

Consortium for Excellence in Medical Education

CEME
2014 - 2015

INTERNSHIPS • RESIDENCIES • FELLOWSHIPS

A Message from...

Natasha N. Bray, D.O., FACOI, FACP

Greetings,

On behalf of the Consortium for Excellence in Medical Education (CEME), the OPTI affiliated with Nova Southeastern University College of Osteopathic Medicine, welcome to our electronic brochure. We are excited to provide up-to-date information on the wonderful training opportunities available to you within the OPTI. Our training programs offer a variety of settings and specialties from which to choose. Regardless of what your career goals are, there is a CEME program to meet your needs.

The CEME was established in January 1999 to increase opportunities for postgraduate medical training, internships, residencies, fellowships, and continuing education. The CEME is an alliance of clinical sites linked through electronic networks offering teaching, research, and 21 community health collaborations combined with a shared commitment to excellence in the education of tomorrow's physicians. The Consortium for Excellence in Medical Education is dedicated to the education of knowledgeable, highly skilled, and compassionate physicians capable of providing medical care of the highest quality using the latest clinical techniques and treatment procedures. You will find opportunity, support, and encouragement to excel within the Consortium for Excellence in Medical Education.

CEME strategic goals include

- New Program Site Development
- Faculty and Resident Development
- Maintenance of Accreditation
- Promotion of Research
- OPP Instruction

We invite you to peruse all of the stellar institutions affiliated with the Consortium for Excellence in Medical Education.

Warm Regards,

Natasha Bray, D.O., President, CEME

INSTITUTIONAL INFORMATION

Broward Health Medical Center (BHMC) is the largest and most comprehensive medical center in Broward County. As the flagship facility for the Broward Health system, BHMC is home to virtually every medical specialty and has been serving the community for more than 75 years.

The Chris Evert Children's Hospital (CECH) is also housed at BHMC. The CECH is recognized by the National Association of Children's Hospitals, providing family-centered care for newborns, neonates, children, and youth. Our health care team features pediatricians representing numerous subspecialties and pediatric staff dedicated to serving the individual needs of children and their families. Everything from child-friendly playrooms to mealtime menus has been planned with the comfort and special needs of children in mind.

- PGY 3 – \$53,000

INSTITUTIONAL INFORMATION

Columbus Regional-Midtown Medical Center traces its roots back to 1836, when the local hospital was a small wooden building on the banks of the Chattahoochee River. Today, our 413-bed acute-care hospital in Columbus, Georgia, meets the health and medical needs of a diverse community with a wide array of services—many of which are available nowhere else in the region. As one of only six regional perinatal centers in the region, Midtown Medical Center is entrusted with the care of infants from 27 counties in Georgia and Alabama. Midtown Medical Center also provides advanced emergency services across 13 Georgia counties as a Level 2 trauma center, and a comprehensive range of rehabilitation services including physical, occupational, and speech recovery.

In 2013, a separate Pediatric Emergency Department was established.

The John B. Amos Cancer Center is a comprehensive, multidisciplinary cancer center accredited by the Commission on Cancer of the American College of Surgeons—the only such treatment center in the Columbus, Georgia, service area.

The Children's Hospital at Midtown Medical Center serves women across their lifespans and children from birth through age 21 in an exceptional manner. Midtown Medical Center currently serves as one of only six regional perinatal centers in Georgia, providing critical care to infants from 21 surrounding counties. Both the High Risk Nursery (Neonatal Intensive Care Unit) and Special Care Nursery are equipped to provide an advanced level

of treatment. Midtown Medical Center also is home to the region's only dedicated pediatric program, including a full-service Pediatric Intensive Care Unit (PICU). The special needs of children and their families are addressed through unique décor designed to put children at ease, private and semi-private rooms, specialized rooms for oncology patients, and amenities for family members. A child-life specialist eases the trauma a hospital visit can cause for a child or family members.

Midtown Medical Center has been home to its Family Medicine Residency Program since 1972. The nationally recognized program, which was the first of its kind in Georgia and one of the first in the Southeast, has graduated more than 300 family physicians.

Regional Medical Center Bayonet Point

14000 Fivay Road, Hudson, FL 34667

Phone: (727) 819-2966

Email: BPMC.GraduateMedEd@HCAHealthcare.com

INSTITUTIONAL INFORMATION

Located just three miles off the Gulf of Mexico, Regional Medical Center Bayonet Point is an acute-care facility located in Hudson, Florida—30 miles north of Tampa with 290 licensed beds including 70 critical care beds. We operate in the Pasco/Hernando HCA Market with Medical Center of Trinity, serving the growing areas of the south and Oakhill Hospital to our north.

Regional Medical Center Bayonet Point has a long and illustrious history of providing the highest level of critical medical care for our community. Founded in 1981, it was the first hospital to be built in North West Pasco County serving residents in Pasco, Hernando, and Citrus counties. Our reputation for providing compassionate and innovative care to those in need is built on the foundation of excellence in patient care. Our quality programs have continually been recognized for excellence by *U.S. News and World Report*, Thomson Reuters, UnitedHealth, and the American Heart Association.

Regional Medical Center Bayonet Point's nationally recognized Heart Institute, Accredited Stroke Center, Accredited Chest Pain Center, Commission on Cancer-approved cancer care, orthopedic, and neurosurgery programs are all examples of the high-quality results we produce while caring for our patients. We provide a full range of adult cardiac services, and our physicians are dedicated to the diagnosis, treatment, and prevention of heart disease. We provide comprehensive cardiac service and have performed over 100,000 procedures since opening our doors. The facility is currently pursuing an 18-bed inpatient rehabilitation CON to incorporate into its mix.

Regional Medical Center Bayonet Point has a significant presence in the communities we serve. Last year, 1,172 employees, 500 volunteers, and over 310 physicians touched the lives of 78,708 patients from 5 counties (Citrus, Hernando, Pasco, Pinellas, and Hillsborough). Through our emergency rooms and inpatient/outpatient programs, our patients reaped the benefits of our accredited programs. In 2012, we handled approximately 14,000 admissions and 40,000 ER visits.

In February 2013, the Florida Department of Health awarded Regional Medical Center Bayonet Point full designation as a state Level II Trauma Center. Regional Medical Center Bayonet Point is the only trauma center in Pasco, Hernando, and Citrus counties.

POSTDOCTORAL PROGRAMS

Residencies

- Internal Medicine

BENEFITS OFFERED

Insurance

- Choice of health care plans for residents and their dependents with cost share
- Dental insurance for the resident and his/her dependents with cost share
- Life insurance equal to the annual salary
- Short-term disability insurance with option to buy up

INSTITUTIONAL INFORMATION

Largo Medical Center is a 425-bed teaching hospital located on two campuses. With some of the most comprehensive services in Pinellas County, Largo Medical Center features all private rooms with a number of specialty services, including a Certified Advanced Primary Stroke Center, an accredited Chest Pain Center, an accredited Community Cancer Center, behavioral medicine, the Florida Breast Institute, the Florida Knee and Orthopedic Pavilion, the Florida Spine and Neuro Center, emergency care, inpatient rehabilitation, a sleep disorders center, cardiovascular services, and a wound-care center with hyperbaric medicine.

Catering to all ages, Largo Medical Center is recognized for its compassionate care, cutting-edge technology, modern facilities, and accomplished medical staff. The hospital has received the Gold Seal from The Joint Commission.

The hospital's legacy of graduate medical education (GME) continues as it earned the designation of a Statutory Teaching Hospital by the Florida Agency for Health Care Administration. This prestigious designation is part of the hos-

pital's commitment to Nova Southeastern University to expand graduate medical education programs that meet the growing need for physicians in our community, Florida, and the nation. GME is affiliated with the Nova Southeastern University College of Osteopathic Medicine and the University of South Florida Morsani College of Medicine. The graduate medical education program at Largo Medical Center is the third-largest osteopathic medical teaching program in the southern United States.

CORRECTIONAL MEDICINE/PSYCHIATRY

There are 55 major correctional institutions located throughout the state of Florida divided among four regions. Each major correctional institution has a varying requirement for health services, and inmates are assigned according to their medical needs. Several institutions have specific psychiatric designations. Lake Correctional Institution and Zephyrhills Correctional Institution have purpose-built mental health units, including acute crisis intervention, step-down facilities, and long-term care. There is a significant volume of inpatient and out-patient psychiatric care. Lowell Correctional Institution serves as the psychiatric facility for female offenders.

There are five reception centers for receiving and evaluating inmates as they flow into the Florida Department of Corrections (FLDOC). The four male institutions—Northwest Florida Reception Center, Reception Medical Center, Central Florida Reception Center, and South Florida Reception Center—are co-located with high-level medical and psychiatric medical facilities. The one female reception center—Lowell Correctional Facility—also has a multipronged health and psychiatric care mission.

All the facilities of the Florida Department of Corrections are accredited by the American Correctional Association Commission on Accreditation in Corrections, which includes a mandatory evaluation and accreditation of the medical services.

Nova Southeastern University

College of Osteopathic Medicine GME Programs

PSYCHIATRY

This program is structured to provide an osteopathic resident with advanced and concentrated training in psychiatry and to prepare him/her for examination leading to board certification in this discipline. Applicants must be graduates of an American Osteopathic Association (AOA) accredited college of osteopathic medicine and be a member of the AOA. The strengths of the FLDOC/NSU-COM Psychiatry Residency Program are the diversity and volume of patient care delivered at FLDOC facilities. Residents are exposed to clinical variety and the latest in technical research both at the university and at the FLDOC. Exposure to an exhaustive range of both acute and chronic illness is part of the excellent training. This exposure ensures each physician will be competent in all facets of general psychiatry.

CORRECTIONAL MEDICINE

The Correctional Medicine Fellowship is a two-year program, which includes the opportunity to attain an M.P.H. degree along with the certificate for the fellowship. This program is accredited by the AOA and, for osteopathic physicians, would lead to the opportunity to sit for the board exam. For M.D.s, the program is not accredited as there is not yet a board certifying exam for M.D.s, but it does lead to the M.P.H. degree and to the certificate. The fellow spends time in several different types of correctional facilities, jails, and prisons (maximum, medium, women's, and mental health) as well as the prison inpatient hospital facility. There is exposure to juvenile facilities and to administrative duties. The fellowship's goal is to train leaders for the correctional medicine field.

SPORTS MEDICINE

This program is designed to provide the osteopathic subspecialty resident with concentrated advanced training in osteopathic sports medicine. Sports medicine consists of practitioners certified in family medicine, neuromusculoskeletal medicine, physical medicine, rehabilitation, orthopedics, physical therapy, nutrition, sport psychology and sports medicine. This group of practitioners uses an osteopathic approach to sports medicine. Practitioners offer a broad spectrum of nonsurgical modalities, including OMT, injections, strength and conditioning, and rehabilitation to address musculoskeletal disorders. The department addresses all aspects of medical care for the athlete. It is a one-year post-residency fellowship in sports medicine, open to AOA primary care board-certified physicians.

GERIATRICS FP/IM/FM/B

The Geriatrics Fellowship is a comprehensive, interprofessional clinical and scholarly program in the ambulatory, nursing home, hospital, and rehabilitation setting with the added benefit of an active Geriatrics Education Center (GEC). The geriatrics fellowship will comprise 12 one-month rotations and will usually commence at the start of NSU-COM's academic year on July 1 and be completed by June 30 of the following year. Rotations may be divided into two elective rotations subject to the approval of the program director. The specialty rotations include neurology, geriatric psychiatry, urology, rehabilitation medicine, palliative and hospice care, as well as wound care.

A. NSU Geriatrics Clinic

Training will occur in the established geriatrics ambulatory clinic based at NSU's Sanford L. Ziff Health Care Center. Electronic health records are utilized at the clinic. The geriatric fellow will work with health professions such as pharmacology and gero-psychology with the focus being on an interprofessional team approach. Core geriatric faculty members work along with the geriatric fellow to participate in the interprofessional

Balance and Fall Prevention Clinic, which conducts patient examinations twice a month. During certain clinic days, the fellow will participate in other specialty clinics that may include the pharmacy anticoagulation clinic, hearing and balance clinic, and speech pathology clinic.

B. Nursing Homes

1. **Covenant Village Care Center** is a continuous retirement community with a 60-bed nursing home, an assisted-living facility, and senior living apartments. The department chair is also the medical director of this long-term care facility. The fellow will be trained in the care of nursing home residents, regulations, medical directorship, and continuous quality improvement. This will be done when the fellow participates with the medical director at question-and-answer meetings and conducts a quality improvement project under supervision.

2. **Avante of Boca Raton**—a 144-bed facility—is another skilled nursing facility that will be the fellow's main site and where he or she will follow a panel of nursing home patients on a regular basis. This facility has a sub-acute and a long-term ventilator unit that provides an intense clinical experience and opportunity to interact with pulmonologists and respiratory therapists, in addition to the usual disciplines.

3. Alexander Nininger State Veteran's Nursing Home

has been a longstanding partner with the geriatrics department. It is located in Pembroke Pines, has 120 beds, and is one of six state nursing homes exclusively for veterans. It has a skilled unit as well as a dementia treatment section. The fellow will train at this facility.

C. **Acute Care Institution:** The geriatric fellow will perform trauma service consultations, as well as inpatient geriatric consultations under the supervision of the core faculty members.

D. **Geriatric Education Center and Teaching:** NSU has a federally funded geriatric education center called the Florida Coastal Geriatric Resources, Education, and Training Center. Consequently, the fellow is an integral part of the center's academic, research, and teaching activities, which involve members from up to 12 disciplines. The fellow provides training to seniors in the Lifelong Learning Institute, affiliated retirement centers, and in-service training to nursing staff in the long-term care facilities. In addition, the fellow is involved in NSU and other community health fairs.

E. **Leadership:** The fellow plays a leading role in the mentoring of students and resident members of the Geriatrics Interest Club, which receives support from the American Geriatrics Society.

FORENSIC PATHOLOGY

Forensic pathology is the subspecialty of pathology that attends to the medicolegal investigation of death. This subspecialty provides extensive training relative to the investigation and identification of natural and unnatural causes of death under which there may be medicolegal aspects and outcomes. The Broward County Medical Examiner and Trauma Services Division's Forensic Pathology Program is structured to provide an osteopathic pathologist with advanced and concentrated training in forensic pathology and to prepare him/her for examination leading to certification in this discipline. The Broward County Medical Examiner and Trauma Services Division conducts over 1,700 medicolegal examinations and autopsies per year, with approximately one half of the deaths due to immediate and direct physical or chemical injury. The scope of the cases offers every opportunity to obtain the required training.

INSTITUTIONAL INFORMATION

Larkin Community Hospital is one of 12 designated statutory teaching hospitals in Florida. We offer the largest number of training programs for osteopathic physicians in the United States (offering training in more than 30 different specialties). We sponsor an allopathic residency program in psychiatry, an advanced education in general dentistry residency program, an American Society of Health System Pharmacists accredited pharmacy residency program, and a podiatric medicine and surgery residency program. In addition, our School of Nursing offers a Registered Nurse Associate Degree program and our College of Biomedical Sciences offers a post-baccalaureate Biomedical Sciences degree program.

LCH is the only hospital in Miami-Dade County with an Area of Critical Need designation by the Florida Board of Medicine and our facilities are also a National Health Services Corps (NHSC) site designated by the Health Resources and Services Administration (HRSA) of the United States Department of Health and Human Services.

INSTITUTIONAL INFORMATION

With more than 3,000 employees, 650 physicians, and 672 licensed beds, Mount Sinai is South Florida's largest private, independent, not-for-profit teaching hospital. A proud member of South Florida's corporate community, Mount Sinai is the largest employer in Miami Beach. In the last year, Mount Sinai provided more than \$112 million in charity and uncompensated care.

For more than 60 years, Mount Sinai Medical Center has provided quality, comprehensive care for the residents of Miami Beach, the surrounding communities, and beyond. Our mission is to provide high-quality health care to our diverse community, which is enhanced through teaching, research, charity care, and financial responsibility. One of three statutory teaching hospitals in South Florida, Mount Sinai gives patients access to the advanced care that can only be found in an academic environment. Mount Sinai invests more than \$22 million annually to foster an atmosphere where doctors take on the important role of educators and remain at the forefront of the latest advances in medicine for the benefit of their students and patients. As an academic medical center, Mount Sinai helps prepare more than 160 residents and fellows, 570 student nurses, and 360 allied health professionals every year.

Mount Sinai Medical Center

Mount Sinai maintains an active research program that has resulted in significant medical advancements. With the support of grant funding from the National Institutes of Health, Mount Sinai is a leader in developing new treatment options for cancer, heart disease, Alzheimer's disease, and much more. In addition, Mount Sinai is the only hospital in South Florida to administer an adult community clinical oncology program, placing our medical center among the nation's foremost cancer research institutions. Spearheaded by the National Cancer Institute, this program gives our patients continued access to cutting-edge clinical trials and lifesaving treatment options years before they become widely available. The Mount Sinai Heart Institute, a partnership with New York's elite Columbia University, is recognized by *U.S. News & World Report* as a high-performing heart hospital and is the most active cardiac program in South Florida. Mount Sinai has the best cardiac surgery survival rate in Florida among hospitals that perform the highest volume of complex cardiac procedures.* In addition, Mount Sinai has the best heart attack survival rate in the state, and patients enjoy the shortest recovery time for cardiac surgery in Miami-Dade County.

Mount Sinai is consistently recognized with national awards and prestigious accreditations. The Harvey R. Chaplin Family Stroke and Chest Pain Center is among a select few certified comprehensive stroke centers in Florida and an accredited chest pain center. The American Stroke Association (ASA) has recognized our system-wide initiatives by presenting the hospital with its Gold Plus Quality Achievement Award for stroke care—the highest recognition given by the ASA. In addition, the Mount Sinai Comprehensive Cancer Center is the only oncology program in Florida to receive the Commission on Cancer Outstanding Achievement Award three consecutive times, and it is the first with an accredited radiation oncology program in South Florida. The Lila and Harold Menowitz Comprehensive Breast Center provides the most advanced diagnostic and treatment options available today, and it has the distinction of being the first accredited breast center in Florida.

As part of our ongoing commitment to provide convenient access to comprehensive medical services, Mount Sinai has expanded its presence across Miami-Dade. We offer six locations: Mount Sinai Medical Center on Miami Beach, Mount Sinai Hialeah, Mount Sinai Key Biscayne, Mount Sinai Coral Gables Diagnostic Outpatient Center, Mount Sinai Coral Gables Primary and Specialty Care, and Mount Sinai Aventura.

INSTITUTIONAL INFORMATION

The Floyd family of health care services is a leading medical provider and economic force in north-west Georgia and northeast Alabama. At the hub of these services is Floyd Medical Center, a 304-bed full-service, acute-care hospital and regional referral center, and Polk Medical Center, a 25-bed critical access hospital in Cedartown, Georgia. Floyd employs over 2,700 employees who provide care in over 40 medical specialties.

Floyd Medical Center's specialty services, including the Primary Stroke Center, Inpatient Diabetes program, Center for Joint Replacement, and our Spine Surgery program, all are certified by The Joint Commission. Floyd also is a Bariatric Surgery Center of Excellence, Quality Breast Center of Excellence, and Breast Imaging Center of Excellence and home to a state-designated Level II trauma and emergency care center and a Level III Neonatal Intensive Care Unit. Floyd has specialty centers for Behavioral Health, Wound Care and Hyperbarics, Women's Services, Newborn Care, Pediatrics, Inpatient and Outpatient Rehabilitation Services, Inpatient and Outpatient Surgery, Oncology, Cardiology, Intensive Care, Critical Care, and Cardiopulmonary Rehabilitation, all supported by comprehensive radiology, respiratory, and laboratory services.

Facebook: www.facebook.com/MagnoliaRegionalHealthCenter

INSTITUTIONAL INFORMATION

Magnolia Regional Health Center (MRHC) is licensed for 200 beds and is accredited by The Joint Commission on Accreditation of Healthcare Organizations. We are a past recipient of the Thomson 100 Performance Improvement Leaders Award, Best Places to Work in Mississippi, Healthcare Information and Management Systems Society, or HIMSS, stage 5 for EMAR Adoption, and Most Wired Rural Hospital 2012. Magnolia is a nonprofit city/county-owned facility certified for Medicare participation by the Department of Health and Human Services. We completed a \$43 million renovation and expansion project in 2009 and an additional expansion/renovation project in 2013.

MRCH supports osteopathic medical education from the third year of medical school through the final year of residency and fellowship. In the spring of 2006, MRHC became a core teaching site for medical students. We have affiliations with Kansas City University of Medicine and Biosciences, William Carey University College of Osteopathic

Medicine, University of Pikeville-Kentucky College of Osteopathic Medicine, and Nova Southeastern University College of osteopathic Medicine. We also accept visiting student rotations. With tremendous support from the hospital's board of trustees, medical staff, and administrative staff, a vision became a reality with the opening of an internal medicine residency program in July 2008. The AOA-approved residency program offers 18 seats in internal medicine in a traditional hospitalist rotating track.

MRHC welcomes the opportunity to assist you in your career development and professional advancement by providing the highest standard of training in a modern and progressive hospital along with the benefits of rural living. Located in northeast Mississippi, Corinth is a city of crossroads that attracts people from all walks of life for its history and tradition, its community spirit, and hospitality. Whether raising a family or retiring to the good life, Corinth is a great place to live.

Palm Beach Consortium for Graduate Medical Education

INSTITUTIONAL INFORMATION

The Palm Beach Consortium for Graduate Medical Education (PBCGME) is an AOA-accredited consortium comprising seven different programs based out of four acute inpatient hospitals affiliated with HCA, Inc., the nation's leading provider of health care services. With nearly 1,000 in-patient beds, over 47,000 admissions, 24,000 surgeries, and 150,000 ER visits, the facilities of PBCGME offer a wide variety of clinical exposure opportunities.

We have been training osteopathic physicians for over 30 years with an emphasis on teamwork and professionalism.

The PBCGME leadership team comprises graduates of our programs, affording them a true understanding of our residency experience and vested interest in our programs' successes.

West Palm Hospital: The hub of our campus is accredited both by the Health Care Facilities Program /AOA and Joint Commission. The first teaching hospital between Miami and Orlando, West Palm Hospital has been actively involved in osteopathic medical education since it was founded in 1975. With an experienced, motivated, and energetic teaching staff, West Palm Hospital boasts excellent didactics in addition to strong clinical rotations with ample opportunity for hands-on experience. West Palm Hospital is the base for our internal medicine and dermatology (combined with internal medicine) training programs.

Palms West Hospital: Palms West Hospital is an acute-care facility with a modern environment for training, which has partnered with Miami Children's Hospital to provide onsite emergency services. Palms West Hospital and the Children's Hospital at Palms West currently host PBCGME's residency training program in pediatrics.

St. Lucie Medical Center: Located a few miles inland from Atlantic beaches, St. Lucie Medical Center is a comprehensive health care facility serving Florida's vibrant and rapidly growing Treasure Coast community. The first teaching hospital on the Treasure Coast, St. Lucie Medical Center is the base facility for PBCGME's emergency medicine, family medicine, and traditional rotating internship programs.

University Hospital and Medical Center: University's Psychiatric Pavilion is a freestanding, state-of-the-art behavioral health facility, which features four units with 30 semiprivate patient rooms, cafeteria, gym, pool, and indoor and outdoor group areas. University Hospital and Medical Center hosts PBCGME's Psychiatry Residency Training Program. The Psychiatry Pavilion has more than 60 patient rooms.

West Palm Beach VA Medical Center: Our primary major training affiliate, the VA Medical Center, is an integral part of PBCGME's internal medicine, dermatology and psychiatry residency programs. *(You can find more information about this facility on page 25.)*

Web site: svresidency.com

INSTITUTIONAL INFORMATION

St. Vincent's Medical Center Riverside (SVR) is a 528-bed comprehensive, acute-care hospital. It was founded by the Daughters of Charity in 1916 and is part of St. Vincent's HealthCare and Ascension Health—the largest nonprofit health system in the United States as well as the largest Catholic hospital system in the United States.

The hospital's cancer program is one of the nation's oldest and features a special multidisciplinary breast clinic for women where patients are able to see numerous specialists in one location during the same appointment. SVR is proud to be home to Northeast Florida's first NAPBC (National Accreditation Program for Breast Centers) accredited breast health program. We also offer women access to the city's only mobile mammography unit (digital). In 2010, SVR launched the Lung Cancer Institute, which offers patients who are at risk and have no symptoms access to early screening through chest X-rays and CT lung exams.

SVR has long been a leader in cardiology. It's the first hospital in the region to offer patients Transcatheter Aortic Valve Replacement or TAVR. The minimally invasive procedure is giving many patients who were deemed inoperable a second chance at life. SVR is also home to the Atrial Fibrillation (AFIB) Institute, which offers patients who suffer from the heart rhythm disorder access to the latest medical advances and minimally invasive treatment. SVR has been designated a chest pain-accredited facility by the Society of Chest Pain Centers. SVR is home to the city's only dedicated open-heart recovery unit where certified cardiology nurses carefully watch over patients.

St. Vincent's Spine and Brain Institute specializes in the treatment of brain tumors, stroke, epilepsy, as well as neurological and spine disorders. The stroke program at SVR received the American Heart Association's Silver Award in 2011. Our Gamma Knife Perfexion allows brain tumors to be removed without brain surgery. The life-saving technology is only available at St. Vincent's in the Jacksonville market and can remove brain tumors with virtually no pain in just one visit.

SVR is home to Jacksonville's first Joint Commission-certified Orthopedic Center of Excellence. In addition to the Center of Excellence honor, SVR is home to one of Florida's busiest joint replacement programs. It is first in the state for the number of knee replacements it performs and a top-10 performer in hip replacements. The center also offers sports medicine, general orthopedics, minimally invasive neck and back surgery, and rehabilitation.

INSTITUTIONAL INFORMATION

The West Palm Beach VA Medical Center provides health care to 63,720 eligible veterans in a seven-county area along Florida's Treasure Coast. Comprehensive services include medical, surgical, and psychiatric inpatient care and outpatient services. In addition, primary care, mental health services, and retinal screenings are also provided by the six community-based outpatient clinics located in the adjacent counties of Hendry, Glades, Martin, St. Lucie, Okeechobee, and Indian River. Geriatrics and extended care service offers community residential care, adult day health care, respite and hospice care, nursing home care, and home-based primary care. Over 646,218 outpatient visits and 6,713 inpatient discharges occurred in the 2011 fiscal year. State-of-the-art equipment and professional employees dedicated to patient-centered care distinguish this facility as first class.

INSTITUTIONAL INFORMATION

Osceola Regional Medical Center's (ORMC) mission is to prepare future physicians for lives of service to patients and their professions. ORMC is dedicated to shaping the future of health care in our culturally diverse community. Our faculty members will mentor and prepare residents for careers characterized by commitment to excellence and quality of care. Our curricula employ a comprehensive approach to ensure residents develop excellent clinical skills and necessary core competencies. Physicians-in-training will work alongside staff members that model compassionate and ethical patient care and provide support and supervision to ensure patient safety.

At ORMC, we have both the obligation and honor to display exemplary best practices and quality, evidence-based, physician-led patient care. We are committed to enhancing the standard of health care through accessible and consistent care. We believe our commitment to the future generation of health care providers will ensure they are prepared for the evolving health care needs of Florida and the rest of the country.

Program highlights include ambulatory continuity experience in obstetrics and gynecology for a minimum of one half-day per week through the residency, procedure workshops, journal club, monthly tumor conference, in-house on-call attending 24/7, and robotic surgery training.

Florida Department of Health – Palm Beach County

OUR MISSION

To protect, promote, and improve the health of all people in Florida through integrated state, county, and community efforts.

FLORIDA DEPARTMENT OF HEALTH – PALM BEACH COUNTY
Preventive Medicine – Public Health Residency Program
800 Clematis Street, 2nd floor, #2215
West Palm Beach, FL 33401
Phone: (561) 837-5165 • Fax: (561) 837-5083
Email: palmbeachresidency@flhealth.gov

INSTITUTIONAL INFORMATION

The Florida Department of Health – Palm Beach County's Preventive Medicine-Public Health Residency program has been in existence for over 56 years and has a long history of developing new and innovative programs to meet the needs of its communities. Resident staff members have the opportunity to participate in the planning and the implementation of these programs.

The residency program at the Florida Department of Health – Palm Beach County offers a valuable learning opportunity to develop and increase physician competencies in public health practice, program planning, and administration in a dynamic and unique agency. The residency program has public health as its primary focus, and covers all aspects of preventive medicine, but our goal is to train physicians to have an understanding of the importance of public health as a component of preventive medicine.

We are proud of our partnerships with other community organizations. These partnerships allow us to provide an even broader range of experiences. Mental health, chemical dependency, and community organization are provided to our residents by our community partners.

The residency program has an affiliation agreement with Nova Southeastern University College of Osteopathic Medicine (NSU-COM). Program residents are employed through NSU-COM, and the college is responsible for salary, benefits, and other employer obligations. The Florida Department of Health – Palm Beach County is responsible for all educational aspects of the practicum year, while NSU-COM provides the residents an opportunity to complete their Master of Public Health (M.P.H.), which is a required residency component. The program is open to both osteopathic and allopathic physicians, allowing for enhancement of programs at both institutions.

The Accreditation Council for Graduate Medical Education (ACGME) and the American Osteopathic Association (AOA) sanction this affiliation. Allopathic (M.D.) residents who successfully complete the program will be eligible to sit for the certifying examination given by the American Board of Preventive Medicine. Osteopathic (D.O.) residents who successfully complete the program will be eligible to sit for the certifying examination given by the American Osteopathic Board of Occupational and Preventive Medicine.

POSTDOCTORAL PROGRAMS

Residencies

- Public Health/Preventive Medicine Residency

BENEFITS OFFERED

- Residents train under a contract with NSU College of Osteopathic Medicine.

STATISTICS

Resident rotations include

- Veterans Administration Medical Center at West Palm Beach
- Public Health Administration
- Communicable Diseases
- Clinical Rotations in our Health Centers
- Immunizations
- Environmental Public Health
- Dental Health
- Chronic Disease
- School Health
- WIC
- Chemical Dependency
- Behavioral Health and Occupational Health in a Diverse Community Population of 1.3 Million

The Florida Department of Health – Palm Beach County has served as the model agency for the state of Florida and many other states throughout the country. For over 60 years it has led the way with innovative programs that include

- immunizations for children
- parental education in child care
- environmental public health
- prevention surveillance—communicable and chronic disease

The many and varied core programs include communicable disease prevention and control, environmental public health, school health, community health, dental health, preparedness, maternal child health, and health education.

In addition, the department co-operates four primary care clinics with the Health Care District of Palm Beach County, providing millions of services annually under the Federally Qualified Health Center Standards. Co-located within these centers are WIC, dental, maternity, family planning, nutrition, immunizations, C.L. Brumback primary care clinics, and the network volunteer programs.

INSTITUTIONAL INFORMATION

Community Health of South Florida Inc. (CHI) is a nonprofit health care company with 10 health centers and 42 school-based health centers. CHI started out more than 40 years ago as a beacon of hope for the uninsured and those with no access to medical care. It has grown into a high-quality comprehensive care company with behavioral health, primary care, pediatrics, women's services, dental, radiology, pharmacy, laboratory, and much more. CHI has a large, diverse population of patients with dozens of cultural backgrounds, languages and beliefs, income levels, and serves both the insured and uninsured.

CHI believes in developing the next generation of doctors and has invested in growth and the community through its Brodes H. Hartley Jr. Teaching Health Center at CHI. It boasts a stellar faculty and a highly competitive and intensive program. The residency program is accredited by the American Osteopathic Association and CHI is accredited by the Joint Commission and recognized by the National Committee on Quality Assurance as a Level III Patient-Centered Medical Home.

- Outpatient Visits (not including emergency room visits) – 9,761
- Lakeside Medical Center Total Patients Treated – 33,544

**39200 Hooker Highway
Belle Glade, FL 33430**

INSTITUTIONAL INFORMATION

Lakeside Medical Center is a 70-bed, acute-care facility in Belle Glade, Florida, accredited by The Joint Commission that provides a 24-hour physician-staffed emergency room with access to the Health Care District of Palm Beach County's Trauma Hawk air ambulance. Lakeside Medical Center offers both inpatient and outpatient services, obstetrics, pediatrics, general surgery, radiology (including CT, MRI/MRA, nuclear medicine, ultrasound, fluoroscopy, and mammography), and respiratory therapy. The hospital treats over 33,000 patients a year and serves the rural, agricultural region bordering Lake Okeechobee in western Palm Beach County. The Health Care District of Palm Beach County, a comprehensive safety-net health care system created by voters in 1988, owns and operates Lakeside Medical Center. It is the county's only public hospital.

Patient Satisfaction and Quality

In 2011, the National Association of Public Hospitals and Health Systems recognized Lakeside Medical Center for achieving above-average scores in patient satisfaction, including the highest possible scores in 5 out of 10 areas. In 2012, The Joint Commission designated Lakeside Medical Center a *Top Performer on Key Quality Measures™* 2011 for surgical care and for treating heart failure and pneumonia. Lakeside Medical Center was one of seven hospitals in Palm Beach County to earn this distinction. Only 18 percent of the over 3,400 hospitals in the nation that reported their data to The Joint Commission received the *Top Performer* designation.

Family Medicine

Primary care physicians and specialists together provide comprehensive and continuing health care for the individual and the family across all ages. In July 2011, the hospital inaugurated a new Family Medicine Residency Program for 15 resident physicians through a partnership with Nova Southeastern University's College of Osteopathic Medicine, the Consortium for Excellence in Medical Education, the Palm Beach County Health Department, and other community organizations. In June 2013, the program graduated its first class of residents.

Women's Health

Lakeside Medical Center offers enhanced women's health services, including primary care, maternal and child care, and bone densitometry to help women through all stages of their personal health. The hospital offers technologically advanced digital mammography screenings for earlier detection of breast cancer.

Neonatal and Pediatrics

A dedicated team of specialists provides neonatal (newborns up to 28 days old) and pediatric (infants, children, and adolescents) hospitalist services onsite, 24 hours a day, and 365 days a year. The family-friendly Birthplace has six labor and delivery rooms and 10 spacious postpartum rooms designed for maximum privacy.

Salary

- PGY 1 – \$43,000
- PGY 2 – \$45,000
- PGY 3 – \$47,000
