990
Ph.D., University of Miami, 1994

Marco Fiore Urizar
Clinical Assistant Professor, Internal Medicine
M.D., Instituto Superior de Ciencias Medicas, 2003

Marsha J. Fishbane
Clinical Associate Professor, Pediatrics
Community Assistant Professor, Public Health
B.S., Pennsylvania State University, 1970
M.D., Jefferson Medical College, 1972

Mark S. Fishman
Clinical Assistant Professor, Physical Medicine and Rehabilitation
B.A., Clark University, 1997
D.O., New York College of Osteopathic Medicine, 2001
Dirk Fleischman  
Adjunct Clinical Instructor,  
Cariology and Restorative Dentistry  
D.D.S., Howard University, 1981

Douglas E. Flemons  
Clinical Professor, Family Medicine  
M.A., University of British Columbia, 1986  
Ph.D., Nova University, 1989

Barbara Florentine  
Clinical Associate Professor, Surgery  
B.S.N., Johns Hopkins University, 1979  
M.D., Tel Aviv University, 1988

Todd J. Florin  
Clinical Assistant Professor, Internal Medicine  
B.A., University of Pennsylvania, 1984  
M.D., New York University School of Medicine, 1988

Kerwyn L. Flowers  
Clinical Assistant Professor, Family Medicine  
D.O., Ohio University, 2007

Frank Foderaro  
Adjunct Faculty, Health Science  
B.S., Marietta College, 1985  
D.C., Southern California University of Health Science, 1989  
M.S., National University, 1999

Ilya Fonarov  
Clinical Assistant Professor, Internal Medicine  
B.S., Florida International University, 1993  
D.O., Nova Southeastern University, 2002

Ramon Fonseca  
Clinical Instructor, Pediatrics  
M.D., Autonomous University of Honduras, 1993

Julie Formoso-Onofrio  
Clinical Assistant Professor, Internal Medicine  
M.D., Universidad Central del Este, 1980

Larry Forness  
Adjunct Faculty, Health Science  
A.B., University of Notre Dame, 1968  
B.A., LaSalle Extension University, 1974  
M.A., Duke University, 1972  
M.B.A., LaSalle University, 1989  
LL.M., Washington University School of Law, 1997

Paul D. Forney  
Clinical Associate Professor, Family Medicine  
B.A., Yale University, 1971  
M.D., University of Maryland, 1975

Mark Forrest  
Clinical Associate Professor, Periodontology, Division of Surgical Sciences  
D.M.D., New York University College of Dentistry, 1967

Daniel Fortier  
Clinical Assistant Professor, Internal Medicine  
B.S., Brooklyn College, 1977  
M.D., State University of New York, 1981

Deirdre M. Foster  
Clinical Assistant Professor, Psychiatry  
B.S., University of Miami, 2002  
M.D., University of Florida, 2006

Gregory A. Foster  
Clinical Assistant Professor, Family Medicine  
B.A., Haverford College, 1980  
M.D., Emory University, 1986

Jean Foucauld  
Clinical Assistant Professor, Cardiology  
B.S., University of Puerto Rico, 1978  
M.D., University of Puerto Rico, 1982

Blakley A. Fowler  
Clinical Assistant Professor, Pediatrics  
B.S., University of North Alabama, 2003  
M.S., University of Mississippi, 2001  
M.D., University of Mississippi School of Medicine, 2007

Rosalyn R. Frazier  
Community Instructor, Public Health  
B.S., DePaul University, 1991

Gary Freedman  
Adjunct Associate Professor, Oral and Maxillofacial Surgery  
D.D.S., McGill University, 1964  
Certificate—Oral Surgery, University of Washington, 1967  
M.S., University of Washington, 1968

Ira Freedman  
Clinical Assistant Professor, Periodontology  
D.M.D., University of Pennsylvania College of Dental Medicine, 1982

Samuel M. Freedman  
Clinical Assistant Professor, Pediatrics  
B.S., University of Miami, 1984  
M.D., University of South Florida College of Medicine, 1988

Barry Freeman  
Adjunct Faculty, Audiology  
Ph.D., Michigan State University, 1975  
M.S., Emerson College, 1970  
B.S., Boston University, 1967

Elane Friedel  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., Emory University, 1974  
M.S., Emory University, 1976  
M.S., Nova Southeastern University, 1998

Sabrina Friedman  
Adjunct Faculty Member, College of Nursing  
B.S.N., University of Phoenix, 1994  
M.S.N.—A.P.R.N., University of Southern California, 1996  
Ed.D., Nova Southeastern University, 2005  
D.N.P., Rocky Mountain University of Health Professions, 2013

Jason H. Frost  
Clinical Professor, Surgery  
D.O., New York College of Osteopathic Medicine, 1987
Jarrod M. Frydman
Clinical Professor, Family Medicine
B.S., University of Florida, 1995
D.O., Lake Erie College of Osteopathic Medicine, 1999

Michael L. Funk
Adjunct Assistant Professor, Physician Assistant Studies
B.S./P.A., Nova Southeastern University, 1996
M.P.H., Nova Southeastern University, 1996
Fellow, American Academy of Physician Assistants

Carlos Gadia
Clinical Associate Professor, Pediatrics
M.D., Universidade Federal do Rio Grande do Sul, 1980

Michelle D. Gagnon-Blodgett
Clinical Assistant Professor, Geriatrics
B.A., Florida International University, 1992
M.S., Nova Southeastern University, 1995
Psy.D., Nova Southeastern University, 1998

Mirta Galante
Clinical Assistant Professor, Internal Medicine
M.D., Universidad De Buenos Aires, 1986

Robin S. Gall
Adjunct Faculty, Health Science
B.S., University of Central Florida, 1991
Ph.D., Emory University, 1996

Steven Gallas
Clinical Assistant Professor, Family Medicine
B.S., National University of Trujillo, 1972
D.O., Nova Southeastern University, 2007

Jorge Gallo
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., National University of Trujillo, 1972
M.D., National University of Trujillo, 1980

Lisa Galluzzo
Adjunct Clinical Associate Professor, Optometry
B.S., Adelphi University, 1990
O.D., State University of New York, 1993

Jason Galster
Adjunct Faculty, Audiology
B.S., Purdue University, 1999
M.S., Purdue University, 2001
Ph.D., Vanderbilt University, 2007

Jose E. Gamez
Clinical Instructor, Psychiatry
B.S., Colegio Javier, 1975
M.D., Universidad de Panama, 1982

Alice Gandell
Adjunct Faculty, Occupational Therapy
B.S., University of Illinois at Chicago, 1964

Jeffrey Ganeles
Adjunct Associate Professor, Periodontology
D.M.D., Boston University, 1983
Certificate—Periodontics, University of Pennsylvania, 1987

Richard Gans
Adjunct Professor, Audiology
B.A., University of Tampa, 1972
M.S., University of South Florida, 1978
Ph.D., Ohio State University, 1983

Isaac Garazi
Clinical Assistant Professor, Periodontology
D.M.D., Boston University Goldman School of Graduate Dentistry, 1983

Manuel A. Garcia
Clinical Instructor, Psychiatry
M.D., Santiago de Ciencias Medicas, 1983
B.S., Antonio Betancourt Flores, 1987

Jocelyn Garcia de Viera
Clinical Assistant Professor, Pediatrics
M.D., Universidad Central Del Este, 1992

Cristina Garcia-Godoy
Assistant Professor, Public Health
D.D.S., Universidad Iberoamericana, 2003
M.P.H., Nova Southeastern University, 2011

Robert A. Gardner
Clinical Assistant Professor, Surgery
M.D., State University of New York Medical Center, 1962
B.A., University of Rochester, 1966

Meir Gare
Clinical Assistant Professor, Cardiology
B.S., Hebrew University of Jerusalem, 1987
M.D., Hebrew University of Jerusalem, 1992

Lawrence I. Garter
Clinical Assistant Professor, Pediatrics
B.S., Emory University, 1985
M.D., University of Miami School of Medicine, 1991

Judith Gartner
Assistant Professor, Prosthodontics
D.D.S., Universidad Central de Venezuela, 1993
Certificate—Prosthodontics, Harvard University, 1997
M.M.Sc., Harvard University, 1997
D.M.D., Nova Southeastern University, 2001

Lanny Garver
Clinical Assistant Professor, Oral and Maxillofacial Surgery
D.M.D., University of Pennsylvania, 1967

Roman Gastesi
Clinical Assistant Professor, Hematology/Oncology
B.S., Mariano Institute, 1953
M.D., University of Madrid, 1962

Kamini Geer
Clinical Associate Professor, Family Medicine
B.S., Sophie Davis School, 1999
M.D., Albany Medical College, 2001
M.P.H., Mailman School of Public Health, 2006

Harris Gellman
Clinical Professor, Orthopedic Surgery
B.S., Temple University, 1974
M.D., Temple University Medical School, 1979
Joel Gellman  
Clinical Assistant Professor, Cardiology  
M.D., University of the Witwatersrand, 1985

Barry Gelman  
Clinical Associate Professor, Pediatrics  
B.S., University of Miami, 1984  
M.D., University of Florida College of Medicine, 1988

Nikerson Geneve  
Clinical Assistant Professor, Family Medicine  
B.A., Florida International University, 2002  
D.O., Nova Southeastern University, 2006

Sergey Gerasin  
Clinical Assistant Professor, Internal Medicine  
M.D., Military Medical Academy, 2000

Rani S. Gereige  
Clinical Professor, Pediatrics  
B.S., American University of Beirut, 1985  
M.D., American University of Beirut, 1989  
M.P.H., University of South Florida, 1998

Dianne T. Gerrity  
Clinical Assistant Professor, Pediatrics  
B.S., United States Naval Academy, 1990  
M.D., Universitas St. Ludouici, 1998

Michael F. Gervasi  
Clinical Professor, Family Medicine  
B.A., Florida Atlantic University, 1983  
D.O., Southeastern University of the Health Sciences, 1987

Marco Ghignone  
Clinical Associate Professor, Anesthesiology  
M.D., University of Torino, 1973  
M.B.A., University of Miami, 1990

Arnoldo Ghitis  
Clinical Assistant Professor, Cardiology  
M.D., La Universidad del Valle, 1982

Joseph A. Giaino  
Clinical Associate Professor, Pulmonary Medicine  
B.S., Ursinus College, 1983  
D.O., Philadelphia College of Osteopathic Medicine, 1987

F. Gary Gieske  
Clinical Assistant Professor, Surgery  
A.B., Vanderbilt University, 1957  
M.D., University of Indiana Medical School, 1961

Jerry M. Gilles  
Clinical Associate Professor, Obstetrics and Gynecology  
M.D., State University of New York, 1990

Richard Clark Gillett  
Clinical Associate Professor, Family Medicine  
B.A., University of Virginia, 1971  
M.D., University of Virginia School of Medicine, 1977

James C. Gilmore  
Clinical Assistant Professor, Surgery  
B.S., Millsaps College, 1975  
M.D., University of Mississippi, 1980  
M.B.A., Auburn University, 2006

Ira Ginsberg  
Adjunct Assistant Professor, Periodontology  
D.D.S., New York University, 1971  
Certificate—Periodontology, New York University, 1974

James Ginzler  
Adjunct Clinical Instructor, Orthodontics,  
Division of Developmental Sciences  
D.D.S., University of Detroit Dental School, 1972  
M.S., Orthodontics University of Michigan Rackham Graduate Program, 1976

Sandra Giraldo Perez  
Adjunct Faculty Member, College of Nursing  
B.A., Barry University, 2004  
B.S.N., Barry University, 2008  
M.S.N., Barry University, 2013  
D.N.P., Barry University, 2013

Geeta Girdher  
Adjunct Clinical Assistant Professor, Optometry  
O.D., University of Houston College, 2006

Concetta Giuliano  
Clinical Assistant Professor, Radiology  
B.S., Chestnut Hill College, 1991  
D.O., Philadelphia College of Osteopathic Medicine, 1995

Vincenza Giuliano  
Clinical Assistant Professor, Radiology  
B.A., La Salle University, 1988  
M.D., Pennsylvania State University, 1992

David Glassman  
Clinical Assistant Professor, Periodontology  
D.D.S., Medical College of Virginia School of Dentistry, 1966

Paul S. Glassman  
Clinical Assistant Professor, Family Medicine  
D.O., University of Health Sciences College of Osteopathic Medicine, 1961

Todd Glassman  
Clinical Assistant Professor, Family Medicine  
B.A., Florida International University, 1991  
D.O., Nova Southeastern University, 1996

John M. Goad  
Clinical Assistant, Internal Medicine  
B.S., Virginia Technical, 2003  
D.O., Edward Via Virginia College of Osteopathic Medicine, 2007

Wagih W. Gobriel  
Clinical Assistant Professor, Anesthesiology, Pain Medicine  
M.D., Ain Shams University, 1975

Sangita A. Gogate  
Clinical Associate Professor, Family Medicine  
B.S., Otterbein College, 1986  
D.O., University of Osteopathic Medicine and Surgery, 1993

Francis A. Goiran  
Clinical Instructor, Pediatrics  
B.S., University of Arizona, 1988  
B.S., University of Florida, 1996  
M.P.A., University of Nebraska, 2005
Aaron Gold
Adjunct Clinical Instructor, Optometry

Robert G. Gold
Clinical Assistant Professor, Urology
B.S., Tulane University College of Arts and Sciences, 1977
M.D., Tulane University School of Medicine, 1981

Alison Goldberg
Adjunct Faculty Member, Department of Speech-Language Pathology
B.S., University of South Florida, 1993
M.S., Nova Southeastern University, 1997

Dean R. Goldberg
Clinical Instructor, Surgery
B.A., University of Miami, 1989
D.O., Nova Southeastern University, 1995

Douglas Goldberg
Adjunct Instructor, Cariology and Restorative Dentistry
D.M.D., University of Florida, 1987

Howell Goldberg
Adjunct Instructor, Cariology and Restorative Dentistry
D.D.S., New York University, 1974

Lee D. Goldberg
Clinical Professor, Internal Medicine
B.S., Yale University, 1959
M.D., Yale University, 1963

Alan Goldenberg
Clinical Assistant Professor, Internal Medicine
B.S., State University of New York
M.D., State University of New York, 1993

Ronald Goldin
Clinical Assistant Professor, Nephrology
B.S., Yale University, 1992
M.D., University of Florida, 1996

Jennifer M. Goldman
Clinical Assistant Professor, Family Medicine
B.A., McGill University, 2000
D.O., Philadelphia College of Osteopathic Medicine, 2004

Eric A. Goldsmith
Clinical Assistant Professor, Surgery
B.A., New York University, 1974
M.S., Long Island University, 1980
D.O., University of Osteopathic Medicine and Health Sciences, 1984

Jessica Goldstein
Clinical Instructor, Family Medicine
B.S., University of Central Florida, 2004
D.O., Nova Southeastern University, 2008

Matthias Goldstein
Adjunct Assistant Professor, Health Science
B.A., University of Maryland, 1989
B.T.L., Ner Israel Rabbinical College, 1990
B.S., The George Washington University, 1997
M.P.A.S., University of Nebraska, 1998
D.H.Sc., Nova Southeastern University, 2005

Mitchell Goldstein
Clinical Assistant Professor, Family Medicine
B.S., Northern Illinois University, 1974
D.O., Chicago College of Osteopathic Medicine, 1978

Shepard Goldstein
Adjunct Associate Professor, Endodontics
D.M.D., Tufts University, 1966

Jack M. Goloff
Clinical Assistant Professor, Family Medicine
B.S., University of Central Florida, 1981
D.O., Southeastern University of the Health Sciences, 1985

Luis E. Gomez
Clinical Assistant Professor, Family Medicine
B.A., Cornell University, 1984
M.D., Mount Sinai School of Medicine, 1993

Ricardo Gomez
Adjunct Instructor, Biomedical Informatics
B.S., Barry University, 2005
M.S., Nova Southeastern University, 2008

Faustino Gonzalez
Clinical Assistant Professor, Internal Medicine
M.D., Universidad Central Del Este, 1982

Jamyes R. Gonzalez
Clinical Assistant Professor, Psychiatry
B.A., University of Alaska, 2001
Ph.D., University of Alaska, 2012

Maria R. Gonzalez
Clinical Assistant Professor, Family Medicine
M.D., Autonomous University of Santo Domingo, 1998

Michelle Gonzalez
Adjunct Clinical Assistant Professor, Optometry
O.D., Nova Southeastern University, 2009

Miguel Angel Gonzalez
Clinical Assistant Professor, Obstetrics and Gynecology
M.D., Universidad Central, 1968

Rene D. Gonzalez
Clinical Assistant Professor, Internal Medicine
M.D., Universidad Catolica Madre y Maestra, 1982

Menayra C. Gonzalez-Olivares
Clinical Instructor, Pediatrics
B.S., University of Puerto Rico, 1986
M.D., Ponce School of Medicine, 1990

Vladislav Gorbatiy
Clinical Instructor, Urology
B.S., Texas A&M University, 1986
M.D., Emory University, 2005

Antonio M. Gordon
Clinical Professor, Internal Medicine
B.S., John Carroll University, 1966
M.S., University of Miami, 1969
Ph.D., Florida State University, 1971
M.D., Emory University, 1975
Marilyn S. Gordon
Clinical Assistant Professor, Family Medicine
Adjunct Assistant Professor, Nutrition
Adjunct Assistant Professor, Public Health
B.S., Florida International University, 1987
M.S., Florida Atlantic University, 1998
Ed.D., Florida International University, 2008

Mark W. Gordon
Clinical Associate Professor, Surgery
B.S., Ursinus College, 1963
M.D., Jefferson Medical College, 1967

Maria A. Gorelick
Clinical Instructor, Psychiatry
M.D., Universidad Cetec, 1982

Steven Gorin
Clinical Assistant Professor, Surgery
B.S., Sargent College, 1994
D.O., Nova Southeastern University, 2000

Kyle R. Gormezano
Clinical Assistant Professor, Radiology
B.A., Lehigh University, 1987
M.D., State University of New York, 1993

Douglas Gotlin
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., University of Florida, 1985
D.O., Southeastern University of the Health Sciences, 1990

Jay S. Gottlieb
Clinical Professor, Dermatology
Clinical Associate Professor, Otorhinolaryngology
B.S., University of Michigan, 1974
D.O., University of Health Sciences, 1977

Deborah Gracia
Clinical Assistant Professor, Internal Medicine
B.S., University of Florida, 1992
D.O., Philadelphia College of Osteopathic Medicine, 1999

Daniel Gracie
Adjunct Faculty Member, College of Nursing
B.S.N., Mountain State University, 2003
M.S.N., The Medical University of South Carolina, 2009
D.N.P., The Medical University of South Carolina, 2012

Jeremy R. Graham
Clinical Instructor, Family Medicine
B.S., Mississippi State University, 2002
D.O., Pikeville College School of Osteopathic Medicine, 2006

Susan V. Grammond
Clinical Instructor, Preventive Medicine
B.S., College of St. Scholastic, 1976
M.P.H., University of Illinois, 1986

Alfred M. Grasso
Clinical Instructor, Preventive Medicine
B.S., Westminster State College, 1979

Kenneth Greenberg
Clinical Assistant Professor, Psychiatry
M.D., Guadalaxarensis Universitas Autonoma, 1982

Mark Greenberg
Clinical Assistant Professor, Prosthodontics,
Division of Primary Care
D.D.S., Temple University, 1968

Scott M. Greenberg
Clinical Assistant Professor, Orthopedic Surgery
B.S., Duke University, 1998
D.O., Nova Southeastern University, 2003

Bruce D. Greene
Clinical Assistant Professor, Radiology
B.S., University of Florida, 1976
M.D., University of South Florida, 1979

Sharon L. Greene
Clinical Instructor, Preventive Medicine
B.S., Florida State University, 1983

James Greenstone
Adjunct Professor, Disaster and Emergency Management
B.A., University of Oklahoma, 1965
M.S., North Texas State University, 1966
Ed.D., University of North Texas, 1974

Deborah Greer
Clinical Assistant Professor, Family Medicine
B.S.N., University of Central Florida, 2002
M.S.N., University of Central Florida, 2004
D.N.P., University of South Florida, 2008

Jonathan M. Greer
Clinical Assistant Professor, Internal Medicine
A.B., Oberlin College, 1979
M.D., University of Florida College of Medicine, 1983

Robert C. Greer IV
Clinical Associate Professor, Family Medicine
B.S., Texas Christian University, 1973
D.O., Philadelphia College of Osteopathic Medicine, 1977
Fellow, American College of Osteopathic Family Physicians

Margaret I. Grell
Clinical Assistant Professor, Pediatrics
B.S., University of the West Indies, 1980
M.D., University of the West Indies, 1986

Eitan Gross
Adjunct Faculty Member, Pediatric Dentistry
D.M.D., University of Pennsylvania School of Dental Medicine, 2011

Martin B. Grossman
Clinical Associate Professor, Surgery
B.S., Muhlenberg College, 1966
M.D., Chicago Medical School, 1970

Jeffrey Grove
Clinical Professor, Family Medicine
B.S., Florida Southern College, 1986
D.O., Southeastern University of the Health Sciences, 1990

Adam J. Grunbaum
Clinical Assistant Professor, Internal Medicine
B.S., Florida State University, 1998
D.O., Nova Southeastern University, 2004
Paul Grusso  
Adjunct Clinical Assistant Professor, Optometry  
O.D., State University of New York, College of Optometry, 1999

Vito Guarino  
Adjunct Clinical Associate Professor, Optometry  
B.S., University of South Florida, 1984  
O.D., Southern College of Optometry, 1988

Ralph Guarneri  
Clinical Associate Professor, Surgery  
B.A., State University of New York—Stony Brook, 1978  
M.D., State University of New York College of Medicine, 1985

Francia Guerrero  
Clinical Assistant Professor, Internal Medicine  
M.D., La Universidad Libre, 1999

Georges C. Guerrier  
Clinical Assistant Professor, Pediatrics  
M.D., State University of Hawaii School of Medicine and Pharmacy, 1980

Kettley Guerrier  
Clinical Assistant Professor, Family Medicine  
M.D., State University of Hawaii School of Medicine and Pharmacy, 1980

Amanda Guest  
Adjunct Faculty Member, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2012

Manjit S. Gulati  
Clinical Assistant Professor, Nephrology  
M.D., Ranchi University, 1979

Gregory G. Gulick  
Clinical Assistant Professor, Internal Medicine  
D.O., Nova Southeastern University, 2003

Robert J. Gulinier  
Clinical Professor, Ophthalmology  
B.A., Hunter College, 1970  
D.O., University of Health Sciences College of Osteopathic Medicine, 1974

Neena Gupta  
Clinical Associate Professor, Family Medicine  
B.S., Iowa State University, 1976  
D.O., University of Osteopathic Medicine and Surgery, 1983

Samuel A. Gurevich  
Clinical Assistant Professor, Pulmonary Medicine  
B.A., Johns Hopkins University, 1995  
M.D., Universitas Brunensis, 1999

Nestor Guzman  
Assistant Professor, Prosthodontics  
D.D.S., Universidad Javeriana Bogota Colombia, 1983  
D.M.D., Nova Southeastern University, 2004

Tamara Guzman  
Clinical Instructor, Family Medicine  
M.D., Universidad Autonoma de Guadalajara, 2002

Sartiza Guzman-Sardina  
Adjunct Faculty, Occupational Therapy  
B.S., University of Puerto Rico, 1981  
M.Ed., National-Louis University, 2000

Kandace L. Haines  
Adjunct Clinical Instructor, Optometry  
B.S., University of South Florida, 2004  
O.D., Nova Southeastern University, 2011

Martin E. Hale  
Clinical Assistant Professor, Orthopedic Surgery  
B.A., Columbia University, 1974  
M.D., State University of New York—Buffalo, 1980

Charles Halfpenny  
Clinical Assistant Professor, Internal Medicine  
B.S., Drexel University, 1959  
M.D., Hahneman Medical College, 1963

Anthony J. Hall  
Clinical Assistant Professor, Surgery  
M.D., Universitas McGill, 1988

James N. Hall  
Community Instructor, Public Health  
B.A., West Virginia Wesleyan College, 1966

Leslie Haller  
Adjunct Faculty Member, Oral Medicine  
D.M.D., Harvard School of Dental Medicine, 1992

John Halpern  
Clinical Associate Professor, Family Medicine  
B.A., State University of New York—Binghamton, 1980  
D.O., New York College of Osteopathic Medicine, 1985

Edward W. Halpren  
Clinical Assistant Professor, Obstetrics and Gynecology  
B.S., State University of New York—Albany, 1977  
D.O., New York College of Osteopathic Medicine, 1982

Maxine E. Hamilton  
Clinical Associate Professor, Internal Medicine  
M.D., University of the West Indies, 1982

Ding Han  
Visiting Faculty Member, Optometry  
M.D., Tianjian Medical University

Usama Hanhan  
Clinical Assistant Professor, Pediatrics  
M.D., University of Jordan Medical School, 1983

Brady Hanlon  
Adjunct Assistant Professor, Optometry

Megan L. Hanley  
Adjunct Faculty Member, Pharmacy Practice  
B.S., University of Florida, 2003  
Pharm.D., Nova Southeastern University, 2007
Andrew J. Hanly  
Clinical Assistant Professor, Surgery  
M.D., University College Galway Medical School, 1991

Ashraf Hannan  
Clinical Assistant Professor, Anesthesiology  
M.D., University of Ain Shams, 1986

Dennis E. Hanney  
Clinical Associate Professor, Cardiology  
B.A., Hofstra University, 1971  
M.A., Hollins College, 1972  
D.O., Kirksville College of Osteopathic Medicine, 1976

Andrew Hano  
Clinical Assistant Professor, Hematology/Oncology  
B.A., Northwestern University, 1973  
D.O., College of Osteopathic Medicine and Surgery, 1977

Ryan Hargreaves  
Adjunct Clinical Associate Professor, Optometry  
O.D., New England College of Optometry, 1996

John N. Harker  
Clinical Associate Professor, Orthopedic Surgery  
D.O., Southeastern University of the Health Sciences, 1989

Martin Harland  
Clinical Assistant Professor, Family Medicine  
B.S., University of Florida, 1983  
D.O., Southeastern University of the Health Sciences, 1988

Carlos J. Haro  
Clinical Assistant Professor, Family Medicine  
B.S., University of Miami, 1998  
M.S., Nova Southeastern University, 1999  
D.O., Nova Southeastern University, 2003

Meredith P. Harold  
Adjunct Faculty Member, Department of Speech-Language Pathology  
Ph.D., University of Kansas, 2011

Richard M. Harrell  
Clinical Assistant Professor, Internal Medicine  
A.B., University of North Carolina, 1975  
M.D., University of North Carolina—Chapel Hill, 1979

Catherine Harrington  
Adjunct Faculty Member, Sociobehavioral and Administrative Pharmacy  
B.S., Wayne State University, 1977  
Pharm.D., University of Michigan, 1987  
Ph.D., University of Michigan, 1993

Michael Harris  
Adjunct Assistant Professor, Oral and Maxillofacial Surgery  
D.M.D., University of Pennsylvania, 2001  
Certificate—Oral Maxillofacial Surgery, Nova Southeastern University, 2005

Philip L. Harris  
Clinical Associate Professor, Surgery  
B.S., Muhlenberg College, 1978  
M.D., Pennsylvania State University College of Medicine, 1982

Leigh Hart  
Adjunct Faculty Member, College of Nursing  
B.S.N., Medical College of Georgia, 1986  
M.S.N., Albany State University, 1995  
Ph.D., Barry University, 2000

Mary B. Hart  
Clinical Assistant Professor, Internal Medicine  
B.S., St. Lawrence University, 1979  
M.D., Tufts University, 1983

Mian A. Hasan  
Clinical Assistant Professor, Cardiology  
M.D., King Edward Medical College, 1990

Robert T. Hasty  
Adjunct Associate Professor, Biomedical Informatics  
Clinical Associate Professor, Internal Medicine  
B.S., University of Miami, 1996  
D.O., Nova Southeastern University, 2000

Daniel K. Hatton  
Adjunct Professor, Biomedical Informatics  
B.A., California State University, 1972  
M.S., American University, 1985  
Ph.D., Nova University, 1991

Kay E. Haw  
Adjunct Assistant Professor, Health Science  
B.S.N., Towson State University, 1993  
M.S., Central Michigan University, 1999  
D.H.Sc., Nova Southeastern University, 2006

Michael Hawley  
Clinical Instructor, Internal Medicine  
B.A., Westminster College, 2002  
D.O., Pikeville College of Osteopathic Medicine, 2009

Anna Hayden  
Clinical Associate Professor, Community Medicine  
B.S., Seton Hall University, 1983  
D.O., University of the Health Sciences College of Osteopathic Medicine, 1988

David W. Hays  
Adjunct Associate Professor, Biomedical Informatics  
B.S., State University New York, 1982  
M.A., Central Michigan University, 1984  
D.P.A., Nova University, 1992

Steve Heiden  
Adjunct Clinical Assistant Professor, Optometry  
O.D., University of California College of Optometry, 1972

Andrew Hein  
Clinical Assistant Professor, Family Medicine  
B.S., California State University, 2004  
D.O., Nova Southeastern University, 2009

Lori Heisler  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Brock University, 1986  
M.Sc., Dalhousie University, 1999  
Ph.D., Purdue University—West Lafayette, 2004
Allen Helfer  
Adjunct Assistant Professor, Endodontics,  
Division of Surgical Sciences  
D.D.S., Columbia University, 1961

David C. Hellman  
Clinical Assistant Professor, Internal Medicine  
D.O., Southeastern University of the Health Sciences, 1988

David Hendrix  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Nova Southeastern University, 2001

Charles H. Hennekens  
Clinical Professor, Preventive Medicine  
B.S., Queens College, 1963  
M.D., Cornell University Medical College, 1967  
M.S., Harvard School of Public Health, 1973  
Dr.P.H., Harvard School of Public Health, 1975

Christel Henseler  
Adjunct Assistant Professor, Health Science  
M.S., Florida International University, 1990  
Ph.D., Florida International University, 2003

Hantz C. Hercule  
Clinical Assistant Professor, Correctional Medicine  
B.A., Manhattan College, 1989  
M.D., Universidad Central del Este, 1996

Baron Herford  
Clinical Assistant Professor, Internal Medicine  
D.O., University of Pikeville—Kentucky College of Osteopathic Medicine, 2008

Frederick N. Herman  
Clinical Assistant Professor, Surgery  
M.D., University of Miami School of Medicine, 1977

Richard Herman  
Adjunct Faculty, Endodontics, Division of Surgical Sciences  
D.D.S., New York University, 1966

Carlos E. Hernandez  
Clinical Instructor, Pediatrics  
M.D., Universidad Autonoma de Guadalajara, 1988

Joel Hernandez  
Clinical Assistant Professor, Family Medicine  
B.S., Carlos Chessalle College Institute, 1984  
M.D., Instituto Superior de Ciencias Medicas de Villa Clara, 1990

Julie Hernandez  
Adjunct Clinical Hygienist Instructor, Periodontology,  
Division of Surgical Sciences  
A.S., Broward Community College, 1999  
B.S., University of Massachusetts, 1991

Mayrene Hernandez  
Clinical Assistant Professor, Family Medicine  
B.S., Florida International University, 1993  
D.O., Nova Southeastern University, 2001

Marlow Hernandez  
Clinical Instructor, Internal Medicine  
Community Instructor, Public Health  
B.S., University of Miami, 2007  
M.P.H., Nova Southeastern University, 2010  
M.B.A., Nova Southeastern University, 2011  
D.O., Nova Southeastern University, 2011

Ana Hernandez-Puga  
Clinical Assistant Professor, Pediatrics  
B.A., Florida International University, 1990  
M.D., University of Miami, 1994

Charles Herrera  
Clinical Associate Professor, Geriatrics  
M.D., Universitas Hahnemannensis, 1978

Stuart H. Hershman  
Clinical Instructor, Orthopedic Surgery  
M.D., Universitas Drexelis, 2006

Kenneth Herskowitz  
Clinical Assistant Professor, Surgery  
B.S., Tulane University, 1982  
M.D., Baylor College of Medicine, 1986

Valerie Herskowitz  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., University of Miami, 1977  
M.A., University of Miami, 1978

Jorge Herras  
Adjunct Professor, Prosthodontics  
D.D.S., Central University of Ecuador

Kerri-Ann Hew  
Clinical Instructor, Family Medicine  
B.S., Florida International University, 2002  
M.S., Nova Southeastern University, 2004  
D.O., Nova Southeastern University, 2008

Daniel R. Higgins  
Clinical Associate Professor, Surgery  
B.S., Massachusetts Institute of Technology, 1977  
M.D., University of Pennsylvania School of Medicine, 1980

Bobby W. Hill  
Clinical Assistant Professor, Family Medicine  
B.A., LaGrange College, 1973  
D.O., Kansas City College of Osteopathic Medicine, 1976

Howard Hill  
Adjunct Associate Professor, Pediatric Dentistry  
D.D.S., University of North Carolina, 1968  
M.S., University of North Carolina, 1970  
Certificate—Orthodontics, Charlotte, North Carolina, 1982

Wanda N. Hill  
Clinical Assistant Professor, Psychiatry  
B.S., University of North Alabama, 2000  
M.S.N., University of South Alabama, 2003  
D.N.P.—A.R.N.P., University of Alabama, 2010

Stuart Himmelstein  
Clinical Assistant Professor, Internal Medicine  
M.D., Hahnemann University School of Medicine, 1987
Norman Hirsch
Adjunct Professor, Pediatric Dentistry
D.D.S., New York University, 1963
Certificate—OMFS, The City Hospital, 1964
Pediatric Eastman Dental Center New York, 1967

Marc J. Hirsh
Clinical Assistant Professor, Internal Medicine
B.S., University of Florida, 1992
M.D., University of Florida, 1996

Kimberly Ho
Adjunct Faculty Member, Department of Speech-Language Pathology
B.A., Boston College, 1994
M.S., Purdue University—West Lafayette, 1997
Ph.D., Purdue University—West Lafayette, 2000

Lauren J. Hochman
Adjunct Clinical Hygienist, Periodontology
Hygienist, New York University, 1988

Leonard R. Hock, Jr.
Clinical Assistant Professor, Geriatrics
B.S., Central State University, 1972
D.O., Kansas City College of Osteopathic Medicine, 1976

Jonathan D. Hoffberger
Clinical Assistant Professor, Surgery
B.S., Tulane University, 1992
D.O., Nova Southeastern University, 1996

Charles E. Hoffler II
Clinical Assistant Professor, Surgery
B.S., Cornell University, 1994
Ph.D., University of Michigan, 2006
M.D., University of Michigan, 2006

Kent Hoffman
Clinical Assistant Professor, Family Medicine
D.O., Chicago College of Osteopathic Medicine, 1988

Michael Hoffmann
Clinical Professor, Internal Medicine
M.D., University of Natal, 1998
Ph.D., University of Kwazulu-Natal, 2014

Mitchel S. Hoffman
Clinical Assistant Professor, Internal Medicine
B.A., Wesleyan University, 1975
M.P.H., Columbia University School of Public Health, 1979
M.D., New York Medical College, 1981

Thomas Hoffman, Jr.
Clinical Assistant Professor, Internal Medicine
B.S., University of Notre Dame, 1986
M.D., University of Miami School of Medicine, 1990

Daniel J. Hogan
Clinical Professor, Dermatology
M.D., Dalfhouse University College of Medicine, 1976

John Holgerson
Adjunct Assistant Professor, Disaster and Emergency Management
B.A., Florida Atlantic University, 1994
M.B.A., New York Institute of Technology, 1996

Christopher P. Hollowell
Clinical Assistant Professor, Surgery
B.A., Wayne State University, 1989
M.D., Wayne State University, 1993

Gretchen Holmes
Clinical Assistant Professor, Medical Education
B.S., New York University, 1993
Ph.D., University of Kentucky, 2003

Chanda Nicole Holsey
Adjunct Faculty, Health Science
B.A., San Diego State University, 1993
M.P.H., Rollins School of Public Health at Emory University, 1996
Dr.P.H., University of Alabama—Birmingham School of Public Health, 2005

Robert B. Holtzman
Clinical Assistant Professor, Surgery
B.A., Columbia University, 1976
M.D., City College of New York, 1980

Allen Horowitz
Clinical Assistant Professor, Periodontology,
Division of Surgical Sciences
D.D.S., University of Michigan School of Dentistry, 1968

Firaz R. Hosein
Clinical Assistant Professor, Internal Medicine
B.S., Barry University, 1996
D.O., Nova Southeastern University, 2000

Douglas K. Hoverkamp
Clinical Assistant Professor, Psychiatry
B.S., St. George's University, 1999
M.D., St. George's University, 2003

Donald C. Howard
Clinical Assistant Professor, Family Medicine
B.A., University of South Florida, 1980
D.O., Southeastern University of the Health Sciences, 1985

Lydia H. Howard
Clinical Assistant Professor, Pathology
B.S., Florida International University, 1976
M.D., University of Florida College of Medicine, 1990

Jimmy C. Huang
Clinical Assistant Professor, Family Medicine
B.S., Cornell University, 1995
D.O., Nova Southeastern University, 2001

Kurt K. Hubbard
Adjunct Faculty, Occupational Therapy
A.A., Suffolk County Community College, 1991
B.A., State University of New York, 1993
M.A., Farleigh Dickinson University, 1997
M.S., Columbia University, 2000
O.T.D., University of St. Augustine, 2006
Ph.D., Northcentral University, 2015

Hans E. Hubsch
Clinical Assistant Professor, Pediatrics
M.D., Universidad de Carabobo, 1992

Clinical Assistant Professor, Internal Medicine  
M.D., University of Delhi, 1980

Laszlo J. Karai  
Clinical Assistant Professor, Dermatology  
M.D., Ph.D., Albert Szent-Gyorgyi Medical University, 1994  
Ph.D., University of Szeged, 2004

Ehsanul Karim  
Clinical Assistant Professor, Internal Medicine  
M.D., Chittagong Medical College, 1992

Elaine Karis  
Clinical Assistant Professor, Internal Medicine  
B.A., Barnard College, 1999  
M.D., State University of New York, 2004

Helena J. Karnani  
Clinical Assistant Professor, Family Medicine  
M.D., Birmingham University Medical School, 1980

Ethan Kass  
Clinical Assistant Professor, Psychiatry  
B.S., Syracuse University, 1979  
D.O., University of Medicine and Dentistry of New Jersey, 1983  
M.B.A., Florida Atlantic University, 2002

Charles H. Kates  
Clinical Associate Professor, Family Medicine  
A.B., Indiana University, 1961  
M.D., Indiana University, 1965

Michael J. Katin  
Clinical Associate Professor, Radiology  
B.A., University of Pennsylvania College of Arts and Sciences, 1969  
M.D., University of Pennsylvania Medical School, 1972

Ronald Katz  
Adjunct Faculty, Oral and Maxillofacial Surgery  
D.M.D., Tufts University, 1999

Himangi Kaushal  
Clinical Assistant Professor, Internal Medicine  
M.D., Government Medical College, 1999

David J. Kay  
Clinical Assistant Professor, Otolaryngology  
B.A., Yeshiva University, 1992  
M.D., University of Pennsylvania School of Medicine, 1997  
M.P.H., University of Pittsburgh, 2004

Sonia F. Kay  
Visiting Assistant Professor, Occupational Therapy  
B.S., University of Florida, 1975  
M.H.S., University of Florida, 1976  
Ph.D., Nova Southeastern University, 2001

Walter J. Kay  
Clinical Assistant Professor, Family Medicine  
B.S., Providence College, 1973  
D.O., Kirksville College of Osteopathic Medicine, 1977

Scott D. Kazdan  
Clinical Assistant Professor, Orthopedic Surgery  
B.S., Tulane University, 1985  
D.O., Southeastern University of the Health Sciences, 1991

Todd J. Kazdan  
Clinical Assistant Professor, Family Medicine  
B.A., Florida International University, 1995  
D.O., Philadelphia College of Osteopathic Medicine, 1999

Jeffrey G. Keiser  
Community Professor, Public Health  
B.A., Florida Atlantic University, 1991  
B.S., Florida Atlantic University, 1993

Carl Keldie  
Clinical Assistant Professor, Surgery  
B.A., University of South Florida, 1975  
M.D., University of South Florida, 1978

Mark R. Keller  
Clinical Assistant Professor, Internal Medicine  
B.S., University of Maryland College Park, 1978  
M.D., University of Maryland School of Medicine, 1982

Nathaniel A. Keller  
Clinical Assistant Professor, Psychiatry  
B.S., Union College, 1991  
M.D., Tel Aviv University, 1996
Scott T. Keller  
Clinical Assistant Professor, Family Medicine  
A.B., West Virginia University, 1975  
D.O., West Virginia School of Osteopathic Medicine, 1979

David N. Kenigsberg  
Clinical Assistant Professor, Cardiology  
B.S., University of Miami, 1995  
M.D., University of Miami School of Medicine, 1999

Karen T. Kennedy  
Clinical Assistant Professor, Anesthesiology  
B.S., Eckerd College, 1988  
D.O., Southeastern University of the Health Sciences, 1992

Scott Kennedy  
Clinical Assistant Professor, Internal Medicine  
B.A., University of Iowa, 1975  
M.D., University of Iowa, 1979

Patrick Kenney  
Clinical Assistant Professor, Internal Medicine  
B.S., University of Rhode Island, 2003  
D.O., Nova Southeastern University, 2008

Daniel Kesden  
Clinical Assistant Professor, Internal Medicine  
B.A., University of Chicago, 1966  
M.D., University of Miami, 1971

Stanley Kessel  
Assistant Professor, Orthodontics  
B.S., Ohio State University, 1946  
D.O., Southeastern University of the Health Sciences, 1950

Kevin J. Kessler  
Clinical Assistant Professor, Orthopedic Surgery  
Clinical Assistant Professor, Sports Medicine  
B.S., University of Health Sciences  
M.D., University of Health Sciences  
D.O., Chicago Medical School, 1987

William T. Keweshan  
Clinical Associate Professor, Family Medicine  
B.S., Villanova University, 1966  
D.O., Philadelphia College of Osteopathic Medicine, 1970

Aunali Khaku  
Clinical Assistant Professor, Internal Medicine  
B.S., Lehigh University, 2005  
M.D., University of Rochester, 2009

Husman Khan  
Clinical Assistant Professor, Internal Medicine  
B.S., Agra University, 1972  
M.P.H., Florida International University, 1994

Khalil A. Khan  
Clinical Assistant Professor, Internal Medicine  
B.A., Emory University, 1997  
M.P.H., Nova Southeastern University, 2004  
D.O., Nova Southeastern University, 2004

Rabia H. Khan  
Clinical Assistant Professor, Internal Medicine  
B.S., Nova Southeastern University, 2001  
D.O., Nova Southeastern University, 2004

Monica Kharbanda  
Clinical Assistant Professor, Pediatrics  
M.D., Government Medical College, 1993

Jhawed Khayoumi  
Clinical Assistant Professor, Internal Medicine  
B.A., Temple University, 1985  
M.D., University of Medicine and Dentistry of New Jersey, 1992

Mary J. King  
Clinical Assistant Professor, Internal Medicine  
B.A., University of South Florida, 1991  
D.O., Kirksville College Osteopathic Medicine, 1995

James R. Kinney, Sr.  
Clinical Assistant Professor, Family Medicine  
B.S., Youngstown State University, 1975  
D.O., Kansas City College of Osteopathic Medicine, 1979

William T. Kirby  
Clinical Associate Professor, Dermatology  
B.S., Emory University, 1995  
D.O., Nova Southeastern University, 2000

William D. Kirsh  
Clinical Associate Professor, Family Medicine  
Community Associate Professor, Public Health  
B.S., Florida State University, 1981  
D.O., Southeastern University of the Health Sciences, 1985  
M.P.H., Johns Hopkins University, 1988

Daniel R. Klages  
Clinical Assistant Professor, Psychiatry  
B.S., State University of New York, 1993  
M.D., St. George’s University, 1999

Karen S. Klapper  
Clinical Assistant Professor, Family Medicine  
B.A., Wesleyan University, 1980  
D.O., Chicago College of Osteopathic Medicine, 1985

Aaron L. Klein  
Clinical Associate Professor, Internal Medicine  
B.A., Yeshiva University, 1996  
D.O., Nova Southeastern University, 2001

Elizabeth Klein  
Adjunct Faculty Member, Community Dentistry  
D.D.S., Loma Linda University, 2007
Jesse Klein  
Clinical Assistant Professor, Cardiology  
B.S., University of Wisconsin, 1994  
D.O., Des Moines University Osteopathic Medical Center, 2001

Gary I. Kleiner  
Clinical Associate Professor, Pediatrics  
B.S., Fordham University, 1989  
Ph.D., State University of New York, 1995  
M.D., State University of New York, 1995

Harvey S. Kleiner  
Clinical Associate Professor, Family Medicine  
B.A., Indiana University, 1967  
M.S., Indiana University, 1969  
M.S., Indiana University Medical Center, 1979  
D.O., Southeastern University of the Health Sciences, 1987

Denise Klemczak  
Clinical Assistant Professor, Obstetrics and Gynecology  
B.S., Wayne State University, 1998  
M.D., Michigan State University, 2003

Shari Klinger  
Clinical Assistant Professor, Internal Medicine  
B.A., Brooklyn College  
M.D., Downstate Medical Center, 1983

Richard A. Koby  
Clinical Instructor, Family Medicine  
B.S., Lourdes College, 1986  
M.D., University Autonoma of Guadalajara, 1981

Paul Koenigsberg  
Clinical Assistant Professor, Surgery  
B.S., Yeshiva University, 1977  
M.D., University of Cincinnati, 1982

Susan M. Koff  
Clinical Assistant Professor, Geriatrics  
B.S., Carlow College, 1978  
M.S.N., University of Pennsylvania, 1984

William C. Kohlhepp  
Adjunct Faculty  
B.A., University of Connecticut, 1974  
B.S., Livingston College, 1979  
Certificate—PA, University of Medicine and Dentistry of New Jersey, 1979  
M.H.A., Quinnipiac University, 1997  
D.H.Sc., Nova Southeastern University, 2007

Guillermo D. Kohn  
Clinical Instructor, Obstetrics and Gynecology  
M.D., Universidad Nacional de Asuncion

So Young (Susan) Kong  
Adjunct Hygienist Clinical Instructor, Periodontology  
A.S., New York University Dental School  
B.S., Loyola University of Chicago

Sheldon Konigsberg  
Clinical Assistant Professor, Internal Medicine  
M.P.H., Harvard School of Public Health, 1975  
M.D., Columbia University College of Physicians and Surgeons, 1975

Rebecca Kordsmeier  
Adjunct Faculty Member, College of Nursing  
B.S.N., Nova Southeastern University, 2008  
M.S.N., Nova Southeastern University, 2011

Matthew W. Korn  
Clinical Assistant Professor, Family Medicine  
B.S., University of Florida, 1996  
D.O., Nova Southeastern University, 2001

Bipan C. Kotwal  
Clinical Assistant Professor, Pediatrics  
M.D., Srinagar Medical College, 1970

Wayne R. Kotzker  
Clinical Assistant Professor, Nephrology  
B.A., Brandeis University, 1990  
M.D., University of Medicine and Dentistry of New York, 1994

Dianne Kowing  
Adjunct Clinical Associate Professor, Optometry

Takashi Koyama  
Adjunct Assistant Professor, Oral and Maxillofacial Surgery  
D.M.D., University of Pennsylvania, 2000

James P. Krainson  
Clinical Assistant Professor, Pulmonary Disease  
B.S., University of Miami, 1972  
M.D., University of Miami, 1976

Barbara A. Krantz  
Clinical Assistant Professor, Preventive Medicine  
B.A., Manhattanville College, 1971  
M.S., University of Miami, 1972  
D.O., Des Moines University of Health Sciences, 1976

Alberto J. Kriger  
Clinical Assistant Professor, Pediatrics  
B.A., Brandeis University, 1979  
M.D., Columbia University  
College of Physicians and Surgeons, 1983

Karthik Krishnamurthy  
Clinical Associate Professor, Dermatology  
B.S., University of Missouri, 2001  
D.O., Nova Southeastern University, 2005

Ramiah Krishnan  
Clinical Assistant Professor, Internal Medicine  
M.D., University of Madras, 1977

Jacob Krive  
Adjunct Assistant Professor, Biomedical Informatics  
B.S., University of Maryland, 2002  
M.B.A., University of Maryland, 2005  
M.S., University of Maryland, 2006  
Ph.D., Nova Southeastern University, 2013

Kristin M. Kroger  
Adjunct Assistant Professor, Public Health  
B.A., Franciscan University, 1993  
M.S., University of South Florida, 1997
Melvin Krohn  
Clinical Assistant Professor, Oral and Maxillofacial Surgery,  
Division of Surgical Sciences  
D.M.D., Harvard School of Dentistry, 1970

Merrill A. Krolick  
Clinical Associate Professor, Cardiology  
B.S., Rensselaer Polytechnic Institute, 1981  
D.O., New York College of Osteopathic Medicine, 1985

Jennifer Kroll  
Adjunct Faculty Member, Department of  
Speech-Language Pathology  
B.A., Yeshiva University, 1992  
M.A., Queens College—City University of New York, 1994

Michael E. Krutchik  
Clinical Assistant Professor, Dermatology  
B.S., Florida State University, 1984  
D.O., Southeastern University of the Health Sciences, 1988

Marc A. Kudelko  
Clinical Assistant Professor, Internal Medicine  
B.A., Southern Methodist University, 1997  
D.O., Nova Southeastern University, 1997

Glenna M. Kuhlman  
Adjunct Instructor, Disaster and Emergency Management  
B.A., Kane University, 1993  
M.S., Bank Street College, 1997

Jeffrey L. Kuhlman  
Adjunct Instructor, Disaster and Emergency Management  
B.A., Trenton State College, 1995

Alok Kumar  
Clinical Assistant Professor, Pulmonary Medicine  
M.D., Patna University, 1986

Savita Kumar  
Clinical Assistant Professor, Preventive Medicine  
Community Assistant Professor, Public Health  
M.D., Meerut University, 1971  
M.P.H., University of Miami School of Public Health, 1980  
M.B.A., Florida Atlantic University, 1995

Andrew M. Kusienski  
Clinical Assistant Professor, Osteopathic Principles and Practice  
B.S., St. Joseph University, 1996  
D.O., Lake Erie College of Osteopathic Medicine, 2001

Lisa Kvarda  
Adjunct Faculty Member, Department of  
Speech-Language Pathology  
B.A., University of Florida, 1996  
M.S., University of South Florida, 1997  
SLPD, Nova Southeastern University, 2008

Kyriaki Kyriakou  
Adjunct Faculty Member, Department of  
Speech-Language Pathology  
B.A., Brock University, 1997  
M.S., University of the District of Columbia, 2001  
SLPD, Nova Southeastern University, 2011

Peter Labas  
Clinical Professor, Surgery  
M.D., Comenius University, 1973

Gerald Laboda  
Adjunct Instructor, Oral and Maxillofacial Surgery  
D.D.S., Temple University, 1960  

Rodolphe Lafontant  
Clinical Instructor, Obstetrics and Gynecology  
B.S., St. Johns University, 1979  
M.D., Universite D’Erat, 1986  
M.P.H., Tulane University, 1992

Charles P. Lago  
Clinical Assistant Professor, Surgery  
M.D., Mount Sinai School of Medicine, 1989

Gary Lai  
Clinical Assistant Professor, Family Medicine  
B.S., Florida Atlantic University, 1998  
D.O., Nova Southeastern University, 2002

Shane A. Lam  
Adjunct Assistant Professor,  
Disaster and Emergency Management  
B.S., Nova Southeastern University, 2006  
M.S., Nova Southeastern University, 2011

Peter Lamelas  
Clinical Instructor, Internal Medicine  
B.S., Palm Beach Community College, 1978  
B.S., Ohio Northern University, 1993  
M.D., Universidad Central del Este School of Medicine, 1981

Andre J. Landau  
Clinical Assistant Professor, Cardiology  
M.D., University of the Witwatersrand, 1982

Mario Landera  
Adjunct Faculty Member, Department of  
Speech-Language Pathology  
B.S., Florida State University, 2004  
M.A., University of Florida, 2006  
SLPD, Nova Southeastern University, 2015

Carrie Landess  
Clinical Assistant Professor, Neurology  
B.A., Cornell University, 1984  
M.D., Universidad Central del Caribe, 1989

Maria-Alice Lara  
Clinical Assistant Professor, Pediatrics  
B.S., Florida International University, 1991  
M.D., Eastern Virginia Medical School, 1997

Wilfredo C. Lara  
Clinical Assistant Professor, Ophthalmology  
B.S., Florida International University, 1994  
B.A., Florida International University, 1995  
M.D., University of Virginia, 2000

Sergio W. Larach  
Clinical Assistant Professor, Surgery  
M.D., University of Chile, 1967
David Lasko
Clinical Assistant Professor, Surgery
B.A., University of Pennsylvania, 1990
M.S., University of Miami, 1993
M.D., University of Miami, 1999

Joseph A. La Spada
Clinical Assistant Professor, Pediatrics
B.S., Vanderbilt University, 1979
M.D., University of Bologna, 1988

Mohammad J. Latif-Jangda
Clinical Associate Professor, Geriatrics
M.D., La Universidad Tecnologica de Santiago, 1956

Anthony Lauro
Clinical Instructor, Medical Education
M.A., Temple University, 1976

Gerald J. Lavandosky
Clinical Assistant Professor, Pediatrics
B.S., Virginia Tech, 1986
M.D., Eastern Virginia Medical School, 1990

Carlos Lavernia
Clinical Professor, Orthopedic Surgery
B.S., Tulane University, 1977
M.S., Tulane University, 1979
M.D., University of Puerto Rico, 1985

Sandra M. Lawrence
Clinical Assistant Professor, Pediatrics
M.D., University of the West Indies, 1984

Nuria M. Lawson
Clinical Assistant Professor, Surgery
M.D., University of Panama, 1987

Alan K. Lazar
Clinical Assistant Professor, Orthopedic Surgery
M.D., New York Medical College, 1976

Sasha Lazarus
Clinical Instructor, Obstetrics and Gynecology
M.D., Saba University, 2005

Matt Leavitt
Clinical Assistant Professor, Dermatology
B.S., University of Michigan, 1981
D.O., Michigan State University
College of Osteopathic Medicine, 1986

Heather Lebensburger
Adjunct Faculty Member, Department of Speech-Language Pathology
B.A., University of Florida, 1998
M.S., Nova Southeastern University, 2001
SLP.D., Nova Southeastern University, 2003

Benjamin Lechner
Clinical Associate Professor, Internal Medicine
B.A., Yeshiva University, 1963
M.D., New York University, 1977

Bruce M. LeClair
Clinical Associate Professor, Family Medicine
B.S., San Diego State University, 1976
M.D., University of California, 1981

Robert Ledbetter
Clinical Assistant Professor, Cardiology
B.S., Medical College of Georgia, 1993
D.O., Nova Southeastern University, 2002

Susan Ledbetter
Clinical Associate Professor, Family Medicine and Geriatrics
B.A., University of Florida, 1992
D.O., Philadelphia College of Osteopathic Medicine, 1999

Douglas Leder
Clinical Assistant Professor, Ophthalmology
B.A., Rutgers College, 1978
D.O., University of Medicine and Dentistry of New Jersey
School of Osteopathic Medicine, 1983

Marah J. Lee
Clinical Assistant Professor, Internal Medicine
B.S., Northeast Missouri State University, 1985
D.O., Kirksville College of Osteopathic Medicine, 1989

Noah J. Lee
Clinical Assistant Professor, Family Medicine
B.S., University of Miami, 1997
D.O., Nova Southeastern University, 2002

Seong K. Lee
Clinical Assistant Professor, Surgery
B.A., University of Missouri, 1997
M.D., University of Missouri School of Medicine, 1998

Tatiana Lee-Chee
Clinical Assistant Professor, Ophthalmology
B.S., Florida International University, 1992
D.O., Nova Southeastern University, 1996

Christine Legler
Adjunct Associate Professor, Health Science
B.S./PA-C, Hahnemann University, 1976
M.S., University of Pittsburgh, 1981
D.H.Sc., Nova Southeastern University, 2004

Fermin Leguen
Community Assistant Professor, Public Health
M.D., Havana University, 1978
M.P.H., Johns Hopkins University School of Public Health, 1998

Gary S. Lehr
Clinical Assistant Professor, Surgery
B.S., Union College, 1984
M.D., University of Kentucky, 1988

Harry Lehrer
Associate Professor, Cardiology and Restorative Dentistry
D.M.D., University of Florida, 1984

Gabriela Lemoine
Clinical Assistant Professor, Dermatology
M.D., Christian Albrechts University, 1983
Bruce A. Lenes  
Clinical Associate Professor, Internal Medicine  
B.S., Union College, 1971  
M.D., Albany Medical College, 1975

Thomas Leonard  
Adjunct Instructor, Cariology and Restorative Dentistry  
D.M.D., Nova Southeastern University, 2011

Charlene A. Lepane  
Clinical Assistant Professor, Internal Medicine  
B.S., Auburn University, 1998  
M.P.H., University of Alabama  
D.O., University of Health Sciences College of Osteopathic Medicine

Andrew S. Lepoff  
Clinical Assistant Professor, Surgery  
B.S., Villanova University, 1982  
D.O., Southeastern University of the Health Sciences, 1986

Keith J. Lerner  
Clinical Assistant Professor, Internal Medicine  
B.A., Boston University, 1980  
M.D., Boston University School of Medicine, 1980

Nathalie Leroy  
Clinical Instructor, Family Medicine  
B.S., Florida International University, 2002  
M.D., Ross University, 2007

Richard S. Levene  
Clinical Assistant Professor, Family Medicine  
B.S., Syracuse University, 1984  
D.O., New York College of Osteopathic Medicine, 1988

Richard Levin  
Clinical Assistant Professor, Urology  
B.A., Clark University, 1985  
M.D., George Washington University, 1989

Ronald H. Levin  
Clinical Assistant Professor, Internal Medicine  
B.A., Clark University, 1969  
M.D., George Washington University School of Medicine, 1973

Harvey Levine  
Adjunct Instructor, Cariology and Restorative Dentistry  
D.M.D., University of Pennsylvania, 1967

Larry K. Levinson  
Clinical Assistant Professor, Family Medicine  
B.S., Pennsylvania State University, 1981  
D.O., Philadelphia College of Osteopathic Medicine, 1985

Rona Levitt  
Community Instructor, Public Health  
R.N., The Jewish General Hospital School of Nursing, 1963

Arkene Levy  
Adjunct Professor, Pharmaceutical Sciences  
B.S., University of the West Indies, 2000  
Ph.D., University of the West Indies, 2007

Norman Levy  
Clinical Assistant Professor, Cariology and Restorative Dentistry  
D.D.S., Maryland University, 1974

Aldith M. Lewis  
Clinical Assistant Professor, Internal Medicine  
B.S., University of Florida, 1993  
D.O., Ohio University College of Osteopathic Medicine, 2001

Frederick T. Lewis  
Clinical Assistant Professor, Psychiatry  
B.S., Pennsylvania State University, 1979  
D.O., Southeastern University of the Health Sciences, 1986

Wilhelmina N. Lewis  
Clinical Associate Professor, Family Medicine  
M.D., University of Cincinnati, 1998

Lauren L’Hommedieu  
Clinical Associate Professor, Pediatrics  
B.A., University of Georgia, 2003  
M.D., American University of the Caribbean, 2009

Soling Li  
Clinical Assistant Professor, Internal Medicine  
B.S.N., Florida International University, 1992  
M.P.H., Nova Southeastern University, 2000  
D.O., Nova Southeastern University, 2000

Steven Licata  
Clinical Assistant Professor, Family Medicine  
B.A., Florida Atlantic University, 1993  
D.O., Nova Southeastern University, 1997

Craig H. Lichtblau  
Clinical Assistant Professor, Physical Medicine and Rehabilitation  
M.D., American University of the Caribbean, 1985

Mark E. Lieberman  
Clinical Assistant Professor, Family Medicine  
B.S., University of Miami, 1982  
M.D., University of Miami School of Medicine, 1986

Morton Lieberman  
Adjunct Assistant Professor, Oral Medicine, Diagnostic Sciences  

Jill Liebman  
Clinical Assistant Professor, Neurology  
B.S., Union College, 1985  
D.O., Southeastern University of the Health Sciences, 1989

Mayer Liebman  
Adjunct Assistant Professor, Periodontontology  
D.D.S., Georgetown University, 1967  
Certificate—Periodontontology, Tufts University, 1972

Nicole Lilienthal  
Adjunct Supervisor, Department of Speech-Language Pathology  
B.A., University of Connecticut, 1995  
M.S., Florida State University, 1999
Juan J. Lima  
Clinical Assistant Professor, Pediatrics  
M.D., Universidad Tecnologica de Santiago, 1986

Ridwan Lin  
Clinical Associate Professor, Neurology  
B.A., University of California, 1991  
M.A., University of California, 1995  
Ph.D., Pennsylvania State University, 2001  
M.D., Pennsylvania State University, 2003

Felix S. Linetsky  
Clinical Associate Professor, Osteopathic Principles and Practice  
P.A., Odessa Medical College, 1966  
M.D., Vorenezh Medical Institute, 1975

Jason Lipoff  
Adjunct Assistant Professor, Pediatric Dentistry  
D.D.S., Nova Southeastern University, 2003  
Certificate—Pediatric Dentistry, Nova Southeastern University, 2011

Edward Liu  
Clinical Assistant Professor, Pediatrics  
B.S., University of Michigan, 1985  
M.D., University of California, 1991

Ziming Liu  
Visiting Faculty, Optometry  
M.D., He University (Shenyang, Liaoning, China)

Quinisha K. Logan  
Clinical Assistant, Obstetrics and Gynecology  
B.S., Xavier University, 2002  
M.D., University of Tennessee, 2007

Jeffrey S. Lombard  
Clinical Associate Professor, Urology  
B.S., Waynesburg College, 1976  
D.O., Philadelphia College of Osteopathic Medicine, 1980

Eustorgio A. Lopez  
Adjunct Professor, Oral and Maxillofacial Surgery  
D.D.S., University of Sao Paulo, Brazil, 1977  
M.D., University of Miami, 1995  
Certificate—OMFS, Jackson Memorial Hospital/University of Miami, 1990

Fabian A. Lopez  
Clinical Assistant Professor, Internal Medicine  
B.S., University of California, 1990  
M.D., University of California, 1994

Leonel A. Lopez  
Clinical Assistant Professor, Family Medicine  
B.S., Nova Southeastern University, 2003  
D.O., Nova Southeastern University, 2007

Sajid Lopez  
Clinical Assistant Professor, Psychiatry  
B.A., University of Miami, 1997  
M.D., Universidad Iberoamericana School of Medicine, 1999

Alfredo Lopez-Gomez  
Clinical Associate Professor, Internal Medicine  
B.S., Matanzas Institute, 1947  
M.D., Universidad de la Havana, 1954

Rene L. Lopez-Guerrero  
Clinical Assistant Professor, Pediatrics  
B.S., University of Miami, 1973  
M.B.A., Florida International University, 1977  
M.D., Universidad Tecnologica de Santiago, 1983

Miguel A. Lopez-Viego  
Clinical Assistant Professor, Surgery  
B.S., Brown University, 1982  
M.D., University of Miami School of Medicine, 1986

Jorge A. Loredo  
Clinical Assistant Professor, Internal Medicine  
B.S., Florida International University, 1996  
D.O., Nova Southeastern University, 2000

Wladimir P. Lorentz  
Clinical Assistant Professor, Pediatrics  
M.D., Tulane University School of Medicine, 1997  
B.S., University of Michigan, 1998

Arquimedes G. Losada  
Clinical Instructor, Internal Medicine  
M.D., Universidad Central del Este, 1994

Ramesh R. Loungani  
Clinical Professor, Cardiology  
M.D., Bangalore Medical College, 1977

Mary Ann Lowe  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., West Virginia University—Morgantown, 1968  
M.Ed., Florida Atlantic University, 1988  
Ed.S., University of New Mexico—Gallup, 1998  
SLP.D., Nova Southeastern University, 2005

Robert Lowe  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., Slippery Rock University of Pennsylvania, 1973  
M.Ed., Clarion University of Pennsylvania, 1977  
Ph.D., Ohio State University—Athens, 1986

Etta L. Lowery  
Clinical Associate Professor, Anesthesiology  
B.S., Concord College, 1978  
D.O., West Virginia School of Medicine, 1983

Glen D. Lowery  
Clinical Associate Professor, Surgery  
B.S., Southern Oklahoma State University, 1975  
D.O., Oklahoma College of Osteopathic Medicine, 1978

Brenelly Lozada-Cruz  
Clinical Assistant Professor, Internal Medicine  
B.S., University of Puerto Rico, 1994  
M.D., Universitasit Portoricensis, 1998

Yanitt G. Lozada-Perez  
Clinical Instructor, Family Medicine  
B.S., University of Puerto Rico, 1998  
M.D., Universidad Autonoma de Guadalajara, 2002

Ernesto Lugo  
Clinical Assistant Professor, Family Medicine  
B.A., University of Delaware, 1986  
D.O., Chicago College of Osteopathic Medicine, 1992
Jorge O. Luna  
Clinical Associate Professor, Family Medicine  
B.S., Aquinas College, 1970  
D.O., Michigan State University, 1977

Heather M. Lutz  
Clinical Assistant Professor, Family Medicine  
B.A., Florida Atlantic University, 1996  
D.O., Nova Southeastern University, 2001

Thomas M. Macaluso  
Clinical Assistant Professor, Psychiatry  
B.A., Lafayette College, 1983  
M.D., University of Medicine and Dentistry of New Jersey, 1987

Rebecca M. MacDougall  
Clinical Instructor, Pathology  
B.S., University of Texas, 1997  
M.D., University of Texas, 2004

Jacqueline C. Machado  
Clinical Assistant Professor, Pediatrics  
B.S., University of Miami, 1999  
M.D., University of Miami, 2003

Ann T. Macintyre  
Clinical Assistant Professor, Internal Medicine  
B.A., University of Michigan, 1995  
M.S., Johns Hopkins University School of Hygiene and Public Health, 1997  
D.O., Nova Southeastern University, 2002

Sonia P. Madrazo-Rico  
Clinical Assistant Professor, Pediatrics  
M.D., Universidad de Monterrey, 1986

Shirin Madzheidova  
Pediatric Pharmacotherapy Fellow  
B.A., Florida International University, 2009  
Pharm.D., Nova Southeastern University, 2013  
PFO-1, Indian River Medical Center, 2014

Mario M. Magcalas  
Clinical Assistant Professor, Pulmonary Medicine  
B.S., University of Santo Tomas, 1982  
M.D., University of Santo Tomas, 1986

Donald C. Maharty  
Clinical Assistant Professor, Family Medicine  
B.S., University of Scranton, 1989  
D.O., Philadelphia College of Osteopathic Medicine, 1993

Maria Mahmoodi  
Clinical Assistant Professor, Family Medicine  
B.S., Metropolitan State College, 1990  
M.D., University of Colorado Health Sciences Center, 1994

Jonell Y. Mahoney  
Clinical Assistant Professor, Pediatrics  
B.S., Florida State University, 1982  
M.D., University of Miami, 1989

Brian Mahoney  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Pennsylvania College of Optometry, 1985

Andrew Mahrer  
Adjunct Faculty Member, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2015

Archana Maini  
Clinical Assistant Professor, Hematology/Oncology  
M.D., Lady Harding Medical College, 1986

Mazhar Majid  
Clinical Assistant Professor, Cardiology  
M.D., University of Karachi, 1988

Major M. Malcolm  
Clinical Assistant Professor, Internal Medicine  
M.D., University of Illinois, 1984  
J.D., Boston University School of Law, 1996

Ophelia J. Mall  
Clinical Associate Professor, Pediatrics  
M.D., Dow Medical College, 1968

Rubaiva Mallay  
Clinical Assistant Professor, Rheumatology  
B.S., University of North Carolina, 2001  
D.O., Edward Via Virginia College of Osteopathic Medicine, 2007

Michael J. Mallis  
Clinical Assistant Professor, Surgery  
D.O., Philadelphia College of Osteopathic Medicine, 1997

John P. Malloy  
Clinical Assistant Professor, Surgery  
B.S., Philadelphia College of Pharmacy and Science, 1996  
M.P.T., Philadelphia College of Pharmacy and Science, 1996  
D.O., Philadelphia College of Osteopathic Medicine, 2005

Mauricio Malo  
Adjunct Instructor, Prosthodontics  
D.D.S., Colombian Odontological College, Colombia, 1995  
Certificate—Prosthodontics, Loma Linda University, 2004

Jere J. Mammino  
Clinical Assistant Professor, Dermatology  
B.S., Albright College, 1978  
D.O., Philadelphia College of Osteopathic Medicine, 1982

David L. Mandell  
Clinical Associate Professor, Otolaryngology  
B.A., University of Maryland, 1992  
M.D., University of Maryland, 1996

Michael Mandese  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Nova Southeastern University, 1996

Deepak S. Mandi  
Clinical Assistant Professor, Internal Medicine  
M.D., Bangalore Medical College, 1990  
B.S., University of Kentucky, 1993

Susan G. Manella  
Clinical Assistant Professor, Family Medicine  
B.S., Pennsylvania State University, 1978  
D.O., Philadelphia College of Osteopathic Medicine, 1983
Gene F. Manko
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., University of Pennsylvania, 1968
M.D., University of Pennsylvania, 1972

Judith Mann
Adjunct Faculty, Physical Therapy
B.S. PT, Boston University, 1975
M.A. PT, Touro College, 1997
D.P.T., Nova Southeastern University, 2008

Jason A. Mansour
Clinical Assistant Professor, Family Medicine
B.S., Duquesne University, 1998
M.D., Drexel University College of Medicine, 2003

Raymond Mantovani
Clinical Assistant Professor, Internal Medicine
B.S., Saint Peter's College, 1977
M.D., Universidad CETEC, 1981

Constantine A. Mantz
Clinical Assistant Professor, Oncology
B.S., Loyola University of Chicago, 1990
M.D., University of Chicago, 1995

Alberto A. Marante
Clinical Assistant Professor, Pediatrics
B.A., University of South Florida, 1978
M.D., Universidad CETEC, 1981

James Marbourg
Adjunct Clinical Assistant Professor, Optometry
O.D., University of Alabama School of Optometry, 1977

Anthony L. Marcotte
Clinical Assistant Professor, Surgery
B.S., University of Illinois, 1999
D.O., Midwestern University, 2003

David Marcus
Clinical Associate Professor, Pediatrics
B.S., Tulane University, 1977
M.D., Tulane University, 1981

Susannah Marcus
Adjunct Clinical Associate Professor, Optometry

Gary L. Marder
Clinical Assistant Professor, Dermatology
B.A., New York University, 1977
D.O., University of Health Sciences
College of Osteopathic Medicine, 1983

Ashwini K. Margaitis
Clinical Assistant Professor, Family Medicine
B.S., University of Florida, 2000
D.O., Des Moines University College of Osteopathic Medicine, 2004

Michael Margolis
Clinical Assistant Professor, Family Medicine
B.S., University of Illinois, 1976
D.O., Chicago College of Osteopathic Medicine, 1980

Cindy Marika
Clinical Assistant Professor, Family Medicine
B.S., University of Florida, 1981
D.O., Southeastern University of the Health Sciences, 1987

Cristina S. Marín
Clinical Assistant Professor, Gastroenterology
B.S., University of Miami, 2002
M.D., University of Miami, 2006

Michelle Markley
Clinical Assistant Professor, Surgery
M.D., University of Miami School of Medicine, 1990

Michale Markou
Clinical Assistant Professor, Family Medicine
B.S., University of South Florida, 1987
D.O., Kirksville College of Osteopathic Medicine, 1991

Riva H. Markowitz
Adjunct Faculty Member, Department of Speech-Language Pathology
M.Ed., University of North Florida, 1978

Stanley W. Marks
Clinical Associate Professor, Surgery
B.A., C.W. Post College of Long Island University, 1969
M.D., Howard University College of Medicine, 1973

Nelson J. Marquez
Clinical Instructor, Obstetrics and Gynecology
B.S., Mercer University, 2005
M.D., Medical College of Georgia, 2009

Jose A. Martin
Clinical Instructor, Surgery
B.S., Florida International University, 2002
D.O., Nova Southeastern University, 2009

Angelique T. Martínez
Clinical Assistant Professor, Pediatrics
B.A., Old Dominion University, 2001
M.D., Eastern Virginia Medical School, 2005

Isidro R. Martínez
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., Xavier University, 1984
M.D., University of Puerto Rico School of Medicine, 1988

Kenia Martinez
Clinical Assistant Professor, Pediatrics
B.S., Florida International University, 2003
M.D., University of Miami, 2008

Ramon E. Martinez
Clinical Assistant Professor, Internal Medicine
M.D., Central University of Venezuela, 1999

Santiago E. Martínez
Clinical Assistant Professor, Internal Medicine
M.D., Universidad Autónoma de Santo Domingo, 1982

Naicie Marrow
Clinical Instructor, Obstetrics and Gynecology
B.S., University of Florida, 2000
D.O., Des Moines University College of Osteopathic Medicine, 2004
Walter C. Martinez
Clinical Associate Professor, Neurology
B.S., San Marcos University, 1960
M.D., San Marcos University, 1967

Aldo Martinez-Fleiteo
Clinical Assistant Professor, Cardiology
M.D., El Rector Del Instituto Superior, 2002

Emily Martuscelli
Adjunct Faculty Member, Pharmacy Practice
Pharm.D., University of Florida, 2003

Eugene L. Mascarenhas
Clinical Associate Professor, Cardiology
M.D., Grant Medical College, 1966

Mohammad M. Masri
Clinical Associate Professor, Surgery
M.D., Aleppo University, 1976

Chad Masters
Adjunct Assistant Professor, Biomedical Informatics
B.S., University of Florida, 1997
M.D., University of South Florida, 2004
M.B.A., Auburn University, 2013

Cristina B. Mata
Clinical Assistant Professor, Internal Medicine
B.A., University of Miami, 1980
M.D., University of Miami, 1985

Thomas H. Matese, Jr.
Clinical Associate Professor, Family Medicine
B.S., Villanova University, 1984
D.O., University of Health Sciences College of Osteopathic Medicine, 1988

Josephin Mathai
Clinical Assistant Professor, Family Medicine
B.S., University of South Florida, 2003
D.O., Lake Erie College of Osteopathic Medicine, 2008

Huber Matos-Garsault
Clinical Instructor, Anesthesiology
B.S., Autonomous School of Central America, 1977
M.D., Universidad de Ciencias Medicas, 2001

Barry I. Matza
Clinical Assistant Professor, Orthodontics
D.M.D., Tufts University School of Dental Medicine, 1973

Mitchell D. Maulfair
Clinical Associate Professor, Family Medicine
D.O., Philadelphia College of Osteopathic Medicine, 1977

Dane L. Maxfield
Clinical Associate Professor, Internal Medicine
B.A., Northwestern University, 1968
D.O., Kirksville College of Osteopathic Medicine, 1972

John P. May
Clinical Assistant Professor, Internal Medicine
B.S., University of Notre Dame, 1984
M.D., Loyola University Stritch School of Medicine, 1988

Kohl M. Mayberry
Clinical Assistant Professor, Psychiatry
D.O., Arizona College of Osteopathic Medicine, 2009

Laura L. Mays
Adjunct Faculty, Physician Assistant Studies
B.S., Butler University, 2001

Gloria A. McAllister
Adjunct Assistant Professor,
Disaster and Emergency Management
B.S., Memphis State University, 1974
M.S., Boston College, 1975
Ph.D., University of Texas, 1985

Tina McAlpin
Adjunct Faculty Member, Department of
Speech-Language Pathology
B.A., Lenoir-Rhyne College, 1981
M.S., Southern Connecticut State University, 1986

James L. McBride
Clinical Associate Professor, Family Medicine
Ph.D., Florida State University, 1988

Joseph P. McCain
Professor, Oral and Maxillofacial Surgery
D.M.D., University of Pittsburgh, 1975
Certificate—General Practice Residency, University of Miami, 1976
Certificate—Oral and Maxillofacial Surgery, University of Miami, 1979
Fellow, American Association of Oral and Maxillofacial Surgeons, 1979
Diplomate, American Board of Oral and Maxillofacial Surgeons, 1984

Paul A. McCarthy
Clinical Instructor, Preventive Medicine
B.A., Canisius College, 1978
M.A., Syracuse University, 1989

John W. McClane III
Adjunct Clinical Assistant Professor, Optometry
O.D., Illinois College of Optometry, 1979

Violeta McCormack-Atanasoski
Clinical Assistant Professor, Cardiology
B.S., New York University, 1976
M.D., University of Edward Kardelj, 1981

Wayne A. McCreath
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., Clark University, 1990
B.S., Cornell University, 1992
M.D., Medical College of Ohio, 1998

Regina McDade
Adjunct Faculty Member, College of Nursing
B.S.N., Howard University, 1986
M.P.H., Florida International University, 1992

Malcolm H. McDonald
Clinical Associate Professor, Surgery
B.S., Michigan State University, 1965
D.O., Michigan State University, 1969
Wendy M. McGonigal  
Adjunct Clinical Assistant Professor, Optometry

David A. McInnes  
Clinical Associate Professor, Family Medicine  
A.B., William Jewell College, 1977  
M.D., University of Missouri, 1981  
M.Ed., University of Southern California, 2001

Sonya V. McKee  
Clinical Assistant Professor, Psychiatry  
B.A., Wayne State University, 1986  
M.D., Wayne State University, 1990

Michael J. McKenzie  
Clinical Assistant Professor, Family Medicine  
B.S., Virginia Commonwealth University, 1992  
M.D., Universidad Iberoamericana School of Medicine, 1999

Ilka L. McKinney  
Clinical Assistant Professor, Family Medicine  
B.S., University of Maryland, 1988  
M.D., Chicago Medical School, 2002

Archie McLean  
Clinical Professor, Community Medicine  
A.B., Bowdoin College, 1977  
M.P.H., University of South Carolina, 1978  
D.O., Southeastern University of the Health Sciences, 1988

Barbara McNeil  
Adjunct Faculty Member, College of Nursing  
B.S.N., University of Illinois, 1976  
M.S.N., Oregon Health Science University, 1982  
Ph.D., University of Idaho, 1989

John McSoley  
Adjunct Clinical Associate Professor, Optometry  
O.D., New England College of Optometry, 1991

Fatema P. Meah  
Clinical Assistant Professor, Pediatrics  
B.A., Hunter College, 1992  
M.D., Yeshiva University, 1996

Clyde Meckstroth  
Clinical Assistant Professor, Surgery  
B.S., University of Florida, 1981  
D.O., Southeastern University of the Health Sciences, 1985  
M.H.A., University of Florida, 2003

Yesenia Medina  
Clinical Assistant Professor, Family Medicine  
B.S., University of Miami, 2003  
D.O., Nova Southeastern University, 2007

Frieda Menasche  
Adjunct Faculty Member, Physical Therapy  
A.S., Broward College, 1983  
B.S., Florida International University, 1986  
D.P.T., Shenandoah University, 2010

Heather Medeiros  
Adjunct Faculty, Cardiovascular Sonography Program—Tampa  
B.H.Sc., Nova Southeastern University, 2010

Dan H. Meirson  
Clinical Assistant Professor, Dermatology  
B.S., University of Michigan, 1982  
M.D., Ohio State University, 1986

Malcolm Meister  
Adjunct Professor, Orthodontics  
M.S.M., Florida International University, 1981  
J.D., Nova Southeastern University, 1995

Manuel A. Melendez  
Clinical Assistant Professor, Psychiatry  
M.D., San Marcos University, 1993

Elise Mellman  
Adjunct Clinical Hygienist Instructor, Periodontology  
A.S., State University of New York, 1979

Martin R. Mendelson  
Adjunct Instructor, Prosthodontics  
D.D.S., Baltimore College of Dental Surgery, 1996

Benny Menendez  
Clinical Assistant Professor, Family Medicine  
M.D., University of Puerto Rico, 1986  
D.O., New York College of Osteopathic Medicine, 1989

Richard J. Menendez  
Clinical Associate Professor, Family Medicine  
B.S., Tulane University, 1979  
M.D., University of Puerto Rico Medical School, 1983

Roxanna M. Menendez  
Clinical Assistant Professor, Pediatrics  
B.S., University of Miami, 1991  
D.O., Western University of the Health Sciences, 1996

Steve Mescher  
Adjunct Professor, Oral and Maxillofacial Surgery  
D.D.S., University of Maryland, 1980

Dean Metz  
Community Instructor, Public Health  
B.S., State University of New York, 1992  
M.P.H., Nova Southeastern University, 2012

George Michel  
Clinical Instructor, Internal Medicine  
M.D., University of Miami, 1993

Christos G. Mihos  
Clinical Assistant Professor, Internal Medicine  
B.A., Brandeis University, 2003  
D.O., Nova Southeastern University 2009

Joseph Miller  
Adjunct Clinical Assistant Professor, Optometry

Richard A. Miller  
Clinical Associate Professor, Dermatology  
B.S., University of Michigan, 1978  
D.O., Michigan State University, 1984

Jules G. Minkes  
Clinical Professor, Cardiology  
D.O., Kirksville College of Osteopathic Medicine, 1962
Neil Miransky  
Clinical Assistant Professor, Family Medicine  
B.A., University of Florida, 1992  
D.O., Nova Southeastern University, 2003

Richard Miron  
Adjunct Faculty Member, Periodontics  
D.D.S., The University of Laval, 2015

Barry M. Miskin  
Clinical Assistant Professor, Surgery  
M.D., New York Medical College of New Rochester, 1981

Rakesh K. Mittal  
Clinical Professor, Pediatrics  
M.D., University of Delhi, 1978

Ahamed Mohaideen  
Clinical Assistant Professor, Orthopedic Surgery  
B.S., Rensselaer Polytechnic Institute, 1989  
M.D., State University of New York, 1994

Karthik Mohan  
Clinical Assistant Professor, Internal Medicine  
B.S., West Virginia University, 2003  
M.D., West Virginia University, 2007

Vishnu Mohan  
Adjunct Assistant Professor, Biomedical Informatics  
M.S., Oregon Health and Science University, 2009  
M.D., University of Delhi, 1991

Suzanne Moineau  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Rutgers State University—Douglass College, 1991  
M.B.A., Rutgers State University—Graduate School of Management, 1992  
M.A., University of Iowa, 1995  
Ph.D., University of California—San Diego, 2006

Marie-Evelyne Moise  
Clinical Assistant Professor, Internal Medicine  
M.D., University of Brussels, 1980

Shahida P. Moizuddin  
Clinical Assistant Professor, Preventive Medicine  
M.D., Gandhi Medical College, 1973  
M.P.H., Tulane School of Public Health, 1987

Francis K. Moll III  
Clinical Assistant Professor, Orthopedic Surgery  
B.A., Western University, 1984  
M.D., University of Miami School of Medicine, 1989

Tony Momeni  
Clinical Assistant Professor, Family Medicine  
B.S., University of Florida, 1988  
D.O., Southeastern University of the Health Sciences, 1993

Migvis Monduy  
Clinical Assistant Professor, Pediatrics  
B.S., Florida International University, 2001  
M.D., University of South Florida, 2005

Naomi Montague  
Clinical Assistant Professor, Pathology  
B.S., University of Miami, 1982  
M.S., University of Miami, 1989  
Ph.D., University of Miami, 2003  
M.D., University of Miami, 2005

Alfredo Montero-Hurtado  
Clinical Assistant Professor, Internal Medicine  
M.D., Universidad Catolica Boliviana, 2006

Harry K. Moon  
Clinical Associate Professor, Surgery  
B.A., Tulane University, 1972  
M.D., University of South Alabama College of Medicine, 1978

Barbara Moore  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., California State University—Fullerton, 1980  
M.A., Whittier College, 1982  
Ed.D, University of Southern California, 1998

Jacquelyn Moore  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Howard University, 1971  
M.S., University of Michigan—Ann Arbor, 1972  
M.S., Johns Hopkins University, 1994  
Ph.D., Howard University, 2007

Erika Moorman  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Indiana University, 1997  
M.S., Nova Southeastern University, 2001

Marisol Mora  
Adjunct Faculty Member, Prosthodontics  
D.D.S., Pontificia Universidad Javeriana, 1993

Mohamad M. Morad  
Clinical Assistant Professor, Internal Medicine  
M.D., University of Damascus, 2000

M. Fernando D. J. Moraflores  
Clinical Assistant Professor, Pediatrics  
M.D., Universidad San Carlos de Guatemala, 1982

Glenn Moran  
Clinical Professor, Family Medicine  
B.A., Florida Atlantic University, 1982  
D.O., Southeastern University of the Health Sciences, 1988

Robert A. Moran  
Clinical Assistant Professor, Psychiatry  
B.S., Trinity College, 1985  
M.D., Mount Sinai School of Medicine, 1989

Alex Morizio  
Clinical Assistant Professor, Internal Medicine  
M.D., Ross University, 2002

Jason Morris  
Clinical Assistant Professor, Family Medicine  
M.D., University of Medicine and Dentistry of New Jersey, 2008
Richard Morris  
Adjunct Clinical Associate Professor, Optometry  
O.D., Southern College of Optometry, 1986

Stephen A. Morris  
Adjunct Clinical Instructor, Optometry  
O.D., Southern College of Optometry, 1964

Stephen M. Morris  
Clinical Assistant Professor, Internal Medicine  
A.B., Temple University, 1961  
M.D., Temple University School of Medicine, 1965

Steven E. Morris  
Clinical Assistant Professor, Hematology  
B.A., Columbia College, 1978  
M.D., University of Connecticut, 1982

James Morrish  
Adjunct Assistant Professor, Orthodontics  
B.A., Emory University, 1976  
D.D.S., Emory University School of Dentistry, 1981  
Certificate—Orthodontics, University of Florida School of Dentistry, 1983  
Diplomate, American Board of Orthodontics

Terry Morrow-Nelson  
Adjunct Assistant Professor, Public Health  
B.A., University of Nevada, 1997  
M.S., Eckerd College, 2005  
Ph.D., Nova Southeastern University, 2011

Monica Mortensen  
Clinical Assistant Professor, Pediatrics  
B.S., Loyola University, 1994  
D.O., Chicago College of Osteopathic Medicine, 2001

Neal R. Mortensen  
Clinical Instructor, Family Medicine  
B.S., St. Joseph College, 1988  
D.P.M., Dr. William Scholl College of Podiatric Medicine, 1993

Anay Moscu  
Adjunct Faculty Member, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2003

Allen Moskow  
Adjunct Assistant Professor, Endodontics  
D.D.S., Temple University, 1981  
Certificate—Endodontics, Temple University, 1983

Jacklynn Moskow  
Community Instructor, Public Health  
B.S., University of Pittsburgh, 2006  
D.O., Nova Southeastern University, 2013

Stephen E. Moskowitz  
Clinical Assistant Professor, Psychiatry  
B.A., New York University, 1962  
M.D., University of Louvain, 1973

Liliana Mosquera  
Adjunct Instructor, Prosthodontics  
D.D.S., Universidad Autonoma de Manizales, Colombia, 1999  
Certificate—Prosthodontics, Nova Southeastern University, 2004

Enrique Muller  
Adjunct Assistant Professor, Periodontics  
D.M.D., Boston University, 2007

Deborah A. Mulligan  
Clinical Professor, Pediatrics  
B.A., University of San Francisco, 1976  
M.D., University of California—Los Angeles, 1982

Duaine D. Murphree  
Clinical Assistant Professor, Family Medicine  
B.S., University of South Alabama, 1977  
M.D., University of South Alabama, 1983  
M.S., Wake Forest University, 1991

Suzanne C. Murphy  
Clinical Assistant Professor, Internal Medicine  
B.S., Villanova University, 1988  
M.D., Albany Medical College, 1992

William Murphy  
Clinical Associate Professor, Family Medicine  
B.S., St. Joseph University, 1975  
D.O., Philadelphia College of Osteopathic Medicine, 1979

Timothy Murray  
Clinical Professor, Ophthalmology  
B.A., Johns Hopkins University, 1981  
M.D., Johns Hopkins Hospital, 1985  
M.B.A., University of Miami, 2005

Martha J. Mutis  
Community Assistant Professor, Public Health  
D.D.S., Colombian School of Medicine, 2000  
M.P.H., Nova Southeastern University, 2012

Lisa Marie Myers  
Clinical Assistant Professor, Internal Medicine  
M.D., University of Tennessee, 1989

Darshan Naidu  
Adjunct Instructor, Community Dentistry  
D.M.D., Harvard School of Dental Medicine, 2010  
Certificate—Prosthodontics, Nova Southeastern University, 2011

Kei Nakanishi  
Clinical Assistant Professor, OB/GYN  
B.A., Case Western Reserve University, 1990  
M.D., Case Western Reserve University, 1994

Joseph J. Namey, Jr.  
Clinical Professor, Internal Medicine  
B.S., Gannon University, 1983  
D.O., Southeastern University of the Health Sciences, 1987

Maher Nana  
Clinical Assistant Professor, Family Medicine  
M.D., Aleppo University, 1997  
B.S.N., Florida International University, 2005

Kenneth R. Nanni  
Adjunct Professor, Health Science  
B.S., University of Florida, 1995  
M.S., California College for Health Science, 1999  
Ph.D., Nova Southeastern University, 2004
Luis F. Narvaez  
Clinical Assistant Professor, Family Medicine  
M.D., Universidad del Valle, 1984

Antoinette Navarre  
Adjunct Faculty Member, Nutrition  
B.S., University of Delaware, 1988  
M.S., Finch University, 2000

Lourdes I. Navarro  
Clinical Instructor, Internal Medicine  
B.A., Liceo Hondureño Sagrado Corazon, 1970  
P.A., University Michoacan De San Nicolas de Hidalgo, 1979

Rajkumar M. Nebhrajani  
Clinical Assistant Professor, Surgery  
M.D., Topiwala National Medical College, 1979

Jeffrey Nelson  
Clinical Assistant Professor, Family Medicine  
B.S., George Fox University, 2004  
D.O., Western University of Health Sciences, 2010

Beverly Y. Nelson-Curtis  
Clinical Professor, Pediatrics  
B.A., Herbert H. Lehman College, 1976  
M.D., Downstate Medical Center, 1982

Cara R. Nelson-James  
Clinical Assistant Professor, Family Medicine  
B.A., Florida Atlantic University, 1977  
D.O., Nova Southeastern University, 2003

Jose Nery  
Clinical Associate Professor, Surgery  
M.D., Sao Paulo University, 1979

Edward Neuwirth  
Clinical Assistant Professor, Prosthodontics  
D.D.S., New York University College of Dentistry, 1960

Nathan Neville  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Northeastern University, New England College of Optometry, 2008

Cassandra Newkirk  
Clinical Associate Professor, Psychiatry  
B.S., Duke University, 1973  
M.D., University of North Carolina, 1989

Jack Newman  
Adjunct Faculty Member, Endodontics  
D.D.S., New York University, 1962

Emanuel Newmark  
Clinical Professor, Ophthalmology  
B.S., Rutgers University College of Pharmacy, 1959  
M.D., Duke University School of Medicine, 1966

Nam Q. Nguyen  
Clinical Assistant Professor, Internal Medicine  
B.A., Florida Atlantic University, 1994  
D.O., Nova Southeastern University, 1999

Thuy-Lan Nguyen  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Nova Southeastern University, 2002

Melissa Nichols  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Nova Southeastern University, 2009

Scott A. Nichols  
Clinical Assistant Professor, Pediatrics  
B.A., Occidental College, 1995  
M.D., University of Pennsylvania School of Medicine, 1999

William W. Nields  
Clinical Assistant Professor, Surgery  
B.A., University of Colorado, 1993  
M.D., University of South Florida, 2002

Barry P. Nierenberg  
Clinical Associate Professor, Psychiatry  
B.A., State University of New York, 1973  
M.S., Queens College, 1975  
Ph.D., University of Tennessee, 1981

Iran Niroomand-Rad  
Clinical Associate Professor, Pediatrics  
M.S., Michigan State University, 1982  
D.O., Southeastern University of the Health Sciences, 1989

Ross D. Nochimson  
Clinical Assistant Professor, Internal Medicine  
M.D., New York Medical College, 1975

Robert A. Norman  
Clinical Professor, Dermatology  
D.O., Chicago College of Osteopathic Medicine, 1981  
M.P.H., University of South Florida, 2001

Carlos H. Nousari  
Clinical Professor, Dermatology  
M.D., Universidad Catolica De Cordoba, 1989

Martin Novey  
Adjunct Clinical Associate Professor, Optometry  
B.S., Indiana University of Pennsylvania, 1991  
O.D., Pennsylvania College of Optometry, 1994

Robert P. Novo  
Clinical Assistant Professor, Pediatrics  
B.A., Rutgers University, 1975  
M.D., Universidad CETEC, 1980

Michael A. Nowak  
Clinical Assistant Professor, Pathology  
B.S., Xavier University, 1983  
M.D., Wright State University, 1988

Doron Nuchovich  
Clinical Assistant Professor, Internal Medicine  
B.S., ORT School of Technology, 1980  
M.D., University of the Republic, 1989

Edgard A. Nuñez  
Clinical Assistant Professor, Family Medicine  
M.D., Universidad Nacional Autonoma de Honduras, 1983
Jerome R. Obed  
Clinical Assistant Professor, Dermatology  
B.S., University of Florida, 1998  
D.O., Kirksville College of Osteopathic Medicine, 2003

Tatiana M. Ochoa  
Community Assistant Professor, Public Health  
M.D., Universidad Central del Ecuador, 1986

David K. O’Connor  
Clinical Assistant Professor, Radiology  
B.S., University of Miami, 1990  
M.D., University of Miami, 1994

Robert E. O’Connor  
Clinical Assistant Professor, Surgery  
B.S., Georgia State University, 1999  
M.D., Saba University, 2003

Timothy E. O’Connor  
Clinical Instructor, Preventive Medicine  
B.A., Wayne State University, 1974

Hector Octaviani  
Clinical Assistant Professor, Pediatrics  
B.S.N., University of Puerto Rico, 1978  
M.D., University of Puerto Rico School of Medicine, 1982

Arlene E. O'Donnell  
Clinical Assistant Professor, Family Medicine  
B.S., Liberty University, 2007  
D.O., Edward Via Virginia College of Osteopathic Medicine, 2011

Amy Ogburn  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., Auburn University, 1999  
Ph.D., University of South Alabama, 2003

Erin O’Hora  
Adjunct Faculty, Health Science  
B.S., Marywood University, 1998  
M.S., Marywood University, 2009  
D.H.Sc., Nova Southeastern University, 2014

Marshall D. Ohring  
Clinical Assistant Professor, Pediatrics  
M.D., Technion Institute of Technology School of Medicine, 1983

Nicholas Z. Okeson  
Clinical Assistant Professor, Family Medicine  
B.A., Bethany College, 1991  
D.O., Kirksville College of Osteopathic Medicine, 1995

Nnachi L. Oko  
Clinical Assistant Professor, Family Medicine  
M.D., University of North Carolina at Chapel Hill, 1987

Dennis J. O’Leary  
Clinical Professor, Internal Medicine  
B.A., Manhattan College, 1971  
D.O., Philadelphia College of Osteopathic Medicine, 1977

Juan Oms  
Clinical Assistant Professor, Psychiatry  
B.S., Ohio Dominican College, 1994  
M.D., Universidad Autonoma de Guadalajara, 1997

James Ongley  
Adjunct Faculty, Health Science  
B.S., University of Florida, 1973  
M.D., University of Florida, 1977  
J.D., Nova University, 1989

Peter H. Oostwouder  
Clinical Assistant Professor, Family Medicine  
B.A., Washington University, 1978  
M.D., St. Louis University School of Medicine, 1982

Arnold A. Oper  
Clinical Instructor, Family Medicine  
M.S., Columbia University, 1952  
M.D., University of New York College of Medicine, 1957

Jacques E. Orces  
Adjunct Assistant Professor, Biomedical Informatics  
Clinical Assistant Professor, Pediatrics  
B.A., Arizona State University, 1988  
D.O., Nova Southeastern University, 1996

Edgar G. Orellana  
Clinical Assistant Professor, Pediatrics  
M.D., University of San Carlos, Guatemala, 1979

Betty Oremland  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Hofstra University, 1976  
M.A., Hofstra University, 1977  

Aeyal Oren  
Clinical Assistant Professor, Surgery  
B.S., Tulane University, 1995  
D.O., Nova Southeastern University, 1999

Olayemi Osisioma  
Clinical Assistant Professor, Internal Medicine  
B.S., Jacksonville State University, 1985  
M.D., University of Maryland, 1995

Ahmed F. Osman  
Clinical Assistant Professor, Cardiology  
M.D., Cairo University Faculty of Medicine, 1991

Hussein M. D. Osman-Mohamed  
Clinical Assistant Professor, Surgery  
B.A., Ain Shams University, 1981  
M.D., Ain Shams University, 1986

Daniele Ostatnikova  
Clinical Professor, Pediatrics  
M.D., Comenius University Bratislava, 1982  
Ph.D., Comenius University Bratislava, 1988

Leon Ostroff  
Clinical Assistant Professor, Periodontology  
D.M.D., Tufts University School of Dental Medicine, 1973
Fredy A. Otalora
Adjunct Clinical Assistant Professor, Optometry
Universidad de la Salle, Colombia, 2000
O.D., Nova Southeastern University, 2009

Anthony N. Ottaviani
Clinical Professor, Pulmonary Medicine
Community Professor, Public Health
B.A., Gannon College, 1964
D.O., University of Health Sciences College of Osteopathic Medicine, 1968
M.P.H., Nova Southeastern University, 1997

Elizabeth Oviawe
Adjunct Instructor, Public Health
B.S., University of Lagos, 1991
M.S., Nova Southeastern University, 2007
M.S., Nova Southeastern University, 2009

Robert H. Ozaki
Clinical Assistant Professor, Family Medicine
B.S., University of California, 1994
D.O., Kirksville College of Osteopathic Medicine, 2001

Orestes Pablos
Clinical Assistant Professor, Surgery
M.D., University of Havana Medical School, 1960

James Pace
Adjunct Faculty, Physician Assistant Studies
P.A.C., University of Nebraska, 1976

Sidney Pace
Clinical Assistant Professor, Internal Medicine
B.S., Mississippi College, 1986
M.D., University of Mississippi, 1992

Barbara Packer-Muti
Adjunct Professor, Audiology
B.A., Douglas College, Rutgers University, 1974
M.S., Teachers College, Columbia, 1976
Ed.D., Nova Southeastern University, 1995

Oscar Padilla
Associate Professor, Pediatric Dentistry
D.D.S., Columbia University, 1995
Certificate—Pediatric Dentistry, Columbia University, 1997

Fabio M. Paes
Clinical Assistant Professor, Surgery
M.D., Universidade Federal da Bahia, 2005

Mark S. Palazzolo
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., Michigan State University, 1995
D.O., Michigan State University
College of Osteopathic Medicine, 1999

Richard J. Paley
Clinical Assistant Professor, Family Medicine
M.D., University of Virginia School of Medicine, 1989

Lynne Palma
Clinical Assistant Professor, Family Medicine
B.S.N., University of California, 1977
M.S., University of California, 1984

Siddharth J. Pandya
Clinical Associate Professor, Radiology
B.S., Arizona State University, 1990
D.O., University of Health Sciences College of Osteopathic Medicine, 1995

Sonali V. Pandya
Clinical Assistant Professor, Surgery
B.S., University of Miami, 1998
M.S., Barry University, 2000
M.D., St. George's University, 2004

Melvin E. Pann
Clinical Assistant Professor, Surgery
B.A., Hofstra University, 1969
M.D., New York University School of Medicine, 1973

Louis M. Paolillo
Clinical Assistant Professor, OB/GYN
B.A., Rutgers University, 1975
M.D., Autonomous University of Guadalajara, 1979

Juan C. Paramo
Clinical Associate Professor, Surgery
M.D., Pontificia Universidad Javeria, 1991

Judith Pardo
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., Duke University, 1977
M.D., University of Miami School of Medicine, 1981

Keith B. Paredes
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., Florida State University, 1974
M.D., University of Florida College of Medicine, 1977

Theresa Parenteau
Adjunct Faculty Member, College of Nursing
B.S.N., Barry University, 1990
M.S.N., Nova Southeastern University, 2006
D.N.P., Nova Southeastern University, 2014

Dianne M. Parker
Clinical Assistant Professor, Pediatrics
B.S., University of Central Florida, 1983
M.D., University of Miami, 1987

Robert Parkes
Adjunct Assistant Professor, Public Health
B.S., University of the West Indies, 1996
M.D., University of the West Indies, 2003
M.P.H., Nova Southeastern University, 2012

Angelica M. Parra
Clinical Assistant Professor, Pediatrics
B.S., Fordham University, 1998
M.D., University of Medicine and Dentistry of New York, 2003

Billy D. Parsons
Clinical Assistant Professor, Surgery
B.S., Southeastern Oklahoma State University, 1985
M.D., University of Oklahoma, 1989

Joshua Pasol
Adjunct Clinical Assistant Professor, Optometry
M.D.
Ashok Patel  
Clinical Assistant Professor, Psychiatry  
M.D., University of Baroda, 1984

Beel Patel  
Adjunct Faculty Member, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2007

Vipul R. Patel  
Clinical Associate Professor, Urology  
M.D., Baylor College of Medicine, 1995

Naresh H. Pathak  
Clinical Associate Professor, Internal Medicine  
B.A., University of California, 1979  
M.D., UTESA School of Medicine, 1985

Andres Patron  
Clinical Associate Professor, Internal Medicine  
B.A., Seton Hall University, 1984  
D.O., New York College of Osteopathic Medicine, 1988

Christopher D. Patterson  
Clinical Assistant Professor, Family Medicine  
B.S., University of South Florida, 1989  
D.O., Southeastern University of the Health Sciences, 1993

Victor Pazos  
Clinical Assistant Professor, Cardiology  
B.S., Escuela Vocacional, 1980  
M.D., Universidad de La Habana, 1986

Frank J. Pearl  
Clinical Professor, Cardiology  
B.A., University of Pennsylvania, 1969  
M.D., Jefferson Medical College, 1974

Michael Peery  
Clinical Assistant Professor, Surgery  
B.S., Middle Tennessee State University, 1979  
D.D.S., University of Tennessee, 1983  
M.D., St. Louis University, 1994

Eduardo I. Pena  
Clinical Assistant Professor, Psychiatry  
B.A., State University of New York, 1985  
B.A., State University of New York, 1989

Laura Pequeno  
Adjunct Faculty Member, Pharmacy Practice  
Pharm.D., University of Florida, 1998

Laura J. Peralta  
Clinical Assistant Professor, Family Medicine  
B.S.N., Texas Christian University, 1979  
D.O., Southeastern University of the Health Sciences, 1988

Jason D. Perelman  
Clinical Assistant Professor, Urology  
B.S., University of Colorado, 1992  
M.S., Indiana University, 1995  
M.D., Indiana University, 1997

Donny Perez  
Clinical Assistant Professor, Family Medicine  
B.S., Florida Atlantic University, 1999  
D.O., Philadelphia College of Osteopathic Medicine, 2003

Hugo N. Perez  
Clinical Associate Professor, Pediatrics  
M.D., Universidad Central del Este Dominican Republic, 1980

Margaret Perez  
Adjunct Faculty Member, Physical Therapy  
B.S., University of Florida, 2001  
M.P.T., University of Florida, 2002

Eduardo Perez-Stable  
Clinical Assistant Professor, Family Medicine  
B.S., University of South Florida, 1990  
M.D., University of Miami, 1994

Jose H. Perez-Suarez  
Clinical Assistant Professor, Family Medicine  
B.S., Catholic University of Puerto Rico, 1978  
M.D., Ponce School of Medicine, 1982

Trina C. Perkins  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Nova Southeastern University, 2007

David E. Perloff  
Clinical Associate Professor, Internal Medicine  
B.G.S., University of Miami, 1987  
M.D., University of Miami School of Medicine, 1991

Elby Persteinher  
Adjunct Faculty, Health Science  
B.S., Florida Hospital College of Health Sciences, 2006  
M.H.Sc., Nova Southeastern University, 2008  
D.H.Sc., Nova Southeastern University, 2013

Dana E. Perrin  
Clinical Assistant Professor, Family Medicine  
B.S., Colorado State University, 1974  
M.A., University of California, 1976  
M.D., University of South Florida College of Medicine, 2002

Parvathi Perumareddi  
Clinical Assistant Professor, Medical Education  
B.S., University of Florida, 1989  
D.O., 1995

Richard K. Peterson  
Clinical Associate Professor, Family Medicine  
B.S., University of Florida, 1987  
M.D., University of Florida, 1992

Mitchell Pettit  
Adjunct Clinical Assistant Professor, Optometry  
B.S., Nebraska Wesleyan University, 1989  
O.D., Illinois College of Optometry, 1993

Vincent W. Petraroli  
Adjunct Assistant Professor, Biomedical Informatics  
B.S., Nova Southeastern University, 1994  
M.S., Nova Southeastern University, 1996  
Ph.D., Nova Southeastern University, 1999

Anita L. Petteway  
Clinical Instructor, Internal Medicine  
B.S., Florida A&M University, 1989  
M.D., University of Maryland School of Medicine, 1993
Lyn Peugeot  
Adjunct Faculty Member, College of Nursing  
B.S.N., Nova Southeastern University, 2012  
M.S.N., Nova Southeastern University, 2015

Elizabeth Philippe  
Clinical Assistant Professor, Family Medicine  
B.S., College Marie Anne, 1978  
M.D., Republic of Haiti, 1984  
M.P.H., Yale University, 1986

Kerrilyn Phillips  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., University of Louisiana—Monroe, 1983  
M.A., University of Louisiana—Monroe, 1986  
SLPD, Nova Southeastern University, 2003

Lois Piano  
Adjunct Faculty Member, College of Nursing  
B.S.N., Saint Joseph’s College of Maine, 1981  
M.S.N., Gwynedd Mercy University, 1984  
Doctorate, Temple University, 1997

Eli J. Piatigorsky  
Clinical Assistant Professor, Dermatology  
B.A., University of Minnesota, 1996  
M.D., University of Minnesota, 2001

Marguerite Pierce  
Adjunct Faculty Member, College of Nursing  
B.S.N., Rutgers University, 1983  
M.S.N., Phoenix University, 2010

Jack Piermatti  
Adjunct Faculty Member, Prosthodontics  
D.M.D., Fairleigh Dickinson University, 1979

Berry Pierre  
Clinical Assistant Professor, Internal Medicine  
B.S., Florida State University, 2007  
M.P.H., Nova Southeastern University, 2011  
D.O., Nova Southeastern University, 2011

Gerald Pierre  
Clinical Assistant Professor, OB/GYN  
A.B., Bard College, 1975  
M.D., Meharry Medical College, 1980

Yves E. Pierre-Louis  
Clinical Assistant Professor, Family Medicine  
M.D., Haiti State University Medical School, 1980

Antoinette C. Pignataro  
Clinical Assistant Professor, Internal Medicine  
B.A., Manhattanville College, 1979  
M.D., San Juan Bautista School of Medicine, 1983

Rhoda Pilelsky-Levine  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Boston University, 1981  
M.A., Northwestern University, 1983  
SLPD, Nova Southeastern University, 2000

Joseph Pino  
Clinical Assistant Professor, Family Medicine  
B.A., Hunter College, 1977  
M.D., University of Dominica, 1981  
M.B.A., University of Phoenix, 2000

Ana S. Piragic  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., University of Central Florida, 2007  
M.A., University of Central Florida, 2009

Patrick J. Pirotte  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Southern California College of Optometry, 1985

Mathias Piskur  
Clinical Assistant Professor, Cardiology  
B.A., Queens College, 1964  
M.D., University of Bologna, 1970

David Z. Pizzimenti  
Clinical Assistant Professor, Internal Medicine  
B.S., University of Florida, 1997  
D.O., Nova Southeastern University, 2002

Daniel J. Plasencia  
Clinical Associate Professor, Pediatrics  
M.D., Doctor of Medicine and Surgery Medical School, 1975

Melvin Platt  
Adjunct Professor, Prosthodontics  
D.D.S., University of Detroit, 1955

Ritchie R. Plummer  
Clinical Assistant Professor, Family Medicine  
D.O., Des Moines College of Osteopathic Medicine, 1979

Joel S. Policzer  
Clinical Associate Professor, Hematology/Oncology  
B.S., Syracuse University, 1970  
M.S., University of Brussels, 1974  
M.D., College of Medicine and Dentistry of New Jersey, 1976

Marc Pomerautz  
Adjunct Instructor, Prosthodontics  
D.M.D., University of Pittsburgh, 1966  
G.P.R. Mount Sinai Hospital, 1967

Ian Pop  
Clinical Assistant Professor, Psychiatry  
M.D., Institute of Medicine and Pharmacology of Cluj, 1966

Robert J. Poppiti  
Clinical Professor, Surgery  
B.S., University of Miami, 1975  
M.D., Universidad Nacional, 1978

Constance K. Porcaro  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., University of South Dakota, 1987  
M.A., University of Northern Colorado, 1989  
Ph.D., University of Arizona, 2004
Benjamin Porras
Adjunct Assistant Professor, Endodontics
D.D.S., Pontifical Xavier University, Bogota, Colombia, 1980
Certificate—Endodontics, Columbia University, New York, 1987

Regina Portcarrero
Adjunct Clinical Associate Professor, Optometry
O.D., Nova Southeastern University, 2002

Manuel Porth
Clinical Associate Professor, Orthopedic Surgery
M.D., Wayne State University, 1968

David C. Portnoy
Clinical Assistant Professor, Hematology/Oncology
B.A., Brandeis University, 1999
M.D., State University of New York Upstate Medical University, 2003

Seth H. Portnoy
Clinical Assistant Professor, Family Medicine
B.A., University of South Florida, 1980
B.S., Florida State University, 1982
M.D., University of South Florida College of Medicine, 1992

Michelle C. Powell
Clinical Assistant Professor, Family Medicine
B.S., Florida Atlantic University, 1991
D.O., Nova Southeastern University, 1996

Randy Powell
Adjunct Faculty Member, College of Nursing
B.S.N., Nova Southeastern University, 2006
M.S.N., Nova Southeastern University, 2010

Oscar D. Pozo
Clinical Instructor, Psychiatry
M.D., La Universidad Racional Autonoma de Nicaragua, 1971

Ramona Pramedass-Blom
Adjunct Faculty Member, College of Nursing
Pharm.D., Florida A & M University, 2004

John W. Prather
Clinical Assistant Professor, Cardiology
B.S., Mississippi State University, 1965
Ph.D., University of Mississippi Medical Center, 1968
M.D., University of California, 1972

Allan Pratt
Clinical Assistant Professor, Obstetrics and Gynecology
B.S., Brigham Young University, 1972
D.O., Des Moines College of Osteopathic Medicine, 1976

Lisa Preoti
Adjunct Faculty Member, Department of Speech-Language Pathology
B.S., University of Florida, 1994
M.A., University of Houston, 1998

Victoria Prignanc
Adjunct Professor, Occupational Therapy
B.S., University of Wisconsin—Milwaukee, 1994
M.S., University of Vermont, 2001
Ph.D., Nova Southeastern University, 2007

Mario E. Profet
Clinical Instructor, Internal Medicine
M.D., Instituto Superior de Ciencias Medicas, 1981

Bernadette C. Profeta
Clinical Assistant Professor, Surgery
B.S., St. Joseph University, 1991
M.D., Jefferson Medical College, 1997

Melvin M. Propis
Clinical Assistant Professor, Surgery
B.A., Syracuse University, 1964
M.D., Hadassah Medical School, 1972

Ivan Puente
Clinical Associate Professor, Surgery
B.S., University of Michigan, 1983
M.D., University of California, 1987

Isidro Pujol
Clinical Assistant Professor, Internal Medicine
B.S., University of Miami, 1988
D.O., Nova Southeastern University, 1994

Subhash R. Puranik
Clinical Assistant Professor, Surgery
B.S., Osmania Medical College, 1963

Alexander Pushka
Clinical Assistant Professor, Psychiatry
M.D., Ivano-Frankovsky Medical Institute, 1980

Syed H. Qadri
Clinical Instructor, Obstetrics and Gynecology
M.D., Osmania Medical College, 1975

Xiaomei Qu
Adjunct Clinical Assistant Professor, Optometry
B.(Medicine), Shanghai Medical University, 1990
Ph.D.(Medicine), Fudan University, 2002

Georges Quesnel
Clinical Associate Professor, Obstetrics and Gynecology
M.D., Universite de Montreal, 1965

Hugo F. Quevedo
Adjunct Faculty, Physician Assistant Studies
B.S., Universidad de Chile, 1981
M.A., San Jose State University, 1992
P.A., Miami Dade Community College, 2001

David Quinn
Adjunct Instructor, Public Health
B.S., University of Maryland, 2011
M.P.H., Nova Southeastern University
Gerardo Quinonez
Clinical Assistant Professor, Internal Medicine
M.D., University of California, 1997

Zafar I. Qureshi
Clinical Assistant Professor, Pediatrics
M.D., Sindh Medical College, 1989

Harold S. Rabinowitz
Clinical Professor, Dermatology
B.A., Princeton University, 1973
M.D., University of Miami School of Medicine, 1977

Mark L. Rabinowitz
Clinical Associate Professor, Obstetrics and Gynecology
M.D., University of Miami School of Medicine, 1979

Ian Raden
Adjunct Assistant Professor, Optometry

Michael Radu
Adjunct Instructor, Prosthodontics
D.D.S., University of Bucharest, 1979
M.S., Lynn University, 2000

Frederick Rahe
Adjunct Assistant Professor, Audiology
B.A., University of Florida, 1975
M.A., University of Florida, 1976
Au.D., Nova Southeastern University, 2000

Anand P. Rajani
Clinical Instructor, Surgery
B.A., Emory University, 2004
D.O., Philadelphia College of Osteopathic Medicine, 2009
M.S., Lake Erie College of Osteopathic Medicine, 2013

Suresh P. Rajpara
Clinical Assistant Professor, Psychiatry
M.D., M. P. Shah Medical College, 1978

Muthuswami Ramachandran
Clinical Assistant Professor, Nephrology
M.D., University of Madras, 1965

Nina C. Ramirez
Clinical Assistant Professor, Pediatrics
B.A., Fordham University, 1953
M.D., Cornell University, 1978

Walter O. Ramirez
Clinical Assistant Professor, Internal Medicine
B.S., National Institute Central para Varones, 1985
M.D., La Universidad de San Carlos, 1992

Eileen M. Ramsaran
Clinical Instructor, Internal Medicine
M.D., St. George's University School of Medicine, 1991

Elaine M. Rancatore
Clinical Assistant Professor, Family Medicine
B.A., Boston University, 1980
M.S., Fairleigh Dickinson University, 1982
M.D., New York University, 1984

Shahid R. Randhawa
Clinical Assistant Professor, Internal Medicine
M.D., University of Punjab, 1985

Theyyar V. Rangarajan
Adjunct Faculty, Prosthodontics
M.B.A., New York University, 1981
D.D.S., New York University, 1989

Jorge Rangel
Clinical Assistant Professor, Family Medicine
M.D., Pontificia Universidad Javeriana, 1979
M.P.H., University of Missouri, 1990

Robert F. Raspa
Clinical Associate Professor, Family Medicine
B.S., Fairmont State College, 1978
M.D., West Virginia University, 1982

Ranga Rathakrishnan
Clinical Assistant Professor, Internal Medicine
B.A., University of Oklahoma, 1988
M.D., University of Oklahoma College of Medicine, 2000

Kenneth R. Ratzan
Clinical Professor, Internal Medicine
M.D., Harvard Medical School, 1965

Sergio Rauchwerger
Assistant Professor, Prosthodontics
D.D.S., Universidad Central de Venezuela, 1995
M.M.Sc., Harvard University, 2000

Lionel P. Raymon
Clinical Assistant Professor, Pathology
B.S., Lycee Bouchardon, 1983
Pharm.D., University of Bourgogne School of Medicine and Pharmacy, 1989
Ph.D., University of Maryland, 1994

Melvyn H. Rech
Clinical Professor, Orthopedic Surgery
A.B., Temple University, 1960
D.O., Kirkville College of Osteopathic Medicine, 1965
Fellow, American College of Osteopathic Surgeons
Fellow, American Osteopathic Academy of Orthopedics

Dianne Rechtine
Clinical Associate Professor, Family Medicine
M.D., West Virginia University School of Medicine, 1965

Monica A. Recine
Clinical Assistant Professor, Pathology
M.D., Central University of Venezuela, 1993

Hope C. Reed
Adjunct Faculty Member, Department of Speech-Language Pathology
B.S., Alabama Agricultural and Mechanical University, 1999
M.S., Alabama Agricultural and Mechanical University, 2001
SLP.D., Nova Southeastern University, 2005

Alfredo Rego
Clinical Assistant Professor, Surgery
B.S., English American College of Guatemala, 1977
M.D., University of San Carlos of Guatemala, 1984
Ph.D., Georgetown University School of Medicine, 1990
Marcos Rejtman
Clinical Assistant Professor, Family Medicine
B.S., University of Florida, 1990
D.O., Nova Southeastern University, 1994

Michael R. Remaly
Clinical Assistant Professor, Family Medicine
B.S., Daemen College, 1992
D.O., Chicago College of Osteopathic Medicine, 2000

Leonid Remenson
Clinical Assistant Professor, Psychiatry
M.D., Tomsk Medical Institute, 1984

Stephen Resnick
Adjunct Instructor, Prosthodontics
D.M.D., Fairleigh Dickinson University, 1974

Julia M. Retureta
Clinical Assistant Professor, Pediatrics
B.S., Interamerican University of Puerto Rico, 1989
M.D., Universidad Central del Caribe School of Medicine, 1993

Warren Reuther
Clinical Assistant Professor, Internal Medicine
B.A., Loyola University, 1988
B.S., Tulane University, 1990
M.D., Louisiana State University School of Medicine, 1994

Luis C. Rey-Martinez
Clinical Assistant Professor, Pathology
M.D., Universidad del Norte, 1988

Mallica Reynolds
Adjunct Assistant Professor, Disaster and Emergency Management
B.S., Nova Southeastern University, 2006
M.S., Nova Southeastern University, 2011

Donna K. Rhoden
Clinical Assistant Professor, Pediatrics
B.A., Clemson University, 1982
B.S., University of Georgia, 1985
M.D., Medical College of Georgia, 1988

Hasan Riaz
Clinical Assistant Professor, Internal Medicine
M.D., Nishtar Medical College, 2004

Jennifer S. Rich
Clinical Assistant Professor, Pediatrics
B.A., Brandeis University, 1992
M.D., Yeshiva University, 1996

Marvin Richards
Adjunct Instructor, Prosthodontics
D.D.S., New York University, 1967

Willie F. Richardson, Jr.
Clinical Assistant Professor, Dermatology
B.S., Pembroke State University, 1996
M.D., East Carolina University, 2000

Paul T. Richman
Clinical Assistant Professor, Oral and Maxillofacial Surgery
D.D.S., University of Michigan School of Dentistry, 1958
M.S., University of Illinois, 1961

Gary J. Richmond
Clinical Assistant Professor, Pulmonary Medicine
B.S., University of Massachusetts, 1979
M.D., New York Medical College, 1983

Mark L. Ritch
Clinical Assistant Professor, Internal Medicine
B.A., University of South Florida, 1984
D.O., Southeastern University of the Health Sciences, 1988

Rafael F. Rivas-Chacon
Clinical Assistant Professor, Rheumatology
M.D., University of El Salvador, 1980

Aleydis Rivera-Onitiri
Clinical Instructor, Family Medicine
B.S., Pontificia Universidad Catolica de Puerto Rico, 2002
M.D., Universidad Autonoma de Guadalajara, 2007

Carlos Riveros
Clinical Assistant Professor, Internal Medicine
M.D., La Universidad Militar Nueva Granada, 1990

Kristie Rivers
Clinical Assistant Professor, Pediatrics
B.S., Wake Forest University, 1997
M.D., University of Miami School of Medicine, 2001

Daniel Rivlin
Clinical Assistant Professor, Dermatology
B.S., University of Miami, 1983
M.D., New York University School of Medicine, 1987

David L. Roach
Community Assistant Professor, Public Health
B.A., Emory University, 1969

James P. Roach
Clinical Assistant Professor, Family Medicine
B.A., Florida Atlantic University, 1996
D.O., Nova Southeastern University, 2002

Christopher C. Roberts
Clinical Instructor, Surgery
B.S., Georgia State University, 1997
D.O., Nova Southeastern University, 2005

Elysa Roberts
Adjunct Professor, Occupational Therapy
B.A., Syracuse University, 1990
M.S., Florida International University, 1994
Ph.D., Nova Southeastern University, 2001

Paul J. Roberts III
Clinical Assistant Professor, Psychiatry
B.S., University of Central Florida, 1981
D.O., Southeastern University of the Health Sciences, 1985

Sherry Robins
Adjunct Faculty, Health Science
A.A.S., Delta College, 1977
B.S.N., Saginaw Valley State University, 1989
M.S., University of Michigan, 1992
D.H.Sc., Nova Southeastern University, 2007
Keith J. Robinson  
Clinical Assistant Professor, Pulmonary Medicine  
B.S., Ithaca College, 1993  
M.S., Florida State University, 2000  
M.D., Indiana University, 2000

Nyoka Robinson  
Adjunct Instructor, Disaster and Emergency Management  
B.S., Nova Southeastern University, 2009  
M.S., Nova Southeastern University, 2013

Tommie L. Robinson, Jr.  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., University of Mississippi, 1984  
M.S., University of Mississippi, 1986  
Ph.D., Howard University, 1992

Jeffry Rocker  
Clinical Assistant Professor, Family Medicine  
B.S., University of Central Florida, 1984  
D.O., Southeastern University of the Health Sciences, 1988

Edgar B. Rodas  
Clinical Assistant Professor, Surgery  
M.D., Universidad de Cuenca Facultad de Medicina, 1995

Raul A. Rodas  
Clinical Associate Professor, Surgery  
B.S., University of Oregon, 1978  
D.O., Michigan State University, 1983

Eloy Roman  
Clinical Assistant Professor, Internal Medicine  
B.S., John's University, 1986  
D.O., Northeastern University of the Health Sciences, 1993

Luis E. Rodriguez  
Clinical Assistant Professor, Obstetrics and Gynecology  
M.D., Santa Maria Catholic University, 1999

Douglas Rolfe  
Adjunct Faculty Member, Prosthodontics  
D.D.S., Emory University, 1985

Patricia L. Rooney  
Clinical Assistant Professor, Surgery  
B.S., Hillsdale College, 1977  
D.O., University of Health Sciences College of Osteopathic Medicine, 1985

Eli S. Rosabal  
Clinical Assistant Professor, Orthopedic Surgery  
B.S., Polytechnic Institute of Brooklyn, 1973  
M.D., State University of New York, 1977
Karen M. Rosado  
Clinical Instructor, Pediatrics  
B.S., University of Puerto Rico, 2004  
M.D., Universidad Central del Caribe, 2009

Gavin E. Rose  
Clinical Assistant Professor, Psychiatry  
B.A., Johns Hopkins University, 1983  
M.D., University of Maryland School of Medicine, 1988

Joel B. Rose  
Clinical Associate Professor, Family Medicine  
D.O., West Virginia School of Osteopathic Medicine, 1983

Norman Rose  
Clinical Professor, Surgery  
B.S., Marietta College, 1959  
D.O., Des Moines College of Osteopathic Medicine & Surgery, 1963

Saul Rose  
Clinical Associate Professor, Surgery  
B.S., Marietta College, 1956  
D.O., Des Moines College of Osteopathic Medicine, 1969

Leslie B. Rosen  
Clinical Associate Professor, Dermatology  
B.A., Kenyon College, 1975  
M.D., State University of New York, 1979

Richard Rosen  
Clinical Assistant Professor, Family Medicine  
D.O., Philadelphia College of Osteopathic Medicine, 1975

David Rosenberg  
Clinical Assistant Professor, Pediatrics  
B.S., Florida International University, 1976  
M.D., American University of the Caribbean, 1984

Marc Rosenberg  
Clinical Assistant Professor, Internal Medicine  
B.A., State University of New York—Binghampton, 1983  
D.O., New York College of Osteopathic Medicine, 1988

Boaz S. Rosenblat  
Clinical Assistant Professor, Family Medicine  
B.A., Columbia University, 1994  
M.D., State University of New York, 1998

Morton Rosenbluth  
Clinical Assistant Professor, Periodontics,  
Division of Surgical Sciences  
D.D.S., New York University, 1946  
Certificate—Periodontics, New York University, 1957

Robert S. Rosenstein  
Clinical Assistant Professor, Cardiology  
M.D., University of Louisville Medical School, 1978

Mark J. Rosenthal  
Clinical Assistant Professor, Family Medicine  
B.A., University of Pennsylvania, 1982  
D.O., New York College of Osteopathic Medicine, 1987

Charles Ross  
Clinical Assistant Professor, Family Medicine  
B.S., Florida State University, 1992  
M.D., University of South Florida, 2003

Patricio Rossi  
Clinical Assistant Professor, Radiology  
M.D., Universidad de Buenos Aires, 1997

Stephen L. Roth  
Clinical Assistant Professor, Cardiology  
B.A., New York University Heights College, 1970  
M.D., University of Pennsylvania School of Medicine, 1976

Jeffrey Rothstein  
Clinical Assistant Professor, Family Medicine  
B.S., Brooklyn College, 1973  
M.S., University of Arizona, 1977  
Ph.D., Wayne State University, 1981  
D.O., Southeastern College of Osteopathic Medicine, 1987

Howard D. Routman  
Clinical Assistant Professor, Orthopedic Surgery  
B.A., University of Florida, 1991  
D.O., Nova Southeastern University, 1995

Patricia A. Rowe-King  
Clinical Associate Professor, Pediatrics  
B.A., Boston University, 1982  
M.D., University of Miami School of Medicine, 1988

Daryl Roy  
Adjunct Faculty, Prosthodontics  
D.M.D., Boston University, 1986

John J. Rozanski  
Clinical Assistant Professor, Cardiology  
B.S., Seton Hall University, 1970  
M.D., New York University, 1974

Richard Rozencwaig  
Clinical Associate Professor, Orthopedic Surgery  
B.S., University of Miami, 1988  
M.D., University of Miami School of Medicine, 1992

Paul L. Rozynes  
Clinical Assistant Professor, Internal Medicine  
B.S., University of Florida, 1971  
M.D., University of Miami School of Medicine, 1975

David M. Rube  
Clinical Associate Professor, Psychiatry  
B.A., Yeshiva University, 1983  
M.D., Mount Sinai School of Medicine, 1987

Mark A. Rubenstein  
Clinical Associate Professor, Family Medicine  
B.S., Tulane University School of Engineering, 1985  
M.D., State University of New York Health Science Center, 1989

Jose A. Rubero  
Clinical Assistant Professor, Family Medicine  
B.S., University of Puerto Rico, 1992  
M.D., Universidad Central del Caribe, 1996
Darin M. Rubin  
Clinical Assistant Professor, Family Medicine  
B.A., State University of New York, 1988  
D.O., New York College of Osteopathic Medicine, 1992

Mark A. Rubin  
Clinical Assistant Professor, Family Medicine  
B.A., West Virginia University, 1989  
M.D., Marshall University, 1993

Adam J. Rubinstein  
Clinical Assistant Professor, Surgery  
B.S., Brooklyn College, 1992  
M.D., St. Louis University School of Medicine, 1996

Michael J. Ruddy  
Clinical Assistant Professor, Orthopedic Surgery  
B.S., Villanova University, 1973  
M.D., Villanova University, 1979

Camilo A. Ruiz  
Clinical Assistant Professor, Internal Medicine  
B.S., Florida International University, 2002  
D.O., Nova Southeastern University, 2007

Catalina Ruiz-Romero  
Adjunct Clinical Assistant Professor, Optometry  
O.D., New England College of Optometry, 2005

Joel L. Rush  
Clinical Professor, Orthopedic Surgery  
B.A./B.S., Washington University, 1977  
D.O., Southeastern University of the Health Sciences, 1985

Stephen Russo  
Clinical Assistant Professor, Sports Medicine  
B.S., University of Pittsburgh, 1993  
M.S., Nova Southeastern University, 1994  
Ph.D., Nova Southeastern University, 1999

Joshua Rycus  
Clinical Assistant Professor, Family Medicine  
B.S., Michigan State University, 1996  
D.O., Michigan State University College of Osteopathic Medicine, 2001

Serge Saadoun  
Adjunct Assistant Professor, Biomedical Informatics  
B.S., Lycee Arago, 1972  
M.S., University Paris VI, 1982  
M.D., University Paris VII, 1982  
M.P.H., Columbia University, 1986

Sam Sadati  
Adjunct Assistant Professor, Cariology and Restorative Dentistry  
D.D.S., Creighton University, 1994

Camil N. Sader  
Clinical Assistant Professor, Surgery  
B.A., Goucher College, 1994  
M.D., University of Maryland, 1998

Carl H. Sadowsky  
Clinical Professor, Neurology  
B.S., State University of New York at Stony Brook, 1967  
M.D., Cornell University, 1971

Utpal N. Sagar  
Clinical Assistant Professor, Internal Medicine  
B.S., Nova Southeastern University, 2001  
M.D., University of Medicine and Dentistry of New Jersey, 2005

Gennaro Sagliocca  
Clinical Assistant Professor, Nephrology  
B.S., Rensselaer Polytechnic Institute, 1976  
M.D., University of Padova School of Medicine, 1985

Bhagirathy Sahasranaman  
Clinical Assistant Professor, Psychiatry  
M.D., VSS Medical College, 1981

Palghat M. Sahasranaman  
Clinical Assistant Professor, Pediatrics  
M.D., University of Calcutta, 1972

Tejinder Saini  
Clinical Assistant Professor, Psychiatry  
M.D., Punjabi University, 1978

James Sainsbury  
Adjunct Assistant Professor, Endodontics, Division of Surgical Sciences  
D.M.D., University of Pittsburgh, 1970

Gustavo Saldias  
Adjunct Assistant Professor, Public Health  
B.A., North Carolina State University, 1984  
M.P.H., University of North Carolina, 1990

Eli R. Saleeby  
Clinical Assistant Professor, Dermatology  
B.S., Columbia University, 1977  
M.D., Jefferson Medical College, 1981

Nagesh Salian  
Clinical Assistant Professor, Pulmonary Medicine  
M.D., Karnatak University, 1983

Emery M. Salom  
Clinical Associate Professor, Obstetrics and Gynecology  
B.S., University of Miami, 1993  
M.D., University of Miami School of Medicine, 1997

David B. Saltzman  
Clinical Assistant Professor, Pulmonary Medicine  
B.A., Temple University, 1967  
D.O., Philadelphia College of Osteopathic Medicine, 1972

Susan G. Salzman  
Adjunct Clinical Hygienist Instructor, Periodontology, Division of Surgical Sciences  
A.S., New York Community College, 1979

Harvey R. Samowitz  
Clinical Associate Professor, Urology  
B.S., Duke University, 1980  
M.D., University of Connecticut School of Medicine, 1984

Jose U. Sanchez  
Clinical Assistant Professor, Internal Medicine  
M.D., Superior Institute of Medical Sciences of Havana, 1986
Ramon Sanchez  
Adjunct Associate Professor, Prosthodontics  
D.D.S., University of Iowa College of Dentistry, 1967

Marcos A. Sanchez-Gonzalez  
Clinical Assistant Professor, Family Medicine  
B.S., University of Puerto Rico, 1999  
M.D., Universidad Iberoamericana, 2005  
Ph.D, Florida State University, 2013

Aida Sanchez-Jimenez  
Clinical Assistant Professor, Internal Medicine  
M.D., Universtatis Caribensis, 1986

Javier Sandoval  
Clinical Assistant Professor, Family Medicine  
B.S., University of Central Florida, 2000  
M.D., Nova Southeastern University, 2005

John R. Santangelo  
Adjunct Instructor, Biomedical Informatics  
B.S., Barry University, 2010

Juan Santos-Olivares  
Adjunct Faculty Member, Pharmacy Practice  
Pharm.D., Nova Southeastern University, 2005

Michael J. Sasoni  
Clinical Assistant Professor, Family Medicine  
B.S., Florida Atlantic University, 1997  
D.O., Nova Southeastern University, 2002

James Satovsky  
Clinical Assistant Professor, Endodontics  
D.D.S., University of Michigan School of Dentistry, 1971  
M.S., University of Michigan, 1974

Richard Saul  
Associate Professor, Audiology  
B.A., University of Florida, 1973  
M.A., Florida Atlantic University, 1976  
Ph.D, State University of New York—Buffalo, 1983

John M. Saunders  
Clinical Assistant Professor, Pediatrics  
B.A., Case Western University, 1999  
M.D., University of Cincinnati, 2004

Sandra Savinelli  
Adjunct Faculty, Health Science  
B.S., Kean College, 1984  
M.A., Marywood College, 1990  
S.L.P.D., Nova Southeastern University, 2001

Timothy Scala  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., Florida State University, 1999  
M.S., Nova Southeastern University, 2001  
Psy.D., Nova Southeastern University, 2004

Thomas L. Schaar  
Clinical Assistant Professor, Family Medicine  
M.D., Wayne State University, 1980

Paul N. Schacknow  
Clinical Associate Professor, Ophthalmology  
B.S., Brooklyn College, 1970  
Ph.D., City University of New York, 1976  
M.D., University of Miami School of Medicine, 1983

Shelley Schacter  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., Adelphi University, 1972  
M.A., George Washington University, 1973

Curtis Schalit  
Adjunct Assistant Professor, Oral and Maxillofacial Surgery  
D.D.S., University of Missouri, 1993  
Certificate—General Practice, University of North Carolina, 1995

Jordan Schapiro  
Adjunct Instructor, Endodontics  
D.D.S., New York University, 1991

Michael Scharmett  
Adjunct Instructor, Cariology and Restorative Dentistry  
D.D.S., Howard Dental College, 1971

Virginia Scheppa  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., College of New Rochelle, 1981  
M.S., Adelphi University, 1983  
M.S., Nova Southeastern University, 1998

Lawrence A. Schifman  
Clinical Assistant Professor, Dermatology  
B.S., University of Miami, 1996  
M.D., University of Medicine and Dentistry of New Jersey, 2000

Brent M. Schillinger  
Clinical Associate Professor, Dermatology  
B.A., State University of New York, 1975  
M.D., State University of New York, 1979

Sharon A. Schmidt  
Clinical Assistant Professor, Medical Education  
M.S., State University of New York, 1984

George J. Schmieder  
Clinical Associate Professor, Dermatology  
B.S., Le Moyne College, 1983  
D.O., Philadelphia College of Osteopathic Medicine, 1984

Jeffrey Schneider  
Clinical Assistant Professor, Internal Medicine  
B.A., University of Pennsylvania, 1988  
M.D., Mount Sinai School of Medicine, 1992

Ricky M. Schneider  
Clinical Assistant Professor, Internal Medicine  
M.D., Yale University School of Medicine, 1977

Martin S. Schnier  
Clinical Assistant Professor, Family Medicine  
B.A., Lafayette College, 1980  
D.O., University of Medicine and Dentistry of New Jersey, 1984
Kathleen Schrank
Clinical Professor, Family Medicine
B.S., University of Wisconsin, 1972
M.D., University of Miami School of Medicine, 1979

Michael Schulman
Clinical Assistant Professor, Internal Medicine
B.A., State University of New York—Binghamton, 1983
D.O., University Health Sciences College of Osteopathic Medicine, 1988

Aaron Schwartz
Clinical Assistant Professor, Pulmonary Medicine
B.S., University of Miami, 1980
D.O., Philadelphia College of Osteopathic Medicine, 1984

Gary B. Schwartz
Clinical Associate Professor, Orthopedic Surgery
B.S., Fairleigh Dickinson University, 1976
M.D., New York Medical College, 1980

Leslie H. Schwartz
Clinical Associate Professor, Psychiatry
A.B., Columbia University, 1967
M.D., University of Pennsylvania, 1971

Roger K. Schwartzberg
Clinical Assistant Professor, Internal Medicine
B.A., Syracuse University, 1970
D.O., Michigan State University College of Osteopathic Medicine, 1973

James J. Sciote
Clinical Associate Professor, Preventive Medicine
B.S., Geneva College, 1982
D.D.S., University of North Carolina, 1986
M.S., University of Michigan, 1989
Ph.D., University of Michigan, 1992

Anthony Sclar
Adjunct Faculty, Oral and Maxillofacial Surgery
D.M.D., University of Florida, 1984

Gregory Scott
Adjunct Faculty, Health Science
B.S., Ohio State University, 1998
M.H.A., Ohio State University, 2000
Ph.D., Old Dominion University, 2013

Robert H. Sculthorpe
Clinical Professor, Anesthesiology
B.S., University of Nebraska, 1970
D.O., Philadelphia College of Osteopathic Medicine, 1974

Joan M. Sears
Adjunct Clinical Assistant Professor, Optometry
O.D., Illinois College of Optometry, 1991

Sandra Sears
Community Assistant Professor, Public Health
B.S., Morgan State College, 1973
M.B.A., Northeastern University, 1975

Anabel Sedeno Martinez
Adjunct Faculty Member, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2013

Mona Sedrak
Adjunct Faculty, Health Science
B.S., University of Texas South Western Medical Center—Dallas, 1990
M.S., AT Stills University, 2000
Ph.D., Walden University, 2003

Scott D. Segal
Clinical Assistant Professor, Psychiatry
B.S., Rensselaer Polytechnic Institute, 1982
M.D., Albany Medical College, 1986
M.B.A., University of Miami, 1996

Zachary K. Segal
Clinical Assistant Professor, Surgery
B.A., Brown University, 1996
M.D., University of Miami, 2001

Romualdo J. Segurola, Jr.
Clinical Associate Professor, Surgery
M.D., Universidad Nacional Pedro Henriquez Urena, 1992

Sharanjeet Sekhon
Clinical Assistant Professor, Family Medicine
B.S., University of British Columbia, 2002
M.D., Saba University, 2007

Andrew A. Seltzer
Clinical Assistant Professor, Orthopedic Surgery
B.S., Michigan State University, 1979
D.O., University of Osteopathic and Health Sciences, 1983

Paul D. Seltzer
Clinical Associate Professor, Orthopedic Surgery
B.S., Eastern Michigan University, 1976
D.O., Philadelphia College of Osteopathic Medicine, 1980

Nemalan Selvaraj
Clinical Assistant Professor, Internal Medicine
D.O., Nova Southeastern University, 2006

Robert Selz
Adjunct Faculty, Prosthodontics
D.D.S., New York University College of Dentistry, 1963
M.S., New York University Graduate School of Arts and Sciences, 1966
Certificate—Prosthodontics, New York University College of Dentistry, 1966
Diplomate, American Board of Prosthodontics, 1970

Michele M. Sepe
Adjunct Clinical Hygienist Instructor, Periodontology
A.S., Farmingdale State University, 1988

Carlos A. Sesin
Clinical Assistant Professor, Internal Medicine
B.A., Cornell University, 1995
M.D., University of Medicine and Dentistry of New Jersey, 1999

Raghav L. Seth
Clinical Assistant Professor, Cardiology
M.D., University of Delhi, 1980

Robert G. Sexton
Clinical Assistant Professor, Radiology
B.A., University of Mississippi, 1995
M.D., University of Tennessee Medical School, 2001
Mark S. Shachner
Clinical Associate Professor, Surgery
M.D., Yale University School of Medicine, 1985

Jennifer L. Shaer
Clinical Assistant Professor, Pediatrics
B.S., Tufts University, 1992
M.D., Mount Sinai School of Medicine, 1996

Sami Shafiq
Adjunct Faculty Member, Pharmacy Practice
Pharm.D., Nova Southeastern University, 1996

Gilbert A. Shamas
Clinical Assistant Professor, Obstetrics and Gynecology
B.A., Emory University, 1968
M.D., Emory University, 1973

Robbie E. Shamet
Adjunct Clinical Hygienist Instructor, Periodontology
A.S., Broward Community College, 1967
B.S., University of Kentucky, 1969

Eric Shamus
Adjunct Faculty, Health Science
B.S., Florida International University, 1967
M.S., University of Miami, 1997
Ph.D., Lynn University, 2001
D.P.T., Russell-Sage University, 2010

Craig S. Shapiro
Clinical Assistant Professor, Otorhinolaryngology
B.S., University of Florida, 1985
D.O., Southeastern University of the Health Sciences, 1989

Larry Shapiro
Adjunct Assistant Professor, Periodontology
D.D.S., Temple University, 1974
Certificate—Periodontics, University of Pittsburgh, 1976

Marc S. Shapiro
Clinical Assistant Professor, Internal Medicine
B.S., University of Miami, 1981
D.O., Philadelphia College of Osteopathic Medicine, 1985

Seth Shapiro
Adjunct Clinical Instructor, Endodontics
D.D.S., Emory University School of Dentistry, 1974
GPR, Mt. Sinai Medical Center Miami, 1975
M.S., Ohio State University, 1980
Certificate—Endodontics, Ohio State University College of Dentistry, 1980

Ashok K. Sharma
Clinical Assistant Professor, Cardiology
M.D., Magadh University, 1977

Bruno Sharp
Adjunct Instructor, Prosthodontics
D.D.S., Virginia Commonwealth University, 1992
M.S., University of Florida, 1997

Jason Shavelson
Adjunct Instructor, Biomedical Informatics
B.S., Florida International University, 1996

Robin Shecter
Clinical Assistant Professor, Dermatology
B.S., State University of New York, 1989
D.O., Nova Southeastern University, 1996

Felecia D. Sheffield
Clinical Assistant Professor, Psychiatry
B.A., University of Miami, 1990
M.A., University of South Florida, 1996
Ph.D., University of South Florida, 2000

Angela Sherman
Adjunct Faculty Member, Department of Speech-Language Pathology
B.A., Louisiana Tech University, 1992
M.A., Louisiana Tech University, 1994
SLPD, Nova Southeastern University, 2003

P. Lee Shettle
Clinical Assistant Professor, Ophthalmology
B.S., Northeast Missouri State University, 1984
D.O., Kirksville College of Osteopathic Medicine, 1988

Philip Leroy Shettle
Clinical Assistant Professor, Ophthalmology
B.S., Stetson University, 1962
D.O., Kirksville College of Osteopathic Medicine, 1964

Sumeet V. Shetty
Clinical Assistant Professor, Internal Medicine
M.D., Kasturba Medical College, 1995

Kedar Shetye
Clinical Assistant Professor, Nephrology
M.D., Seth G.S. Medical College, 1994

Barry Shipman
Adjunct Instructor, Prosthodontics, Division of Primary Care
D.M.D., Tufts University, 1969
Certificate—Prosthodontics, Kingsbrook Jewish Medical Center, 1972
Certificate—Maxillofacial Prosthodontics, State University of New York, 1973

Kevin B. Shrock
Clinical Assistant Professor, Orthopedic Surgery
B.S., Yale University, 1982
M.D., Stanford University School of Medicine, 1987

Richard G. Shugaram
Clinical Assistant Professor, Surgery
A.B., Johns Hopkins University, 1960
M.D., University of Maryland, 1964

Randall Shults
Adjunct Assistant Professor, Orthodontics
D.D.S., University of Colorado, 1984
Ph.D., University of North Carolina, 1989
Certificate—Orthodontics, University of North Carolina, 1989

Robert A. Shultz
Clinical Assistant Professor, Gastroenterology
B.A., St. Louis University, 1977
D.O., Kirksville College of Osteopathic Medicine, 1983
Bradley A. Shumaker  
Clinical Assistant Professor, Internal Medicine  
B.A., University of Pittsburgh, 1995  
M.D., M.B.A., Hahnemann University, 2000  
M.B.A., George Washington University, 2010

Jaime Siberman  
Adjunct Assistant Professor, Endodontics  
D.D.S., Columbia University, 2000

Mohsin A. Siddiqui  
Clinical Assistant Professor, Internal Medicine  
B.S., Nova Southeastern University, 2003  
D.O., Nova Southeastern University, 2008

Rabia Siddiqui  
Clinical Assistant Professor, Internal Medicine  
M.D., University of Sindh, 1999

Alan R. Siegel  
Clinical Assistant Professor, Anesthesiology  
B.S., Tulane University, 1982  
M.D., University of Florida College of Medicine, 1986

Geoffrey M. Siegel  
Clinical Assistant Professor, Dermatology  
B.S., University of Miami, 1968  
D.O., Des Moines University College of Osteopathic Medicine, 1972

Deneen Signator-Newman  
Clinical Instructor, Physician Assistant Studies  
B.S., Northern Illinois University, 1986  
P.A., Cook County Hospital Physician Assistant Program, 1993

Allen Silanee  
Clinical Assistant Professor, Obstetrics and Gynecology  
B.A., Vassar College, 1992  
M.D., University of Cincinnati College of Medicine, 1966

Dianna L. Silvagni  
Clinical Assistant Professor, Medical Education  
Adjunct Assistant Professor, Nutrition  
B.S., University of Arizona, 1978  
J.D., Drake University, 1990

Sanford M. Silverman  
Clinical Assistant Professor, Anesthesiology  
B.S., Tufts University, 1981  
M.D., New York Medical College, 1986

William M. Silverman  
Clinical Professor, Family Medicine  
B.S., Muhlenberg College, 1972  
D.O., Philadelphia College of Osteopathic Medicine, 1977

Freya Silverstein  
Clinical Assistant Professor, Nephrology  
M.D., State University of New York, 1983

Scott A. Silverstein  
Clinical Assistant Professor, Family Medicine  
B.A., University of Florida, 1992  
D.O., University of Osteopathic Medicine and Health Services, 1998

Stephen M. Silverstein  
Clinical Assistant Professor, Family Medicine  
B.A., Temple University, 1963  
D.O., Des Moines College of Osteopathic Medicine and Surgery, 1967

Jeffrey D. Simmons  
Clinical Assistant Professor, Cardiology  
B.A., Augustana College, 1984  
M.D., Johns Hopkins University School of Medicine, 1988

Albert Simon  
Adjunct Faculty, Health Science  
B.S., Alderson-Broaddus College, Physician Assistant, 1979  
M.Ed., Saint Francis University, 1985  
D.H.Sc., Nova Southeastern University, 2004

Robin G. Simon  
Clinical Assistant Professor, Orthopedic Surgery  
D.O., University of Osteopathic Medicine and Health Sciences, 1990

Caren B. Singer  
Clinical Assistant Professor, Internal Medicine  
B.S., Emory University, 1976  
M.D., University of South Florida, 1980

Glenn R. Singer  
Clinical Professor, Internal Medicine  
B.S., Tulane University, 1974  
M.D., University of South Florida, 1978

Jerry Singer  
Clinical Assistant Professor, Urology  
M.D., New York University School of Medicine, 1980

Jesse Singer  
Adjunct Associate Professor, Biomedical Informatics  
B.S., University of Florida, 1995  
D.O., Nova Southeastern University, 1999  
M.P.H., Nova Southeastern University, 2003

Melissa S. Singer  
Clinical Assistant Professor, Pediatrics  
B.A., Cornell University College of Arts and Sciences, 1991  
M.D., University of Miami School of Medicine, 1996  
M.P.H., George Washington Medical Center School of Public Health and Health Sciences, 2002

Satya P. Singh  
Clinical Assistant Professor, Gastroenterology  
M.B.B.S., All India Institute of Medical Sciences, 1978

Arthur Skidmore  
Adjunct Professor, Endodontics  
D.D.S., West Virginia University, 1966

Tiffany Sizemore-Ruiz  
Clinical Assistant Professor, Internal Medicine  
B.S., Florida Atlantic University, 2005  
D.O., Nova Southeastern University, 2009

Stanley E. Skopit  
Clinical Professor, Dermatology  
B.S., University of Miami, 1967  
M.S., Drake University, 1972  
D.O., University of Health Sciences College of Osteopathic Medicine, 1977
Todd L. Slesinger  
Clinical Associate Professor, Family Medicine  
B.A., University of Chicago, 1994  
M.D., State University of New York, 1998

Kirk Smick  
Adjunct Clinical Assistant Professor, Optometry  
B.S., Pacific University, 1966  
O.D., Pacific University, 1967

Damone E. Smith  
Adjunct Faculty, Oral and Maxillofacial Surgery  
D.D.S., University of Michigan, 1996

James W. Smith  
Clinical Associate Professor, Family Medicine  
B.S., Florida Southern College, 1977  
D.O., Chicago College of Osteopathic Medicine, 1983

Jennifer Smith  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Nova Southeastern University, 2007

Leslie L. Smith  
Clinical Associate Professor, Family Medicine  
B.A., University of Tennessee, 1993  
D.O., Nova Southeastern University, 1997

Edward N. Smolar  
Clinical Assistant Professor, Internal Medicine  
B.S., Union College, 1964  
M.D., Albert Einstein School of Medicine, 1968  
M.B.A., Nova University, 1985

Jason C. Sniffen  
Clinical Assistant Professor, Internal Medicine  
B.S., Florida A&M University, 1991  
D.O., Nova Southeastern University, 1996

Tanveer Sobhan  
Clinical Assistant Professor, Psychiatry  
M.D., University of Dhaka, 1992

Javier Sobrado  
Clinical Assistant Professor, Gastroenterology  
M.D., Universidad de Costa Rica, 1977

Ariel D. Soffer  
Clinical Assistant Professor, Cardiology  
B.S., University of South Florida, 1986  
M.D., University of Miami School of Medicine, 1990

Max O. Solano  
Clinical Assistant Professor, Family Medicine  
M.D., Universidad de Costa Rica, 1981

Terrence L. Soldo  
Clinical Assistant Professor, Family Medicine  
B.S., University of Nebraska, 1977  
D.O., Kirksville College of Osteopathic Medicine, 1990

Richard Solero  
Clinical Assistant Professor, Internal Medicine  
M.D., Recinto de Ciencias Medicas San Juan Bautista, 1990

Natasha Solle  
Adjunct Faculty Member, College of Nursing  
B.S.N., University of Miami, 2011  
Doctorate, University of Miami, 2015

Andrea H. Sommers  
Clinical Assistant Professor, Family Medicine  
B.A., University of South Florida, 1978  
D.O., Southeastern University of the Health Sciences, 1986

Richard Sorkin  
Adjunct Clinical Associate Professor, Optometry  
O.D., Nova Southeastern University, 1997

Domenick Sorresso  
Clinical Assistant Professor, Pulmonary Medicine  
B.A., New York University, 1984  
M.D., Ross University, 1989

John Sortino  
Clinical Assistant Professor, Internal Medicine  
B.A., Maryville College, 1975  
M.D., Universita di Roma-La Sapienza, 1984

Scott E. Spagnolo-Hye  
Clinical Assistant Professor, Family Medicine  
B.A., Pittsburgh State University, 1996  
D.O., Philadelphia College of Osteopathic Medicine, 2004

John M. Spalding  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Nova Southeastern University, 1997

David S. Spangler  
Clinical Instructor, Medical Education  
B.A., Carnegie Mellon University, 1970  
M.A., Union Institute and University, 2001  
Ph.D., Union Institute and University, 2007

David Speizman  
Clinical Assistant Professor, Internal Medicine  
B.A., Tulane University, 1983  
D.O., New York College of Osteopathic Medicine, 1990

Carlos E. Spera  
Clinical Assistant Professor, Surgery  
M.D., Universidad de Buenos Aires, 1974

Randi A. Sperling  
Clinical Assistant Professor, Pediatrics  
B.A., Vassar College, 1986  
D.O., New York College of Osteopathic Medicine, 1990

Evans C. Spiceland  
Adjunct Assistant Professor, Disaster and Emergency Management  
B.S., University of Alabama, 1969  
M.Ed., University of South Alabama, 1979

Adam S. Splaver  
Clinical Assistant Professor, Cardiology  
B.A., Yeshiva College, 1994  
M.D., Albert Einstein College of Medicine of Yeshiva University, 1998
Theodore Splaver  
Adjunct Faculty, Oral and Maxillofacial Surgery  
D.M.D., University of Pittsburgh, 1966

Henry A. Spratt  
Clinical Assistant Professor, Surgery  
M.D., University of Wales, 2001

Timothy E. Spruill  
Clinical Associate Professor, Psychiatry  
B.A., Andrews University, 1973  
M.A., George Mason University, 1977  
Ed.D., Western Michigan University, 1992

Latha Srinath  
Clinical Assistant Professor, Internal Medicine  
B.S., National College, 1978  
M.D., Bangalore Medical College, 1984

Daina Stabulniece  
Clinical Instructor, Medical Education  
M.A., Maryland Institute College of Art, 2004

William H. Stager  
Clinical Professor, Family Medicine  
B.A., Livingston College, 1983  
D.O., Southeastern University of the Health Sciences, 1989

S. Sigmund Stahl  
Adjunct Faculty, Periodontology  
D.D.S., University of Minnesota, 1947  
M.S., University of Illinois, 1949

Zarina Staller  
Adjunct Professor, Prosthodontics  
D.M.D., Nova Southeastern University, 2000

Richard Stanton  
Adjunct Clinical Instructor, Prosthodontics  
D.M.D., Tufts University, School of Dental Medicine, 2001

Margaret J. Starr  
Clinical Assistant Professor, Family Medicine  
M.S., Stanford University, 1970  
D.O., Michigan State University College of Osteopathic Medicine, 1979

Eli Stav  
Adjunct Professor, Occupational Therapy  
B.A., Florida Atlantic University, 2001  
M.S., Kansas State University, 2003  
Sc.D., Towson University, 2012

Alvin Stein  
Clinical Assistant Professor, Orthopedic Surgery  
B.A., New York University, 1957  
M.D., Chicago Medical School, 1961

Joel D. Stein  
Clinical Associate Professor, Family Medicine  
D.O., Kirksville College of Osteopathic Medicine, 1983

Joshua Z. Steiner  
Clinical Assistant Professor, Family Medicine  
B.A., Yeshiva University, 1992  
D.O., Nova Southeastern University, 2000

Michael L. Steiner  
Clinical Associate Professor, Pediatrics  
A.B., University of Pennsylvania, 1958  
M.D., St. Louis University School of Medicine, 1962

Rita Steiner  
Adjunct Assistant Professor, Endodontics  
D.M.D., Nova Southeastern University, 2001

Jeff P. Steinhoff  
Clinical Associate Professor, Cardiology  
B.S., Pennsylvania State University, 1994  
M.D., University of Medicine and Dentistry of New Jersey, 1998

Eric Stelnicki  
Clinical Assistant Professor, Pediatric Dentistry  
M.D., University of Florida, 1991

Adam Stelzer  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Nova Southeastern University, 2007

Edward C. Stephenson  
Community Assistant Professor, Public Health  
B.S., Long Island University, 1975  
M.S.W., Howard University, 1977  
M.P.H., University of Pittsburgh, 1979

Fran E. Sterling  
Clinical Assistant Professor, Pediatrics  
B.S., Ohio State University, 1975  
D.O., Ohio State University, 1981

David J. Stern  
Clinical Professor, Internal Medicine  
B.A., LaSalle College, 1975  
D.O., Philadelphia College of Osteopathic Medicine, 1979

Diane Stern  
Clinical Professor, Diagnostic Sciences  
D.M.D., Columbia University, 1961

Stanley Stewart  
Clinical Assistant Professor, Oral and Maxillofacial Surgery  
D.M.D., University of Pittsburgh, 1973

Neal Stief  
Adjunct Instructor, Biomedical Informatics  
B.S., University of Florida, 1993

James Stobinski  
Adjunct Faculty Member, College of Nursing  
B.S.P.A., Saint Joseph’s College of Maine, 1994  
B.S.N., East Carolina University, 1999  
M.A., Webster University, 1997  
M.S.N., East Carolina University, 2001  
Ph.D., Trident University International, 2011

Amos Stoll  
Clinical Associate Professor, Neurology  
M.D., University of Oklahoma College of Medicine, 1974

Charles B. Stone  
Clinical Assistant Professor, Internal Medicine  
B.S., University of Miami, 1991  
M.D., University of Miami School of Medicine, 1995
Kevin E. Stone  
Clinical Assistant Professor, Internal Medicine  
B.A., Boston University, 1976  
M.D., Universidad Mundo Dominica, 1984

Reed Stone  
Clinical Assistant Professor, Neurology  
M.D., Universidad Central del Este, 1981

Lisa Stottlemyer  
Adjunct Clinical Assistant Professor, Optometry  
O.D., Pennsylvania College of Optometry, 1998

John M. Strasswimmer  
Clinical Assistant Professor, Dermatology  
B.S., Tufts University, 1989  
M.D., Tufts University, 1999

Neil H. Strauss  
Clinical Instructor, Geriatrics  
B.S., Dickinson College, 1997  
D.P.M., Barry University of Graduate Medical Science, 2003

Ronald L. Stricoff  
Clinical Assistant Professor, Surgery  
B.S., Brooklyn College, 1977  
M.D., University of Chicago, 1981

Amy M. Strobbe  
Clinical Assistant Professor, Internal Medicine  
B.S., University of South Dakota, 2000  
D.O., Des Moines College of Osteopathic Medicine, 2004

Michael S. Strobbe  
Clinical Assistant Professor, Internal Medicine  
B.S., Nova Southeastern University, 2000  
D.O., Nova Southeastern University, 2004

Nicholas Strobbe  
Clinical Assistant Professor, Internal Medicine  
B.S., Nova Southeastern University, 2005  
D.O., Nova Southeastern University, 2009

Steven M. Strobbe  
Clinical Assistant Professor, Family Medicine  
D.O., Kirksville College of Osteopathic Medicine, 1977

Linda Strommen  
Adjunct Faculty Member, College of Nursing  
B.S.N., Benedict's College, 1983  
M.S.N., Saint Joseph's College of Maine, 2002  
Doctorate, Nova Southeastern University, 2010

Zevon Stubbleford  
Clinical Instructor, Sports Medicine  
B.S., University of North Florida, 2004  
M.S., Florida International University, 2008

Jose David Suarez  
Clinical Assistant Professor, Family Medicine  
M.D., Universidad Central del Este, 1986

Manuel Suarez  
Clinical Assistant Professor, Pulmonary Medicine  
M.D., University Central del Este School of Medicine, 1981

Michael Suchar  
Adjunct Assistant Professor, Pediatric Dentistry  
D.D.S., Temple University, 1982  
Certificate—Pedodontics, St. Christopher's Hospital  
Pennsylvania, 1984

Sean A. Sukal  
Clinical Assistant Professor, Dermatology  
M.D., Ph.D., Yeshiva University, 2002

Christopher B. Sullivan  
Adjunct Associate Professor, Biomedical Informatics  
Community Associate Professor, Public Health  
B.S., Boston University, 1972  
M.A., University of Vermont, 1978  
Ph.D., University of Washington, 1988

Mehrunnisa Sultana  
Clinical Instructor, Psychiatry  
M.D., University of Karachi, 1971

Virginia Sumrall  
Adjunct Faculty Member, College of Nursing  
B.S.N., William Carey College, 1992  
M.S.N., University of Southern Mississippi, 1997  
Ph.D., University of Mississippi Medical Center, 2010

Glen E. Sutherland  
Clinical Associate Professor, Internal Medicine  
B.S., Pennsylvania State University, 1969  
M.D., Rush Medical College, 1973

Pamela M. Sutton  
Clinical Associate Professor, Family Medicine  
B.A., Pomona College, 1969  
M.D., University of California at San Francisco Medical School, 1973

Eli Suzuki  
Adjunct Faculty Member, Department of Community and Public Health Sciences  
D.D.S., Kanagawa Dental College, 2001  
Certificate—AEGD, Nova Southeastern University, 2008

Charles Swanson II  
Clinical Instructor, Internal Medicine  
D.O., Pikeville College, 2004

Thomas L. Sweat  
Clinical Instructor, Family Medicine  
M.D., University of Tennessee Medical School, 1949

Marc A. Swerdloff  
Clinical Associate Professor, Neurology  
M.D., Sackler School of Medicine, 1980

Todd Swinderman  
Adjunct Faculty Member, College of Nursing  
B.S.N., Florida Atlantic University, 1990  
M.S.N., Florida Atlantic University, 1997  
D.N.S., Florida Atlantic University, 2005  
Ph.D., Florida Atlantic University, 2010

Samuel Szomstein  
Clinical Assistant Professor Surgery  
M.D., Universidad Central de Venezuela, 1993
Raja R. Talati
Clinical Assistant Professor, Family Medicine
B.S., University of California, 1991
M.D., M.S., Ross University, 1995
M.S., University of Illinois, 2014

Debra Tarakofsky
Adjunct Faculty Member, Department of Speech-Language Pathology
B.S., Florida International University, 1990
M.S., Nova Southeastern University, 1993

Dennis Tartakow
Clinical Associate Professor, Orthodontics
D.M.D., Tufts University School of Dental Medicine, 1969

Ariana Taylor
Adjunct Faculty Member, Department of Speech-Language Pathology
B.A., University of Florida, 1997
M.S., Nova Southeastern University, 2000

Arlene L. Taylor
Clinical Assistant Professor, Family Medicine
B.S., University of Miami, 1993
D.O., Nova Southeastern University, 2002

James Eric Taylor, Jr.
Clinical Assistant Professor, Radiology
B.S., Georgia Institute of Technology, 1964
D.O., Kansas City College of Osteopathic Medicine, 1974

James H. Taylor
Clinical Associate Professor, Family Medicine
B.S., Dickinson College, 1972
D.O., Philadelphia College of Osteopathic Medicine, 1977

Thomas K. Taylor
Clinical Instructor, Obstetrics and Gynecology
B.S., Morehouse College, 1979
M.S., North Carolina A&T University, 1982
M.D., East Carolina University, 1986
M.B.A., Scott Colle School of Business, 1988

Tenerife Tejera
Adjunct Assistant Professor, Oral and Maxillofacial Surgery
D.M.D., University of Alabama, 1994
M.D., University of North Carolina, 1996

Edna L. Tello
Clinical Assistant Professor, Pediatrics
B.A., University of Miami, 1993
M.D., University of Connecticut, 1997

James R. Templeton
Adjunct Assistant Professor, Biomedical Informatics
M.S., University of Phoenix, 2001
M.B.A., Nova Southeastern University, 2005
Ph.D., Nova Southeastern University, 2010

George R. Termotto
Clinical Assistant Professor, Pediatrics
B.S., University of Miami, 1968
M.D., University of Zaragoza, 1975

Deborah Terry
Adjunct Faculty Member, College of Nursing
B.S.N., University of Miami, 1988
M.S.N., University of Miami, 1991
D.N.P., University of Florida, 2010

Shaival Thakore
Clinical Assistant Professor, Internal Medicine
B.S., University of South Florida, 2001
M.D., University of South Florida, 2005

Ann Marie Tharpe
Adjunct Professor, Audiology
B.S., University of Arizona, 1979
M.S., Vanderbilt University, 1994
Ph.D., Vanderbilt University, 1994

Deborah M. Thevenin
Clinical Associate Professor, Family Medicine
B.A., University of Miami, 1981
M.S., University of Miami, 1984
M.D., University of Miami, 1989

Ruth Thomas
Adjunct Faculty Member, College of Nursing
B.S.N., Miami-Dade College, 1987
M.S.N., University of Phoenix, 2005
Ph.D., Florida International University, 2012

Jennifer C. Thompson
Clinical Associate Professor, Internal Medicine
B.A., Harvard University, 1988
M.D., Universitas Harvardiana, 1992

Lanetta Thorpe
Adjunct Faculty, Health Science
B.A., University of North Carolina, 1987
M.S.P.H., University of North Carolina, 1988
M.D./M.P.H., University of North Carolina, 1993

June E. Tickle
Clinical Assistant Professor, Family Medicine
B.S.N., University of South Florida, 1985
M.S.N., University of South Florida, 1990

John Tierney
Adjunct Clinical Associate Professor, Optometry
M.S., Pacific University, 1978
O.D., New England College of Optometry, 1978

Elena Timoshkin
Clinical Instructor, Family Medicine
B.A., Bowdoin College, 2002
D.O., Nova Southeastern University, 2009

David M. Tobolowsky
Clinical Associate Professor, Psychiatry
B.S., Southern Methodist University, 1974
M.D., Southwest Medical School, 1978

H. Murray Todd
Adjunct Professor, Diagnostic Sciences
Clinical Professor, Neurology
B.A., University of Toledo, 1962
M.D., University of Miami School of Medicine, 1966
Kathleen L. Todd  
Clinical Assistant Professor, Family Medicine  
D.O., Michigan State University  
College of Osteopathic Medicine, 1995

Michael A. Todd  
Clinical Assistant Professor, Pathology  
B.S., University of Tennessee, 1971  
M.D., University of Tennessee, 1975  
J.D., University of Mississippi, 1986

Ronald B. Tolchin  
Clinical Professor, Physical Medicine and Rehab.  
B.S., Villanova University, 1983  
D.O., Southeastern University of the Health Sciences, 1989

Peter A. Tomasello, Jr.  
Clinical Assistant Professor, Orthopedic Surgery  
D.O., Southeastern University of the Health Sciences, 1991

Jaime Torner  
Clinical Instructor, Internal Medicine  
M.D., Universidad Complutense de Madrid, 1965

Ana Torres  
Clinical Assistant Professor, Internal Medicine  
M.D., Pontificia Universidad Catolica del Ecuador, 2001

Johann V. Torres  
Clinical Assistant Professor, Internal Medicine  
B.S., North Carolina State University, 1995  
B.S., Duke University, 1991

Maria I. Torres  
Adjunct Faculty Member, Pharmaceutical Sciences  
Pharm.D., Nova Southeastern University, 2000

Julio D. Torres-Navedo  
Clinical Assistant Professor, Otolaryngology  
M.D., University of Puerto Rico School of Medicine, 1978

Victor Totfalusi  
Clinical Assistant Professor, Internal Medicine  
B.S., Nova Southeastern University, 2002  
D.O., Nova Southeastern University, 2008

Natalie Townsend  
Adjunct Clinical Assistant Professor, Optometry  
B.S., 2005  
Indiana University School of Optometry, 2009

Molrine Tracey  
Clinical Assistant Professor, OB/GYN  
B.S., University of Miami, 1984  
M.S., Barry University, 2001  
M.D., University of Florida, 2005

Darin P. Trelka  
Clinical Assistant Professor, Pathology  
B.A., Washington & Jefferson University, 1992  
Ph.D., Thomas Jefferson University, 1999  
M.D., CMP—Hahnemann University, 2002

Marie J. Trenga  
Clinical Assistant Professor, Family Medicine  
B.A., Brown University, 1981  
M.D., Brown University, 1985

Susan Triano  
Adjunct Faculty Member, Department of  
Speech-Language Pathology  
B.S., University of Florida, 1986  
M.S., Nova University, 1993

Johny Tryzmel  
Clinical Assistant Professor, Pediatrics  
M.D., Universidad Central de Venezuela, 1994

Tammy L. Tuchel  
Clinical Assistant Professor, Family Medicine  
M.P.H., University of Miami, 1993  
D.O., Nova Southeastern University, 1997

Claudia D. Tuda  
Clinical Associate Professor, Infectious Disease  
M.D., University of Buenos Aires, 1986

Joyce Turcotte  
Adjunct Hygienist Clinical Instructor, Periodontology

Michael J. Turley  
Clinical Instructor, Physician Assistant Studies  
P.A., Bayley Seton Hospital Physician Assistant Program, 1973

Robert L. Ullman  
Clinical Assistant Professor, Cardiology  
B.A., Williams College, 1990  
M.D., University of South Florida, 2000

Inemesit Umoren  
Clinical Assistant Professor, Infectious Disease  
M.D., University of Nigeria, 2001

Amit Upadhyaya  
Clinical Assistant Professor, Internal Medicine  
M.D., J.J.M. Medical College, 1989  
D.O., New York College of Osteopathic Medicine, 2001

Narendra R. Upadhyaya  
Clinical Assistant Professor, Cardiology  
M.D., M. P. Shah Medical College, 1981

Norman Urich  
Clinical Assistant Professor, Family Medicine  
B.S., Duquesne University, 1970  
D.O., Kirksville College of Osteopathic Medicine, 1974

Eugene Usberghi, Jr.  
Clinical Assistant Professor, Family Medicine  
B.S., University of Akron, 1968  
D.O., College of Osteopathic Medicine and Surgery, 1976

Dushyant J. Utamsingh  
Clinical Assistant Professor, Internal Medicine  
M.D., Seth G.S. Medical College, 1984

Ruddy A. Valdes  
Clinical Assistant Professor, Internal Medicine  
B.A., St. Thomas University, 1991  
D.O., Nova Southeastern University, 1995

Yolanda M. Valdes  
Clinical Assistant Professor, Pediatrics  
B.S., University of Miami, 1989  
M.D., University of Miami School of Medicine, 1993

Clinical Assistant Professor, Internal Medicine  
B.A., Brown University, 1977  
M.D., Baylor College, 1980

Amy B. Wecker  
Clinical Assistant Professor, Internal Medicine  
B.S., Tulane University, 1993  
M.D., Ben Gurion University, 2002

Neil J. Weinreb  
Clinical Professor, Hematology/Oncology  
M.D., State University of New York, 1966

Brian K. Weinstein  
Clinical Assistant Professor, Surgery  
M.D., State University of New York Health Science, 1993

Mitchell D. Weinstein  
Clinical Associate Professor, Urology  
B.S., Pennsylvania State University, 1979  
D.O., University of Health Sciences, 1984

Stephen A. Weirich  
Clinical Associate Professor Family Medicine  
B.S., Allegheny College, 1981  
M.D., University of Rochester, 1985

Jeffrey I. Weisberg  
Clinical Professor, Hematology/Oncology  
B.A., Brooklyn College, 1967  
D.O., University of Health Sciences College of Osteopathic Medicine, 1971

William Weisberg  
Clinical Assistant Professor, Surgery  
A.B., Temple University, 1969  
D.O., Philadelphia College of Osteopathic Medicine, 1973

Eduardo T. Weiss  
Clinical Associate Professor, Dermatology  
M.D., Universidad Central de Venezuela, 1982

Marcella Weiss  
Clinical Assistant Professor, Family Medicine  
M.D., Universidad Central de Venezuela, 1990

Kristy Weissling  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.S., University of Nebraska—Lincoln, 1988  
M.S., University of Nebraska—Lincoln, 1990  
SLPD, Nova Southeastern University, 2006

Karl S. Weller  
Clinical Assistant Professor, Internal Medicine  
B.S., Florida State University, 2001  
D.O., Nova Southeastern University, 2007

Todd Welliver  
Clinical Instructor, Internal Medicine  
B.S., Indiana University, 1992  
M.D., Ross University, 2001
David Wessel  
Adjunct Clinical Instructor, Prosthodontics  
D.M.D., University of Pittsburgh, 1974  
Certificate—Prosthodontics, Boston University, 1976

Ellen Whelan  
Adjunct Faculty Member, Department of Speech Language Pathology  
M.S., Nova Southeastern University, 2001  
Psy.D., Nova Southeastern University, 2004

Graham F. Whitfield  
Clinical Assistant Professor, Orthopedic Surgery  
B.S., University of London, 1963  
Ph.D., University of London, 1969  
M.D., New York Medical College, 1976

Danny Whu  
Adjunct Assistant Professor, Disaster and Emergency Management  
B.S., Florida International University, 1994  
M.D., Universiad Central Del Canibe, 2000  
M.P.H., Nova Southeastern University, 2012

Harvey M. Wiener  
Clinical Assistant Professor, Radiology  
B.A., University of Rochester, 1979  
M.D., University of Medicine and Dentistry of New Jersey, 1983

Joseph M. Wierzbicki  
Clinical Assistant Professor, Family Medicine  
B.S., Creighton University, 2005  
M.D., University of Kansas, 2009

Ronald J. Wiewora  
Community Professor, Public Health  
Clinical Professor, Preventive Medicine  
B.S., University of Illinois, 1974  
M.D., University of Illinois, 1978

Laure-Ann Wiggan-Lampart  
Clinical Assistant Professor, Pediatrics  
M.D., University of the West Indies, 1991

Harold E. Wiggin  
Adjunct Assistant Professor, Biomedical Informatics  
B.A., Eckerd College, 1972  
M.S., Nova University, 1977  
Ed.S., Florida Atlantic University, 1987  
Ed.D., Florida Atlantic University, 1991

Richard J. Wilbur  
Clinical Assistant Professor, Internal Medicine  
B.A., Duke University, 1978  
M.D., University of South Florida College of Medicine, 1981

Robb E. Wilentz  
Clinical Professor, Pathology  
B.A., Harvard College, 1992  
M.D., The Johns Hopkins University School of Medicine, 1996

Jeff T. Wilkins  
Clinical Professor, Family Medicine  
B.S., Francis Marion College, 1991  
M.D., Medical University of South Carolina, 1995

Lanelle Williams  
Adjunct Clinical Associate Professor, Optometry  
O.D., Nova Southeastern University, 1998

Ronald K. Williams  
Clinical Assistant Professor, Family Medicine  
B.A., Hofstra University, 1992  
D.O., New York College of Osteopathic Medicine, 1996

Joseph G. Willmitch  
Clinical Instructor, Physician Assistant Studies  
B.S., Youngstown State University, 1976

Delfina Wilson  
Clinical Assistant Professor, Family Medicine  
B.S., Mississippi State University, 2004  
M.A., Mississippi State University, 2005  
Ph.D., Mississippi State University, 2009

Marcietta Wilson-Coleman  
Clinical Assistant Professor, Obstetrics and Gynecology  
B.S., Bowling Green State University, 1993  
M.D., Ohio University, 2000

Fawn Winkelman  
Clinical Assistant Professor, Family Medicine  
B.S., University of Florida, 2002  
M.S., Nova Southeastern University, 2003  
D.O., Nova Southeastern University, 2010

Paul K. Winner  
Clinical Professor, Neurology  
B.S., Rensselaer Polytechnic Institute, 1976  
D.O., New York College of Osteopathic Medicine, 1981

Jeffrey L. Wisnicki  
Clinical Assistant Professor, Surgery  
B.S., University of Scranton, 2004  
D.O., Nova Southeastern University, 2009

Bryan L. Witt  
Clinical Instructor, Surgery  
D.O., Edward Via Virginia College of Osteopathic Medicine, 2007

Sharon Lee Witt  
Clinical Assistant Professor, Family Medicine  
B.S., University of Scranton, 2004  
D.O., Nova Southeastern University, 2009

Monica Wojcik  
Adjunct Faculty Member, Department of Speech-Language Pathology  
B.A., University of Maine—Orono, 1974  
M.A., University of Miami, 1976

Edward Wolek  
Clinical Assistant Professor, Geriatrics  
B.S., Palm Beach Atlantic University, 1997  
D.O., Nova Southeastern University, 2001

Glenn Wolfinger  
Adjunct Assistant Professor, Prosthodontics  
D.M.D., Tufts University, 1990  
Certificate—Combined Prosthodontics, Harvard School of Dental Medicine, 1993
Ava C. Wolf-Rosenberg
Clinical Assistant Professor, Family Medicine
B.A., State University of New York, 1984
D.O., New York College of Osteopathic Medicine, 1988

Kelli Wolper
Adjunct Clinical Assistant Professor, Optometry
O.D., Southern California College of Optometry, 1985

Stephen R. Wood
Clinical Assistant Professor, Orthopedic Surgery
B.S., University of South Dakota, 1974
D.O., Kirksville College of Osteopathic Medicine, 1980

Gale Woolley
Adjunct Faculty Member, College of Nursing
B.S.N., University of Rhode Island, 1972
M.S.N. Adelphi University, 1976
Ed.D., Florida International University, 1989

Darwin B. Wooten
Clinical Assistant Professor, Surgery
B.S., University of Mississippi, 1990
M.D., Vanderbilt University School of Medicine, 1994

Randal G. Worth
Clinical Assistant Professor, Internal Medicine
B.S., Iowa State University, 1973
D.O., Des Moines College of Osteopathic Medicine and Surgery, 1977

Marilyn Wright
Adjunct Faculty, Health Science
B.A., University of California, 1974
B.S., Loma Linda University, 1976
M.P.H., Loma Linda University, 1991
D.P.H, Loma Linda University, 2001

Tamara S. Wright
Clinical Assistant Professor, Family Medicine
M.D., Lugansk Medical Institute, 1990

Ge Wu
Visiting Faculty, Optometry
M.D., Wenzhou Medical University (Wenzhou, Zhejiang, China)

Haoran Wu
Visiting Faculty Member, Optometry
M.D., Xiangya Medical University

Winfred Wu
Adjunct Assistant Professor, Biomedical Informatics
B.A., Rutgers University, 1998
M.P.H., Columbia University, 2006
M.D., University of Medicine and Dentistry of New Jersey, 2003

Robin Wucher-Willis
Adjunct Faculty Member, College of Nursing
B.S.N., Florida International University, 1979
M.S.N., University of Miami, 1983
Ed.D., Nova Southeastern University, 2009

Olga Wydner
Adjunct Faculty Member, Pharmacy Practice
Pharm.D., Nova Southeastern University, 2011

Zachary Yablon
Clinical Assistant Professor, Internal Medicine
B.S., Tulane University, 2000
M.D., Rosalind Franklin University of Medicine and Science, 2004

Bose Yalamanchi
Clinical Assistant Professor, Surgery
M.D., Gulbarga Medical College, 1979

Elizabeth Yanik
Adjunct Faculty Member, Department of Speech-Language Pathology
B.S., University of Central Florida, 2000
M.S., Nova Southeastern University, 2003

Louis R. Yogel
Clinical Assistant Professor, Urology
B.A., Temple University, 1975
M.D., Autonomous University of Guadalajara, 1979

Erol A. Yoldas
Clinical Assistant Professor, Orthopedic Surgery
B.S., Duke University School of Engineering, 1990
M.D., Yale University School of Medicine, 1994

David B. Youel
Clinical Assistant Professor, Internal Medicine
B.A., University of Minnesota, 1958
M.D., University of Minnesota, 1963

Cui Yu
Visiting Faculty, Optometry
M.D., He University (Shenyang, Liaoning, China)

Aristides Zacharoudis
Clinical Assistant Professor, Cardiology
B.S., St. John’s University, 1982
M.D., Autonomous University of Guadalajara, 1986

Fatima Zafar
Clinical Assistant Professor, Psychiatry
M.D., Osmania University Medical School, 1967

Michael P. Zahalsky
Clinical Assistant Professor, Surgery
B.A., Brown University, 1995
M.D., Universitas Brunensis, 1999

Elise J. Zahn
Clinical Associate Professor, Family Medicine
B.S., University of Florida, 1989
D.O., Nova Southeastern University, 1996

Brian A. Zalis
Clinical Associate Professor, Family Medicine
B.S., University of Florida School of Medicine, 1976

Mohammad Zaman
Adjunct Faculty Member, Prosthodontics
D.M.D., Nova Southeastern University, 2013

Kasey Zann
Adjunct Clinical Assistant Professor, Optometry
O.D., Nova Southeastern University, 2007
Bernard J. Zaragoza  
Clinical Assistant Professor, Surgery  
B.A., University of Miami, 1986  
M.D., Harvard Medical School, 1990

Nellie Simkin Zeltsman  
Pharm.D., Nova Southeastern University, 1996

Xiao-Mei Zeng  
Clinical Assistant Professor, Obstetrics and Gynecology  
B.A., Beijing Second Foreign, 1982  
M.S., Baylor University, 1983  
M.D., New York Medical College, 1993

Jia Zhou  
Visiting Faculty Member, Optometry  
M.D., Tianjian Medical University
