

Setting Up ResponseWare

ResponseWare

By using ResponseWare, the presenter gives the audience the option of using their cell phone or laptop to participate in interactive polling through the internet.

Obtaining Session ID

A session ID is required so audience members can connect to the proper presentation. The presenter needs to generate this ID through the software and provide it for the participants.

1. Click on the Tools button on the TurningPoint Toolbar.
2. Select ResponseWare.

3. -Type in login information.
-Select to Allow Guests or Require Logins for participants joining the Session.
-Type in a Reserved Session ID if applicable.

4. Click Login.

The screenshot shows the 'TurningPoint - ResponseWare' window. It has a 'Login' section with fields for 'Server URL' (www.rwpoll.com), 'Username', and 'Password'. There is a 'Change' button next to the Server URL and a 'Save Information' checkbox. Below this is the 'Participant Options' section with two radio buttons: 'Allow Guests' (selected) and 'Require Login'. The 'Allow Guests' option has a sub-note: 'Participants can attend your session without logging in.' The 'Require Login' option has a sub-note: 'Participants must log in to participate in your session.' At the bottom is the 'Reserved Session ID' section with a text box and the label '(Optional)'. At the very bottom are 'Login' and 'Close' buttons.

5. This generates a session ID to give to participants.

The screenshot shows the 'TurningPoint - ResponseWare' dashboard. At the top, it displays 'Session ID 554676' in orange, with an 'Obtain New ID' button to its right. Below this is a 'Welcome Steve Sheely' message and a 'Logout' button. The main area contains a statistics box with the following data: 'Basic Mode Enabled False', 'Number of Connections 0', 'Average Response Time 154 ms', and 'Error Rate 0.00%'. To the right of this box is a green bar chart with four bars of increasing height. At the bottom right is a 'Close' button.

Displaying Session ID for Participants

The session ID can be displayed on slides during the presentation for the audience to see.

To display the ID:

1. Click on Tools on the TurningPoint toolbar.
2. Select Settings.
3. Click on Response Device on the left hand side.
4. Scroll to ResponseWare.
5. Change **Always Show Login Info** to True.
