IRB#: 2019-359

OPERATION DESERT STORM • OPERATION DESERT SHIELD

The Gulf War Illness Clinical Trials and Interventions Center is a collaborative research group based at Nova Southeastern University dedicated to research on conditions related to deployment in Operations Desert Storm and Desert Shield

We strive to develop effective treatments to improve outcomes and quality of life for Veterans suffering from Environmental Exposure conditions related to Gulf War deployment

## About Volunteering

We have studies across the country targeting areas of concern in Gulf War Illness using FDA approved drugs at approved doses and over the counter supplements

- Those with and without a diagnosis or symptoms are welcome
- Participation will inform and educate the Veteran and may lead to improved conversations with Primary Care Teams
- Results of evaluations will be provided upon request
