Sample 1: Calculation Rubric

Given the following set of hypothetical conversions, convert 15.5 blaps to clorcks. You must use unit conversions to receive full credit for your answer. (6 points)

1 clorck = 15.5 quaps
1 blap = 200 pleeps
1 pleep = 18 splunks
1 splunk = 86.2 quaps
1 garthog = 45 blaps
10 manks = 27 garthogs

Correct Answer

<table>
<thead>
<tr>
<th>15.5 Blaps</th>
<th>200 Pleeps</th>
<th>18 Splunks</th>
<th>86.2 Quaps</th>
<th>1 Clorck</th>
<th>= 310,320 Clorcks</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Blap</td>
<td>1 PEEP</td>
<td>1 Splunk</td>
<td>15.5 Quaps</td>
<td>1 Clorck</td>
<td></td>
</tr>
</tbody>
</table>

Grading Criteria for the Assignment

6 points – set up problem correctly, unit conversions, correct answer
5 points – set up problem correctly, unit conversions, incorrect answer
4 points – set up problem correctly, no unit conversions, correct answer
4 points – set up problem with minor error, unit conversions, answer correct as set up
3 points – set up problem with minor error, no unit conversions, answer correct as set up
2 points – nice try!
0 points – blank answer

Sample 2: Grading Guidelines Department of English and Foreign Languages

A
- Superior ideas and insights; clear and complex; witty or especially original
- Purpose clear throughout (unity)
- Expectations established and fulfilled very satisfactorily; satisfying closure (organization)
- Ideas connected clearly and smoothly (coherence)
- Superior development (concreteness and/or examples)
- Superior audience adaptation
- Writer seems to mean what is said; genuine involvement in subject responding to the assignment
- Mature style; felicitous use of language
- Relatively free of any errors distracting to literate readers

B/C
- Clear, maybe less insightful or complex than an A OR insightful or complex, but less clear than an A
- Purpose clear throughout (unity)
- Expectations established and fulfilled (organization)
- Ideas connected clearly (coherence)
- Good development with examples and support
- Some audience adaptation and accommodation
- Writer engaged with subject; adherence to assignment
- Some sentence variety; appropriate diction
- Relatively free of major errors

C/D
- Ideas somewhat clear, not complex or insightful
- May include some information that detracts from central purpose
- Some expectations established but not fulfilled (organization)
- Ideas connected, but perhaps awkwardly (coherence)
- Adequate development—only an example or two
- Some audience adaptation—may shift audiences
- Adherence to assignment; occasional sense of engagement of writer with subject
- Adequate style
- Some errors, but not so many that the writer seems to lack control of standard written English

F
- Ideas generally unclear
- Purpose unclear; writer seems to be searching for a topic
- Expectations generally not established or fulfilled
-Disconnected ideas
- Paper short and undeveloped
- Audience adaptation seriously flawed
- Not a response to the assignment
- Primer style
- So many errors that the writer seems to lack control of standard written English; the errors interfere with communication

### Sample 3: Essay Rubric

<table>
<thead>
<tr>
<th>Grading Criteria</th>
<th>Poor (1)</th>
<th>Below Average (2)</th>
<th>Average (3)</th>
<th>Good (4)</th>
<th>Excellent (5)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Organization</strong></td>
<td>The essay is unclear with no organization.</td>
<td>The main points of the essay are ambiguous.</td>
<td>Writing has minimal organization and a basic thesis statement.</td>
<td>Writing follows a logical organization, but sometimes drifts from the thesis.</td>
<td>Writing is clear, logical, and very organized around a developed thesis.</td>
</tr>
<tr>
<td><strong>Evidence</strong></td>
<td>The essay does not attempt to use evidence to support thesis.</td>
<td>The evidence provided does not support thesis.</td>
<td>The use of evidence is minimal, but it does support thesis.</td>
<td>There is evidence to support almost every point.</td>
<td>Every point is clearly supported by strong evidence.</td>
</tr>
<tr>
<td><strong>Analysis</strong></td>
<td>The essay does not attempt to explain how the evidence relates to thesis.</td>
<td>The analysis of the evidence has no relation to the thesis.</td>
<td>The analysis of the evidence stretches its meaning to support thesis.</td>
<td>The analysis explains how the evidence supports the thesis in most cases.</td>
<td>The analysis shows a strong relationship between the evidence and the thesis.</td>
</tr>
</tbody>
</table>

## Sample 4: Presentation Grading Rubric

<table>
<thead>
<tr>
<th></th>
<th>Professional</th>
<th>Adequate</th>
<th>Needs Work</th>
<th>You’re Fired</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Content</strong></td>
<td>Full grasp (more than needed) of material in initial presentation and in answering questions later</td>
<td>Solid presentation of material and answers all questions adequately but without elaboration</td>
<td>Less than a full grasp of the information revealed rudimentary presentation and answers to questions</td>
<td>No grasp of information some misinformation, and unable to answer questions accurately</td>
</tr>
<tr>
<td><strong>Organization</strong></td>
<td>Information presented in a logical interesting sequence that is easy for the audience to follow</td>
<td>Information is presented in a logical sequence that is easy for the audience to follow but a bit dull</td>
<td>Presentation jumps around a lot and is not easy to follow although it is possible</td>
<td>Audience cannot follow presentations because it follows no logical sequence</td>
</tr>
<tr>
<td><strong>Visual Aids</strong></td>
<td>Visuals explain and reinforce the rest of the presentation</td>
<td>Visuals relate to rest of presentation</td>
<td>Visuals are too few or not sufficiently related to the rest of the presentation</td>
<td>Visuals not used or are superfluous</td>
</tr>
<tr>
<td><strong>English</strong></td>
<td>No misspelled words or grammatical errors</td>
<td>No more than two misspelled words or grammatical errors</td>
<td>Three misspelled words or grammatical errors</td>
<td>Four or more misspelled words or grammatical errors</td>
</tr>
<tr>
<td><strong>Elocution</strong></td>
<td>Speaks clearly, correctly and precisely, loud enough for audience to hear and slowly enough for easy understanding</td>
<td>Speaks clearly, pronounces most words correctly, loud enough to be easily heard, and slow enough to be understood</td>
<td>Speaks unclearly, mispronounces many major terms, and speaks too softly or rapidly to be easily understood</td>
<td>Mumbles, mispronounces most important terms, and speaks too softly or rapidly to be understood at all</td>
</tr>
<tr>
<td><strong>Eye Contact</strong></td>
<td>Eye contact constant; minimal or no reading of notes</td>
<td>Eye contact maintained except when consulting notes, which is too often</td>
<td>Some eye contact but mostly reading from notes</td>
<td>No eye contact, reads from notes exclusively</td>
</tr>
</tbody>
</table>

**Sample 5: Grading Rubric for Community Prevention Plan**

Description: Devise an OUTLINE on how you would go about planning a community prevention/wellness/health promotion program based on the discussion in class on Community Prevention Programs. The outline lists the steps you would take in order to engage in at least 3 clear steps—needs assessment, implementation, & evaluation. (Blackinton, 2007)

<table>
<thead>
<tr>
<th>RATING SCALE</th>
<th>Needs Assessment</th>
<th>Intervention</th>
<th>Evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Fully Met</strong></td>
<td>4/4-Needs assessment clearly includes all the information that would be obtained during PRIOR to developing the program. The outlines specifies how the assessments would be done, ie, surveying the intended population of school age parents for quality of life concerns regarding their children. -Needs assessment considers the needs of the potential participants (educational, health, resources, etc); resources (equipment, space, funding, personnel..), and content needs. -Needs assessment investigates similar programs/ideas</td>
<td>3/3-Outlines intervention, including: -Type (class, website, newsletter…) -Frequency of intervention -Feasible size of intervention (100 mailings, 30 participants in class…) -Content Topics-ie, an outline on topics in fall prevention might include: a) medical causes balance loss; b) environmental causes of falls, and c) falls and physical activity or inactivity. You do NOT have to include the actual content, just an outline.</td>
<td>3/3-Outlines clearly spells out HOW the program will be evaluated on 2 levels: a) outcomes: What will you measure and How will you determine if your objectives or goals would be met b) process: how would you decide if the processes worked (ie, flyers in mailboxes versus email invitation)</td>
</tr>
<tr>
<td><strong>Partially Met</strong></td>
<td>2.5/4-Needs assessment outlines lacks either breadth (does not consider participants, resources, and content) OR does not give enough clarity on how it would performed</td>
<td>1.5/3-Outline specifies the type, frequency, and size of intervention but the content outline is minimal. For example, states that fall prevention program will be 4 hours but does not outline enough topics to cover that time frame</td>
<td>1.5/3-Evaluation is included in the outline but it is EITHER a) too limited, does not consider what and how to measure, or b) only considers one of the two types of evaluation (process or outcome).</td>
</tr>
<tr>
<td><strong>Needs Improvement</strong></td>
<td>1/4-Needs assessment lacks both breadth AND depth. Limited, does not fully consider personnel, equipment, space, or materials for the intended project. D</td>
<td>.5/3-Outline is significantly lacking in detail, unable to determine what will be included</td>
<td>.5/3-Evaluation outline is BOTH limited in depth and also considers only outcome or process issues</td>
</tr>
</tbody>
</table>
### Sample 6: Rationale for Selection of Tests/Measures

<table>
<thead>
<tr>
<th>Attributes</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| Thoroughness of List of Test and Measures      | **Fully Met (6)** <br>a. List includes a selection of tests/measures that represents more than one domain of the ICF model (impairment + activity + participation)  
   b. List represents appropriate body systems (musculoskeletal, neuro…)  
   c. Represents patient & therapist identified problems  
**Mostly Met (4.5)** <br>-Meets a-c above, although may have omitted 1-2 potential tests/measures that are important to the case. For example, balance exam omitted from pt who was unstable walking, but most other tests/measures provided  
**Partially Met (3.5)** <br>-A majority of tests/measures were included, however there were notable absences either by system or domains of ICF model  
**Not Met (1)** <br>-The list of tests/measures has major gaps that negatively impact patient care |
| Psychometric Properties of Test/Measures       | **Fully Met (6)** <br>a. Identifies psychometric properties of the tool, such as validity and reliability and minimally important difference of the test from appropriate source(s)  
   b. Sources are not limited to texts, includes some peer-reviewed articles  
   c. Provides ranges for normal/abnormal values  
   d. Psychometric properties may be used to provide part of rationale for selection (ie, if 2 balance measures are appropriate, why you would choose one over the other)  
**Mostly Met (4.5)** <br>-Psychometric properties provided consistently, some information occasionally lacking (normative values) or for 1-2 tests  
**Partially Met (3.5)** <br>-Some of the items in a-d above were not present or inconsistently provided  
**Not Met (1)** <br>-Psychometric properties described only superficially and inconsistently |
| Rationale for selection of Tests/Measures      | **Fully Met (6)** <br>a. Rationale is **appropriate and specific to the case**  
   b. Describes why it was chosen, NOT what it includes. For example, “Berg Balance Test—because it can predict fall risk and demonstrate change over time” **rather than**: The berg balance test to test balance.  
   c. Describes how the findings from the test will influence physical therapy prognosis, interventions, or plan of care  
**Mostly Met (4.5)** <br>-One or more of the following is noted: rationale is occasionally vague or not specific to the case.  
**Partially Met (3.5)** <br>-1 or more items from letters a-c is inconsistently applied  
**Not Met (1)** <br>-Rationale was not clearly described in the **majority** of tests and measures |
| Writing & Organization                         | **Fully Met (2)** The paper is clearly written, organized, free of spelling/grammar errors; uses references to cite validity/reliability  
**Partially Met (1)** Paper has occasional errors or mild disorganization  
**Not Met: (0)** Writing and/or organization distracts from the paper |

**TOTAL: 17/20**

Blackinton, 2008
Tests & Measures Assignment

The purpose of this assignment is to prepare you to select tests/measures or outcomes for your patient with an appropriate rationale. You and a partner will be given a case study, and based on the case study, write a list of tests/measures that you will select along with a rationale for why they were selected. Specifically, the paper should outline:

- Name of each test/measure that is appropriate to the case
- A brief synopsis as to whether it is a valid/reliable and clinically feasible measure for the patient, including normal values as appropriate (reference/cite literature for these values).
- Rationale as to why the test/measure/outcome is appropriate to the specific case. For example, how will it influence your diagnosis, prognosis, or plan of care? A rationale does NOT describe what something is, rather, it describes WHY you think it is important to the specific patient case.
### Sample 7: Grading Rubric for Case Report Capstone Project Year 3

<table>
<thead>
<tr>
<th>Component</th>
<th>Excellent</th>
