H. Wayne Huizenga College of Business and Entrepreneurship
Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center
Ron and Kathy Assaf College of Nursing
Shepard Broad College of Law

NSU Florida
The Nova Southeastern University Undergraduate Student Catalog is a resource for information about academic program and curriculum requirements, academic policies, procedures for resolving academic and administrative grievances, course descriptions, and other information relevant to an undergraduate career at Nova Southeastern University (NSU).

The Undergraduate Student Catalog is published once each year. This catalog is comprised of information pertaining to undergraduate students of the colleges listed above. Students are bound by the curricula published in the catalog in effect the semester they enter the university. Students are bound by the policies in the most recently published version of the catalog. If there is an interruption in studies of more than one calendar year from the end of the last semester enrolled, the student must abide by the NSU Undergraduate Student Catalog in effect upon return, or to requirements approved by the student’s department chair. Policies and requirements, including fees, are subject to change without notice at any time at the discretion of the NSU administration. NSU reserves the right to change curriculum, course structure, calendar, graduation requirements, and costs during the life of this publication. However, adequate notice of anticipated changes might be given to the student, whenever possible. The failure to read this catalog does not excuse students from the rules, policies, and procedures contained in it.

The NSU Undergraduate Student Catalog is published by the College of Undergraduate Studies. For questions and comments about the catalog, please contact:

University Equal Opportunity/ Nondiscrimination Statement

Consistent with all federal and state laws, rules, regulations, and/or local ordinances (e.g., Title VII, Title VI, Title III, Title II, Rehab Act, ADA, Title IX, and the Florida Civil Rights Act), it is the policy of Nova Southeastern University not to engage in any discrimination or harassment against any individuals because of race, color, religion or creed, sex, pregnancy status, national or ethnic origin, nondisqualifying disability, age, ancestry, marital status, sexual orientation, gender, gender identity, military service, veteran status, or political beliefs or affiliations, and to comply with all federal and state nondiscrimination, equal opportunity, and affirmative action laws, orders, and regulations. Any such acts are unacceptable and strictly prohibited by the university.

In addition, the law prohibits retaliation against an individual for opposing any practices forbidden under this policy, for bringing a complaint of discrimination or harassment, for assisting someone with such a complaint, for attempting to stop such discrimination or harassment, or for participating in any manner in any investigation or resolution of a complaint of discrimination or harassment. This nondiscrimination policy applies to admissions; enrollment; scholarships; loan programs; athletics; employment; and access to, participation in, and treatment in all university centers, programs, and activities. NSU admits students of any race, color, religion or creed, sex, pregnancy status, national or ethnic origin, nondisqualifying disability, age, ancestry, marital status, sexual orientation, gender, gender identity, military service, veteran status, or political beliefs or affiliations, to all the rights, privileges, programs, and activities generally accorded or made available to students at NSU, and does not discriminate in the administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other school-administered programs.

For inquiries or complaints regarding perceived discrimination based on gender or sex, please contact:

Laura Bennett
Title IX Coordinator
Phone: (954) 262-7858
Email: laura.bennett@nova.edu or titleIX@nova.edu
Website and Online Reporting Form: nova.edu/title-ix
Office Location:
   Office of Human Resources
   3100 SW 9th Ave #248
   Fort Lauderdale, FL 33315

Inquiries about the application of Title IX may be directed to the Title IX Coordinator, the Assistant Secretary of Education of the United States, or both.

All other inquiries or complaints regarding perceived discrimination should be directed to:

Benjamin Johnson, Ph.D.
Assistant Dean for Student Development
Phone: (954) 262-7281
Email: bj379@nova.edu

NSU Accreditations

Nova Southeastern University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate’s, baccalaureate, master’s, educational specialist, doctorate, and professional degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Nova Southeastern University.

NSU’s Shepard Broad College of Law is a member of the Association of American Law Schools and is accredited by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association, 321 North Clark Street, Chicago, Illinois 60610-4714, (312) 988-6738.

Welcome to Nova Southeastern University! As the president of NSU, it is my honor to welcome you into our Shark family.

Our goal is to provide you with a quality education that will prepare you for a rewarding future in your career, your community, and your life. Within all our programs, you will learn from the expertise of our diverse faculty. Your hands-on, immersive program will challenge you in new ways that you have not experienced before. Over time, you will grow academically and personally as you work with professors and your peers. You will push past any limits you have set for yourself as you learn the skills that will allow you to dominate your chosen profession.

There is much more to life at NSU than going to class, so I encourage you to explore your interests with our on-campus clubs, organizations, and internship opportunities. Your course at NSU is yours to chart, and I am confident that you will make the best choices and have enriching experiences.

This moment represents the start of a new journey, and I would like to remind you that the journey is as important as the destination. Soon enough, you will be completing your degree, and I assure you, by the time you finish, with the knowledge and experience you gleaned at NSU, you will have unleashed your potential to be a leader.

Go Sharks, and FINS UP!

Sincerely,

George L. Hanbury II, Ph.D.
President and CEO
Nova Southeastern University
NSU Mission Statement

The Mission of NSU—a selective, doctoral-research university—is to deliver innovative academic programs in a dynamic, lifelong learning and research environment fostering integrity, academic excellence, leadership, and community service through engaged students, faculty, and staff.

NSU Vision 2025 Statement

By 2025, NSU will be recognized as a preeminent, professional-dominant, doctoral-research university that provides competitive career advantages to its students and produces alumni who serve and lead with integrity.

NSU Core Values

Integrity
Academic Excellence
Community
Diversity
Innovation
Opportunity
Scholarship/Research
Student Centered

The Vision 2025 Statement, Mission Statement, and Core Values were adopted by the NSU Board of Trustees on March 29, 2021.

University History

In 1964, Nova University of Advanced Technology was chartered as a graduate institution specializing in the physical and social sciences. In 1972, Nova introduced its first off-campus course of study, a major in education. Soon, Nova became nationally recognized for its innovative distance learning programs.

The board of trustees changed the university’s name to Nova University in 1974. Over time, Nova added programs in law, education, business, psychology, computer science, oceanography, social and systemic studies, and hospitality.

While Nova continued to expand its educational reach, Southeastern University of the Health Sciences also took an expansion course. Southeastern was created by osteopathic physicians committed to establishing a college of osteopathic medicine in the Southeast. As a result, Southeastern College of Osteopathic Medicine opened in 1981. From 1987 to 1997, the institution added Colleges of Pharmacy, Optometry, Allied Health, Medical Sciences, and the College of Dental Medicine, which admitted 88 students in 1997.

The merger of Nova University and Southeastern University of the Health Sciences in 1994 increased available resources and gave students the opportunity for a multi-disciplinary education and a better understanding of how their future professions related to society as a whole.

Today, Nova Southeastern University (NSU) is an accredited, co-educational institution providing educational programs from preschool through the professional and doctoral levels. The institution awards certificates, associate, bachelor, master, specialist, and first-professional degrees in a wide range of fields.

Those include the arts, business, counseling, conflict resolution, criminal justice, cross-disciplinary studies, engineering, computer and information sciences, education, humanities, medicine (D.O. program), optometry, pharmacy, dental medicine, nursing, various health professions, law, marine sciences, early childhood, psychology, and other social sciences. In 2018, NSU admitted the first class of the Dr. Kiran C. Patel College of Allopathic Medicine
Nova Southeastern University operates four campuses in the Miami to Fort Lauderdale area—the Fort Lauderdale/Davie campus, the East Campus in Fort Lauderdale, the North Miami Beach Campus, and the Oceanographic Campus in Dania Beach. The university also has campuses in the Florida cities of Miami (Kendall), Jacksonville, Orlando, Tampa Bay, Fort Myers, Miramar, and Palm Beach, and in San Juan, Puerto Rico. In August 2019, NSU will open the new Tampa Bay Regional Campus in Clearwater, featuring a 325,000 square-foot, state-of-the-art facility. The campus also includes a new branch site for NSU's Dr. Kiran C. Patel College of Osteopathic Medicine. All existing programs and services in Tampa will move to the new location before the Fall 2019 semester.

The campus in Fort Lauderdale/Davie is located on a 314-acre site 10 miles inland from the Atlantic Ocean and readily accessible via several highways and Florida's Turnpike. The campus is the central location for most of NSU's colleges, with state-of-the-art classrooms, laboratories, patient simulation facilities, auditoriums, and computer centers.

NSU’s campus expansion added, new educational facilities, athletic venues, residence halls, and performing arts theatres. In 2003, the university dedicated the 110,000-square-foot Jim & Jan Moran Family Center Village, a model for early education programs across the country. It also dedicated the Carl DeSantis Building, the 261,000-square-foot home of the H. Wayne Huizenga College of Business and Entrepreneurship, and the College of Computing and Engineering. NSU's Guy Harvey Oceanographic Center opened in 2012 as, one of the largest facilities in the U.S. dedicated to research and the conservation of marine life. Westside Regional Medical Center emergency center opened on NSU's Fort Lauderdale/Davie campus in summer 2015. The NSU Art Museum Fort Lauderdale boasts a permanent collection of more than 6,000 works, visual arts exhibits, arts curriculum, and educational programs in South Florida.

NSU's Fort Lauderdale/Davie campus is home to the Rose and Alfred Miniacci Performing Arts Center, and the Alvin Sherman Library Research and information Technology Center, which serves the university and the residents of Broward County in a unique private-public partnership.

NSU’s library system, composed of the Alvin Sherman library, Martin and Gail Press Health Professions Division Library, Panza Maurer Law Library, the William S. Richardson Ocean Sciences Library, and four junior K-12 school libraries contribute to NSU’s strong academic research environment.

In 2006, the university opened the Don Taft University Center, a 366,000-square-foot recreation, athletic, and arts complex at the Fort Lauderdale/Davie Campus. The center is home to a multipurpose 4,500-seat arena and, studios, the Flight Deck Pub, a state-of-the-art gym, food court, and a performing and visual arts wing. The wing houses the Department of Communication, Media, and the Arts at the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center. It includes the intimate Black Box Theatre, art gallery, performance theatre, and additional rooms supporting theatre, music, art, dance, and other creative activities.

Eight residence halls at the Fort Lauderdale/Dave Campus serve undergraduate students, including Mako Hall, a modern newly constructed 608-bed residence hall.

Opened in September 2016, NSU’s Center for Collaborative Research (CCR) is one of the largest and most advanced research facilities in Florida. The CCR provides wet and dry labs for NSU’s innovative researchers, a General Clinical Research Center, an outpatient facility, a technology incubator offering partnerships with innovative companies, and the NSU Cell Therapy Institute. The CCR also houses NSU’s Institute for Neuro-Immune Medicine; NSU’s Rumbaugh-Goodwin Institute for Cancer Research; the Emil Buehler Research Center for Engineering, Science and Mathematics; the U.S. Geological Survey (USGS), which partners with NSU on collaborative research. The Noel P. Brown Sports Center has a state-of-the-art fitness center, two full-sized basketball courts, a volleyball court, and areas for physical fitness activities and programming.

For a full overview of NSU’s campuses and facilities, refer to the Fact Book at nova.edu/publications/factbook/2020/.

NSU Health Care Clinics

The Health Professions Division Health Care Centers serve as integral parts of the student training programs and bring health care service to under-served areas of the community.

NSU Health Care Center at North Miami Beach
1750 N.E. 167th Street
North Miami Beach, FL 33162
Phone: (954) 262-4200

This center provides the community with full-service, primary care-family-medicine, a state-of-the-art dental center, and a comprehensive optometric clinic and optical dispensary.

NSU-COM Medical Center at
Covenant Village of Florida
9241 West Broward Boulevard Suite 3105
Plantation, FL 33324
Phone: (954) 262-4100

This center provides convenient medical care so that residents can quickly receive the health care they need.

Sanford L. Ziff Health Care Center
3200 S. University Drive
Fort Lauderdale, FL 33328
Phone: (954) 262-1262

This primary care facility offers state-of-the-art full-service capabilities. It houses family medicine, pediatrics, internal medicine, geriatrics, student health, obstetrics/ gynecology, osteopathic manipulative medicine, occupational therapy, and a pharmacy. It also offers physical therapy, sports medicine and rehabilitation, optometric clinic, and an optical dispensary.

Student Health Care Clinics (Walk-In Service)

Student Medical Center
3200 S. University Drive
Fort Lauderdale, FL 33328 Phone: (954) 262-1262

The mission of the Student Medical Center is to provide quality healthcare services to our students. It is staffed by board certified physicians and physician assistants who provide primary care services including:

- Physical Exams
- Women’s Health Care
- Immunizations
Preventive Care
General Medical Care
Minor Surgical Procedures

Audiology Clinic
3200 S. University Drive
Davie, FL 33328
Phone: (954) 262-7750

The Audiology Clinic provides comprehensive hearing and vestibular services to patients of all ages. This faculty practice and community-care facility offers comprehensive audiology care within a teaching environment. Doctor of Audiology (Au.D.) students work beside faculty to provide service to patients. Patients and students develop a comfortable patient-provider relationship in a professional atmosphere with advanced technology and contemporary treatment programs.

College of Dental Medicine
3200 S. University Drive
Davie, FL 33328
Phone: (954) 262-7500

Services are available to adults, children, adolescents, and elderly clients. All dental treatment meets or exceeds technical and ethical standards of care established by the dental profession. The college offers patients comprehensive and specialty care within a university setting. Patients choose from one of four affordable treatment options providing standard dental care, orthodontics, pediatric dentistry, endodontics (root canal therapy), periodontics (gum disease, implants), oral surgery (extractions), and prosthetics (complete and removable partial dentures, crowns, bridges).

Kids In Distress
819 N.E. 26th Street, Bldg. C
Wilton Manors, FL 33305
Phone: (954) 567-5640

Family Therapy Clinic
Brief Therapy Institute
3301 College Avenue
Maltz Building
Fort Lauderdale, FL 33314
Phone: (954) 262-3030

The clinic provide family, couples, and individual brief therapy services on a sliding fee scale.

Lighthouse of Broward County
650 North Andrews Ave.
Fort Lauderdale, FL 33311
Phone: (954) 463-4217

Developmental Assessment Clinic:
- **Diagnostic Services:** Psycho-developmental evaluations are provided for those who are suspected of having an autism spectrum disorder (ASD), exhibiting developmental delays, or experiencing early childhood behavioral difficulties. Additionally, the clinic serves adolescents with a prior diagnosis of ASD and/or developmental disabilities for reassessment purposes.
- **Autism Education Program:** The information provided to families for ASD intervention is both overwhelming and often times inaccurate. Caregivers struggle to discern quality programs that are evidence-based from those that have little success. To address this need, a series of community-based, ongoing seminars and one-on-one caregiver follow-up sessions assist in determining the next steps after diagnosis.

Feeding Disorders Clinic:
The Feeding Disorders Clinic works with an inter-professional team to support healthy eating habits and transform mealtimes into successful experiences. With the help of behavioral psychology, nutrition, and speech pathology focusing on oral-motor concerns, the clinic provides comprehensive evaluation and intervention services to support children and family with feeding difficulties.

Challenging Behavior Clinic:
Engaging in significant behavior problems can isolate children from peers, decrease ability to learn, and lead to elevated levels of stress in the home. The Challenging Behavior Clinic addresses these concerns through direct support for caregivers through parent training sessions, or individual sessions integrating care for children and caregivers. These treatments teach children adaptive methods to replace problem behaviors with functional skills.
Physical Therapy

Don Taft University Center
3301 College Avenue Suite 1441b
Davie, FL 33314
Phone: (954) 262-4149

Physical therapy provides treatment and preventive care for athletes and the community. Therapists help with all aspects of pain management in sports, and alternative therapies.

Occupational Therapy

Don Taft University Center
3301 College Avenue, Suite 1441b
Davie, FL 33314
Phone: (954) 262-4149

Occupational therapy assists patients of all ages with caring for themselves, participating in productive activities and interacting with others.

Speech-Pathology Clinic

6100 Griffin Road
Davie, FL 33314
Phone: (954) 262-7726

The Speech-Language Pathology Clinic conducts evaluations and treatment services for children and adults with speech, language, and communication delays and disorders. Faculty have expertise in developmental issues, autism, language & learning disabilities, stroke and disease, early intervention, stuttering, augmentative communication and cleft palate. Bilingual services are provided.

Sports Medicine

Don Taft University Center
3301 College Avenue Suite 1433
Davie, FL 33314
Phone: (954) 262-5590

The Sports Medicine Clinic is an interdisciplinary subspecialty of osteopathic medicine which deals with the treatment and preventive care of athletes, both amateur and professional. Our team includes primary care physicians, specialty physicians and surgeons, athletic trainers, physical therapists, coaches, nutritionists, psychologists, strength and conditioning trainers, and of course the athlete.

The Eye Institute

3200 S. University Drive
Davie, FL 33328
Phone: (954) 262-4200

The Eye Institute provides primary eye care and pediatric/binocular vision services to the urban community in the downtown area as well as the hospital district patients. Along with routine and emergency eye care, services for early detection and monitoring and treatment of glaucoma and other eye diseases are provided by student’s supervised by experienced faculty members in the state-of-the-art facility. Specialty care, including vision training for children up to 12 years of age, is offered by the Eye Institute’s pediatric sections. A wide selection of frames for both children and adults are available at reasonable cost on-site.

Center of Student Counseling and Well-being by Behavioral Health

3301 College Ave.
Student Affairs Building, 3rd Floor
Davie, FL 33314
954-262-7050 or 954-424-6911
Website: https://www.nova.edu/studentcounseling/

The NSU Center for Student Counseling and Well-Being by Henderson Behavioral Health offers a wide array of services and programs to support various aspects of student well-being. These services include daily triage appointments for new students, medication management, and individual, couples, and family counseling. Additionally, we work with NSU Student Affairs to link students to psychoeducational programming and personal growth groups. Examples of what a student can focus on in counseling include but are not limited to: Academic & Career Development, Relationship Challenges, Adjustment to Student Life, Depression, Stress & Time Management, Problem Solving & Goal Setting, Test and Seminar Anxiety, Eating and Body Image, Anxiety, and Substance Abuse. Henderson is accredited at the highest level to provide student counseling services by the Commission on the Accreditation of Rehabilitation Facilities (CARF).

Services Offered
- individual counseling
- couples counseling
- family counseling
- psychiatric services

How to make an appointment
Please register for an appointment accessing the HSCS portal at https://www.nova.edu/studentcounseling/

Daily Triage/Screening Appointments are available.

Payment
Part-time and full-time students can participate in up to 10 sessions per year, and counseling sessions are available at no cost. If seeing the psychiatrist, students are charged a nominal fee. Insurance is accepted.

Hours of Operation
Monday 8:30am – 6:00 p.m.
Tuesday 8:30am – 8:00 p.m.
Wednesday 8:30am – 8:00 p.m.
Thursday 8:30am – 5:00 p.m.
Friday 8:30am – 6:00 p.m.

**AFTER HOURS ON-CALL COUNSELOR:** (954) 424-6911, available 24/7 (365 days per year): select #4 to connect to counselor

**NSU Pharmacy**

The NSU Pharmacy provides free screenings to NSU students, employees, and the public on the third Tuesday of every month.

This full-service pharmacy is available to students and the community for all prescription needs:

- Prescription dispensing
- Compounding tailor-made medicines
- Disease management programs - diabetes, hypertension, anticoagulation, hyperlipidemia, and osteoporosis
- Dosage monitoring for patients with multiple prescriptions
- Herbal and nutritional counseling
- Wellness screenings

**Student Medical Center**

The mission of the Student Medical Center is to provide quality primary health care services to our collegiate populations. Services include physical exams, women’s health care, immunizations, preventive care, general medical care, and minor surgical procedures.
Overview of NSU Undergraduate Studies

Undergraduate courses at NSU emphasize high-quality instruction, small class size, and personal attention from an accomplished faculty of noted researchers, published authors, practitioners, and consultants. In addition to close faculty-student relationships, the university provides resources outside the classroom to help NSU undergraduates achieve their academic goals.

All undergraduate students at NSU undertake comprehensive general education coursework within the areas of written composition, mathematics, arts and humanities, social and behavioral sciences, and sciences.

Majors are offered in a variety of formats, including day, evening, online, or off-campus programs. Students should check the appropriate college section of this catalog for details about program formats, program requirements, major and minor descriptions, learning outcomes, and curricula. While students are assigned to a specific NSU college based on their major, they may take classes or minor in subjects from any of the other undergraduate colleges.

Premier Programs and Honor Societies

NSU has created several premier programs targeting high achieving high school students who want to enhance their college experience. These programs may require separate application(s) and require students to attend a Shark Preview Weekend for an interview. The Dual Admission program will reserve a seat in NSU’s competitive graduate and professional programs. The Presidential Scholars program is our premier scholarship program, interviews are by invitation only. The Razor’s Edge Scholarship Programs select a small cohort of freshmen to dive into one of the five areas identified below. The Honors College provides a challenging and engaging academic community for high performing students. Honors can be combined with each of the Premier Programs. Additional information about the Farquhar Honors College can be found on page 196 of this catalog.

Dual Admission Programs

The dual admission program is designed for students who are focused on their career goals and interested in securing a reserved seat in one of NSU’s participating graduate and professional programs. Students who are accepted into the university and meet the entry requirements for their preferred dual admission program may apply and interview for dual admission status. This would allow them to transition into one of the selective health professions, law school, or one of the graduate programs in business, computer science, humanities, marine biology, and psychology. In most cases, students are allowed to complete any undergraduate major, as long as they meet all degree requirements and program pre-requisites.

Students selected for Dual Admission will receive a student agreement that outlines specific program requirements and expectations for entering into the graduate/professional program, including minimum GPA requirements, course pre-requisites and minimum scores on required professional examinations. All dual admission course pre-requisites must be taken at NSU, unless otherwise approved in advance by the Dual Admission Program. Select dual admission programs are also available as accelerated options, in which students are able to transition to their graduate/professional programs without graduating first. Students who wish to modify their transition date into the graduate/professional program may initially petition at the end of their first year at NSU.

Final admission into the graduate or professional program is contingent upon completing the prescribed undergraduate course of study, maintaining the requisite grades, adhering to the student code of conduct, achieving specific scores on required admission tests, submission of the graduate or professional program application, and, in some cases, a final interview with the graduate or professional program admissions committee. The receiving college reserves the right to make the final judgement on all admission decisions. Undergraduate scholarships typically do not carry over into graduate and professional programs.

Only freshman applicants are eligible to apply for dual admission programs in the health professions. For more details regarding dual admission programs and requirements, please go to nova.edu/undergraduate/academics/dual-admission/.

Available Dual Admission Programs

Health and Medical Professions
- Doctor of Audiology (Au.D.)
- Doctor of Dental Medicine (D.M.D.)
- Doctor of Occupational Therapy (O.T.D.)
- Doctor of Optometry (O.D.)
- Doctor of Osteopathic Medicine (D.O.)
- Doctor of Pharmacy (Pharm.D.) and Doctor of Philosophy in Pharmacy (Ph.D.)
- Doctor of Physical Therapy (D.P.T.)
- Master of Medical Science in Physician Assistant (M.M.S.)
- Master of Public Health (M.P.H.)
- Master of Science in Anesthesia (M.S.)
- Master of Science in Family Therapy (M.S.)
- Master of Science in Health Informatics (M.S.)
- Master of Science in Speech-Language Pathology (M.S.)
PREMIER PROGRAMS AND HONOR SOCIETIES

Business

Master of Accounting

Master of Business Administration (M.B.A.) with concentrations in:
- Business (Flex)
- Business Intelligence/Analytics
- Complex Health Systems
- Entrepreneurship
- Finance
- Human Resource Management
- International Business
- Management
- Marketing
- Process Improvement
- Sport Revenue Generation
- Supply Chain Management and Operational Systems

Humanities and Social Sciences

Master of Arts in Composition, Rhetoric, and Digital Media (M.A.)
Master of Science in Conflict Analysis and Resolution (M.S.)
Master of Science in National Security Affairs and International Relations (M.S.)

Law

Juris Doctor (J.D.)

Oceanography

Master of Science in Marine Science (M.S.)

Psychology

Doctor of Philosophy in Clinical Psychology (Ph.D.)
Doctor of Psychology in Clinical Psychology (Psy.D.)
Doctor of Psychology in School Psychology (Psy.D.)
Specialist in School Psychology (Psy.S.)

For additional information regarding specific dual admission requirements, visit nova.edu/undergraduate/academics/dual-admission/.

DUAL ADMISSION PROGRAM FOR ENROLLED STUDENTS (DAPES)

The Dual Admission Program for Enrolled Students (DAPES) is available to eligible students at completion of their freshman year for select dual admission programs. To be eligible for DAPES, students must complete at least 28 credits during their freshman year (fall/winter) at NSU with a cumulative GPA of 3.5 or higher, including at least 8 specific credits of laboratory science with a GPA of 3.5 or higher for health professions. The application period for DAPES is August 5 to September 15, after completion of the freshman year.
For additional information, students should contact their academic advisor and go to nova.edu/undergraduatestudies/dual-admit/dapes.html.

Honor Societies and Academic Organizations

Honor societies recognize and promote academic excellence. Membership in these societies is an honor and a privilege that can enhance your academic and professional career. Academic honor societies provide a means by which students can establish a professional network and move forward in their careers.

Provided, below, is a list of regional, national, and international academic honor societies affiliated with Nova Southeastern University.

Alpha Chi
Alpha Chi is an academic honor society with more than 289 chapters in the United States. To qualify for Alpha Chi, students must be juniors or seniors, complete a minimum of 24 credits at NSU, and be in the top 10 percent of their college. Qualifying students are invited to join once a year. Membership in Alpha Chi includes eligibility to compete for local and national scholarships. Alpha Chi is open to all undergraduate majors. For more information, contact the Farquhar Honors College (honors.nova.edu/alpha-chi.html).

Alpha Eta
Alpha Eta is the national honor society for the allied health professions. The Nu Sigma Upsilon chapter at NSU is one of ninety charted Alpha Eta chapters. The society's purpose is the promotion and recognition of significant scholarship, leadership, and contributions to the allied health professions. To qualify for Alpha Eta, students shall be enrolled in an allied health program leading to an associate, baccalaureate, graduate or doctoral degree, and enrolled in their last year of study. A limited percentage of students in each of the allied health degree programs who have maintained an overall GPA of 3.5 or higher in undergraduate programs and 3.8 or higher in the graduate or doctoral programs are eligible. Beyond scholarship, prospective members shall have shown capacity for leadership, service, and achievement in their chosen allied health field, and shall have been recommended by active members through a nominating process in each department or program and approved by the chapter Executive Council. Alpha Eta is for students majoring in Allied Health Professions, faculty, and qualifying alumni. For more information, contact the Dr. Pallavi Patel College of Health Care Sciences (healthsciences.nova.edu/alpha-eta-society.html).

Alpha Kappa Delta
Alpha Kappa Delta, the international sociology honor society, seeks to acknowledge and promote excellence in scholarship in the study of sociology, the research of social problems, and such other social and intellectual activities as will lead to improvement in the human condition. To qualify for Alpha Kappa Delta, a student must be a declared Sociology major leading to a baccalaureate degree or demonstrate a serious interest in sociology within an official program at NSU, be at or above junior standing and have completed at least four (4) courses within the sociology curriculum prior to initiation (exclusive of extension or courses graded pass/ fail), transfer students must have completed at least 3 of the 4 courses at Nova Southeastern University, cumulative GPA of 3.3 on a 4.0 scale, as well as a 3.0 average in sociology courses. For more information, contact the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center (cnso.nova.edu).

Alpha Phi Sigma
Established in 1942, Alpha Phi Sigma is recognized by both the Academy of Criminal Justice Sciences and the Association of College Honor Societies as the National Criminal Justice Honor Society. NSU’s chapter, Omega Tau, includes members in the criminal justice major at the bachelor’s, master’s, and doctoral levels and college of law students. The mission of Alpha Phi Sigma is to promote critical thinking, rigorous scholarship, and life-long learning; to keep abreast of the advances in scientific research; to elevate the ethical standards of the criminal justice professions; and to sustain in the public mind the benefit and necessity of education and professional training. Alpha Phi Sigma is the largest and only official criminal justice honor society in America. To become a member, a student must have completed one-third of his or her total hours required for graduation at NSU and must be recommended by the chapter adviser. Undergraduate students must maintain a minimum of 3.2 overall GPA on a 4.0 scale, a 3.2 GPA, on a 4.0 scale, in criminal justice courses. The student must also rank in the top 35 percent of his or her classes and have completed a minimum of four courses within the criminal justice curriculum. The Honor Society is open to those with a declared criminal justice or related field major or minor. “Related Fields” refer to various disciplines related to the Criminal Justice field, such as juvenile delinquency, criminology, legal perspectives, abnormal behavior, and
service administration/management. For more information, contact the Abraham S. Fischler College of Education and School of Criminal Justice (education.nova.edu)

**Beta Beta Beta**

Beta Beta Beta (TriBeta) is a society for students, particularly undergraduates, dedicated to improving the understanding and appreciation of biological study and extending boundaries of human knowledge through scientific research. To join the NSU chapter (Rho Rho) as a regular member, a student must be a biology major, have an overall GPA of 3.2 (or higher), at least three biology (BIOL) courses completed (one of which is above the introductory level), an average GPA of 3.0 or higher in all biology courses, at least 1 BIOL course completed at the 3xxx or 4xxx level at NSU, 15 or more NSU credits completed, and 45 credits or more completed toward the degree. For more information, contact the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center (cnso.nova.edu).

**Chi Alpha Sigma**

Chi Alpha Sigma is the first and only nonprofit organization that was established to honor college student-athletes who have excelled in both the classroom and in athletic competition. Chi Alpha Sigma is an honor society that recognizes college student-athletes who receive a varsity letter in their sport, achieve junior academic standing or higher after their fifth full time semester, and earn a 3.4 or higher cumulative grade point average. Selection for membership is also based on excellent character and citizenship, in consultation with the individual’s head coach. Chi Alpha Sigma continues to provide outstanding student-athletes with an opportunity to become connected within a fraternal association that aligns their educational and athletic successes for a lifetime.

**Kappa Delta Pi**

Established in 1911, Kappa Delta Pi (KDP), is an International Honor Society in Education dedicated to scholarship and excellence in education. The society is a community of scholars dedicated to worthy ideals: recognize scholarship and excellence in education, promote the development and dissemination of worthy educational ideals and practices, enhance the continuous growth and leadership of its diverse membership, foster inquiry and reflection on significant educational issues, and maintain a high degree of professional fellowship. The Kappa Delta Pi Educational Foundation and local chapters award more than $100,000 annually in scholarships for academic study to active members who are undergraduate, graduate, or doctoral degree-seeking students. Undergraduate Student: Must have 30 credit hours completed at NSU with a minimum 3.5 cumulative GPA, at least 12 credit hours of education courses completed or in progress. For more information, please contact the Abraham S. Fischler College of Education and School of Criminal Justice (education.nova.edu).

**Lambda Epsilon Chi**

Nova Southeastern University maintains a charter membership in Lambda Epsilon Chi (LEX), the national honor society for paralegal/legal assistant studies. The purpose of LEX is to recognize those who have demonstrated superior academic performance in an established program of paralegal studies offered at an institution that is an institutional member in good standing of the American Association for Paralegal Education (AAfPE). Students are inducted into LEX once a year. To be inducted, a student must demonstrate “superior academic performance,” which is evidenced by an overall GPA of at least 3.25, and a GPA in their paralegal classes of at least 3.50 after completing two thirds of the program requirements. For more information, contact the Shepard Broad College of Law or visit aafpe.org.

**Lambda Pi Eta**

Upsilon Zeta chapter of Lambda Pi Eta was chartered in 2005. To be eligible for membership, students must be communication majors with a minimum of 60 earned credit semester hours in undergraduate credit courses, a cumulative GPA of at least 3.0, at least 12 earned credit semester hours in communication major courses with at least a 3.25 GPA in those courses, be in the top 35 percent of their graduating class, and be currently enrolled as a full-time student in good standing. For more information, contact the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center (cnso.nova.edu) or visit natcom.org/lambdapieta/.

**Omicron Delta Kappa**

Omicron Delta Kappa is the national leadership honor society. Membership in Omicron Delta Kappa is granted to those who demonstrate leadership achievements in one of five areas of NSU’s campus life: athletics; campus or community service, social and religious activities, and campus government; creative and performing arts; journalism, speech, and mass media; and scholarship. Undergraduate students selected must have junior or senior standing and rank in the upper 35 percent of their class. For more information, visit odk.org.
Nu Rho Psi
Nu Rho Psi is the National Honor Society in Neuroscience, founded in 2006 by the Faculty for Undergraduate Neuroscience and now an independent honor society. Students qualify for Nu Rho Psi membership if they have: registered for a major or minor in Neuroscience, completed at least three semesters of the college curriculum, completed at least 9 semester hours in NEUR courses, and maintained an overall GPA of 3.3 and a GPA of 3.5 in NEUR courses. For more information, visit nurhopsi.org or contact Dr. Allie Holschbach (psychology.nova.edu/faculty/profile/holschbach-allie.html).

Phi Kappa Phi
Phi Kappa Phi is the nation’s oldest and most selective multidisciplinary collegiate honor society. Membership is by invitation only to NSU’s top 7.5 percent of second term juniors and the top 10 percent of undergraduate seniors and graduate and professional students. Faculty, professional staff and alumni who achieve scholarly distinction may also be eligible. Qualifying students are invited to join once a year. For more information, contact the Farquhar Honors College (honors.nova.edu).

Psi Chi
Psi Chi, the international honor society in psychology (www.psichi.org), promotes excellence in scholarship and advances the science of psychology. Membership in the NSU chapter is open to all undergraduate and graduate students who meet the minimum academic qualifications: undergraduate students (by August of the year preceding induction) must be enrolled and have established a GPA at NSU, must have completed at least 9 semester hours in psychology courses at NSU, must have an overall GPA that is in the top 35 percent of their class based on rankings within sophomore, junior, and senior classes, must have an overall GPA of at least 3.0 on a 4-point scale, and must have a GPA in psychology classes that is at least 3.30 on a 4-point scale. Undergraduate students who have transferred to NSU and are interested in becoming a Psi Chi member must meet the requirements listed above, plus have completed one semester at NSU (by August of the year preceding induction) to establish a GPA, and to complete 9 hours of psychology courses at NSU. Psi Chi is for students with a declared major or minor in Psychology. (Graduate students must have an overall GPA of at least 3.70 on a 4-point scale; other requirements are the same as for undergraduates.) For more information, visit honors.nova.edu/psi-chi.html.

Rho Rho Rho
The Beta Chapter of this honor society was established to recognize outstanding students earning a degree in marine biology. Members of Rho Rho Rho work to promote awareness of marine biology and appreciation of the marine environment with students of all majors. Students are inducted into this society annually. To be eligible as a regular member, a student must have declared a major or minor in marine biology, completed at least two full semesters (30 credits), completed at least two courses that qualify for the marine biology major and are at the 2000 level or above with an average grade of 3.0 (B) or higher in those courses, have an overall NSU GPA of 3.2 or better, and be in good academic standing. For more information, contact the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center (cnso.nova.edu).

Sigma Beta Delta
Sigma Beta Delta is an international honor society for students in business, management, and administration with the purpose of encouraging and recognizing scholarship and achievement and to encourage and promote personal and professional improvement. To be eligible for membership, a business student must substantially complete all coursework by March of the commencement year, maintain a 3.8 or higher GPA overall, and be invited to membership by the faculty officers. Students must be enrolled in the courses required to complete the degree. Undergraduate students are inducted on the day of the annual commencement ceremony. Students must have completed at least one half of the degree program at NSU. Each year, students are notified by mail if they meet the criteria to join Sigma Beta Delta. For more information, contact the H. Wayne Huizenga College of Business and Entrepreneurship (business.nova.edu).

Sigma Tau Delta
Alpha Nu Iota is NSU’s chapter of Sigma Tau Delta, the international English honor society. Sigma Tau Delta’s goals are to recognize academic excellence of students of the English language and literature, as well as the accomplishments of professional writers. In order to be eligible for membership, students must be an English major or minor, have a minimum of a 3.5 GPA in NSU LITR and WRIT courses, a minimum 3.5 cumulative GPA, have completed at least 6 credits of LITR or WRIT, and have completed at least 36 credits of college work (transfer or NSU). For more information, contact the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center (cnso.nova.edu).

Sigma Theta Tau
Upsilon Chi is NSU’s chapter of Sigma Theta Tau, the International Honor Society of Nursing. Sigma Theta Tau supports the

Nova Southeastern University  •  Undergraduate Student Catalog  •  2021–2022
PREMIER PROGRAMS AND HONOR SOCIETIES
learning, knowledge, and professional development of nurses committed to making a difference in health worldwide. In order to qualify, undergraduate students must have a 3.0 GPA or higher or be in the top thirty-five percent of their class. For more information, contact the Ron and Kathy Assaf College of Nursing (nursing.nova.edu).

**Sigma Xi**
Sigma Xi, The Scientific Research Honor Society was established at Cornell University in 1886 to reward excellence in scientific research and to encourage a sense of companionship and cooperation among scientists in all fields. The Society is a diverse organization of members and chapters dedicated to companionship in science and engineering and to the advancement of knowledge through research, service, and teaching. Membership is available at levels from advanced researchers and academics to undergraduates. For more information, contact Dr. Emily Schmitt Lavin (eschmitt@nova.edu).

**Upsilon Pi Epsilon**
Upsilon Pi Epsilon (UPE) has an express purpose to promote the computing and information disciplines and to encourage their contribution to the enhancement of knowledge. UPE was first organized at Texas A&M University, College Station, Texas, in 1967. The international organization now consists of chapters in various colleges and universities in North America and overseas. The mission of UPE is to recognize academic excellence at both the undergraduate and graduate levels in the Computing and Information Disciplines. UPE is a member of the Association of College Honor Societies (ACHS). UPE is the first and only, existing international honor society in the Computing and Information disciplines. UPE has received endorsements from the two largest computer organizations in the world, the Association for Computing Machinery (ACM) and the IEEE Computer Society (IEEE-CS). UPE is also a charter member of The International Federation of Engineering Education Societies (IFEES). For more information, contact the College of Computing and Engineering (cec.nova.edu).

Students may also join academic and pre-professional clubs and organizations. Members often gain insights to professional opportunities and requirements. For more information about university organizations, including fraternity and sorority organizations, social, athletic, and service clubs, go to sharkhub.nova.edu. For additional information on specific clubs and organizations, please contact your college or the Office of Campus Life and Student Engagement.

---

**Presidential Scholars Program**

The Presidential Scholars Program is NSU’s premier scholarship program. A limited number of incoming students are invited to interview for this program during Shark Preview Weekend, if they are determined to be eligible. Students selected for this program will have the opportunity to serve in leadership roles and as student ambassadors for the university, and will serve as student success mentors to other NSU students. In return for their participation, students are awarded an annual renewable scholarship.

---

**Razor’s Edge Scholars Programs**

Nova Southeastern University offers five premier Razor’s Edge Scholars programs—Global, Leadership, Research, Shark Talent, and Shark Teach. These four-year residential programs combine curricular and co-curricular experiences intended to capture the unique interests and talents of prospective and current students. Razor’s Edge students will also serve as student success mentors to other NSU students. In return for their participation, students are awarded an annual renewable scholarship. For more information about these programs, please visit nova.edu/razorsedge/.

---

**RAZOR’S EDGE GLOBAL SCHOLARS PROGRAM**

The Global Program provides learning experiences inside the classroom as well as outside the classroom through involvement in global leadership and engagement activities on campus and in their local and global communities. Students in this program must complete an academic minor that will be noted on their official NSU transcript. The requirements for the minor in “Global Engagement” are only available to students admitted to the Razor’s Edge Global Scholars Program offered by the Office of International Affairs. For program requirements, please see “Global Engagement Minor” section on page 124 of this catalog.

For additional information, please visit the program page at nova.edu/razorsedge/global/.
Razor’s Edge Leadership Scholars Program

The Leadership Program provides learning experience inside the classroom as well as outside the classroom through involvement and leadership initiatives throughout campus. Students in this program must complete an academic minor that will be noted on their official NSU transcript. The requirements for the minor in “Experiential Leadership” are only available for students admitted into the Razor’s Edge Leadership Scholars Program offered by the Office of Student Leadership and Civic Engagement. For program requirements, please see “Experiential Leadership Minor” section on page 123 of this catalog.

For additional information, please visit the program page at nova.edu/studentleadership/razorsedge/.

Razor’s Edge Research Scholars Program

The Research Program provides learning experiences inside the classroom as well as outside the classroom through involvement in firsthand research experiences, scientific inquiry, and problem-solving activities and initiatives. The Razor’s Edge Research Scholars will benefit from mentored research experiences with faculty researchers at NSU. Students in this program must complete an academic minor that will be noted on their official NSU transcript. The requirements for the minor in “Research Studies” are only available for students admitted into the Research Scholars Program offered by the Abraham S. Fischler College of Education and School of Criminal Justice in cooperation with the Division of Student Affairs. For program requirements, please see “Research Studies Minor” on page 125 of this catalog.

For additional information, please visit the program page at nova.edu/razorsedge/research/.

Razor’s Edge Shark Talent Scholars Program

The Razor’s Edge Shark Talent program is for students who wish to use their artistic gifts to help create a more vibrant campus life at NSU. This could mean performing with one of our music ensembles like Shark Gold, performing with a dance or theater troupe at a donor event, energizing the homecoming crowd as part of the NSU Drumline, or sharing student art at a gallery opening. The selection process is highly competitive and is based on audition or portfolio review, plus an interview. Students are required to major or minor in one area of the performing and visual arts. For program requirements, please see the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center.

For additional information, please visit the program page at nova.edu/razorsedge/sharktalent/.

Razor’s Edge Shark Teach Scholars Program

Students in the Razor’s Edge Shark Teach Scholars program are part of a four-year educational and leadership development program focused on utilizing what they learn in the classroom as future educators to aid in the continued transformation and vibrancy of the Nova Southeastern University community. As members of The Fischler Academy, Shark Teach Scholars serve as leaders and ambassadors for both the Razor’s Edge Programs as well as the Fischler Academy. Students in the program develop a sense of community and enthusiasm for academic excellence and bring others into the community around them. Selected scholarship recipients will have the opportunity to collaborate with their peers through the role of tutor, supplemental instruction (SI) leader, writing consultant, or first year seminar peer leader. Students will also serve as Academic Ambassadors, working together to engage the NSU community in various academic support initiatives and programming, designed to elevate academic success across campus.

For additional information, please visit the program page at nova.edu/razorsedge/sharkteach/.

The Fischler Academy

The Fischler Academy is a combined bachelor’s and master’s program for students interested in the field of education. Through a combination of innovative teaching strategies and early immersion experiences, students graduate with the knowledge and practical skills required to be successful educators in the 21st century. The Fischler Academy also offers students the opportunity to develop a global perspective through its “Fischler International” travel study experience. For additional information, please visit the program page at education.nova.edu/FischlerAcademy.
The Huizenga Business Innovation Academy

The Huizenga Business Innovation Academy is a combined bachelor’s and master’s program for first-time in college students interested in becoming entrepreneurs. Through a combination of hands-on experiences and a curriculum created by real world professionals, students will be on the fast track to starting their own business or becoming an entrepreneurial leader. Huizenga Business Innovation Academy students are required to take an Entrepreneurship minor and a Venture Creation minor, which includes a special summer immersion experience that requires students work in teams to develop, design, plan, and implement student-run on-campus businesses. The Venture Creation minor is only open to Huizenga Business Innovation Academy and students. NSU may provide to Student up to $20,000 in seed funding (Seed Funding) towards an approved business venture. Student will qualify for Seed Funding only after successfully completing all HBIA program requirements, including, without limitation, (a) graduating from the graduate portion of the program, (b) reviewing supplemental documentation regarding Seed Funding, and (c) completing the Seed Funding application and approval process, which includes, among other things, the preparation of a viable business plan that must be presented and defended during panel reviews with individuals selected by NSU to serve as panel members. In connection with the foregoing business plan, Student acknowledges and agrees that viability of such business plan shall be determined by NSU in its sole discretion.

For additional information, please visit the program page at business.nova.edu/innovation/.

**REQUIRED DOCUMENTATION**

The Office of Undergraduate Admissions reviews applications and makes a determination of admittance or non-admittance. Factors affecting the committee’s decision include high school grade point average (GPA), optional Scholastic Aptitude Test (SAT) or American College Test (ACT) scores, previous college performance, recommendations, interviews, student essays, and any other matters deemed relevant by the committee. Applicants must provide official high school and college transcripts from all previous schools attended, whether or not credit was granted. Applicants completing their senior year of high school, and in some cases transfer applicants, may also self-report SAT/ACT scores on their application for admission. The high school transcript may be omitted for students who have at least 24 transferable credits from a regionally accredited institution. Applicants who attended foreign institutions must have coursework from the foreign institutions evaluated for U.S. institutional equivalence. For more information, see “International Students Admissions” section on page 49 of this catalog.

For information on additional documentation required for admittance into specific majors or programs, students should review the following individual program requirements.

**Freshman Applicants**

In addition to the documents described under the “Required Documentation” section above:

By the final day of the drop and add period noted on the academic calendar for the student’s first semester at Nova Southeastern University: 1.) Freshman applicants must submit all final, official transcripts reflecting proof of graduation and completed academic coursework prior to enrollment with final grades earned (e.g., current high-school transcript or GED equivalent). 2.) Freshman applicants who opted to submit self-reported test scores for admission must also submit official SAT or ACT scores directly from the testing agency.

A freshman is a student who has no prior postsecondary experience attending any institution (including academic or occupational programs). In addition, students enrolled in the fall term immediately following high school graduation, who attended college for the first time in the prior summer term, and/or students who entered with advanced standing (college credits earned before graduation from high school), are considered freshmen.

**Transfer Applicants**

Transfer applicants with at least 24 transferable credits must submit official, final college transcripts from all previous schools attended, whether or not credit was awarded, reflecting final grades earned. If, at the time of application, students have any courses in progress at another institution, a final, official transcript must be submitted. **Transfer applicants** with less than 24 transferable credits must submit official, final college transcripts from all previous schools attended, whether or not credit was awarded, reflecting final grades earned, in addition to submitting all final, official high school transcripts reflecting academic coursework, and may opt to submit official SAT or ACT scores.

Transfer applicants, on receiving notification of acceptance, should promptly inform the Office of Undergraduate Admissions by submitting a $200 enrollment deposit to be credited toward tuition.

All final, official documents must be submitted by the final day of the drop and add period noted on the academic calendar for the student’s first semester at Nova Southeastern University.

**Bachelor of Science in Respiratory Therapy First Professional and Post-Professional Programs**

In addition to the documents described under the “Required Documentation” section, students applying for entry to the Bachelor of Science in Respiratory Therapy—First Professional Program must submit evidence of the following:

- Completion of 40 credit hours of pre-requisite courses, with a minimum grade of C, from a regionally accredited college of university.
- Minimum cumulative GPA of 2.5 on a 4.0 scale from all undergraduate work.
- Minimum cumulative Science GPA of 2.5.
- Application and a non-refundable application fee
- The Bachelor of Science in Respiratory Therapy First Professional requires a personal interview. All interview expenses are the responsibility of the applicant
- Under special circumstances, a student may be granted an exception to attempt up to six credit hours of prerequisite credits (excludes sciences) while enrolled in the BSRT program; such circumstances will be decided on a case-by-case basis and must be approved by the Department Chair

For prerequisite information and admissions requirements, please visit healthsciences.nova.edu/rrt.

Bachelor of Science in Respiratory Therapy Post-Professional

Students applying for the Post-Professional (online) must submit evidence of the following:

- NBRC Registration as a Registered Respiratory Therapist. (A block grant of 45 credits will be applied toward the B.S.R.T. upon proof of RRT and Licensure where applicable, and successful completion of all B.S.R.T. course work).
- A license to practice respiratory therapy, where applicable.
- Application and non-refundable application fee.
- Official transcripts from each university/college attended.
- Completion of the following prerequisite general education coursework, with a minimum grade of C. All general education coursework will be evaluated for equivalency. Students must have at a minimum 2 Written Communication above 1500 level (6 credits), 2 Math above 1040 level (6 Credits)—one of which must be college algebra, 2 Social and Behavioral Sciences (6 Credits), 2 Humanities (6 credits), and 2 Natural and Physical Sciences (6 credits) to enter the B.S.R.T. Post-Professional program.
- Students may be concurrently enrolled while completing any additional general education requirements. Credits can be transferred in prior to completion of the program. The degree will not be granted until all general education requirements are met. For prerequisite information and admissions requirements, please visit healthsciences.nova.edu/rrt.

Bachelor of Science—Cardiovascular Sonography

The B.S.—Cardiovascular Sonography program uses a holistic approach to applicant evaluation, and will admit individuals with diverse education, work, and life experiences who have demonstrated capacity to pursue the course of study in cardiovascular sonography. Areas of consideration include application content, academic record, prior scientific, health care, or elder care work or volunteer experience in a health care facility, letters of evaluation, and personal motivation. The Bachelor of Science—Cardiovascular Sonography requires a personal interview. Distance technology such as Skype or Zoom may be used for out-of-state applicants. All interview expenses are the responsibility of the applicant.

In addition to the documents described in this “Required Documents” section, students applying for entry to the B.S. Cardiovascular Sonography program must submit evidence of the following:

- A minimum of 30 semester credits—6 credits in Physical/Human/Biological Science (consisting of 6 credits in General Anatomy & Physiology I and II including OR 3 required credits in General Anatomy and Physiology I, and 3 credits in Physics), 6 credits of Social and Behavioral Sciences, 6 credits of Humanities, 6 credits of English Composition, and 6 credits of College Math above 1040 level—from a regionally accredited college or university with a minimum cumulative GPA of 2.6 on a 4.0 grading scale. Only courses with a minimum GPA of 2.0 on a 4.0 grading may be considered for possible transfer of credit.
- General education courses cannot be survey courses
- Highly recommended courses:
  - Anatomy and Physiology II or III (with or without lab)
  - Basic Medical Terminology
- With case-by-case basis approval, up to 9-credit hours of a combination of English, Arts and Humanities, Social and Behavioral Sciences, and one Mathematics course may be completed as co-requisites during the program.
- Two letters of evaluation from individuals other than relatives such as academic advisors, professors, or clinical or nonclinical supervisors, or community associates.
- A complete resume or CV.
For prerequisite information and admissions requirements, please visit: B.S.—Cardiovascular Sonography at https://healthsciences.nova.edu/healthsciences/cardiovascular/.

**Bachelor of Science—Medical Sonography**

The B.S.—Medical Sonography program will admit individuals with diverse education, work, and life experiences who have demonstrated capacity to pursue the course of study in medical sonography. Areas of consideration include application content, academic record, prior scientific, health care, or elder care work or volunteer experience in a health care facility, letters of evaluation, and personal motivation. The Bachelor of Science—Medical Sonography requires a personal interview. All interview expenses are the responsibility of the applicant.

In addition to the documents described in this “Required Documents” section, students applying for entry to the B.S. Medical Sonography program must submit evidence of the following:

- A minimum of 30 semester credits—6 credits in Physical/Human/Biological Science (including 3 required credits in General Anatomy and Physiology I, and 3 credits in Physics), 6 credits of Social and Behavioral Sciences, 6 credits of Humanities, 6 credits of English Composition, and 6 credits of College Math above 1040 level—from a regionally accredited college or university with a minimum cumulative GPA of 2.75 on a 4.0 grading scale. Only courses with a minimum GPA of 2.0 on a 4.0 grading may be considered for possible transfer of credit.
- General education courses cannot be survey courses
- Highly recommended courses Anatomy and Physiology II (with or without lab) and Basic Medical Terminology
- With case-by-case basis approval, up to 9-credit hours of a combination of English, Arts and Humanities, Social and Behavioral Sciences, and one Mathematics course may be completed as co-requisites during the program.
- Two letters of evaluation from individuals other than relatives such as academic advisors, professors, or clinical or nonclinical supervisors, or community associates.
- A complete resume or CV.

For prerequisite information and admissions requirements, please visit healthsciences.nova.edu/healthsciences/sonography/.

**Bachelor of Health Science Completion Program (online)**

The B.H.Sc program will admit entry-level, mid-level clinicians, allied health professionals, health care administrators and applicants with diverse education, work, and life experiences who demonstrate the desire and capacity to pursue the course of study in health and increasingly responsible positions in health care. Areas of consideration include application content, academic record, prior health care experience, health care related volunteerism, letters of evaluation and personal motivation. In special circumstances, a personal interview with members of the committee may be required (phone interview may be substituted). All interview expenses are the responsibility of the applicant.

- Prior to matriculation, all applicants must have completed 3 semester hours (or the equivalent) of college level written composition course from a regionally accredited college or university with a minimum grade of a C (GPA of 2.0 on a four-point grading scale).
- A minimum of 30 credits at the college or equivalent level from a regionally accredited college or university with a minimum cumulative GPA of 2.6 on a 4.0 grading scale,
  OR
- a post-high school level diploma or certificate of completion in a field of health care with a minimum cumulative GPA of 2.6 on a 4.0 grading scale and the equivalent of 30 regionally accredited credits, including 3 semester hours of college level written composition. An applicant may be required to submit a student-prepared learning portfolio requesting assessment of prior experiences for academic credit.
- Documented evidence demonstrating dedication to health care within the past five years. This evidence can be presented through, but not limited to, education, experience, volunteerism, certification, or licensure.

The 30-credit minimum may be achieved through traditional undergraduate education credits or credits awarded for professional certification or a combination thereof.

All applicants must show evidence of computer skills through course work or self-study prior to the end of the first term. Students may obtain instruction through the NSU Student Microcomputer Laboratory or other training facilities.
It should be noted that many criteria, in addition to academic credentials, play a role in the admission process for the B.H.Sc. program. While the program allows the student to demonstrate academic capability, it does not assure admission to any professional school. Admission to the B.H.Sc. will not guarantee admission to any other program of Nova Southeastern University.

Upon receipt of the completed application, fees, credentials and transcripts, the Admissions Officers and the Dr. Pallavi Patel College of Health Care Sciences will review all material for evidence of the proper education, training and background to enter the B.H.Sc.

The university reserves the right to modify any requirements on an individual basis as deemed necessary by the dean of the College of Health Care Sciences.

Assessment of Prior Experiences for Academic Credit

NSU has established different mechanism for students to convert their prior learning experiences into academic credit. For further information, visit the Office of Transfer Evaluation Services Web site.

B.H.Sc. Pre-MOT Track Admissions Requirements

- Prior to matriculation, all applicants must have 3 credits (or the equivalent) of college-level written composition from a regionally accredited college or university with a minimum grade of C (GPA of 2.0 on a 4.0 grading scale).
- An associate’s degree in occupational therapy from an Accreditation Council for Occupational Therapy Education (ACOTE®) accredited program at a regionally accredited college or university with a minimum cumulative GPA of 2.6 on a 4.0 grading scale and initial certification by the National Board for Certification in Occupational Therapy, Inc. (NBCOT®) as a Certified OT Assistant (COTA).
- Documented evidence demonstrating education or experience in the health care field within the past five years.

B.H.Sc. Pre-O.T.D. Track Admissions Requirements

- Prior to matriculation, all applicants must have 3 credits (or the equivalent) of college-level written composition from a regionally accredited college or university with a minimum grade of C (GPA of 2.0 on a 4.0 grading scale).
- An associate’s degree in occupational therapy from an Accreditation Council for Occupational Therapy Education (ACOTE®) accredited program at a regionally accredited college or university with a minimum cumulative GPA of 2.6 on a 4.0 grading scale and initial certification by the National Board for Certification in Occupational Therapy, Inc. (NBCOT®) as a certified OT Assistant (O.T.A.).
- Documented evidence demonstrating education or experience in the health care field within the past five years.

B.H.Sc. O.T.D. Admissions Requirements—Occupational Therapy Assistants Applicants

The entry-level Doctor of Occupational Therapy (O.T.D.) Program selects students based on grade point average (GPA), Graduate Record Examination (GRE) scores, a written essay, letters of recommendation, and an interview. These scores will be factored into the rubric that the department uses in evaluating applicant qualifications. Strong candidates will also demonstrate concern for people of diverse backgrounds, as well as the ability to use judgment, insight, and reasoning. Prior to matriculation, applicants must:

- Earn a cumulative average of 3.0 or better on a 4.0 scale in B.H.Sc. courses
- Earn a grade of 2.0 or better in all prerequisite courses
- Submit minimum GRE scores that are less than five years old for all three areas of the general test (verbal, quantitative, and analytical writing)
- Submit a written essay
- Submit three letters of recommendation
- Demonstrate computer and word processing competency to include, but not limited to, World Wide Web navigation, software and learning management system (e.g., Canvas) utilization, e-correspondence, database explorations, etc.
- If applicable, have a Test of English as a Foreign Language (TOEFL) score of 550 or higher for the written test or 213 or higher for the computer-based test OR have a Pearson Test of English-Academic (PTE-Academic) score of 54 or higher

Upon successful completion of the B.H.Sc. degree, the above requirements, and an interview with the admissions team of the NSU Occupational Therapy Program, students will be offered a seat in the NSU Doctor of Occupational Therapy Hybrid Program at NSU’s regional campus in Tampa, FL (O.T.D.). This interview will be scheduled after the completed application has been submitted. For more information about admissions requirements for the entry-level Doctor of Occupational Therapy program, visit https://healthsciences.nova.edu/ot/ or email hpdinfo@nova.edu, or call 800-356-0026, ext. 21101 or (813) 574-5278.
Bachelor of Science in Nursing

In addition to the documents described in this “Required Documentation” section, students applying for entry to the Bachelor of Science in Nursing—Entry Track must submit evidence of the following:

- Applicants must have completed a minimum of 39-41 semester hours (or equivalent quarter hours) of specific undergraduate coursework from a regionally accredited college or university prior to matriculation into the nursing program with a minimum cumulative GPA of 3.0 or higher on a 4.0 scale with the exception of the ABSN students who will be expected to have a higher GPA.
- Official transcripts indicating completion of each prerequisite course with a grade of C or higher. (Applicants may submit transcripts if enrolled in a final semester of courses in progress.)
- Applicants with a grade of a C- or below in the required natural/physical science course will not be considered for admission. Applicants who have a pattern of W on their transcripts will not be considered for admission. Students with extenuating circumstances will be evaluated by administrative faculty.
- Eligible students are required to successfully complete an interview prior to final acceptance into Ron and Kathy Assaf College of Nursing programs.

Accelerated Bachelors Science Nursing (ABSN)

- Students who wish to become licensed registered nurses and already have a bachelor’s degree in another field may apply to the accelerated B.S.N. program. Student selection will be impacted by rigorous eligibility standards, especially science GPA. NSU will accept 60 credits from the student’s bachelor’s degree. Completion of the BSN program pre-requisite courses with a grade of C or higher. No failures in science courses.
- Students complete the A.B.S.N. degree program in four semesters after completing 64 credits of didactic course work and clinical hours at NSU. Working during the program is strongly discouraged due to course load and completion of clinical hours.
- This program is offered on the Fort Myers campus.

The entry B.S. in Nursing program participates in Nursing’s Centralized Application Service (NursingCAS). The NursingCAS application must be received no later than August 1 to be considered for the fall class and December 1 to be considered for the winter class.

Premier Program Applications

DUAL ADMISSION PROGRAM

NSU offers dual admission to a select number of highly motivated, academically talented students interested in pursuing both an undergraduate degree and future graduate studies. For information and a list of dual admission programs, see “Dual Admission Programs” section on page 34 of this catalog or go to nova.edu/undergraduate/academics/dual-admission/. Students interested in applying for dual admission programs should speak with an undergraduate admissions counselor to determine eligibility.

FARQUHAR HONORS COLLEGE

The Farquhar Honors College fosters intellectual community both within and across academic disciplines by offering distinctive coursework, reading groups, and workshops to help students prepare for graduate school, advanced research, study abroad, and post-baccalaureate fellowships. Students must complete a separate application for the Farquhar Honors College, available at https://honors.nova.edu/honors/apply.html. Academically motivated students are encouraged to apply.

The Honors College application includes two essay questions that are reviewed by a faculty committee. Applications are accepted on a continuous basis year-round, and interested students are encouraged to apply as early as possible. Applications for new students are reviewed for fall semester admission and must be submitted by May 31. Applications for current NSU students must be submitted by March 1. Prospective students may apply for the Honors College prior to being admitted to NSU and are also eligible to apply for other special programs.

For more information, see the “Farquhar Honors College” section on page 196 of this catalog.
RAZOR’S EDGE SCHOLARS

Nova Southeastern University offers five premier scholars programs—Global, Leadership, Research, Shark Talent, and Shark Teach. These four-year residential programs combine curricular and co-curricular experiences intended to capture the unique interests and talents of prospective and current students. Students who complete one of these five specific programs will earn an academic minor and/or will participate in one of the premier program academics, depending on the Razor’s Edge Scholars program. In return for their participation, students are awarded an annual renewable scholarship.

For more information about these programs, please visit nova.edu/razorsedge/. Students interested in applying for Razor’s Edge Scholars should speak with an undergraduate admissions counselor to determine eligibility.

THE FISCHLER ACADEMY

The Fischler Academy is a combined bachelor’s and master’s program for students interested in the field of education. Through a combination of innovative teaching strategies and early immersion experiences, students graduate with the knowledge and practical skills required to be successful educators in the 21st century. The Fischler Academy also offers students the opportunity to develop a global perspective through its “Fischler International” travel study experience.

For additional information, please visit the program page at education.nova.edu/FischlerAcademy.

THE HUIZENGA BUSINESS INNOVATION ACADEMY

The Huizenga Business Innovation Academy is a combined bachelor’s and master’s program for first-time in college students interested in becoming entrepreneurs. NSU may provide to Student up to $20,000 in seed funding (Seed Funding) towards an approved business venture. Student will qualify for Seed Funding only after successfully completing all HBIA program requirements, including, without limitation, (a) graduating from the graduate portion of the program, (b) reviewing supplemental documentation regarding Seed Funding, and (c) completing the Seed Funding application and approval process, which includes, among other things, the preparation of a viable business plan that must be presented and defended during panel reviews with individuals selected by NSU to serve as panel members. In connection with the foregoing business plan, Student acknowledges and agrees that viability of such business plan shall be determined by NSU in its sole discretion. Students interested in applying for the Huizenga Business Innovation Academy program should speak with an undergraduate admissions counselor to determine eligibility.

For additional information, please visit the program page at business.nova.edu/innovation/.

Pre-Degree Granting Programs

Nova Southeastern University offers three undergraduate pre-degree granting programs. The deciding pre-degree program is for students who have not yet chosen a major at NSU. The pre-nursing program is for students who do not meet the admission requirements of the Bachelors of Nursing majors at NSU, and are committed to successfully completing those prerequisite courses at the university. The pre-respiratory therapy program is for students who do not meet the admissions requirements of the Bachelor of Science in Respiratory Therapy at NSU and who need to complete the pre requisites courses for entry into that major. These pre-degree programs do not guarantee admission into their respective bachelor’s degree-granting programs at NSU.

Students enrolled in these programs, intending to pursue a bachelor’s degree, may be eligible for financial aid and institutional scholarships.

Deciding Program

Many students have not decided which program of study or career path to follow when they enter college. Many change their minds more than once during their college education. Through the Deciding Program, NSU faculty and staff help students choose a career path and select a major. Students have the opportunity to explore a variety of interests before declaring a major field of study.

Students who do not select a major program during the admissions process are considered “deciding.” All students, including transfer...
students, must declare a major by the completion of 60 cumulative credits (including non-NSU credits). Deciding students and students who wish to change their originally declared major should contact their academic advisor.

The Deciding Program is housed in the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center.

---

**Pre-Nursing Program**

Students interested in the bachelors in nursing program can take General education courses and pre-requisite courses at NSU. The undergraduate Pre-Nursing Program at the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center is designed for students who wish to apply to NSU’s Entry Bachelor of Science in Nursing program, and complete the program’s admission prerequisite courses at the university. These prerequisite courses are listed under Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center’s Department of Biological Sciences. Successful completion of these prerequisite courses does not guarantee admission to the B.S.N. program. Additional requirements, beyond course prerequisites, are needed for B.S.N. applicants to be eligible for admission. Students must contact NSU’s Ron and Kathy Assaf College of Nursing for the applicable B.S.N. program admission requirements and interview preparation interview process.

For more information on B.S.N. admission requirements and prerequisites, refer to the “Admission Procedures and Requirements” on page 42 and the Bachelor of Science in Nursing portion of the “General Education Program” section on page 98 of this catalog.

---

**Pre-Respiratory Therapy Program**

The undergraduate Pre-Respiratory Therapy program at the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center is designed for students who wish to apply to NSU’s Bachelor of Science in Respiratory Therapy First-Professional program, and complete the program’s admission prerequisite courses at the university. These prerequisite courses are offered by NSU’s Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center through the Pre-Respiratory Therapy Concentration in the General Studies major and are held on NSU’s Fort Lauderdale campus. Successful completion of these prerequisite courses does not guarantee admission to the B.S.R.T program. Additional requirements, beyond course prerequisites, are needed for B.S.R.T. applicants to be eligible for admission. Admission prerequisites are subject to change at any time. Students must contact the Department of Cardiopulmonary Sciences for the applicable B.S.R.T. program admission requirements. Pre-Respiratory Therapy students must abide by the policies of the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center. For more information on B.S.R.T admission requirements and prerequisites, refer to the “Department of Cardiopulmonary Sciences” on page 174 and the “General Education Program” section on page 98 of this catalog.

---

**Special Circumstances**

---

**Home-Schooling**

Nova Southeastern University welcomes undergraduate applicants who have been home-schooled for their secondary school education. Home-schooled applicants should provide a notarized transcript and official SAT or ACT scores to demonstrate high-school equivalence. As with all candidates for admission, each applicant is considered on his or her individual merits and potential for academic success at NSU. Acceptance is not based on any one criterion, and in appropriate cases, requirements for documentation may vary or be modified.

---

**International Students Admissions**

International students applying to NSU’s Fort Lauderdale/Davie campus, or to any of the university’s Florida NSU regional campuses, are required to obtain a student (F-1) visa or an exchange visitor (J-1) visa. Students are not permitted to study in the United States on a visitor (B-2) visa. To apply, international students should submit an online application form and a $50 nonrefundable application fee, following the program’s application instructions.

**First-Time-in-College International Applicants**

First-Time-In College applicants must complete and submit an application using either the Common Application or the NSU Shark Select Application.
With the Common Application, applicants can submit an essay and will choose one of the five prompts provided. With the NSU Shark Select Application, applicants can submit an original writing sample of their choice.

Submit Secondary School/Post-Secondary Credentials:
Applicants will need to send an original or certified copy of their home country’s credentials as part of their application. Applicants must also submit a copy of any terminating or qualifying examination results or certificates, if applicable.

Students who have earned CXC or O-level certificates, HSC, BGCSE, and CAPE must provide five passing scores in academic subjects and proof of secondary school completion.

Applicants must submit two documents, one in the original language and one translated to English. Both documents must be notarized/certified.

- Submit Proof of English Language Proficiency
- Submit one Letter of Recommendation

Transcript Evaluation for International Transfer Applicants

Applicants with foreign university level credentials must provide admissions with a credential evaluation. Credits earned at non-U.S. institutions must be evaluated for equivalence by an outside agency approved by the National Association of Credential Evaluation Services (NACES). Applicants are responsible for all evaluation fees. Foreign coursework must be evaluated with a course-by-course evaluation by an NACES-approved evaluation company, such as:

- World Education Services
  Attention: Documentation Center
  P.O. Box 5087
  Bowling Green Station
  New York, New York 10274-5087
  Phone: (212) 966-6311
  Website: wes.org

- SpanTran
  2655 Le Jeune Rd., Suite 602
  Coral Gables, Florida 33134
  Phone: (305) 749-0333
  Website: spantran.com

- Educational Credential Evaluators
  P.O. Box 514070
  Milwaukee, Wisconsin 53203-3470
  Phone: (414) 289-3400
  Website: ece.org

- Josef Silny and Associates
  7101 SW 102 Avenue
  Miami, Florida 33173
  Phone: (305) 273-1616
  Website: jsilny.org

A complete list of NACES-approved evaluation companies can be found at naces.org/members.

English Proficiency Requirements

Official test scores results should be sent directly to Nova Southeastern University from the testing agency. Students who are accepted for an interview with the Ron and Kathy Assaf College of Nursing must demonstrate the ability to speak and write English to be accepted into the program.

Proof of English proficiency is required from all students unless they are from the following countries – Commonwealth Caribbean, Bermuda, Canada, United Kingdom, Republic of Ireland, South Africa, Australia, or New Zealand.
Students who did not graduate from an English-Speaking high school and/or English is not their native language must be able to demonstrate adequate English skills by submitting one of the following:

- Proof of graduation from a U.S. regionally accredited high school.
- College transcript with one “English Composition One” course at a U.S. regionally accredited college with a grade of C or better.
- Proof of English language proficiency with the following scores:
  - Test of English as a Foreign Language (TOEFL): 213 on the computer-based test; 550 on the paper-based test; or 79 on the Internet-based test
  - International English Language Testing System (IELTS*): 6.0 on the test module
  - Dualingo Test of English: 105 or higher
  - Pearson Test of English-Academic (PTE Academic): Overall score of 54 or higher
  - Passing Level 9 from TALK International
  - SAT verbal score of 480, Re-designed SAT verbal scores of 520 or above, or ACT English score of 20
  - ITEP Academic (International Test of English Proficiency): Overall score of 3.9 or higher

Financial Documents

International applicants requiring an F-1 or J-1 visa must submit an original bank statement or original letter from a financial institution indicating ability to meet all costs of education, less any financial aid they have received from NSU. The minimum amount is determined by a budget prepared by the NSU Office of Student Financial Assistance. A notarized letter from a sponsor is required if a public or private organization or an individual sponsors the student. The financial guarantee must include provisions for any dependents who will be residing with the student in the United States. Students should check with the Office of International Affairs at nova.edu/internationalstudents/current/payments.html.

Medical Insurance

International students are subject to the university’s Student Health Insurance requirement. For additional details, please see the full policy on page 76 of this catalog. Students who physically reside in a country other than the United States and who will remain there while enrolled are exempt from the university’s requirement. However, the online waiver application must be completed before the program’s deadline. If the online waiver application is not completed before the program’s deadline, the insurance fee will remain on the account.

Acceptance Letters and Deposits

After NSU has received all of the above information and has granted admission, an acceptance letter will be sent. The process of issuing the I-20 will begin only after all final, official documents have been received.

**NON-DEGREE-SEEKING STUDENTS**

NSU provides opportunities for individuals who wish to continue their education without seeking a degree from the university. A non-degree-seeking student is one who takes courses without pursuing a degree. If a non-degree-seeking student decides to pursue a degree at NSU, the student must submit a new admission application and meet all the admission requirements to be considered for admission to his or her degree program of choice. Such a student may request the application of credits taken as a non-degree-seeking student in accordance with the transfer policy of the program to which the student is applying. Enrollment in courses as a non-degree-seeking student does not guarantee acceptance into a Nova Southeastern University degree program.

Non-degree-seeking students are not eligible for financial aid, unless they are enrolled in financial aid eligible preparatory coursework or are pursuing a financial aid-eligible certificate program. Contact an admissions or financial aid counselor for details. Students must submit a transcript indicating completion of high school or GED equivalent, or a transcript from the last college attended.

Non-degree-seeking students may take up to 24 credit hours or enroll in a specialty program without being admitted to a degree program. The 24-credit limit does not apply to students who have already earned a baccalaureate degree. Students seeking a paralegal certificate must hold a baccalaureate degree.
Dr. Pallavi Patel College of Health Care Sciences

Students may not take courses in the cardiovascular sonography program, medical sonography program, or respiratory therapy program on a non-degree seeking basis.

Non-degree-seeking students seeking to take courses in the Bachelor of Health Science—Online Program must complete the following admission requirements:

- prior to matriculation, three semester hours (or equivalent) of college-level written composition from a regionally accredited college or university with a minimum grade of C (GPA of 2.0 on a 4.0 scale);
- associate’s degree in a field of health from a regionally accredited college or university with a minimum cumulative GPA of 2.6 on a 4.0 grading scale
  OR
- a diploma or certificate of completion in a field of health care with a minimum cumulative GPA of 2.6 on a 4.0 grading scale.
- Due to the limited number of seats available in the program, preference for admission and registration will be given to degree-seeking students. Students are limited to a maximum of 9 credit hours of B.H.Sc. coursework. All applicants must show evidence of computer skills through coursework or self-study prior to the end of the first semester.

Ron and Kathy Assaf College of Nursing

Non-degree-seeking students are not eligible to take courses in the Ron and Kathy Assaf College of Nursing.

SECOND BACHELOR’S DEGREE

Individuals who already hold a bachelor’s degree from an accredited institution, including NSU, may earn a second bachelor’s degree from NSU by completing a minimum of 30 additional credits toward the second degree. At least 50 percent of the major must be taken at NSU. For more detailed information or inquiry, please consult your academic advisor.

Delayed Enrollment and Reapplication for Admission

Students who apply for admission but do not complete the admissions process, or are admitted but never attended NSU, may reactivate their applications within a period of 12 months after the intended semester of enrollment. For example, a student admitted for the fall semester must enroll no later than the following fall semester. After the 12 month deadline, students must reapply for admission and a new application fee will be assessed. Students who wish to apply for readmission must clear all financial and academic holds from their record before a readmission application is processed.

Transfer Credits

NSU welcomes undergraduate students who have studied and earned college credits at other regionally accredited institutions. Students may access the online interactive NSU Transfer Credit System at nova.edu/tes to view and create an unofficial equivalency review of credits earned and their respective NSU equivalencies. For an official review, transcripts from all previously attended institutions should be submitted to:

Nova Southeastern University
Enrollment Processing Services
3301 College Avenue
P.O. Box 29900
Fort Lauderdale, Florida 33329-9905

Electronic transcripts can be sent to electronictranscripts@nova.edu.

When at least one transcript from each previously attended institution has been received, and the student has been admitted to the university, the Office of Transfer Evaluation Services (TES) will evaluate the student’s transcripts. Please note that students will not be fully admitted to the university until all final official transcripts have been received.
Transfer credit notices are sent via email and include instructions on how to run an online degree audit.

Transfer students shall be governed by the graduation requirements (see page 64) published in the NSU Catalog at the point of matriculation.

Transfer students may be required to complete additional courses at NSU prior to the awarding of the baccalaureate degree. The additional courses may include general education requirements and may result in students graduating with more than 120 credits. Should the maximum timeframe for Satisfactory Academic Progress (SAP) be exceeded, their financial aid may be impacted.

For more information on transferring credit, students should visit TES online at nova.edu/tes/ or speak with a transfer evaluation services advisor by calling (954) 262-8117 or 800-806-3680, ext. 28117.

**Admissions and Transfer Policy for Students Transferring from Institutions Accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)**

Transfer credit will be accepted at NSU for students who have earned an Associate in Arts degree or 60 credits from a SACSCOC-accredited institution. Transfer students who have earned an Associate in Arts degree or 60 credits from a SACSCOC-accredited institution from 1992 to the present and are in good academic standing as defined by the transfer institution shall be admitted to NSU with junior standing.

**Admissions and Transfer Policy for Students Transferring from Other Regionally Accredited Colleges and Universities**

NSU will transfer a maximum of 90 degree-applicable credits toward a degree, including credit for the College-Level Examination Program (CLEP), proficiency exams, and prior experiential learning. NSU will transfer courses from previous institutions for which a student has earned a grade of C or higher. Remaining credits and at least 50 percent of credits in the student’s major must be earned at NSU in regular academic offerings.

Applicable credits will be transferred based upon received transcripts. The evaluation of transfer credit will be performed on both unofficial and official transcripts. However, a student will not receive full acceptance to the university until all final official transcripts have been received. Students will be advised to take courses at NSU based upon the completed transfer evaluation.

**Individual Credit Award Adjustment**

Depending on a student’s personal and academic plans, a new student may choose to identify credits that he or she does not wish to apply toward his/her degree. Students will be allowed to adjust incoming transfer credit with assistance and guidance from an academic advisor. The student in consultation with the academic advisor must complete the Credit Award Adjustment Form when requesting the adjustment. Upon submission to the Transfer Evaluation Services (TES) department at esstes@nova.edu, the request for the course adjustment will be reviewed for approval.

The deadline for submission of the Transfer Credit Adjustment Form is by the end of the drop/add period of the first enrolled semester to request that incoming credits are “unchecked” and not applied toward a student’s degree. For the 2020/2021 academic calendar, the drop/add dates are as follows:

- **Fall 2021**: August 29, 2021
- **Winter 2022**: January 9, 2022
- **Summer 2022**: May 15, 2022

In cases where students submitted the request prior to the deadline but credits in question have not yet been evaluated due to final official transcripts not reflecting a course grade, TES will flag these immediately after the drop/add period, review the progression of the request, and provide a final deadline to the student, if appropriate. Students are expected to review their Degree Works report to verify the number of applicable credits for degree completion.

**Assessment of Prior Experiences for Academic Credit**

NSU undergraduate students may convert prior professional and other life experiences into academic credit. All requests for prior
learning credit must be initiated before a student completes 24 credits at NSU.

**Advanced International Certificate in Education, Advanced Placement, and International Baccalaureate Credit**

Students who have completed Advanced International Certificate in Education (AICE), Advanced Placement (AP), or International Baccalaureate (IB) examinations may receive college credit toward a bachelor’s degree at NSU. Please visit the Office of Transfer Evaluation online at nova.edu/tes/ for an examination listing.

Official test scores should be sent directly from the appropriate agency to:

Nova Southeastern University  
Enrollment Processing Services  
3301 College Avenue  
P.O. Box 299000  
Fort Lauderdale, Florida 33329-9905

1. **Full Portfolio**

Students who intend to challenge a specific college-level course must submit a full portfolio that presents their knowledge of the course topic. Full portfolios are evaluated by an appropriate faculty member. Students may earn a maximum of 25 percent of their credits through the full portfolio process. Full portfolios include course syllabus or course description, resume, autobiography, written skills inventory that compares learning experiences with equivalent course subject matter, and other relevant documents, including certificates, training documents, and verification of employment. Students interested in submitting a full portfolio for academic credit should work directly with the Office of Transfer Evaluation Services.

2. **General and Subject Testing**

Students may meet certain general education, major, and elective requirements in a variety of areas through objective tests in which they demonstrate specific subject knowledge. These tests include the College Board’s College-Level Examination Program (CLEP), DANTES Subject Standardized Test (DSST), and New York University proficiency exams. Students who plan to take these exams as prerequisites for other courses must successfully complete the exams before registering for more advanced coursework. Students must contact their academic advisor before taking any exams.

3. **Standard Grants**

NSU has established a series of standard college credit grants for common, documented learning experiences. These experiences include certain training courses, certificates, and licenses.

For more information on assessment of prior experiences, students should visit TES online at nova.edu/tes/ or speak with a transfer evaluation services counselor by calling (954) 262-8117 or 800-806-3680, ext. 28117.

4. **Military Service Credit**

If you are an active-duty service member or a veteran of the United States Armed Forces, you can receive college credit for your military service. All active, retired, and veteran service members from all Army components, Coast Guard, Marine Corps, and the Navy, can obtain their Joint Services Transcript online and have it directly sent to NSU. Air Force personnel may order a transcript at the Community College of the Air Force.

Transcripts may be mailed to the address below. The quickest and most secure way to have your transcripts sent is electronically to electronictranscript@nova.edu.

Mail to:

Nova Southeastern University  
Enrollment Processing Services  
3301 College Avenue  
P.O. Box Office 299000  
Fort Lauderdale, Florida 33329-9905

Transfer credit for physical education and marksmanship is not accepted.

For more information on assessment of prior experiences, students should visit TES online at nova.edu/tes/ or speak with a transfer evaluation services advisor by calling (954) 262-8117 or 800-806-3680, ext. 28117.
Transferring NSU Credits to Other Institutions

Credits earned at NSU are eligible for transfer to programs at other institutions. Students should contact the institution of intended transfer for their policies related to accepting transfer credit.
Policies and Procedures

Attendance/Absence Policy

The educational process at NSU depends on a close working relationship between students and faculty members. Students are expected to attend class regularly, from beginning to end. Students who miss a class must inform the instructor before the class meeting. University policy requires each faculty member to confirm his or her class roster during the second week of each semester. Any student deemed as a non-attendee will be dropped from the class by the Office of the University Registrar. Students who believe they were reported in error as non-attendees must communicate with the instructor who is the only one to determine whether the student may remain in the class. Faculty members must email rostrec@nova.edu to request a student remain in the class.

Students are responsible for the academic consequences resulting from class absences. Students who miss class because of an illness or other emergency should contact the instructor as soon as possible to arrange for make-up work. Missed assignments/tests can be made up solely at the discretion of the course faculty. The Office of Student Disability Services can review documentation to verify absences due to temporary injuries or family emergencies. Pregnant students are encouraged to contact the Title IX Coordinator to learn about the procedures for receiving excused absences or other accommodations related to pregnancy.

This policy applies to all undergraduate programs; however, details can vary for students in the Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing. Please refer to your respective college’s student handbook for more specifics on the Attendance Policy.

- Dr. Pallavi Patel College of Health Care Sciences Student Handbook: https://nova.edu/publications/chcs/chcs_student_handbook/

Course Credits—Application Toward Multiple Requirements

Courses taken to fulfill major, minor, certificate, general education, and other program requirements may generally be applied to other program requirements. For example, courses used to satisfy major requirements may also be used to satisfy general education requirements. However, some programs have specific exceptions to this general policy. Students should consult their academic advisor or college to determine specific policies about application of course credit.

Course Delivery

Students should review the following course delivery options with their academic advisors, based on courses required in their majors and their registration choices.

Face-to-Face

Face-to-face classes are scheduled at a variety of times and locations, to best meet students, schedules and demands. Face-to-face classes may also include some online instruction in addition to regular classroom instruction. Some assignments may be administered through internet-based sites associated with class textbooks or through the university’s online course management system. Instructors will explain specific requirements for participation in online components.

Online

Students who participate in online classes are supported through a variety of technologies and teaching methods: email, bulletin boards, chat rooms, electronic journals, synchronous conferencing tools, content sharing tools, video lectures, and other digital and web-based tools and resources. Each student must obtain an NSU account to access email, course materials, and library resources. Students may be required to participate in an online orientation before the start of each class.
Hybrid
A hybrid (or blended) course is one that combines (or “blends”) face-to-face and online delivery. More specifically, some of the online sessions replace some of the traditional face-to-face “seat time”, which means that students complete a portion of activities in the on-ground classroom, and a portion of activities online (instead of going to the classroom). Percentages of face-to-face and online course delivery and interaction vary by course.

A wide variety of course materials may be hosted in an L.M.S. (Learning Management System). At NSU, courses are hosted in canvas, which allows for several activities and interactions to be carried out online. Some examples include hosting of course materials, lecture videos, or micro-learning segments, assessments descriptions and drop-boxes (virtual places where students can turn in their assignments instead of printing them), video conferences (with or without webcams), online discussions, emails, individual group collaboration forums, and others.

Canvas can be accessed at sharklink.nova.edu, and clicking on the Canvas icon.

Video-conferenced Courses
Video Conferencing uses telecommunications of audio and video to bring people at different sites together for a class. Besides audio and visual transmission, video conferencing can be used to share documents, computer-displayed information, and whiteboards. Instructors have tools available such as document camera, computer, DVD, Blu-ray, which could be used to enhance the learning experience. Nova Southeastern University reserves the right to record video-conferenced courses without seeking permission or release forms from students. The recordings are for pedagogical purposes only within the university and will not be shared outside the university. The recordings act as back-up in case a technical issue occurs, and distant-site students are not able to participate in a class. Students cannot request copies of lectures without the instructor’s approval.

Independent Study
Independent study provides qualified students with an opportunity to research a question of interest under faculty supervision. Students interested in independent study should consult with their academic advisor and faculty member. The faculty member will draw up a contract outlining student responsibilities. The student, the instructor and the department chair must sign the contract.

Requests for independent study contracts must be received by the appropriate academic department no later than the following applicable deadlines. However, students are encouraged to work with faculty as early as possible to explore these options:

- Fall independent study: August 1
- Winter independent study: December 1
- Summer independent study: April 1

Course Evaluations
Course evaluations facilitate the collection of feedback from students about their classes—how they feel about course content, appropriateness of textbook selection, and other aspects. All evaluations are confidential and anonymous. Students are urged to be honest and constructive in their remarks. The course evaluation process is conducted completely online. Students must have an NSU email account to access the course evaluation website. Students will receive an email to their @mynsu.nova.edu account when the online evaluation system is open prior to the Exam Week. Evaluations will remain open for a limited time, usually seven days. It is important to complete the course evaluations when the link is sent. Administration uses student feedback to evaluate the course, and the textbook.

Declaring and Changing Majors, Minors, and Programs

Declaring and Changing Majors
Undergraduate students study and work in major fields that prepare them to enter careers or continue formal education in graduate and professional school. Students who do not select a major program during the admissions process are considered “deciding.” All
students, including transfer students, must declare a major by the completion of 60 cumulative credits (including non-NSU credits). Deciding students and students who wish to change their originally declared major should contact their academic advisor.

---

**REQUEST FOR SECOND MAJOR**

Pursuing a second major is a serious commitment and requires significant student responsibility. Students may graduate with a second major depending on the availability of courses and academic department schedules. Students who wish to declare a second major must inform their academic advisor.

A request for a second major may be made by contacting your academic advisor who will review the additional requirements and help develop a new academic plan. A student must have a cumulative grade point average of 2.5 or higher to declare a second major.

The student is responsible for tracking requirements and prerequisites for both major programs, with guidance and assistance from academic advisors. Both majors will be posted to the transcript at the time of conferral of the bachelor’s degree. A second major will not be added to a transcript following conferral of degree.

Requirements for the first major are based on the curriculum published in the *NSU Undergraduate Student Catalog* for the semester of the student’s entry into the university. For majors subsequently added, curriculum requirements are based on the catalog in effect during the semester the second major is declared.

---

**DECLARING AND CONFERRAL OF MINORS**

Many NSU colleges offer undergraduate minors. Most courses taken to fulfill general education and major requirements may also be used to satisfy minor requirements. Some restrictions may apply. For details, refer to each minor description.

Pursuing a minor is a serious commitment and requires significant student responsibility. Students may graduate with a minor depending on the availability of courses and academic department schedules. Students may officially declare a minor before the end of each drop/add period through their academic advisors.

Students may request a minor with their academic advisor. The university will strive to make courses available for students to complete the minor in a timely fashion; however, this is not always possible. Successful completion of a minor requires the student to complete at least 50 percent of the coursework for the minor at NSU and attain a grade point average of at least 2.25 for the minor. Successful completion of the Honors Transdisciplinary Studies minor requires a minimum grade point average of 3.5 for the minor. A minor will be posted to the student’s transcript at the time of conferral of the bachelor’s degree. Minors will not be posted following conferral of the degree.

---

**Enrollment at Other Universities**

The following policy applies to all undergraduate programs *EXCEPT* for Bachelor of Health Science; Bachelor of Science in Respiratory Therapy (online); Bachelor of Science in Cardiovascular Sonography; Bachelor of Science in Medical Sonography; and Bachelor of Science in Respiratory Therapy (on-campus), and those in the Ron and Kathy Assaf College of Nursing.

Students enrolled at NSU are generally not permitted to be concurrently enrolled at other institutions. Once students enroll at NSU, they may not take courses at other colleges or universities for the purpose of earning an NSU degree without specific, written approval from their academic advisor. Written approval must be obtained before registering for a non-NSU course. Only under unusual circumstances will permission be granted. Students must carefully check the guidelines of their financial aid awards and consult with their academic advisors about their transfer credits in advance, to avoid serious ramifications.

Students may take no more than 10 percent of their remaining credits at another university. This quantity is based on status at time of initial matriculation. However, students must meet NSU’s residency requirements as outlined in “Graduation Requirements” section on page 64 of this catalog. To request permission to take courses at other institutions, students must submit a Concurrent/Interim Enrollment Application, which can be obtained from their academic advisor.

If approved, courses taken at other institutions may be used only for “open” elective credit. Financial aid recipients will be required to complete the NSU Consortium Agreement Form or the contractual agreement to receive financial aid for enrollment at the other
institution, if eligible. If courses are to be taken at an institution abroad, the student must also have an NSU Study Abroad Agreement approved.

Students participating in approved Study Abroad and/or Travel Study programs may be exempted from some of the limitations in this policy. Refer to page 95 for additional Information regarding Study Abroad.

**DR. PALLAVI PATEL COLLEGE OF HEALTH CARE SCIENCES**

Students in the Bachelor of Health Science; Bachelor of Science in Respiratory Therapy Post-Professional Program (online); Bachelor of Science in Cardiovascular Sonography; Bachelor of Science in Medical Sonography; and Bachelor of Science in Respiratory Therapy First-Professional (entry) programs may be permitted with prior approval to take courses and co-requisites at other regionally accredited institutions. All pre-requisite and co-requisite courses must be from regionally accredited institutions and equivalent to NSU’s general education courses.

**RON AND KATHY ASSAF COLLEGE OF NURSING**

Once matriculated into the program, students may not take required courses at any other college or university and transfer the credits in.

---

### Grading System

#### Grading Scale

Instructors assign grades based on criteria established in course syllabi.

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Description</th>
<th>GPA Equivalent</th>

#### Grade Point Average and Quality Points

A student’s academic standing for a specific semester or term is indicated by the grade point average (GPA). The GPA is calculated based on earned credits and letter grades (including Fs, for which students receive 0 credits). The GPA does not include classes from which the student has successfully withdrawn or received an Incomplete. Overall academic standing is indicated by the cumulative GPA (CGPA). GPA calculations include NSU coursework only, based on the following formulas and definitions.

- **Quality points = A letter grade’s numerical GPA value MULTIPLIED BY the number of credits assigned to the course**
- **GPA hours = Earned credits, including Fs, excluding withdrawals, and audits, and successfully completed pass/fail courses**
- **Current semester or term GPA = The total number of quality points for the semester or term DIVIDED BY the total GPA hours for the semester or term**
- **Cumulative GPA (CGPA) = Total quality points DIVIDED BY total GPA hours**
**GRADE FORGIVENESS**

The grade forgiveness policy enables an undergraduate student to repeat a limited number of courses to improve his or her cumulative NSU grade point average (GPA), by excluding the original (and lower) grade from calculation. Undergraduate students may use the forgiveness policy for a maximum of three NSU courses, and only for courses in which a grade of “C-” or lower was earned, no more than one excluded grade per course will be allowed.

Students who choose to exercise this option must meet with their academic advisor and complete the Grade Forgiveness Policy Form, which should be submitted once the course has been successfully repeated and a grade has been received, no later than one semester after the repeated course has been completed. If approved, the grade for the previous attempt will be excluded from the calculation of the term and cumulative NSU GPA, although it will remain on the transcript.

Grade exclusions may not be recognized for graduate/professional school admission, transfer to other institutions, or by our dual admission program. Due to external factors including but not limited to areas such as regional and national accreditation as well as state licensure, certain colleges/programs reserve the right to require a level of academic performance that is greater than the base level established by the university for all undergraduate students.

Only courses taken at NSU qualify for grade forgiveness. Grade exclusions are subject to availability of the course, and there is no guarantee that a particular course will be offered again. This policy does not restrict the number of attempts to repeat courses, but does restrict the number of course grades to be excluded from the cumulative GPA. Course credit may be applied only once toward completion of degree requirements. While this policy may retroactively change a semester GPA, it will not affect related academic standing sanction, and cannot be applied once a degree has been conferred.

In addition to the grade forgiveness policy, please be aware of the Repeat Course Policy for Financial Aid and the maximum number of attempts for an individual course that will be covered by financial aid. Visit nova.edu/financialaid/apply-for-aid/repeat-course.html for additional information.

**GRADE REPORTS**

Student grades are disseminated online via SharkLink at https://sharklink.nova.edu. Legal provisions prohibit the release of personally identifiable information to anyone other than legally authorized persons. Students are permitted to inspect, review, and challenge such information as provided by law.

**DEAN’S LIST**

Undergraduate students who enrolled full-time and earned a minimum of 12 credits at NSU for the previous semester, earned at least a 3.8 semester GPA, and received no incomplete grades (I), are placed on the Dean’s List for that semester. Ron and Kathy Assaf College of Nursing (ACON) students who enrolled full-time and earned a minimum of 9 credits at ACON for the previous semester, earned at least a 3.8 semester GPA, received no incomplete grades (I), and are not repeating a course are placed on the Dean’s List for that semester.

Students placed on the dean’s list will have a notation made on their official transcripts. The Dean’s List is not recognized during summer semesters.

**INCOMPLETE**

A grade of Incomplete (I) is issued in rare cases because of unusual and exceptional circumstances. Students are only eligible for an Incomplete if

- 50% of the coursework has been completed with a C or above average, and
- the remaining coursework can be completed in a timeframe agreed upon by the faculty member and the student, not exceeding one semester beyond the final date of the course.

It is the student’s responsibility to consult the faculty member regarding an Incomplete request. Based on the unusual and exceptional circumstances surrounding the Incomplete request, documentation may be required to be submitted. Please refer to the Incomplete Grade Agreement Form/Contract for more information. Both the student and faculty member must sign the Incomplete Grade Agreement Form/Contract prior to the end of the course and agree upon its conditions via email.
In the nursing programs, the decision to grant an Incomplete request rests with the individual course faculty. However, nursing students may appeal the faculty decision, if it is negative, to the program director, whose decision is final.

If the student does not complete the coursework within the agreed upon time frame, the Incomplete grade will be changed to the grade earned based on the work accepted by the instructor to date as stipulated in the contract or agreement (not to exceed 16 weeks); the student only gains points for assignments completed that were included in the incomplete agreement. A student cannot remove an Incomplete by retaking the course in a subsequent semester. A student who is absent at the final examination without prior approval is generally not eligible to receive an Incomplete grade.

Incompletes that have not been addressed by the student and college will ultimately be converted to a Failing grade after 1 year from the end of the term.

**ACADEMIC STANDING**

Policies outlined below apply to all undergraduate programs. However, if students are admitted to and active in the professional phases of selected professional programs within the Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing, they are subject to higher levels of academic performance than the university standard, which will be reviewed and addressed by the host colleges in accordance with their program and accreditation standards. Please refer to “Increased Standards” below.

Academic Standing, as defined below, is separate from the standards for Satisfactory Academic Progress (SAP) for financial aid purposes. For detailed information about maintaining SAP for financial aid eligibility, visit [nova.edu/sap](http://nova.edu/sap).

Nova Southeastern University is committed to ensure accurate tracking and review of a student’s permanent academic record. Academic transcripts serve as documentation for the student and as a record for other agencies (employers, other academic institutions, etc.). The academic transcript reflects the record of courses in progress and attempted, grades received, degrees sought and/or earned (with award and academic completion dates), practicum/dissertation titles, honors awarded, and disciplinary actions which result in a student’s suspension or expulsion from the institution. Additionally, the student’s academic standing is reflected on an academic transcript to provide a more complete depiction of the student’s academic history. The following designations provide for a student’s status as it relates to her/his end-of-term academic standing within the university:

**Good Academic Standing**

A student is in good academic standing unless he or she is not making sufficient progress toward degree completion and/or is placed on academic probation, academic suspension, or academic dismissal.

**Academic Warning**

Academic warning will be assigned for any semester in which a student has a semester GPA below 2.0 (regardless of cumulative GPA). A student on warning will receive a formal communication via email. Academic warning will not be a designation of any kind on a student’s transcript. Academic warning will be considered a warning to the student and is not a designation of poor academic standing within the university.

**Academic Probation**

Academic probation is assigned when a student’s semester and cumulative GPAs are below a 2.0 and the student was already on academic warning. Academic probation will be designated on a student’s transcript. To be removed from academic probation, a student must raise his/her cumulative and semester GPA to a 2.0 or higher by the end of the following semester the student is enrolled. A student may remain on academic probation with a semester GPA of 2.0 or higher if the cumulative GPA is below 2.0. Academic probation carries a permanent designation on the student’s transcript. A student on probation will receive a formal communication via email.

**Academic Suspension**

A student is placed on academic suspension when he or she has a cumulative GPA below 2.0 and a semester GPA below 2.0 and was already on academic probation. Suspension results in the cessation of enrollment/registration for the next semester (summer semester does not satisfy the period of academic suspension). A student may not apply any credits earned during suspension (one semester) toward his or her NSU degree. Academic suspension carries a permanent designation on a student’s transcript. A student on suspension will receive a formal communication via email and a hard copy mailed to his or her permanent address.

**Academic Dismissal**

A student is placed on academic dismissal when he or she has a cumulative GPA below 2.0 and a semester GPA below 2.0, and was
previously academically suspended, and was already on academic probation. Academic dismissal carries a permanent designation on the student’s transcript. A student on dismissal will receive a formal communication via email and a hard copy mailed to their permanent address.

**Increased Standards**
Due to external factors including but not limited to areas such as regional and national accreditation as well as state licensure, certain colleges/programs reserve the right to require a level of academic performance that is greater than the base level established by the university for all undergraduate students. Please refer to the Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing handbooks below.

- Dr. Pallavi Patel College of Health Care Sciences Student Handbook: https://nova.edu/publications/chcs/chcs_student_handbook/

**Appeals**
A student may appeal a determination of academic suspension or academic dismissal within ten days of notification. The student will be automatically dropped from classes on determination of suspension or dismissal. The student may not attend class during a period of appeal. Appeals are reviewed and considered by the Academic Progress Committee, comprised of faculty members.

**Petition for permission to enroll after academic suspension:**
Students who have been suspended and wish to return to NSU must petition for re-enrollment by the date indicated on their suspension notice. No coursework completed at another institution during the period of suspension will be considered applicable to an NSU degree program.

Students who are approved to re-enroll after academic suspension may register for classes for the next semester. These students return on academic probation.

If students have not registered for coursework at NSU for more than one year, they must reapply for admission and their major program’s required curriculum will be re-evaluated according to the most current *NSU Undergraduate Student Catalog*.

**Petition for permission to enroll after academic dismissal:**
Academically dismissed students may petition for permission to reapply only after two or more years have elapsed following dismissal. No coursework completed at another institution within two years after dismissal will be considered applicable to an NSU degree program. Only documented, extreme extenuating circumstances will be considered for a student to become eligible to reapply to NSU following an academic dismissal.

The petition will be reviewed by the Academic Progress Committee and will submit a recommendation to the Dean of the College of Undergraduate Studies or designee, who will make a final decision and communicate with the student. This decision determines if the student is eligible to reapply for admission to NSU.

If students have not registered for coursework at NSU for more than one year, they must reapply for admission and their major program’s required curriculum will be re-evaluated according to the most current *NSU Undergraduate Student Catalog*.

**Ron and Kathy Assaf College of Nursing students**, please refer to nova.edu/publications/nursing/student-handbook/.

---

**Graduation—Degrees, Diplomas, Certification, and Commencement**

**Degree Certificate**
Students must complete an online degree application in order to be eligible for degree/certificate conferral. Students are eligible for graduation when they meet the requirements listed in the NSU Undergraduate Student Catalog in effect when they entered the university, unless a prior request to follow a more recent catalog has been approved. Degree/certificate applications are reviewed by the respective academic program office for approval. Once the program office has confirmed that the student has met all degree
requirements, the student’s name will be submitted to the university’s Board of Trustees for final approval of degree conferral. Degrees/certificates are awarded on the last day of the month in which the degree application has been approved. Once degrees have been conferred, transcripts and diplomas showing the awarded degree are sent to students by mail to the address provided on the degree application. Existing holds and outstanding balances will not prevent the awarding of a degree, however, students must satisfy any outstanding balances to receive their transcripts and diploma. Once a degree is conferred, it is considered the official record that cannot be modified. Therefore, it is important for students to continuously monitor their academic record and request adjustments as needed before each semester’s record is closed.

**DIPLOMAS**

The diploma indicates the degree and major the student has earned. The academic transcript, the official record of work at NSU, indicates degree or certificate earned, major field of study, concentration, minor, and any honors.

**GRADUATION WITH DISTINCTION**

Latin Honors are awarded based on students’ cumulative GPA once all final grades have been entered for their graduation term. In order to be eligible for these honors, a student must also have 56 graded credit hours of NSU courses. The GPA requirements to graduate with Latin honors are as follows:

1. Cum Laude (3.80-3.89)
2. Magna Cum Laude (3.90-3.96)
3. Summa Cum Laude (3.97 -4.0)

The honors level (Cum laude, Magna cum laude, Summa cum laude) will also be reflected on the student’s diploma and official transcript.

**GRADUATION WITH HONORS**

Students within the Farquhar Honors College who complete program requirements will receive notation on their transcript and diploma. For more information on General Citation and Research Citation in Honors, please refer to [honors.nova.edu](http://honors.nova.edu).

**HONORS IN MAJOR**

Students who complete the ‘Honors in Major’ program requirements will receive notation on their transcript and diploma. Students will be acknowledged at the Honors Graduation Reception.

Honors in Major is administered by the Farquhar Honors College and is a unique opportunity for high performing NSU undergraduate students in their senior year. For more information, see the ‘Honors in Major’ website: [honors.nova.edu/honors-in-major/](http://honors.nova.edu/honors-in-major/).

**COMMENCEMENT**

Undergraduate Commencement ceremony is held in May. While all students are encouraged to attend Commencement, attendance is not required. Students receiving a certificate do not participate in the Commencement ceremony. Students must contact their program office for Commencement requirement details.

There is no fee for participating in Commencement; however, students will have to pay the cost of their regalia (cap and gown). For complete information on Commencement and important updates, visit [nova.edu/commencement](http://nova.edu/commencement).
Graduation Requirements

Minimum Graduation Requirements

All degree-seeking students must be matriculated and complete the minimum credits as designated by their chosen major.

The following conditions are also required:

1. Completion of at least 120 credits, including major, minor, general education, specialization, concentration, exams, experiential education (ExEL) and electives coursework, as specified by program requirements;
2. Attainment of a 2.0 cumulative grade point average*;
3. Attainment of a 2.25 grade point average in the major area*;
4. Completion, at NSU, of at least 30 credits (not including CLEP, proficiency examinations, nor prior experiential learning credits);
5. Completion of at least 50 percent of the credits in the major area at NSU (not including CLEP, proficiency examinations, nor prior experiential learning credits). In the nursing programs, students may apply only six credits from another comparable nursing program. (A course must have been taken at an accredited college/school of nursing and be the equivalent of the course offered in the NSU program.)
6. For students in the Bachelor of Science in Nursing Program, Bachelor of Science in Respiratory Therapy Program, Bachelor of Science in Medical Sonography, Bachelor of Science in Cardiovascular Sonography, all courses in the program of study required for the degree must be completed with a grade of C or better; Students in the Medical Sonography Program must achieve the clinical competencies and the minimum number of procedures and types of procedures as established by the program, prior to graduation. Students in the Bachelor of Health Science Program must achieve a grade of C or better in all required core courses.
7. Submission of the online degree application form and payment of the $100 fee, preferably no later than the last semester. A degree cannot be evaluated for completion until the degree application has been submitted. Late applications may cause a delay in conferral date.

*Degree-seeking students in programs that lead to initial teacher certification in the Abraham S. Fischler College of Education and School of Criminal Justice must attain a 3.0 cumulative grade point average and pass all parts of the Florida Teacher Certification Examination (GKT, Professional Education Test, and Subject Area Examination). Students enrolled in the dual Bachelor of Science in Cardiovascular Sonography/Master of Health Science; and dual Bachelor of Science in Medical Sonography and Master of Health Science need a minimum overall GPA of 3.0. Students seeking a Bachelor of Science in Speech-Language and Communication Disorders must attain a 2.50 cumulative grade point and major area average. Students seeking a Bachelor of Science in Nursing must satisfactorily complete all courses within the program of study required for the degree with a C or better.

Entering first-time-in-college (FTIC), undergraduate students are required to earn six qualified experiential education (ExEL) units and complete a capstone experience for graduation. ExEL-qualified experiences have been reviewed by the Experiential Education and Advisory Council (EELAC) and approved by the Provost to satisfy the Experiential Education graduation requirement.

Please work with your academic advisor and your career ExEL advisor to include curricular and co-curricular experiential education opportunities in your plan of study, such as Faculty-Mentored Research, ExEL Coursework, Travel Exploration, Community Engagement, and Professional Growth.

Please refer to the ExEL section in this catalog and the website at nova.edu/academic-affairs/experiential-learning for further information.
Grievance/Discrimination

Types of Grievances

Discrimination
Nova Southeastern University is committed to maintaining a safe and healthy educational environment that is free from discrimination, harassment, and misconduct based on race, color, religion or creed, sex, pregnancy status, national or ethnic origin, nondisqualifying disability, age, ancestry, marital status, sexual orientation, gender, gender identity, military service, veteran status, and political beliefs or affiliations. The university is committed to taking immediate action to eliminate any harassment, prevent its recurrence, and address its effects. Any student or employee found to have engaged in acts of harassment is subject to the relevant university accountability or disciplinary procedures, including potential suspension or expulsion for students, and suspension or termination for employees.

For inquiries or reports regarding perceived discrimination or harassment based on sex, gender, gender identity, pregnancy status or sexual orientation, please contact:

Laura Bennett  
Title IX Coordinator  
(954) 262-7858  
laura.bennett@nova.edu

Information about NSU’s Title IX/Sexual Misconduct policy, confidential resources, rights of all parties, definitions and examples of prohibited behaviors, and the procedures for investigating and resolving reports of sexual misconduct is available on the Title IX website at nova.edu/title-ix. Individuals may report incidents through a secure online form on the Title IX website and/or may contact the Title IX Coordinator directly. The Title IX Coordinator also assists students in learning about their protections under Title IX, such as those for pregnant/parenting students as well as those who may have experienced sexual violence on- or off-campus that affects their ability to participate in an NSU educational program or activity.

Note: The Department of Education issued new Title IX regulations to be effective August 14, 2020. NSU will be reviewing and updating relevant policies and procedures to ensure compliance and will post revisions online. Refer to the Title IX website at http://www.nova.edu/title-ix for more information.

All other reports or inquiries regarding perceived discrimination should be directed to:

Benjamin O. Johnson, Ph.D.  
Assistant Dean for Student Development  
(954) 262-7281  
bj379@nova.edu

Grade/Academic Grievances
Faculty members serve as the initial contacts for all grievances involving the fairness of a grade, or any classroom or instructor activity, in their courses. Students unable to resolve a grade/academic grievance with a faculty member should contact the appropriate department chair or program director in the college responsible for the course, who will make a final decision on the fairness of the grade. Grade/academic grievances will not be permitted to proceed any further unless evidence of discrimination or a violation of rights can be demonstrated.

Grade/academic grievances must be initiated in a timely fashion, no later than the end of the semester following the occurrence of the grievance issue. The student may forfeit all rights under the grievance procedure if each step is not followed within the prescribed time limit.

Administrative Grievances
Administrative grievances are related to academic policies and administrative actions. Grievance procedures must be initiated by submitting a Student Action Request (SAR) no later than 20 days after the end of the semester in which the grievance issue took place. The student may forfeit all rights under the grievance procedure if each step is not followed within the prescribed time limit.
Administrative Grievance Process

All administrative grievances must begin at the first level contact. Grievances brought to higher level contacts without previously going through the appropriate administrative grievance procedure will be referred to the appropriate step in the process, thus delaying problem resolution. Students who are not sure of the appropriate university employee to contact about an administrative issue should communicate with their academic advisor.

Student Action Request (SAR)

Student Action Requests (SAR) are used to request exceptions from specific university or college policies under unusual circumstances. Students may officially request a waiver from a published academic policy. However, the SAR must be submitted no later than 20 days after the end of the semester in which the grievance issue took place. Before an SAR is submitted, the student should seek advice from their academic advisor in an effort to resolve their issue of concern and determine if an official SAR is necessary. If an SAR involves changing enrollment status, including dropping or withdrawing courses, the action may affect students’ eligibility for financial aid (see “Withdrawal from Classes” section on page 71 of this catalog).

Steps for Submitting Administrative Grievances

Administrative grievances are related to academic policies and administrative actions.

Step One: Meet with the party involved
Students should discuss their grievance with the party involved as soon as possible.

Step Two: Meet with the advisor
Students who feel that their grievance was not satisfactorily resolved after meeting with the party involved should meet with their advisor for guidance in submitting a formal grievance in writing, using a Student Action Request (SAR).

Prior to submitting the request, students should carefully read and be aware of any consequences if the grievance involves changes in enrollment status. It is also essential that students maintain copies of relevant documentation (emails, medical documents, etc.) sent to academic advisors or other NSU personnel.

How to Submit a Student Action Request

The following information must be included in all Student Action Requests. Requests lacking the required information will not be reviewed. Students should consult with their academic advisor before submitting an SAR. The SAR should then be submitted in person to the academic advisor or be sent as a Word document from the student’s official NSU email account if they cannot meet in person, no later than 20 days after the end of the semester in which the grievance issue took place.

1. Student Name
2. Student ID number
3. Major/Program/Site Location
4. Day/Evening Phone Number
5. Mailing Address
6. Email Address
7. Problem: Provide an explanation of the problem and include any pertinent documentation as support.
8. Action Requested: Provide an explanation of the requested action. Include the referring page in the current undergraduate student catalog for the policy in question or any other relevant information, including specific courses or terms.
9. Prior Action Taken: Provide a list of all individuals contacted about the problem, including their departments. For more information on submitting an SAR, students can visit nova.edu/undergraduatestudies/sar.html.

After receiving, reviewing, and signing the SAR, the advisor will send it to the appropriate party for a decision.

Step Three: Review and Decision

The College of Undergraduate Studies receives the SAR from advising, reviews all materials provided with the request, requests relevant information and recommendations from the appropriate academic colleges, and reaches a decision based upon all available information. Once a decision has been made, the decision will be communicated to the student to the address on record and/or to the NSU email address.
Step Four: Appeal
Students who wish to appeal a denied SAR may submit an appeal, in writing, to the associate dean of the College of Undergraduate Studies, with any new information and/or documentation. Students will receive a formal response either by mail to the address on record and/or to their NSU email account. This decision is final and binding and cannot be appealed further.

Image Use Statement

As part of the Student Enrollment Agreement (SEA), which students must complete with their first registration each academic year, students are required to agree with the following Image Use Statement:

I permit and authorize Nova Southeastern University (NSU) and its employees, agents, representatives, contractors, and personnel who are acting on behalf of NSU at any NSU-related events or at any public areas on NSU’s property to take and/or obtain and use my photograph, name, alias, a video and/or audio recording, or other likeness of myself (hereinafter collectively referred to as “My Likeness”). I grant NSU permission to take and use My Likeness for purposes related to the educational mission of NSU, including instructional and/or educational purposes, as well as publicity, marketing, promotion, or other commercial ventures for NSU and its various programs without compensation to me. I understand my Likeness may be copied/reproduced and distributed in any media format. I further understand that My Likeness may be subject to reasonable modification and/or editing. I acknowledge that NSU has the right to make one or more reproductions of My Likeness in any media. I waive any right to inspect or approve the finished product or material in which NSU may eventually use My Likeness. I acknowledge that NSU owns all rights to My Likeness. I understand that, although NSU will endeavor to use My Likeness in accordance with standards of good judgment, NSU cannot warrant or guarantee that any further dissemination of My Likeness will be subject to NSU supervision or control. Accordingly, I release NSU from any and all liability related to the dissemination, reproduction, distribution, and/or display of My Likeness in any media format, and any alteration, distortion, or illusionary effect of My Likeness, whether intentional or otherwise, in connection with said use. I also understand that I may not withdraw my permission for use of My Likeness which was granted.

Online Course Access and SharkLink

DISTANCE EDUCATION SUPPORT

All NSU students are provided with NSU computer accounts including email. Students, however, must obtain their own Internet Service Providers (ISP) and use their own computer systems (PC or Apple Macintosh and an Internet connection). New students receive an orientation and extensive online technical support online access, online tools and methods, and library resources.

Online interactive learning methods involve web-based course materials, the electronic library, and online activities that facilitate frequent student-professor interaction. Faculty members and students interact via online forums using threaded discussion boards, chat rooms, and email. Students submit assignments through a web-based learning environment.

Online students have access to books, journal articles, microfiche, dissertations, index searches, catalog searches, and reference librarians. The online medical database collection at NSU is extensive and includes access to quality subscription services free of charge to the student.

SHARKLINK

SharkLink is NSU's online information portal. With a single username and password, it provides students access to their NSU email account, online courses and discussion groups, university announcements and calendar reminders, and student records. SharkLink also enables students to register online, view course availability, and check their grades. All students are assigned a SharkLink ID, which is also their NSU email username, that uniquely identifies them and provides them access to the NSU administrative system. SharkLink can be accessed at https://sharklink.nova.edu.

Online Course Access

The university uses a secure course management platform for developing and delivering interactive courses and their components over the Web. Students are granted access to this platform based on registration for online courses. Students must use their SharkLink...
login and password in order to access their online courses. All online students must use this platform when communicating with their program. Course communication will be done through the particular course that the student is attending. Online courses can be accessed on Canvas.

**NSU Email**

All official NSU business, such as information on accounts, financial aid, class emails, etc., is conducted through students’ NSU email accounts. Students can access NSU email by logging into sharkmail.nova.edu. Students’ SharkLink ID serves as their NSU email username.

## Registration

As part of the registration process, all students must complete the Nova Southeastern University Student Enrollment Agreement (SEA) each year or risk being dropped from their courses. A copy of the verbiage in the SEA can be viewed at [nova.edu/registrar/forms/catch-the-sea-wave.pdf](http://nova.edu/registrar/forms/catch-the-sea-wave.pdf). A registration hold on a student’s account does not prevent the student from completing the SEA. Students are encouraged to register online via SharkLink. Students who do not know their SharkLink username ID and password should visit [nova.edu/resources/nsidentity.html](http://nova.edu/resources/nsidentity.html).

All students must have at least provisional admission status, be officially registered, and pay tuition and fees in order to attend class, receive a grade, and receive academic credit. Students should register via SharkLink for the fall, winter, and summer semester during the open registration period, and take advantage of the university’s online degree-evaluation system Degree Works for guidance (see “Degree Works” on page 69 for more details). Students should register for all courses they intend to complete within a semester and not wait until the semester has started to register for part of a term. Petitions for changes to course registrations will only be accepted up to 20 days after each semester ends. Registering early for the entire semester ensures availability of seats in required classes and allows the NSU Office of Student Financial Assistance to properly process and disburse the student’s financial aid. An official grade will not be recorded, and credit will not be given for anyone who attends class as an unregistered student.

The following holds will prevent students from registering:

**New student hold**—New students must meet with their academic advisor before registering, with the exception of nursing students who must register through their advisors.

**NSU employee hold**—NSU employees must submit a Student Transaction Form (STF) to register. An online STF is available on the registrar’s website; paper STF’s may be submitted at the One-Stop Shop or the Office of the University Registrar.

**Other holds**—Other holds, such as a bursar or academic hold, may prevent students from registering. Students must contact the respective hold originator to resolve the hold before registering in SharkLink.

Please note that late registration will not be accepted if a financial hold was not cleared prior to the close of the registration period.

## Roster Reconciliation

Students are required to attend the first class of each course in order to start academic work for the semester, unless they have obtained prior approval for an absence from the instructor. Without such approval, a student will be reported as not in attendance, which may result in the student being dropped from the class through the university’s roster reconciliation process. However, it remains the student’s responsibility to monitor class registration status in accordance with the Student Enrollment Agreement (SEA), regardless of the instructor’s roster reconciliation submission.

## Student Contact and Personal Information

Students must keep their contact information current in SharkLink at [https://sharklink.nova.edu](https://sharklink.nova.edu), including preferred and permanent mailing addresses and phone numbers, to ensure that they will be able to receive important information sent by postal mail, such as tax forms from the Office of the University Bursar or notices from the Office of Student Financial Assistance and the Office of the University Registrar. The Office of the University Bursar also requires a valid mailing address to issue a financial aid refund. Students may update their address anytime in SharkLink by clicking on “View My Profile” on the home page.

To make a change to other personal information, such as a name, Social Security Number, date of birth, or gender, Nova Southeastern
University requires official documentation. Students must submit a completed Data Change Request available at nova.edu/registrar/forms1.html along with supporting legal documentation. For details on acceptable documentation for each change, visit the Registrar's website at nova.edu/registrar/services.html.

**Degree Works**

NSU’s online degree evaluation tool, Degree Works, allows students to compare their completed coursework against the degree/certificate requirements published in the Undergraduate Student Catalog for the year in which they matriculated. This useful reference tool helps students track their progress toward degree/certificate completion and is available through SharkLink.

Degree Works helps students keep track of their completed coursework by applying it to each specific requirement (e.g. major, concentration and minor requirements). For information on Degree Works, visit the registrar’s website at nova.edu/registrar/degreeworks.html.

**Enrollment Requirements for Financial Aid Eligibility**

In order for students to receive any federal Title IV or state financial aid (grants, scholarships, student employment, and loans), they must be enrolled in a minimum number of courses that are required for degree/certificate completion (degree-applicable). Students may only receive financial aid for courses that are required for degree/certificate completion. Financial aid funds will only be disbursed to students who meet the minimum enrollment requirements for financial aid eligibility with degree-applicable courses. A student may maintain maximum financial aid eligibility while enrolled in not degree-applicable courses if the student meets the enrollment requirements for each respective Title IV program with degree-applicable courses. For instance, in order to be eligible for federal loans, a student must be enrolled at least half time. Since half-time enrollment is defined as 6 credits per semester/term for undergraduate students, students must be enrolled in at least 6 degree-applicable credits to be eligible for federal loans. If a student enrolls in one 3-credit course that is degree-applicable and one 3-credit course that is not degree-applicable, the student will not be eligible for federal loans, even though the student is enrolled half time.

More information about financial aid eligibility and degree applicable courses is available at nova.edu/registrar/degreeworks.html.

**Auditing a Course**

Students may register to audit courses except in the cardiovascular sonography, medical sonography, or respiratory therapy programs. Registration as “audit” must be done by an advisor prior to the first-class meeting. No academic credit is awarded for audited courses. Students may attend all classes but are not required to take examinations, and a grade of AU is awarded at the time of registration and will appear on the transcript. Once a student has registered for an audit, the registration may not be changed to a regular registration status. An audited course may be included in the flat-rate tuition, provided the total number of credit hours, including credits assigned to audited courses, does not exceed 18. Otherwise, tuition will be charged at the prevailing, per-credit-hour rate.

**Closed Classes**

Enrollment capacity for each class is carefully determined to reflect the physical limitations of the classroom or lab as well as the subject’s most effective learning and teaching environment. Once a class has been filled and closed to further registration, students should meet with their academic advisor for help adjusting schedules and choosing alternative classes that meet degree program requirements. Some classes may allow students to add themselves to a wait list. A wait list is an electronic list of students who are waiting to register for a full class. If available, students may sign up for this when they attempt to register for a section that has reached its capacity. If a seat opens, the student will receive notification through NSU email and has 24 hours to claim the seat before it is offered to the next student on the waiting list. A student on the wait list is not officially enrolled in that course and is not eligible to receive a grade in that course.

Students may appeal to register for closed classes under exceptional circumstances. Before submitting an appeal, students must ensure there are no other options available at the time of submission. Student appeals must be made in writing by the student’s academic advisor to the chair of the department in which the course is offered. **Appeals should not be directed to course instructors.** Department chairs or program directors review appeals and may consult instructors when considering such requests. All appeals must explain why no alternative class will support the student’s degree requirements, explain why the student was unable to register for the
class when space was available, and include a written endorsement from an academic advisor (e.g., by email).

Appeals will only be considered up to the date of the first-class meeting. If a student appeal is granted, the department chair will authorize the student’s academic advisor in writing (e.g., by email) to register the student. However, the registration must be processed within 24 hours of the department chair’s notification. If the registration is not processed within that period, the authorization is removed.

**Dropping and Adding Classes**

During the drop and add periods (the first week of class), students may modify their schedules by changing classes without any further academic implications. However, even during the drop and add period, dropping a class may result in a tuition charge, affect fees, or impact a student’s financial aid. Students may drop/withdraw from a class after the drop period has ended (see “Academic Calendars” section for deadlines). In extenuating circumstances, requests for changes to course registrations will be considered up to 20 days after each semester ends. Dropping a course may result in a refund for tuition paid and will not negatively affect the GPA. However, students need to be cautious because dropping classes may affect the student’s enrollment status, eligibility for financial aid, and loan deferment. If a student drops below half-time or full-time status (whichever was the basis for financial aid awarded), the student may become ineligible for grant aid, loans, and scholarships that were awarded prior to the drop. This may cause a reduction in certain types of financial aid and, consequently, may result in a higher balance due. For students completing a Bachelor of Science degree in Nursing, the number of credits constituting half-time or full-time enrollment may vary. All other students are considered half-time at 6–8 credits, three-quarter time at 9–11 credits, and full-time at 12 credits or above. Students receiving financial aid are strongly encouraged to consult a financial aid counselor before dropping or withdrawing from classes to ensure compliance with federal and state standards of Satisfactory Academic Progress (SAP). Student athletes should also contact the athletic compliance officer before dropping or withdrawing from class. For refund policies related to courses dropped, refer to the “Tuition and Fees” section on page 77 of this catalog.

Students are directed to make their course selection based on their program curriculum requirements and scheduling needs, not based on the instructor. Course instructors may change without notice before or during the semester. In such instances, student petitions based on instructor preference will not be granted.

**Drop and Add Periods**

The first week of each semester comprises the drop/add period. The drop/add period is the designated time frame in which course schedules may be edited before they become official. Students who add classes after they have started are responsible for all course requirements.

The second and third weeks of each semester are drop periods. Dropped courses are removed from the student’s class schedule and will not appear on transcripts. A percentage of the student’s tuition will be reversed as applicable. Only subsequent term (Term II) classes may be added during these weeks. See “Academic Calendars” section on page 22 of this catalog for deadlines.

The withdrawal period starts with the fourth week of each semester and ends three weeks prior to the end of the semester. Students who intend to withdraw from all courses for a semester are encouraged to meet with their academic advisor and must submit a Student Transaction Form for the withdrawal to be processed.

Dropping a course may affect student loans, scholarships, or grant aid that has been awarded prior to the drop. A student may have tuition refunded when dropping a course; however, this may cause a reduction in certain types of financial aid, which can result in a balance due.

**Sequential Programs**

The Bachelor of Science—Cardiovascular Sonography Program, Bachelor of Science—Medical Sonography Program, Bachelor of Science in Respiratory Therapy—First-Professional Program, and Bachelor of Science in Nursing—Entry Level Track Program are sequential programs with lockstep coursework.

Students in the B.S.—Cardiovascular Sonography, B.S.—Medical Sonography, and B.S.R.T.—First Professional Programs are not allowed to drop individual classes because the curriculum must be taken concurrently and in a specific sequence, according to the program requirements. Students enter the program, take the common set of courses in sequence, and graduate together. If a student fails a core sonography or respiratory therapy course, he or she may be dismissed from the program. Students will not be allowed to begin their clinical training unless all sonography or respiratory therapy core courses are passed with a C or
better. Students who experience extenuating circumstances may request a Leave of Absence (refer to “Withdrawal from the University and Leaves of Absence” section on page 71 of this catalog.

**Bachelor of Science in Nursing Programs**

Students completing a Bachelor of Science degree in Nursing may drop a course in the first week of class without financial penalties. Students who would like to drop a nursing course must make an appointment to see the program director prior to processing the drop. The program director can answer specific questions about tuition refunds and policy guidelines.

**Dropping Classes**

Students who intend to drop all their classes for an upcoming semester may not process the full drop through SharkLink. Students must complete a Student Transaction Form and submit it to their academic advisor to process the full drop.

**Withdrawal from Classes**

Students may withdraw from a class after the drop period has ended up to three weeks prior to the end of the semester. Please refer to “Academic Calendars” on page 22 of this catalog for specific dates. Withdrawn courses will remain on student transcripts with a grade of W but will not affect the student’s GPA. For information about the drop period, see “Dropping and Adding Classes” on page 70. For the tuition refund schedule during the drop period, refer to “Tuition and Fees” on page 77 of this catalog. Before withdrawing from classes, students are advised to consult with their academic advisor to discuss academic standing implications. Financial aid recipients are strongly encouraged to also speak with a financial aid counselor to avoid unwelcome consequences, such as loss of financial aid eligibility or reversal or reduction of funds received. International students must be mindful that the change in enrollment status may affect their immigration status and eligibility for student visas.

There is no financial refund if a student withdraws from a course. Not attending classes does not constitute official withdrawal. A student who stops attending classes will receive grades based on course requirements and work completed.

Students of the Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing must also refer to their respective college’s student handbooks for detailed procedures about class withdrawal as they may vary for each academic degree program.

- Dr. Pallavi Patel College of Health Care Sciences Student Handbook: https://www.nova.edu/publications/chcs/chcs_student_handbook/

**Withdrawal from the University and Leaves of Absence**

Students who plan to withdraw from all courses during a semester and leave the university must contact their academic advisor before withdrawing. Students who withdraw from the university must formally apply to be considered for readmission at a later date.

---

**CONTINUOUS ENROLLMENT AND WITHDRAWAL FROM THE BACHELOR OF HEALTH SCIENCE (B.H.Sc.) AND BACHELOR OF SCIENCE IN RESPIRATORY THERAPY (B.S.R.T.) POST-PROFESSIONAL (ONLINE) PROGRAM**

Although continuous enrollment is not a requirement, both programs strongly recommend students to enroll in at least two courses per semester, for the duration of their studies. Unless prior approval or a leave of absence has been granted, students who do not enroll in any classes for two consecutive semesters may be administratively withdrawn from the B.H.Sc. and B.S.R.T. online programs. If a student is administratively withdrawn from one of these programs, he or she would be required to petition the department chair in writing for reinstatement in the program.
Leaves of Absence

Students who require a leave of absence for less than one year may return and continue their programs without reapplying to the university. If students have not registered for coursework for more than one year, they must reapply for admission, and their major program’s required curriculum will be reevaluated according to the requirements listed in the most current NSU Undergraduate Student Catalog. Students should note that any leave of absence may affect eligibility for financial aid and loan deferment.

If there is an interruption in studies of more than one calendar year from the end of the last semester enrolled, the student must abide by the NSU Undergraduate Student Catalog in effect upon return, or to requirements approved by the student’s academic department chair.

Dr. Pallavi Patel College of Health Care Sciences

A student seeking a voluntary leave of absence must submit the request in writing to their program director or department chair. The Dr. Pallavi Patel College of Health Care Sciences Leave of Absence Request Form can be found at https://healthsciences.nova.edu/forms/loa-request-form.pdf

Ron and Kathy Assaf College of Nursing

A student seeking a voluntary leave of absence must submit the request in writing to the program director. The program director will discuss the request with the dean and notify the student in writing whether a leave of absence will be granted and the conditions and timeframe under which the student may be able to return to school.

Military Leaves of Absence

Students in the military whether active, reserve, or National Guard desiring to take a leave of absence because of military deployment or changes in orders may request a leave of absence for the duration of the time indicated in their orders. To request a military leave of absence, students must contact and supply their academic advisor with a copy of the orders and complete a Student Action Request (SAR) form. Students in the Dr. Pallavi Patel College of Health Care Sciences must contact the Program Office, and Ron and Kathy Assaf College of Nursing students must contact their program director to provide a copy of the orders.

Students in the Dr. Pallavi Patel College of Health Care Sciences and the Ron and Kathy Assaf College of Nursing students should review the Leave Policy in their Student Handbook for more detailed information.

- Dr. Pallavi Patel College of Health Care Sciences Student Handbook: https://www.nova.edu/publications/chcs/chcs_student_handbook/

Student-Athlete Eligibility

Student Conduct—Academic Integrity

Students should refer to the full Code of Student Conduct and Academic Responsibility in the NSU Student Handbook (nova.edu/student-handbook). Conduct standards, supplementary standards, and university policies and procedures are handled by NSU’s Office of the Vice President of Student Affairs or by the individual colleges as deemed appropriate.

Nova Southeastern University has established clear expectations regarding student conduct and academic responsibility. When these standards are violated, significant disciplinary action can be expected, including expulsion from the university. Students are expected to abide by all university, college, and program rules and regulations as well as all federal, state, and local laws. Students are also expected
to comply with the legal and ethical standards of their chosen fields of study. Violations of academic standards are handled by the Office of the Dean in individual colleges and schools.

---

**ACADEMIC INTEGRITY IN THE CLASSROOM**

The university is an academic community and expects its students to manifest a commitment to academic integrity through rigid observance of standards for academic honesty.

**Academic Standards**

Excerpt from the NSU Student Handbook (nova.edu/student-handbook).

The university is an academic community and expects its students to manifest a commitment to academic integrity through rigid observance of standards for academic honesty. The university can function properly only when its members adhere to clearly established goals and values. Accordingly, the academic standards are designed to ensure that the principles of academic honesty are upheld.

The following acts violate the academic honesty standards:

1. **Cheating:** intentionally using or attempting to use unauthorized materials, information, or study aids in any academic exercise
2. **Fabrication:** intentional and unauthorized falsification or invention of any information or citation in an academic exercise
3. **Facilitating Academic Dishonesty:** intentionally or knowingly helping or attempting to help another to violate any provision of this code
4. **Plagiarism:** the adoption or reproduction of ideas, words, or statements of another person as one’s own without proper acknowledgment

Students are expected to submit tests and assignments that they have completed without aid or assistance from other sources. Using sources to provide information without giving credit to the original source is dishonest. Students should avoid any impropriety or the appearance thereof in taking examinations or completing work in pursuance of their educational goals.

Students are expected to comply with the following academic standards:

1. **Original Work:**
   
   Assignments such as course preparations, exams, texts, projects, term papers, practicum, etc., must be the original work of the student. Original work may include the thoughts and words of another author. Entire thoughts or words of another author should be identified using quotation marks. At all times, students are expected to comply with the university and/or academic program’s recognized form and style manual and accepted citation practice and policy.

   Work is not original when it has been submitted previously by the author or by anyone else for academic credit. Work is not original when it has been copied or partially copied from any other source, including another student, unless such copying is acknowledged by the person submitting the work for the credit at the time the work is being submitted, or unless copying, sharing, or joint authorship is an express part of the assignment. Exams and tests are original work when no unauthorized aid is given, received, or used before or during the course of the examination, re-examination, and/or remediation.

2. **Referencing the Works of Another Author:**

   All academic work submitted for credit or as partial fulfillment of course requirements must adhere to each academic program’s specific accepted reference manuals and rules of documentation. Standards of scholarship require that the writer give proper acknowledgment when the thoughts and words of another author are used. Students must acquire a style manual approved by their program and become familiar with accepted scholarly and editorial practice. Students’ work must comport with the adopted citation manual.

   At Nova Southeastern University, it is plagiarism to represent another person’s work, words, or ideas as one’s own without use of a center-recognized method of citation. Deviating from program standards (see above) are considered plagiarism at Nova Southeastern University.
3. **Tendering of Information:**
All academic work must be the original work of the student. Knowingly giving or allowing one’s work to be copied, giving out exam questions or answers, or releasing or selling term papers is prohibited.

4. **Acts Prohibited:**
Students should avoid any impropriety or the appearance thereof, in taking examinations or completing work in pursuance of their educational goals. Violations of academic responsibility include, but are not limited to the following:

- Plagiarism
- Any form of cheating
- Conspiracy to commit academic dishonesty
- Misrepresentation
- Bribery in an attempt to gain an academic advantage
- Forging or altering documents or credentials
- Knowingly furnishing false information to the institution

Students in violation will be subject to disciplinary action.

---

**ACADEMIC MISCONDUCT REPORTING, SANCTIONS, AND APPEAL**

---

**Academic Misconduct Reporting and Determination(s)**

Faculty members are committed to uphold the standards of academic integrity and do their utmost to prevent academic misconduct by being alert to its possibility. Faculty members are responsible for assessing classroom conduct including academic misconduct. If potential academic misconduct is detected, the faculty member communicates with the student to assess the incident. Faculty members are required to report any incident that is determined to constitute academic misconduct to their college administration. If the college administration agrees that the incident constitutes academic misconduct, the incident is reported to the College of Undergraduate Studies. The report is reviewed by the College of Undergraduate Studies for institutional sanction(s), which is distinct from a grading consequence administered by the faculty member.

The student has the right to continue in the affected course(s) during the entirety of the academic misconduct process. However, once the student receives the notification that the instructor has determined that the incident does constitute academic misconduct, the student is not permitted to withdraw or drop the course to prevent a grade penalty.

**Academic Misconduct Sanction(s)**

1. **Institutional Sanction(s):**

   Depending on the nature, severity and/or reoccurrence of academic misconduct, the institutional sanctions assigned by the College of Undergraduate Studies may include, but are not limited to, an academic misconduct warning, academic misconduct suspension, or academic misconduct dismissal. If a student receives a sanction of a suspension or a dismissal, a notation is placed on the student’s academic transcript.

   A first report typically results in a letter of warning, while serious infractions can result in institutional sanctions including suspension and/or dismissal. A subsequent report of academic misconduct will likely result in a more serious institutional sanction, such as suspension or dismissal. All incidents of misconduct retained on record will be disclosed to outside agencies and graduate/professional programs as required.

   Once an institutional sanction is assigned, the College of Undergraduate Studies will send the student correspondence notifying the student of their academic college’s determination of academic misconduct and the College of Undergraduate Studies’ assigned sanction. The College of Undergraduate Studies will also provide the student with information regarding his or her ability to appeal the determination and/or sanction.

2. **Additional Program, Major or College Sanctions:**

   Certain programs, majors, and colleges within the university reserve the right to follow a different process and/or apply a more severe sanction, which may result in immediate suspension or dismissal from that major, college, or program. A report of academic misconduct for a student in the Farquhar Honors College or the Dual Admission Program requires a review
meeting to determine whether the student’s status in that program should be terminated. Both programs have requirements of the highest standard of conduct.

Please refer to the Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing handbooks below for additional information regarding this process in related programs.

- Dr. Pallavi Patel College of Health Care Sciences Student Handbook: https://www.nova.edu/publications/chcs/chcs_student_handbook/

3. Grading Decisions:
Instances of academic misconduct will likely affect the student’s grade in the respective course. Any grading decisions related to academic misconduct are within the discretion of the course instructor. Students may appeal a classroom grade consequence of academic misconduct through the instructor and the academic department chair/director. Any grade imposed as the result of academic misconduct will remain on the student’s transcript indefinitely and will not be subject to course drop or withdrawal.

**Academic Misconduct Appeal(s)**

1. Appeal of an Academic Misconduct Determination
A student may appeal a determination of academic misconduct, in writing, within five (5) business days after notification from the College of Undergraduate Studies. An appeal of the academic misconduct determination must only address whether academic misconduct took place, not the assigned sanction, and must fall into one of the following:

- The student has new evidence or information that was not previously available.
- Proper procedure was not followed.
- The severity of the sanction does not relate appropriately to the violation.

The appeal of the academic misconduct determination must be submitted to the College of Undergraduate Studies, who will forward the appeal to the student’s academic college. The academic college will review and/or hear the appeal pursuant to the academic college’s specific policies and procedures. Please refer to the college-specific procedures for the applicable policies and procedures. The decision from the academic college related to the determination of misconduct is final.

2. Appeal of an Academic Misconduct Sanction
A student may appeal an academic misconduct sanction of suspension or dismissal, in writing, within ten (10) business days after notification from the College of Undergraduate Studies. The only recognized grounds for an appeal of a sanction are:

- The student has new evidence or information that was not previously available.
- Proper procedure was not followed.
- The severity of the sanction does not relate appropriately to the violation.

The appeal of the academic misconduct sanction must be submitted to the College of Undergraduate Studies, who will convene an Academic Integrity Committee (AIC) comprised of no fewer than two faculty members and one student. The AIC will not review appeals regarding academic misconduct determinations, nor will the AIC review instructor grading or evaluation of coursework.

Following review of the appeal, the AIC decides whether a revision of sanction is warranted. The decision from the AIC related to the sanction is final.

**Petition(s) for Permission to Enroll After Academic Misconduct Sanction(s)**

1. Petition for permission to enroll after academic misconduct suspension
Students who are suspended for academic misconduct may petition to re-enroll at NSU once they have served their sanctions, by submitting a request through their academic advisor to the College of Undergraduate Studies. No coursework completed at another institution during the period of suspension will be considered applicable to an NSU degree program.

If students have not registered for coursework at NSU for more than one year, they must reapply for admission and their major...
program’s required curriculum will be re-evaluated according to the most current NSU Undergraduate Student Catalog.

2. **Petition for permission to enroll after academic misconduct dismissal**

Students who are dismissed for academic misconduct may petition to re-enroll at NSU only after two or more years have elapsed following dismissal. This request must be submitted to the College of Undergraduate Studies, where the final decision will be made by the Dean or designee. No coursework completed at another institution during the period of dismissal will be considered applicable to an NSU degree program.

If students have not registered for coursework at NSU for more than one year, they must reapply for admission and their major program’s required curriculum will be re-evaluated according to the most current *NSU Undergraduate Student Catalog*.

---

**Student Health Insurance Requirement**

NSU requires all students to carry adequate health insurance coverage. Therefore, all NSU students will automatically be enrolled in the NSU Student Health Insurance Plan, and their student accounts will be charged when they register for classes. Students who reside and take classes outside of the United States are exempt from this requirement. Students who already have health insurance must opt out of the NSU Student Health Insurance Plan each academic year by the given waiver deadline for their program. For detailed information, including waiver deadlines, access to the online waiver, NSU Student Health Insurance Plan features, costs, and more, students should visit the Bursar’s website at [nova.edu/studentinsurance](http://nova.edu/studentinsurance).
**Tuition and Fees**

Students should refer to the *NSU Student Handbook* for more information about tuition payment policies and health insurance requirements. For students of the Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing, please also see next tables for more details about tuition and fees for your respective colleges.

Explaination of Tuition Rates

Traditional Day Program Tuition

Tuition and fee charges are automatically calculated when students register for classes. Students are expected to pay in full at the time of registration through SharkLink or their NSU eBill account. Detailed payment instructions and additional information on payment options is available on the Bursar’s website at nova.edu/bursar.

All students enrolling in 12–18 credit hours per semester pay flat-rate tuition in the fall and winter semesters based on total attempted credits. Students will not be charged additional tuition for adding classes as long as they do not go above the 18-credit hour limit. Students seeking to register for course loads above 18 credits must request permission from their division or department chair. Any student wishing to take in excess of 18 credits per semester is responsible to pay the flat rate ($16,755) plus $1,117 or each additional credit taken. Credits from which a student withdraws (no partial or full refund given) are counted as attempted credits. Credits that are dropped during the first week of class do not count as attempted credits for tuition purposes. Students enrolled in 1–11 credits will be charged per credit based on total attempted credits. Students who initially register for 1–11 credits, then add credits that increase their course load to 12–18 credits, will be charged the full flat-rate tuition. Students who officially drop courses and fall below 12 credits will have their tuition recalculated on a per-credit basis. Tuition for the Traditional Day Program during summer terms is charged per credit regardless of the number of enrolled credits.

Additional rate information can be found on “Tuition and Fees” section on page 77 of this catalog.

Minimum Enrollment Requirements

Extreme care and consideration should be taken when deciding to enroll in fewer than 12 credits per semester. Enrolling in fewer than 12 credit hours may reduce or eliminate scholarships, and institutional, federal, or other financial aid. A student enrolling in fewer than 12 credit hours (or dropping courses that results in fewer than 12 credits) is encouraged to speak with a financial aid counselor about the potential negative impact this decision may have on financial aid.

Course Remediation Cost—Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing

The cost of repeating a course in the Health Professions Division is not covered in the regular tuition. Students who are required to repeat a course will be charged the prevailing, per semester hour-rate at the time the course is being repeated.

Payment

PAYMENT POLICY

By registering for courses at Nova Southeastern University, the student accepts financial responsibility for payment. The student is responsible for the full balance on the account plus any additional costs which may be incurred by the university in the collection of these debts. Payment is due in full at the time of registration. The middle of each month, email notifications are sent stating that NSU eBills are available for review online. However, students should not wait for their billing statement to pay their tuition and fees to avoid late charges.

If a student has a balance at 30 days after the start of the semester, a hold and a $100 late fee will be placed on the account. The hold stops all student services, including but not limited to access to the university’s recreational facility (NSU RecPlex) and transcripts. A student will not be able to register until all outstanding balances from previous semesters have been paid in full. Holds must be cleared before the end of the drop/add period in order for a student to register.

On-Campus Residents

All on-campus residents must have satisfied their student account balance prior to their official check-in date. Account balances may be satisfied with anticipated financial aid awards and/or payment plans set up in NSU eBill. Students may view their student account status including account balance, charges, payments, and financial aid awards in SharkLink. Financial aid recipients must ensure that all
financial aid requirements have been fulfilled so that the financial aid awarded will be disbursed to the student’s account as scheduled. Financial aid requirements may include the completion of additional paperwork, an online Annual Student Loan Acknowledgment (ASLA), or for first time borrowers, a Master Promissory Note (MPN) and entrance counseling. The ASLA, MPN, and entrance counseling can all be completed online at studentaid.gov.

Students with balances must contact an ESS representative prior to their check-in date for payment, at (954) 262-5200 or (954) 262-3380.

Students will not be able to check-in to the residence halls until all requirements to satisfy their outstanding balance have been fulfilled.

**Students Using Veteran Affairs (VA) Educational Benefits**
In accordance with Title 38 US Code 3679 subsection (e) of the Veterans Benefits and Transition Act of 2018, Nova Southeastern University (NSU) will not impose a penalty on any student using veterans education benefits under Chapter 31 (Vocational Rehabilitation & Employment) or Chapter 33 (Post 9/11 GI Bill®) because of the individual’s inability to meet his or her financial obligations to the institution due to the delayed disbursement of funding from the Department of Veterans Affairs (VA). For more details, refer to NSU’s Pending Veterans Affairs Payment Policy at nova.edu/financialaid/veterans/process.html.

---

**METHODS OF PAYMENT**

NSU accepts Visa, MasterCard, and American Express. Check payments include traveler’s checks, cashier’s checks, personal checks, and money orders. International payments may be submitted by Flywire in any currency. International checks must be in U.S. funds only and drawn on a U.S. bank. Wire transfers are accepted. Electronic check and credit card payments can also be made through NSU eBill or SharkLink. Students can access NSU eBill using their SharkLink ID and password to authorize other individuals (e.g. parent, spouse, or grandparent) to view their bill and make payments to their account. Students may also mail a payment to the Office of the University Bursar or make payments in person at the One-Stop Shops on the NSU Fort Lauderdale/Davie Campus. For more details, visit nova.edu/bursar/payment/pay_my_bill.html.

---

**DECLINED PAYMENT POLICY**

NSU assesses a $25 declined payment fee for each declined payment, including installment payments that are part of a payment plan and payments made by check or credit card. A declined payment hold (1F) is placed on the account until the declined payment and assessed fee have been paid.

The Bursar’s Office reserves the right to refuse personal checks from students, whose previous check payments have been declined more than once. These students will be required to submit payment by money order, credit card, or certified check.

---

**NSU PAYMENT PLANS**

NSU students (with the exception of international students) who wish to defer payment of their tuition, fees, and other institutional charges, due at the time of registration, may sign up for an NSU payment plan in NSU eBill. For detailed information including eligibility criteria, enrollment periods, and more, visit nova.edu/bursar/payment/payment_plans.html.

---

**TUITION ASSISTANCE PLANS**

**Tuition Deferment**

Eligible students in the College of Computing and Engineering and the H. Wayne Huizenga College of Business and Entrepreneurship may participate in a corporate partnership/tuition deferment program. Students must verify employer eligibility with their academic advisors and complete the following steps upon registration:

- Send an email to studentaccts@nova.edu from their employer email address requesting deferment for the respective semester.
- Complete a deferment form provided by the Office of the University Bursar.
- Pay a $75 deferment service fee, along with applicable semester fees.
Provide a postdated payment (check or credit card authorization form) for the tuition portion. Payment of tuition charges is deferred for 5 weeks after completion of each course, not the semester.

**Tuition Direct Billing**

A student whose employer, sponsor, or guarantor has agreed to be direct-billed by NSU must notify the Office of the University Bursar accordingly. The student must complete the following upon registration:

- provide a voucher, financial guarantee, letter of credit or authorization from the respective payer with the amount and enrollment period for which funds are to be applied when charges are due at the time of registration.
- where applicable pay any amount due not covered in the billed party documentation no later than the start of the semester to avoid the assessment of late fees.

**Tuition Reimbursement**

Some employers/sponsors/guarantors make payments directly to the student under tuition reimbursement programs. These programs are between the student and the employer only. To avoid holds on the account, students must complete the following upon registration:

- Pay charges in full for the semester/term
- Send an email to bursar@nova.edu from their SharkLink (NSU) email account to request a receipt of paid charges

Please note that students under employer tuition reimbursement programs are not exempt from the university’s payment policy. Students must ensure that their accounts remain free from holds so that they may access their transcripts at the end of each semester for tuition reimbursement purposes.

**Florida Prepaid College Plan**

NSU accepts and bills the Florida Prepaid College Plan (FLPP) for tuition, fees, and on-campus housing costs. The plans are based on the tuition rates of the tax-assisted Florida public colleges and universities. The difference between NSU tuition, fees, and on-campus housing costs and the allocations through the Florida Prepaid College Plan is the sole responsibility of the student. If a student is on the unrestricted plan, the student must designate a dollar amount for up to the cost of tuition and fees. Students new to NSU must contact Florida Prepaid at 800-552-GRAD to authorize NSU for payment. For those students who have notified the Florida Prepaid College Plan that they are attending NSU, the Plan will automatically be billed based on the hours of enrollment after the drop/add period. A student may request changes to their FLPP by submitting a completed and signed Florida Prepaid College Plan Billing Request Form available on the bursar website at nova.edu/bursar/forms/. To learn more about the Florida Prepaid College Plan, visit myfloridaprepaid.com.

**Consequences for Nonpayment**

The student’s failure to meet financial obligations at the end of 30 days from the start of the semester, in accordance with university policy, will result in an email notification being sent to the student informing him or her of failure to resolve his or her financial obligation.

The Office of the University Bursar shall:

- notify students who have failed to meet their financial obligation after 30 days from the start of the semester;
- place a financial hold and late fee of $100 on the student’s account. A financial hold prevents a student from obtaining grades and transcripts, registering for classes, and accessing the university’s recreational facility (NSU RecPlex) until all outstanding balances are paid in full.

**Refund Policies**

**Refunds of Admission Deposits**

The $200 deposit paid upon admission to the Traditional Day Program is refundable if requested prior to the start of the semester by
May 1 for fall enrollment, and September 1 for winter enrollment.

Refunds of Tuition and Fees

Pro-rated tuition refunds are limited to the first three weeks of each semester according to the policies outlined below for each program. Non-attendance does not constitute an official drop. Students must formally drop courses in order to be eligible for a refund. Contact an academic advisor for assistance.

Please note that students must be officially registered prior to the start date of course(s) in order to participate in and receive academic credit for those courses. The “start date” is generally through the first week of the semester. Students are responsible for reviewing their registration and academic records each semester for accuracy. In extenuating circumstances, petitions for changes to course registration may be accepted up to 20 days after each semester ends.

Students will not be charged tuition for each course dropped in SharkLink by the end of the first week of the semester (drop/add period).

In order to drop classes after the official drop/add period, students must submit a Student Transaction Form to the Registrar’s Office, the One-Stop Shops (located in the Horvitz and Terry Administration buildings), or the program office.

The following applies:

- Drops through the seventh day of term in which the class begins: 100 percent
- Drops during the eighth through 14th day of term: 75 percent
- Drops during the 15th through 21st day of term: 50 percent
- Withdrawals after the 21st day of term: no refund

Processing of Refunds for Tuition and Fees

For tuition refund requests to be considered, students must provide written notification to their academic advisor. Refund amounts are based on the date of written notification, such as the date of sent email (must be from an NSU email account) or postmark for mailed requests. For general registration, drop/add, and withdrawal policies, refer to “Registration” section on page 68 of this catalog.

Refunds for Dismissed Students

Students who are expelled from NSU will not receive tuition refunds.

Refunds for Course Cancellations

The university reserves the right to cancel any course or section when registered enrollments are low. The university will refund 100 percent of tuition and any associated class fees for courses that are cancelled. If a student registered for only one course, the registration fee and student services fee will also be refunded.

Exceptions to Tuition and Fees Refund Policies

Refunds or credits to student accounts may be considered after the drop period if proof of extenuating circumstances exists. Students should contact their academic advisor with questions about extenuating circumstances. Requests for refunds must be made during the same semester in which courses are scheduled.

It is the student’s responsibility to provide all necessary documentation. Academic advisors will forward requests to appropriate directors for consideration. See also “Student Action Request (SAR)” section on page 66 of this catalog.

Financial Aid Refunds

Financial aid is intended to cover educational expenses. If the total amount of your financial aid award for the semester exceeds the institutional charges on your NSU student account, (e.g., tuition, fees, campus housing, NSU health insurance, meals), you may receive a financial aid refund. If you are eligible to receive a refund, you will be receiving your refund in the form of a check unless you have
completed a Direct Deposit Authorization or the account has been paid by credit card or gift card, in which case the excess credit will be returned to your card. Therefore, students are advised to retain any gift cards used to make payments. For detailed information about financial aid refunds, visit nova.edu/bursar/refunds/financial_aid_refunds.html.

**Force Majeure**

NSU’s duties and obligations to the student shall be suspended immediately, without notice, during all periods that the university is closed or ceases or curtails operations because of force majeure events including, but not limited to, any fire or any casualty, flood, earthquake, lightning, explosion, strikes, lockouts, prolonged shortage of energy supplies, riots or civil commotion, act(s) of God, hurricane, war, governmental action, act(s) of terrorism, epidemic, pandemic, or any other event beyond the university’s control. If such an event occurs, NSU’s duties and obligations to the student will be postponed until such time as the school, in its sole discretion, may safely reopen or resume operations. Under no circumstances, except as otherwise required by Federal or State statute, will NSU be obligated to refund any portion of tuition, housing, meal plans, fees, or any other cost or charge attributable to any location or service affected by any such force majeure event.

**Veterans’ Education Benefits**

Department of Veterans Affairs (DVA) educational benefits are designated to provide eligible individuals with an opportunity for educational and career growth. Eligible veterans and their dependents should contact the Veterans Benefits Administrator Office at (954) 262-7236, toll free 800-541-6682, ext. 27236, Monday through Friday, between the hours of 8:30 a.m. and 5:00 p.m., by email at vabenefits@nova.edu, or visit the office in the Horvitz Administration Building on the Fort Lauderdale/Davie campus. Detailed information is also available on the veterans education benefits web page at nova.edu/financialaid/veterans/. If you have any questions concerning eligibility, you may also contact the U.S. Department of Veterans Affairs (DVA) at 888-442-4551 or visit their website at va.gov.

**GRADE/PROGRESS REPORTS FOR STUDENTS RECEIVING VETERANS’ BENEFITS**

Nova Southeastern University furnishes each student with a Notification of Posting of Grade with instructions on how to view an unofficial transcript that shows current status of grades and earned semester hours for all courses completed and/or attempted, and grades for courses in which the student is currently enrolled. At the end of every evaluation period (e.g., term, semester) each veteran can request an official transcript which shows the current status of grades and earned semester hours for all courses completed and/or attempted. This transcript can be obtained from the One-Stop Shop in the Horvitz or Terry Administration Buildings or online at sharklink.nova.edu/ for a $10 fee.

**PENDING VETERANS AFFAIRS (VA) PAYMENT POLICY**

In accordance with Title 38 US Code 3679 subsection (e) of the Veterans Benefits and Transition Act of 2018, Nova Southeastern University (NSU) will not impose a penalty on any student using veterans education benefits under Chapter 31 (Vocational Rehabilitation and Employment) or Chapter 33 (Post 9/11 GI Bill®) because of the individual’s inability to meet his or her financial obligations to the institution due to the delayed disbursement of funding from the Department of Veterans Affairs (VA).

NSU will not:

- Prevent the student from attending or participating in the course of education during periods in which there is a delayed disbursement;
- Assess late payment fees if the financial obligation is fully funded by the Department of Veterans Affairs (VA);
- Require the student to secure alternative or additional funding for delayed disbursements;
- Deny the student access to institutional facilities and services (e.g. access to the University Center RecPlex, grades, transcripts, and registration) available to other students who have satisfied their tuition and fee bills.
Academic Resources and Student Services

Center for Academic and Professional Success

The Center for Academic and Professional Success (CAPS) at NSU empowers and supports the holistic development of students as they pursue their academic and professional goals.

Academic Advising Services

CAPS provides NSU students the individual attention needed to reach their academic goals. Students are coached on how to select the plan to successfully complete the requirements of their selected degree programs. Throughout a student’s undergraduate program, they can access CAPS services for support with changes of majors or minors, ensuring satisfactory academic progress, course selection, registration for each semester, and graduation planning and application. In addition, students have access to Navigate, a leading platform that serves to connect students with their NSU Support Network.

Career Development Services

CAPS provides NSU students the individual attention needed to reach their career goals. Students are coached on how to further explore their major while developing a competitive resume and cover letter, refining individual interviewing skills, selecting an internship, applying to graduate school and supporting overall career planning needs. In addition, students have access to Handshake, a cutting-edge career platform that serves as a career one-stop-shop.

Students in all undergraduate programs EXCEPT for Bachelor of Health Science, Bachelor of Science in Respiratory Therapy Post Professional (online) program, Bachelor of Science in Cardiovascular Sonography, Bachelor of Science in Medical Sonography, and Bachelor of Science in Respiratory Therapy First-Professional (on campus) Program, and those in the Ron and Kathy Assaf College of Nursing, receive Undergraduate Academic Advising services from their individual college/program. See section below for Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing.

Academic Advisors

Students entering NSU prior to Fall 2020 are partnered with an Academic Advisor to assist them with navigating their undergraduate academic program. Academic Advisors provide guidance in their planning and completion of required coursework, while challenging students to think about long-term academic and professional goals and how the coursework and experience they pursue at NSU fit into the “big picture” of personal and professional development. Students should maintain regular contact with their Academic Advisor throughout their NSU journey.

Experiential Education and Learning (ExEL) Career Advisors

Students entering NSU prior to Fall 2020 are partnered with an ExEL Career Advisor to assist with ensuring that they are setting themselves up to achieve their career goals after graduation from NSU. ExEL Career Advisors provide guidance in the planning and completion of ExEL experiences, while challenging students to think about long-term career goals and how these experiences fit into the “big picture” of personal and professional development. Students should maintain regular contact with their team of ExEL Career Advisor throughout their NSU journey.

Academic and Career Success Coaches (Edge Advisors)

Students entering NSU in Fall 2020 and beyond are partnered with an Academic and Career Success Coach, or Edge Advisors. Edge Advisors serve as their students’ single point of contact for all advising. Edge Advisors are assigned to students based on their area...
Employer Relations

The Employer Relations team provides an array of opportunities that enhances a student’s academic experience and cultivates their professional and personal development through employer programming including:

- Career and Internship Fairs
- Case Competitions
- Networking and Industry focused events
- Company Site Visits
- On-Campus Interviews
- Resume and Interview Critiques

Undergraduate Enrollment and Retention

Undergraduate Enrollment and Retention implements deliberating planning and develops undergraduate enrollment strategies. Using a web-based student performance monitoring system, the office tracks communication between faculty, students, and support staff. The office also monitors enrollment and helps proactively aid the development of programs, policies, and procedures that align with the institution’s retention goals and priorities to ensure student success. The office works closely with campus resources to promote persistence and degree completion.

For more information, contact the Center for Academic and Professional Success at (954) 262-7990 or caps@nova.edu, or visit nova.edu/caps.

Horvitz Administrative Building
First floor (Room 152) and Second floor (Room 252)
Phone: (954) 262-7990 | 800-541-6682, ext. 27990
Fax (954) 262-3709
Email: caps@nova.edu

Campus Life and Student Engagement

The Office of Campus Life and Student Engagement is home to the Student Events and Activities (SEA) Board, more than 130 registered undergraduate student organizations, the Inter-Organizational Council (IOC), the Diversity Student Council (DSC), Fraternity and Sorority Life, and the Undergraduate Student Government Association (USGA). This office hosts, and sponsors university-wide events such as the Student Life Achievement Awards, Sharkapalooza, Homecoming, FinsFootball and CommunityFest. CLSE is also responsible for our Sharks on the Scene (S.O.S.) Program, offering students exclusive discounted tickets to some of the largest events South Florida has to offer. Additionally, CLSE oversees the Diversity, Equity, Inclusion and Belonging Office. This office serves as a catalyst for the recognition and coordination of the celebration of our diverse student body and offers resources, support, and inclusive programing activities. CLSE plays a key role in assisting students to develop an affinity to NSU through engagement in organizations and activities related to their interests.

Dr. Pallavi Patel College of Health Care Sciences

Academic Advising and Administrative Support

Each student is required to contact the program director for academic advising prior to beginning the program. The program director and the department coordinator will advise and assist the student during his or her matriculation into the program. Students may communicate with the director and coordinator via phone, fax, email, or in person if they visit campus.

Department of Cardiopulmonary Sciences
Department of Health and Human Performance  
B.S. in Exercise and Sport Science

Department of Health Science—Cardiovascular Sonography  
Phone: (813) 574-5372

Department of Health Science—Online  
Phone: (954) 262-1239 for administrative support and (954) 288-9695 for academic advising

Department of Health Science—Medical Sonography  
Phone: (954) 262-1964

Ron and Kathy Assaf College of Nursing

A designated nursing faculty advisor will help students with course selections for each semester. Prior to selecting courses for the next semester, students should review all nursing program course requirements and tracking. All students are asked to meet with their designated nursing faculty advisor each semester, including the last semester of coursework prior to graduation.

Academic Advising
Entry B.S. in Nursing Programs:
Fort Lauderdale: (954) 262-1977
Fort Myers: (239) 274-3486
Miami: (305) 275-2628

Disability Services

The Office of Student Disability Services provides information and individualized accommodations to ensure equal and comprehensive access to university programs, services, and campus facilities. Information about requirements for requesting accommodations, by any student enrolled at the university, are available online through the office website. To obtain more information from the Office of Student Disability Services, please call (954) 262-7185, email disabilityservices@nova.edu, or visit our website at nova.edu/disabilityservices.

Enrollment and Student Services

Enrollment and Student Services (ESS) is comprised of the Office of Student Financial Assistance (OSFA), the Office of the University Registrar, the Office of the University Bursar, NSU Student Health Insurance, the One-Stop Shops in the Horvitz and Terry Administration Buildings, Enrollment Processing Services/Admissions Management Services, Transfer Evaluation Services, Health Professions Divisions (HPD) Office of Admissions, and SharkCard Services. Collectively, ESS's ultimate goal is to exceed the information and service needs of all NSU students.

Means of Communication with Students
ESS' official means of communicating with students is via SharkLink and NSU email. Students are encouraged to access SharkLink at https://sharklink.nova.edu to complete the following tasks:

- check their NSU email
- access their financial aid information
- request official transcripts and view unofficial transcripts
- view their student accounts
- make payments
- access their grades
- register for and drop courses
- view their course schedule
- access their online degree evaluation (Degree Works)
- obtain enrollment verification
- change their primary and mailing addresses and phone numbers
- apply for student employment jobs
- sign the Student Enrollment Agreement (SEA)

**Office of Student Financial Assistance**

The Office of Student Financial Assistance (OSFA) is dedicated to assisting students in making well-informed decisions regarding the funding of their education at NSU. The OSFA administers grants, scholarships, student employment, and loans, and prepares student financial aid award offers based on federal and state regulations and institutional guidelines. The OSFA provides information on the application processes for financial aid, student employment, and veterans educational benefits, and counsels students on proactive debt management strategies and financial literacy. The office also monitors student Satisfactory Academic Progress (SAP) for financial aid eligibility and awards scholarships from internal and external sources. Students may receive financial aid guidance in person, by email, or telephone. For more details, including contact information, visit nova.edu/financialaid.

**Office of the University Registrar**

The Office of the University Registrar offers a variety of services to the university community. These services include, but are not limited to, course registration, transcript processing, name and address change, loan deferment, enrollment and degree verification, grade processing, commencement, degree conferral, and diploma printing. The essential responsibility of the registrar’s office is to create, maintain, and protect students’ academic records as well as interpreting and upholding university policy. For more information, visit nova.edu/registrar.

**Office of the University Bursar**

The Office of the University Bursar is responsible for billing students, collecting and depositing payments, sending invoices and receipts, distributing student educational tax forms, issuing refunds from excess financial aid funds, and verifying students’ eligibility for financial aid funds. The office also assists borrowers of Federal Perkins and Health and Human Services Loans with repayment options. NSU Student Health Insurance is also housed within this office. For more information, visit nova.edu/bursar.

**One-Stop Shop**

The One-Stop Shop is the central point of contact for information and service for walk-in prospective, new, and continuing students. Staff members are cross-trained to answer inquiries about financial aid, registrar, and bursar functions. Students can submit financial aid documents, obtain enrollment verification, request official transcripts, and register for classes. Students can also obtain their SharkCard and parking permit at the One-Stop Shop which is conveniently located in the Horvitz and Terry Administration Buildings on the Fort Lauderdale/Davie Campus. Hours of operation are Monday to Thursday, 8:30 a.m. to 7:00 p.m.; Friday, 8:30 a.m. to 6:00 p.m., and Saturday (Horvitz Administration Building only) 9:00 a.m. to noon.

**Transfer Evaluation Services**

Transfer Evaluation Services (TES) assists prospective and current undergraduate students with services relating to the transfer of courses taken at other regionally accredited colleges and universities. For more information, visit nova.edu/tes.

**Financial Assistance**

**FINANCIAL AID CHECKLIST**

1. **Complete the FAFSA and NSU State Aid Application.**
   
   Students should complete the Free Application for Federal Student Aid (FAFSA) at studentaid.gov annually. It becomes available
The budget includes a housing and meal component. Students must ensure that they budget for these expenses, if they intend to live on campus.

4. Check your financial aid account regularly.

Students are expected to log in to SharkLink at https://sharklink.nova.edu and regularly check their financial aid status to ensure that there are no outstanding requirements. Students who must submit additional documents in order to be awarded financial aid will also be notified via NSU email.

5. Students must accept, decline, or modify loan and federal work-study award(s).

The financial aid award notice provides students with detailed instructions on how to accept, decline or modify their financial aid award. Loan awards are not disbursed, and students are not able to apply for student employment jobs in JobX until this step has been completed.

Students interested in receiving Federal Direct Loans are required to complete a Direct Loan Master Promissory Note (MPN) and entrance counseling at studentaid.gov. Beginning with the 2021-22 academic year, federal student loan borrowers will also be required to complete the Annual Student Loan Acknowledgment process. Each of these requirements can be completed at studentaid.gov.

7. Register for classes (early).

In order for students to receive any federal Title IV, state, and institutional financial aid, they must register for a minimum number of credits that are required for degree/certificate completion (degree-applicable) as published in the catalog from the year the student matriculated. Enrollment requirements for federal and state grants vary. Students awarded federal direct loans must be enrolled at least half time in degree-applicable courses to receive loans. Half-time enrollment is defined as 6 degree-applicable credits per semester for undergraduate students. Private loan enrollment requirements vary by lender. Students are to use NSU’s online degree evaluation systems Degree Works to keep track of completed and outstanding degree requirements when registering for courses. For more information, “Degree Works” on page 69.

---

**Federal Grants and Scholarships**

Grants and scholarships generally do not have to be repaid. However, if a student drops or withdraws from any classes for which financial aid has been received, the student may have to return funds. For more information on grants and scholarships, students should visit the financial aid website at nova.edu/financialaid.

---

**Institutional Scholarships**

There are numerous scholarships available to help students fund the cost of attending NSU. Generally, scholarships are awarded to students who meet particular criteria for qualification, such as academic achievement, financial need, field of study, talent, or athletic ability. The NSU scholarship website at nova.edu/financialaid/scholarships provides resources to help students locate and apply for scholarships. New scholarships are regularly added to the website.
Student Employment

There are four student employment programs:

- Federal Work-Study (FWS)
- Florida Work Experience (FWEP)
- Nova Southeastern University Student Employment (NSE)
- Job Location and Development (JLD)

NSE and JLD programs provide jobs to students regardless of financial need. Even though the JLD program is not need-based, students who wish to participate in the program must complete the FAFSA. FWS and FWEP are need-based and require the completion of the FAFSA. Students awarded FWS may participate in the America Reads/America Counts Programs through which students serve as reading or math tutors to elementary school children. For more information on NSU student employment, including information on how to apply for jobs and the Student Employment Manual, visit nova.edu/financialaid/employment/. New and exciting on- and off-campus jobs are available throughout the year.

Loans

A student loan, unlike a grant and work-study, is borrowed money that must be repaid with interest. Student loan repayment is a legal obligation. Before deciding to accept a loan, students should determine the amount that needs to be repaid on the loan. Beginning with the 2021-22 academic year, federal student loan borrowers are required to complete the Annual Student Loan Acknowledgment (ASLA) each year. The ASLA informs borrowers what they owe or could owe in federal student loans and is individually tailored toward first-time and current loan borrowers to help provide details surrounding loan status and forecasts of estimated monthly payments.

For detailed information on loans available to students, visit the financial aid website at nova.edu/financialaid/undergraduate/loans.

Return of Title IV Funds

Any student who withdraws from all Title IV eligible courses within an academic semester may be required to return unearned financial aid funds. The Return of Title IV Funds regulation is based on the premise that students “earn” financial aid for each calendar day that they attend classes. Students are strongly encouraged to consult with a financial aid counselor before dropping or withdrawing from courses so that they may be prepared for what may happen to their financial aid. For complete information on the Return of the Title IV Funds, please review nova.edu/financialaid/apply-for-aid/title-iv-return.html.

Satisfactory Academic Progress (SAP)

In order to receive financial assistance, a student must continually meet Satisfactory Academic Progress (SAP) requirements established by the Department of Education. These progress requirements include the following four criteria: quantitative (annual credits), qualitative (grade point average), maximum time frame (total allowable credits, and pace (overall credits completed).

In order to maintain SAP for eligibility for state aid, such as the Florida Bright Futures Scholarship and the Effective Access to Student Education (EASE) Grant, students must meet additional requirements. State aid SAP requirements are published at nova.edu/financialaid/eligibility/sap-standards.html.

Students who fail to meet SAP during the 2021–2022 academic year will not be eligible for Title IV federal and Florida state financial aid during the 2022–2023 academic year. Comprehensive information is available on the financial aid website at nova.edu/sap/.

NSU Student Handbook

The NSU Student Handbook addresses general university policies for NSU students, including student life, student rights and responsibilities, university policies and procedures, and NSU resources. The NSU Student Handbook can be viewed at nova.edu/student-handbook.
For Health Professions Division (HPD) students in the Dr. Pallavi Patel College of Health Care Sciences and Ron and Kathy Assaf College of Nursing, please also refer to your college’s student handbook for more information specific to your respective colleges.

- Dr. Pallavi Patel College of Health Care Sciences Student Handbook: https://nova.edu/publications/chcs/chcs_student_handbook/

Office of International Affairs (OIA)

The Office of International Affairs (OIA) serves as a base for the university’s international initiatives. OIA provides ongoing assistance and support for all members of the university community engaged in campus internationalization, global partnerships and exchanges and other globalization efforts. Under the OIA umbrella there are three offices:

**Office of International Undergraduate Admissions**

The Office of International Undergraduate Admissions (OIUGA) provides comprehensive international student recruitment and admissions support for prospective international undergraduate admissions. This includes all Puerto Rican students, all prospective students who are non-US citizens, and all prospective undergraduate students living abroad. Refer to “International Students Admissions” section on page 49 of this catalog for additional information.

**Office of International Students and Scholars**

The Office of International Students and Scholars (OISS) is committed to welcoming international students, scholars, and their families while facilitating their transition to life in the United States and at Nova Southeastern University. Specifically, OISS provides immigration assistance to international students and their dependents on F visas and exchange visitor scholars and their dependents on J visas. OISS is committed to providing timely, thorough, and accurate information to enable international students and scholars to maintain valid immigration statuses and achieve their educational objectives.

- **Admitted students**: OISS communicates with admitted students regarding the process and required documentation for I-20 and DS-2019 issuance and provides pre-arrival support.
- **New Students**: OISS facilitates online and in-person International Student Orientations each semester.
- **Continuing students**: OISS communicates regularly with students regarding immigration regulations and requirements. OISS offers workshops and events for international students and promotes opportunities for international students to share their cultures with the entire NSU community. International student advisors within OISS provide walk-in and by-appointment immigration advising to enable students to maintain their valid immigration status.
- **Graduating students and alumni**: OISS supports graduating international students and their alumni through the Optional Practical Training (OPT) and STEM OPT application and reporting process.

Additional information and resources for international students and scholars are available at nova.edu/internationalaffairs/students/. Questions may be directed to intl@nova.edu or (954) 262-7240.

**Office of Education Abroad**

The Office of Education Abroad (OEA) provides comprehensive assistance to all students who wish to travel abroad on any of the many international travel experiences offered at the institution including summer, semester, and academic year study abroad programs, faculty-led travel study programs, international internships, and international service learning opportunities. Nova Southeastern University is committed to providing students with study abroad opportunities, the flexibility to earn college credit at a university abroad, and receive financial assistance.

**All International Travel by NSU Students, Faculty, and Staff**

NSU faculty, students, and staff travel across the globe to teach, conduct research, present at seminars and workshops, attend conferences, and study. The university maintains a central international travel registration program that assists travelers on NSU related
business or study with the assessment of health and safety issues associated with traveling to international destinations, and provides important contact information for services and assistance in the event of an emergency.

As per university policy, all faculty, staff, and students traveling to international destinations on NSU-related trips are required to complete the NSU Travel Registration process. Pertinent international travel information including a country’s risk rating is available at nova.edu/internationalaffairs/travelreg.

Study Abroad

Participation in approved NSU study abroad programs allow NSU students to take courses at foreign institutions and earn credit which can be transferred back to fulfill requirements toward an NSU degrees. All expectations are outlined in the Sharks Abroad Canvas course. Students will be enrolled in this course upon receiving their NSU approval to study abroad.

- **Application and Deadlines:** In order to be approved to study abroad, a student must submit the NSU Study Abroad Application by the posted deadline. Summer, fall, and academic year programs have a deadline in early March and winter and spring programs have a deadline in October. Applications are reviewed by staff within the Office of Education Abroad and approvals are granted following consultation with the assistant dean of student development, the student’s academic advisor, and premier program coordinators, as appropriate. Students should not apply externally until their internal NSU Study Abroad Application has been approved. Some external program application deadlines are prior to the NSU application deadline so students should plan ahead to ensure they are able to meet both deadlines.

- **Pre-Departure Requirements:** In order for a study abroad program to be fully approved, students must complete all mandatory pre-departure requirements including the submission of all required documents, the successful completion of all required financial aid and credit transfer paperwork, and completion of the mandatory pre-departure orientation. Students who fail to complete all mandatory pre-departure requirements will not have their participation approved by the Office of Education Abroad which will impact a student’s ability to utilize financial aid and/or have study abroad credits transferred back to NSU.

- **While Abroad and Re-Entry Requirements:** Students who have been approved to study abroad are expected to remain in contact with the Office of Education Abroad throughout the duration of their program and upon re-entry back to NSU.

Additional information regarding financial aid availability, the credit transfer process, and program destinations is available at nova.edu/sharksabroad. Questions may be directed to NSU's Sharks Abroad team at sharksabroad@nova.edu.

Travel Study

Several NSU colleges, in cooperation with the Office of Education Abroad, offer organized faculty-led travel study programs that are part of established courses and may satisfy specific major, minor, and/or general education elective requirements. A current listing of travel study courses is available at nova.edu/internationalaffairs/travel-study-abroad/travel-study. Additional information regarding application deadlines, payments, and pre-departure is available at nova.edu/sharksabroad. Questions may be directed to NSU’s Sharks Abroad team at sharksabroad@nova.edu.

Orientation

The Office of New Student Orientation creates orientation programs for first-year undergraduate students and transfer students who will attend class on NSU Fort Lauderdale/Davie campus. Orientation is designed to connect students to educational and social programming, involvement opportunities, and university resources. New students and their families will be prepared for their transition into the Nova Southeastern University community. All new undergraduate students must attend an orientation prior to beginning their first semester at NSU.

To learn more about specific orientation programs and to sign up to attend, visit nova.edu/studentorientation, call (954) 262-8050, or email orientation@nova.edu.

Other Orientations

**Nursing Program**

Nursing students should connect with the Ron and Kathy Assaf College of Nursing for more information on upcoming orientations. Nursing orientations are offered at the Fort Lauderdale/Davie, Fort Myers and Kendall campuses.
Bachelor of Science in Cardiovascular Sonography
Orientation for the Bachelor of Science in Cardiovascular Sonography is held at Tampa campus.

For more information, visit https://healthsciences.nova.edu/healthsciences/sonography/orientation.html.

Bachelor of Science in Respiratory Therapy First Professional program (entry-level)
Orientation for the Bachelor of Science in Respiratory Therapy First Professional is held at the West Palm Beach Campus.

Bachelor of Science in Respiratory Therapy Post-Professional completion program (online)
and Bachelor of Health Science completion program (online)
Students are not required to attend an on-campus orientation. Students are oriented to their programs via an online format.

Students should connect with their respective college to receive more information for upcoming orientations.

Technical Help
The Help Desk is dedicated to serving the NSU community from enrollment to graduation and beyond. Help Desk services include, but are not limited to, computer and browser configuration for NSU online resources; SharkLink account support; academic specified program installations; email configuration; basic network troubleshooting and configuration, and mobile device support. For technical help, call (954) 262-4357; 800-541-6682 ext. 24357; or email help@nova.edu.

Tutoring and Testing Center (TTC)
The Tutoring and Testing Center (TTC) supports the academic progress of all NSU students. Supplemental learning assistance and a variety of testing services are provided in a supportive and professional environment that enhances the ability of all students to meet educational goals, achieve academic excellence, and enhance personal growth.

Tutoring Services
Students can receive one-on-one tutoring in subject areas that include mathematics and science. Tutoring sessions are offered in 45-minute increments. These sessions are designed to be interactive and students are expected to bring attempted assignments with them to the appointment. Math and science tutors clarify and reinforce specific topics. Our office staff uses a student-centered holistic approach, which considers the “whole student” when discussing academic success strategies. Students can also access academic support through drop-in tutoring at a variety of locations across campus. Additionally, our Academic Success Coaches work with students to help reinforce skills in study strategies, time management, and test preparation. For more information, please call (954) 262-8350 or visit our website at nova.edu/tutoring-testing/tutoring-services/.

Testing Services
Testing Services also facilitates faculty make-up exams and accommodations for students with documented disabilities. Other credit-bearing examinations available to students are the College-Level Examination Program (CLEP), DSST - DANTES subject standardized tests, and New York Proficiency Testing in Foreign Languages. All exams are by appointment. For more information, please call (954) 262-8374 or visit our website at nova.edu/tutoring-testing/testing-services/.

Supplemental Instruction
Supplemental Instruction (SI) is a peer-led student academic enrichment program that offers free, weekly, and organized group study sessions outside of class for select historically difficult courses. These study sessions are facilitated by SI Leaders who are nominated by faculty members for their leadership ability and content mastery. All SI Leaders are current NSU undergraduate students who have previously taken and mastered the course and have the skills and training to help guide others through course material. For more information, please call (954) 262- 8391 or visit our website at nova.edu/tutoring-testing/supplemental-instruction/.
Veterans Resource Center

The NSU Military Affairs Veterans Resource Center is the centralized location for resources and services for veterans and military affiliated students. Our mission includes the facilitation of academic success, supporting university and community engagement, professional development, and ultimately graduation and career attainment. Located in the Carl DeSantis Building, room 1045, the VRC is a home away from home that offers the following:

- Assistance with VA educational benefits and military commissioning scholarships and programs
- Lounge, meeting, and study area with a computer lab with free printing
- Veteran specific programming with university and community engagement opportunities
- Academic drop-ins from Career Development, Tutoring and Testing Center, The Writing Center, and Success Coaches
- Bi-weekly Speaker Series on topics to include VA benefits, Pro-bono Veteran Legal Assistance, and Financial Planning
- Home of the SVA Student Group: Freedom Sharks

For more information about NSU’s Veterans Resource Center, find us at nova.edu/veterans, email us at vrc@nova.edu, or call (954) 262-FLAG (3524).

Write from the Start Writing and Communication Center (WCC)

The NSU Write from the Start Writing and Communication Center (WCC) is an innovative workspace where students, consultants, and faculty from all disciplines come together, in person and online, to discuss and develop writing and communication skills.

Located on the 4th floor of Alvin Sherman Library, the WCC offers all NSU students one-on-one assistance at any stage of the process, from brainstorming through final editing. WCC consultants help students develop and strengthen general writing and communication skills during face-to-face or online consultations.

Services include assistance on academic projects (essays, lab reports, theses, dissertations); digital projects (presentations, posters, infographics); professional projects (articles for publication); personal projects (creative writing); and oral presentations.

For more information or to make an appointment, students can visit the WCC website at nova.edu/wcc or call (954) 262-4644.
General Education Program

The General Education Program is designed to foster critical skills by helping students develop the ability to solve problems, think analytically, and communicate clearly. The program provides a common connection among all NSU undergraduates through a rigorous set of writing; mathematics; arts and humanities; and social, biological, and physical science requirements. As a result of the General Education Program, students develop effective communication skills in speaking, listening, writing, reading, and critical interpretation. The program also helps students place ideas in their proper context and appreciate the role of different cultural traditions.

General Education Program Mission Statement

The NSU General Education Program prepares students to be responsible citizens in a dynamic, global environment with a commitment to independent and continuous learning.

General Education Program Framework

All students are required to complete general education requirements. Students normally complete general education requirements by the end of their junior year through a series of courses in the areas of written communication; mathematics; arts and humanities (including literature, history, ethics, and the performing arts); social and behavioral sciences; and biological and physical sciences.

Using General Education Credits for Major and Minor Requirements

Most courses may count toward both general education and major/minor requirements. Students should refer to their program curriculum and consult their academic advisor to determine which courses serve both sets of requirements.

GENERAL EDUCATION LEARNING OUTCOMES

Upon successful completion of the General Education Program, students are expected to:

1. Demonstrate an understanding of and appreciation for the various methods utilized in a variety of arts and humanities disciplines
2. Delineate the means by which different scholarly fields reflect, interact with, and influence human thought, culture, and values
3. Demonstrate knowledge of fundamental mathematical principles and concepts
4. Achieve basic quantitative literacy to interpret quantitative data into meaningful terms and understand relationships between sets of quantitative data
5. Apply methods of scientific inquiry
6. Achieve basic scientific literacy to make informed decisions on contemporary consumer or social issues
7. Understand and appreciate the role of the individual in a group
8. Understand the major concepts and methods used by social or behavioral scientists to investigate, analyze, or predict human or group behavior
9. Express ideas clearly and coherently
10. Use the English language effectively to construct logical and persuasive arguments

GENERAL EDUCATION REQUIREMENTS

Nova Southeastern University requires that undergraduate students complete 30 credit hours as part of the General Education Program. All students are encouraged to begin the Written Composition and Mathematics requirements during their first semester. Some majors have determined specific courses to be used to satisfy general education requirements. Students should contact their academic
advisor to determine their major’s specific general education requirement list. Honors courses (with the HONR prefix) may be used to satisfy general education requirements of the appropriate general education section. Students should refer to the "Undergraduate Course Descriptions" for specific course prerequisites.

Equivalent courses taken prior to enrollment at NSU at a regionally accredited community college or university may be considered for a transfer of credit to fulfill a program’s general education requirements.

<table>
<thead>
<tr>
<th>General Education</th>
<th>Credits</th>
</tr>
</thead>
<tbody>

* Some majors may require more than 30 general education credits due to specific courses needed to complete the degree.
Experiential Education and Learning

Office of Experiential Education and Learning

At Nova Southeastern University, Experiential Education and Learning (ExEL) provides students opportunities to prepare them for an ever changing and diverse world. The purpose of experiential education is to actively engage students through relevant, ongoing experience, active learning, critical problem solving, and reflective practices.

Entering first-time-in-college (FTIC), undergraduate students will be required to earn six qualified experiential education (ExEL) units for graduation.

Students should work with their Edge Advisor to include curricular and co-curricular experiential education opportunities in their plan of study. Students are encouraged to engage in a diverse number of opportunities offered through the ExEL program.

Please visit the ExEL website at nova.edu/academic-affairs/experiential-learning for an up to date listing of all ExEL designated coursework, co-curricular opportunities and further information about the ExEL program.

First-Year Experience Requirement (UNIV 1000)

All first-time-in-college students are required to complete the First-Year Experience (UNIV 1000) course in their first semester of attendance at NSU. This course introduces first-year students to fundamental expectations of college learning and the range of opportunities and experiences both in and outside the classroom that Nova Southeastern University provides. The course promotes student success by fostering academic inquiry and knowledge of essential resources that facilitate a successful transition to college life. This course develops the foundation that serves as a pathway to graduation and a thriving professional career. Upon successful completion of this course, students will earn one ExEL unit towards their graduation requirement. If a student does not successfully complete the UNIV1000 course in their first semester, it is recommended that they complete the course during the following winter semester. Students should contact their academic advisor if they have any questions.
Abraham S. Fischler College of Education and School of Criminal Justice
Abraham S. Fischler College of Education and School of Criminal Justice

Dean’s Message

Congratulations on your decision to join NSU’s Abraham S. Fischler College of Education and School of Criminal Justice (FCE&SCJ). As the Dean it brings me great pleasure to welcome you into the Fischler Family.

At FCE&SCJ, we are committed to creating academic programs that serve the needs of our students and the community in which we live. We offer undergraduate majors and minors in education, criminal justice, and human services. In addition, the Fischler Academy offers highly qualified first-time freshman students, a dual admission (Bachelor to Master), experiential learning, premiere teacher preparation program option, in various concentration areas; while our traditional programs continue to offer the variety and flexibility to meet the needs of our varied student body. We are proud to offer a minor in Military Science and Leadership (ROTC) and we are very pleased to introduce the new major in Child Development.

By choosing to pursue your goal of higher education, you have taken another important step towards personal fulfillment, career advancement, and global citizenship. Throughout the course of your studies, we hope you will gain knowledge and insights that will allow you to grow as a scholar, a teacher, a student, and an advocate. Every interaction, every event, will provide you with an opportunity to grow in one of these areas; take each opportunity to heart, for it is through embracing our many roles in this world that we find the greatest opportunities to make positive and lasting impacts.

As you progress through this new and exciting journey, always keep your goal in sight; let it shape your path. There may be challenges ahead; we will be here to guide you through them. You will experience great triumphs; we will be here to celebrate them with you. You are now a member of the Abraham S. Fischler College of Education and School of Criminal Justice. With each step you take, count on your Fischler Family to help you along the way.

Kimberly Durham, Psy.D.
Dean

Mission Statement

Working to educate learners, the Abraham S. Fischler College of Education and School of Criminal Justice comprises a global professional learning community dedicated to teaching, service, and scholarship with integrity. The College is committed to offering technology-rich, student-centered educational experiences. High quality online, blended, and traditional learning are the hallmark of the College. Courses and programs stress dynamic professional practices that promote inquiry and reflection using an applied, theory to practice, approach. Students are prepared to lead change in diverse communities with emphasis on fostering equity, cultural awareness, and social responsibility.
Introduction to the College

At the Abraham S. Fischler College of Education and School of Criminal Justice (FCE&SCJ), we are dedicated to the enhancement and continuing support of education, criminal justice, and human services professionals throughout the world. The college fulfills this commitment by serving as a resource for teachers and leaders and preparing them to accept changing responsibilities within their own organizations.

Consistent with the philosophical views of individual development, motivation, and leadership, FCE&SCJ is committed to preparing students for their responsibilities as professionals who hold themselves to high ethical standards and are able to successfully meet the needs of individuals and organizations in a culturally and globally diverse society.

Council for the Accreditation of Educator Preparation (CAEP) Program Approvals

The Elementary Education and Exceptional Student Education majors in the Department of Education Undergraduate Education Programs are CAEP accredited and approved through the CAEP SPA (Specialized Professional Association) review.

Bachelor of Science

Undergraduate Programs of Study

The Abraham S. Fischler College of Education and School of Criminal Justice offers a bachelor of science in the following academic programs:

Majors:

- Child Development
- Criminal Justice
- Education
- Education with a Concentration in Computer Science Education
- Elementary Education—ESOL/Reading Endorsements (Florida Approved)
- Exceptional Student Education—ESOL Endorsement (Florida Approved)
- Human Services Administration

The Fischler Academy Majors:

- Child Development
- Education
- Education with a Concentration in Computer Science Education
- Elementary Education—ESOL/Reading Endorsements (Florida Approved)
- Exceptional Student Education—ESOL Endorsement (Florida Approved)
- Secondary Biology Education (Florida Approved)
- Secondary English Education—ESOL Endorsement (Florida Approved)
- Secondary Math Education (Florida Approved)
- Secondary Social Studies Education (Florida Approved)

Minors:

- Criminal Justice
- Education
Military Science and Leadership: Army Reserve Officer Training Corps (ROTC)
Physical Education

Razor’s Edge Premier Programs:
- Experiential Leadership Minor
- Global Engagement Minor
- Research Studies Minor
- Shark Teach Scholars Program

Credential Coursework:
- Child Development Associate Credential (CDA)
- Florida Director Credential

Add-On Endorsement:
- Driver Education Add-On Endorsement

---

Meeting Facilities

Nova Southeastern University utilizes classroom facilities in accordance with local health, fire, and safety standards. All facilities are selected on the basis of their conduciveness to learning.

---

Form and Style Guidelines for Student Writing

The current edition of the *Publication Manual of the American Psychological Association* is the official style guide used for all written works at the Abraham S. Fischler College of Education and School of Criminal Justice. All students must adhere to the form and style requirements outlined by the APA style guide.
Department of Education

The Department of Education Undergraduate Education Programs includes Bachelor of Science degrees in Education, Elementary Education with ESOL/Reading Endorsements, and Exceptional Student Education with ESOL Endorsement as well as minor areas of study. In addition, the Bachelor of Science degree in Education offers a concentration in Computer Science Education. Also, the Fischler Academy offers all of the degrees listed above, plus Secondary Biology Education, Secondary English Education with ESOL Endorsement, Secondary Math Education, and Secondary Social Studies Education.

Bachelor of Science Programs

The Department of Education Undergraduate Education Programs at Nova Southeastern University offers Florida state—approved programs that are proactively designed to address the current and future needs of educators. The aim is to prepare developing professionals with knowledge of content and pedagogy, professional dispositions, and skills for entry into the teaching profession.

DEPARTMENT OF EDUCATION UNDERGRADUATE PROGRAMS GOALS

The Department of Education Undergraduate Education Programs remain committed to the following goals.

1. Provide a quality, nationally accredited, state-approved, teacher preparation program that incorporates best practices of teacher preparation.
2. Enhance the quality and the consistency of program delivery on all campuses, and online.
3. Share up-to-date information on the state-approved teacher education program procedures, particularly those related to teacher candidates’ attainment of the teacher education standards.
4. Support teacher candidates during their field experiences and clinical practices.
5. Ensure there are adequate resources for adjunct and full-time faculty members to improve the quality of instruction and provide opportunities for professional development. Success in this area is also dependent upon communication between full-time faculty members and adjunct instructors at the campuses.
6. Collaborate with school districts and communities to assess their needs and identify opportunities toward delivery of specially designed academic programs.
7. Respond to the state, professional, federal, and international demands related to teaching.

Educator Certification Requirements

In Florida, candidates graduating from a state-approved program and who have passed all portions of the Florida Teacher Certification Exam (FTCE), or the Florida Educational Leadership Exam (FELE), are eligible for a professional or temporary certificate or endorsement. Actual teacher certification or endorsement is awarded by the Florida Department of Education.

A state department of education reserves the right to change requirements leading to certification/licensure at any time. Consequently, NSU reserves the right to change requirements in a state-approved program, with or without prior notice, to reflect new state mandates.

Some Nova Southeastern University programs may not meet a state’s certification and/or licensure requirements. Before beginning any program, applicants should contact the specific state department of education for requirements and current information regarding teacher certification/licensure.

Students who have been awarded a statement of eligibility by the Florida Department of Education, assume full risk in interpreting the letter of eligibility needs; therefore, NSU recommends that certification-only students discuss anticipated course offerings with the Teacher Certification Office of the Florida Department of Education, and/or the local school district certification office before registering for any courses.

The following information is provided in compliance with recent United States Department of Education regulations. Students enrolled in online programs and residing in states other than Florida should visit nova.edu/academics/distance-education.html for state-specific distance education disclosures and the student complaint process.
Certification through Course-by-Course Analysis by
the Florida Department of Education

Courses are offered for students who already hold a bachelor’s degree in fields other than education and who desire to obtain certification in specific content areas (see programs of study). Before registering for courses, individuals who are not already full-time students and who are seeking courses that may lead to certification can be admitted to NSU as non-degree-seeking students. Certification-only students assume full risk in interpreting the letter of eligibility needs. NSU recommends that certification-only students discuss anticipated course offerings with the Teacher Certification Office of the Florida Department of Education, or the local school district certification officer, before registering for any courses.

The Florida Department of Education address:

Florida DOE Bureau of Educator Certification
Turlington Building, Suite 201
325 West Gaines Street
Tallahassee, Florida 32399-0400
Website: www.fldoe.org/edcert
Email: EdCert@fldoe.org

Phone Services:
U.S. Domestic: 800-445-6739
Outside U.S.: 850-245-5049

Professional Licensure

The Department of Education Undergraduate Education Programs are licensed by the Florida Department of Education. The requirements for educator and administrator certification, licensure, or endorsement differ from state to state. Some states do not grant initial certification/licensure unless transcripts are endorsed as having met that state’s approved program requirements.

Before beginning any program, prospective students are encouraged to research the requirements in their intended state of residence to ensure that their enrollment in a program will meet the requirements of their state’s licensing agency. Information to assist you in identifying the appropriate state licensing/certification entity is provided at https://www2.ed.gov/about/contacts/state/.

Requirements

Matriculation Requirements

Each semester, the Department of Education Undergraduate Education Programs reviews the academic transcripts of all students enrolled in a state-approved teacher education major. Students are required to apply for admission into the teacher education majors. This will include students who have already been admitted at the university level. It is the student’s responsibility to work with his or her academic advisor to meet the matriculation requirements. Upon meeting the conditions of matriculation into the Department of Education Undergraduate Education Programs, students will be declared teacher candidates. Students who do not meet the admission/matriculation requirements will be unable to register for teacher education courses until the matriculation requirements are met.

1. Students must comply with the admission requirements established by the Nova Southeastern University Office of Undergraduate’s Admissions.
2. Students must earn a grade of C or better in COMP 1500, COMP 2000, MATH 1040, and MATH 1050 or their equivalents.
3. Students must earn a cumulative GPA of 3.0 or higher.
4. All students must submit documentation that the testing requirement (General Knowledge Test [GKT] has been met before registration of education courses in the teacher candidate’s junior year). Per the Florida Statutes, the College Level Academic Skills Test (CLAST) may no longer be used to meet the general knowledge-testing requirement.
5. Students may be required to successfully complete a one-page essay related to teacher dispositions as part of the matriculation process.
6. All teacher candidates who wish to enter a Pre-K-12 classroom are required to obtain a security clearance (fingerprint/background check) from their respective school district. Obtaining and maintaining security clearance is the teacher candidate’s professional responsibility. Security clearance should be obtained as required by the local school district. Security clearance obtained through private sectors will not be allowed as proof of clearance. Directions for obtaining security clearance can be found on the Office of Placement Services Website at https://education.nova.edu/students/current-students/gtep/how-to-get-a-field-placement.html

---

**Testing Requirements**

**Florida**

Passing the General Knowledge Test (GKT) is a requirement for admission into any state-approved teacher education program. The appropriate GKT sections are Reading, English Language Skills, Mathematics, and Essay. The Fischler College of Education and School of Criminal Justice Department of Education Undergraduate Education Programs offers state-approved teacher education programs; therefore, the testing requirements apply. Florida teacher candidates are also required to pass the Professional Education Test and the Subject Area Examination subtests of the Florida Teacher Certification Examinations (FTCE) in order to begin the clinical practice (internship). It is the teacher candidate’s responsibility to register and pass all of the Florida Teacher Certification Examinations which include the GKT, Professional Education Test, and the Subject Area Examination to complete program requirements. Florida Teacher Certification Examination (FTCE) test scores (General Knowledge Test, Professional Education Test, and Subject Area Examination) remain valid for 10 years after the date of which they were passed. Teacher candidates who have FTCE test scores older than 10 years must retake the test prior to beginning their clinical practice (internship). Students are responsible for designating Nova Southeastern University as a recipient of the score report. Official score reports must be submitted directly from the testing center to Nova Southeastern University Abraham S. Fischler College of Education and School of Criminal Justice prior to degree conferral and commencement participation. Unofficial score reports submitted by students will not be accepted. Students are recommended to consult with their academic advisor and the Program’s Office of Placement Services regarding current testing requirements.

**Prior to Clinical Practice (Internship)**

Florida teacher candidates must pass the GKT, Professional Education Test, and Subject Area Examination to be accepted into the clinical practice (internship). It is recommended that the Professional Education Test be taken upon completion of all courses with an EDUC prefix. In addition to passing the GKT, Subject Area Examination and Professional Education Test, acceptance into the clinical practice (internship) is dependent on skill level mastery as evidenced by the completion of the key assessments/critical tasks (please see the “Assessment System” below for more information).

**Assessment System**

The requirements of the Florida state-approved teacher education programs provide learning opportunities for teacher candidates to acquire and document mastery of teacher education standards including but not limited to the Interstate Teacher and Support Consortium (InTASC) Standards, Florida Educator Accomplished Practices (FEAPs), and Council for the Accreditation of Educator Preparation (CAEP) standards. Mastery of the standards prepares teacher candidates for entry into the profession and to be successful educators in their future classrooms. The courses within the various majors have been designed to facilitate teacher candidates’ attainment of the standards, and candidates document their attainment by the completion of key assessments/critical tasks.

As teacher candidates complete the key assessments/critical tasks in their coursework, their performance is graded using a rubric that identifies the criteria and gradations of quality for the assessments/tasks. At the completion of the course, the course instructor records the grades on the key assessments/critical tasks in Via (aka LiveText) provided by Watermark, the online Teacher Preparation Program Assessment System. Teacher candidates who fail to meet or exceed the standards set for the key assessments/critical tasks must remediate their skill acquisition in order to achieve mastery of the standards. Remediation occurs at the course level with the instructor, and the teacher candidate subsequently revises the key assessments/critical tasks no later than one term after the completion of the course. The teacher candidate resubmits the key assessments/critical tasks for re-grading by the instructor who, in turn, updates the information in Via (aka LiveText) provided by Watermark. Successful remediation of key assessments/critical tasks changes the grade in Via (aka LiveText) provided by Watermark to “meets” or “exceeds” but does not change the course grade.

Teacher candidates’ progress through the program is monitored by full-time faculty using the Via (aka LiveText) provided by Watermark system. Teacher candidates must complete and upload the required key assessment artifacts/critical tasks to Via (aka LiveText) provided...
by Watermark and their progress is monitored at two checkpoints by the Office of Placement Services. The first checkpoint occurs when the teacher candidate applies for entrance into the clinical practice (internship). The teacher candidate must successfully attain standards prior to the clinical practice (internship) in order to qualify for the clinical practice (internship). The second checkpoint occurs when the teacher candidate applies for degree conferral. The teacher candidate must successfully attain standards during or prior to the clinical practice (internship) in order to qualify for degree conferral. The teacher candidate must submit the reports to the Office of Placement Services for review. Failure to pass the checkpoints prevents progression to the clinical practice (internship) and/or degree conferral.

Degree Completion Requirements

Teacher candidates graduating from a Florida state-approved teacher education program must pass all parts of the Florida Teacher Certification Examination (FTCE) as noted in the previous Testing Requirements section. Official scores for the various sections of the FTCE must be submitted prior to the anticipated graduation date to ensure degree conferral.

In addition to passing examination scores, evidence of skill acquisition/mastery of the required teacher education standards must be reflected in the key assessments/critical tasks grades in Via (aka LiveText) provided by Watermark as “meets” or “exceeds” standards as described in the Assessment System section.

Teacher candidates and Fischler Academy students are required to maintain a 3.0 grade point average or higher to qualify for degree conferral.

Security Clearance

The Florida Department of Education requires candidates to pass a background security clearance and provide fingerprints prior to receiving certification, an endorsement, or employment.

For additional information, candidates are encouraged to review the Florida Statutes, Sections 1002.39, 1002.395, 1012.315, 1012.32, and 1012.56, which can be found at leg.state.fl.us/statutes/.

Course Load Policy

Students/teacher candidates enrolled in the Department of Education Undergraduate Education Programs at NSU are considered full-time if they are registered and complete 12 or more credits (four or more courses) per 16-week semester. Teacher candidates will not be permitted to take more than 18 credits during a 16-week semester. Fischler Academy students may register for up to 21 credits during a 16-week semester and Fischler Academy Secondary Biology students may enroll up to 22 credits (must be previously approved with the program director).

Registration Requirements

Students in the state-approved bachelor’s degree programs who intend to be teacher candidates should meet with their academic advisor to register for the upcoming term. This registration appointment ensures students sufficient time to review curricular requirements regularly with their academic advisor. Courses in the education major must be taken in sequence according to the course prerequisites. All general education courses should be successfully completed prior to taking any education courses.

Students/teacher candidates are encouraged to start the registration process for an upcoming term several months in advance to ensure enough time to meet with their academic advisor and prepare for the first day of the term. Some courses in the education major have a pre-class assignment due during the first-class meeting. Pre-class assignments can be obtained in the course syllabus located at fcas.nova.edu/coursewizard/. Students/teacher candidates are expected to have prepared properly for the first-class session by having completed the pre-class assignment. Attendance is mandatory for all class sessions. Lack of an appointment time with an academic advisor will neither prevent any late registration holds that may apply, nor will it negate the requirements of the pre-class assignment or attendance in class for the first session.
**TEACHER CANDIDATE MEETINGS**

The Department of Education Undergraduate Programs requires all teacher candidates to attend the annual Teacher Candidate Conference, which is held annually at the main campus and/or online. The purpose of these meetings is to keep all teacher candidates informed of undergraduate policies, state department of education updates, the Assessment System process, and field experiences and clinical practice (internship) procedures. In addition, these meetings allow teacher candidates to ask questions of full-time faculty members and representatives from the Office of Placement Services on issues concerning their respective majors.

**FIELD EXPERIENCES**

Field experiences have long been recognized as a critical component of teacher preparation programs. These experiences enable teacher candidates to apply theory and effective practices in actual classrooms and acquire competencies necessary for successful teaching.

Nova Southeastern University is committed to providing quality field experiences for all students/teacher candidates majoring in education as an integral part of teacher candidate training. Underlying this commitment is the philosophy that field experiences provide a vital link between educational theory and practice. When a transfer of learning occurs from the university classroom to a real-life setting, the connection significantly contributes to the professional development of the teacher candidate. Consequently, all participants are enriched by these experiences. All field experiences are conducted in PK-12 classrooms under the leadership of a cooperating teacher with clinical educator training and with a minimum of three years successful training experience.

The Florida Department of Education requires that all students majoring in a state approved teacher education program participate in a variety of field experiences. Field experiences must begin early in the program and culminate with the clinical practice (internship). During these experiences, students should be given the opportunity to demonstrate their understanding of the CAEP standards, InTASC Principles, Florida Educator Accomplished Practices, and Subject Area Competencies and Skills. Students will be provided with guidance and feedback in the field experience setting.

Education courses in Nova Southeastern University’s Department of Education Undergraduate Education Programs curriculum will require multiple field experience components. The field experiences vary depending on the competencies and course requirements. A supervised field experience occurs in a designated course specific to each major. If it is determined by the university supervisor that remediation is needed as a result of the supervised field experience, follow-up supervision will take place in subsequent courses. All field experiences must be coordinated and approved through the Office of Placement Services. Teacher candidates should request their field placement at the time of course registration and no later than the first week of a course, which field experience hours are required. It is the responsibility of the teacher candidate to provide their own transportation to assigned schools. All questions about the field experience should be directed to the Office of Placement Services at (954) 262-5364 or (800) 986-3223 ext. 25364.

**CLINICAL PRACTICE (INTERNSHIP)**

Clinical practice (internship) is the final course of the NSU Department of Education Undergraduate Education Programs. This 12-week course includes seminar meetings and 12 weeks of teaching in school. Teacher candidates will be placed at a school site by the internship coordinator in collaboration with school district placement specialists. Teacher candidates will gradually assume full responsibility for teaching the class to which they are assigned. The clinical practice (internship) is offered each academic year in the fall and winter semesters and must be completed as part of the NSU program. Since it is the final course for the degree, it cannot be transferred from another institution, nor can experience be substituted to satisfy this requirement. The Florida Board of Education’s Administrative Rule 6A-4.02 does not permit full-time administrative or teaching experience to be a substitution for the internship for purposes of initial certification.

Students must earn a B or higher in the seminar and pass the clinical practice (internship) for program completion.

**Internship Application**

It is the teacher candidate’s responsibility to complete and submit the internship application before the deadline. Students can fill out the internship application online at education.nova.edu/students/current-students/gtep/office-of-placement-services.html (select Internship Application button on left panel).

Fall semester deadline—February 1
Winter semester deadline—August 1

After the application is received, the applicant’s file is reviewed for completion of all requirements. Teacher candidates will receive a copy of a completed letter of eligibility with an internship audit indicating their internship status (conditionally approved or denied). Once all internship requirements are fulfilled, teacher candidates must attend the mandatory Internship Orientation Meeting. Teacher candidates who fail to attend the Internship Orientation Meeting will be ineligible to enter the internship.

If a teacher candidate does not meet the entrance requirements listed below, the internship application will be denied until all requirements are met.

**Internship Qualifications**

Teacher candidates are considered eligible for the internship if they have met the following criteria:

- Completion of appropriate credits (including all general education requirements, all program requirements, and all courses required for the major, except the internship);
- A minimum overall GPA of 3.0;
- Passing score on the GKT, SAE, and Professional exam; and
- Completion of the key assessments with a passing grade of B- or higher in coursework.

Teacher candidates should refer to the *Internship Handbook* for a complete explanation of policies and procedures covering the internship program. All questions about the internship program should be directed to the Office of Placement Services at (954) 262-5364 or 800-986-3223, ext. 25364.

---

**DRESS CODE—FIELD EXPERIENCES AND CLINICAL PRACTICE (INTERNSHIP)**

All teacher candidates completing field experience and clinical practice (internship) are expected to abide by the dress code that is in place at the school/school district in which they are placed. Teacher candidates must dress professionally and appropriately for the college setting and/or any school related specific activity. Clothing that is in any way controversial, provocative, and/or revealing may not be worn. Teacher candidates are expected to follow good grooming habits and long hair should be worn in a manner where it will not impede the PK–12 classroom students’ view of the teacher candidate’s face and mouth. If poor judgment is exercised in the manner of dress or grooming, the teacher candidate may be asked to leave campus by the University administrator, cooperating teacher, or university supervisor until such time that the situation has been remedied.

---

**Majors**

**Education Major**

The Bachelor of Science in Education is an undergraduate major, which features courses that give students a comprehensive understanding of the foundations of our education system, research-based instructional practices, and strategies designed to enhance their ability to connect with people from diverse populations. Through this program of study, students will be prepared to work in educational and governmental agencies, non-governmental organizations, and other out-of-school educational spaces. The Bachelor of Science in Education provides students with the skills needed to thrive in any professional environment and the flexibility required in order for them to pursue an additional major in an approved content area.

The Bachelor of Science in Education features a concentration in Computer Science Education.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Education (39 credits)**

Elementary Education—ESOL/Reading Endorsements (Florida Approved) Major

The Bachelor of Science in Elementary Education focuses on developing teacher leaders who are equipped with the skills to promote equity, cultural awareness, and social responsibility in diverse educational settings. This major provides future educators with a foundation in current state and federal legislation and the impact that it has on teaching in the 21st Century classroom. Future educators will acquire content expertise in teaching: reading, mathematics, writing, social studies, science, art, music and physical education in grades K-6. ESOL courses are also a considerable component in the major. Course content is research-based, demonstrating current practices in the field of education. Additionally, the course content emphasizes active learning and experiential learning strategies and the effective use of technology in the classroom.

Elementary Education Learning Outcomes

The following describes the overall learning outcomes for students in Elementary Education—ESOL/Reading Endorsements:

1. Apply principles of differentiated instruction to ensure equitable treatment for all elementary classroom learners.
2. Integrate current technology tools in the elementary classroom curriculum.
3. Utilize content knowledge in the elementary classroom.
4. Apply state and federal legislation and standards to their professional practice.
5. Create lesson plans to address the needs of elementary school students.
6. Synthesize current research in Elementary Education to inform and reflect on the professional practice.

Elementary Education—ESOL/Reading Endorsements (Florida Approved) Curriculum

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Elementary Education—ESOL/Reading Endorsements Major Requirements (Florida) (72 credits)

Teacher candidates in the state-approved teacher education program in the elementary education major must also keep track of field experiences within the courses. A supervised field experience occurs in ELEM 4815.

Exceptional Student Education—ESOL Endorsement (Florida Approved) Major

The Bachelor of Science in Exceptional Student Education is a state-approved initial certification program in Florida that focuses on preparing teacher candidates to enter the classroom, while emphasizing the teaching of students with multiple disabilities both within the inclusive classroom and/or in special educational settings. This major provides future educators with a foundation in the history of special education including current state and federal legislation, as well as preparation in classroom management, and methods of teaching reading, mathematics, and life skills to special needs students. Course content is research based and infuses best practices in education and strategies for teaching English as a second language (ESOL). The program aligns directly with the Florida Department of Education’s certification requirements for exceptional student education (grades K–12) and endorsement requirements for ESOL.

Exceptional Student Education Learning Outcomes

The following describes the overall learning outcomes for students in Exceptional Student Education—ESOL Endorsements:

1. Apply state and federal legislation and standards to their professional practice.
2. Create lesson plans to address the needs of all students.
3. Apply the codes of professional ethics to ensure equitable treatment for all learners.
4. Integrate current technology tools in the classroom for students with exceptionalities.
5. Synthesize current research in Exceptional Student Education to inform and reflect on the professional practice.

The Fischler Academy Majors

The Fischler Academy is committed to the dissemination of pedagogical strategies and resources developed through research and sharing of evidence-based teaching practices. To design the integration of project-based learning within the program’s curriculum, The Fischler Academy features Inspire Teaching and Learning On-Demand Module alignment highlighting an extensive series of pedagogical training modules which provide the framework for The Fischler Academy’s curriculum. Nova Southeastern University is committed to delivering the Inspire Teaching and Learning program and serves as a catalyst for change by providing a high-quality resource that can improve the training and professional development of preservice teachers, University faculty, PK-12 teachers, and administrators. Inspire Teaching and Learning has consistently maintained a strong interest and commitment to increasing student achievement, character building, and goal setting in the educational field. As partners, The Fischler Academy and Inspire Teaching and Learning improve teacher preparation and increase the volume of highly qualified educators entering the classroom, as well as educational opportunities to improve instruction for in-service teachers.

**FISCHLER ACADEMY MISSION STATEMENT**

The Fischler Academy is a comprehensive teacher-training program designed to foster aspiring educators to become reflective teacher leaders who are committed to equity, cultural awareness and social responsibility. The curriculum blends the learner-centered model of competency-based instruction with the immersive elements of experiential education and offers a state-of-the-art, technology-rich learning environment to experience effective professional practices. Students are prepared to serve as dynamic agents of change within diverse communities through active field experiences that begin early in the program and continue through their educational journey.

**CHILD DEVELOPMENT MAJOR**

The BS in Child Development prepares students with a working knowledge of typical and atypical development from birth through adolescence, and an understanding of the influence of familial, cultural, socioeconomic, and other factors on developmental progression and child and adolescent well-being. Emphasis is placed on the application of evidence-based practices to support child health and safety, and to promote positive developmental, educational, and psychological outcomes. This program is designed to meet the needs of students interested in working with children in a human services or child care and education program setting once they graduate and/or would like to pursue graduate studies in fields including but not limited to, developmental disabilities, child protection, child advocacy, education, and counseling/psychology.

In the Child Development major, students can pursue a focused area of study by selecting a concentration in Early Child Development, Leadership and Administration, Child Life, or Curriculum and Instruction. Students completing courses in the Early Child Development concentration will have met the required coursework to satisfy the training component necessary to apply for the Child Development Associate Credential. Students completing the Leadership and Administration coursework are prepared to lead in a childcare setting and will have satisfied the requirements for the Florida Director Credential. Students completing the Child Life concentration may satisfy the course requirements set forth by the Association of Child Life Professionals (ACLP). The Child Life concentration does not directly lead to the Certified Child Life Specialist (CCLS) certification upon graduation. Students intending to pursue the CCLS certification will need to satisfy the internship requirements set forth by the ACLP before receiving eligibility to take the child life certification exam. Students completing courses in the Curriculum and Instruction concentration may pursue an alternative pathway to professional certification. Graduates seeking teacher certification must meet all Florida Department of Education certification requirements to qualify for a Professional Florida Educator’s Certificate.

**Child Development Major Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Child Development Major (39 credits)**

**Core Courses (39 credits)**

- ECDP 3321  Infant and Toddler Development (3 credits)
- ECDP 3334  Preschool, Primary, and Middle Childhood Development (3 credits)
EECP 3351  Adolescent Development (3 credits)
ECDP 3341  Child and Adolescent Mental Health (3 credits)

EECP 4330  Promoting Child Health and Safety (3 credits)
ECDP 4423  Child Abuse and Neglect (3 credits)
EDEC 2405  Supporting Children & Adolescents with Special Needs (3 credits)
ECA 0218  Child Observation & Assessment for Decision Making (3 credits)
EDEC 4320  Cultural Perspectives in Working with Children and Families (3 credits)
ECDP 3345  Parenting Theory and Practice (3 credits)
ECDP 4518  Family Systems (3 credits)
ECDP 4990  Advanced Senior Year Seminar (3 credits)

Concentrations (15 credits)
Students may choose to select one of the following concentrations to meet the 15-credit concentration requirement:

Leadership and Administration (15 credits)
ECA 0270  Administration of Child Care and Education Programs (3 credits)
ECA 2273  Child Care Administration: Organizational Leadership and Management (3 credits)
ECA 0275  Early Childhood Administration: Financial and Legal Issues (3 credits)
ECA 0278  Curricular Programming in Early Childhood Centers (3 credits)
EDEC 3420  Families of Children with Special Needs: Challenges and Opportunities (3 credits)

Early Child Development (15 credits)
ECA 0203  Foundations of Early Care and Education (3 credits)
ECA 0101  Introduction to Early Childhood Education: Professionalism, Safety, Health, and Learning Environment (3 credits)
ECA 0112  Introduction to Early Childhood Education: Physical, Cognitive, Communication, and Creative Development (3 credits)
ECA 0114  Introduction to Early Childhood Education: Families, Schools and Communities (CDA III) (3 credits)
ECA 0267  Literacy Development in Multilingual Communities (3 credits)

Child Life (15 credits)
ECDP 3510  Foundations in Child Life and Family Centered Care (3 credits)
ECDP 4367  Play and Children Curricular Applications (3 credits)
ECDP 4510  Research Methods and Program Evaluation (3 credits)
HS 3300  Ethical and Professional Issues in Human Services (3 credits)
HUMN 4100  Death and Dying (3 credits)

Curriculum and Instruction (15 credits)*
EDUC 2010F  Foundations of Education (3 credits)
ESOL 3340F  Survey of TESOL for Teachers (3 credits)
EDUC 3360F  Educational Psychology (3 credits)
EDUC 3525F  Practices if Instruction (3 credits)
EDUC 3535F  Educational Assessment (3 credits)

*All Fischler Academy students are required to complete this concentration.

--- ELEMENTARY EDUCATION—ESOL/READING ENDORSEMENTS (FLORIDA APPROVED) MAJOR ---

The Bachelor of Science in Elementary Education—ESOL/Reading Endorsements focuses on developing teacher leaders who are equipped with the skills to promote equity, cultural awareness, and social responsibility in diverse educational settings. This major provides future educators with a foundation in current state and federal legislation and the impact that has on teaching in the 21st Century classroom. Future educators will acquire content expertise in teaching: reading, mathematics, writing, social studies, science, art, music, and physical education in grades K-6. ESOL courses are a considerable component in this major. Course content is research-based, demonstrating current practices in the field of education. Additionally, the course content emphasizes active learning and experiential learning strategies and the effective use of technology in the classroom.

Fischler Academy courses within this major feature a hybrid mastery-based format. This innovative format provides students with a truly learner-center experience while still allowing them to enjoy the benefits of project-based learning.

--- ELEMENTARY EDUCATION—ESOL/Reading Endorsements (Florida Approved) Curriculum ---

General Education Requirements (30 credits)
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Elementary Education—ESOL/Reading Endorsements Major Requirements (72 credits)
Teacher candidates in the state-approved teacher education program in the Elementary Education—ESOL/Reading Endorsements major (grades 6–12) must also keep track of field experiences within the courses. Supervised field experience occurs in ELEM 4815F.

--- EXCEPTIONAL STUDENT EDUCATION—ESOL ENDORSEMENT (FLORIDA APPROVED) MAJOR ---

The Bachelor of Science in Exceptional Student Education is a state-approved initial certification program in Florida that focuses on preparing teacher candidates to enter the classroom, while emphasizing the teaching of students with multiple disabilities both within...
the inclusive classroom and/or in special educational settings. This major provides future educators with a foundation in the history of special education including current state and federal legislation, as well as preparation in classroom management, and methods of teaching reading, mathematics, and life skills to special needs students. Course content is research based and infuses best practices in education and strategies for teaching English as a second language (ESOL). The program aligns directly with the Florida Department of Education's certification requirements for exceptional student education (grades K–12) and endorsement requirements for ESOL.

Fischler Academy courses within this major feature a hybrid mastery-based format. This innovative format provides students with a truly learner-centered experience while still allowing them to enjoy the benefits of project-based learning.

**Exceptional Student Education—ESOL Endorsement (Florida Approved) Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Exceptional Student Education—ESOL Endorsement Major Requirements (72 credits)**

Teacher candidates in the state-approved program in the exceptional student education major must also keep track of field experiences within the courses. A supervised field experience occurs in ESED 4550F.

- ESOL 2903F Cross-Cultural Studies (3 credits)
- EDUC 2010F Foundations of Education (3 credits)
- ESOL 3340F Survey of TESOL for Teachers (3 credits)
- EDUC 3350F Survey of Exceptional Student Education (3 credits)
- EDUC 3525F Practices of Instruction (3 credits)
- EDUC 3535F Educational Assessment (3 credits)
- EDUC 3360F Educational Psychology (3 credits)
- ESED 3540F Introduction to Language and Speech Disabilities (3 credits)
- ESED 3561F Families, Professionals and Exceptionalities (3 credits)
- ESED 3570F Foundations of Exceptional Student Education (3 credits)
- ELEM 3810F Assessing Literacy (3 credits)

- ESED 4570 Exceptional Student Education Internship (12 credits)

**Secondary Biology Education (Florida Approved) Major**

The Bachelor of Science in Secondary Biology Education focuses on developing teacher leaders who are equipped with the skills to promote equity, cultural awareness, and social responsibility in diverse educational settings. The major provides a comprehensive set of methods courses specifically designed for biology instruction and a specialty component that includes a variety of science courses that comprise the content of secondary biological sciences. All courses are based on the Florida Next Generation Sunshine State Standards and the current state-wide assessment in the sciences in (grades 6–12). Biology certification is a specialty certification that allows teachers to provide instruction at the middle school level as well as many biological and environmental courses at the high school level.

**Secondary Biology Education—ESOL Endorsement (Florida Approved) Curriculum**

**General Education Requirements (30 credits)**
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Secondary Biology Education Major Requirements (86 credits)**
Teacher candidates in the state-approved teacher education program in the AP secondary biology education major (grades 6–12) must also keep track of field experiences within the courses. A supervised field experience occurs in SECE 3550F.

**Social Studies Specialty Courses**
- HIST 1050  The United States: From Settlement to Superpower (3 credits)
- HIST 1170  The World: From Gatherers to Globalization (3 credits)
- HIST 2150  Latin American and Caribbean History (3 credits)
- POLS 1200  Introduction to Political Science (3 credits)
- GEOG 2050  Survey of Geography (3 credits)
- ECN 2025  Principles of Macroeconomics OR ECN 2025H Principles of Macroeconomics Honors (3 credits)
- POLS 1010  American Government and Politics (3 credits)
- SOCL 1020  Introduction to Sociology (3 credits)
- Select one Advanced Study course with the HIST prefix (3 credits)
Minors

**Education Minor**

There is currently a need for exceptional student education and secondary level teachers. The Department of Education Undergraduate Education Program offers a minor in education that will allow students majoring in English, history, math, life science, or other majors the opportunity to take educational coursework to obtain employment in grade K-12 classrooms. The education minor will give students the strong foundation in teaching towards an alternative certification path to enter the teaching profession.

Students must have a minimum of 30 credits and no more than 90 credits to enroll in the education minor. In addition, the required field experiences for each course must be completed within an area elementary, middle, or high school. Students will be required to complete any security clearance processes required by the local school district.

**Education Minor Requirements (18 credits)**

All students minoring in education will need to complete the following:

- EDUC 3330 Integrating Instructional Technology in the Classroom (3 credits)
- ESOL 3340 Survey of TESOL for Teachers (3 credits)
- EDUC 3350 Survey of Exceptional Student Education (3 credits)
- EDUC 3360 Educational Psychology (3 credits)
- EDUC 3525 Practices of Instruction (3 credits)

All students will choose 3 credits from the following:

- EDUC 4322 Foundations of Classroom Management (3 credits)
- SECE 4320 Secondary Classroom Management (3 credits)

**Physical Education Minor**

The physical education minor is designed for individuals who wish to complete 19 credit hours of coursework towards the Florida Department of Education certification track in Physical Education for teaching physical education in the elementary, middle, and secondary schools. The course of study is designed to offer students the opportunity to advance their understanding of physical education. Students will have the ability to explore a variety of applications of physical education ranging from the teaching methods to the prevention and care of athletic injuries. In addition, they will learn about the organization and administration of physical education as a tool to promote and sustain physical education in the K–12 school.

Students must have a minimum of 30 credits and no more than 90 credits to enroll in the physical education minor. In addition, the required field experiences for each course with a PHED prefix must be completed in an elementary, middle, or high school. Students will be required to complete any security clearance processes required by the local school district.

**Physical Education Minor Requirements (19 credits)**

All students minoring in physical education will need to complete the following:

- ATTR 1300 Emergency Care and First Aid (3 credits)
- PHED 3200 Methods of Teaching Physical Education (3 credits)
- PHED 3300 Physical Education Administration (3 credits)
- PHED 3400 Physical Education Principles and Practice in Coaching (3 credits)
- EXSC 3700 Kinesiology (3 credits)
- EXSC 3740 Exercise Physiology with Lab (4 credits)

**Army Reserve Officer Training Corps (ROTC)**

The Army Reserve Officer Training Corps (ROTC) is a college program that enables students to succeed in their desired career, whether civilian or military. The ROTC program provides ten courses consisting of 26 credits and culminates with the minor in Military Sciences and Leadership. Students who complete all ROTC requirements will receive the Minor in Military Science and Leadership on their
transcript and may be commissioned as Second Lieutenants and serve in the Active Duty Army, Army Reserves, or the Army National Guard.

Enrollment

Enrollment is open to all full-time students. Any student may enroll in MSLR 1000 and 2000 level courses in a participation status. Any student enrolling in the MSLR 3201/2 and MSLR 4301/2 must have the approval of the Department Chairperson.

Instruction and Training

The freshmen and sophomore students register for Basic Military Science and Leadership Courses. There is no military obligation associated with the first two years of the program. These courses introduce students to leadership skills and concepts. The curriculum involves understanding how to communicate, set goals, how and when to make decisions, enhance physical fitness, how to build and operate in a team, and engage in creative problem solving, planning and organization. The curriculum focuses on building character, providing opportunities to apply, practice and experience leadership principles. Courses consist of outdoor/indoor instruction and practical ‘hands-on’ training on university intramural fields and at various South Florida military training sites.

Military Science and Leadership (ROTC) Minor

Qualified juniors, seniors, or graduate students may take the Advanced Military Science Courses upon approval from the Director. The Advanced Course provides intense training for students in simulated leadership positions. Students are taught the fundamentals of serving as an Army Officer. They will have numerous opportunities to lead small teams in a variety of challenging leadership situations. The seniors manage the ROTC Corps of Cadets, mentor junior cadets, plan and conduct training, management, and fundraising activities. Advanced courses led to a minor in Military Science and Leadership.

To complete the requirements for this minor, ROTC students must complete (15) course credits, in sequence, as follows:

Army Officer Professional Studies (Educational Core)

Razor’s Edge Premier Programs

Experiential Leadership Minor

The Experiential Leadership minor is a curricular and co-curricular program that is designed to provide learning experience inside the classroom as well as outside the classroom through involvement and leadership initiatives throughout campus. The requirements for the minor in Experiential Leadership are only available for students admitted into the Razor’s Edge Leadership Scholars Program offered by the Office of Student Leadership and Civic Engagement. To complete the requirements for this minor, students must complete 16 total credits including 7 credits of the required core courses as well as 9 credits of leadership-based electives. Students must earn a grade of B (3.0) or better in each course used to satisfy the Razor’s Edge Leadership Scholars program.

Mandatory Core Courses (7 credits)

**Leadership Elective Requirements:**
Participants will select three elective courses in the following fields of study to complete the minor as required. You can choose any three elective courses for a total of 9 credit hours. Multiple elective courses cannot be from the same fields of study and must be in one of the approved fields below. Only elective courses in the approved fields with approved course prefixes will be accepted. A student may choose to complete the elective courses at any time as long as they are completed by the fourth year in the program or graduation, whichever comes first.

**Fields of Study and approved Course Prefixes**
- Accounting: ACT
- African Diaspora Studies/ Latin American Cultural Studies: HIST, HUMN, LITR

---

**GLOBAL ENGAGEMENT MINOR**

The Global Engagement minor is a curricular and co-curricular minor that is designed to provide learning experiences inside the classroom as well as outside the classroom through involvement in global leadership and engagement activities on campus and in their local and global communities. The requirements for the minor in Global Engagement are only available to students admitted to the Razor’s Edge Global Scholars Program offered by the Office of International Affairs. To complete the requirements for this minor, students must complete 10 credits from the required core courses and 6 credits from the elective courses.

**Mandatory Core Courses (10 credits)**
- RAZG 1500  Global Leadership (1 credit)
- RAZG 1501  Global Engagement (1 credit)
- RAZG 1502  Multicultural and Diversity Issues (1 credit)
RAZG 1503  Global Engagement Portfolio (1 credit)
COMM 2300  Intercultural Communication (3 credits)
INST 1500  Global Issues (3 credits)

Elective Courses (6 credits from the following courses)
HIST 3400  U.S. Foreign Relations (3 credits)
HUMN 1200  Introduction to World Religions (3 credits)
LITR 2031  World Literature II (3 credits)
POLS 2300  International Relations (3 credits)
FOREIGN LANGUAGE* (3 or 6 credits)
STUDY ABROAD* (3 or 6 credits)

*Courses must be pre-approved by program director.

Research Studies Minor

The Research Studies minor is a curricular and co-curricular program that is designed to provide learning experiences inside the classroom as well as outside the classroom through involvement in firsthand research experiences, scientific inquiry and problem-solving activities and initiatives. The Razor’s Edge Research Scholars will benefit from mentored research experiences with faculty researchers at NSU. The requirements for the minor in Research Studies are only available for students admitted into the Razor’s Edge Research Scholars Program offered by the Abraham S. Fischler College of Education and School of Criminal Justice in cooperation with the Division of Student Affairs. To complete the requirements for this minor, students must complete 15 course credits, in sequence, as follows:

RAZR 1000R  Seminar in Research Design and Implementation I (3 credits)
RAZR 2000R  Seminar in Research Design and Implementation II (3 credits)
RAZR 3000R  Quantitative Research Design and Statistical Analysis (3 credits)

RAZR Field Experiences (totaling 6 additional credits) will be distributed among the remaining semesters of the undergraduate program.

RAZR 2501  Field Experience I (1 credit)
RAZR 3501  Field Experience II (1 credit)
RAZR 3502  Field Experience III (1 credit)
RAZR 4501  Field Experience IV (1 credit)
RAZR 4502  Field Experience V (2 credits)

Students must earn a grade of B (3.0) or better in each course used to satisfy the Razor’s Edge Research Scholars program.

Shark Teach Scholars Program

Students in the Razor’s Edge Shark Teach Scholars program are part of a four-year educational and leadership development program focused on utilizing what they learn in the classroom as future educators to aid in the continued transformation and vibrancy of the Nova Southeastern University community. Students in the program develop a sense of community and enthusiasm for academic excellence and in turn serve as academic ambassadors across various functions for the university.

Shark Teach Scholars Program participants will have the opportunity to collaborate with their peers through the role of tutor, supplemental instruction (SI) leader, writing consultant, first year seminar peer leader, or other academic support roles. Students will take theory and concepts learned in RAZT 1050: Fundamentals of Peer Education (3 cr.) and apply them as they work together to engage the NSU community in various academic support initiatives and programming, designed to elevate academic success across campus. Additionally, Shark Teach scholars will serve as academic and peer mentors through the student led organization. We Achieve via Education (W.A.V.E.). As part of their academic support roles, students will be exposed to tutor training that follows College Reading and Learning Association (CRLA) certification standards, as well as supplemental instruction leader training that follows guidelines established by the UMKC – University of Missouri Kansas City International Center for Supplemental Instruction. It is required that students in the Razor’s Edge Shark Teach Scholars program are students in The Fischler Academy at the Abraham Fischler College of Education & School of Criminal Justice and agree to remain an education major to maintain the scholarship and status as a Razor’s Edge Shark Teach Scholars Program student.
Add-on Endorsement

**Driver Education Add-on Endorsement**

The Driver Education add-on endorsement program is available to Florida teachers who possess certification in other subject areas and wish to teach high school driver education. The courses leading to the endorsement will review basic driving rules and procedures associated with driving as well as how to implement these procedures using engaging instructional strategies. Teaching strategies to assist participants with classroom implementation will be used throughout the three courses in sequence. Sample teaching strategies and curriculum connections will also be included in the three courses.

- EDUC 4910 Introduction to Driver’s Education (3 credits)
- EDUC 4911 Instructional Strategies and Methods for Teaching Advanced Driver Education (3 credits)
- EDUC 4912 Administration and Supervision of Driver Traffic Safety Education (3 credits)

**State Requirements for Driver Education Add-on Endorsement**

The driver education add-on endorsement, state approved in Florida, provides the competencies necessary to meet all Florida Department of Education requirements for driver education instruction. Students who successfully complete the required coursework must apply for endorsement through the Florida Department of Education. Information about the process can be found at [fldoe.org/teaching/certification/additions/adding-an-endorsement.stml](http://fldoe.org/teaching/certification/additions/adding-an-endorsement.stml).
Department of Human Services

The Department of Human Services offers a Bachelor of Science in Human Services Administration and a Bachelor of Science in Child Development. The Human Services Administration program is designed to provide students with an understanding of administration, public policy, ethics and practice in the field of Human Services Administration. This program provides an excellent foundation for students who intend to pursue careers in human services administration, other related professions, or graduate studies in areas such as health administration, public administration, social work, counseling and business administration. The B.S. in Child Development is intended to provide professional training for students interested in working in the field of human services with young children, their families, and communities. Students in this program are trained to foster positive social and academic development in children from infancy through adolescence. Graduates of this program will have a wide array of career opportunities and are prepared to pursue graduate studies in developmental disabilities, child protection, child advocacy, social work, and psychology.

Majors

HUMAN SERVICES ADMINISTRATION MAJOR

Human Services Administration Major Learning Outcomes

A successful human services administration graduate is expected to:

1. Analyze the various roles and responsibilities of administration in the field of human services.
2. Demonstrate knowledge of historical and contemporary social issues impacting the human services field.
3. Apply knowledge of evidence-based practices to assessment and intervention approaches utilized within human services.
4. Articulate and define the character and qualities of human services organizations unique to the community and to the community members they serve.
5. Identify the importance and functions of human resources and supervision for human services administration.
6. Demonstrate an understanding of current concepts and trends in management and their application within the field of human services.
7. Identify, evaluate, and apply legal aspects and implications for human services administration.
8. Apply the principles of program planning and evaluation to human services organizations.
9. Demonstrate the ability to communicate effectively both orally, in writing, and with the use of technology.
10. Demonstrate the ability to integrate personal experiences in human services organizations with current research and emerging human service administrative issues (at the conclusion of the field placement experiences).

Human Services Administration Major Curriculum

The Bachelor of Science in Human Services Administration requires successful completion of 120 credit hours including 30 credit hours of General Education, 54 credit hours of major (core) courses, which include two 3-credit field placements, 12 credits of concentration courses, and open electives.

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

WRIT 3150  Business Writing (3 credits)
PADM 1000  Introduction to Public Administration (3 credits)

* These field placement courses allow the development of skills through hands-on experience. Field placements will consist of 10–12 hours per week within a human services agency within the community and are designed to enable the student, under the direction and guidance of on-site and faculty supervisors, to apply what has been learned to a real-world work experience.

Concentrations (12 credits)
Students may choose to select one of the following concentrations or any combination of courses across the concentrations to meet the 12-credit concentration requirement:

Advocacy/Case Management Concentration (12 credits)
HS 3410  Case Management Methods (3 credits)
HS 3420  Advocating for Individuals with Special Needs (3 credits)
HS 3430  Special Topics in Advocacy (3 credits)
HS 3440  Assessment and Treatment Planning (3 credits)

Health Administration Concentration (12 credits)
BHS 3110  Health Care Ethics (3 credits)
BHS 3151  Health Services Management (3 credits)
BHS 3161  Concepts of Health Care Finance (3 credits)
BHS 3170  Health Care Delivery Systems (3 credits)

Nonprofit Management, Philanthropy, and Grantsmanship Concentration (12 credits)
HS 3120  Grant Writing and Management (3 credits)
HS 3130  Nonprofit Leadership (3 credits)
HS 3140  Fundraising and Philanthropy (3 credits)
HS 3150  Strategic Planning in Human Services (3 credits)

Social Work Concentration (12 credits)
HS 3330  Human Behavior and the Social Environment (3 credits)
HS 3340  Interviewing and Assessment (3 credits)
HS 3350  Social Work Practice (3 credits)
SOCL 2000  Introduction to Social Work (3 credits)

Substance Abuse Studies Concentration (12 credits)
PSYC 2020  Foundations of Clinical and Counseling Psychology (3 credits)
PSYC 2575  Introduction to Substance Abuse Studies (3 credits)
PSYC 3575  Treatment of Substance Abuse (3 credits)
PSYC 3800  Current Psychotherapies (3 credits)
**Child Development Major**

The BS in Child Development prepares students with a working knowledge of typical and atypical development from birth through adolescence, and an understanding of the influence of familial, cultural, socioeconomic, and other factors on developmental progression and child and adolescent well-being. Emphasis is placed on the application of evidence-based practices to support child health and safety, and to promote positive developmental, educational, and psychological outcomes. This program is designed to meet the needs of students interested in working with children in a human services or childcare and education program setting once they graduate and/or would like to pursue graduate studies in fields including but not limited to, developmental disabilities, child protection, child advocacy, education, and counseling/psychology.

In the Child Development major, students can pursue a focused area of study by selecting a concentration in Early Child Development, Leadership and Administration, Child Life, or Curriculum and Instruction. Students completing courses in the Early Child Development concentration will have met the required coursework to satisfy the training component necessary to apply for the Child Development Associate Credential. Students completing the Leadership and Administration coursework are prepared to lead in a childcare setting and will have satisfied the requirements for the Florida Director Credential. Students completing the Child Life concentration may satisfy the course requirements set forth by the Association of Child Life Professionals (ACLP). The Child Life concentration does not directly lead to the Certified Child Life Specialist (CCLS) certification upon graduation. Students intending to pursue the CCLS certification will need to satisfy the internship requirements set forth by the ACLP before receiving eligibility to take the child life certification exam. Students completing courses in the Curriculum and Instruction concentration may pursue an alternative pathway to professional certification. Graduates seeking teacher certification must meet all Florida Department of Education certification requirements to qualify for a Professional Florida Educator’s Certificate.

**Child Development Major Learning Outcomes**

A successful child development graduate is expected to:

1. Demonstrate knowledge of typical and atypical cognitive, physical, and social-emotional development from birth through adolescence.
2. Apply major theoretical frameworks of child and adolescent development.
3. Examine risk and protective factors from birth through adolescence.
4. Analyze the influence of diverse contextual factors on child and adolescent development and well-being.
5. Apply knowledge of culturally appropriate, evidence-based practices to assessment and intervention approaches used with children, adolescents, and families.
6. Analyze the effects of parenting and diverse family characteristics on child health, safety and well-being.
7. Apply advocacy principles and strategies for the well-being of children and their families.

**Child Development Major Curriculum**

The Bachelor of Science in Child Development requires successful completion of 120 credit hours including 30 credit hours of General Education, 39 credit hours of major (core) courses, 15 credit hours of concentration courses, and open electives.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Child Development Major (39 credits)**

*Core Courses (39 credits)*

- ECDP 3321 Infant and Toddler Development (3 credits)
- ECDP 3334 Preschool, Primary, and Middle Childhood Development (3 credits)
- EECP 3351 Adolescent Development (3 credits)
- ECDP 3341 Child and Adolescent Mental Health (3 credits)
- ECDP 3338 Cultural and Social Issues in Child Development (3 credits)
- EECP 4330 Promoting Child Health and Safety (3 credits)
- ECDP 4423 Child Abuse and Neglect (3 credits)
- EDEC 2405 Supporting Children & Adolescents with Special Needs (3 credits)
ECA 0218  Child Observation & Assessment for Decision Making (3 credits)
EDEC 4320  Cultural Perspectives in Working with Children and Families (3 credits)
ECDP 3345  Parenting Theory and Practice (3 credits)
ECDP 4518  Family Systems (3 credits)
ECDP 4990  Advanced Senior Year Seminar (3 credits)

Concentrations (15 credits)
Students may choose to select one of the following concentrations to meet the 15-credit concentration requirement:

Leadership and Administration (15 credits)
ECA 0270  Administration of Child Care and Education Programs (3 credits)
ECA 2273  Child Care Administration: Organizational Leadership and Management (3 credits)
ECA 0275  Child Care Administration: Financial and Legal Issues (3 credits)
ECA 0278  Curricular Programming in Early Childhood Centers (3 credits)
EDEC 3420  Families of Children with Special Needs: Challenges and Opportunities (3 credits)

Early Child Development (15 credits)
ECA 0203  Foundations of Early Care and Education (3 credits)
ECA 0101  Introduction to Early Childhood: Professionalism, Safety, Health, and Learning Environment (3 credits)
ECA 0112  Introduction to Early Childhood: Physical, Cognitive, Communication, and Creative Development (3 credits)
ECA 0114  Introduction to Early Childhood Education: Families, Schools and Communities (CDA III) (3 credits)
ECA 0267  Literacy Development in Multilingual Communities (3 credits)

Child Life (15 credits)
ECDP 3510  Foundations in Child Life and Family Centered Care (3 credits)
ECDP 4367  Play and Children Curricular Applications (3 credits)
ECDP 4510  Research Methods and Program Evaluation (3 credits)
HS 3300  Ethical and Professional Issues in Human Services (3 credits)
HUMN 4100  Death and Dying (3 credits)

Curriculum and Instruction (15 credits)*
EDUC 2010F  Foundations of Education (3 credits)
ESOL 3340F  Survey of TESOL for Teachers (3 credits)
EDUC 3360F  Educational Psychology (3 credits)
EDUC 3525F  Practices if Instruction (3 credits)
EDUC 3535F  Educational Assessment (3 credits)

*All Fischler Academy students are required to complete this concentration.

Credential Coursework

Child Development Associate Credential
The Child Development Associate (CDA) Credential is based on professional competency standards in the field of early childhood education. CDA coursework focuses on the developmental needs of children from birth to age five. Program activities prepare you to develop and implement developmentally based practices and experiences addressing the needs of young children and their families in early childhood centers. Nova Southeastern University’s nine credits of CDA coursework provide practitioners with the training needed to apply for the National CDA Credential. Courses are offered online in English and in Spanish.

ECA 0101  Introduction to Early Childhood Education: Professionalism, Safety, Health, and Learning Environment (3 credits)
ECA 0112  Introduction to Early Childhood Education: Physical, Cognitive, Communication, and Creative Development (3 credits)
ECA 0114  Introduction to Early Childhood Education: Families, Schools, and Communities (CDA III) (3 credits)
Requirements for National CDA Credential
Graduates who wish to pursue the National CDA Credential must contact the National CDA coordinating office of the Council for Professional Recognition. The national credential is recognized nationwide and it must be renewed on a regular basis. Information about the process can be found at [www.cdacouncil.org](http://www.cdacouncil.org).

---

**FLORIDA DIRECTOR CREDENTIAL**

Coursework for the initial director credential provides an overview of the skills and knowledge required in the operation and management of an early care and education program. It meets the requirements for the Florida Director Credential. Additionally, courses leading to the Advanced Director Credential (Florida) are offered regularly. They include coursework in organizational leadership and management, financial and legal issues, and curriculum development for early childhood programs. Coursework is offered online and on-site.

Satisfactory completion of required coursework and practical application experiences are required to complete the requirements for this credential. Students must complete 12 course credits, as follows:

**State Requirements for the Florida Director Credential**

**Initial Credential:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECA 0270</td>
<td>Administration of Child Care and Education Program (3 credits)</td>
</tr>
</tbody>
</table>

ECA 0270 meets the content requirements of the Overview of Child Care Management as defined by the Florida Department of Children and Families (DCF) for the Florida Child Care Director Credential. Students who successfully complete the required coursework must apply for the initial or advanced credential through the DCF. Information about the process can be found at [myffamilies.com/service-programs/child-care/docs/DirectorCredential.pdf?d=2020-6-9](http://myffamilies.com/service-programs/child-care/docs/DirectorCredential.pdf?d=2020-6-9).

**Courses for Renewal and/or Advanced Director Credential:**

<table>
<thead>

<td>Early Childhood Administration: Financial and Legal Issues (3 credits)*</td>
</tr>
<tr>
<td>ECA 0278</td>
<td>Curricular Programming in Early Childhood Centers (3 credits)*</td>
</tr>
</tbody>
</table>

* Please note that courses must be taken in the order listed above.
School of Criminal Justice

The Abraham S. Fischler College of Education and School of Criminal Justice is dedicated to providing the highest level of excellence in educational experiences to current and future criminal justice professionals. The school offers the Bachelor of Science degree in Criminal Justice and a minor in Criminal Justice.

**Criminal Justice Major**

The criminal justice major prepares students for academic and professional careers in criminal justice and related fields. Utilizing a comprehensive, multidisciplinary approach, through scholarship, research, and training, students develop an understanding of the dynamic interplay between theory and practice in the criminal justice system. Further, students develop an understanding of and appreciation for the complex relationship between the three components of the criminal justice system—law enforcement, the courts, and corrections. Courses in the B.S. in Criminal Justice are offered both on-site at NSU’s main campus and online, providing students with greater flexibility in attending classes.

**Criminal Justice Major Learning Outcomes**

A successful criminal justice graduate is expected to:

1. Demonstrate an understanding of the major theories, principles, and concepts that govern each of the following core areas of criminal justice:
   a. Law;
   b. Law enforcement;
   c. Corrections;
   d. The court system;
   e. Crime causation; and
   f. Research methods and statistics.

2. Integrate and apply the major theories, principles, and concepts of criminal justice to analyze and evaluate research and/or applied issues in the field of criminal justice using critical thinking skills, skeptical inquiry, and, where applicable, the scientific approach.

3. Produce criminal justice information in a clear, concise manner, consistent with relevant professional standards.

**Criminal Justice Major Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Criminal Justice Major Requirements (54 credits)**

### Minors

#### CRIMINAL JUSTICE MINOR

The criminal justice minor provides students with an overview of the criminal justice system, including its three components—law enforcement, the courts, and corrections. In this course of study, students explore criminal law and procedure, constitutional rights of defendants, victimization, correctional theory and practice, and policing. This minor is recommended for students interested in criminology, criminal defense or prosecution, and law enforcement-related fields. This minor can be combined with any major and minor except the criminal justice major.

**Criminal Justice Minor Requirements (18 credits)**

**Core Courses (9 credits)**
- CRJU 1100  Introduction to Criminal Justice (3 credits)
- CRJU 1200  Criminal Law (3 credits)
- CRJU 2220  Criminology (3 credits)

**Minor Electives (9 credits)**
Select 9 credits from the following courses:
- CRJU 3100  Juvenile Delinquency (3 credits)
- CRJU 3220  Policing (3 credits)

- CRJU 4500  Research Methods in Criminal Justice (3 credits)
- CRJU 4600  Gangs in America (3 credits)
- CRJU 4880  Senior Seminar in Criminal Justice (3 credits)
- CRJU 4900  Special Topics in Criminal Justice (3 credits)
College of Computing and Engineering
Dean’s Message

Congratulations on your decision to join NSU’s College of Computing and Engineering (CCE). As Dean of the College of Computing and Engineering, it brings me great pleasure to welcome you to NSU and to the exciting opportunities in computer science, engineering and information technology.

At the CCE, we are committed to educating today’s engineers, computer scientists, and technology leaders to be tomorrow’s problem solvers. Through innovative curricula and research activities, our outstanding faculty engage students in a unique, interactive learning environment that facilitates academic excellence and prepares our students for their future careers while they earn a B.S., M.S., or Ph.D. degree. Companies seeking new sources of talent are looking at our college because of our commitment to our students and our program for both discipline experts and strong communication, teamwork, and life-long learning skills. At CCE, we will take your dedication and ambition to the next level of your life.

We encourage you to engage with your peers, outstanding faculty members, and the activities that the university and college offer to strengthen your experience here at NSU.

The faculty and staff all look forward to providing strong support for through your exciting journey towards personal fulfillment, career advancement, and global citizenship. We look forward to celebrating your accomplishments.

Meline Kevorkian, Ed.D.
Dean, College of Computing and Engineering

Mission Statement

Engaging in innovation across boundaries, the College of Computing and Engineering prepares leaders and problem solvers in engineering, computer science, information systems, and cybersecurity for application and integration of science and technology to research and design effective solutions that contribute to society and the public good.

Introduction to the College

The College of Computing and Engineering (CCE) prepares students to meet the technological challenges of today and tomorrow. Drawing on 40 years of institutional experience in computing education and research, and 30 years of experience in innovative program delivery, CCE offers focused and flexible programs aligned to industry’s most sought-after fields to help students reach their full potential. CCE has a distinguished faculty, evolving curricula, and an alumni network that integrates 40 years of graduates from computing disciplines at NSU. CCE has three bachelor’s, seven masters, and three doctoral programs.

The three undergraduate programs offered by the College of Computing and Engineering (CCE) span the breadth of knowledge and skillsets for jobs that require credentials in computing hardware, software, information, and/or engineering disciplines.

Each degree is a Bachelor of Science (B.S.) that prepares students equally well for the workplace as for graduate study. The graduate programs at the college are excellent opportunities for students to do research and acquire advanced knowledge in the discipline.

The three undergraduate programs are:

- B.S. in Computer Science
- B.S. in Engineering
- B.S. in Information Technology
Department of Computing

The Department of Computing offers bachelor’s, master’s, and doctoral programs in computer science, bachelor’s and master’s programs in information technology, and master’s and doctoral programs in information systems and cybersecurity. The curricula span traditional computer science theory as well as practical application to support students in further study, research, or professional careers in industry. Students may use dual/early admission for an accelerated path from bachelor’s to master’s, or master’s to doctoral.

Majors

**COMPUTER SCIENCE MAJOR**

The Computer Science (CS) major prepares responsible, well-rounded graduates capable of designing, developing, and using software systems. They should understand critical aspects of software systems and associated ethical implications to society. The curriculum covers technical and professional requirements with electives to prepare students for professional careers and further study in the discipline of computer science. In this program, students get theoretical and applied current coverage of fundamental and advanced topics in software development and management, software and system design, operating systems, data communications, computer architecture, algorithms, and data structures. Students can also choose between many electives including security, various topics in applied mathematics, development of Web applications, and databases. The program incorporates mathematics and sciences including calculus, discrete mathematics, statistics, and a solid base in physical science with laboratories. Successful graduates will be equipped with the theoretical knowledge, practical experience, and background to work effectively in the field of computer science, and to successfully advance to graduate studies. Students may not double major with degrees in the college.

**Computer Science Program Educational Objectives**

Graduates of the Computer Science Program will:

1. Apply analytical and technical skills, tools and techniques to define requirements, create designs, implement solutions, or conduct evaluations of computer software, hardware and systems.
2. Communicate effectively, work well independently and provide significant contributions in team environments.
3. Understand and apply professional standards of ethics, legal and societal responsibility and are knowledgeable of their impacts on computing.
4. Continue to develop their computing knowledge and skills through advanced study and lifelong learning.

**Computer Science Major Learning Outcomes**

A Successful computer science graduate is expected to demonstrate:

1. An ability to analyze a problem, and to identify computing requirements appropriate to its solution.
2. An ability to design, implement, and evaluate a computer-based solution to meet a given set of computing requirements in the context of the discipline.
3. An ability to communicate effectively with a range of audiences about technical information.
4. An ability to make informed judgements in computing practice based on legal and ethical principles, and identify impacts on individuals and society.
5. An ability to function effectively on teams to establish goals, plan tasks, meet deadlines, manage risk and produce deliverables.
6. An ability to apply theory in the design and implementation of computer-based solutions.
7. An ability to reason about and explain computer-based solutions at multiple levels of abstraction.
8. An ability to recognize the ongoing need for additional knowledge and to locate, evaluate, integrate, and apply this knowledge effectively.
Computer Science Major Curriculum

General Education Requirements (30 credits)
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the "General Education Program" section on page 98 of this catalog.

Computer Science Major Requirements (83 credits)

Core Courses

- MATH 2100  Calculus I (4 credits) OR MATH 2100H Calculus I Honors (4 credits)
- MATH 2200  Calculus II (4 credits) OR MATH 2200H Calculus II Honors (4 credits)
- MATH 3300  Introductory Linear Algebra (3 credits)
- MATH 4500  Probability and Statistics (3 credits)
- PHYS 2400  Physics I/Lab (4 credits)
- Any Science Course (BIOL, CHEM, ENVS, MBIO, NEUR, or PHYS only) (4 credits)
- CSIS 1800  Introduction to Computer and Information Sciences (3 credits)
- CSIS 2050  Discrete Mathematics (4 credits)
- CSIS 2101  Fundamentals of Computer Programming (4 credits)
- CSIS 3023  Legal and Ethical Aspects of Computers (3 credits)
- CSIS 3101  Advanced Computer Programming (4 credits)
- CSIS 3200  Organization of Programming Language (3 credits)
- CSIS 3400  Data Structures (4 credits)
- CSIS 3460  Object Oriented Design (3 credits)
- CSIS 3500  Networks and Data Communication (3 credits)
- CSIS 3051  Computer Organization & Architecture (4 credits)
- CSIS 3610  Numerical Analysis (4 credits) OR MATH 3000 Level or Higher (4 credits)
- CSIS 3750  Software Engineering (4 credits)
- CSIS 3810  Operating Systems Concepts (3 credits)
- CSIS 4610  Design and Analysis Algorithms (3 credits)

Capstone:

- CSIS 4903  Capstone Project for Computer Science (3 credits) OR
- CSIS 4953  Capstone Internship in Computer Science (3 credits)

Major Electives (9 credits)
Select 9 credits from the following courses:
- Any 3000/4000-level CSIS, CENG, EENG and SENG courses not counted as core courses for the major.

Open Electives (16 Credits)

Prerequisite Courses
A prerequisite is a course that must be successfully completed prior to enrolling in a more advanced course. The successful completion of prerequisite courses demonstrates that a student has achieved the foundational knowledge and core competencies necessary to move on to a more advanced course. The completion of prerequisite coursework is an essential component for registration for certain courses in the Computer Science Program and may not be overridden. As such, students in the Computer Science Program are not permitted to register for any course without first successfully completing all of said course’s mandatory prerequisites.

Information Technology Major

The Information Technology (IT) major prepares responsible, well-rounded graduates who understand critical aspects of information technology and their ethical impact on society. Through excellence in teaching, experiential learning, service, and scholarship, the curriculum provides a comprehensive and dynamic course of study for students interested in computer and information technologies. Students study IT in its widest sense as a means of communication and human/computer interaction as well as data management and forensics. The curriculum prepares IT students to serve the community, the state of Florida, and the world through training and education. Students garner theoretical and hands-on skills needed to solve complex computing and technological problems with their mastery of a range of technical disciplines including communications, computing, and databases.
Information Technology Major Program Educational Objectives

Graduates of the information technology program will:

1. Apply analytical and technical skills, tools, and techniques to define requirements, implement solutions, or conduct evaluations of information technology software, hardware, and systems.
2. Communicate effectively, work well independently and provide significant contributions in team environments.
3. Understand and apply professional standards of ethics, legal and societal responsibility and are knowledgeable of their impacts on information technology.
4. Continue to develop their computing knowledge and skills through advanced study and lifelong learning.

Information Technology Major Learning Outcomes

By graduation, students in the information technology program are expected to have attained an ability to:

1. Analyze a problem and to identify information technology requirements appropriate to its solution.
2. Design, implement, and evaluate a computer-based solution to meet a given set of information technology requirements.
3. Communicate effectively with a range of audiences about technical information.
4. Make informed judgements in information technology practice based on legal and ethical principles and identify impacts on individuals and society.
5. Function effectively on teams to establish goals, plan tasks, meet deadlines, manage risk, and produce deliverables.
6. Recognize the ongoing need for additional knowledge and to locate, evaluate, integrate, and apply this knowledge effectively.

Information Technology Major Curriculum

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Information Technology Major Requirements (55 credits)

Mathematics (6 credits)

MATH 1200 Precalculus Algebra (3 credits) or higher
MATH 2020 Applied Statistics (3 credits) OR MATH 2020H Applied Statistics Honors (3 credits)

Core Courses (34 credits)

CSIS 1800 Introduction to Computer Science and Computer Information Systems (3 credits)
CSIS 2000 Introduction to Database Systems (3 credits)
CSIS 2101 Fundamentals of Computer Programming (4 credits)
CSIS 3020 Web Programming and Design (3 credits)
CSIS 3023 Legal and Ethical Aspects of Computers (3 credits)

Open Electives (38 credits)

Prerequisite Courses

A prerequisite is a course that must be successfully completed prior to enrolling in a more advanced course. The successful
completion of prerequisite courses demonstrates that a student has achieved the foundational knowledge and core competencies necessary to move on to a more advanced course. The completion of prerequisite coursework is an essential component for registration for certain courses in the Computer Science Program and may not be overridden. As such, students in the Computer Science Program are not permitted to register for any course without first successfully completing all of said course’s mandatory prerequisites.

## Minors

### Data Analytics

The data analysis minor provides insight into the application of concepts for data analytics and decision making. This minor is especially helpful for students to acquire an integrated set of computer science, mathematics and analytical skills needed to enter the field of data analytics.

**Undergraduate Minor in Data Analytics (15 Credits)**

- TECH 2010 Excel at Spreadsheets (3 credits)
- TECH 3100 Introduction to Data Science (3 credits)
- MATH 2020 Applied Statistics OR MATH 4500 Probability and Statistics (3 credits)
- MATH 3030 Applied Statistics II (MATH 2020 prerequisite) (3 credits)
- TECH 2020 Programming for Everyone OR MATH 4020 Applied Regression Analysis (MATH 3030 prerequisite) OR CSIS 2101 Fundamentals of Computer Programming (3 credits)

### Cybersecurity

The cybersecurity minor is designed for someone who wants to focus on applications of concepts for information security and security of an organization. This minor is especially helpful for students in all majors as companies across a variety of industries, such as banking, finance, and healthcare, need to keep rigorous standards and certifications in cyber security to maintain business operations.

**Undergraduate Minor in Cybersecurity (18–19 Credits)**

- CSIS 1800 Introduction to Computer and Information Sciences (3 credits)
- TECH 2020 Programming for Everyone (3 credits) OR CSIS 2101 Fundamentals of Computer Programming (4 credits)
- CSIS 3001 Introduction to Cybersecurity (3 credits)
- CSIS 3023 Legal and Ethical Aspects of Computers (3 credits)
- TECH 3100 Introduction to Data Science (3 credits)
- CSIS 4010 Computer Security (3 credits)
Department of Engineering

Engineering Major

The Department of Engineering offers a bachelor’s program in engineering. Students in the B.S. in Engineering program gain some strong knowledge and skills necessary to analyze and design systems in the areas of mechanical, materials science, biomedical, electrical, and industrial and systems engineering. Concentrations in biomedical engineering or industrial and systems engineering are available. The biomedical engineering concentration provides you with a foundation to design and analyze physiological systems, and medical devices. The industrial and systems engineering concentration provides you with a foundation to develop sustainable engineering solutions, achieve desired objectives and maximize resources. Graduates with strong engineering skills are highly sought by all industries.

Engineering Program Educational Objectives

Graduates of the Engineering Program will:

1. Apply their engineering education, knowledge, leadership, and skills to analyze technical and societal problems and develop creative and responsible solutions.
2. Communicate and function as an individual and team member in a professional environment.
3. Serve as engineering ambassadors and leaders to apply the highest professional standards of ethics and social responsibility.
4. Continue to develop their knowledge and skills through advanced study and lifelong learning.

Engineering Major Learning Outcomes

A successful engineering graduate is expected to:

1. An Ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgement to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Engineering Major Curriculum*

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Open Electives (6 credits)

Engineering Major Requirements (102 credits)

Students are required to complete 102 credit hours as part of the Engineering Program, which includes substantial course work in mathematics and the sciences. The Engineering major courses will include the following.

Mathematics (21 credits)

MATH 2100  Calculus I (4 credits)  OR  MATH 2100H Calculus I Honors (4 credits)
MATH 2200  Calculus II (4 credits) OR MATH 2200H Calculus II Honors (4 credits)
MATH 3200  Calculus III (4 credits)
MATH 3300  Introductory Linear Algebra (3 credits)
MATH 3400  Ordinary Differential Equation (3 credits)
MATH 4500  Probability and Statistics (3 credits)

Note: Six (6) credits of MATH may fulfill the General Education requirements.

**Sciences (16 credits)**
BIOL 1500  Biology I / Lab (4 credits)
CHEM 1300  General Chemistry I / Lab (4 credits) OR CHEM 1300H General Chemistry I/Lab Honors (4 credits)
PHYS 2400  Physics I / Lab (4 credits)
PHYS 2500  Physics II / Lab (4 credits)

Note: Six (6) credits of PHYS/BIOL/CHEM may fulfill the General Education requirements.

**Core Courses (50 credits)**
CENG 4910  Engineering Ethics Seminar (1 credit)
EENG 2710  Electrical Circuits/Lab (4 credits)
GENG 1000  Introduction to Engineering (1 credit)
GENG 1012  Engineering Graphics (3 credits)
GENG 1016  Introduction to Engineering Design (3 credits)
GENG 2000  Engineering Design and Project Management I (2 credits)
GENG 2022  Statics (3 credits)
GENG 2050  Computer Applications in Engineering (3 credits)
GENG 2070  Materials and Processes (3 credits)
GENG 2450  Dynamics (3 credits)
GENG 3000  Engineering Design and Project Management II (3 credits)
GENG 3012  Thermal and Fluid Systems (3 credits)
GENG 3024  Mechanics of Materials (3 credits)
GENG 3050  Sensors, Measurements, and Controls (3 credits)
GENG 3420  Engineering Economics (3 credits)
GENG 3800  Quality Control for Engineers (3 credits)
GENG 4010  Senior Capstone Design Project I (3 credits)
GENG 4020  Senior Capstone Design Project II (3 credits)

**Open Electives (16 credits)**

**Concentrations**
**Biomedical Engineering (15 credits)**
BENG 2080  Foundations of Biomedical Engineering (3 credits)
BENG 4030  Biomechanics and Materials (3 credits)
BENG 4040  Physiological Systems and Modeling for Engineering I (3 credits)
BENG 4050  Physiological Systems and Modeling for Engineering II (3 credits)
BENG 4200  Biomedical Instrumentation (3 credits)

**Industrial and Systems Engineering (15 credits)**
IENG 3010  Principles and Methods of Industrial and Systems Engineering (3 credits)
IENG 3060  Systems Optimization (3 credits)
IENG 4010  Work Measurement and Human Factors (3 credits)
IENG 4020  Analysis of Production Systems and Facility Design (3 credits)
IENG 4065  Discrete System Modeling (3 credits)

**Prerequisite Courses**
A prerequisite is a course that must be successfully completed prior to enrolling in a more advanced course. The successful completion of prerequisite courses demonstrates that a student has achieved the foundational knowledge and core competencies necessary to
move on to a more advanced course. The completion of prerequisite coursework is an essential component for registration for certain courses in the Computer Science Program and may not be overridden. As such, students in the Computer Science Program are not permitted to register for any course without first successfully completing all of said course’s mandatory prerequisites.
College of Psychology
I am pleased to extend you a warm welcome to Nova Southeastern University and the College of Psychology. We hope to guide you through a rich and transformative journey, where you will grow personally, academically, and socially on the road to becoming major contributors to our society. Our aim is to guide you in your scientific inquiry, as you explore the full breadth of the psychological and behavioral sciences, from basic research to various fields of practice.

Our College offers bachelor’s degree programs in psychology and neuroscience, as well as graduate programs in clinical and school psychology, counseling, experimental psychology, forensic psychology, and general psychology, along with other specialized training programs. Our outstanding faculty guide undergraduate students, not only in discovering and appreciating the factual content of their respective fields of study, but also in developing the critical thinking skills essential to consumers of science and the investigative skills of aspiring professionals, researchers, and clinicians.

The scope of psychology, counseling, neuroscience and related fields is expansive, as our disciplines describe and explain the effects of psychological processes from the level of individual brain cells to the scale of complex social interactions. The areas of expertise our faculty collectively possess are similarly diverse. Regardless of the specific field or subfield of study, our students benefit from the greater involvement that small classes provide and from the related opportunities for research collaborations and experiential placements in community settings.

While the lasting memories of the college experience include many events beyond the confines of the classroom, a college student’s day-to-day enjoyment depends largely on his or her chosen field of study and engagement with its particular subject matter. The College of Psychology is proud to house two of the most engaging majors available to students at our university, and is honored to figure positively in students’ memories of their college experience.

The College of Psychology prepares students for graduate programs in psychology, counseling, neuroscience, and health professions, as well as to embark upon careers in any of the numerous fields that require the critical thinking and communication skills, especially those careers that rely upon a keen understanding of human behavior and mental processes.

On behalf of the faculty and staff of the College of Psychology, I am pleased to welcome you to Nova Southeastern University. It is my sincere belief and hope that you will find your time here richly rewarding, both during your enrollment with us and, as alumni entering the workforce or continuing to pursue your educational goals.

Karen S. Grosby, Ed.D.
Dean, College of Psychology
Mission Statement

Nova Southeastern University’s College of Psychology offers programs in psychology and neuroscience that develop students’ critical thinking, research, and communication skills and foster our students’ commitment to community engagement and lifelong learning.

Introduction to the College

The College of Psychology offers comprehensive education in the psychological and brain sciences and prepares students for direct entry into a professional career or for further education in the form of graduate or professional school.

The College hosts two distinct undergraduate majors and five undergraduate minors. Additionally, the College administers the Psychological Studies concentration for the interdisciplinary Bachelor of Science degree in Applied Professional Studies. Each of these majors and minors is housed within the College’s Department of Psychology and Neuroscience. College policies, major and minor curricula, and additional information about the College of Psychology and its departments can be found in the appropriate sections of the undergraduate catalog (and, where applicable, the graduate catalog).

To earn a bachelor’s degree from the College of Psychology, a student must complete a minimum of 120 credit hours, inclusive of major, minor, general education, and elective courses. For further details, refer to the “See “Graduation Requirements” section on page 64 of this catalog.
Undergraduate Programs

The Bachelor of Science degrees offered through the College of Psychology include the majors in psychology and behavioral neuroscience.

Majors

NEUROSCIENCE MAJOR

The neuroscience major focuses on the biological basis of behavior by exploring the role of the nervous system in normal and abnormal behavior, thought, and emotion. It uses a multidisciplinary approach to study the organization and function of the nervous system, from the molecular to the behavioral level, in such areas as development, sensation and perception, cognition, learning and memory, movement, sleep, stress, aging, and neurological and psychological disorders. The major provides students with a program of study that prepares them to pursue entry-level positions in such areas as biomedical research and the pharmaceutical industry or graduate education in such disciplines as neuroscience, psychology, pharmacology, and medicine.

Neuroscience Major Learning Outcomes

A successful behavioral neuroscience graduate is expected to:

1. Demonstrate a foundation of knowledge in neuroscience;
2. Demonstrate the ability to independently develop a research proposal and evaluate the application and limitations of various methodologies;
3. Demonstrate the ability to communicate research findings from the field of neuroscience.

Neuroscience Major Curriculum

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Psychology Major**

The psychology major prepares students for both entry-level jobs in the workforce and advanced professional education in psychology. The psychology major exposes students to each of the major domains of psychology and provides students with a solid base of knowledge in each of these domains. It encourages students to integrate and apply knowledge, and allows flexibility in course selection to help students meet their career goals. The major emphasizes scientific research and application to significant areas of human activities.

**Psychology Major Learning Outcomes**

A successful psychology graduate is expected to:

1. Demonstrate an understanding of the major theories, principles, and concepts that underlie the following core areas of psychology:
   a. Learning, Memory, and/or Cognition
   b. Sensation, Perception, and/or Biological Bases of Behavior
   c. Human Development
   d. Clinical, Abnormal, and/or Personality
   e. Social Influences on Thoughts, Feelings, and Behaviors
   f. Research Measurement, Design, and Methodology;

2. Integrate and apply the major theories, principles, and concepts of psychology to address research and/or applied issues in the field of psychology using critical thinking skills, skeptical inquiry, and when possible, the scientific approach;

3. Present written psychological information in a clear, concise manner that is consistent with professional standards (i.e., APA format).

Major Foundation Courses (18 credits)

Learning, Memory, and/or Cognition (3 credits)
Select 3 credits from the following courses:
- PSYC 2010 Cognitive Processes (3 credits)
- PSYC 2300 Behavior Modification (3 credits)
- PSYC 3520 Principles of Learning (3 credits)

Sensation, Perception, and/or Biological Bases of Behavior (3 credits)
Select 3 credits from the following courses:
- PSYC 2100 Biological Bases of Behavior (3 credits)
- PSYC 3200 Evolutionary Psychology (3 credits)
- PSYC 3920 Sensation and Perception (3 credits)
- PSYC 4300 Psychophysiology (3 credits)
- PSYC 4400 Hormones and Behavior (3 credits)

Human Development (3 credits)
Select 3 credits from the following courses:
- PSYC 2350 Life-Span Human Development (3 credits) OR PSYC 2350H Life-Span Human Development Honors (3 credits)
- PSYC 2360 Adolescent Psychology (3 credits)
- PSYC 2370 Early Childhood Growth and Development (3 credits)

Clinical, Abnormal, and/or Personality (3 credits)
Select 3 credits from the following courses:
- PSYC 2020 Foundations of Clinical and Counseling Psychology (3 credits)
- PSYC 3210 Personality (3 credits)
- PSYC 3260 Abnormal Psychology (3 credits)

Social Influences on Thoughts, Feelings, and Behaviors (3 credits)
Select 3 credits from the following courses:
- PSYC 2160 Social Psychology (3 credits) OR PSYC 2160H Social Psychology Honors (3 credits)
- PSYC 3180 Stereotypes, Prejudice, and Discrimination (3 credits)
- PSYC 3360 Psychology of Gender (3 credits)

Methods and Application (3 credits)
Select 3 credits from the following courses:
- PSYC 3030 Experimental Psychology (3 credits)
- PSYC 4800 Practicum in Psychological Research (3 credits)
- PSYC 4810 Practicum in Community Psychology (3 credits)
- PSYC 4840 Advanced Practicum in Psychology (3 credits)

Psychology Major Electives (15 credits)
At least 9 of these credits must be at the 3000/4000 level.

Minors

Applied Behavior Analysis Minor

The applied behavior analysis minor is designed to address the growing need for behavior analysts in the community. Coupled with a major in psychology (or other fields), students graduate with a strong professional preparation in applied and research domains. Students are required to complete at least 90 hours of practicum experience as part of the minor. Students desiring to become certified in the applied behavior analysis field must complete additional supervised training hours to accrue the number of hours required for certification. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot
be counted toward any other majors/minors/certificate programs.

**Applied Behavior Analysis Minor Requirements (18 credits)**

- PSYC 2300  Behavior Modification (3 credits)
- PSYC 3330  Principles of Applied Behavior Analysis (3 credits)
- PSYC 3350  Assessment in Applied Behavior Analysis (3 credits)
- PSYC 3370  Interventions in Applied Behavior Analysis (3 credits)
- PSYC 3390  Single-Case Research Designs & Applications (3 credits)
- PSYC 4700  Practicum in ABA I (3 credits)

**Forensic Studies Minor**

The forensic studies minor brings the insights of several disciplines to bear on the criminal investigation process. This minor provides a multi-disciplinary course of study (criminal justice, psychology, and chemistry) and is an appropriate minor for students seeking a basic foundation in the essentials of crime scene investigation and analysis. It is a complementary minor for students majoring in criminal justice, psychology, chemistry, or legal studies, and provides a foundation for criminal justice practitioners seeking a basic understanding of forensic techniques. This minor is also an appropriate course of study for students majoring in other disciplines who have an interest in law enforcement and continued study in forensic science. This minor may be combined with any other major or minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Forensic Studies Minor Requirements (19 credits)**

- CHEM 1200  Survey of Forensic Science/Lab (4 credits)
- CRJU 3220  Policing (3 credits)
- CRJU 3400  Criminal Investigations (3 credits)
- CRJU 3700  The CSI Effect: Media and Criminal Justice (3 credits)
- PSYC 2450  Forensic Psychology (3 credits)
- PSYC 3270  The Psychology of Criminal Behavior (3 credits)

**Neuroscience Minor**

The neuroscience minor is intended to offer students in-depth training in brain-behavior relations and biological aspects of psychology. Neuroscience explores new discoveries and insights in dynamic areas such as the neurological origins of consciousness, emotion, and psychopathology. This minor is especially helpful for psychology students preparing for graduate school and for students planning to enter the medical fields who have an interest in brain-behavior relationships. This minor can be combined with any major and minor except the neuroscience major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Neuroscience Minor Requirements (17 credits)**

- NEUR 2500  Introduction to Neuroscience (4 credits)
- NEUR 2600  Introduction to Neuroanatomy (3 credits)
- NEUR 2700  Research Methods and Data Analysis in Neuroscience (4 credits)
- NEUR 3000  Behavioral Genetics (3 credits)

Select 3 credits from the following courses:

- PSYC 3900  Neuropsychology (3 credits)
- PSYC 3920  Sensation and Perception (3 credits)
- PSYC 4300  Psychophysiology (3 credits)
- PSYC 4400  Hormones and Behavior (3 credits)

**Psychology Minor**

The psychology minor is intended to provide students with an overview of psychology and the opportunity to explore areas of psychology that most closely correspond to their interests and goals. This minor can be combined with any major and minor except the psychology major and APS major with a concentration in psychological studies.
Psychology Minor Requirements (18 credits)
At least 9 credits in the minor must be at the 3000 level.

**Core Courses (6 credits)**
PSYC 1020    Introduction to Psychology (3 credits) OR PSYC 1020H Introduction to Psychology Honors (3 credits)
PSYC 3710    History and Theories of Psychology (3 credits) OR PSYC 3760 Multicultural Issues in Psychology (3 credits)

**Minor Electives (12 credits)**
Select 12 credits from the following courses:
PSYC 2010   Cognitive Processes (3 credits)
PSYC 2020   Foundations of Clinical and Counseling Psychology (3 credits)
PSYC 2100   Biological Bases of Behavior (3 credits)
PSYC 2160   Social Psychology (3 credits) OR PSYC 2160H Social Psychology Honors (3 credits)
PSYC 2350   Life-Span Human Development (3 credits) OR PSYC 2350H Life-Span Human Development Honors (3 credits)
PSYC 3000   Psychological Research Methods (3 credits)
PSYC 3210   Personality (3 credits)
PSYC 3260   Abnormal Psychology (3 credits)
PSYC 3520   Principles of Learning (3 credits)

**Psychology for Health Sciences Minor**
This psychology minor is ideal for students planning for graduate study and a career in the health sciences. The minor focuses on behavioral science topics most relevant to the health sciences, including cognition and consciousness, psychological disorders, social processes, and the biological bases of behavior, among others. Students preparing for the MCAT may find this minor particularly useful. This minor can be combined with any major and minor except the psychology major/minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Psychology for Health Sciences Minor Requirements (18 credits)**
PSYC1020   Introduction to Psychology (3 credits) OR PSYC 1020H Introduction to Psychology Honors (3 credits)
PSYC2010   Cognitive Processes (3 credits)
PSYC2100   Biological Bases of Behavior (3 credits)
PSYC2160   Social Psychology (3 credits) OR PSYC 2160H Social Psychology Honors (3 credits)
PSYC2350   Life-Span Human Development (3 credits) OR PSYC 2350H Life-Span Human Development Honors (3 credits)
PSYC3260   Abnormal Psychology (3 credits)
Dr. Kiran C. Patel College of Osteopathic Medicine
Dr. Kiran C. Patel College of Osteopathic Medicine

Dean’s Message

The Dr. Kiran C. Patel College of Osteopathic Medicine (KPCOM) is the founding college of NSU’s Health Professions Division. We currently offer four undergraduate academic programs, the Bachelor of Science in Public Health (B.P.H.) – pre-med and traditional public health, the Bachelor of Science in Human Nutrition (B.S.H.N.), the Bachelor of Science in Health and Wellness Coaching (HAWC), and the Bachelor of Science in Health Informatics (BSHI). As a KPCOM student, you have the opportunity for immersion in experiential learning, clinical research, global and domestic outreach and community-based collaborations. You will work with leaders in the profession in the basic sciences, researchers in population health issues, as well as esteemed KPCOM faculty, graduate, and medical students. KPCOM leads the way in providing a multitude of comprehensive, distinctive pathways to prepare students for rewarding, successful careers. Graduates are well trained for positions in public health, business and industry, education and research, health promotion, food and nutrition management, health informatics, and clinical practice.

Health Professions Division (HPD) Mission Statement

The mission of Nova Southeastern University Health Professions Division is to train primary care health practitioners in a multidisciplinary setting, with an emphasis on medically underserved areas.
The institutional premise is that health professionals should be trained in a multidisciplinary setting and, whenever possible, with integrated education. The university trains students in concert with other health profession students so that the various disciplines will learn to work together as a team for the good of the public’s health. During their didactic work, students share campus facilities and, in some cases, have combined classes. In their clinical experiences, they work together in facilities operated by the university.

Furthermore, the division aims to educate health care practitioners who will eventually increase the availability of health care in areas of Florida that suffer from health care shortages. The division aims to alleviate some of these shortages by exposing the entire student body to the needs, challenges, and rewards of rural, underserved urban, and geriatric care. Existing curricula require all students to attend ambulatory care clerkships in rural or urban areas, or both, making Nova Southeastern University strongly oriented toward a pattern of training its students in areas geographically removed from the health center itself, and to the care of indigent and multicultural population groups.

In doing this, it developed training programs that address the primary care needs of the region’s most medically underserved populations.

---

**College Mission Statement**

The mission of the Dr. Kiran C. Patel College of Osteopathic Medicine is to provide learner-centered education, both nationally and internationally, for osteopathic medical students, post-graduate trainees, physicians, and other professionals. Through its interprofessional programs, the College prepares competent and compassionate lifelong learners; supports research, scholarly activity, and community service; and advocates for the health and welfare of diverse populations including the medically underserved.

The mission of the Bachelor of Science in Public Health program is to develop a public health and healthcare workforce to improve population health and health equity through research, service, and dynamic learning experiences.

The mission of the Bachelor of Science in Human Nutrition is to prepare students for employment in various careers or for pursuit of advanced degrees through an innovative, engaging program that focuses on fundamental concepts in nutrition sciences, human health promotion, research trends, practical skills, and professional communication techniques. Graduates will generate improvements in global health and well-being through food and nutrition.

---

**Introduction to College**

NSU’s Health Professions Division is a dynamic, innovative, and interprofessional, academic center that is comprised of seven colleges, including the Dr. Kiran C. Patel College of Osteopathic Medicine. The Dr. Kiran C. Patel College of Osteopathic Medicine is nationally recognized as a result of the esteemed faculty and staff members who are known for working closely with students.

Faculty engage in ongoing personal interaction with students and are committed to the mentorship and advancement of each student in realizing their unique professional goals.

The Dr. Kiran C. Patel College of Osteopathic Medicine provides interprofessional education that prepares students for the following:

- Professional Careers
- Further exploration through graduate and professional study
Department of Couple and Family Therapy

The Dr. Kiran C. Patel College of Osteopathic Medicine welcomes you to the Department of Couple and Family Therapy. Students pursuing a Health and Wellness Coaching major in the Department of Couple and Family Therapy will have the opportunity to work directly with faculty in the classroom as well as in the community.

In the Health and Wellness Coaching Program, students will develop the knowledge and skills to coach clients of all ages, work closely with their families and health care systems, establish a private practice, and work in a community setting. The choice is yours!

**Major**

**HEALTH AND WELLNESS COACHING MAJOR**

The Bachelor of Science in Health and Wellness Coaching (BS-HAWC) degree is an excellent onramp to medical school, graduate degrees in family therapy, public health, or nutrition, in addition to a myriad of other graduate and professional programs. Working alongside professionals in the fields of family therapy, mental health, and medicine, you will learn critical strategies for engaging clients in their exploration and understanding of their unique paths toward wellness. The BS-HAWC degree is also an ideal foundation for students pursuing a medical career through the established dual admission track of completing the BS-HAWC in three or four years followed by a four-year Doctor of Osteopathic Medicine (D.O.) degree.

**Health and Wellness Coaching Major Learning Outcomes**

1. Communicate evidence-based information on health and wellness coaching to support individuals and groups to improve their health and wellbeing;
2. Monitor trends, issues, and policies in the area of health and wellness coaching and incorporate the information into curricula, training programs, and/or individual education sessions;
3. Apply principles of systemic family therapy to collaborate with clients to develop interventions in support of their health and wellbeing;
4. Demonstrate skills to provide personalized health solutions in a holistic manner, including the ability to develop tailored wellness plans in collaboration with clients and their support systems;
5. Apply research principles and methods to the examination of current problems in healthcare and other relational issues that are impacted by personal health;
6. Demonstrate the qualities needed to obtain post-graduate education and/or successfully enter the job market as a health and wellness coach;
7. Understand the role of human relationships in the promotion of physical and mental health.

**Health and Wellness Coaching Major Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Health and Wellness Coaching Major Requirements (57 credits)**

**Core Courses (39 credits)**

- HAWC 1000  Introduction to Coaching (3 credits)
- HAWC 1001  Human Systems and Family Relationships (3 credits)
- HAWC 1002  Overview of Lifespan Wellness (3 credits)
- HAWC 2003  Ethics of Coaching (3 credits)
HAWC 2030  Couple and Family Coaching (3 credits)
HAWC 2050  Coaching Diverse Populations (3 credits)
HAWC 3007  Solution Focused Coaching (3 credits)
HAWC 3008  Coaching Practicum I (3 credits)
HAWC 3010  Private Practice of Coaching (3 credits)
HAWC 3011  Coaching Practicum II (3 credits)
HAWC 3030  Recovery Coaching (3 credits)
HAWC 3031  Narrative Coaching (3 credits)
HAWC 4014  Research Methods and Evaluation in Coaching (3 credits)

**Health and Wellness Coaching Major Electives (18 credits required)**

HAWC 2004  Coaching in Schools and Community Agencies (3 credits)
HAWC 2005  Coaching in Health Care Systems (3 credits)
HAWC 2006  Mindfulness and Meditations for Health (3 credits)
HAWC 2031  Coaching across the LifeSpan (3 credits)
HAWC 3019  Integrative Wellness Approaches (3 credits)
HAWC 3020  Diabetes Education and Coaching (3 credits)
HAWC 3032  Trauma Coaching (3 credits)
HAWC 3033  Grief Coaching (3 credits)
HAWC 4012  Advanced Solutions Focused Coaching I (3 credits)
HAWC 4025  Advanced Solution Focused Coaching II (3 credits)
HAWC 4990  Independent Study (1-3 credits)

Students in good standing in our 3+4 Dual Admission Doctor of Osteopathic Medicine program may use credits from the first year medical school curriculum (in osteopathic medicine) at NSU, in lieu of taking the major electives required for this undergraduate major. These students must submit the application for their undergraduate degree upon completion of the first year of medical school.

*Students are permitted to take 9 credits of the required 18 major elective credits from the BPH (Bachelor of Science in Public Health), BSHN (Bachelor of Science in Human Nutrition), and/or (BSHI) Bachelor of Science in Health Informatics course prefixes.

---

**Minor**

**Health and Wellness Coaching Minor**

The Health and Wellness Coaching Minor provides curriculum to explore coaching across the lifespan. Academic coursework covers the foundations of coaching, systems theory, and behavioral health. Our innovative and clinical faculty offer students a practical look into the benefits and challenges of a career in health and wellness coaching.

**Health and Wellness Coaching Minor Requirements (18 credits)**

HAWC 1000  Introduction to Coaching (3 credits)
HAWC 1002  Overview of Lifespan Wellness (3 credits)
HAWC 2003  Ethics of Coaching (3 credits)

**AND**

Select 9 credits from any of the required or elective courses in the HAWC (Bachelor of Science in Health and Wellness Coaching), BPH (Bachelor of Science in Public Health), BSHN (Bachelor of Science in Human Nutrition) programs, and/or BSHI (Bachelor of Science in Health Informatics) course prefixes.
Prepare to use the power of nutrition to fuel your career options. Food and nutrition occupations are among today’s fastest growing occupations, more than double the national average. The Bachelor of Science in Human Nutrition (BSHN) program delivers broad knowledge in applied nutrition, nutrition education, public policy, advocacy, nutrition therapy, leadership and management, and food production. Completing this degree can open doors to exciting career opportunities and further graduate studies. Students are well prepared for positions in public health, business and industry, education and research, health promotion, food and nutrition management and clinical dietetics. A B.S. in Human Nutrition will also distinguish you and provide a foundational pathway to pursue many graduate programs at Nova Southeastern University (NSU), including, but not limited to osteopathic medicine, allopathic medicine, nutrition, public health, physical therapy, physician assistant, athletic training, and exercise and sports science.

**Major**

**HUMAN NUTRITION MAJOR**

The program will present the essential concepts from nutrition and dietetics, health and wellness, and current research in an innovative curriculum that builds upon the medical sciences such as anatomy, chemistry, biochemistry, and microbiology. Courses and experiential activities throughout the program provide a practical focus that will complement many areas of interest, such as community programming, sports and fitness, food services, business, marketing and communications, public health, and professional practice.

Overall, an important goal of the BSHN program is to provide strong preparation for future medical students in an area of study closely aligned with preventative health care and medicine. NSU’s Dual Admission Program is one of the first in the nation to offer an accelerated, seven-year academic path from the BSHN program to the Doctor of Osteopathic Medicine Degree (D.O.). Information regarding dual-admission programs can be obtained through the Office of Undergraduate Admissions.

**Human Nutrition Major Learning Outcomes**

1. Explain and apply scientific concepts by which nutrients are consumed, digested, metabolized, absorbed and excreted through biological functions;
2. Differentiate nutritional needs throughout the lifecycle and implement appropriate interventions that are sensitive to cultural practices and beliefs;
3. Integrate wellness guidelines in promoting healthy nutrition behaviors and health risk reduction through public health applications;
4. Demonstrate appropriate communication skills and abilities related to nutrition topics in both group and individual experiences;
5. Evaluate the economic, political, social, cultural, and agricultural factors that influence food and nutrition policies that impact safe food access and population health;
6. Utilize management and leadership concepts in food service systems such as menu planning, cost analysis, staffing, food safety, and the nutrition care process.

**Human Nutrition Major Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Human Nutrition Major Requirements (57 credits)**

**Core Courses (42 credits)**

- BSHN 1200 Nutrition for the Health Professions (3 credits)
- BSHN 1300 Careers in Nutrition (3 credits)
BSHN 1400 Nutrition Seminar (3 credits)
BSHN 2000 Principles of Wellness (3 credits)
BSHN 2100 Food and Culture (3 credits)
BSHN 2300 Nutrition Education, Counseling, and Communication (3 credits)
BSHN 2400 Community Nutrition (3 credits)
BSHN 2500 Introduction to Food Service Systems (3 credits)
BSHN 3000 Life Span Nutrition (3 credits)
BSHN 3100 Nutrition Advocacy and Public Policy (3 credits)
BSHN 3200 Nutrition at the Cellular Level (3 credits)
BSHN 4000 Exploring Nutrition Research (3 credits)
BSHN 4100 Principles of Medical Nutrition Therapy (3 credits)
BSHN 4200 Human Function and Nutrition (3 credits)

**Human Nutrition Major Electives (15 credits required)**

*Students are permitted to take 6 credits of the required 15 major elective credits from the BPH (Bachelor of Science in Public Health) and/or HAWC (Bachelor of Science in Health and Wellness Coaching) course prefixes.*

BSHN 2250 Hot Topics in Nutrition (3 credits)
BSHN 3300 Global Nutrition (3 credits)
BSHN 3400 Plant-Based Nutrition (3 credits)
BSHN 3500 Interprofessional Models of Nutrition Care (3 credits)
BSHN 3600 Nutritional Implications for Special Populations (3 credits)
BSHN 4300 Nutritional Science and Academic Writing (3 credits)
BSHN 4400 Directed Individual Study (3 credits)
BPH 4900 Global Outreach and Applied Learning (3 credits)
BPH 4901 Domestic Outreach and Applied Learning (3 credits)
BPH 4901B Local Outreach and Applied Learning (3 credits)

Students in good standing in our 3+4 Dual Admission Doctor of Osteopathic Medicine program may use credits from the first year medical school curriculum (in osteopathic medicine) at NSU, in lieu of taking the major electives required for this undergraduate major. These students must submit the application for their undergraduate degree upon completion of the first year of medical school.

**Minor**

---

**Human Nutrition Minor**

The Human Nutrition minor provides a focused curriculum in the life sciences, health and wellness, nutrition communication, and population health. The 18-credit course of study prepares students with a broad understanding of the intricate relationships between nutrition and human health. This minor can be combined with any major and minor.

**Human Nutrition Minor Requirements (18 credits)**

*PLUS*

BSHN 1200 Nutrition in the Health Professions (3 credits)
BSHN 2000 Principles of Wellness (3 credits)
BSHN 2300 Nutrition Education, Counseling, and Communication (3 credits)
BSHN 3000 Lifespan Nutrition (3 credits)

Select 6 credits from any of the required or elective courses in the BSHN (Bachelor of Science in Human Nutrition), Bachelor of Science in Public Health (BPH), the HAWC (Bachelor of Science in Health and Wellness Coaching), and/or the BSHI (Bachelor of Science in Health Informatics) course prefixes.
Department of Public Health
Pre-Med and Professional Health Options

There is a growing need for public health professionals to address emerging and re-emerging diseases, environmental health concerns, health care reform, proliferation of agents and weapons of mass destruction, sociopolitical factors affecting health and health care systems, and global health. Public health professionals may work in a variety of settings including health care facilities, county and state health departments, social service agencies, health policy and planning organizations, colleges and universities, community-based health education and health promotion centers, nonprofit organizations, government and nongovernmental health organizations, and the corporate world.

Major

PUBLIC HEALTH MAJOR

Public health is one of the most in-demand fields in healthcare. This unique undergraduate program integrates a public health core curriculum with current healthcare topics influencing populations on both a global and local scale. Students who complete this program will have a solid foundation in public health that is crafted from a combination of hands-on experiences and faculty-led instruction.

An undergraduate degree in public health is also an ideal option for students pursuing a medical career through the established track of completing the B.S.P.H. in three or four years followed by a four-year Doctor of Osteopathic Medicine (DO) degree. A dual admission program is available for qualified, high-achieving students. Information regarding dual-admission programs can be obtained through the Office of Undergraduate Admissions.

Public Health Major Learning Outcomes

1. Demonstrate a working knowledge of the core areas of public health education: epidemiology; biostatistics; environmental health; social and behavioral sciences;
2. Demonstrate essential knowledge of the core functions of public health: assessment, policy development and assurance;
3. Demonstrate an understanding of the ecological model of health behavior and the logic model of public health practice;
4. Apply evidence-based principles to public health practice;
5. Demonstrate an understanding of the principles of research design and analysis;
6. Describe the scientific foundation for understanding health and disease, as well as chronic, infectious and emerging diseases;
7. Demonstrate essential knowledge of population health and vulnerable population groups;
8. Explain the impact of health behaviors, ethics, diversity and culture;
9. Identify emerging topics in public health, including nutrition, disaster preparedness, and infectious diseases.

- BPH 1020  Principles of Health Behavior (3 credits)
- BPH 2050  Community Health (3 credits)
AND
Select 9 credits from any of the required or elective courses in the BPH (Bachelor of Science in Public Health), the BSHN (Bachelor of Science in Human Nutrition), and/or the HAWC (Bachelor of Science in Health and Wellness Coaching).
Department of Health Informatics

Health Informatics (HI) is an emerging field comprised of a conceptual framework of technology, informatics, and a practical knowledge of health care. The past decade has seen an explosive use of technology in health care, which continues today. This has created a demand for well-trained HI workers across all health sectors. Graduates of the program will have confidence to work successfully in a variety of settings such as public or private health care organizations, academia, or the corporate world. Graduates will be well poised to access a variety of professional career opportunities including manager medical informatics, systems data analysis and data entry specialist, health information technician, implementation specialist, clinical specialist, and systems analysts.

Major

Health Informatics Major

The undergraduate HI program is a unique program both locally and nationally for a variety of reasons. The program represents a collaborative effort between two prominent colleges, Dr. Kiren C. Patel College of Osteopathic Medicine (KPCOM) and the College of Computing and Engineering (CCE). The undergraduate degree in HI is also an ideal option for students pursuing a medical career through the established track of completing the B.S.H.I. in three or four years followed by a four-year Doctor of Osteopathic Medicine (DO) degree. A dual admission program is available for qualified, high-achieving students. The program offers a dual admission option into the MS program in Biomedical Informatics. Information regarding dual-admission programs can be obtained through the Office of Undergraduate Admissions.

The HI curriculum is purposely structured to allow students to explore and learn the field of HI and its impact locally, nationally, and globally. Graduates of the program will have a solid foundation in HI. The HI program utilizes a combination of practical experiences and faculty-led instruction that engages and immerses students in the subject. Fundamental and advanced topics include the health care system, legal and ethical issues in HI, security in HI, analytics, and data science. Students will have HI focused electives from which to choose from that will expand their knowledge and skills such as management and leadership, project management, bioinformatics, research methods, computer programming, and human computer interaction.

Health Informatics Major Learning Outcomes

1. Demonstrate essential knowledge of the core areas of HI: health information science and technology; informatics; and a practical knowledge of health care;
2. Analyze HIT issues and identify, design, implement solutions;
3. Interpret the impact that the legal, and regulatory requirements have on HIT;
4. Develop skills in the managerial sciences and leadership, and apply appropriately to the HIT environment;
5. Recognize how social and behavior sciences impact health systems and HIT;
6. Demonstrate the abilities necessary to pursue graduate education and/or successfully enter the job market;

Health Informatics Major Curriculum

Health Professions Division Mission Statement

The mission of Nova Southeastern University Health Professions Division is to train primary care health practitioners in a multidisciplinary setting, with an emphasis on medically underserved areas.

The institutional premise is that health professionals should be trained in a multidisciplinary setting and, whenever possible, with integrated education. The university trains students in concert with other health profession students so that the various disciplines will learn to work together as a team for the good of the public’s health. During their didactic work, students share campus facilities and, in some cases, have combined classes. In their clinical experiences, they work together in facilities operated by the university.

Furthermore, the division aims to educate health care practitioners who will eventually increase the availability of health care in areas of Florida that suffer from health care shortages. The division aims to alleviate some of these shortages by exposing the entire student body to the needs, challenges, and rewards of rural, underserved urban, and geriatric care. Existing curricula require all students to attend ambulatory care clerkships in rural or urban areas, or both, making Nova Southeastern University strongly oriented toward a pattern of training its students in areas geographically removed from the health center itself, and to the care of indigent and multicultural population groups.

In doing this, it developed training programs that address the primary care needs of the region’s most medically underserved populations.

Dr. Pallavi Patel College of Health Care Sciences Mission Statement

The Dr. Pallavi Patel College of Health Care Sciences strives to provide professionals with the skills necessary for the diagnosis, treatment and prevention of disease and disability in order to assure optimum health conditions in the community and beyond. With an unwavering commitment to ethical practice and in support of the Nova Southeastern University Core Values, the College endeavors to advance research, scholarship, and the development of leadership skills utilizing traditional educational methods, distance learning, and innovative combinations of both to achieve its educational goals.

Dr. Pallavi Patel College of Health Care Sciences Vision Statement

The Dr. Pallavi Patel College of Health Care Sciences will be recognized as a local, national, and international leader in health-care education through excellence and innovation in teaching, scholarship, and service.

Introduction to the College

The Dr. Pallavi Patel College of Health Care Sciences is committed to providing the highest quality education to students in a variety of health care disciplines. The Dr. Pallavi Patel College of Health Care Sciences offers seven undergraduate degrees.

- Bachelor of Science—Cardiovascular Sonography
- Bachelor of Science—Exercise and Sports Science
- Bachelor of Science—Medical Sonography
- Bachelor of Health Science—Online
- Bachelor of Science in Respiratory Therapy—First-Professional Program
- Bachelor of Science in Respiratory Therapy—Post-Professional Program (online)
- Bachelor of Science—Speech Language and Communications Disorders

Notice on Professional Examinations

Credits and degrees earned from colleges within the state of Florida that are licensed by the State Board of Independent Colleges and Universities do not automatically qualify the individual to participate in professional examinations in Florida. The established procedure requires the appropriate state professional board to review and recognize the colleges granting the degrees prior to
scheduling examinations. Additional information regarding Nova Southeastern University Health Professions Division and its Colleges of Osteopathic Medicine, Pharmacy, Optometry, Health Care Sciences, Medical Sciences, Dental Medicine, and Nursing may be obtained by contacting the State Board of Independent Colleges and Universities, Department of Education, Tallahassee, Florida. Any student interested in practicing a regulated profession in Florida should contact the Department of Business and Professional Regulation, 2009 Apalachee Parkway, Tallahassee, Florida 32301.

Martin and Gail Press Health Professions Division Library

The Martin and Gail Press Health Professions Division Library is located on the first floor at the north end of the Terry Building Complex in the Library/Lab Building. The collection consists of more than 17,000 print volumes, 700+ electronic books, and 8,000+ active medical/health journal subscriptions in both print and digital formats. Many of the available electronic texts are required textbooks in various courses. In addition, more 210 medical/health databases are available 24/7 to meet the needs of the seven HPD colleges. All students have access to the full resources of all NSU libraries, both print and online. Medical/health databases include Medline, CINAHL, Clinical Key (which includes Procedures Consult and First Consult), Lexi-Comp, UpToDate, Web of Science, as well as many databases specific to individual programs. The Interlibrary Loan/Document Delivery Office will provide additional journal articles, books, and items not available digitally to any student at no cost. All resources are available through the Martin and Gail Press Health Professions Division Library home page (nova.edu/hpdlibrary). In addition, free notary service is available during business hours.

Professional reference services are available via phone, text, email, or face to face. Seven professional librarians are available for help with searching, finding full-text journals, citation reference management, and research strategies. Each HPD college/program is assigned a subject specialist liaison librarian who works closely with faculty and offer assistance with specific class assignments.

Quiet study areas are designated in the library with a variety of seating options available, from large tables to individual carrels and comfortable seating. There are 48 individual/small group study rooms in the library and adjacent Assembly II Building. Rooms may be checked out for up to three hours. All rooms are equipped with white boards and Wi-Fi. A small teaching lab is available for group instruction and there is a large group study hall. Two 50-station computer labs are open when the library is open. In addition, a production studio is available for student use for video recording, and video editing.

A common area provides space for collaborative projects and is equipped with two Media:scape units or collaboration using multiple laptops with single or double monitor displays for group work. The library has both PC and Mac computers for student use, as well as iPads for short-term checkout, each loaded with 100 medical and production apps. Other library services include binding, faxing, and scanning services; earplugs; sports equipment for the student lounge; school supplies for sale; and coffee service.

Hours of operation for the Martin and Gail Press Health Professions Division Library, Study Center rooms in Assembly II, and adjoining computers labs are: Monday–Thursday: 7:00 a.m.–midnight; Friday: 7:00 a.m.–9:00 p.m.; Saturday and Sunday: 10:00 a.m.–midnight. From September through May, the study rooms in the Assembly II building are open 24/7. For more information, please call (954) 262-3106.

Students also have check out privileges at other NSU libraries, including the Shepard Broad College Law Panza Maurer Law Library; the Oceanographic Center Library; and the Alvin Sherman Library, Research, and Technology Center (a joint-use facility with the Broward County Board of County Commissioners).

See the “Libraries” section of the NSU Student Handbook for information about NSU’s Alvin Sherman Library.

HPD Policies and Procedures

Acceptance of Professional Fees

The activities of students are not to be construed as the practice of medicine, optometry, pharmacy, audiology, occupational therapy, physical therapy, physician assistant, anesthesiologist assistant, cardiovascular sonography, medical sonography, respiratory therapy, nursing, dentistry, public health, nutrition/dietician, or speech-language therapists. It is a violation of the law and contrary to the policy of this university for any unlicensed person to attempt to engage in the professional practice of health care. Students who are appropriately licensed in a profession may engage in that professional work to the extent provided by law.
AIDS POLICY

The university has adopted the following AIDS policy: Nova Southeastern University Health Professions Division recognizes its responsibilities for the health and welfare its students and faculty and staff members, as well as its responsibilities to patients suffering from AIDS or harboring the human immunodeficiency virus (HIV). While the division does not subscribe to compulsory HIV testing either as a screening device or in individual cases, some rotation sites require this test and students must comply. As an institution of medical learning, the division provides each student knowledge to understand the AIDS problem, including AIDS testing, treatment, and counseling by community services. The division recommends universal precautions in all laboratory and clinical settings. The division reserves the right to alter this policy as new information on AIDS becomes available. Students should consult their physician for HIV testing or treatment immediately following exposure.

BACKGROUND CHECKS

Accepted applicants and students are required to authorize the NSU Health Professions Division to obtain background check(s) as per adopted policy of March 2011. If the background check(s) reveal information of concern, which the NSU Health Professions Division may deem unfavorable, HPD will request that the individual provide a detailed written explanation of the information contained in this report, along with appropriate documentation (e.g., police reports). Students may also be required to authorize clinical training facilities that they are assigned to by the Health Professions Division to obtain a background check with the results reported to the clinical training facility.

Offers of admission will not be considered final until the completion of the background check(s), with results deemed favorable by the NSU Health Professions Division, and, where appropriate, by the clinical training facilities. If information received indicates that the student has provided false or misleading statements, has omitted required information, or in any way is unable to meet the requirements for completion of the program, then the admission may be denied or rescinded, the student may be disciplined or dismissed, or his or her enrollment terminated.

Acceptance to an NSU Health Professions Division program does not guarantee that a student with information of a concern will be accepted by clinical training facilities to which they may be assigned.

Following the initial background check(s), students will be asked annually to provide a certification relating to any convictions or guilty or no-contest pleas to any criminal offense other than traffic violations. Additionally, a Level 2 background check may be required of students completing certain rotations.

CERTIFICATE OF PHYSICAL EXAMINATION

Students must have a certificate of physical examination completed by their physician. Forms will be provided to each matriculant as part of the admissions package or can be downloaded from nova.edu/smc/immunization-forms.

Students may request that the University Health Service perform these examinations. The University Health Service will make appointments in as timely a manner as possible. The appointments, once made, become an obligation of the student and must be kept.

These certificates (whether done privately or by the university) will be placed in an appropriate site.

The student should carry a copy of their health/hospitalization insurance card with them to the clinical agency, as well as their BLS card.

CORE PERFORMANCE STANDARDS FOR ADMISSION AND PROGRESS

The Nova Southeastern University Health Professions Division is pledged to the admission and matriculation of qualified students and wishes to acknowledge awareness of laws that prohibit discrimination against anyone on the basis of race, color, religion or creed, sex, pregnancy status, national or ethnic origin, non-disqualifying disability, age, ancestry, marital status, sexual orientation, unfavorable discharge from the military, veteran status, or political beliefs or affiliations.

Regarding those students with verifiable disabilities, the university will not discriminate against such individuals who are otherwise qualified, but will expect applicants and students to meet certain minimal technical standards (core performance standards) as set forth herein with or without reasonable accommodation. In adopting these standards, the university believes it must keep in mind the ultimate safety of the patients whom its graduates will eventually serve. The standards reflect what the university believes are reasonable expectations required of health professions students and personnel in performing common functions.
INTERPERSONAL COMMUNICATION

Candidates and students must be able to interact and communicate effectively with respect to policies, protocols, and process, with faculty, students, staff, patients, patient surrogates, and administration during the student’s educational program. They must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but also reading and writing. Candidates and students must also be able to communicate effectively and efficiently in all written forms with all members of the health care team. They must have interpersonal abilities sufficient to interact with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds.

The holders of health care degrees must have the knowledge and skills to function in a broad variety of clinical situations and to render a wide spectrum of patient care. In order to carry out the activities described below, candidates for Health Professions Division degrees must be able to integrate consistently, quickly, and accurately all information received, and they must have the ability to learn, integrate, analyze, and synthesize data.

Candidates for degrees offered by the Health Professions Division must have, with or without reasonable accommodation, multiple abilities and skills including intellectual, conceptual, integrative, and quantitative abilities; interpersonal communication; mobility and strength; motor skills; hearing, visual, tactile, behavioral, and social attributes. Candidates for admission and progression must be able to perform these abilities and skills in a reasonably independent manner.

INTELLECTUAL, CONCEPTUAL, INTEGRATIVE, AND QUALITATIVE ABILITIES

These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving—a critical skill—requires all of these intellectual abilities. Candidates and students must have critical thinking ability sufficient for good clinical judgment. This is necessary to identify cause-effect relationships in clinical situations and to develop plans of care. In addition, candidates and students should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. An individual is expected to be able to perform multiple tasks in a diverse, dynamic, highly competitive, and challenging learning environment. All individuals are expected to meet their program requirements on a satisfactory level as determined by HPD administration or the applicable college/program administration.

MOTOR SKILLS

Candidates and students should have sufficient motor function to execute movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required to some health care professionals are cardiopulmonary resuscitation, administration of intravenous medication, the application of pressure to stop bleeding, the opening of obstructed airways, and the ability to calibrate and use various pieces of equipment. Such actions require coordination of both gross and fine muscular movements, equilibrium and functional use of the senses of touch and vision. Physical therapy and occupational therapy students must be able to position patients for treatment, as well as teaching the teaching the functions involving gross and fine movements. Pharmacy candidates and students must have sufficient motor skills to weigh chemical and pharmaceutical (including intravenous) solutions, prepare prescriptions, and carry out sterile procedures.

STRENGTH AND MOBILITY

Candidates and students must have sufficient mobility to attend to emergency codes and to perform such maneuvers as CPR when required. They must have the physical ability to move sufficiently from room to room and to maneuver in small places. Osteopathic medical students must have the ability to position patients for the administration and delivery of osteopathic manipulative treatment in a variety of settings and to position and move patients when required. Pharmacy students must be able to move about within a pharmacy setting and a patient’s room. Physical therapy and occupational therapy students must be able to administer treatment in a variety of settings and positions and move patients when required.

HEARING

Candidates and students should have sufficient auditory ability to monitor and assess health needs. They must be able to hear information given by the patient in answer to inquiries; to hear cries for help; to hear features in an examination, such as the auscultatory sounds; and to be able to monitor equipment.

VISUAL

Candidates and students must have visual ability sufficient for observation and assessment necessary in patient care. It must be consistent in many cases with being able to assess asymmetry, range of motion, and tissue texture changes. Osteopathic Medicine, Optometry, and Physician Assistant students must have sufficient visual ability to use ophthalmologic instruments. It is necessary to
have adequate visual capabilities for proper evaluation and treatment integration. Candidates and students must be able to observe the patient and the patient’s responses including body language and features of the examination and treatment. Pharmacy students must be able to interpret prescriptions and medical orders, as well as to inspect medicine for deterioration or expiration.

**TACTILE**

Candidates and students must have sufficient tactile ability for physical assessment. They must be able to perform palpation, functions of physical examination, and/or those related to therapeutic intervention. Pharmacy students must be able to measure and compound, sometimes transferring from container to container and to carry out sterile procedures. Dental students must be able to deliver appropriate treatment using high technology equipment such as dental drills and surgical instruments.

**BEHAVIORAL AND SOCIAL ATTRIBUTES**

Candidates and students must possess the emotional health required for full use of their intellectual abilities; the exercise of good judgment; the ability to take responsibility for their own actions with respect to policies, protocols, and process, with faculty, students, staff, patients, patient surrogates, and administration during the student’s educational program; the prompt completion of all responsibilities attendant to the diagnosis and care of patients; and the development of mature, sensitive, and effective relationships with the patients. Candidates and students must be able to physically tolerate taxing workloads, to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal skills, interest, and motivation are all personal qualities that will be assessed during the admissions and education process.

**SENSORY**

Osteopathic students and physician assistants are required to have an enhanced ability to use their sensory skills. These enhanced tactile and proprioceptive sensory skills are essential for appropriate osteopathic evaluation and treatment of patients.

---

**DRESS CODE**

Students in the Health Professions Division must maintain a neat and clean appearance befitting those attending professional school. Therefore, attire should convey a professional appearance whenever the student is on the division campus and in classes or laboratory or on an experiential rotation or program.

The following constitute acceptable attire:

1. Identification badges will be issued at the One-Stop Shop in the Health Professions Division, in the Horvitz Administrative Building, or from the Office of Student Affairs for distance program students, and must be worn and visible at all times when the student is on campus or at a clinical rotation. Please note that ID badges are necessary for proper use of on-campus auditoriums, library and recreational facilities, offices, laboratories, and certain restricted parking areas. These badges are given to the students at no charge, except for replacement.
2. Students must wear their white consultation jackets with their names and appropriate college/program designation embroidered over or on the left breast pocket. A white jacket is to be worn daily over the prescribed attire, unless the student is in the College of Medical Sciences (where a professional dress code is still required at all times).
3. Shirt, tie, slacks, socks, and regular shoes for men, and for women it should be professional business dress, which includes slacks, pants, or skirt with blouse or dress and appropriate shoes or matching scrub sets, socks, and shoes.

Students **may not** wear the following:

- shorts
- cut-offs
- mini-skirts (higher than mid-thigh)
- jeans
- see-through clothing or halter-tops
- open-toed shoes—including beach/flip-flops, sandals, thong footwear, or plastic clogs with holes on sides or top (Croc type)
- T-shirts (as the outer shirt)
- jogging or exercise clothing
- hats or caps, unless of a religious nature
All individuals who work or study in the clinic environment must be proactive in reducing the potential for workplace foot injuries. No open-toed shoes are to be worn in the clinics. These guidelines apply on campus from 8:00 a.m.–5:00 p.m., Monday through Friday, and while on duty on rotations.

Students inappropriately dressed or groomed may be requested to leave the campus. In this circumstance, an unexcused absence will be recorded until the student returns properly attired. Questionable or disputed cases of dress or grooming shall be presented to the dean, whose decision shall be final. Repeated violations will be considered improper professional behavior and may result in disciplinary action. When a class requires special dress (such as the wearing of scrub suits in anatomy laboratory or shorts in clinical skills laboratories), it will be the only exception to the dress code allowed during that time.

The dress code is to be observed at all times including midterms and examination periods. Students are expected to consult their specific program handbooks for compliance with any program-specific, clinical rotation site-supplemental dress code policies.

Students taking courses in the Exercise and Sport Science program may make exception to the dress code and should adhere to the requirements in their course syllabi.

**CARDIOVASCULAR LABORATORY UNIFORM DRESS CODE**

Students in the didactic phase of the curriculum will be required to wear a uniform for training in the ultrasound teaching lab. Students also may be required to wear this uniform during end-of-rotation seminars within the clinical year. This uniform will include a gray, short-sleeved T-shirt, either plain or with the Cardiovascular program or NSU logo on the front. No logo or writing should be on the back of the T-shirt. Pants must be navy blue gym-type shorts with an elastic waistband and draw strings, either plain or with the program or NSU logo on the pant leg. All students must be prepared and able to remove the T-shirt for thoracic, cardiac, chest wall, and abdominal examination at any time during training in the ultrasound teaching lab. Therefore, females must wear a sports bra or similar under attire beneath the T-shirt. Athletic shoes and socks must be worn at all times in the lab, except as dictated by the instructor for specific training purposes. This uniform is permitted to be worn only in the ultrasound teaching lab. Upon leaving a lab session, unless immediately leaving the NSU campus for the day, the program specific white clinical jackets must be worn and students should change back into normal professional attire as described above.

**MEDICAL SONOGRAPHY LABORATORY UNIFORM DRESS CODE**

During the laboratory sessions on-campus, students are required to wear proper program approved attire and lab coats. Besides, students must have available a pair of short pants and T-shirts which are loose-fitting enough to allow scanning. All students must be prepared and able to remove the T-shirt for thoracic, cardiac, chest wall, upper extremities, and abdominal examination as well as to roll short pants properly for lower extremities examinations at any time during training in the ultrasound teaching lab. In some labs such as cardiac training, female students will be expected to wear a sports bra and tank top. Athletic shoes and socks must be worn at all times in the lab, except as dictated by the instructor for specific training purposes. This uniform is permitted to be worn only in the ultrasound teaching lab. Upon leaving a lab session, unless immediately leaving the NSU campus for the day, the program specific white clinical jackets must be worn and students should change back into normal professional attire as described above.

**RESPIRATORY THERAPY LABORATORY/CLINICAL UNIFORM DRESS CODE**

Students in clinical rotations will be required to wear proper program approved attire and lab coat. This uniform will include matching pewter scrub tops and pants. Style of top and pants are on file. White lab coat, with BSRT patch on left sleeve, must be worn at all times on campus and at clinical sites. Lab coat must be ordered through the NSU bookstore. Solid color t-shirts in black, gray, or white may be worn under scrubs. Clean, white, gray, or black, rubber-soled shoes shall be permitted. If clog type shoe (no CROCS) are worn, backs must be closed. While on campus students may wear either prescribed pewter scrub or business casual attire with lab coat.

**IDENTIFICATION BADGES**

Students must wear identification badges at all times while on campus. ID badges are not transferable. ID badges are issued at the Division Badge Room. These badges are given to the students at no charge except for replacement.

**Identification Requirements and Fieldwork Prerequisites**

An affiliated clinical/fieldwork teaching facility may also require a student to pass a state of Florida Department of Health screening before rotation. Other requirements, which may be held by the affiliated facility include, but are not limited to, fingerprinting, criminal background check, urinalysis for drugs and alcohol, and proof of immunization. If a student does not meet all requirements held by
the affiliated facility before the first day of the scheduled placement, the student’s placement will be canceled, or if the placement has begun, the student will be asked to leave.

**Immunization Requirements**

Students must complete a mandatory immunization form, which must be signed by a licensed health care provider. The form can be found at [nova.edu/smc](http://nova.edu/smc).

Students in the Health Professions Division may be required to upload proof of immunizations to multiple online portals to satisfy the requirements of their programs and the training facilities where they are assigned.

The following immunizations/vaccinations are required of students at the Health Professions Division based on the current Centers for Disease Control (CDC) recommendations for Health Care Personnel:

**BASIC IMMUNIZATIONS**

Every student is required to have had an immunization for, or show evidence of immunity to, the following diseases before matriculating at Nova Southeastern University:

**HEPATITIS B**

- Both of the following are required: three vaccinations and positive surface antibody titer. (Lab report is required.)
- If the series is in progress, evidence of at least one shot must be provided, and the renewal date will be set accordingly.
- If the titer is negative or equivocal, the student must repeat the series and provide repeat titer report.

**INFLUENZA VACCINATION**

Administered annually. (An annual, seasonal influenza vaccine is required by most clinical sites.)

**MEASLES, MUMPS AND RUBELLA (MMR)**

*One of the following is required:* Proof of two vaccinations, or positive antibody titer for measles (rubeola), mumps, and rubella. (Lab report is required.)

**PPD SKIN TEST (2 STEP)**

*One of the following is required:* negative two-step test or negative blood test (such as QuantiFERON Gold Blood Test or T-Spot Test) or if positive PPD results, provide a chest X-ray and/or prophylactic treatment information within the past 12 months.

**TETANUS TOXOID, DIPHTHERIA TOXOID, AND ACELLULAR PERTUSSIS VACCINE (Tdap)**

All students are required to have had a Tetanus Toxoid, Diphtheria Toxoid, and Acellular Pertussis Vaccine (Tdap) booster prior to matriculation and must maintain immunity by continuing to remain current according to the CDC recommendations for health care personnel during their program. Due to the increased risk of pertussis in a health care setting, the Advisory Committee on Immunization practices highly recommends health care workers receive a one-time Tdap (ask your health care provider). Tdap is required, without regard to interval of previous dose of Tetanus-Toxoid (Td).

**VARICELLA (CHICKEN POX)**

*One of the following is required:* Proof of two vaccinations or positive antibody titer. (Lab report is required.)

**Arrangements:** Students may request that the Student Medical Center or the NSU Clinic Pharmacy administer these immunizations. The Student Medical Center will make appointments in as timely a manner as possible. Students may call (954) 262-1270 to make an appointment. Once made, the appointment becomes the student’s obligation and must be kept. For students at other NSU campuses, appointments may be scheduled with the NSU designated physician for their area.

**HPD fee:** The HPD general access fee covers a series of three Hepatitis B vaccines and an annual PPD screening. All other immunizations and health care services are the responsibility of the student.

**Failure to comply:** The University is not required to provide alternative sites for clinical practicum or rotations should immunization be a requirement for placement. Therefore, failure to comply with this policy may result in a student’s inability to satisfy the graduation requirements in his or her program.
Relative to clinical rotation site requirements, students are expected to consult their specific college/program handbooks for compliance with any college/program specific requirements.

Urine Drug Screen HPD students may be required to submit to additional urine drug screen testing. A student who tests positive for illegal or illicit drugs, or for a controlled substance that they do not have a prescription for, will be referred to the college’s Student Progress Committee for a Code of Conducton Violation.

**Netiquette**

In a traditional classroom, students are reminded that behavior that disrupts the class or interferes with other students and their ability to learn is unacceptable. Any person engaged in disruptive behavior receives a written warning from the instructor. Students who continue to engage in disruptive behavior after this warning may be administratively withdrawn from the course.

Similarly, in an online course, any electronic postings, emails, or electronic messages that disrupt the class or interfere with learning goals and objectives are unacceptable. Electronic communication—the backbone of this online course—must be civil, respectful, and cordial at all times. Any posting that disrupts or interferes with learning will be removed, and the author of the posting will receive a written warning. A second disruptive posting will cause the author to be administratively withdrawn from the course.

**Student Insurance Requirement**

It is required that each Health Professions Division student including, exercise science, respiratory therapy (first professional), cardiovascular sonography, medical sonography, and speech-language pathology students must carry adequate personal medical and hospitalization insurance. (Other online program students may not be required to submit proof of personal medical and hospitalization insurance; students should check with their program office.) It is strongly suggested that students and their families avail themselves of the insurance plan obtainable through the university. Information about the policy can be obtained by accessing the website at [nova.edu/bursar/health-insurance/](http://nova.edu/bursar/health-insurance/). Please note that students will see a charge for health insurance appear on their student account as part of the academic registration process annually.

For those students who already have health insurance coverage and do not need the NSU-endorsed insurance plan, this charge will be removed from their account once proof of coverage has been submitted by completing the online waiver. To complete the waiver form, go to [novastudentinsurance.com](http://novastudentinsurance.com). The online waiver is the only process by which insurance charges will be removed and coverage will be cancelled. Students who fail to complete the waiver form and provide proof of health insurance by the stated deadline will not be eligible to have charges removed and will continue to be enrolled in the insurance plan endorsed by NSU. Waivers must be completed each academic year.

In view of health care reform and the Affordable Care Act, as well as all forms of health care insurance, we wish to advise those students who have health care coverage from commercial carriers—or the marketplace health care exchanges from other states than Florida—to check with their carriers in order to be sure they have comprehensive health care coverage in the region of Florida where they will be attending classes or practicum rotations.

**Visits To Other Institutions**

Students in the Health Professions Division may not visit, in an official or presumably official capacity as a professional school student, any health-related institution (hospital, pharmacy, practitioner’s office, clinic, etc.) or any health school without express permission of the dean. Visits to relatives or friends who are hospitalized are permitted, provided they are within visiting hours and all hospital rules are observed.
Department of Cardiopulmonary Sciences

The Department of Cardiopulmonary Sciences offers two B.S.R.T. program tracks. The Post-Professional track is for the practicing registered respiratory therapist to obtain their bachelor’s degree in a completely online format. The first professional or entry-level track is for the student to obtain their B.S.R.T. through didactic and clinical training.

Computer Requirements

All students in the department are required to have access to a computer meeting the minimum requirements listed on the website at https://www.nova.edu/publications/it-standards.

Major

B.S.R.T. Mission Statement

The mission of NSU’s Department of Cardiopulmonary Sciences is to advance the respiratory care profession through leadership in teaching, research, and service. We will provide a premier health care education experience in a learning environment that cultivates critical thinking, inspires professional leadership, encourages and promotes research, and imparts a strong awareness of ethical standards and social diversity. By engaging all faculty and students in research and scholarly activity we intend to cultivate the knowledge, attitudes, and skills necessary to support not only national leadership for the respiratory care profession, but develop future educators and providers in professionally-related health care arenas.

Bachelor of Science in Respiratory Therapy—First Professional Program Goals

1. To prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRT).
2. To prepare leaders for the field of respiratory care by including curricular content that includes objectives related to acquisition of skills in one or more of the following: management, education, research, and advanced clinical practice (which may include an area of clinical specialization).

Bachelor of Science in Respiratory Therapy—Post-Professional Program for the Practicing RRT

The B.S.R.T. Post-Professional program is designed for the registered respiratory therapist with an A.S. degree from a regionally accredited institution. This degree allows respiratory therapists to further expand their expertise with advanced knowledge in a variety of areas. Delivered entirely online, through a combination of synchronous (real-time) and asynchronous instruction, the B.S.R.T. program is designed for students who are unable to be physically present, on campus, or for those with schedule or family constraints that make traditional college class schedules challenging.

Computer Literacy

Access to a computer will be required for all students to successfully complete the online courses in the Department of Cardiopulmonary Sciences. Each student is expected to acquire computer hardware and software appropriate for the program. Competency in the basic use of a computer and the ability to navigate and interact with the course and curriculum content is the responsibility of the student and necessary for graduation.

Continuous Enrollment

Although continuous enrollment is not a requirement, the B.S.R.T. program strongly recommends that students enroll in three courses...
per semester, for the duration of their B.S.R.T. studies.

Online Student Center—Program and Course Communication

All students are required to visit the online student center at least once per week. All communication and programmatic information will be posted in the online student center. It is required that all B.S.R.T.—Post-Professional students use the online student center when communicating with the program. All class communication must take place through the university’s secure course management platform.

Bachelor of Science in Respiratory Therapy—Post-Professional Program Curriculum

- The program requires that all core coursework be completed through the NSU B.S.R.T. program. A minimum total of 120 credit hours, of which 30 credit hours must fulfill general education requirements, are required to graduate with the B.S.R.T. degree.
- All students are required to obtain a grade of C or better (greater than or equal to 74 percent) in every required core course.
- Students receiving a C-, D+, D, or F in a required core course will be required to retake the course at its next scheduled offering.
- The B.S.R.T.—Post-Professional Program is presented in a distance-learning format and requires no on-campus time.
- The coursework is professor-paced using Web-based delivery. The curriculum and coursework follow a standard three-semester calendar. The curriculum is designed to build upon the existing knowledge base of the Registered Respiratory Therapist while focusing on the overall health care picture. Leadership, evidenced-based practice, and education, are a selected few of the areas covered in the curriculum.

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Block Grant (45 credits)

Students will be granted a 45 credit block grant for their registered respiratory therapist (RRT) credential and current licensure.

Total Degree Requirement: 120 credits (minimum)

Optional Specialization in Management (15 credits)
Successful completion of the following courses, in addition to the requirements for the Bachelor of Science in Respiratory Therapy—Post-Professional Program generalist track, will grant a B.S.R.T. degree with the added specialization in management:

- BHS 3155 Conflict Management in Health Care (3 credits)
- BHS 3161 Health Care Finance (3 credits)
- BHS 3162 Economics of Health Services (3 credits)
- RRT 4103 Strategic Planning and Organizational Development for Health Care (3 credits)
- RRT 4014 Operational Analysis and Quality Improvement (3 credits)

NSU's undergraduate Pre-Respiratory Therapy program is designed for students who wish to apply to NSU's Entry Bachelor of Science in Respiratory Therapy program (B.S.R.T.) and complete the general education and prerequisite program admission requirements at the university. These prerequisite courses are offered by NSU's Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center.

**Bachelor of Science in Respiratory Therapy—First Professional Program**

This program is designed for the First-Professional or entry-level student to obtain their B.S.R.T. through didactic and clinical training. This program is a full-time two-year, on-campus program which requires the student to complete 40 prerequisite credits prior to matriculation.

**Bachelor of Science in Respiratory Therapy—First Professional Program Curriculum**

- The program requires that all core coursework be completed through the NSU B.S.R.T. program. A minimum total of 120 credit hours, of which 30 credits must fulfill general education requirements.
- All students are required to complete 40 prerequisite courses prior to matriculation.
- All students are required to obtain a grade of C or better (greater than or equal to 74 percent) in every required core course.
- Students receiving a C-, D+, D, or F in a required core course will be required to retake the course at its next scheduled offering.
- The program is offered in a two-year full-time on-campus format with a lock step sequence.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Core Course Requirements (80 credits)**

- RCP 3001 Medical Terminology for Respiratory Therapy (1 credit)
- RCP 3002 Cardiopulmonary A & P with Lab (3 credits)

The Department of Health and Human Performance offers the Bachelor of Science in Sports and Exercise Science. This major is offered on NSU Fort Lauderdale campus.

**Majors**

**EXERCISE AND SPORT SCIENCE MAJOR**

The exercise and sport science major provides students with a foundation in the movement sciences, which promotes improvements in health, fitness, and/or performance for the physically active. The primary goal of this program is to prepare students to be evidence-based practitioners of exercise and human movement disciplines who think critically about the science behind their practice.

Students graduating from the exercise and sport science major will be able to seek employment as an exercise specialist, fitness and wellness coordinator, sport performance researcher, and strength and conditioning specialist, as well as enter professional graduate programs in exercise sciences and other fields, such as biomechanics, exercise physiology, and motor behavior.

**Exercise and Sport Science Program Goals**

The exercise and sport science program will:

1. Meet standards and guidelines from governing organizations such as the American College of Sports Medicine (ACSM), and the National Strength and Conditioning Association;
2. Prepare graduates to sit for professional certification examinations in exercise and fitness from the National Strength and Conditioning Association, American College of Sports Medicine, National Academy of Sports Medicine, International Society of Sports Nutrition, and/or the American Council on Exercise;
3. Prepare graduates for post-graduation placement in graduate school, a professional school, or entry-level employment;
4. Develop competent scholars, researchers, physical activity, and sport specialists to meet the workforce needs of a global society;
5. Prepare graduates to enhance delivery of physical activity, sport, and rehabilitative services for all segments of society, including special populations such as children and the elderly; persons with disability, injury, and disease; and athletes.

**Exercise and Sport Science Major Learning Outcomes**

A successful exercise and sport science graduate is expected to:

1. Demonstrate critical thinking skills related to the areas of physical activity, movement sciences, and sport through practical experiences;
2. Demonstrate the importance of the physical assessment, psychological, and emotional demands of physically active individuals;
3. Apply content area knowledge specific to chosen career goals, such as strength and conditioning specialist, coaching, and corporate fitness and wellness, through internship experiences.

**Exercise and Sport Science Major Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Minor**

---

**Exercise Science Minor**

The exercise science minor is designed to provide students with a foundation and theory base in the movement sciences for the physically active. Additionally, the program offers courses for the student who is interested in the physiological, biomechanical, and psychological aspects of human function in response to exercise and physical activity. The primary goal of this program is to supplement academic knowledge for students to study in the exercise science sub-disciplines (biomechanics, exercise physiology, and motor behavior) and promote entry into professional programs. The minor is available to PALS (day) students only. This minor can be combined with any major and minor except the exercise and sport science major.

**Exercise Science Minor Learning Outcomes**

A successful exercise science minor is expected to:

1. Demonstrate and explain a strong foundation and theory base in the movement sciences for the physically active;
2. Analyze the physiological, biomechanical, and psychological aspects for human function in response to exercise and physical activity;
3. Develop and present a physical fitness program.

**Exercise Science Minor Requirements (18 credits)**

**Core Courses (10 credits)**
EXSC1400  Health and Fitness (3 credits)
EXSC 2400  Strength and Conditioning (3 credits)
EXSC 3820  Exercise Prescription with Lab (4 credits)

Minor Electives (8 credits)
Select 8 credits from the following courses:
EXSC 2300  Sports Nutrition (3 credits)
EXSC 3700  Kinesiology (3 credits)
EXSC 3740  Exercise Physiology with Lab (4 credits)
EXSC 3760  Biomechanics of Human Movement with Lab (4 credits)*
EXSC 4100  Adapted Physical Activity (3 credits)*
EXSC 4220  Motor Learning with Lab (4 credits)*
Department of Health Science

The Department of Health Science is an interdisciplinary group of programs designed for health professionals with the desire to advance academically, administratively, or clinically within their profession. The department offers educational opportunities from entry-level undergraduate to programs for working health professionals, demonstrating the university's and college's commitment to lifelong learning. The Department of Health Science uses innovative online and on-campus components to achieve its mission of preparing professionals for today's health care market.

The department offers the Bachelor of Health Science (B.H.Sc.) in an exclusively online format. The department also houses a preeminent on-campus, entry-level program, the Bachelor of Science—Medical Sonography, on NSU’s main campus, and houses the Bachelor of Science—Cardiovascular Sonography Program on the campus in Tampa. Both programs are supported by state-of-the-art teaching laboratories.

Computer Requirements

It is required that the student have access to a desktop or laptop consistent with a recent generation of Microsoft Windows (7 or 8) or Apple OS (10.8 or above) and compatible Microsoft Office software to include Word, Powerpoint, and Excel. Tablets and smartphones, while very useful, may not be sufficient for all program uses. The computing platform should include headphones, microphone, camera, and video conferencing capabilities. Broadband access is essential Surge protection and appropriate back-up options strongly suggested. Minimum computer requires can found at https://www.nova.edu/publications/it-standards.

Majors

Bachelor of Health Science—Online Program

The Bachelor of Health Science (B.H.Sc.)—Online Program is an online degree advancement program for students with diverse education, work, and life experiences who demonstrate the desire and capacity to pursue the course of study in health and increasingly responsible positions in health care and, health administrators, military trained health care technicians, radiology technicians, respiratory therapists, office managers, etc. The NSU B.H.Sc. generalist track and the health care administration track; the courses of study are interdisciplinary and is designed to provide career advancement as well as deliver a well-rounded curriculum. These cutting-edge tracks offer the opportunity for working students with health care interest and or backgrounds to complete their undergraduate degree coursework online, conveniently from their own home or office, without compromising career or other obligations.

The B.H.Sc. Online program also offers a Pre-Master of Occupational Therapy (Pre-MOT) and a Pre-Doctorate of Occupational Therapy (Pre-OTD) track for Occupational Therapy Assistants. This educational opportunity is available to Certified Occupational Therapy Assistants (COTAs) to earn a Bachelor in Health Science degree and upon completion of the Pre-MOT Track be guaranteed admission to the Master of Occupational Therapy at NSU’s main campus in Fort Lauderdale, Florida. Upon completion of the Pre-OTD Track, graduates will be guaranteed admission to the Doctor of Occupational Therapy (OTD) Entry Level Program at Nova Southeastern University, Tampa, FL.

There have been dramatic changes in the health care market and delivery systems in the United States over the past decade. As health care becomes increasingly competitive, it becomes more important to distinguish one self professionally and academically. The Bachelor in Health Science—Online Program is offered via the Dr. Pallavi Patel College of Health Care Sciences Web-based distance learning technology that allows individuals to remain in their current location and employment.

Upon successful completion of the B.H.Sc. program, students are eligible to apply for admission to continue their education in health sciences in the online Master of Health Science (M.H.Sc.) and later the Doctor of Health Science (D.H.Sc.) program or other graduate program.

B.H.Sc. Mission Statement

The mission of the Nova Southeastern University (NSU) Bachelor of Health Science (B.H.Sc.) program is to provide an online, degree

Nova Southeastern University  •  Undergraduate Student Catalog  •  2021–2022
DR. PALLAVI PATEL COLLEGE OF HEALTH CARE SCIENCES

181
advancement/completion program for students with a demonstrated interest in health care through an interdisciplinary and interprofessional course of study; to provide career and academic advancement opportunities for students who desire to become or advance as health care professionals; by delivering a well-rounded curriculum allowing the enrolled students to complete the majority of the major online while continuing to work toward their professional goals.

**Bachelor of Health Science—Program Goals**

The Bachelor of Health Science will enable students to:

1. Pursue a well-rounded and diverse educational degree completion program for students with a demonstrated interest in health care in an online environment that allows them to continue gainful employment in their chosen field while attending and completing course work.
2. Enhance and develop the student’s leadership and health care knowledge through academic inquiry while using current, practical health care models.
3. Enhance their understanding of diverse populations in health care and to prepare the student to take a leadership role in the rapidly changing health care environment.
4. Enhance the student’s understanding of the political, social, legal and ethical issues that may be encountered and have an impact on areas of health care practice.
5. Develop knowledge that helps bridge between clinical care, health care diversity and critical inquiry.

**Bachelor of Health Science—Program Learning Outcomes**

Graduates of the Bachelor of Health Science program will demonstrate command of the following learning outcomes as evidenced by their participation in class, completion of class assignments, presentations, and projects.

Graduates will be able to:

1. Communicate effectively in writing on a variety of topics related to health care
2. Demonstrate an awareness and appreciation of the delivery of culturally competent health care.
3. Effectively communicate and acknowledge the impact of the legal, ethical, and political environment on health care policy and delivery.
4. Demonstrate the knowledge and ability to search and retrieve information and materials related to individual clinical practice issues or overall health policy concerns.
5. Describe and demonstrate management / leadership skills and theories that can be applied in preparation to lead or manage effectively in a health care environment.
6. Demonstrate knowledge of and effectively apply health care models, theories, and tools to issues impacting health care delivery

**Computer Literacy**

Access to and ongoing use of a computer will be required for all students to successfully complete the online programs and courses in the Department of Health Science. Each student is expected to acquire computer hardware and software appropriate to the program. Competency in the basic use of a computer and the ability to navigate and interact with the course and curriculum content is the responsibility of the student and necessary for graduation.

**Continuous Enrollment**

Although continuous enrollment is not a requirement, the B.H.Sc. program strongly recommends students to enroll in at least two courses per semester, for the duration of their B.H.Sc. studies.

**Online Student Center—Program and Course Communication**

All students are required to visit the online student center at least once every two weeks. All communication and programmatic information will be posted in the online student center. It is required that all B.H.Sc. online students use the online student center when communicating with the program. All class communication must take place through the university’s secure course management platform.
**Bachelor of Health Science—Online Program Curriculum**

The B.H.Sc—Online Program is designed for completion in a distance-learning format and requires no on-campus time. The coursework is professor-paced using Web-based delivery. The curriculum is designed to build upon the existing knowledge base of the health care while focusing on the overall health care picture. Leadership, diversity, and conflict resolution are but a few of the areas covered in the curriculum.

The program curriculum requires that a minimum of 33 semester hours of course work (including 21 semester hours of required core course work) be completed through the NSU B.H.Sc. program. To be eligible to graduate with the B.H.Sc. degree, a student must have completed a minimum of 30 credits of General Education course work in addition to the B.H.Sc. curriculum, with a resulting minimum total of 120 semester hours with a 2.0 cumulative grade point average and a 2.25 grade point average in the B.H.Sc. major.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Generalist Track Major Requirements (33 credits)**

*Core Courses (24 credits)*

- BHS 3110 Health Care Ethics (3 credits)
- BHS 3120 Introduction to Epidemiology (3 credits)
- BHS 3150 Principles of Leadership (3 credits)
- BHS 3155 Conflict Resolution in Health Care (3 credits)
- BHS 3160 Health Policy (3 credits)
- BHS 4000 Cultural Competency in Health Care (3 credits)
- BHS 4100 Academic and Professional Writing (3 credits); (Must be taken during the first semester of enrollment in the program)
- BHS 4140 Independent Capstone in Health Science Studies (3 credits)

* Students are required to obtain a grade of C or better (greater than or equal to 73 percent) in required core courses. Students receiving a grade of C- or lower in a required core course will be required to retake the course at its next scheduled offering.

**Electives (minimum 9 credits)**

The number of major electives requires is variable, based on the number of credit hours accepted for transfer.

- BHS 3000 Improving of Healthcare through Interprofessional Collaboration (3 credits)
- BHS 3100 Current Issues in Health Care (3 credits)
- BHS 3101 History of the US Health System (3 credits)
- BHS 3130 Research and Design for Health Care (3 credits)
- BHS 3140 Health Care Practice (3 credits)
- BHS 3145 Principles of Environmental Health (3 credits)
- BHS 3151 Health Services Management (3 credits)
- BHS 3161 Concepts of Health Care Finance (3 credits)
- BHS 3170 Health Care Delivery Systems (3 credits)
- BHS 3180 Interprofessional Collaboration (3 credits)
- BHS 3190 Patient Education in Health Care (3 credits)
- BHS 3195 Therapeutic Communications for Health Care Professionals (3 credits)
- BHS 3200 Community Capacity Building: An Interprofessional Approach (3 credits)
- BHS 4001 Individuals with Disabilities and Special Needs (3 credits)
- BHS 4005 Alternative Medicine in Health Care (3 credits)
- BHS 4006 Fundamentals of Chinese Medicine (3 credits)
- BHS 4009 Sports Medicine: Principles and Practice (3 credits)
- BHS 4010 Health Promotion and Disease Prevention (3 credits)
- BHS 4011 Bioterrorism: Health Care Readiness and Response (3 credits)
- BHS 4012 Torture, Violence, and Trauma—Health Care’s Healing Role (3 credits)
- BHS 4013 Global Issues in Human Trafficking (3 credits)
- BHS 4020 Topics in Maternal, Child Health (3 credits)
- BHS 4031 Statistics for Health Professions (3 credits)
- BHS 4110 Health Care and Aging (3 credits)
- BHS 4150 The Science of Sound** (3 credits)
**BHS 4151** Linguistics & Psycholinguistic Variables of Normal Language Development** (3 credits)
**BHS 4153** Speech and Language Disorders for Health Care Practitioners (3 credits)
**BHS 4160** Education for Health Professions (3 credits)
**BHS 4300** Interprofessional Education Seminar (3 credits)

**Student must receive departmental and academic advisor approval in order to be allowed to register for these courses.**

**Open/Transfer Electives (57 credits)**

Students are required to complete 57 credit hours of open/transfer electives, consisting of transfer credits or additional B.H.Sc. elective coursework.

**Total Degree Requirement: 120 credits (minimum)**

*May be used to fulfill General Education requirements

**Major Electives (6 credits minimum)**

Any BHS courses not counted as a core course.

The number of major electives required varies based on the number of credit hours accepted.

**Open/Transfer Electives (51 credits)**

Students are required to complete 51 credits of open/transfer electives, consisting of transfer credits or additional B.H.Sc. elective coursework.
Subtotal Required Courses: 40 credits (minimum)
Total Degree Requirement: 120 credits (minimum)

**Bachelor of Health Science—Health Care Administration Track Major Requirements**

**General Education Requirements (30 credits)**
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Health Care Administration Track Major Requirements (24 Credits)**

- BHS 3110   Health Care Ethics (3 credits)
- BHS 3120   Introduction to Epidemiology (3 credits)
- BHS 3150   Principles of Leadership (3 credits)

**Health Care Administration Track Required Electives (15 credits)**

- BHS 3151   Health Services Management (3 credits)
- BHS 3161   Health Services Finance (3 credits)
- BHS 3162   Economics of Health Care Services (3 credits)
- BHS 3170   Health Care Delivery Systems (3 credits)
- BHS 4031   Statistics for Health Sciences (3 credits)

**Open/Transfer Electives**
Any combination of coursework consisting of additional BHS prefixed elective courses and/or prerequisites, transfer, or courses of any prefix with a course level of 1000 or above resulting in a total of 54 credits.

Subtotal Open Electives/Transfer Elective Courses: 51 credits (minimum)
Total Degree Semester Hours Required: 120 credits (minimum)

**Bachelor of Health Science—Pre-O.T.D. Track for Occupational Therapy Assistants**

This educational opportunity is available to certified Occupational Therapy Assistants (O.T.As) to earn a Bachelor in Health Science (B.H.Sc.) degree and upon completion of the Pre-O.T.D. Track be guaranteed admission to the Doctor of Occupational Therapy (O.T.D.) Entry Level Program at Nova Southeastern University, Tampa, FL.

Classes for NSU’s three-and-a-half year, blended distance/face-to-face OTD program takes place at the NSU Tampa campus and online. The program, designed to attract creative and compassionate individuals who like to help others achieve their potential, meets the need for occupational therapy education beyond a Masters degree by students who want flexibility while performing their current occupations.

**General Education Requirements (30 credits)**
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Pre-Doctor of Occupational Therapy (Pre-O.T.D.) Track Requirements**
The Pre-O.T.D. Track Requirements can also be used to fulfill natural and physical science requirements.

**Bachelor of Science—Cardiovascular Sonography**

**Cardiac Sonography (Echocardiography)**

Cardiac sonographers obtain images of the heart via ultrasound. Echocardiography is one of the most widely used imaging examinations for assistance in the diagnosis of heart disease. Echocardiography is especially useful for assessing diseases that affect the heart valves and for detecting abnormalities in the motion and appearance of the heart wall.

**Vascular Sonography**

Vascular sonographers use ultrasound imaging and other types of exams to detect anatomical and physiological changes caused by diseases of the arteries and veins and the resulting effects on organs and other tissues. Vascular disorders include carotid artery disease, which may lead to stroke; abdominal vascular diseases, such as aneurysms; peripheral arterial disease, which can result in chronic pain and may progress to loss of limbs; and venous conditions that can cause blood clots (thromboses), which can travel to the lungs (pulmonary embolism).

**Cardiovascular Sonography Program**

The NSU Cardiovascular Sonography Program in Tampa offers didactic and clinical training in both of these specialties, cardiac sonography (adult) and vascular sonography, as an integrated curriculum. Additional course content introduces the student to pediatric cardiac sonography and basic concepts in electrophysiological cardiology. Because of strong interrelationships between cardiac and vascular diseases, the need was seen for a comprehensive program covering both specialties. Also, some cardiology departments and other imaging providers may prefer that sonographers obtain training and professional registry in both cardiac sonography and vascular sonography for purposes of diagnostic expediency and professional flexibility. Graduates of the Cardiovascular Sonography program are eligible to apply for both the Adult Echocardiography and non-invasive Vascular Technology professional registry exams offered by the American Registry for Diagnostic Medical Sonography (ARDMS), and/or the corresponding credentials offered by Cardiovascular Credentialing International (CCI). The Cardiovascular Sonography program at NSU Tampa is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).
Bachelor of Science—Cardiovascular Sonography (B.S.—CVS)

This degree program is designed to prepare students for entry-level positions in the field of Cardiovascular ultrasound. Students receive education as a combined curriculum in two of the most sought-after specialties of diagnostic medical ultrasound: adult echocardiography (cardiac ultrasound) and vascular sonography, (non-invasive vascular technology). This prepares them for the 12-month clinical externship during their second year.

The cardiovascular sonography program includes on-campus lectures; extensive, hands-on training in our ultrasound laboratory; online courses; and a 12-month focused or combined externship in a clinical laboratory setting. The graduating student will earn a bachelor’s degree in cardiovascular sonography. Students will take a combination of general courses in the health science field and focused core courses in the cardiovascular sonography field. Examples of general courses include subjects such as Writing for Medical Publication, Epidemiology, Biostatistics, and Principles and Practice of Management in Health Care. Examples of cardiovascular sonography courses include Ultrasound Physics, Cardiac Ultrasound, and Carotid Artery Duplex. While on campus, the student will spend more than 500 hours in the training laboratory learning imaging skills and techniques and physiologic testing methods prior to the clinical externship experience.

In the second year, the student will complete an approximately 1,600-hour clinical training program while continuing to take online courses. The student may have the option to perform his or her clinical externship in a vascular, adult echo, or combined vascular/echo clinical experience, based upon his or her interests and demonstrated competencies. Upon graduation, the student will be eligible to sit for professional registry exams based upon completion of program and clinical requirements.

Prospective cardiovascular sonography students are selected by the Committee on Admissions (COA), which considers the overall qualities of the candidate. Areas of consideration include interpersonal skills, personal motivation, knowledge and understanding of the cardiovascular profession, academic performance and level of achievement, life experiences, and recommendations. Knowledge of the profession is essential. Personal interviews are offered to the most-qualified applicants to assess interpersonal and communication skills, altruistic attitude, maturity, and commitment to the cardiovascular profession. Phone interviews will not be provided, although in special circumstances, remote video interview via Skype or equivalent technology, may be offered.

### Bachelor of Science—Cardiovascular Sonography Program Objectives

The Bachelor of Science—Cardiovascular Sonography Program objectives:

1. Minimum Expectations: “To prepare entry level general sonographers in the cognitive (knowledge) psychomotor (skills), and affective (behavior) learning domains” and “To prepare competent entry-level vascular and adult cardiac sonographers in the Cognitive (knowledge), Psychomotor (skills), and Affective (behavior) Learning Domains”.
2. To graduate competent adult cardiac and vascular sonographers who are qualified to perform a variety of standard and specialized diagnostic sonographic examinations of the adult heart and vascular system.
3. To ensure that graduates are qualified to take and pass the American Registry of Diagnostic Medical Sonography (ARDMS) registry examination in adult cardiac and vascular sonography.
4. To prepare graduates for future leadership roles in diagnostic sonography laboratories, ultrasound departments, education, and industry.
5. To enhance the students’ academic skills for pursuing research studies in the field of diagnostic medical sonography.

### Bachelor of Science—Cardiovascular Sonography Program Outcomes

Students completing the Bachelor of Science - Cardiovascular Sonography Program will be able to:

1. Perform a variety of standard and specialized diagnostic adult cardiac and vascular examinations.
2. Demonstrate appropriate competency in key clinical performance standards in the Cognitive, Affective, and Psychomotor Domains.
3. Demonstrate knowledge by taking and passing the American Registry of Diagnostic Medical Sonography (ARDMS) registry examination for Sonography Principles and Instrumentation (SPI).
4. Qualify to sit for the American Registry of Diagnostic Medical Sonography (ARDMS) registry examinations for the Registered Vascular Technologist (RVT) and the Registered Diagnostic Cardiac Sonographer (RDCS) credentials.
5. Communicate effectively in a professional manner, using written and electronic methods.
6. Demonstrate empathy and respect in the delivery of culturally competent care healthcare.
7. Communicate and acknowledge the impact that the social, legal, ethical, and political environment has on the development
of health care policies; and the resulting implications, benefits, and effects on the delivery of health care practice.
8. Demonstrate the knowledge and ability to effectively search and retrieve information through electronic means.
9. Describe appropriate management / leadership skills and theories, and demonstrate at an appropriate level the application of such skills and theories by the ability to lead or manage effectively in an educational and/or health care environment.
10. Demonstrate the ability to apply knowledge of health care models, theories, and issues impacting health care delivery through academic and critical inquiry, as delivered via written, visual, multi-media, or verbal presentation.

**Technical Standards**

The profession of diagnostic medical sonography includes but is not limited to, the following physical, cognitive, auditory, and visual demands:

**Physical:** The ability to lift fifty pounds of weight repetitively, the ability to reach up, the ability to stand for up to 80% of the work day, the ability to push or pull heavy wheeled equipment and other devices such as wheelchairs or stretchers, high levels of manual dexterity to control the settings on ultrasound equipment, computers, and other devices.

**Cognitive:** the ability to remember, recall, and analyze information, the ability to work without distraction in a noisy environment, the ability to remain focused despite interruptions, the ability to cope with potentially stressful situations.

**Auditory:** the ability to hear with both ears within the normal human auditory range, the ability to distinguish a normal range of tonal sounds within the normal human hearing range.

**Visual:** the ability to distinguish a normal range of colors, the ability to discern high levels of detail visually, visual acuity or the corrected equivalent of normal 20/20 vision, the ability to monitor the environment and work effectively and safely in dimmed lighting conditions.

**Computer Literacy**

Access to and ongoing use of a computer will be required for all students to successfully complete the online programs and courses in the Cardiovascular Sonography Program. Each student is expected to acquire computer hardware and software appropriate to the program. Competency in the basic use of a computer and the ability to navigate and interact with the courses and curriculum content is the responsibility of the student and necessary for graduation.

**Bachelor of Science—Cardiovascular Sonography Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Program-specific general education Science requirements are:

- EITHER 3 credits Human Anatomy I or Anatomy & Physiology I (with or without lab) and 3 credits Human Anatomy II or Anatomy & Physiology II (with or without lab), OR
- 3 credits of Human Anatomy I or Anatomy & Physiology I (with or without lab) and 3 credits General Physics (with or without lab).

**Cardiovascular Sonography Major Requirements (92 credits)**

---

**BACHELOR OF SCIENCE—MEDICAL SONOGRAPHY**

**General Sonography**
Includes subspecialties in obstetrics and gynecology, organs of the body, and small parts (soft tissues and superficial glands). Professionals in this field are called sonographers or medical sonographers. Sonographers use diagnostic medical ultrasound to obtain images of internal organs such as the liver, gallbladder, bile ducts, pancreas, spleen, appendix, kidneys, and adrenal glands. Sonographers specializing in obstetrics and gynecology obtain images of the female pelvic organs and the fetus. Sonographers working in all these specialties determine normal from abnormal situations and contribute to the making of diagnosis of pathologies affecting those organs.

**Vascular Sonography**
Vascular Sonography studies the anatomical and physiological characteristics of blood vessels (veins and arteries) in the human body. Professionals working in this specialty are called vascular sonographers. They use ultrasound and other specialized equipment to assess the anatomic, physiologic, and pathologic conditions of veins and arteries. Among the most common studies are those of the carotid arteries, arteries of the upper and lower extremities, abdominal blood vessels, and intracranial circulation. Exploration of these vessels helps to determine the presence of plaques and thrombus, the direction of blood flow, and the process of revascularization, as well as the patency of grafts. Vascular Sonographers play a very important role in assessing the blood vessels in special situations such as a stroke, peripheral arterial disease, abdominal aortic aneurysm, portal hypertension, and deep vein thrombosis. They even can help to select native vessels for grafts to be used in cardiac surgeries.

**Bachelor of Science—Medical Sonography (B.S. Medical Sonography)**
The Medical Sonography program in Fort Lauderdale offers didactic and clinical training in the abdominal, obstetrics, gynecology and vascular sonography subspecialties as one integrated curriculum. At the end of the program, the student will be able to perform general (abdomen, small parts, obstetrical and gynecology, and breast), as well as vascular studies. The growing use of ultrasound and the need for sonographers with multiple credentials to accommodate new regulations in the health care field have set the ground for a comprehensive program that combines these two main specialties leading to the following credentials: RDMS (Registered Diagnostic Medical Sonographer) and RVT (Registered Vascular Sonographer).

The Bachelor of Science in Medical Sonography Program was designed to prepare entry-level professionals in the fields of general and vascular sonography. During the first year, students take online course at the undergraduate level, as well as on-campus classes that include many hours each week in the training ultrasound lab. This is followed by online courses and a 12-month externship in a clinical site.

The Medical Sonography Program includes on-campus lectures; extensive, hands-on training in the ultrasound laboratory; online courses; and a 12-month focused or combined externship in a clinical laboratory setting. The graduating students will earn a Bachelor’s degree in Medical Sonography. Students will take a combination of general courses in the health science field and focused core courses in the medical sonography field. Examples of general courses include subjects such as Writing for Medical Publication, Epidemiology,
Biostatistics, and Principles and Practice of Management in Health Care. Examples of medical sonography courses include: Ultrasound Physics, Abdominal Sonography, Obstetrics and Gynecology Sonography, Small Parts Sonography, Arterial, Venous, and Cerebrovascular Testing. While on campus, the student will spend more than 500 hours in the training laboratory learning imaging skills and techniques and physiologic testing methods prior to the clinical externship experience, as well as vast exposure to Interprofessional Educational Activities (IPE).

In the second year, the student will complete an approximately 1,600-hour clinical training program while continuing to take online courses. Graduates will be eligible to sit for the American Registry of Diagnostic Medical Sonography (ARDMS) registry examination. This exam is administered in two parts. The first part (SPI: Sonography Principles and Instrumentation) is geared toward evaluation of understanding of fundamental concepts in the technology of ultrasound. Students at Nova Southeastern University will be able to take this portion of the ARDMS exam upon successful completion of the Ultrasound Physics Course after the first term of the program. The second part of the exam—either the RVT or the RDMS—evaluates knowledge and understanding of anatomy, physiology, pathologies, quality assurance, examination protocols, etc. in the respective areas. Students will be eligible to take this portion of the ARDMS sixty-days before graduation, as stipulated by new regulations of the American Registry of Diagnostic Medical Sonography.

Bachelor of Science—Medical Sonography Program Objectives

The Bachelor of Science—Medical Sonography Program aims:

1. To prepare competent entry level sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains for the following concentration(s) it offers
   - Abdominal sonography – Extended
   - Obstetrics and gynecology sonography
   - Vascular sonography
2. To graduate competent general and vascular medical sonographers who are qualified to perform a variety of standard and specialized diagnostic sonographic procedures
3. To ensure that graduates are qualified to take and successfully pass the American Registry of Diagnostic Medical Sonography (ARDMS) registry examination in general and vascular sonography
4. To prepare graduates for future leadership roles in diagnostic sonography laboratories ultrasound departments, education and industry
5. To enhance the student’s academic skills for pursuing research studies in the field of diagnostic medical sonography.

Bachelor of Science—Medical Sonography Learning Outcomes

Students completing the Bachelor of Science—Medical Sonography Program will be able to:

1. Perform a variety of standard and specialized diagnostic general (ABD, OB-GYN) and vascular procedures
2. Qualify to sit for the American Registry of Diagnostic Medical Sonography (ARDMS) registry examination for the Registered Vascular Technologist (RVT) and the Registered Diagnostic Medical Sonographer (RDMS) credentials.
3. Communicate in a professional manner using written and electronic methods.
4. Demonstrate an awareness and appreciation of the empathy and respect in the delivery of culturally competent care health care.
5. Communicate and acknowledge the impact that the social and political environment has on the development of health care policies and the implications, benefits and ramifications on the delivery of health care.
6. Demonstrate the knowledge and ability to search and retrieve information through electronic means.
7. Describe and demonstrate management / leadership skills and theories, and prepare the student to lead or manage effectively in a health care environment.
8. Demonstrate understanding of the political, social, legal and ethical issues that may be encountered and have an impact on areas of health care practice
9. Demonstrate knowledge through the application of health care models, theories and tools in written and discussion of the issues impacting health care delivery through academic and critical inquiry.
10. Demonstrate performance of clinical competencies as established by the program.
11. Complete the minimum number of clinical hours, as well as the number of procedures and types of procedures as established by the program
Technical Standards

The profession of diagnostic medical sonographer includes but is not limited to, the following physical, cognitive, auditory, and visual demands:

Physical: The ability to lift fifty pounds of weight, the ability to reach up, the ability to stand for up to 80% of the time, the ability to push or pull equipment and other devices such as wheelchairs or stretchers, manual dexterity to control the settings on computers and on the ultrasound equipment,

Cognitive: the ability to remember, recall, and analyze information, the ability to work in a noisy environment, the ability to remain focused despite interruptions, the ability to cope with potentially stressful situations,

Auditory: the ability to hear from both ears within normal auditory range, the ability to distinguish sounds within normal hearing range,

Visual: the ability to distinguish colors, the ability to monitor the environment and work in dimmed light.

Computer Literacy

Access to and ongoing use of a computer will be required for all students to complete the bachelor’s degree program in general and vascular sonography successfully. Each student is expected to acquire computer hardware and software appropriate to the Bachelor of Science in Medical Sonography Program. Competency in the basic use of a computer and the ability to navigate and interact with the course and curriculum content is the responsibility of the student and a requirement for graduation. All applicants must show evidence of computer skills through coursework or self-study prior to the end of the first term. Students may obtain instruction through the NSU Student Microcomputer Laboratory or other training facilities.

Bachelor of Science—Medical Sonography Curriculum

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Program Outcomes

At this time, we have determined that the Medical Sonography program meets the educational degree completion requirements for licensure in all 50 states, the District of Columbia and the US protectorates, as defined in 34 CFR §600.2.

The following metrics (a year post graduation) reflect the program outcomes as reported to the Commission on Accreditation of Allied Health Education Programs (CAAHEP) and correspond to the Medical Sonography Class of 2019.

Retention Rate: 82%

Credential Success Rate:
- Overall Credential Success Rate: 89%
- RDMS (ABD): 65%
- RDMS (OB-GYN): 82%
- RVT: 85%

Job Placement Rate:
- 88% (Among registered graduates)

Commission on Accreditation of Allied Health Education Programs (CAAHEP)
9355 113th Street N., #7709, Seminole, FL 33775-7709.
Phone: (727) 210-2350
Fax: (727) 210-2354
http://caahep.org

The Diagnostic Medical Sonography—Vascular Program is accredited by the Commission on Accreditation of Allied Health Education Programs (caahep.org). Upon the recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography, the program has been placed on probationary accreditation as of September 18, 2020.

The Diagnostic Medical Sonography—General Program is accredited by the Commission on Accreditation of Allied Health Education Programs (caahep.org). Upon the recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography, the program has been placed on probationary accreditation as of September 18, 2020.

CAAHEP considers a program that has probationary accreditation to retain its status as an accredited program. Thus, current students graduating from the DMS Programs will be deemed to have graduated from a CAAHEP accredited institution. Newly enrolled students will likewise be deemed enrolled in a CAAHEP accredited Diagnostic Medical Sonography program.
Department of Speech and Language Pathology

The Department of Speech Language Pathology offers undergraduate, graduate and postgraduate courses of study. The programs foster the development of students’ knowledge, leadership, and problem-solving skills through scientifically based curricula that incorporate current research, ethical decision making, and models of best practice.

Major

SPEECH-LANGUAGE AND COMMUNICATION DISORDERS MAJOR

The Bachelor of Science (B.S.) in Speech-Language and Communication Disorders (SLCD) is designed as a pre-professional degree and provides students with the ability to address some of the academic requirements for American Speech-Language-Hearing Association (ASHA) certification. Additionally, the program is designed to serve as a pathway to the master’s degree in Speech-Language and Communication Disorders, at Nova Southeastern University or elsewhere, by providing the necessary prerequisite coursework. Depending on the state in which the student resides, graduates of the undergraduate program can apply for licensure as a speech-language pathology assistant, which permits them to work under the direction of a certified and licensed speech-language pathologist in education and health-related settings. Students will be provided with a research-based, academic foundation in the concepts and principals in speech, hearing, language, and human communication disorders. The curriculum provides the scientific basis for subsequent coursework in the area of assessment and treatment of various communication disorders, instills a research philosophy in communication sciences and disorders, and introduces the profession as a career. Additionally, students will develop critical thinking and problem solving skills in their courses.

B.S. in Speech-Language and Communication Disorders Learning Outcomes

After completing the program, students will be able to demonstrate the ability to:

1. Apply fundamental concepts of basic sciences (i.e., biological, physical, mathematics/statistics, behavioral and social sciences) to the speech-language and communication disorders discipline;
2. Demonstrate professional oral, and written language skills;
3. Describe basic human communication and swallowing processes, including their biological, neurological, acoustic, psychological, developmental, linguistic and cultural bases;
4. Describe speech, language, and hearing disorders;
5. Observe a diversity of clients with communication disorders in a variety of settings;
6. Apply appropriate technology to speech-language and communication disorders;
7. Demonstrate flexible and adaptive problem-solving skills in the scientific and clinical curriculum
8. Develop the research skills needed to be a lifelong learner; and
9. Discuss and demonstrate ethical and professional behaviors in the field of speech-language and communication disorders.

Program Completion Requirements:

To graduate, a student must (a) successfully complete all coursework and apply for degree conferral, (b) maintain a cumulative grade point average of 2.5 or higher and (c) meet all financial obligations to the University.

B.S. in Speech-Language and Communication Disorders Major Curriculum

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.
B.S. in Speech-Language and Communication Disorders Program Requirements (24 credits)

- ESOL 2903   Cross Cultural Studies (3 credits)
- PSYC 2390   Adulthood and Aging (3 credits)
- Any SPCH course (Oral Communication, 3 credits)
- EDUC 3350   Survey of Exceptional Student Education (3 credits)
- BHS 4150   The Science of Sound (3 credits)
- BIOL 1070   Basics of Human Heredity (3 credits)
- PSYC 2300   Behavior Modification (3 credits)
- BHS 4001   Individuals with Disabilities and Special Needs (3 credits)

B.S. in Speech-Language and Communication Disorders Major Requirements (42 credits)

- CSAD 2010   Communication Disorders Through Film & Media (3 credits)
- CSAD 3010   Phonetics (3 credits)
- CSAD 3020   Anatomy & Physiology of Speech, Language, and Hearing (3 credits)
- CSAD 3025   Language Science (3 credits)
- CSAD 3030   Speech and Language Development (3 credits)
- CSAD 3035   Foundations of Language and Literacy (3 credits)
- CSAD 3040   Neuroanatomy (3 credits)
- CSAD 3050   Hearing and Speech Science (3 credits)
- CSAD 3060   Directed Observation (1 credit)
- CSAD 3080   Introduction to Research in CSD (3 credits)
- CSAD 4010   Evaluation of Speech and Language Disorders (3 credits)
- CSAD 4030   Treatment of Speech and Language Disorders (3 credits)
- CSAD 4050   Introduction to Audiology (3 credits)
- CSAD 4070   Rehabilitation for People having Hearing Impairment (3 credits)
- CSAD 4080   Capstone (2 credits)

Program Electives (24 credits)

Total Credits Required for Degree Completion: 120 credits

---

**Minor**

---

**SPEECH-LANGUAGE PATHOLOGY MINOR**

Speech-Language Pathology Minor Requirements (18 credits)

All students minoring in speech-language pathology will need to complete the following:

- CSAD 2010   Communication Disorders through Film and Media (3 credits)
- CSAD 3010   Phonetics (3 credits)
- CSAD 3020   Anatomy and Physiology of the Speech-Language and Hearing Mechanisms (3 credits)
- CSAD 3030   Speech-Language Development (3 credits)
- CSAD 3040   Neuroanatomy (3 credits)
- CSAD 4060   Audiology and Aural Rehabilitation

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.
Farquhar Honors College
Farquhar Honors College

Dean’s Message

Welcome to the Farquhar Honors College at Nova Southeastern University. The university is recognized for its smaller class sizes, innovative and interactive learning experiences, and commitment to engaging with the community beyond the classroom. The Honors College champions these standards by providing distinguished academic and co-curricular programs of excellence.

Highly motivated and high-achieving leaders discover that the Farquhar Honors College is the perfect community to advance their potential as undergraduate students at Nova Southeastern University. Open to students in all majors, the college provides a rich educational experience for a network of select students from across the university.

As a student in the Honors College, you are a part of programs supporting opportunities for hands-on learning, individualized study, community and campus leadership roles, faculty mentorship, study-abroad, and dynamic workshops and seminars.

The Farquhar Honors College is an inclusive learning environment that will encourage your creative thinking and stimulate your intellectual curiosity.

Andrea Nevins, Ph.D., M.F.A.
Dean and Professor,
Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center

Introduction to the College

NSU’s Farquhar Honors College provides a rich educational experience for highly motivated and high achieving undergraduate students through curricular and co-curricular activities. Students in the Honors College engage in unique, thought-provoking programs and courses; benefit from the mentorship of faculty members; and become part of an active network of current students and college alumni.

Students in the Honors College have opportunities to:

- question and discuss global issues from the perspective of multiple disciplines
- develop and participate in research and creative scholarly projects
- explore diverse local and international cultures
- develop an appreciation for the arts
- contribute to team endeavors and serve in leadership roles in the classroom, in campus organizations, and in the larger community

Mission Statement

The Farquhar Honors College provides engagement and academic enhancement opportunities for undergraduate students seeking a stimulating, rigorous, and rewarding collegiate experience. The college serves as a steward for academically focused, value-added university programs; mentors high-ability undergraduate students; champions student-faculty interaction; celebrates undergraduate research experience; affirms community and alumni affiliation and relationships; and collaborates with all NSU colleges to provide
honors experience opportunities for students in each major.

Programs and Initiatives

Academic Honor Societies
Honor societies recognize student excellence, promote understanding of the discipline and provide a means by which undergraduate students can network and move forward in their career. The Honors College manages multi-disciplinary honor societies and brings faculty advisors and student leaders together on issues of common cause.

Fellowships and Scholarships
Students pursuing selective national and international distinguished fellowships and scholarships may be mentored through the Farquhar Honors College.

Honors in Major
Honors in Major provides a distinct recognition for honors quality work within the senior year of a student’s undergraduate major program.

Honors Community
Approximately 10% of full-time undergraduate students in all majors are eligible to participate in unique academic and co-curricular workshops and events. Honors students may be recognized at graduation for completing distinct curriculum requirements. Additional scholarship support and priority registration are also available to students in Honors. Students must maintain specific curricular and performance requirements, as noted in the catalog.

Honors Transdisciplinary Studies minor
The Honors Transdisciplinary Studies minor provides a purposeful and applied supplemental course of study culminating with completion of the Honors College essays.

Undergraduate Student Symposium
The Undergraduate Student Symposium showcases the outstanding scholarship of NSU undergraduate students through student poster displays, oral presentations, performances, and film presentations. This annual event has encouraged students to test their own hypotheses and uncover new ways of interpreting the world around them. Many of the projects featured at the symposium lead to further research, publication, or presentation at national conferences. Participating students develop mentoring relationships with faculty and experience firsthand the process and rewards of research and discovery. To prospective employers and graduate schools, these students demonstrate a unique and valuable level of academic engagement and initiative. NSU undergraduate students of all disciplines are encouraged to participate and attend.

College Learning Outcomes

The Farquhar Honors College’s courses, initiatives, and projects are aligned to five pillars: distinguishing qualities of inquiry, innovation and creativity, global awareness and sensitivity, art and culture, and ethics and engagement. Honors affiliated faculty are highly vested in fostering these attributes, which are further reflected through the following learning outcomes. These pillars – and outcomes – serve as defining experiences for Honors College participation.

All students engaged with programs in the Honors College are expected to pursue these outcomes.

Inquiry
1. Demonstrate advanced undergraduate skills in scholarship and research necessary to succeed in graduate or professional school and/or the workforce.
2. Apply the principles of conducting academic scholarship and research (consider problems, formulate hypotheses, gather meaningful information, and draw conclusions).
3. Conduct logical analysis and synthesis of information.

Innovation and Creativity
4. Recognize and apply multiple disciplinary approaches to analyzing and solving problems.
5. Make connections among issues, ideas, and methods learned inside and outside the classroom.
6. Communicate results fluently both orally and in writing.

Global Awareness and Sensitivity
7. Engage and discuss international issues and cultures from around the world.
8. Demonstrate knowledge of and provide comprehensive analyses of local, national, international, and intercultural issues, trends, and systems.
9. Engage in problem resolution addressing local, national, international, and intercultural issues.

Art and Culture
10. Analyze and appreciate cultural artifacts.
11. Demonstrate integrated knowledge and appreciation of the arts in their exploration of important questions and issues.

Ethics and Engagement
12. Demonstrate a commitment to ethical principles through engagement in the community.
13. Contribute to successful group and team endeavors including leadership roles in the classroom, campus organization(s), and the larger community.
14. Participate in an intellectual community committed to personal, professional, and community success and achievement.
Honors College Programs

The Farquhar Honors College offers several purposeful academic programs. The Honors community, Honors in Major, and the Honors Transdisciplinary Studies minor offer distinctive opportunities for high performing students to work collaboratively, pursue challenging curricula, and gain faculty mentors. Engagement in these programs do not preclude involvement in other premier programs.

Honors College Community

The Honors College fosters intellectual community both within and across academic disciplines by offering special coursework, reading groups, and workshops to help students prepare for graduate school, advanced research, study abroad, and post-baccalaureate fellowships. Honors students connect classroom and community experiences, including travel study, social activities, speakers series, and campus events. Academically talented and motivated students are encouraged to apply to Honors; students may apply prior to or while enrolled in an undergraduate degree program.

A small annual scholarship is provided to students admitted into the Honors College. Honors students may be awarded additional institutional scholarships (including the Dean’s Scholarship, which is distinct from the Honors College Scholarship). Students in Honors may also participate in the Dual Admission Program, athletics, Razor’s Edge, performing arts, and other premier programs.

The Honors College is housed on NSU’s Fort Lauderdale Campus. For more information about the Honors College, contact the Office of the Dean in the Farquhar Honors College at (954) 262-8408 or visit the Honors College website at honors.nova.edu.

Honors College Requirements

The Honors College establishes distinct requirements and high standards of academic achievement and conduct. Opportunities include honors seminars, courses, workshops, and events. New enrolling candidates for the Honors College are evaluated on the basis of prior academic performance and essays submitted with a secondary application. Approximately 10 percent of each year’s entering student class is invited to participate. Admission to the university is a prerequisite for admission to Honors.

Students in the Farquhar Honors College are expected to meet the following requirements and standards:

- Enroll as an undergraduate student on the Fort Lauderdale campus of Nova Southeastern University.
- Maintain a minimum cumulative NSU grade point average (GPA) of 3.5.
- Actively work toward the curriculum requirements for completion of the General Citation in Honors, the Research Citation in Honors, or ‘Honors in Major.’
- Engage consistently in Honors College co-curricular events and opportunities.
- Have no record of academic misconduct.
- Maintain full time enrollment in order to be eligible for the Honors College Scholarship.

Honors Citation and Honors in Major requirements must be completed at NSU. Honors courses will be noted on the student’s transcript and students who successfully complete citation requirements will be recognized for their accomplishment.

Academic progress in Honors is reviewed twice yearly. Honors students not meeting criteria may petition to retain Honors status. Petitions are reviewed on a case-by-case basis. A report of academic misconduct for a student in Honors requires an interview to determine whether the student’s standing in the Honors College should be terminated. Such a change of status may affect the student’s Honors College Scholarship eligibility. Please refer to the “Student Conduct—Academic Integrity” section on page 72 of this catalog for more information.

Honors Citations

Students in the Honors College may pursue one or both of the following citations.

General Citation in Honors
Students are required to complete 15 credits of Honors coursework (Honors seminars and/or Honors-level classes) by graduation
in order to receive the General Citation in Honors. All Honors courses will be noted on the student’s transcript and students who successfully complete the requirements of the General Citation in Honors will be recognized for their accomplishment. In order to receive a General Citation in Honors, students must hold a cumulative NSU GPA of 3.5 or higher at the time of degree conferral.

**Research Citation in Honors**

Students are required to complete 9 credits of honors coursework, including HONR 4990 Independent Study. In addition, students are required to complete an honors thesis. The honors thesis allows students to pursue independent research under the direction of a faculty mentor and typically takes two academic years to complete. Students must submit their thesis proposal for approval by the faculty mentor/adviser and the dean of the Farquhar Honors College. The successful completion and defense of an approved honors thesis is required to receive the Research Citation in Honors upon degree conferral. All honors courses will be noted on the student’s transcript, and students who successfully complete the requirements of the honors thesis will be recognized for their accomplishment. In order to receive a Research Citation in Honors, students must hold a cumulative NSU GPA of 3.5 or higher at the time of degree conferral.

Honors Citation requirements must be completed at NSU. Honors students who successfully complete the requirements for an Honors Citation will receive a notation of this achievement on their NSU transcript and diploma and a medallion to be worn at commencement.

---

**Honors Courses**

Honors courses are highly interactive, discussion-based, and designed to enhance student critical thinking and problem-solving skills. Honors students have direct interaction with faculty and may be invited to present portions of the course material to classmates. Honors courses might include a field trip or other hands-on learning experiences. Honors seminars (HONR prefix) are unique courses offered only to students in the Honors College. Core courses offered as ‘honors sections’ (CHEM 1500H or COMP 1500H, for example) address the same learning outcomes as non-honors sections, and incorporate unique instructional methods such as problem based instruction, have smaller enrollment, and are limited to honors students.

Honors courses may be used to satisfy degree requirements for the major, honors minor, general education, and open electives.

For specific course information, visit [honors.nova.edu/honors/courses.html](http://honors.nova.edu/honors/courses.html).

---

**Minor**

**HONORS TRANSDISCIPLINARY STUDIES MINOR**

The Honors Transdisciplinary Studies minor, hosted by the Farquhar Honors College, provides a purposeful and applied supplemental course of study culminating with a reflection essay describing a culminating honors experience. Students may work with an honors faculty mentor to develop a program of advanced study across disciplines that broadens student perspective and deepens student understanding of issues reflected across the five foundational pillars.

**Honors Transdisciplinary Studies Requirements:**

Students admitted to the Honors College are designated to pursue this minor. Prior to the start of the first year of study, students should submit an initial statement of intent (developed with assistance from an honors faculty member). Honors courses used for the minor may also satisfy General Education and Major requirements.

Honors culminating experiences vary (such as a research experience, practicum, internship, sustained community service, or travel study). The project may be fulfilled through successful completion of an honors thesis, Honors in Major, and other substantive honors work. Honors projects are personalized and reflect student scholarly and professional goals.

Students must be admitted to the NSU Farquhar Honors College to pursue the Honors Transdisciplinary Studies Minor. Students must be in good standing in the Honors College to be awarded this minor.

The Honors Transdisciplinary Studies minor requires three qualitative elements in addition to earning 15-24 honors (H or HONR) credits:

1. **Statement of Intent** (essay 1): Students must submit an essay (1-2 pages in length), that (a) identifies honors courses...
anticipated to fulfill the minor, (b) presents a unifying/connected theme across these courses, and (c) identifies honors faculty members who assisted to shape this plan. This essay is to be submitted to the Dean of the Honors College and ideally is submitted during students’ first year in the Honors College. (Contact the Honors College if you would like to submit this essay outside of your freshman year)

2. **Reflective Essay** (essay 2): Students must submit an essay (1-2 pages in length) that (a) describes an experience (any setting, not limited to campus engagement, research experience, community service, and/or emerging professional activity) where the outcomes from honors courses made a substantive and positive impact (b) reviews, updates, and evaluates the initial outcomes proposed in the first essay, and (c) identifies significant professional, academic, or scholarly contributions by honors faculty. This essay is to be submitted to the Dean of the Honors College no later than one month prior to degree conferral.

3. **Good Standing**: Students must hold good standing in the Honors College, which includes maintaining a cumulative GPA of 3.5 or higher.

---

**Honors in Major**

The Honors in Major program is a unique opportunity for high performing NSU undergraduate students in their senior year. If selected to join this program, students can expand the breadth and depth of knowledge in their academic discipline by completing an honors-quality project of interest with faculty’s guidance. To learn more about the Honors in Major program, visit [honors.nova.edu/honors-in-major/](http://honors.nova.edu/honors-in-major/).

**Benefits**

As a student in the Honors in Major program, students will:

- work closely with faculty member(s), establishing a mentoring relationship
- gain a deeper understanding of a subject matter they are passionate about
- participate in a research or applied experience that reflects personal and professional goals

After completing the Honors in Major requirements, students will receive the following acknowledgments of this accomplishment:

- notation on the NSU diploma and transcript
- acknowledgement at NSU commencement
- invitation to an Honors College reception
- some colleges may provide additional recognition

**Honors in Major Program Coordination**

NSU’s undergraduate Honors in Major program is offered university-wide and is administered by the Farquhar Honors College. The Honors College tracks student participation and provides support.

Student project requirements are managed by faculty members in the relevant academic department. Academic leadership in each college review and affirm project plans. Students are encouraged to read the college-specific Honors in Major requirements.

---

**HONORS IN MAJOR APPLICATION REQUIREMENTS**

To be considered for NSU’s Honors in Major program:

- Students must have completed (or be in progress of completing) 90+ credits (all sources) when entering the final year of undergraduate coursework.
- Students must hold a 3.8+ cumulative NSU GPA (based on a minimum of 15 completed NSU credits and a minimum of 30 NSU credits earned/enrolled).
- NSU’s Farquhar Honors College reaches out to students who meet these minimum program requirements.
- If selected to apply to the Honors in Major program, students must submit an application to the Honors College indicating interest.
- The application will be reviewed by the Honors College and by faculty members in the relevant academic department.
- Faculty members in each department may set more rigorous requirements.
**HONORS IN MAJOR APPLICATION TIMELINE**

Students must submit an application to participate in the Honors in Major program during the semester prior to the final two semesters of undergraduate coursework.

Application Deadlines:

- May degree completion: April 15 (preceding year)
- August degree completion: November 1 (preceding year)
- December degree completion: November 1 (preceding year)

Students will be notified of application status two weeks following the end of the semester in which the application is submitted.

If selected to participate in Honors in Major, students will also be considered a member of the Farquhar Honors College (with all the relevant privileges and recognition). Visit [honors.nova.edu/honors-in-major](http://honors.nova.edu/honors-in-major) to apply.

**HONORS IN MAJOR REQUIREMENTS**

Honors in Major projects are completed during the senior year at NSU (or during the last two semesters of student’s undergraduate curricular engagement). While the Honors in Major project may include credit-bearing coursework, it does not increase the requirements for degree program.

Each NSU academic college has unique opportunities and requirements for the Honors in Major program:

**Abraham S. Fischler College of Education and School of Criminal Justice**

Students in the Abraham S. Fischler College of Education and School of Criminal Justice complete upper-level courses with supplemental projects such as:

- K-12 volunteer service hours
- Educational research
- Educational advocacy projects

Faculty members serve as mentors for students in the program.

Students make presentations based on their projects to peers, faculty, and at conferences.

**College of Computing and Engineering**

Students in NSU’s College of Computing and Engineering participate in distinctive capstone projects relevant to each of the majors in the college.

Projects may be further customized for each student and may include:

- Research projects
- Focused literature reviews
- Internships
- Community/university service

Students present the results of these projects in a relevant forum. Faculty members serve as mentors to individual students.

**College of Psychology**

Students in the College of Psychology Undergraduate Programs in psychology and neuroscience majors must have a 3.8 GPA in major courses, in addition to an overall GPA of 3.8.

Student may choose between the following:

**Clinical Track**
• Enroll in PSYC 4810
• Complete an in-depth literature review
• Give a brief classroom presentation
• All College of Psychology Honors in Major students will participate in the annual Department Symposium, giving a brief presentation on the project

**OR**

**Research Track**

To participate in the research track, an interview is required to assure mutual compatibility.

• Enroll in independent study (PSYC 4990 or NEUR 4990) or internship (PSYC 4950 or NEUR 4950)
• Collaborate with a faculty member on research
• Present research at an acceptable venue (Undergraduate Student Symposium, professional conference) approved by the faculty mentor
• All College of Psychology Honors in Major students will participate in the annual Department Symposium, giving a brief presentation on the project

**Dr. Pallavi Patel College of Health Care Sciences**

Students in the Dr. Pallavi Patel College of Health Care Sciences complete a project specific to majors:

**Exercise Science and Speech-Language Majors**

Students select from the following project options:

• Original lab or field research on a topic relevant to the major
• An approved thesis in the Honors College on a topic relevant to the major
• A service learning project relevant to the major
• A capstone project involving critical literature review relevant to the major

**Respiratory Therapy Major**

Students select from the following project options:

• A community service project relevant to the major
• A case presentation from their clinical rotation (submitted as an article for publication or presentation at the American Association for Respiratory Care (AARC) National conference)

**Medical Sonography and Cardiovascular Sonography Majors**

Students select from the following project options:

• A community service project relevant to the major
• A case study presentation from their clinical rotation (submitted as an article for publication or presentation at a national professional conference)

**Bachelor of Health Science Major**

Students select from the following project options:

• A community service project (including training at the place of employment or in the community)
• A capstone project involving critical literature review of a topic relevant to the major

**Dr. Kiran C. Patel College of Osteopathic Medicine**

Students in the Dr. Kiran C. Patel College of Osteopathic Medicine will participate in major-specific projects. All students will participate in the annual department symposium, giving a brief presentation and reflection on the project.

**Public Health**
Community Service Track
- Complete 40 community service hours in public health-related topic and/or underserved population.
- Collaborate with a faculty member to serve as mentor for the project.

OR

Project Track: (to participate in the project track, an interview with faculty mentor is required)
- Enroll in Independent Study in Public Health (BPH 4990)
- Collaborate with faculty member on research, service learning, or program development project.

Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center

Students in the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center participate in major-specific projects:

Arts, Humanities, and Social Sciences Majors

Students in Arts, Humanities, and Social Science majors engage in upper-level academic and experiential major-specific activities. During the two-semester senior year experience, students are required to engage successfully in the following:

- Completion of an independent study course in the major with a full-time faculty member in the department who teaches in that major.
- Completion of one of the below options:
  - Participate in travel study/study abroad for academic credit
  - Complete an internship in the major for credit
  - Present at both an academic conference (first be approved by the department chair) and the undergraduate student symposium.
  - Participate in Model United Nations (UN) for at least one year or to the satisfaction of the Model UN faculty advisor
  - Participate in Mock Trial for at least one year or to the satisfaction of the Mock Trial faculty advisor

Biology Major

- Complete a written project (literature review, metadata analysis, or service learning) building upon work from selected courses
- Complete at least four courses in biology at the 4000 level
- Meet with a faculty committee to discuss/present the project

Chemistry Major

- Complete a research project and enroll in specific upper level courses fulfilling degree requirements with a minimum GPA of 3.8 for their major

Marine Biology and Environmental Science Majors

- Complete an individualized project working with a faculty mentor

Mathematics Major

Students choose between

- Project Track: (research/thesis, service learning, capstone project) with a written report and presentation to a faculty panel. Students also enroll in specific upper-level courses to fulfill degree requirements.

OR

- Curriculum Track: more extensive course selections that fulfill degree requirements

H. Wayne Huizenga College of Business and Entrepreneurship

Students in the H. Wayne Huizenga College of Business and Entrepreneurship will:
Complete an applied or research oriented project. Options for the project include an internship, independent study or research thesis.

Ron and Kathy Assaf College of Nursing

NSU’s Ron and Kathy Assaf College of Nursing (ACON) candidates participate in a supplemental interview. Applicants must demonstrate a history of an ongoing and continuing community involvement.

Students are required to:

- Present a research poster at a professional venue
- Demonstrate an ongoing and continuing involvement in a professional or pre-professional nursing organization
- Serve as peer-to-peer mentors for students enrolled in the undergraduate nursing program, when requested
- Serve as student representatives at ACON Council/Committee meetings, when requested
- Continue to participate in community activities and/or or service learning opportunities at least once per year

Shepard Broad College of Law

During the two-semester senior year experience, students are required to engage successfully in the following:

- Completion of an independent study course in the major with a full-time faculty member in the department who teaches in that major.
- Completion of one of the below options:
  - Participate in travel study/study abroad for academic credit (first be approved by the department chair)
  - Complete an internship in the major for credit (first be approved by the department chair)
  - Complete a public-service project (first be approved by the department chair)
  - Present at both an academic conference (first be approved by the department chair) or the undergraduate student symposium.

Dean’s Message

Academic year 2021-2022 is here and with it, a new semester. We are still absorbing the impact of a pandemic. However, there is hope that our lives will return to “normal” as vaccines are distributed. The vaccine distribution process was unsteady, which is to be expected given the enormity of the effort and perhaps, to remind us of how important planning is to every endeavor big and small.

To be sure, there has been a great deal of learning that has occurred resulting from the pandemic. We see that our lives, medicine, and business can be conducted with less “in-office” time and more telecommuting. Perhaps there will be less traffic going ahead, which means reductions in greenhouse emissions.

Combining the need for planning and learning from the pandemic, we have sought the input of all stakeholders in the college, from students to alumni to faculty and the NSU community. We have created a vision that “Graduates of HCBE will innovate, influence, and transform organizations that are ‘best for our world™’.” The vision speaks to the role of the Huizenga College of Business and Entrepreneurship in our community (on campus and beyond) so that among other things our graduates will be the ones to either help lead to prevent pandemics or will lead us out of them. The vision leads to a new mission, “We prepare business and entrepreneurial leaders to embody values-based decision making as they adapt, innovate, influence, and transform organizations to tackle tomorrow’s challenges and opportunities,” and a new strategic plan.

Among the important paths forward as we live our new vision is to transform existing courses to be “best for our world™” and create new programs. For example, we will teach micro and macro-economic courses within contexts that speak to our values such as “the economics of poverty,” “economics of inequality”, and/or the “economics of healthcare.” We have developed a new BSBA major in the Business of Health that equips graduates with the skills to pursue important careers in healthcare or seek admission to medical school. Our dedicated faculty will continue to enhance existing curricula and innovate with new offerings guided by the vision of HCBE and NSU. I look forward to sharing additional news with you over the coming months.

My best to you and your families as we continue to live our lives in the new normal. Best wishes for a better 2021 and 2022.

Please consider reaching out to me to let me know how I can help.

Andrew Rosman, Ph.D.
Dean, H. Wayne Huizenga College of Business and Entrepreneurship
Vision Statement

Graduates of H. Wayne Huizenga College of Business and Entrepreneurship (HCBE) will innovate, influence, and transform organizations that are best for our world™.

Mission Statement

We prepare business and entrepreneurial leaders to embody values-based decision making as they adapt, innovate, influence, and transform organizations to tackle tomorrow’s challenges and opportunities.

Principles

We are committed to setting the example across business schools and all academic areas at NSU that profit, the people of the workplace, and our world in which we live must be in balance for the greater good. We embrace each of NSU’s core values (academic excellence, student-centered, integrity, innovation, opportunity, scholarship/research, diversity, and community), with a particular emphasis on the following:

- **Integrity** is the core of our College and we take the stewardship of how we treat others seriously. We focus on transparency in doing the right thing with every decision.
- We believe in the power of working together to create a culture of **collaboration** and respect, which adds value to our teams and our relationships with the University and external **communities**.
- We embrace **diversity** and inclusion within our institution with respect to age, gender, mental and physical abilities, race, ethnic heritage, and sexual orientation. We will promote the rights of individuals and equal access to educational and enrichment experiences, respecting cultural differences and ensuring equal opportunity. We foster an environment that empowers everyone to identify implicit bias and learn how to lead to eliminate it in the workplace.
- Our efforts through research, teaching, service, and fundraising focus on the success of our students. This **student-centeredness** is evident from recruitment to graduation and beyond when our students become alumni.

Introduction to the College

Undergraduate majors in business fields are offered through the H. Wayne Huizenga College of Business and Entrepreneurship. The information provided in this section addresses curricular requirements for majors and minors in business administration and related fields under the direction of the Huizenga College’s faculty. Curricula are subject to change. Students should consult their academic advisor regarding course selection and program planning.

Internships Across the Curriculum

Internships provide experiential learning opportunities that integrate knowledge and theory learned in the classroom with practical skills development in a professional setting. Internships allow students to gain valuable applied experience, explore career paths, and make connections with potential employers. Students in all business undergraduate programs are required to complete at least one internship or a study abroad experience during their time in the program. This requirement can be met by completing a credit-bearing internship of three or more credits, or on a non-credit basis. Those who pursue the non-credit option will replace the internship/study abroad experience credits with any credits offered by HCBE.

The H. Wayne Huizenga College of Business and Entrepreneurship works collaboratively with the NSU Career Development office to offer numerous paid and unpaid internships. To learn more about internships, students should visit nova.edu/career/students/internships.html or the Office of Career Development located on the first floor in the Horvitz Administration Building or call (954) 262-7201 for assistance.
Ethics Across the Curriculum Policy

Nova Southeastern University faculty believes that a socially responsible institution should not limit the study of ethical issues only to coursework, but that such study should be an ongoing endeavor, enhancing the experience of the student. To this end, the faculty is committed to making the study of ethical issues an integral part of the bachelor’s degree academic program. The faculty believes that by incorporating the study of ethics throughout the curriculum, students will give additional relevance and reality to their studies, which will help them to become more responsible and productive citizens.
Business Programs

The Bachelor of Science in Business Administration degree program offered through the H. Wayne Huizenga College of Business and Entrepreneurship provides the following majors: accounting, business of health, entrepreneurship, finance, management, marketing, property management and real estate, and sport and recreation management.

Student Learning Goals and Outcomes (SLOs)

A successful graduate of the Bachelor of Science in Business Administration degree program will be able to:

Business Knowledge: Our students will have knowledge in the core business disciplines.

LO 1: Our students identify the principle concepts and theories in the core business disciplines.

Critical Thinking: Our students think critically in a business context.

LO 1: Our students will diagnose and solve a business problem.

Communications: Our students will be effective communicators.

LO 1: Our students deliver effective oral presentations.

LO 2: Our students will compose professional business documents

Ethics: Our students will be ethical decision makers.

LO 1: Our students will apply ethical theories to decisions.

Majors in Business

ACCOUNTING MAJOR

The accounting major prepares students for accounting careers in the public and private sectors as well as to lay a foundation for more advanced accounting education. The major will also serve as the foundation for those preparing for the CPA examination. The State Board of Accountancy in Florida requires an additional 30 credits beyond the bachelor’s degree to qualify for the examination. To meet this requirement, the Huizenga School offers a master’s degree program designed to satisfy the CPA requirements. Students are cautioned to plan their schedule carefully since upper-division accounting courses are offered only once per year.

Accounting Major Learning Outcomes

1. Properly apply generally accepted accounting principles (GAAP) in the preparation of financial statements;
2. Use appropriate cost and managerial accounting techniques to prepare information for decision making;
3. Demonstrate knowledge of auditing techniques and processes;
4. Correctly apply relevant UCC and tax codes and regulations;
5. Demonstrate knowledge of accounting information systems including the design and documentation of such systems.

Accounting Major Curriculum

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

### Program Electives (12)

Students will complete 12 credits of program electives. Program electives are any courses offered by HCBE. Students are encouraged to work with their advisor to pursue a minor using the program electives to enhance career opportunities.

* Students must earn a grade of C or higher in this course, or it must be repeated.

---

**BUSINESS OF HEALTH MAJOR**

The one-of-a-kind business of health major provides a comprehensive, flexible, transdisciplinary, problem-based and team-based learning experience, exposing students to the full continuum of the U.S. health ecosystem – taking a look at the upstream, midstream and downstream factors impacting the business of health, population health management, and healthcare delivery in the United States. The major is poised to prepare tomorrow’s leaders as agents of change who will develop innovative approaches to successfully tackle population health and healthcare management challenges of today and tomorrow. The general education and pre-med science courses also prepare students to take the MCAT exam and pursue medical school.

### General Education Requirements (32 credits)

Students are required to complete 32 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog. In the humanities area, PHIL 3180 Biomedical Ethics is required. For the 6 required credits in science, students are required to complete PHYS 2350 General Physics I with Lab and PHYS 2360 General Physics II with Lab.
### Additional Pre-Med Sciences (24 credits)

### Entrepreneurship Major

Prepares current and future entrepreneurs with the necessary skills and tools to successfully start, build and scale a business. Fosters creative, innovative and independent thinking. Discovery problems that are worth solving, design solutions and validate them through prototyping. Identify opportunities, formulate business ideas, and evaluate them within any organization and industry. Apply empirical and multidisciplinary frameworks for understanding the key successful factors that create new ventures within the context of any organization or industry. Gain experience in market analysis, strategy formulation, and management of a new venture.
Entrepreneurship Major Curriculum

General Education Requirements (30 credits)
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Program Electives (12 credits)

Students will complete 12 credits of program electives. Program electives are any courses offered by HCBE. Students are encouraged to work with their advisor to pursue a minor using the program electives to enhance career opportunities.

Finance Major

The finance major is designed for students who want to combine a broad approach to business studies with specialization in the discipline of finance. Specialized skills in finance are realized through the study of foreign currencies, investments, portfolio theory, financial management, money and banking, and economics. Graduates are well prepared to enter an M.B.A. program, professional programs such as law, and/or master’s degree programs in finance. Graduates are also well prepared to work for a finance department across all industries or for a finance firm in the financial services industry, which includes investment brokerage, real estate, insurance, or financial planning.
Finance Major Curriculum

Program Electives (12 credits)
Students will complete 12 credits of program electives. Program electives are any courses offered by HCBE. Students are encouraged to work with their advisor to pursue a minor using the program electives to enhance career opportunities.

MARKETING MAJOR

The marketing major prepares students for marketing careers in today's changing marketplace, including careers in brand management, sales promotion, customer service, direct marketing, event planning, advertising, and media planning. The program provides students with an understanding of the marketing process for creating, communicating, and delivering products and services that have superior value for customers and other stakeholders. Students are exposed to a range of current marketing practices in their curriculum, which consists of core foundational courses and marketing electives. This is supplemented by internships, competitive marketing projects, and participation in the student chapter of the American Marketing Association.

Minors in Business

All students may complete one or more minors to prepare them for careers or graduate studies. A minor requires the completion of 15–18 credits. If a student has taken one or more of the courses listed in the minor as part of his/her major, a minimum of three additional courses must be successfully completed to earn the minor. A maximum of six credits may be used from a student’s major courses to satisfy a minor.

ACCOUNTING MINOR

The minor in accounting provides students with practical accounting knowledge.

Accounting Minor Requirements (9 credits)
All students who minor in accounting are required to complete the courses listed below.

ACT 2020  Foundations of Accounting I (3 credits)*
ACT 2030  Foundations of Accounting II (3 credits)* **
ACT 3050  Intermediate Accounting I (3 credits)
**Accounting Minor Electives (6 credits)**

- ACT 3030  Cost Management (3 credits)*
- ACT 3060  Intermediate Accounting II (3 credits)*
- ACT 3070  Intermediate Accounting III (3 credits)*
- ACT 4050  Accounting Information Systems (3 credits)*
- TXX 3110  Federal Taxation I (3 credits)*
- TXX 4110  Federal Taxation II (3 credits)*

*Business students may satisfy this requirement, depending upon their major.
**Students must earn a grade of C or higher in this course, or it must be repeated.

---

**BUSINESS MINOR (NON-BUSINESS MAJORS)**

This minor is designed for students who want exposure to the business disciplines to help prepare them for jobs in business and industry or for a graduate degree program in business.

**Business Minor Requirements (18 credits)**

All students who minor in business are required to complete the courses listed below.

### MBA Track (18 credits)

- ACT 2030  Foundations of Accounting II (3 credits)*
- ECN 2020  Principles of Microeconomics (3 credits)*
- FIN 3010  Corporation Finance (3 credits)*
- MATH 2020  Applied Statistics (3 credits)*
- MGT 2050  Principles of Management (3 credits)
- MKT 3050  Marketing Principles and Application (3 credits)

### Generalist Track (15 credits)

Select five courses from any of the following prefixes:
- ACT, ECN, ENT, FIN, HRM, INB, ISM, LED, MGT, MKT, OPS, PADM, QNT, REE, SPT

*Students pursuing a Master of Business Administration degree at NSU must earn a grade of C or higher.

---

**ECONOMICS MINOR**

This minor will provide students with the opportunity to learn both micro and macro-economic theory and methods. Students will be able to integrate theory and observations, and apply this knowledge in the real world by analyzing social problems and evaluating public policy solutions. Graduates with a minor in economics will be competent in key concepts of economic theory, analysis, and computations.

**Economics Minor Requirements (15 credits)**

All students who minor in economics are required to complete the courses listed below.

- ECN 2020  Principles of Microeconomics (3 credits)*
- ECN 2025  Principles of Macroeconomics (3 credits)*
- ECN 3020  Intermediate Microeconomics (3 credits)
- ECN 3025  Intermediate Macroeconomics (3 credits)*
- ECN 3210  International Economics (3 credits)*

*Business students may satisfy this requirement, depending upon their major.

---

**ENTREPRENEURSHIP MINOR**

This minor in entrepreneurship is intended for students who desire a course of study to improve their understanding of the business environment and entrepreneurial issues related to a business or organization.
Entrepreneurship Minor Requirements (15 credits)

Students who minor in entrepreneurship are required to complete the courses listed below.

- ENT 3100  Entrepreneurial Mindset (3 credits)*
- ENT 3200  Global Trading & Negotiations (3 credits)
- ENT 3900  Entrepreneurship Internship (3 credits)*
- ENT 4400  Franchise Management (3 credits)

Select one course from the following:
- ACT 3050  Intermediate Accounting I (3 credits)*
- ENT 4800  Entrepreneurship Experience (3 credits)
- FIN 3110  Financial Management (3 credits)*
- LED 3000  Introduction to Leadership (3 credits)*
- SPT 3650  Sports Promotions and Sponsorship (3 credits)*
- MKT 3060  Consumer Behavior (3 credits)*
- ENT 4966  Special Topics in Entrepreneurship (3 credits)

*Business students may satisfy this requirement, depending upon their major.

Finance Minor

This minor is designed for students who are already employed in, or who would like to pursue a career in banking, corporate finance, financial planning, investments, or insurance, or to pursue a graduate degree in finance.

Finance Minor Requirements (15 credits)

Students who minor in finance are required to complete the courses listed below.

- ACT 2030  Foundations of Accounting II (3 credits)*
- FIN 3010  Corporation Finance (3 credits)*

Select three courses from the following:
- FIN 2000  Personal Finance (3 credits)
- ECN 3210  Monetary Theory and Policy (3 credits)
- FIN 3110  Financial Management (3 credits)
- FIN 3120  Principles of Investments (3 credits)
- FIN 3130  Securities Analysis (3 credits)
- FIN 3150  Banking and Financial Institutions (3 credits)
- FIN 4120  Advanced Financial Management (3 credits)
- FIN 4550  International Finance (3 credits)

*Business students satisfy this requirement.

Huizenga Business Innovation Academy Venture Creation Minor

Students in the Huizenga Business Innovation Academy are required to have a minor in Venture Creation. The Venture Creation minor is a curricular and co-curricular program that is designed to provide learning experiences inside the classroom as well as outside the classroom through involvement in firsthand identifying business opportunities, gaining the necessary knowledge and skills to launch a business, starting an on-campus business with a micro-loan, and managing limited resources. The Venture Creation minor includes the Huizenga Business Innovation studio courses, summer immersive experiences, students participate in during their first and second summers in the program. The Venture Creation minor courses are only available for students admitted into the Huizenga Business Innovation Academy Programs.

Venture Creation Minor Requirement (15 credits)

- ENT 3130  Huizenga Business Innovation Academy Studio I (3 credits)
- ENT 3140  Entrepreneurial Opportunities & Analysis (3 credits)
- ENT 3150  Huizenga Business Innovation Academy Studio II (6 credits)
- ENT 3160  Running Your Business (2 credits)
HUMAN RESOURCE MANAGEMENT MINOR

This minor is designed for students who are already in or would like to be employed in the fields of human resources, training and development, labor relations, or related areas.

Human Resource Management Minor Requirements (15 credits)

Students who minor in human resource management are required to complete the courses listed below.

- HRM 4160 Human Resource Management (3 credits)*
- HRM 4300 Managing Workplace Diversity (3 credits)
- HRM 4310 Training and Development (3 credits)
- HRM 4320 Recruitment and Staffing (3 credits)
- HRM 4330 Total Rewards: Compensation and Benefits (3 credits)

*Business students may satisfy this requirement, depending upon their major.

INTERNATIONAL BUSINESS MINOR

This minor is designed for students employed by, or desiring employment in, multinational companies including career titles such as exporters, importers, freight forwarders, customs brokers, transportation firms, wholesalers, or manufacturers.

International Business Minor Requirements (15 credits)

Students who minor in international business are required to complete the courses listed below.

- MGT 2050 Principles of Management (3 credits)*

Select four courses from the following:

- MKT 3320 International Marketing (3 credits)
- INB 3550 International Business (3 credits)*
- INB 4300 Export/Import Trade (3 credits)
- FIN 4550 International Finance and Banking (3 credits)*
- INB 4600 International Management (3 credits)*

*Business students may satisfy this requirement, depending upon their major.

LEADERSHIP MINOR

The minor in leadership is intended for students who desire a course of study to improve their understanding of the impact of effective leaders along with an examination of contemporary leadership models and theories describing and explaining the leadership process.

Leadership Minor Requirements (15 credits)

Students who minor in leadership are required to complete the courses listed below.

- LED 3000 Introduction to Leadership (3 credits)*
- MGT 2050 Principles of Management (3 credits)*
- LED 3200 Creativity and Workplace Performance (3 credits)
- LED 4300 Situational Leadership (3 credits)
- MGT 3055 Managing Groups and Teams (3 credits)

*Business students may satisfy this requirement, depending upon their major.

MANAGEMENT MINOR

The minor in management is designed for students who desire the human, technical, and conceptual knowledge and skills to deal with
the complexities of dynamic organizations in a multi-cultural and global context.

Management Minor Requirements (15 credits)

Students who minor in management are required to complete the courses listed below.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

**PROPERTY MANAGEMENT MINOR**

The need for qualified professionals in the property management industry in today’s market continues to grow. The minor in property management develops a broad array of skills preparing students in real estate leasing, residential property management, commercial property management, and facilities management. It also offers practical training through a provided internship. The curriculum is designed by industry professionals to provide students with the necessary skills to excel in property management.

The Property Management minor is also focused on providing students with the educational resources necessary to successfully complete property management assignments and projects with the support of the business community. Industry professionals provide mentoring to students enrolled in the program to help ensure their successful entry into the profession. Case study competitions that are judged by industry professionals are used to help facilitate and develop useful oral and written presentations by students. Site visitations and guest lectures also serve a vital role as part of the experiential learning environment.

**Property Management Minor Requirements (15 credits)**
Students who minor in property management are required to complete any five of the courses listed below:

- **REE 3301** Real Estate Principles, Practices and Law
- **REE 3900** Property Management Internship
- **REE 4302** Residential Property Management
- **REE 4303** Commercial Property Management
- **REE 4304** Facilities Management
- **REE 4305** Property Portfolio and Asset Management
- **REE 4306** Hospitality, Resort, Cruise Ship, and Casino Property Management

**SOCIAL INNOVATION AND SUSTAINABILITY MINOR**

This minor is designed for students who wish to make an impact on their communities and the planet at large. Career paths include establishing and/or working with a non-profit organization, pursuing positions in corporate sustainability, and related fields.

**Social Innovation and Sustainability Minor Requirements (15 credits)**

- **ENVS 1100** Environmental Science I (3 credits)
- **GEOG 2075** Geographical Information Systems (3 credits)
- **PADM 1000** Introduction to Public Administration (3 credits)
- **PADM 2150** Transforming Public Administration for Sustainable Development (3 credits)
- **PADM 3456** Creativity and Innovation in Government and Social Practices (3 credits)

**SPORT AND RECREATION MANAGEMENT MINOR**

This minor is designed for students who will be associated with sport in the course of their careers, be it through business, education, coaching, athletic training, or other opportunities.

**Sport and Recreation Management Minor Requirements (15 credits)**
Students who minor in sport and recreation management are required to complete the courses listed below.

- **SPT 1050** Introduction to Sport and Recreation Management (3 credits)

Select four courses from the following:

- **SPT 2050** Sport in Popular Culture (3 credits)
- **SPT 2075** Intro to e-Sports Management (3 credits)
- **SPT 2150** Sport in Society (3 credits)
- **SPT 2350** Ethics in Sport and Recreation Management (3 credits)
- **SPT 3150** Facility and Event Management (3 credits)
- **SPT 3425** Public Relations in Sport
- **SPT 3550** Issues in Sport Finance (3 credits)
- **SPT 3650** Sport Promotions and Sponsorship (3 credits)
- **SPT 3925** The Business of College Sports (3 credits)
- **SPT 4555** Risk Management in Sport (3 credits)
- **SPT 4675** The Business of e-Sports (3 credits)
Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center
Welcome to NSU’s Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center! The College is NSU’s intellectual and cultural foundation, firmly anchoring the University in the liberal arts and sciences necessary for the 21st Century workforce on into graduate school. We engage you in a cutting-edge selection of majors and minors, built on innovative models and relevant technologies.

In programs across the performing and visual arts, the natural and social sciences, and the humanities, the College is authentically invested in supporting experiential and high impact learning opportunities, cross-disciplinary education, and globally significant research and scholarship. The College provides an inclusive learning community, grounded in faculty-student collaboration and teaching-learning excellence, leading you to a path of passionate life-long learning and self-discovery. On behalf of our faculty and staff, I extend our sincere wishes for a rewarding academic year of successful productivity on your personal and professional goals.

Holly Lynn Baumgartner, Ph.D., Dean
Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center
Introduction to the College

The Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center offers stimulating programs of study that challenge and engage students and prepare them for professional careers, graduate studies, and responsible citizenship. The college includes the following departments: Biological Sciences, Chemistry and Physics, Communication, Media, and the Arts; Conflict Resolution Studies, Humanities and Politics, Marine and Environmental Sciences; and Mathematics. Undergraduate degree programs offered by the college include both Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in twenty majors. Undergraduate students may choose to complement their major course of study with one of the thirty-eight minors housed in the college or one of the minors housed in other NSU colleges. The college also offers two doctoral degree programs, seven master’s degree programs, and five graduate certificate programs.

To earn a bachelor’s degree from Nova Southeastern University, students in the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center must complete at least 120 credits, including major, minor, general education, and elective coursework. For complete graduation requirements, please see “Graduation Requirements” on page 60. Regular communication between students, faculty, and academic advisors is strongly encouraged to ensure that each student is successfully progressing toward graduation.
Department of Biological Sciences

The Department of Biological Sciences provides students with a strong foundation in biology at the undergraduate and graduate levels with opportunities for a bachelor’s degree and master’s degree in the biological sciences. Coursework includes a wide array of topics from general biology, anatomy and physiology, evolution, molecular biology, genomics, and more. In addition to teaching, the Department is committed to excellence in research and service, providing opportunities and connections for current students and graduates. Our graduates achieve their goals of becoming doctors, dentists, pharmacists, physician assistants, and physical therapists as well as molecular biologists, professors, and teachers.

Major

Biology (Premedical) Major

The biology major, with a premedical emphasis, provides a strong curriculum in biology with significant study in the physical sciences. This major can provide the basis for graduate study in specialized fields of biology, for professional training in medical fields, and for teaching. Professional careers in the medical fields and in biology involve graduate study beyond the baccalaureate degree; therefore, both the core and the major have been designed to meet the admission requirements of many medical, dental, pharmacy, optometry, allied health, and veterinary schools, and of schools for graduate study in the biological sciences. Dual admission and combined programs with the Nova Southeastern University Health Professions Division are available for select, qualified students. Information on these programs can be obtained from the Office of Undergraduate Admissions.

Biology Major Learning Outcomes

A successful biology graduate is expected to:

1. Demonstrate a working knowledge of the scientific method;
2. Demonstrate essential knowledge of biological sciences;
3. Demonstrate essential knowledge of physical sciences as they relate to the biological sciences;
4. Use mathematics to solve scientific problems and evaluate research data;
5. Demonstrate the ability to use standard laboratory and research techniques to collect and assess data;
6. Demonstrate an ability to synthesize and integrate biological principles with contemporary issues.

Biology Major Curriculum

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

- BIOL 4360  Immunology (3 credits)
- BIOL 4410  Human Embryology (3 credits)
- BIOL 4600  Evolution, Adaptation, and Health (3 credits)
- BIOL 4700  Advanced Human Physiology (3 credits)
- BIOL 4960  Practicum in Biology I (3 credits)
- BIOL 4961  Practicum in Biology II (3 credits)
- CHEM 3650  Biochemistry/Lab (4 credits)

Major Electives may include a maximum of one of the following MATH courses:

- MATH 2200  Calculus II (4 credits) **OR** MATH 2200H Calculus II Honors (4 credits)
- MATH 3030  Applied Statistics II (3 credits)
- MATH 3050  Mathematics and Biology (3 credits)

Note: Major Electives may include a maximum of 3 credits from the following courses:

- BIOL 4900  Special Topics in Biology (3 credits)
- BIOL 4950  Internships in Biology (3 credits)
- BIOL 4990  Independent Study in Biology (3 credits)

---

**Pre-Nursing Major**

**Pre-Nursing Major Curriculum**

This unique curriculum is designed for students who wish to apply to NSU's Entry Bachelor of Science in Nursing program of NSU's
Ron and Kathy Assaf College of Nursing and complete the program’s admission prerequisite courses at the university. Successful completion of these prerequisite courses does not guarantee admission to the B.S.N. program. Additional requirements, beyond course prerequisites, are needed for B.S.N. applicants to be eligible for admission published on this catalog under Ron and Kathy Assaf College of Nursing. Admission prerequisites are subject to change at any time. Students must contact NSU’s Ron and Kathy Assaf College of Nursing for the applicable B.S.N. program admission requirements.

Pre-Nursing Major General Education Requirements (30 credits)

- COMP 1500 College Writing (3 credits) OR COMP 1500H College Writing Honors (3 credits)
- COMP 2000 Advanced College Writing (3 credits) OR COMP 2000H Advanced College Writing Honors (3 credits)
- MATH 1040 Algebra for College Students (3 credits)
- MATH 2020 Applied Statistics (3 credits) OR MATH 2020H Applied Statistics Honors (3 credits)
- BIOL 2400 Applied Microbiology (3 credits)
- CHEM 1100 Fundamentals of Chemistry (3 credits)
- PSYC 1020 Introduction to Psychology (3 credits) OR PSYC 1020H Introduction to Psychology Honors (3 credits)
- Two courses from any ARTS, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, SPAN, THEA, WRIT or foreign language (6 credits)

Pre-Nursing Major Prerequisite Courses (15 Credits)

- BIOL 1500 Biology I/Lab (4 credits)
- BIOL 2350 Anatomy and Physiology I/Lab (4 credits)
- BIOL 3320 Anatomy and Physiology II/Lab (4 credits)
- BIOL 3330

Minor

Bioinformatics Minor

Bioinformatics is a scientific discipline that merges biology, computer science, mathematics, and other areas into a broad-based field that has profound impacts on all fields of biology. It is the comprehensive application of mathematics (e.g., probability and statistics), science (e.g., biochemistry), and a core set of problem-solving methods (e.g., computer algorithms) to the understanding of living systems. The bioinformatics minor provides foundational study in this field of study.

Bioinformatics Minor Requirements (18 credits)

- BIOL 3600 Genetics/Lab (4 credits)
- BIOL 4100 Genomics/Lab (4 credits)
- BIOL 4321 Systems and Synthetic Biology (3 credits) OR NEUR 3010 Fundamentals of Theoretical and Computational Neuroscience (3 credits)
- CSIS 2101 Fundamentals of Computer Programming (4 credits)
- MATH 3050 Mathematics and Biology (3 credits) OR MATH 2001 Introduction to Mathematical Models in Biology (3 credits)

Biology Minor

The Biology minor helps students integrate biological concepts at all levels from molecular to ecosystem. This coursework assists students in preparation for health-related professions, research, and careers in biological sciences. This minor can be combined with any major and minor except the biology major.

Biology Minor Requirements (16 credits)

Select 16 credits from any BIOL course at the 3000 level or higher (excluding BIOL 4901 APS Capstone in Biology and Physical Sciences, BIOL 4950 Internship in Biology and BIOL 4990 Independent Study in Biology).

Pre-Health Minor

The pre-health minor provides students with science foundation courses in biology, chemistry, and physics. This coursework assists
students in preparation for health-related professions, research, and careers in natural sciences. This minor is open to all majors.

**Pre-Health Minor Requirements (24 credits)**

Select 24 credits from the following courses:

- **BIOL 1500** Biology I/Lab (4 credits)
- **BIOL 1510** Biology II/Lab (4 credits)
- **CHEM 1300** General Chemistry I/Lab (4 credits) OR CHEM 1300H General Chemistry I/Lab Honors (4 credits)
- **CHEM 1310** General Chemistry II/Lab (4 credits) OR CHEM 1310H General Chemistry II/Lab Honors (4 credits)
- **CHEM 2400** Organic Chemistry I/Lab (4 credits) OR CHEM 2400H Organic Chemistry I/Lab Honors (4 credits)
- **CHEM 2410** Organic Chemistry II/Lab (4 credits) OR CHEM 2410H Organic Chemistry II/Lab Honors (4 credits)
- **CHEM 3650** Biochemistry/Lab (4 credits)
- **PHYS 2350** General Physics I/Lab (4 credits) OR PHYS 2350H General Physics I/Lab Honors (4 credits)
  OR PHYS 2400 Physics I/Lab (4 credits)
- **PHYS 2360** General Physics II/Lab (4 credits) OR PHYS 2360H General Physics II/Lab Honors (4 credits)
  OR PHYS 2500 Physics II/Lab (4 credits)
Department of Chemistry and Physics

The Department of Chemistry and Physics prepares students for the modern scientific world by providing strong curricula in a chemistry major, a chemistry minor and a physics minor. The chemistry major is a B.S. in Chemistry with two tracks (non-ACS track and ACS track). ACS stands for the American Chemical Society. Both tracks combine an advanced chemistry curriculum with significant studies in physics, biology, and mathematics. The major is intended for those who wish to pursue a career in chemistry-related fields or secondary education teaching and who wish to enter a graduate program in chemistry or in health-related fields such as medicine, pharmacy, dentistry, optometry, and law. The chemistry and physics minors are intended to further develop students’ quantitative and analytical skills by expanding their knowledge beyond the introductory level. These minors complement curricula in other disciplines ranging from biology and engineering to computer sciences, as well as being essential for education majors who intend to teach physical sciences in high school. The faculty in our department are actively engaged in research with students in a wide range of expertise within chemistry and physics sub-disciplines.

Majors

Chemistry Major

The chemistry major prepares students for the modern scientific world by providing a blend of a strong chemistry curriculum with significant study in physics, biology, and mathematics. The chemistry major has two tracks: a B.S. in Chemistry (non-ACS track) and a B.S. in Chemistry (ACS track). ACS stands for the American Chemical Society. Both B.S. tracks are intended for those who wish to pursue a career in chemistry-related fields or secondary education teaching and who wish to enter a graduate program in chemistry or in health-related fields such as medicine, pharmacy, dentistry, optometry, assistant anesthesiology, and law.

Chemistry Major Learning Outcomes

A successful chemistry graduate is expected to:

1. Demonstrate a firm foundation in the fundamentals and applications of chemical and scientific theories;
2. Describe the fundamental content and processes of organic, inorganic, analytical, physical chemistry, and biochemistry;
3. Design, carry out, record and analyze the results of chemical experiments by using modern instrumentation and classical chemical techniques;
4. Solve problems, think critically, reason analytically, and explore new areas of research;
5. Use modern library searching and retrieval methods to obtain information about issues relating to chemistry;
6. Demonstrate procedures and regulations for safe handling and use of chemicals;
7. Communicate research results to appropriate audiences.

Chemistry Major Curriculum

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Chemistry Minor**

The fundamental role that chemistry plays in medicine, pharmacy, and the environment can be further explored in the chemistry minor. Basic, clinical, and field research in these disciplines all involve the application of chemical principles and techniques. The minor offers advanced courses in chemistry expanding on the base provided by general and organic chemistry. Cross-disciplinary in its approach, the chemistry minor complements the student’s major area of study. This minor can be combined with any major and minor except the chemistry major and APS major with a concentration in biological and physical sciences.

**Chemistry Minor Requirements (16 credits)**

Select 16 credits from the following courses:

- Any CHEM courses 2000-level or higher, excluding the following:
  - CHEM 3050 Chemical Literature and Seminar (3 credits)
  - CHEM 4101 Senior Chemistry Seminar (1 credit)

A maximum of 4 credits of 2000-level courses can be counted toward the minor if they have already been applied to the student’s major core course requirements.

A maximum of 3 credits of CHEM 4990 Independent Study in Chemistry can be counted toward the minor.

**Optometry Minor**

The optometry minor is intended to prepare students for the rigors of a doctor of optometry program after completion of undergraduate studies. The profession of optometry uniquely combines mathematics, optics and medicine to create a rewarding health care profession. All students in the optometry minor will experience a cross-disciplinary range of courses including optics, pharmacology and human anatomy as a solid foundation for the curriculum required in professional optometric education. This minor is not intended to be a substitute for any portion of a doctor of optometry program, but rather a preparation for a successful transition to a doctor of optometry program. This minor can be combined with any major and minor.

**Optometry Minor Requirements (17 credits)**

- BIOL 3330 Anatomy and Physiology II/Lab (4 credits)
- CHEM 3850 Principles of Pharmacology (3 credits)
- MATH 2200 Calculus II (4 credits)
- PHYS 3300 Fundamentals of Optics (3 credits)
- PHYS 3100 Introduction to Biophysics (3 credits)

**Pharmaceutical Sciences Minor**

The Pharmaceutical Sciences Minor with cross-disciplinary courses offers students fundamental, yet applicable principles on the science of drug actions and uses to treat human diseases. This minor also covers fundamentals of drug discovery and development. Students will learn about pharmacology, pharmaceutics and pharmacokinetics from faculty members with ample and diverse training backgrounds in basic science and clinical applications. Upon successful completion of the minor, students will be better prepared to advance through a graduate degree in pharmacy, pharmaceutical sciences or other related fields. A collaborative team of faculty members from both the College of Pharmacy and the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center will deliver the courses in this minor. This minor can be combined with any major and minor.

**Pharmaceutical Sciences Minor Requirements (17 credits)**

- BIOL 3330 Anatomy and Physiology II/Lab (4 credits)
- CHEM 3650 Biochemistry/Lab (4 credits)
- CHEM 3800 Principles of Pharmaceutics (3 credits)
- CHEM 3850 Principles of Pharmacology (3 credits)
- CHEM 4500 Principles of Pharmacokinetics (3 credits)
PHYSICS MINOR

The physics minor is intended to provide students with a basic background in physics and related mathematical methods. A knowledge of physics is useful for students in fields that range from biology and medicine to computer science, as well as being essential for education majors who intend to teach physical sciences in high school. All students in the minor must take a core of required courses in mechanics, electromagnetism, and modern physics. The remainder of the minor then consists of a set of additional physics and mathematics courses chosen by the student, so that the minor can be tailored to the needs and interests of the individual student. This minor can be combined with any major and minor.

Minor Electives (6 credits)

Students must select 6 credits in any physics (PHYS) or mathematics (MATH) courses at the 3000/4000 level.
Department of Communication, Media, and the Arts

The Department of Communication, Media, and the Arts is an innovative, learner-centered department that delivers experiential, industry-driven programs. Students achieve academic excellence and professional distinction as artists, leaders, and communicators, and they share their talents with the community through production, performance, and research.

Majors

APPLIED PROFESSIONAL STUDIES MAJOR

The applied professional studies (APS) major allows students to select a course of study that best fits their career plans. A student’s prior learning and credits earned represent concentration I. Courses earned in the APS major comprise concentration II.

Admission Requirements

Applicants to the Applied Professional Studies major demonstrate successful completion of the 12-credits that comprise Concentration I.

Applied Professional Studies Major Learning Outcomes

A successful applied professional studies graduate is expected to:

1. Explain the integration of information from both concentrations;
2. Identify the fundamental theories and principles underlying concentration II;
3. Demonstrate a comprehensive understanding of the fundamental theories and principles underlying concentration II.

Applied Professional Studies Major Curriculum

Students may apply prior learning credits toward their applied professional studies degree; a minimum of 30 credits must be completed at NSU. Students majoring in applied professional studies may demonstrate learning competencies for one of their concentrations through NSU coursework, transfer courses from other institutions, prior learning, or testing (e.g., DANTES and CLEP). Specific requirements are:

1. General Education Framework: 30 credits
2. Major Requirements:
   - Core Courses (12 credits)
     - APRS 2901  Professional Planning (3 credits)
     - SPCH 3120  Speech Communication for the Professions (3 credits)
     - WRIT 3150  Business Writing (3 credits)
     - APRS 4901  Applied Professional Studies Portfolio (3 credits)
   - Concentrations
     a. Concentration I (12 credits prior to entering the major)
     b. Concentration II (number of credits depends on the concentration)
3. Open Electives 27-60 credits (depending on the concentration)

Total Degree Requirements: 120 credits

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to...
the “General Education Program” section on page 98 of this catalog.

**Applied Professional Studies Concentrations**

Students choose one of the following concentrations after consultation with their academic advisor.

**Integrated Professional Studies Concentration**

Students may complete an existing minor, or they may complete 18 credits from among the following options.

- Option 1: Prefixes housed within the HCAS Department of Communication, Media, and the Arts
- Option 2: Prefixes housed within the HCAS Department of Humanities and Politics and the Department of Conflict Resolution Studies
- Option 3: Prefixes housed in the College of Computing and Engineering
- Option 4: Prefixes housed in the H. Wayne Huizenga College of Business and Entrepreneurship

**Biological and Physical Sciences Concentration**

**Concentration Requirements (8 credits)**

Select 8 credits from the following courses:

- BIOL 1500   Biology I/Lab (4 credits)
- BIOL 1510  Biology II/Lab (4 credits) OR BIOL 1510H Biology II/Lab Honors (4 credits)
- CHEM 1300   General Chemistry I/Lab (4 credits) OR CHEM 1300H General Chemistry I/Lab Honors (4 credits)
- CHEM 1310   General Chemistry II/Lab (4 credits) OR CHEM 1310H General Chemistry II/Lab Honors (4 credits)

**Core Course (3 credits)**

- BIOL 4901  APS Capstone Course in Biological and Physical Sciences (3 credits)

**Major Electives (24–28 credits)**

Select seven 2000 or higher level courses. Three courses must be at the 3000-level or higher. At least three of the courses must be courses that include laboratory. This selection is from the following prefixes: BIOL, CHEM, PHYS, MBIO, ENVS, SCIE.

**Pre-Optometry Studies Concentration**

The APS degree with a concentration in pre-optometry studies is available only to admitted students in the Pre-Optometry Program offered by the College of Optometry. To complete this bachelor’s degree program, students must complete the pre-optometry studies concentration along with a course in mathematics (MATH 1030, MATH 1040, MATH 1200, or MATH 1250) and a communications course (SPCH 1010, SPCH 3120, WRIT 3150, or WRIT 3160) to total 32.5 credits at NSU. OPT and OPTC courses can be viewed in the catalog of the College of Optometry.

**Core Courses (25.5 credits)**

- BIOL 4901  APS Capstone Course in Biological and Physical Sciences (3 credits)
- OPT 1011  Histology and Embryology (1 credit)
- OPT 1233  Biochemistry (3 credits)
- OPT 1323  Microbiology (3 credits)
- OPT 2422  Ocular Anatomy (2 credits)
- OPTC 1134  Gross Anatomy/Head and Neck (4 credits)
- OPTC 2023  General Neuroanatomy (2.5 credits)
- OPTC 2144  General Physiology (4 credits)
- PHYS 3300  Fundamentals of Optics (3 credits)

**Psychological Studies Concentration**

Acceptance into this major is determined by the chair of the Department of Multidisciplinary Studies.

**Concentration Prerequisites (or equivalents) (9 credits)**
MATH 2020  Applied Statistics (3 credits) OR MATH 2020H Applied Statistics Honors (3 credits)
PSYC 1020  Introduction to Psychology (3 credits) OR PSYC 1020H Introduction to Psychology Honors (3 credits)
PSYC 2900  Quantitative Psychology (3 credits)

**Core Courses (24 credits)**

---

**ART AND DESIGN MAJOR**

The art and design major is designed to provide students with a dynamic and comprehensive instructional program in the visual arts. Students may earn a B.A. in Art and Design with concentrations in studio art or graphic design. The art and design degree program prepares students for careers as freelance artists or for employment with public and private organizations in various industries.

**Art and Design Major Learning Outcomes**

The successful art and design graduate is expected to:

1. Effectively apply visual design and composition concepts to produce original art/design;
2. Examine major historical art/design movements and artists;
3. Demonstrate professionalism in the exhibition of works.

**Admission to the Art and Design Major**

**Eligibility for the Art and Design Major**

To be eligible for the art and design major, students must submit a portfolio of 10-15 original works for review.

**Admission Portfolio Criteria for the Art and Design Major**

The admission portfolio must include a one-page statement of intent and high quality images of 10-15 original works. The statement of intent should demonstrate the ability to draw from observation, elements and principles of design and/or spatial organization, surface, and form. Works should showcase an understanding of design, composition, and express unique and innovative visual approaches.

1. One-page statement of intent should address the following:
   a. Specific artistic interest(s);
   b. How these interests are reflected in the artwork submitted in the portfolio;
   c. Goals as an artist/designer.
2. Statement of intent should be no more than one page in length, double-spaced, 12pt.
3. Images should be no more than 3MB each.
4. Files should be identified with item number, student’s name, medium/materials, and year executed (ex: 1_SmithJ_DigitalPhoto_2015.jpg). File formats accepted: JPG, TFF, PDF.

The portfolio is submitted to the Department of Communication, Media and the Arts for review by the art and design portfolio review committee.

**Art and Design Major Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.
Art and Design Major Requirements (46 credits)

**Core Courses (19 credits)**

- ARTS 1200  Introduction to Drawing (3 credits)
- ARTS 1700  Fundamentals of Color (3 credits)
- ARTS 1800  Two-Dimensional Design (3 credits)
- ARTS 2200  Digital Photography (3 credits)
- ARTS 3800  Art History I (3 credits)
- ARTS 3850  Art History II (3 credits)
- ARTS 4995  Senior Project (1 credit)

**Concentrations (21 credits)**

Select one of the following concentrations:

**Graphic Design Concentration (21 credits)**

- **Required Courses (12 credits)**
  - ARTS 2410  Graphic Design I (3 credits)
  - ARTS 2450  Graphic Design II (3 credits)
  - ARTS 3450  Graphic Design III (3 credits)
  - ARTS 3650  Typography (3 credits)

- Select 9 credits from the following courses:
  - ARTS 3200  Digital Photographic Design (3 credits)
  - ARTS 3750  Printmaking (3 credits)
  - ARTS 4500  Professional Print Design (3 credits)
  - ARTS 4900  Special Topics in the Arts (3 credits)
  - COMM 3900  Web, Mobile and Interactive Design for Communication (3 credits)

**Studio Art Concentration (21 credits)**

- **Required Courses (12 credits)**
  - ARTS 1250  Life Drawing (3 credits)
  - ARTS 2100  Painting I (3 credits)
  - ARTS 2900  Three-Dimensional Design/Sculpture (3 credits)
  - ARTS 3700  Methods and Materials (3 credits)

- Select 9 credits from the following courses:
  - ARTS 2410  Graphic Design I (3 credits)
  - ARTS 3100  Painting II (3 credits)
  - ARTS 3550  Ceramics I (3 credits)
  - ARTS 3750  Printmaking (3 credits)
  - ARTS 4900  Special Topics in the Arts (3 credits)

**Major Electives (6 credits)**

Select 6 credits from the following courses:

- ARTS 2600  Introduction to Arts Administration (3 credits)
- ARTS 3020  Women in the Arts (3 credits)
- ARTS 3040  Museum Studies and Gallery Practices (3 credits)
- ARTS 4950  Internship in the Arts (3 credits)

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

---

**Communication Major**

The communication major provides students with a blend of theory- and practice-oriented courses in journalism, digital media, and strategic communication. Students learn how to write and listen effectively, using various technologies and for diverse audiences,
and they develop strong presentation skills, understand the role of communication in various settings, identify theories and models of communication, and are conversant in mass media concepts and practices including publicity and promotion. The communication major prepares students for a wide variety of internships and careers in such fields as journalism, television and radio broadcasting, education, public relations, and law.

Communication Major Learning Outcomes

A successful communication graduate is expected to:

1. Demonstrate the ability to create, design, and edit effective messages for diverse audiences using a variety of media
2. Articulate relevant professional standards in communication
3. Identify, analyze, and articulate significant theories and models of communication
4. Develop professional habits and skills through a variety of real world experiences in practicums and internships.

Communication Major Curriculum

At least 18 credits in the major must be at the 3000/4000 level.

General Education Requirements (30 credits)
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Communication Major Requirements (50 credits)

Core Courses (26 credits)
- COMM 1100A Communication Practicum A (1 credit)
- COMM 1100B Communication Practicum B (1 credit)
- COMM 2100 Mass Media (3 credits)
- COMM 2300 Intercultural Communication (3 credits)
- COMM 3110 Communication Theory (3 credits)
- COMM 3500 Media Regulation (3 credits)
- COMM 3600 Persuasion (3 credits)
- COMM 4950 Internship in Communication (3 credits)
- SPCH 1010 Public Speaking (3 credits) OR SPCH 1010H Public Speaking Honors (3 credits)
- SPCH 2000 Fundamentals of Human Communication (3 credits)

Concentrations (24 credits)
Select one of the following concentrations:

Digital Media Production Concentration (24 credits)
Select 24 credits from the following courses (9 credits must be at the 3000/4000 level):
- ARTS 2410 Graphic Design I (3 credits)
- ARTS 2450 Graphic Design II (3 credits)
- COMM 2500 Introduction to Video Editing (3 credits)
- COMM 2800 Introduction to Field Video Production (3 credits)
- COMM 3700 Documentary Filmmaking (3 credits)
- COMM 3710 Audio/Radio Production (3 credits)
- COMM 3720 Advanced Video Editing (3 credits)
- COMM 3800 Advanced Field Video Production (3 credits)
- COMM 3900 Web, Mobile, and Interactive Design for Communication (3 credits)
- COMM 4900 Special Topics in Communication (3 credits)

Journalism Concentration (24 credits)
Select 24 credits from the following courses (9 credits must be at the 3000/4000 level):
- ARTS 2200 Digital Photography (3 credits)
- COMM 2010 Introduction to Print Journalism (3 credits)
- COMM 2200 Introduction to Broadcast Journalism (3 credits)
### COMM 2800 Introduction to Field Video Production (3 credits)
### COMM 3300 Multimedia Writing (3 credits)
### COMM 3800 Advanced Field Video Production (3 credits)
### COMM 3820 Sports Reporting and Writing (3 credits)
### COMM 4100 Feature Writing (3 credits)
### COMM 4900 Special Topics in Communication (3 credits)

#### Strategic Communication Concentration (24 credits)
Select 24 credits from the following courses (9 credits must be at the 3000/4000 level):

<table>

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMAN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

---

### DANCE MAJOR

The dance major helps students develop in several areas: technical proficiency, historical and cultural perspectives, personal artistry, and production skills. The program also provides students with an understanding of how dance fits into a larger, global context. Students in the major learn the behind-the-scenes process of putting a show together and get the opportunity (in choreography and dance composition courses) to develop their unique voices as artists. The dance major prepares graduates for careers in dance performance, choreography, and dance education, as well as advanced study in graduate programs.

#### Dance Major Learning Outcomes

The successful dance graduate is expected to:

1. Exhibit proficiency in various dance techniques and styles;
2. Identify and evaluate historical, cultural and stylistic forms of dance;
3. Demonstrate personal artistry in the creation of dance performances;
4. Explain the movement of the body in relation to dance.

#### Admission to the Dance Major

**Eligibility for the Dance Major**

To be eligible for the dance major, students must audition.

**Admission Audition Criteria for the Dance Major**

The admission audition must be scheduled after successfully completing an NSU admissions application. Auditions include a Modern Dance class, and individual interview with faculty, and a 1-2 minute solo in a different style of the student’s choice. Requisite dress code and additional audition information will be provided upon scheduling. To schedule an audition, please contact the dance program in the Department of Performing and Visual Arts.

#### Dance Major Curriculum

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to...
the “General Education Program” section on page 98 of this catalog.

**Dance Major Requirements (50 credits)**

*Core Courses (47 credits)*

- DANC 2101  Dance Laboratory I (1 credit)
- DANC 2102  Dance Laboratory II (1 credit)
- DANC 2103  Dance Laboratory III (1 credit)
- DANC 2104  Dance Laboratory IV (1 credit)
- DANC 2201  Ballet II (3 credits)
- DANC 2400  Jazz Dance II (3 credits)
- DANC 2600  Modern Dance II (3 credits)
- DANC 3100  Dance Improvisation (3 credits)
- DANC 3200  Dance History (3 credits)
- DANC 3500  Global Dance Perspectives (3 credits)
- DANC 3550  World Dance (3 credits)
- DANC 3600  Modern Dance III (3 credits)
- DANC 3700  Solo Dance Composition (3 credits)
- DANC 3900  Advanced Studio Technique (3 credits)
- DANC 4000  Dance Composition (3 credits)
- DANC 4300  Dance Choreography (3 credits)
- DANC 4950  Internship in Dance (3 credits)
- THEA 2060  Technical Theatre (3 credits)
- THEA 4930  Senior Seminar (1 credit)

*Major Electives (3 credits)*

Select 3 credits from the following courses:

- ARTS 2600  Introduction to Arts Administration (3 credits)
- DANC 2350  Dance for the Camera (3 credits)
- THEA 3050  Costuming and Makeup (3 credits)
- THEA 3500  Stage and Production Management (3 credits)

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

---

**Music Major**

The music major blends the technological and professional requirements of today’s job market with a compact curriculum that builds fundamental skills in analytical thinking through theoretical study and a broad examination of music’s sociological contexts. In the ensembles at NSU, music majors focus on the commercial aspects of producing music in a variety of musical genres and styles with an emphasis on problem solving, effective collaboration, and adaptability. Targeted, skill-based electives complement music studies to prepare graduates for careers in popular music, gaming, advertising/marketing, app development, podcasting, television/film industry and more.

**Music Major Learning Outcomes**

The successful music graduate is expected to:

1. Produce music which demonstrates critical thinking.
2. Evaluate music with a cultural understanding of style.
3. Apply concepts of music theory.

**Music Major Curriculum**

*General Education Requirements (30 credits)*

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.
Music Major Requirements (49 credits)

Core Courses (40 credits)

- MUSC 1000 Music Through History (3 credits)
- MUSC 1250 Piano II (3 credits)
- MUSC 1960 Commercial Music Theory (3 credits)
- MUSC 2050 Beginning Applied Instruction (2 credits)
- MUSC 2600 Music Production I (3 credits)
- MUSC 2900 Introduction to the Music Industry (3 credits)
- MUSC 2960 Creating Commercial Music (3 credits)
- MUSC 3050 Intermediate Applied Instruction (2 credits)
- MUSC 3301 Ensemble I (1 credit)
- MUSC 3302 Ensemble II (1 credit)
- MUSC 3303 Ensemble III (1 credit)
- MUSC 3304 Ensemble IV (1 credit)
- MUSC 3600 Music of World Cultures (3 credits)
- MUSC 3900 Popular Music in Western Culture (3 credits)
- MUSC 4050 Advanced Applied Instruction (2 credits)
- MUSC 4100 Composition/MIDI (3 credits)
- MUSC 4650 Advanced Music Production (3 credits)

Music Electives (Choose 9 credits)

- ARTS 2410 Graphic Design I (3 credits)
- ARTS 2450 Graphic Design II (3 credits)
- ARTS 3450 Graphic Design III (3 credits)
- COMM 2500 Introduction to Video Editing (3 credits)
- COMM 3500 Media Regulation (3 credits)
- COMM 3710 Audio/Radio Production (3 credits)
- COMM 3720 Advanced Video Editing (3 credits)
- COMM 3900 Web, Mobile, and Interactive Design for Communication (3 credits)
- COMM 4200 Public Relations Campaigns (3 credits)
- COMM 4300 Social Media Theory and Practice (3 credits)
- MUSC 4910 Special Topics in Music (3 credits)
- MUSC 4950 Internship in Music (3 credits)
- MUSC 4990 Independent Study in Music (3 credits)

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

Theatre Major

The theatre major is a rigorous, ensemble-based degree program within a liberal arts setting. Students focus on all areas of theatre, including the following: acting for stage and screen, directing, design, dramaturgy, musical theatre, and technical theatre. The program promotes creativity, innovation, critical thinking, entrepreneurship, and community engagement through theatre performance and production. Students learn how to communicate effectively; identify the historical periods and styles of theatre; demonstrate knowledge of and skill in aspects of technical theatre, such as costuming, lighting, set design, and construction; demonstrate skill in public performance; direct theatrical scenes or productions; and understand the role of drama in culture. The theatre major prepares students for graduate school; jobs in the arts and entertainment industry; and a variety of careers that employ experienced critical thinkers, communicators, and innovative collaborators.

Theatre Major Learning Outcomes

A successful theatre graduate is expected to:

1. Apply theatre/dramatic theory to practice.
2. Demonstrate an understanding of the cultural context of theatre history.
3. Identify theatre/dramatic industry practices.

**Theatre Major Curriculum**

At least 18 credits in the major must be at the 3000/4000 level.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Theatre Major Requirements (53 credits)**

**Core Courses (35 credits)**

- ARTS 2600   Introduction to Arts Administration (3 credits)
- THEA 2020   Acting I (3 credits)
- THEA 2030   Play Analysis (3 credits)
- THEA 2060   Technical Theatre (3 credits)
- THEA 2101   Theatre Laboratory I (1 credit)
- THEA 2102   Theatre Laboratory II (1 credit)
- THEA 2103   Theatre Laboratory III (1 credit)
- THEA 2104   Theatre Laboratory IV (1 credit)
- THEA 3275   American Musical Theatre (3 credits)
- THEA 3050   Costume and Makeup (3 credits)
- THEA 3200   Theatre History I (3 credits)
- THEA 3250   Theatre History II (3 credits)
- THEA 3500   Production and Stage Management (3 credits)
- THEA 4100   Directing for the Stage (3 credits)
- THEA 4930   Senior Seminar (1 credit)

**Concentrations (18 credits)**

Select one of the following concentrations:

**Acting for Stage and Screen Concentration (18 credits)**

Required Courses (9 credits)

- THEA 2000   Voice and Movement (3 credits)
- THEA 3020   Acting II (3 credits)
- THEA 3040   Lighting Design (3 credits)  OR  THEA 3060 Scene Design (3 credits)

Select 9 credits from the following courses:

- THEA 1000   The Theatre Arts (3 credits)
- THEA 1500   Comedy and Improvisation (3 credits)
- THEA 2025   Performance for Film and Television (3 credits)
- THEA 3025   Audition Techniques (3 credits)
- THEA 4900   Special Topics in Theatre (3 credits)

**Design and Technical Production Concentration (18 credits)**

Required Courses (12 credits)

- THEA 1000   The Theatre Arts (3 credits)
- THEA 3040   Lighting Design (3 credits)
- THEA 3060   Scene Design (3 credits)
- THEA 3080   Sound Design (3 credits)

Select 6 credits from the following courses:

- ARTS 1200   Introduction to Drawing (3 credits)
- ARTS 2410   Graphic Design I (3 credits)
- MUSC 2600   Music Production I (3 credits)
- THEA 4900   Special Topics in Theatre (3 credits)
THEA 4950  Internship in Theatre (3 credits)

**Musical Theatre Concentration (18 credits)**

- DANC 2101  Dance Laboratory (1 credit)
- Choose any additional DANC Course (3 credits)
- THEA 2000  Voice and Movement (3 credits)
- THEA 2401  Singing Technique (2 credits)
- THEA 2402  Singing Musicianship (2 credits)
- THEA 3020  Acting II (3 credits)
- THEA 4101  Singing Artistry (2 credits)
- THEA 4102  Singing Mastery (2 credits)

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

**Minors**

**ARTS ADMINISTRATION MINOR**

The arts administration minor is designed to help prepare students for management in the arts industry. It gives students an overview of the application of specific administrative issues to the arts: communication, public relations, writing, development, policy, education, planning, outreach, and management for arts organizations. This minor can be combined with any major and minor.

**Arts Administration Minor Requirements (18 credits)**

**Courses Required First**

- ARTS 1000  Art and Society (3 credits)
- ARTS 2600  Introduction to Arts Administration (3 credits)

Choose one of the following:

- ARTS 3040  Museum Studies and Gallery Practices (3 credits) OR
- MUSC 2900  Introduction to the Music Industry (3 credits) OR
- THEA 3500  Production and Stage Management (3 credits)

**Courses required to complete the minor**

- COMM 2040  Public Relations Writing (3 credits)
- WRIT 3150  Business Writing (3 credits)
- Any 3000/4000-level ARTS, DANC, MUSC, or THEA course (3 credits)

**COMMUNICATION MINOR**

The communication minor enables students to learn how to write and listen effectively, as well as acquire skills in presentation, understand the role of communication in various settings, identify theories and models of communication, and be conversant in mass media concepts and practices.

This minor can be combined with any major and minor except the communication major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other major/minors/certificate programs.

**Communication Minor Requirements (15 credits)**

Students must complete 15 credits from the following courses, 9 credits of which must be at the 3000/4000 level:

- COMM 2100  Mass Media (3 credits)
DANCE MINOR

The dance minor provides students with both technical dance skills and general knowledge of dance as an art form. Through studio practice in technique and creative-based classes, students gain a foundation in dance training and an appreciation for dance as an art form. Core courses provide the student with an increased understanding of the development of dance in a larger global context. This minor can be combined with any major and minor except the dance major.

Dance Minor Learning Outcomes

A successful dance minor is expected to:

1. Identify historical and cultural forms of dance;
2. Demonstrate knowledge of dance concepts through performance;
3. Evaluate dance as an art form.

Dance Minor Requirements (18 credits)

Students must complete 18 credits from the following courses, 9 credits of which must be at the 3000/4000 level.

Core Courses (6 credits)

DANC 3200 Dance History (3 credits)
DANC 3500 Global Dance Perspectives (3 credits)

Minor Electives (12 credits)

Select 12 credits from the following courses:

DANC 1200 Ballet I (3 credits)
DANC 1400 Jazz Dance I (3 credits)
DANC 1500 Contemporary Dance Techniques (3 credits)
DANC 1600 Modern Dance I (3 credits)
DANC 2101 Dance Laboratory I (1 credit)
DANC 2102 Dance Laboratory II (1 credit)
DANC 2103 Dance Laboratory III (1 credit)
DANC 2104 Dance Laboratory IV (1 credit)
DANC 2350 Dance for the Camera (3 credits)
DANC 2400 Jazz Dance II (3 credits)
DANC 2600 Modern Dance II (3 credits)
DANC 3100 Dance Improvisation (3 credits)
DANC 3550 World Dance (3 credits)
DANC 3600 Modern Dance III (3 credits)
DANC 3900 Advanced Studio Technique (3 credits)
DANC 4000 Dance Composition (3 credits)
DANC 4300 Dance Choreography (3 credits)
THEA 2060 Technical Theatre (3 credits)

DIGITAL MEDIA PRODUCTION MINOR

The digital media production minor focuses on developing a wide array of production skills. The courses are directly related to technology—including web, desktop, video, and audio.
This minor can be combined with any major and minor, including the communication major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

Digital Media Production Minor Requirements (15 credits)

Students must complete 15 credits from the following courses, at least 9 credits of which must be at the 3000/4000 level:

<table>

Graphic Design Minor

The graphic design minor combines historical knowledge of the design discipline with contemporary problem-solving technical skills. Students gain in-depth experience using industry-standard computer software while acquiring an understanding of graphic design principles and formats. The graphic design minor serves as an excellent complement to many majors, including marketing, business administration, and communication studies. This minor better prepares students for their future careers by offering them marketable skills, enabling them to become more viable in today's competitive job market. This minor can be combined with any major and minor except the art major.

COMM 3800 Advanced Field Video Production (3 credits)
COMM 3820 Sports Reporting and Writing (3 credits)
COMM 4100 Feature Writing (3 credits)

---

**Music Minor**

Through an introduction to music theory and musicology, the music minor offers students a rewarding method of expanding their musical knowledge. The skill acquired in the music minor are a professional asset for many careers in business, healthcare, and education and students are able to specialize the minor with effective choices. This minor can be combined with any major and minor except the music major.

**Music Minor Requirements (18 credits)**

Students must complete 18 credits from the following courses, 9 credits of which must be at the 3000/4000 level.

**Core Courses (9 credits)**
- MUSC 1960 Commercial Music Theory (3 credits)
- MUSC 3600 Music of World Cultures (3 credits)
- MUSC 3900 Popular Music in Western Culture (3 credits)

**Minor Electives (9 credits)**

Select 9 credits from the following courses:
- Any MUSC courses

---

**Strategic Communication Minor**

The strategic communication minor focuses on advertising and public relations. The minor provides both a theoretical framework and the practical skills needed to work in these fields.

This minor can be combined with any major and minor, including the communication major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificates programs.

**Strategic Communication Minor Requirements (15 credits)**

Students must complete 15 credits from the following courses, 9 credits of which must be at the 3000/4000 level:

- COMM 2040 Public Relations Writing (3 credits)
- COMM 2400 Principles of Advertising (3 credits)
- COMM 3120 Speech Communication for the Professions (3 credits)
- COMM 3200 Principles of Public Relations (3 credits)
- COMM 3310 Organizational Communication (3 credits)
- COMM 3400 Strategic Visual Communication (3 credits)
- COMM 4100 Feature Writing (3 credits)
- COMM 4200 Public Relations Campaigns (3 credits)
- COMM 4300 Social Media Theory and Practice (3 credits)

---

**Studio Art Minor**

The studio art minor provides the opportunity to explore various artistic media, techniques, and processes in a studio setting. The program allows students to integrate creative and artistic practice with other academic or research pursuits, as this minor complements a variety of majors including those in the disciplines of theatre, science, arts administration, and education. This minor encourages the development of creative thinking, conceptualization, and visual literacy skills, enabling students to become versatile, valued prospects for future research or academic endeavors.

**Studio Art Minor Requirements (18 credits)**

Select 18 credits from the following courses, 9 credits of which must be at the 3000/4000 level:
Core Courses (6 credits)
ARTS 1200 Introduction to Drawing (3 credits)
ARTS 1700 Fundamentals of Color (3 credits) OR ARTS 1800 Two-Dimensional Design (3 credits)

Minor Electives (12 credits)
Select 12 credits from the following courses, 9 credits of which must be at the 3000/4000 level:
ARTS 1250 Life Drawing (3 credits)
ARTS 2100 Painting I (3 credits)
ARTS 2200 Digital Photography (3 credits)
ARTS 2900 Three-Dimensional Design/Sculpture (3 credits)
ARTS 3040 Museum Studies and Gallery Practices (3 credits)
ARTS 3100 Painting II (3 credits)
ARTS 3550 Ceramics I (3 credits)
ARTS 3700 Methods and Materials (3 credits)
ARTS 3750 Printmaking (3 credits)
ARTS 4900 Special Topics in the Arts (3 credits)

Theatre Minor
The theatre minor offers students an opportunity to experience the tradition and experience of the theatre. It serves as an excellent complement to many majors, including English, communication studies, psychology, and humanities. This minor allows students to branch out from their subject of study and not only learn the tradition and techniques of the theatre, but also be better equipped to participate confidently in one or more of the co-curricular and extra-curricular experiences that will be generated by the theatre program. This minor can be combined with any major and minor except the theatre major.

Theatre Minor Requirements (18 credits)
Students must complete 18 credits from the following courses, 9 credits of which must be at the 3000/4000 level.

Core Courses (9 credits)
THEA 2060 Technical Theatre (3 credits)
THEA 3275 American Musical Theatre (3 credits)
THEA 3200 Theatre History I (3 credits) OR THEA 3250 Theatre History II (3 credits)

Select 9 credits from the following courses:
THEA 1500 Comedy and Improvisation (3 credits)
THEA 2000 Voice and Movement (3 credits)
THEA 2020 Acting I (3 credits)
THEA 2025 Performance for Film and Television (3 credits)
THEA 2030 Play Analysis (3 credits)
THEA 2101 Theatre Laboratory I (1 credit)
THEA 2102 Theatre Laboratory II (1 credit)
THEA 2103 Theatre Laboratory III (1 credit)
THEA 2104 Theatre Laboratory IV (1 credit)
THEA 3020 Acting II (3 credits)
THEA 3025 Audition Techniques (3 credits)
THEA 3040 Lighting Design (3 credits)
THEA 3050 Costuming and Makeup (3 credits)
THEA 3060 Scene Design (3 credits)
THEA 3080 Sound Design (3 credits)
THEA 3500 Production and Stage Management (3 credits)
THEA 4100 Directing for the Stage (3 credits)
THEA 4900 Special Topics in Theatre (3 credits)

Writing Minor
The writing minor provides a broad overview of various types of writing and reinforces techniques of analysis and expression. Students
learn how to write in various genres by reading models of published authors and participating in writing course workshops. This minor focuses on analytical and professional writing skills, as well as creative writing. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Writing Minor Requirements (15 credits)**
Students must complete 15 credits in any writing (WRIT) courses, 9 credits of which must be at the 3000/4000 level.

---

## Department of Conflict Resolution Studies

The Department of Conflict Resolution Studies (DCRS) is committed to academic excellence, cultural diversity, social responsibility, and reflective practice in the fields of sociology, anthropology, and conflict resolution. Through both undergraduate and graduate programs, we focus on the study of human behavior in societies, what social theories and research reveal about individuals, groups, institutions, and nations, and how parties achieve constructive agreements based on the principles of nonviolence, equity, dignity, and appreciation for human diversity. The department explores how people group themselves and behave in groups, and provides a learner-centered approach to practice and research to support improved social relations among individuals, groups, organizations, and nations. The academic environment in the department is multi-disciplinary, dynamic, and innovative, utilizing faculty expertise, student experience, learning technologies, and practitioners who are knowledgeable in peace-building skills and techniques.

---

## Major

### Sociology Major

The sociology major focuses on the study of human behavior in social contexts. It examines the interactive dynamics of social institutions, organizations, and everyday life and studies how people group themselves (families, social groups, formal organizations, societies); how they behave in groups (collective action, social change, crime and delinquency); and how characteristics such as age, race, social class, and gender affect relationships with others and with organizations and institutions. The major combines humanistic and scientific perspectives to study urban and rural life, family patterns, social change, health care and illness, crime and violence, social class, technology and communications, social movements, and many other social issues and problems.

### Sociology Major Learning Outcomes

The successful sociology graduate is expected to:

4. Demonstrate an understanding of the major theories and concepts that underlie the following core areas of sociology:
   a. Socialization and Social Interaction;
   b. Groups, Organizations, and Social Institutions;
   c. Stratification and Social Inequality;
   d. Global Cultural Perspectives;
   e. Qualitative and/or Quantitative Research Measurement, Design, and Methodology;

5. Describe and analyze the three major sociological approaches: Structural Functional, Social Conflict, and Symbolic Interaction;

6. Integrate and apply the major theories, principles, and concepts of sociology to address research and/or applied issues in the field of sociology using critical thinking skills, skeptical inquiry, and the sociological perspective;

7. Present written sociological information in a clear, concise manner that is consistent with professional standards.

### Sociology Major Curriculum
General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Sociology Major Requirements (45 credits)

Required Courses (24 credits)

- ANTH 1020  Introduction to Anthropology (3 credits)
- MATH 2020  Applied Statistics (3 credits) OR MATH 2020H Applied Statistics Honors (3 credits)
- SOCL 1020  Introduction to Sociology (3 credits)
- SOCL 2510  Social Problems (3 credits)
- SOCL 3000  Research Methods in the Social Sciences (3 credits)
- SOCL 3250  Social Theory (3 credits)
- SOCL 4880  Senior Seminar (3 credits)

Ethical/Moral Issues

Select 3 credits from the following courses:
- PHIL 2000  Moral Issues (3 credits)
- PHIL 3010  Ethical Issues in Communication (3 credits)
- PHIL 3180  Biomedical Ethics (3 credits) OR PHIL 3180H Biomedical Ethics Honors (3 credits)
- PHIL 3200  Ethics and Sport (3 credits)
- PHIL 3360  Environmental Ethics (3 credits)

Major Electives (21 credits)

Select 21 credits from any non-core SOCL courses. At least 12 of these credits must be at the 3000/4000 level.

Minors

ANTHROPOLOGY MINOR

The anthropology minor is intended to acquaint students with the cross-cultural study of people and cultures through the diverse discipline of anthropology. The anthropology minor includes an overview of anthropological theory and research methods, of interdisciplinary approaches and cultural studies, as well as an examination of the four sub-fields of anthropology. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

Anthropology Minor Requirements (18 credits)

Core Courses (12 credits)

- ANTH 1020  Introduction to Anthropology (3 credits)
- ANTH 2300  Cultural Anthropology (3 credits)
- SOCL 1020  Introduction to Sociology (3 credits)
- SOCL 3000  Research Methods in the Social Sciences (3 credits)

Minor Electives (6 credits)

Select 3 credits from the following courses:
- SOCL 3500  Race and Ethnicity in the U.S. (3 credits)
- SOCL 3600  Environmental Sociology (3 credits)

Select 3 credits from the following courses:
- ANTH 3100  Biological Anthropology (3 credits)
- HIST 2130  Formation of Latin America (3 credits)
- HIST 2300  Caribbean History (3 credits)
- HIST 2400  African History (3 credits)
- INST 1500  Global Issues (3 credits) OR INST 1500H Global Issues Honors (3 credits)
**Sociology Minor**

The sociology minor is intended to provide students with an overview of sociology. It covers social processes and change in a variety of arenas, including families, work, gender, and communities. This minor can be combined with any major and minor except the sociology major.

**Sociology Minor Requirements (18 credits)**

*Core Courses (9 credits)*

- SOCL 1020 Introduction to Sociology (3 credits)
- SOCL 2130 Family Relationships (3 credits)
- SOCL 2510 Social Problems (3 credits)

*Minor Electives (9 credits)*

Students must select 9 credits in any sociology (SOCL) courses at the 3000/4000 level.
### Department of Humanities and Politics

The Department of Humanities and Politics in the Halmos College of Arts and Science and the Guy Harvey Oceanographic Center aims to engage students in our diverse, dynamic, and globalized world, and to encourage understanding and exploration of our humanity. Steeped in the liberal arts tradition, the department offers innovative and diverse interdisciplinary programs that emphasize critical thinking, reading, and writing. Courses explore areas of study such as English, history, philosophy, legal studies, international studies, modern languages, national security, and political science and are offered in the traditional classroom setting as well as online. Included among courses offered by the department are independent studies, internships, and study abroad programs.

### Majors

#### ENGLISH MAJOR

The English major is designed to provide students with a background in British, American, and world literatures, literary criticism and theory, and popular culture. Students in this major develop critical thinking, close reading, and analytical and creative writing skills. The English major prepares students for a wide variety of careers in such fields as education, publishing, law, business, and government.

#### English Major Learning Outcomes

A successful English graduate is expected to:

1. Produce written arguments about literary texts;
2. Identify literary periods, authors, and genres;
3. Analyze literary texts as creative expressions, and historical and cultural artifacts.

#### English Major Curriculum

At least 18 credits in the major must be at the 3000/4000 level.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

HUMN 3610  The Harlem Renaissance (3 credits)
HUMN 4310  The Vampire (3 credits)

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

**History Major**

The History major is designed to provide the broad content along with the analytical and interpretative skills necessary for understanding the world and the United States in historical context. Graduates of the program will have studied one of the most interesting subjects available in a college curriculum: the human past. The program prepares student to be proficient in research, writing, debate, analysis, and interpretation of a myriad of historical events and patterns that cross boundaries of time and geography and to draw vital connections between the past and the present.

**History Major Learning Outcomes**

A successful history graduate is expected to:

1. Evaluate historical arguments;
2. Analyze complex historical texts and materials;
3. Demonstrate the ability to connect different social, economic, and political factors to explain and understand historical change;
4. Identify and explain the cultural forces and influences associated with historical events.

**History Major Curriculum**

At least 18 credits in the major must be at the 3000/4000 level.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

- HIST 4700  Genocide in the 20th Century and Beyond (3 credits) Travel Study
- HIST 4950  Internship in History (3 credits)

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

### Interdisciplinary Studies Major

The interdisciplinary studies major allows students to maximize their educational experience by customizing their study around their individual areas of interest. The major affords students the opportunity to engage in substantial study in different curricular domains. The major is rooted in the core humanities and it allows students to choose any minor in the arts, humanities, or social sciences for an elective concentration. There is an optional track for students considering post-graduate studies in medicine.

**Interdisciplinary Studies Major Learning Outcomes:**

1. Articulate the rationale behind the choice of concentrations comprising the major.
2. Analyze complex theories in self-identified areas of concentration.
3. Synthesize the theories and principles from disciplines in the areas of concentration in the major into a unified, coherent project.

**Interdisciplinary Studies Major Curriculum**

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Interdisciplinary Major Requirements (34-37 credits or up to 54 credits if student chooses pre-med concentration)**

**Core Courses (13 credits)**

- INDS 2901  Interdisciplinary Readings Seminar (1 credit)
- INST 1500  Global Issues (3 credits)
- SPCH 1010  Public Speaking (3 credits)
- HIPS 4900  Senior Seminar Capstone (3 credits)
One of the following courses: (3 credits)
PHIL 3010 Ethical Issues in Communication
PHIL 3180 Biomedical Ethics OR PHIL 3180H Biomedical Ethics Honors
PHIL 3200 Ethics and Sport
PHIL 3360 Environmental Ethics
PHIL 3300 Ethics of War and Peace

Concentrations (21-41 credits)
Students may choose EITHER Concentration I or Concentration II.

Concentration I: An Arts, Humanities or Social Sciences Minor (21-24 credits)
Any LITR or HIST at 2000 level or higher (3 credits)
Any LITR or HIST at 2000 level or higher (3 credits)
AND
Any arts, humanities, and social sciences minor (15-18 credits)

Concentration II: Pre-Medical Track (41 credits)
Complete two courses of any LITR or HIST course at the 2000-level or higher (6 credits)
Complete two semesters of Biology with lab (or equivalent) (8 credits)
Complete two semesters of Chemistry with lab (or equivalent) (8 credits)
Complete two semesters of Organic Chemistry with lab (or equivalent) (8 credits)
Complete two semesters of Physics with lab (or equivalent) (8 credits)
Complete one semester of Mathematics (college level). Calculus is not required. Statistics is acceptable (3 credits)

International Studies Major

The international studies major is designed for students who wish to pursue an interdisciplinary approach to the global environment and who wish to gain a deeper understanding of a particular region outside of the United States. Courses highlighting the art, culture, history, law, literature, and government of various regions will be offered. Students in this major develop critical thinking, close reading, and analytical writing skills. The international studies major prepares students for a wide variety of careers in such fields as politics, law, business, journalism, education, public relations, research, and government.

International Studies Major Learning Outcomes

The successful international studies graduate is expected to:

1. Analyze material relating to international history, culture, and politics;
2. Synthesize subject matter from international history, culture, and politics;
3. Apply principles, theories, and methodology from appropriate disciplines.

International Studies Major Curriculum

At least 18 credits must be at the 3000/4000 level.

General Education Requirements (30 credits)
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the "General Education Program" section on page 98 of this catalog.

International Studies Major Requirements (45–57 credits, depending on foreign language)

Core Courses (18 credits)
HIPS 2900 Research Methods in History and Politics (3 credits)
HIST 1170 The World: From Gatherers to Globalization (3 credits)
HUMN 1200 Introduction to World Religions (3 credits)
INST 1500 Global Issues (3 credits) OR INST 1500H Global Issues Honors (3 credits)
INST 2000 International Political Economy (3 credits)

Select 3 credits from the following courses:
LITR 2030  World Literature I (3 credits) OR LITR 2030H World Literature I Honors (3 credits)
LITR 2031  World Literature II (3 credits) OR LITR 2031H World Literature II Honors (3 credits)

Subject Areas (18 credits)
Select two tracks, taking 9 credits from each track:

Culture and the Arts

Track 1: Culture and the Arts
- ANTH 2300  Cultural Anthropology (3 credits)
- HUMN 2300  Introduction to World Mythology (3 credits)
- HUMN 2350  Introduction to Folklore (3 credits)
- HUMN 2400  Introduction to Celtic Studies (3 credits)
- HUMN 4200  Asian Thought (3 credits)
- LITR 3510  Irish Literature (3 credits)
- LITR 3530  Caribbean Literature (3 credits)
- LITR 3540  Latin American Literature (3 credits)
- MUSC 3600  Music of World Cultures (3 credits)
- SPAN 3240  Introduction to Spanish Literature (3 credits)
- SPAN 3250  Introduction to Latin American Literature (3 credits)
- SPAN 4900  Special Topics in Spanish (3 credits)

Track 2: Global Health
- BHS 4006  Fundamentals of Chinese Medicine (3 credits)
- BHS 4011  Bioterrorism: Healthcare Readiness and Response (3 credits)
- BHS 4013  Global Issues in Human Trafficking (3 credits)
- ENVS 3201  Environment, Culture, Ethnicity, and Health (3 credits)
- HUMN 2200  Introduction to Medical Humanities (3 credits)
- HUMN 4100  Death and Dying (3 credits)
- BPH 3030  Intro to Global Health (3 credits)
- BPH 3970  Disparities in Health: Examining the Impact of Culture and Ethnicity (3 credits)
- LGST 3350  Environmental Law and Policy (3 credits)
- LITR 3500  Literature and Medicine (3 credits)
- PHIL 3180  Biomedical Ethics (3 credits) OR PHIL 3180H Biomedical Ethics Honors (3 credits)
- PHIL 3360  Environmental Ethics (3 credits)
- SPAN 3300  Spanish for Health Professionals (3 credits)

Track 3: International History and Politics
- HIST 2150  Latin American and Caribbean History (3 credits)
- HIST 2400  African History (3 credits)
- HIST 2500  Topics in Asian History (3 credits)
- HIST 3240  Irish History (3 credits)
- PHIL 3530  Gods and Chariots (3 credits)
- PHIL 3540  Revolution and Ideology (3 credits)
- POLS 2010  Comparative Government (3 credits)
- POLS 2300  International Relations (3 credits)
- POLS 3500  Global Politics (3 credits)
- POLS 4100  European Union (3 credits)
- POLS 4200  Latin American Politics (3 credits)
- POLS 4300  Middle Eastern Politics (3 credits)

Track 4: Security, Peace, and Conflict
- COMM 2300  Intercultural Communication (3 credits)
- HIST 3140  The Holocaust (3 credits)
- HIST 3130  Vietnam (3 credits)
- HIST 3400  U.S. Foreign Relations (3 credits)
- HIST 4700  Genocide in the 20th Century and Beyond (3 credits)
- LGST 3400  Comparative Legal Systems (3 credits)
- LGST 4410  International Law (3 credits)
LGST 4420  War Crimes (3 credits)
PHIL 3670  Social and Political Philosophy (3 credits)
PHIL 3300  Ethics of Peace and Conflict (3 credits)

Foreign Language Requirement (12 credits)
Students must complete a requirement involving a language relevant to their area of concentration and interest. The minimum acceptable proficiency level must be equivalent to two years of college or university basic language instruction. This requirement can be met in a number of ways, not exclusive of the following:

1. Complete the equivalent of at least 12 foreign language credits at NSU;
2. Complete the equivalent of at least two years of college-level foreign language courses at a regionally accredited college or university prior to transfer to NSU;
3. Achieve a successful score on a pre-approved language proficiency exam.

International Travel Study Requirement (6 credits)
Students must complete a pre-approved international travel study experience equivalent to at least 6 credits (whether through an NSU-sponsored program or otherwise). This requirement can be met by using more than one study abroad experience.

Capstone Experience Requirement (3 credits)
HIPS 4900  Senior Seminar Capstone (3 credits)

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

LEGAL STUDIES MAJOR

The legal studies major is designed for students interested in preparing for law school or other graduate study and for those who want to pursue a humanities major with a legal perspective. The courses in the major assist students in developing analytical and communication skills and an understanding of economic, political, and social contexts within which legal issues arise.

Legal Studies Major Learning Outcomes
A successful legal studies graduate is expected to:

1. Evaluate the elements of oral and written argument relevant to legal issues;
2. Explain the historical development of legal systems;
3. Analyze the economic, political and social contexts of legal decisions and legal systems;
4. Explain the philosophical issues that arise in law.

Legal Studies Major Curriculum
At least 18 credits in the major must be at the 3000/4000 level.

General Education Requirements (30 credits)
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Legal Studies Major Requirements (48 credits)

Core Courses (33 credits)
HIST 1050  The United States: From Settlement to Superpower (3 credits)
HIST 1120  The West: Patricians, Serfs, and Citizens (3 credits) OR
HIST 1170 The World: From Gatherers to Globalization (3 credits)
HIST 3010  Constitutional History I (3 credits)
HIST 3020  Constitutional History II (3 credits)
LGST 2500  Introduction to Legal Studies (3 credits)

**Advanced Major Electives (6 credits)**

Select 6 credits from the following courses:
- LGST 3350 Environmental Law and Policy (3 credits)
- LGST 4100 The First Amendment (3 credits)
- LGST 4200 Crime and the Constitution (3 credits)
- LGST 4270 Judicial Politics and Process (3 credits)
- LGST 4310 Individual Rights and the Law (3 credits)
- LGST 4420 War Crimes (3 credits)
- LGST 4900 Special Topics in Legal Studies (3 credits)
- LGST 4950 Internship in Legal Studies (3 credits)

---

**Philosophy Major**

The philosophy major is designed to provide students with a background in the history and problems of philosophy. Students in this major develop critical thinking, close reading, and analytical writing skills. A philosophy major prepares students for graduate study in philosophy and a wide variety of careers in such fields as education, law, business, and government.

**Philosophy Major Learning Outcomes**

A philosophy graduate is expected to:
1. Distinguish philosophical from non-philosophical forms of inquiry;
2. Explain important debates in the history of philosophy;
3. Critically evaluate arguments for philosophical positions.

**Philosophy Major Curriculum**
At least 18 credits in the major must be at the 3000/4000 level.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Philosophy Major Requirements (36 credits)**

Any Philosophy course not listed above

The Bachelor of Arts degree requires at least 24 credits of coursework from the following disciplines: ARTS, COMM, DANC, FILM, HIST, HUMN, LITR, MUSC, PHIL, POLS, and THEA, as well as an intermediate degree of competency in a foreign language (generally, a minimum of 6 credits or another demonstration of competency).

**Political Science Major**

The political science major is designed to provide students with an understanding of political concepts and the organization and functioning of political systems. The curriculum focuses on the nature of both the American political system (the context within which it operates, the forces that seek to influence it, and the consequences for our nation) and international political systems (global perspectives on political issues, the dynamics of international relations, and the functioning of global institutions and international alliances). Students in the major will develop critical thinking, close reading, and analytical research and writing skills.

**Political Science Major Learning Outcomes**

A political science graduate is expected to:

1. Explain the processes of the American political system, including the functions of and interactions among the different branches of the federal government;
2. Explain the processes of political systems outside the U.S., including variation in the structure and role of governments of different nations and the role of international relations;
3. Apply political philosophy and theory to issues of U.S. and international politics;
4. Utilize appropriate political science research methods in preparing written arguments about political issues.

**Political Science Major Curriculum**

At least 18 credits in the major must be at the 3000/4000 level.
General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**English Minor**

The English minor provides a broad overview of American, British, and world literatures and reinforces effective writing and analytical skills. Combined with any major program of study, the English minor offers students an opportunity to improve their critical thinking and writing, a plus for any profession, and also widens students’ perspectives about literary texts of the world from antiquity to the present. This minor can be combined with any major and minor except the English major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**English Minor Requirements (15 credits)**

Students must complete 15 credits in any literature (LITR) courses, 9 credits of which must be at the 3000/4000 level.

---

**Film Studies Minor**

The film studies minor provides a broad overview of the study of film, focusing on genre, history, and aesthetics. Students learn how to analyze the elements of film, to recognize historical trends in film, and to comprehend the social contexts of film. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Film Studies Minor Requirements (15 credits)**

Students must complete 15 credits in any film (FILM) courses, 9 credits of which must be at the 3000/4000 level.

---

**Folklore and Mythology Minor**

The folklore and mythology minor provides students with an overview of the ways that various artistic features of a culture tell the story of where it has been and where it is going. The folklore and mythology minor deepens students’ understanding of how a culture’s storytelling contributes to its evolution. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Folklore and Mythology Minor Requirements (15 credits)**

Students must complete 15 credits from the following courses, 9 credits of which must be at the 3000/4000 level:

Select 3 credits from the following courses:

<table>

</table>
HUMN 4100  Death and Dying (3 credits)
HUMN 4200  Asian Thought (3 credits)
HUMN 4310  The Vampire (3 credits)
LITR 4510  King Arthur (3 credits)

**GENDER STUDIES MINOR**

The gender studies minor examines the relationship between biological differences and social inequality, explores the construction of sexual identity, and analyzes the variations in gender systems that have occurred across cultures over time. Students explore the methods and concepts of gender studies in a variety of academic disciplines including film studies, law, literature, philosophy, and sociology. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Gender Studies Minor Requirements (15 credits)**

At least 9 credits in the minor must be at the 3000/4000 level.

*Core Course (3 credits)*

GEST 2050  Introduction to Gender Studies (3 credits)

*Minor Electives (12 credits)*

Select 12 credits from the following courses:

- ARTS 3020  Women in the Arts (3 credits)
- COMM 2060  Media and Gendered Images (3 credits)
- FILM 3040  Women and Film (3 credits)
- GEST 4900  Special Topics in Gender Studies (3 credits)
- HONR 2000N  The “F” Word: Feminism and Culture (3 credits)

- LITR 3040  Women and Literature (3 credits)
- LITR 4060  Critical Theories and Gender (3 credits)
- SOCL 4010  Lesbian, Gay, Bisexual, and Transgender Cultures (3 credits)

**HISTORY MINOR**

The history minor provides a broad overview of U.S., European, Latin American, and world history and reinforces effective writing and analytical skills. Combined with any major program of study, the history minor offers students an opportunity to improve their critical thinking and writing, a plus for any profession, and also widens students’ perspectives about historical events of the world from antiquity to the present. This minor can be combined with any major and minor except the history major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**History Minor Requirements (15 credits)**

Students must complete 15 credits in any history (HIST) courses, 9 credits of which must be at the 3000/4000 level.

**HUMANITIES MINOR**

The humanities minor provides intellectual challenge and personal development for students who are intrigued by artistic, social, and ethical questions and who wish to study the relationships among liberal arts disciplines. Combined with a major in a specialized field, the humanities minor prepares individuals to meet the challenges of the contemporary world. This minor can be combined with any major and minor except the humanities major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Humanities Minor Requirements (15 credits)**

Students must complete 15 credits in any humanities (HUMN) courses, 9 credits of which must be at the 3000/4000 level.
The international law minor is designed for those students who seek a broad understanding of the relationships between the legal systems of different nations as well as regulations, agreements, and treaties maintained between specific nations or by international organizations. This minor can be combined with any major and minor except the legal studies major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**International Law Minor Requirements (15 credits)**

- INST 1500  Global Issues (3 credits) **OR** INST 1500H Global Issues Honors (3 credits)
- LGST 3400  Comparative Legal Systems (3 credits)
- LGST 4410  International Law (3 credits)
- POLS 2010  Comparative Government (3 credits)
- Any 3000/4000-level LGST course (3 credits)

The international studies minor provides a broad international perspective for students who plan careers in business, government, medical and psychological services, the legal profession, or education. The courses in this minor allow students to expand their concept of social and ecological responsibility in the global arena. This minor can be combined with any major and minor except the international studies major. A minimum of 12 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**International Studies Minor Requirements (18 credits)**

Students must complete 18 credits from the following areas. Nine (9) credits must be at the 3000/4000 level, and a minimum of 6 credits must be in non-Western courses.

**Core Courses (3 credits)**

Select 3 credits from the following courses:

- HUMAN 1200  Introduction to World Religions (3 credits)
- INST 1500  Global Issues (3 credits) **OR** INST 1500H Global Issues Honors (3 credits)

**Subject Areas (15 credits)**

Select 9 credits from either the Arts, Literature, and Culture subject area or from the History, Law, and Government subject area, and select 6 credits from the other subject area:

**Arts, Literature, and Culture Subject Area**

- HUMAN 2300  Introduction to World Mythology (3 credits)
- HUMAN 2350  Introduction to Folklore (3 credits)
- HUMAN 2400  Introduction to Celtic Studies (3 credits)

- HIST 3140  The Holocaust (3 credits)
IRISH STUDIES MINOR

The Irish studies minor is an interdisciplinary program of study focusing on the history, literature, societies, and cultures of Ireland, including the Republic of Ireland, Northern Ireland, and the Irish Diaspora. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

Irish Studies Minor Requirements (15 credits)

Select 9 credits from the following courses:

- HIST 3240 Irish History (3 credits)
- HIST 4900 Special Topics in History, when taught as an Irish history topic (3 credits)
- HUMN 2400 Introduction to Celtic Studies (3 credits)
- LITR 3510 Irish Literature (3 credits)

Travel Study Requirement (3–6 credits)

In addition, students must take one or two travel study courses in Ireland or Northern Ireland, preferably after completing at least one of the above core NSU courses. These travel study courses may include any of the following subjects and would be offered as Special Topics courses:

- Irish Art and Architecture
- Irish Film
- Irish Language (Gaelic)
- Irish Literature and Politics
- Transatlantic Currents: Ireland and America in the Modern Era

Qualifying travel study credit may also be earned through participation in pre-approved programs offered through partner institutions.

LATIN AMERICAN AND CARIBBEAN STUDIES MINOR

The Latin American and Caribbean minor provides a broad interdisciplinary base for students planning careers involving Latin American and Caribbean peoples. Students can complete the minor as a means of enhancing their ability to work and live in an increasingly interdependent, multicultural hemisphere. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

Latin American and Caribbean Studies Minor Requirements (15 credits)

**Core Courses (3 credits)**

- HIST 2150 Latin American and Caribbean History (3 credits)

**Minor Electives (12 credits)**

Select 12 credits from the following courses:

- LITR 2140 Latino Identities (3 credits)
- LITR 3530 Caribbean Literature (3 credits)
- LITR 3540 Latin American Literature (3 credits)
- POLS 4200 Latin American Politics (3 credits)
- SPAN 3250 Introduction to Latin American Literature (3 credits)
- SPAN 3750 Latin American Culture (3 credits)
### Legal Studies Minor

The legal studies minor is designed to prepare students in any major for law school. The minor emphasizes skills required for admission into law school and success once there. This minor can be combined with any major and minor except the legal studies major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Legal Studies Minor Requirements (15 credits)**

- HIST 3010   Constitutional History I (3 credits)
- HIST 3020   Constitutional History II (3 credits)
- LGST 4000   Legal Research and Trial Advocacy (3 credits)
- PHIL 1400   Introduction to Logic (3 credits) OR PHIL 2400 Symbolic Logic (3 credits)
- POLS 1010   American Government and Politics (3 credits)

### Medical Humanities Minor

The medical humanities minor is designed to give students an overview of the ways that the medical arts and sciences intersect and interact with various disciplines in the humanities, in such ways as art and medicine, bioethics, the history of medicine, literature and medicine, music and medicine, medicine in the performing arts, medicine and philosophy, and medicine and law. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Medical Humanities Minor Requirements (15 credits)**

Students must complete 15 credits from the following courses, 9 credits of which must be at the 3000/4000 level:

- **Core Course (6 credits)**
  - HUMN 2200   Introduction to Medical Humanities (3 credits)
  - LITR 3500   Literature and Medicine (3 credits)

- **Minor Electives (9 credits, six credits must be at 3000-4000)**
  Select 12 credits from the following courses:
  - HONR 1010B   The Healthy Women: Mothers to Cyborgs (3 credits)
  - HONR 1000N   Genetics and Genealogy (3 credits)
  - HONR 2000U   The Idea of the Hospital (3 credits)
  - HONR 2000W   The Pathography: Patient’s Stories of Illness (3 credits)
  - HUMN 4100   Death and Dying (3 credits)
  - PHIL 3180   Biomedical Ethics (3 credits) OR PHIL 3180H Biomedical Ethics Honors (3 credits)
  - PHIL 3220   Philosophy of Science (3 credits)
  - SOCL 2030   Medical Sociology (3 credits)
  - SPAN 3300   Spanish for Health Professions (3 credits)
  - THEA 2500   Healthcare Theatre (3 credits)

### Philosophy Minor

The philosophy minor provides students with a broad overview of philosophical issues and problems, as well as reinforcing effective writing and analytical skills. This minor can be combined with any major and minor except the philosophy major. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Philosophy Minor Requirements (15 credits)**

Students must complete 15 credits in any philosophy (PHIL) courses, at least 9 credits of which must be at the 3000/4000 level and no more than one of the following:

- PHIL 2000/3010/3180/3200/3360
**Political Science Minor**

The political science minor is designed to provide students with an understanding of political concepts and the organization and functioning of political systems. The curriculum focuses on the nature of both the American political system (the context within which it operates, the forces that seek to influence it, and the consequences for our nation) and international political systems.

**Political Science Minor Requirements (18 credits)**

- **Core Courses (12 Credits)**
  - POLS 1010  American Government and Politics (3 credits)
  - POLS 1200  Introduction to Political Science (3 credits)
  - POLS 2010  Comparative Government (3 credits)
  - POLS 2300  International Relations (3 credits)

  Select 3 credits from the following:
  - POLS 3100  Political Theory (3 credits)
  - PHIL 3670  Social and Political Philosophy (3 credits)

  Select 3 credits from the following:
  - POLS 4200  Latin American Politics (3 credits)
  - POLS 4300  Middle Eastern Politics (3 credits)

**Spanish Minor**

The Spanish minor provides students with focused study in Spanish language and literature, as well as focused study of culture in Spanish-speaking countries around the world. This minor can be combined with any major and minor. A minimum of 9 credits must be exclusive to the minor and cannot be counted toward any other majors/minors/certificate programs.

**Spanish Minor Requirements (15 credits)**

Students must complete 15 credits in any Spanish (SPAN) courses, 9 credits of which must be at the 3000/4000 level.
Department of Marine and Environmental Sciences

The Department of Marine and Environmental Sciences focuses on issues in the Life and Earth Sciences that concern the ocean, atmosphere, and the land. Opportunities exist at the undergraduate and graduate levels with bachelor’s degrees and master’s degrees in Marine Biology and Environmental Science. We pride ourselves on our Ph.D. in Oceanography. Coursework includes a wide array of topics from general marine biology, ecology, and geology to molecular biology, genomics, and more. In addition to teaching, the Department is committed to excellence in research and service providing a wide variety of opportunities and connections for current students and graduates. Our graduates have become academic or professional scientists; working in industry, government, non-governmental organizations, or academia as biologists, geologists, physicists, professors, and teachers.

Majors

Environmental Science Major

The environmental science major provides comprehensive knowledge of Earth’s physical, chemical, and biotic systems. The program emphasizes the practical application of science, sociology, and ethics to solve problems created by the impact of human activity on the environment. This major incorporates the following areas of study: wetlands ecology, ecotourism, geographic spatial analysis, sustainability issues, general biology, chemistry, mathematics, and marine biology. The program is designed so students will share a common set of courses in their freshman year to ensure that all students gain an overview of the subject. Upon entering their sophomore year, students are required to select major electives. The program is designed to be completed within a four-year period. An internship is required of all students in this program.

Environmental Science Major Learning Outcomes

A successful environmental sciences/studies graduate is expected to:

1. Demonstrate a working knowledge of the scientific method so as to identify, evaluate, and recommend solutions to environmental problems;
2. Communicate concisely and clearly through public speaking, the publishing of written articles, the construction and maintenance of a website, and photographic documentation either through photography or videography;
3. Formulate strategies to maximize the responsible use of technology as it applies to issues within environmental science;
4. Identify legal issues relating to environmental science;
5. Apply concepts of environmental science to lifetime vocational aspirations;
6. Demonstrate a behavior of environmental awareness and interest in environmental issues of South Florida;
7. Apply knowledge from the fields of biology, botany, and physical sciences to environmental science;
8. Identify the principles of environmental ethics;
9. Identify concepts relating to the future of environmentalism.

Environmental Science Major Curriculum

General Education Requirements (30 credits)
Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Marine Biology Major

The marine biology major is designed to prepare students for a career or further graduate study. The curriculum consists of a set of core courses in the biological and physical sciences, leading to a degree that is designed as a solid basis for entering the field of marine biology, as well as preparation for further graduate study in this area.

Marine Biology Major Learning Outcomes

A successful marine biology graduate is expected to:

1. Demonstrate a working knowledge of the scientific method;
2. Demonstrate essential knowledge of the marine sciences;
3. Use mathematics to solve scientific problems and evaluate research data;
4. Use standard laboratory and research techniques to collect, assess, and present data;
5. Synthesize and integrate marine biological principles with contemporary issues.

**Minors**

---

**GEOGRAPHIC INFORMATION SCIENCE MINOR**

Geographic information science has become an essential foundation for numerous disciplines that require location-based analysis. This minor provides an understanding of geographic tools, software and hardware, techniques, and spatial methodologies for use in the natural, social, and behavioral sciences, as well as in business and economics. This minor is designed for students from diverse disciplines interested in using geospatial technology in their studies, research, and careers. It is appropriate for students majoring in natural and behavioral science, computer and information science, urban planning, business, and public health.

**Geographic Information Science Minor Requirements (18 or 19 credits)**

- CSIS 2101  Fundamentals of Computer Programming (4 credits) OR TECH 1500 Programming for Everyone (3 credits)
- CSIS 4530  Database Management (3 credits)
- GEOG 2075  Geographical Information Systems (3 credits)
- GEOG 3050  Applied Geographic Information Systems (3 credits)
- GEOG 3075  Geospatial Field Methods (3 credits)
- GEOG 4050  Space-Borne and Aerial Image Processing (3 credits)

---

**MARINE BIOLOGY MINOR**

The marine biology minor focuses on the life processes of marine organisms and is intended for students interested in the field as a complement to their major curriculum. Biology majors can take the marine biology minor with no additional prerequisites outside of those required for the biology major. Students in other majors who have taken the appropriate prerequisites may also pursue this minor. This minor can be combined with any major and minor except the marine biology major and marine ecology minor.

**Marine Biology Minor Requirements (17 credits)**

**Marine Ecology Minor**

The marine ecology minor focuses on the interactions among marine organisms and the relationships between these organisms and their environment. This minor is intended for marine biology majors who want more specific training in marine ecological science. Students in other majors who meet the prerequisites may also pursue this minor. This minor can be combined with any major and minor except the marine biology minor. When combining with the marine biology major, a minimum of 6 credits must be exclusive to the minor and cannot be counted toward the major.

**Marine Ecology Minor Requirements (18 credits)**

Department of Mathematics

The department of mathematics provides a core curriculum in pure mathematics, applied mathematics, and analytical sciences. As a department, we are committed to the highest quality teaching and research. Through the mathematics major, mathematics minor, and applied statistics minor, our course work provides students the skills to formulate, abstract, analyze, and solve complex problems. Our coursework is enhanced by co-curricular activities including a department colloquium series and faculty mentorship of undergraduate student research projects. Graduates of our programs will be prepared to enter graduate study in the mathematical sciences or pursue careers in a variety of fields including science, medicine, industry, and business.

Major

Mathematics Major

The mathematics major provides a core of applied mathematics, pure mathematics, and analytical sciences. This major provides students with the mathematical skills to formulate, abstract, analyze and solve problems typically encountered by mathematicians, educators, government officials, scientists, engineers, and other professionals. Graduates of this program will be prepared to enter graduate study in mathematics and pursue careers in science, industry, and business.

Mathematics Major Learning Outcomes

A successful mathematics graduate is expected to:

1. Apply analytical, critical thinking, and abstract reasoning skills;
2. Analyze and formulate Mathematical proofs and critique for correctness;
3. Apply general mathematical techniques, theories, and abstract reasoning to find solutions to concrete problems.

General Education Requirements (30 credits)

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

Note: Six (6) credits of MATH may fulfill the General Education requirements.
PHYS 2360   General Physics II/Lab (4 credits)  OR  PHYS 2360H General Physics II/Lab Honors (4 credits)  OR  PHYS 2500 Physics II/Lab (4 Credits)

Note: Six (6) credits of CHEM/PHYS may fulfill the General Education requirements.

**Major Electives (18 credits)**
Select 18 credits from the following courses:

- MATH 3050   Mathematics and Biology (3 credits)
- MATH 3260   Combinatorics (3 credits)
- MATH 3270   Logic (3 credits)
- MATH 3340   Linear Algebra II (3 credits)
- MATH 3350   Number Theory (3 credits)
- MATH 3450   Elementary Differential Geometry (3 credits)
- MATH 3900   History of Mathematics (3 credits)
- MATH 4050   Advanced Calculus I (3 credits)*
- MATH 4060   Advanced Calculus II (3 credits)*
- MATH 4100   Introduction to Topology (3 credits)
- MATH 4200   Complex Variables (3 credits)
- MATH 4300   Numerical Methods (3 credits)
- MATH 4350   Abstract Algebra I (3 credits)*
- MATH 4360   Abstract Algebra II (3 credits)*
- MATH 4400   Partial Differential Equations (3 credits)
- MATH 4450   Basic Probability (3 credits)
- MATH 4500   Probability and Statistics (3 credits)
- MATH 4600   Introduction to Applied Mathematics (3 credits)
- MATH 4700   Applied Cryptography (3 credits)
- MATH 4900   Special Topics in Mathematics (3 credits)
- MATH 4950   Internship in Mathematics (1–12 credits)
- MATH 4990   Independent Study in Mathematics (1–3 credits)

*Can be counted only once, either as a core course requirement or a major elective requirement

The following courses are excluded for credit toward the mathematics major:

- MATH 3030   Applied Statistics II (3 credits)
- MATH 4020   Applied Regression Analysis (3 credits)
- MATH 4040   Applied Multivariate Statistical Analysis (3 credits)
- MATH 4080   Introduction to Statistical Computations (3 credits)

**Minors**

---

**APPLIED STATISTICS MINOR**

Statistical methods are widely used in science, social and behavioral sciences, business, health professions, and industry. The applied statistics minor is appropriate for all NSU students with interests in experimental design, data analysis, or statistical modeling. The minor is designed to enable a student to properly design studies and analyze the resulting data, and to evaluate statistical methods used in marketing research, biological models, social studies, or their field of study.

**Applied Statistics Minor Requirements (15 credits)**

The applied statistics minor requires the successful completion of 15 credit hours of statistics courses with a MATH prefix at the 2000 or higher level, including at least 9 credit hours at the 3000 level or higher, with the exception of MATH 2020 Applied Statistics and MATH 2020H Applied Statistics Honors, which are excluded from the minor.

The courses eligible for this minor include (but are not limited to) the following:

MATH 3030  Applied Statistics II (3 credits)
Mathematics Minor

Mathematics is extensively used throughout the disciplines, including the sciences, engineering, finance, and social sciences. For those already engaging in disciplines with higher mathematics courses, the mathematics minor provides an opportunity to deepen their understanding into their own fields and develop professional tools that may not be commonly available to their peers. The minor in mathematics is appropriate for all NSU students looking to broaden their mathematical horizons.

Mathematics Minor Requirements (17 credits)
Select 17 credits of MATH courses at the 2000 level or higher including at least 9 of these credits at the 3000 level or higher. The courses eligible for this minor include (but are not limited to) the following:

- MATH 2100 Calculus I (4 credits) OR MATH 2100H Calculus I Honors (4 credits)
- MATH 2200 Calculus II (4 credits) OR MATH 2200H Calculus II Honors (4 credits)
- MATH 3050 Mathematics and Biology (3 credits)
- MATH 3200 Calculus III (4 credits)
- MATH 3300 Introductory Linear Algebra (3 credits)
- MATH 3200 Number Theory (3 credits)
- MATH 3400 Ordinary Differential Equations (3 credits)
- MATH 4500 Probability and Statistics (3 credits)
- MATH 4900 Special Topics in Mathematics (3 credits)
- MATH 4990 Independent Study in Mathematics (1–3 credits)

The following courses are excluded for credit toward the mathematics minor:
- MATH 2020 Applied Statistics (3 credits) OR MATH 2020H Applied Statistics Honors (3 credits)
- MATH 2080 Applied Calculus (3 credits)
- MATH 3030 Applied Statistics II (3 credits)
- MATH 4020 Applied Regression Analysis (3 credits)
- MATH 4040 Applied Multivariate Statistical Analysis (3 credits)
- MATH 4080 Introduction to Statistical Computations (3 credits)
Ron and Kathy Assaf College of Nursing
Dean’s Message

Welcome to Nova Southeastern University’s (NSU) Ron and Kathy Assaf College of Nursing (ACON) website/catalog.

The Ron and Kathy Assaf College of Nursing strives to educate pre-licensure students to become great BSN nurses. Students are not only prepared to successfully pass the nursing licensure exam but are provided the skills that will allow them to become tomorrow’s nurse leaders.

The ACON educational programs are supported by quality faculty whose academic expertise and clinical experience enhance the learning environment. The faculty members offer experiential knowledge that exposes each student to the varied specialty areas within nursing and support them as they transition into health care delivery as graduates.

Health Professions Division (HPD) Mission Statement

The mission of Nova Southeastern University Health Professions Division is to train primary care health practitioners in a multidisciplinary setting, with an emphasis on medically underserved areas.

The institutional premise is that health professionals should be trained in a multidisciplinary setting and, whenever possible, with integrated education. The university trains students in concert with other health profession students so that the various disciplines will learn to work together as a team for the good of the public’s health. During their didactic work, students share campus facilities and, in some cases, have combined classes. In their clinical experiences, they work together in facilities operated by the university.

Furthermore, the division aims to educate health care practitioners who will eventually increase the availability of health care in areas of Florida that suffer from health care shortages. The division aims to alleviate some of these shortages by exposing the entire student body to the needs, challenges, and rewards of rural, underserved urban, and geriatric care. Existing curricula require all students to attend ambulatory care clerkships in rural or urban areas, or both, making Nova Southeastern University strongly oriented toward a pattern of training its students in areas geographically removed from the health center itself, and to the care of indigent and multicultural population groups.

In doing this, it developed training programs that address the primary care needs of the region’s most medically underserved populations.

Ron and Kathy Assaf College of Nursing Vision Statement

NSU Ron and Kathy Assaf College of Nursing will be nationally and internationally recognized for preparing transformational leaders in health care who are valued for excellence in nursing practice, education, and research.

Ron and Kathy Assaf College of Nursing Mission Statement

The Ron and Kathy Assaf College of Nursing (ACON) provides quality undergraduate and graduate educational programs within an atmosphere of scholarly inquiry, professional values, inter-professional collaboration, and community service.

Core Values

- Integrity is the quality of consistently adhering to a code of honesty, accountability and being ethically moral.
- Creativity is the ability to transcend traditional ideas, patterns, and rules, as well as having the capacity to construct meaningful new ideas, methods, and interpretations.
- Courage is the aptitude to uphold one’s convictions and demonstrate confidence to speak and act in accordance with one’s beliefs and responsibilities.
- Stewardship is advocating and protecting resources entrusted to one’s care.
- Compassion is an active desire to alleviate another’s distress through caring, empathy, supporting and helping others.
- Competence is having the expertise, knowledge, and skills to successfully and efficiently perform the roles of their profession.

Introduction to the College

The Ron and Kathy Assaf College of Nursing is committed to providing the highest quality education to its students. The college offers two options for a Bachelor of Science in Nursing degree.

**Option 1: The Transfer Nursing Program** for students who have their general education requirements and pre-requisites completed. Students complete this B.S.N. program in 7 terms. B.S.N. programs are offered on the Fort Lauderdale campus, the Miami campus and the Fort Myers campus.
Option 2: Accelerated Bachelor of Science in Nursing

Students with a bachelor’s degree in another field may apply to the accelerated bachelor of science in nursing (ABSN) program. Students in this track complete B.S.N. course work in four semesters of didactic education and clinical hours after general education and prerequisites courses have been completed. This program is only offered on the Fort Myers campus.

Notice on Professional Examinations

Credits and degrees earned from colleges within the state of Florida that are licensed by the State Board of Independent Colleges and Universities do not automatically qualify the individual to participate in professional examinations in Florida. The established procedure requires the appropriate state professional board to review and recognize the colleges granting the degrees prior to scheduling examinations. Additional information regarding Nova Southeastern University Health Professions Division and its Colleges of Osteopathic Medicine, Pharmacy, Optometry, Health Care Sciences, Nursing, Medical Sciences, and Dental Medicine may be obtained by contacting the State Board of Independent Colleges and Universities, Department of Education, Tallahassee, Florida. Any student interested in practicing a regulated profession in Florida should contact the Department of Business and Professional Regulation, 2009 Apalachee Parkway, Tallahassee, Florida 32301.

Martin and Gail Press HPD Library

Service Units Learning Resources

The Martin and Gail Press Health Professions Division Library (Press HPD Library) is located on the first floor at the north end of the Terry Building Complex in the Library/Lab Building. The Press HPD Library consists of a large collaboration area for group study, a designated quiet study area, and 50 study rooms. There are a variety of seating options available, from large tables to individual carrels and informal seating. Study rooms, located in the library as well as the adjacent Assembly I and Assembly II Buildings, may be checked out for three hours and renewed based on availability. A paging system is offered for students waiting for an available study room. Additionally, one study room is equipped with a Mediascape collaboration unit with double monitor displays for collaborative group work and a small teaching lab may be reserved for group instruction.

Hours of operation for the Martin and Gail Press HPD Library and study rooms in Assembly I and Assembly II buildings:

- Monday-Thursday: 7:00 a.m. - midnight
- Friday: 7:00 a.m. – 9:00 p.m.
- Saturday and Sunday: 10:00 a.m. - midnight

From September through May, the study rooms in the Assembly II building are open 24/5 (Sunday-Thursday).

The Press HPD Library print collection consists of 11,500 monograph titles, 715 archived print journal titles, and 88 active print journal subscriptions. The Press HPD Library provides all HPD students with remote access to online resources including over 17,000 health related full-text eJournals, 2,000 biomedical eBooks, and over 200 health- and medicine-specific databases. These resources may be accessed 24/7 through the Press HPD Library website (nsufl.libguides.com/hpdlibrary).

Professional reference services are available to students in-person as well as by phone, email, and online via screensharing software. Eight professional librarians are available to assist students with library resources and research-specific assignments. Each HPD college/program is assigned a subject specialist liaison librarian who works closely with faculty and provides instructional sessions for specific class assignments.

The Press HPD Library also provides these free services to enhance student learning and study:

- Interlibrary Loan/Document Delivery service obtains journal articles, books, and items not available in the NSU collection
- Notary service
- Binding, faxing, and scanning services
- Wireless printing stations
- On-site technology assistance
- I.D.E.A. Labs:
  - 3D Printing & Scanning: 3-D scanning and printing services for students involved in curricular and faculty projects.
  - Virtual Reality: Students can experience virtual anatomy, simulation & medical-related apps via immersive virtual reality headsets.
  - The Studio: Digital production room/studio for video recording and editing, along with cameras and other production equipment which can be checked out of the library.

Additional resources at the circulation desk (limited checkout times):
- Laptop computers
- iPads loaded with medical and production apps
- Medical/anatomy apps for checkout on personal Apple devices
- Print editions of required textbooks on reserve (for in-library use)
- Anatomy models and skeletons (for in-library use)
- Individual, small whiteboards and markers
- Chargers and extension cords
- Earplugs and school supplies (for purchase)
- Self-service Keurig coffee machine

For more information, please call (954) 262-3106.

See the university Libraries section of the NSU Student Handbook for information about NSU's Alvin Sherman Library, Research, and Information Technology Center. Visit nova.edu/student-handbook for more information.

---

## HPD Policies and Procedures

### Acceptance of Professional Fees

The activities of students are not to be construed as the practice of medicine, optometry, pharmacy, audiology, occupational therapy, physical therapy, physician assistant, anesthesiologist assistant, cardiovascular sonography, medical sonography, respiratory therapy, nursing, dentistry, public health, nutrition/dietician, athletic training, or speech-language therapists. It is a violation of the law and contrary to the policy of this university for any unlicensed person to attempt to engage in the professional practice of health care. Students who are appropriately licensed in a profession may engage in that professional work to the extent provided by law.

### Communicable Disease Policy

See Communicable Disease section in the NSU Student Handbook at nova.edu/student-handbook.

### Background Checks

Accepted applicants and students are required to authorize the NSU Health Professions Division to obtain background check(s) as per adopted policy of March 2011. If the background check(s) reveal information of concern, which the NSU Health Professions Division may deem unfavorable, HPD will request that the individual provide a detailed written explanation of the information contained in this report, along with appropriate documentation (e.g., police reports). Students may also be required to authorize clinical training facilities that they are assigned to by the Health Professions Division to obtain a background check with the results reported to the clinical training facility.

Offers of admission will not be considered final until the completion of the background check(s), with results deemed favorable by the NSU Health Professions Division, and, where appropriate, by the clinical training facilities. If information received indicates that the student has provided false or misleading statements, has omitted required information, or in any way is unable to meet the requirements for completion of the program, then the admission may be denied or rescinded, the student may be disciplined or dismissed, or his or her enrollment terminated.
Acceptance to an NSU Health Professions Division program does not guarantee that a student with information of a concern will be accepted by clinical training facilities to which they may be assigned.

Students have the continuing obligation to disclose to the college any arrest or conviction, other than a minor traffic violation (those where no criminal conviction occurs and no first offender/pretrial diversion program was required).

Additionally, a Level 2 background check may be required of students completing certain rotations.

**Background Checks:** The college pays for the first background check per student. Additional background checks will be funded by the student.

---

**Certificate of Physical Examination**

Students must have a certificate of physical examination completed by their physician. Forms will be provided to each matriculant as part of the admissions package or can be downloaded.

Students may request that the University Health Service perform these examinations. The University Health Service will make appointments in as timely a manner as possible. The appointments, once made, become an obligation of the student and must be kept.

These certificates (whether done privately or by the university) will be placed in the appropriate site.

If the renewal date for physical requirements occurs during a term, the student must renew prior to the beginning of the term in which the renewal date occurs. Approved status must be valid for the entire semester in which the student enrolls. A student who experiences a health problem that may interfere with the ability to provide client care (e.g., surgery, fracture) must provide a release from their health care provider indicating the ability to participate fully in client care situations. “Light duty” is not permissible.

- A Nova Southeastern University Health Form will be included with acceptance materials. The completed, signed form must be presented according to the admissions department guidelines.
- Basic Life Support (BLS) certification must be valid prior to each term for the duration of the term.
- The student should carry a copy of their health/hospitalization insurance card with them to the clinical agency, as well as their BLS card.

---

**Core Performance Standards for Admission and Progress**

The Nova Southeaster University's Health Professions Division Ron and Kathy Assaf College of Nursing is pledged to the admission and matriculation of qualified students and wishes to acknowledge awareness of laws that prohibit discrimination against anyone on the basis of race, color, religion or creed, sex, pregnancy status, national or ethnic origin, non-disqualifying disability, age, ancestry, marital status, sexual orientation, unfavorable discharge from the military, veteran status, or political beliefs or affiliations.

Regarding those students with verifiable disabilities, the university will not discriminate against such individuals who are otherwise qualified, but will expect applicants and students to meet certain minimal technical standards (core performance standards) as set forth herein with or without reasonable accommodation. In adopting these standards, the university believes it must keep in mind the ultimate safety of the patients whom its graduates will eventually serve. The standards reflect what the university believes are reasonable expectations required of health professions students and personnel in performing common functions. Any exceptions to such standards must be approved by the dean of the student’s particular college based upon appropriate circumstances.

The holders of health care degrees must have the knowledge and skills to function in a broad variety of clinical situations and to render a wide spectrum of patient care. In order to carry out the activities described below, candidates for Health Professions Division degrees must be able to integrate consistently, quickly, and accurately all information received, and they must have the ability to learn, integrate, analyze, and synthesize data.

Honor and integrity of the health professions student and health care professional is essential and depends on the exemplary behavior of the individual health care provider in his/her relations with patients, faculty members, and colleagues. This includes accountability to oneself and to relationships with fellow students, future colleagues, faculty members, and patients who come under the student’s care or contribute to his/her training and growth, as well as members of the general public. This applies to personal conduct that reflects on the student’s honesty and integrity in both academic and non-academic settings, whether or not involving an NSU-sponsored activity. All students must have the capacity to manage their lives and anticipate their own needs. Upon accepting admission to NSU, each student subscribes to and pledges complete observance to NSU’s Student Code of Conduct Policies. A violation of these standards is an
abuse of the trust placed in every student and could lead to suspension or dismissal.

Candidates for degrees offered by the Health Professions Division Ron and Kathy Assaf College of Nursing must have, with or without reasonable accommodation, multiple abilities and skills including intellectual, conceptual, integrative, and quantitative abilities; interpersonal communication; mobility and strength; motor skills; hearing, visual, tactile, behavioral, and social attributes. Candidates for admission and progression must be able to perform these abilities and skills in a reasonably independent manner.

**Intellectual, Conceptual, Integrative, and Qualitative Abilities**

These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving—a critical skill—requires all of these intellectual abilities. Candidates and students must have critical thinking ability sufficient for good clinical judgment. This is necessary to identify cause-effect relationships in clinical situations and to develop plans of care. In addition, candidates and students should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures. An individual is expected to be able to perform multiple tasks in a diverse, dynamic, highly competitive, and challenging learning environment. All individuals are expected to meet their program requirements on a satisfactory level as determined by HPD administration or the applicable college/program administration.

**Interpersonal Communication**

Candidates and students must be able to interact and communicate effectively with respect to policies, protocols, and process, with faculty, students, staff, patients, patient surrogates, and administration during the student’s educational program. They must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but also reading and writing. Candidates and students must also be able to communicate effectively and efficiently in all written forms with all members of the health care team. They must have interpersonal abilities sufficient to interact with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds.

A student must have sufficient proficiency with English to retrieve information from texts and lectures and communicate concepts on written exams and patient charts; elicit patient backgrounds; describe patient changes in moods, activity, and posture; and coordinate patient care with all members of the health care team. A student must be able to communicate or provide communication in lay language so that patients and their families can understand the patient’s conditions, treatment options, and instructions. The student must be able to accurately enter information in the patient’s electronic health record, according to his or her program’s requirements.

**Motor Skills**

Candidates and students should have sufficient motor function to execute movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required to some health care professionals are cardiopulmonary resuscitation, administration of intravenous medication, the application of pressure to stop bleeding, the opening of obstructed airways, and the ability to calibrate and use various pieces of equipment. Such actions require coordination of both gross and fine muscular movements, equilibrium and functional use of the senses of touch and vision.

**Strength and Mobility**

Candidates and students must have sufficient mobility to attend to emergency codes and to perform such maneuvers as CPR when required. They must have the physical ability to move sufficiently from room to room and to maneuver in small places. Ron and Kathy Assaf College of Nursing students must have the ability to position and move patients.

**Hearing**

Candidates and students should have sufficient auditory ability to monitor and assess health needs. They must be able to hear information given by the patient in answer to inquiries; to hear cries for help; to hear features in an examination, such as the auscultatory sounds; and to be able to monitor equipment.

**Vision**

Candidates and students must have visual ability sufficient for observation and assessment necessary in patient care. It must be consistent in many cases with being able to assess asymmetry, range of motion, and tissue changes. Ron and Kathy Assaf College of Nursing students must have adequate visual capabilities for proper evaluation and treatment integration. Students must be able to observe the patient and the patient’s responses including body language and features of the examination and treatment as well as interpret prescriptions and medical orders.

**Tactile/Sensory**

Students must have sufficient tactile ability for physical assessment. They must be able to perform palpation, functions of physical examination, and/or those related to therapeutic intervention, including medication administration.
Behavioral and Social Attributes

Students must possess the emotional health required for full use of their intellectual abilities; the exercise of good judgment; the ability to take responsibility for their own actions with respect to policies, protocols, and processes, with faculty, students, staff, patients, patient surrogates, and administration during the student’s educational program; the prompt completion of all responsibilities attendant to the diagnosis and care of patients; and the development of mature, sensitive, and effective relationships with the patients. Students must be able to physically tolerate taxing workloads, adapt to changing environments, display flexibility, and learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal skills, interest, and motivation are all personal qualities that will be assessed during the education process.

**Dress Code**

Students must maintain a neat and clean appearance befitting those attending professional school. Therefore, attire should convey a professional appearance whenever the student is on the division campus and in classes or laboratory or on an experiential rotation or program. The dress code is to be maintained at all times on any NSU campus and all areas involved in providing patient care. The dress code is applicable Monday through Friday from 8:00 a.m. until 5:00 p.m. and for any clinical, laboratory, externship, or research experience that may fall outside of the aforementioned time frame. Those failing to comply with the dress code may be dismissed from the classroom, campus, and/or clinical setting. A written warning describing the infraction will be entered into the student’s file. The dress code is to be observed at all times including during midterms, examination periods, and during advisement. Students are assigned to various clinical facilities for clinical rotations as an ACON student. Compliance with individual dress codes as specified by policies of the clinical site is required.

The following is professional attire from 8:00 a.m. to 5:00 p.m.

- Students must visibly wear NSU ID badges while on campus, at all clinicals, practicums, immersions, or any other NSU-ACON affiliated experience.
- The nursing uniform consists of teal scrubs with the student’s name and NSU embroidered on the left side of the scrub top and white clinical jackets.
- Tattoos: All tattoos must be covered at all times when the student is on campus, while in uniform, or at the clinical setting.
- Nails: Fingernails must be short, clean, and unpolished. Artificial nails are not allowed.
- Piercing: One piercing, only in the lobe of the ear with a small stud, is allowed. No dangling earrings are allowed.
- Hair: Hair for both females and males must be neatly groomed and professional in appearance. Hair must be tied back and off the collar while participating in clinical rotations and while in the simulation laboratory. Male’s beards should be closely trimmed.
- White clinical jackets should be worn by all ACON students participating in classroom, clinical, laboratory, externship, or research experiences.
- Students must wear scrubs and white clinical jackets OR teal polo shirts and khaki bottoms to clinical experiences in psychiatric-mental health nursing and community health nursing.
- Professional business dress includes shirts, slacks, appropriate shoes for men, and white clinical jackets; slacks/skirts, blouses/shirts, dresses, appropriate shoes for women, and white clinical jackets.
- Shoes: If wearing scrub sets, students must wear white shoes. If wearing khaki slacks/skirts and teal polo shirt or business attire, students must wear brown/black shoes.
- Additional attire may include long-sleeve white or gray T-shirts under the scrubs.

No institutional scrubs may be worn by any Ron and Kathy Assaf College of Nursing student at any time while on campus. Institutional scrubs are those that have the identification symbols or lettering from the institution that owns or issues them. Those scrubs are marked in locations that are easy to identify as being part of the inventory of that institution.

The following attire is never appropriate while the student is on campus: jeans, capris, leggings, shorts or cutoffs, miniskirts (higher than mid-thigh), see-through clothing or halter tops, flip-flops, jogging or exercise clothing, hats or caps (unless for a religious reason), or inappropriately mismatched garments. Students will wear the prescribed uniform during designated clinical experiences and be neatly groomed. The specified uniform is worn when the student is in the hospital, nursing lab, or health care agency under the supervision of a professor.

When on campus, students may wear professional business casual attire or their NSU scrubs. If the student elects to wear the NSU scrubs to class, they must be laundered in time for the next clinical experience. The scrubs and shirts are to be ordered and purchased...
through the NSU Bookstore or the approved vendor. No other uniform is acceptable. The HPD Section of the handbook outlines the
dress code for NSU health professions students and serves as the foundation for the ACON’s dress code. Students must adhere to the
HPD dress code and the ACON’s detailed dress code as outlined. The dress code is to be observed at all times including midterms,
examination periods, and during advisement.

Students are expected to consult their specific program handbooks for compliance with any program-specific and clinical rotation site-
supplemental dress code policies.

**Identification Badges**

Students must wear identification badges at all times while on campus. ID badges are not transferable. ID badges are issued at the
Division Badge Room. These badges are given to the students at no charge except for replacement.

Background Checks: The college pays for the first background check per student. Additional background checks will be funded by the
student.

**IDENTIFICATION REQUIREMENTS AND FIELDWORK PREREQUISITES**

An affiliated clinical/ fieldwork teaching facility may also require a student to pass a state of Florida Department of Health screening
before rotation. Other requirements, which may be held by the affiliated facility include, but are not limited to, fingerprinting, criminal
background check, urinalysis for drugs and alcohol, and proof of immunization. If a student does not meet all requirements held by the
affiliated facility on the date specified by the ACON, the student’s placement will be canceled.

**IMMUNIZATION REQUIREMENTS**

Students must complete a mandatory immunization form, which must be signed by a licensed health care provider. The form can be
found at nova.edu/smc.

Students in the Health Professions Division may be required to upload proof of immunizations to multiple online portals to satisfy the
requirements of their programs and the training facilities where they are assigned.

The following immunizations/vaccinations are required of student at the Health Professions Division based on the current Centers for
Disease Control (CDC) recommendations for Health Care Personnel:

**Basic Immunizations**

Every student is required to have had an immunization for, or show evidence of immunity to, the following diseases before matriculating
at Nova Southeastern University:

- **Hepatitis B**
  - Both of the following are required: three vaccinations and positive surface antibody titer. (Lab report is required.)
  - If the series is in progress, evidence of at least one shot must be provided, and the renewal date will be set accordingly.
  - If the titer is negative or equivocal, the student must repeat the series and provide repeat titer report.

- **Influenza Vaccination**
  Aligned annually. (An annual, seasonal influenza vaccine is required by most clinical sites.)

- **Measles, Mumps and Rubella (MMR)**
  One of the following is required: Proof of two vaccinations, or positive antibody titer for measles (rubeola), mumps, and rubella. (Lab
  report is required.)

- **PPD Skin Test (2 Step)**
  - One of the following is required: negative two-step test or negative blood test (such as T-Spot Test) or if positive PPD results, provide
    a chest X-ray and/or prophylactic treatment information within the past 12 months.

- **Tetanus Toxoid, Diphtheria Toxoid, and Acellular Pertussis Vaccine (Tdap)**
  All students are required to have had a Tetanus Toxoid, Diphtheria Toxoid, and Acellular Pertussis Vaccine (Tdap) booster prior to
  matriculation and must maintain immunity by continuing to remain current according to the CDC recommendations for health care
personnel during their program. Due to the increased risk of pertussis in a health care setting, the Advisory Committee on Immunization practices highly recommends health care workers receive a One-time Tdap (ask your health care provider). Tdap is required, without regard to interval of previous dose of Tetanus-Toxoid (Td).

Varicella (Chicken Pox)

One of the following is required: Proof of two vaccinations or positive antibody titer. (Lab report is required.)

Arrangements: Students may request that the Student Medical Center or the NSU Clinic Pharmacy administer these immunizations. The Student Medical Center will make appointments in as timely a manner as possible. Students may call (954) 262-1270 to make an appointment. Once made, the appointment becomes the student’s obligation and must be kept. For students at other NSU campuses, appointments may be scheduled with the NSU designated physician for their area.

Nursing General Access Fee: The Nursing general access fee covers a series of three Hepatitis B vaccines and an annual PPD screening. All other immunizations and health care services are the responsibility of the student.

Failure to comply: The University is not required to provide alternative sites for clinical practicum or rotations should immunization be a requirement for placement. Therefore, failure to comply with this policy may result in a student’s inability to satisfy the graduation requirements in his or her program.

Relative to clinical rotation site requirements, students are expected to consult their specific college/program handbooks for compliance with any college/program specific requirements.

**NETIQUETTE**

In a traditional classroom, students are reminded that behavior that disrupts the class or interferes with other students and their ability to learn is unacceptable. Any person engaged in disruptive behavior receives a written warning from the instructor. Students who continue to engage in disruptive behavior after this warning may be administratively withdrawn from the course.

Similarly, in an online course, any electronic postings, emails, or electronic messages that disrupt the class or interfere with learning goals and objectives are unacceptable. Electronic communication must be civil, respectful, and cordial at all times. Any posting that disrupts or interferes with learning will be removed, and the author of the posting will receive a written warning. A second disruptive posting will cause the author to be administratively withdrawn from the course.

**SOCIAL MEDIA**

Media outlets are a great tool when used in a way that fosters learning and enhances the educational experience of its participants. The Ron and Kathy Assaf College of Nursing (ACON) prohibits the posting of messages or photos that incite lawless action, are an expression of intent to inflict physical, emotional harm upon members of the college’s students or faculty body, or that are a violation of any law prohibiting discrimination, defamation, or are otherwise unlawful.

Students are prohibited from uploading text, messages, chats, or photos of course and exam content, faculty generated course content, simulation scenarios, or any other educational materials that are used exclusively for the educational purposes of courses offered at ACON. Similarly, any videos or photos that capture students who are actively enrolled in the ACON engaging in the aforementioned activities, especially while in college uniform, will be subject to sanctions delineated in the student handbook. Usage of the name and/or signage of the college or university in any of these contexts is also prohibited.

**VISITS TO OTHER INSTITUTIONS**

Students in the Ron and Kathy Assaf College of Nursing may not visit, in an official or presumably official capacity as a Ron and Kathy Assaf College of Nursing student, any health-related institution (hospital, pharmacy, practitioner’s office, clinic, etc.) or any health school without express permission of the dean. Visits to relatives or friends who are hospitalized are permitted, provided they are within visiting hours and all hospital rules are observed.
Eligibility for Florida R.N. Licensure and Required Disclosure

Applicants to the nursing program who meet all university and departmental requirements will be considered for admission. Final determination of eligibility to take the NCLEX-RN rests with the Florida Department of Professional Regulation and Board of Nursing. The licensure application requires disclosure of any criminal history and the disposition of all cases prior to board review. Entry into the nursing education program is the prospective student’s decision based upon the knowledge that he or she may, or may not, be granted a nursing license. Applicants will notify the department chair of any arrest record prior to and during enrollment in the NSU Ron and Kathy Assaf College of Nursing and prior to application for licensure. The graduate is required to meet all reporting requirements of the Board of Nursing at the time of application to sit for the NCLEX-RN.

Florida Board of Nursing
4052 Bald Cypress Way
BIN CO2
Tallahassee, Florida 32399-3252
Phone: (850) 488-0595

Florida Nursing Students Association

The Florida Nursing Student Association (FNSA) is the professional organization for nursing students in the state of Florida. It serves to prepare nursing students to be a member of a professional organization and provides a voice for students at public, institutional and governmental bodies. The Nova Southeastern University Ron and Kathy Assaf College of Nursing has a district chapter of FNSA. All students are encouraged to become members. Participation in various local, district, state, and national activities is also encouraged.

Health Forms (Student Health Records)

The Ron and Kathy Assaf College of Nursing is required to submit to clinical sites satisfactory evidence that each program participant is free from contagious disease and does not otherwise present a health hazard to hospital clients, employees, volunteers, or guests prior to his or her participation in the program. Students will be required to follow the requirements of the Ron and Kathy Assaf College of Nursing and the clinical agencies. Performance standards for all Ron and Kathy Assaf College of Nursing students are identified in Ron and Kathy Assaf College of Nursing Student Handbook. If students are unable to meet the performance standards, they will be asked to obtain clearance from a physician or nurse practitioner prior to returning to the program. A student who experiences a health problem that may interfere with the ability to provide client care (e.g., surgery, fracture) must provide documentation from their health care provider indicating the ability to participate fully in client care situations. “Light duty” is not permissible. Each year students will provide updates to their health form, which can be completed at the Student Health Center.

Health Insurance

All Ron and Kathy Assaf College of Nursing students are required to carry health insurance to cover their health care and meet requirements of the health care facility and may not drop insurance while in the program. Proof of insurance must be provided.

Students must use this health insurance for any needs during clinical/class times. Any ACON student may be seen at the Student Health Center. Students must bring their school identification card and insurance card. At the end of their visit, they will receive a statement showing the services performed. Payment of all copayments and deductibles is expected at the time services are rendered. Students who do have private health insurance must apply for a waiver at nova.edu/bursar/health-insurance. Students are responsible for complying with this requirement each year by the NSU designated due date or they will be charged.

Some insurance policies require a primary care provider (PCP) designation. In such cases, students should designate an NSU provider prior to visiting the Health Care Center. For a list of providers and participating insurance carriers, please visit the Health Care Center website at nova.edu/healthcare/clinics-services/medical.

For additional information on the student health insurance, including purchasing insurance, please refer to the NSU Student Insurance website site at nova.edu/bursar/health-insurance.
Textbooks and Supplies

The textbooks and other related reading materials and supplies required for nursing are available for purchase at the Nova Southeastern University campus bookstore or online. Many of the textbooks purchased for nursing will be purchased during the first nursing course and used throughout the program. Unless advised otherwise, the Ron and Kathy Assaf College of Nursing recommends that students do not purchase textbooks required at other course levels until they are ready to enroll in these courses. This will enable students to have the most current required editions. The department also suggests that students put their names in all of their textbooks. It is strongly recommended that students do not leave them unattended in the classroom or elsewhere.

Students should buy their books early. After the first few weeks of the semester, the bookstore returns all books that have not been purchased to the publishers. Books are expensive, but financial aid is available. Books may also be purchased online through the NSU bookstore. If students purchase online from another vendor they may be purchasing the incorrect edition.

In addition to the printed materials, students will also need the following supplies: a watch with a second hand and stethoscope. These are available for purchase at any local uniform shop or via the Internet. All students will be measured for an NSU lab coat during the orientation.

Students must have access to a computer with Microsoft Office software.

Computer Requirements

Computer Literacy

Access to and ongoing use of a computer will be required for all students to successfully complete the online programs and courses in the Ron and Kathy Assaf College of Nursing. Each student is expected to acquire computer hardware and software appropriate to the program. All students need a webcam for any on-line activities or testing. Competency in the basic use of a computer and the ability to navigate and interact with the course and curriculum content is the responsibility of the student and necessary for graduation.

Computer Recommendations (minimum)

All students are REQUIRED to have ongoing access to a portable laptop computer with a webcam and an active account with an Internet service provider. Detailed information on the minimum recommended specifications can be found in the Hardware Guidelines for Computing at NSU at this website: https://nova.edu/publications/it-standards/.
Nursing Programs

The Ron and Kathy Assaf College of Nursing offers a Bachelor of Science in Nursing (B.S.N.) and an Accelerated Bachelor of Science in Nursing (A.B.S.N.) program. These programs focus on developing nursing professionals to assume leadership roles in the complex health care environment.

Upon successful completion of the program, B.S.N. graduates may be eligible to apply for admission to continue their education in the MSN Traditional, Clinical MSN APRN program, or the BSN to DNP program. The Ron and Kathy Assaf College of Nursing also offers a Doctor of Nursing Practice (D.N.P.) program and a Philosophy of Science in Nursing Degree (Ph.D.) in Administrative Leadership or Nursing Education.

Additionally, registered nurses with a B.S.N. degree who wish to pursue a DNP degree, may apply to the B.S.N. to D.N.P. program which includes the M.S.N. APRN options including the Family Nurse Practitioner, Adult Gerontology Acute Care Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner. M.S.N. Traditional options include Executive Nurse Leader, Nursing Informatics or Nurse Educator tracks.

Majors

Bachelor of Science in Nursing Learning Outcomes

The goal of the Nova Southeastern University Bachelor of Science in Nursing degree program is to graduate nurses prepared to:

- Integrate knowledge, theory, and evidence-based research into current nursing practice.
- Assume a leadership role as the registered professional nurse in health care systems and diverse community settings.
- Engage in activities for continued professional growth.

Program Outcomes

- Exhibit leadership that supports health care policies that promote safe quality nursing care within complex health care systems.
- Integrate evidence-based practices that support decision-making in the delivery of nursing care.
- Evaluate the effectiveness of patient and family centered nursing care based on nursing theories and evidence-based practice.
- Incorporate the concepts derived from liberal education to build an understanding of the human experience.
- Incorporate technology and information management to promote a safe practice environment.
- Engage in inter-professional collaboration to improve population health while considering fiscal and material resources in the delivery of safe nursing care.
- Integrate legal, ethical and professional values within generalist nursing practice.
- Collaborate with the inter-professional health community to provide culturally and spiritually competent patient and family centered care in health promotion and disease/injury prevention.

Pre-Nursing Program

NSU’s undergraduate Pre-Nursing Program is designed for students who wish to apply to NSU’s Entry Nursing program (B.S.N.) and complete the general education and prerequisite program admission requirements at the university. These prerequisite courses are offered by NSU’s College of Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center.

Bachelor of Science in Nursing—Entry B.S.N. Track

The Entry B.S.N. track is designed for students who are seeking initial licensure as a registered nurse. Upon completion of ACON credit requirements, the student is awarded a Bachelor of Science degree in Nursing (B.S.N.) and is eligible to make application to sit for the national licensure examination for registered nurses (NCLEX-RN®). The Entry B.S.N. track curriculum is started following completion
of a minimum of 39-41 credit hours (or equivalent quarter hours) of specific undergraduate coursework. This coursework may be completed at a community college or another university.

The remainder of the 82 credit hours are completed within seven terms (three terms per year) in the nursing program. Each term is a combination of didactic and clinical courses. The department requires matriculants to complete the entire program. Individual requests for advanced placement, transfer of credit, or credit for experiential learning will be reviewed in line with college requirements.

---

**BACHELOR OF SCIENCE IN NURSING—ENTRY B.S.N. TRACK CURRICULUM**

Students in the Bachelor of Science in Nursing—Entry B.S.N. track are required to take 30 credit hours of general education coursework; 11 credit hours of prerequisites; and 82 credit hours of designated nursing courses, resulting in a total of 121-123 credit hours necessary for graduation. Pre-Nursing students should follow the Halmos College of Arts and Sciences and the Guy Harvey Oceanographic Research Center curriculum plan for pre-nursing students.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog. Students must complete the General Education Program requirements before matriculating into the Bachelor of Science in Nursing—in Nursing—Entry B.S.N. Program.

**Prerequisite Requirements (9-11 credits)**

In addition to completing 30 General Education Requirements, students must complete 9-11 credit hours of prerequisites coursework.

**Bachelor of Science in Nursing—Entry B.S. in Nursing Major Requirements (82 credit hours)**

Students must complete all pre- and co-requisite nursing courses prior to enrolling in NUR 4180.

- NUR 4904  Advanced Anatomy and Physiology for Health Professions (4 credits)
- NUR 3002  Introduction to Baccalaureate Nursing Education (3 credits)
- NUR 3160  Introduction to Professional Nursing (3 credits)
- NUR 3130  Foundations of Professional Nursing Practice (6 credits)
- NUR 3021  Theoretical Foundations of Professional Nursing Practice
- NUR 3029  Foundations of Health Assessment (3 credits)
- NUR 3032  Foundations of Pathophysiology (3 credits)
- NUR 3180  Primary Concepts of Adult Nursing I (6 credits)

Shepard Broad College of Law
Welcome to NSU’s Shepard Broad College of Law. Founded in 1974, the College of Law has continuously offered the Juris Doctorate, a first-professional degree enabling our graduates to practice law throughout the United States. Over 130 judges have graduated from the college along with thousands of attorneys, business professionals, and leaders in many other disciplines across South Florida and across the nation.

In 2002, the College of Law added the Master of Science program for non-lawyers, educating professionals in education law, health law, employment law, and law and policy on the impact of law in various disciplines. Non-lawyers thus benefit from the legal expertise of the College’s faculty and staff.

The College of Law expanded its education of non-lawyers in 2018, when we became one of a handful of U.S. law schools to offer an undergraduate education. Our first programs have focused on paralegal studies, enabling undergraduate students to earn a major, minor, or certificate in this field, and have continued by adding a minor in Law, Science and Technology, launched in January 2020.

The College of Law undergraduate minor and major programs enable students to study in their fields of interest and learn how the law shapes and informs that field. The study of law includes strong interdisciplinary themes that reinforce and complement the University’s offerings in business, science, arts, and humanities.

Most importantly, at the heart of any legal education is a twin focus on critical problem solving and justice. Students of the law seek to understand how to solve people’s problems and provide fair, just, and equitable outcomes when resolving conflict. For undergraduates, our programs allow you an opportunity to immerse yourselves in these issues.

Many of our J.D. students began as dual-admission undergraduates, coming from every possible undergraduate discipline, and we are thrilled to offer these foundational and advanced courses to students from every corner of the University.

On behalf of our faculty and staff, I welcome you to learn more about the College of Law and how you can make it a part of your educational path.

José Roberto (Beto) Juárez, Jr.

Mission Statement

The mission of the College of Law is “To ensure that students develop the knowledge, skills, and values that are at the heart of becoming trusted, highly adept, professional lawyers who are respected for serving clients, their communities, and justice.” NSU Law’s values include:

- Respect for the law and the importance of lawyers in a free society
- Equitable access to education
- Diversity of background and viewpoint
- Excellence in teaching that serves the students and their learning needs
- High standards of ethics and professionalism
- Evolution of the competencies lawyers need in an ever-changing world
- Support of successful entry and advancement in the bar and other professions
- Assumption of leadership roles and service to the community

Introduction to the College

For more than 50 years, the Shepard Broad College of Law has been an innovator in legal education. The juris doctor (J.D.) program curriculum emphasizes highly practical curriculum and training so graduates are ready to serve clients immediately upon graduation. The online Master of Science program enables professionals to supplement their career by earning degrees in education law, employment law, health law, and law and policy with specialty concentrations in these fields and in cross-cutting areas such as cybersecurity law. The undergraduate program in paralegal studies offers students a marketable skill and a valuable complement to many other undergraduate majors. Undergraduates can choose a major, minor, or certificate so they can tailor the educational experience to their professional goals.

The Shepard Broad College of Law is at the forefront of clinical legal education, guaranteeing every J.D. student a live-client experience through in-house clinics. A wide array of field placements provides on-site placements with government agencies, nonprofit companies, and law firms. Every student can spend an entire semester in one of six full-semester clinics or field placements. Dispute Resolution Clinic, Children and Families Law Clinic, Criminal Justice Field Placement Clinic, the Adults with Intellectual and Developmental Disabilities Law Clinic, and the Sharon and Mitchell W. Berger Entrepreneur Law Clinic provide specialized practice training while the Civil Field Placement Clinic allows a student to participate in the legal field of her or his own choice.

The Shepard Broad College of Law takes pride in being among the most diverse law schools in the nation. A majority of NSU Law students are women in the entering class of 2020. The diverse student body includes 36 percent Hispanic, 43 percent white or Caucasian, 8 percent black or African American, and 5 percent international students. Diversity also carries over in our range of affinity groups representing African American, Asian, Hispanic, Jewish, and LGBT law students along with interest groups such as those for business law, health law, transactional law, entertainment and sports law, and intellectual property. Special programs available at the College of Law include dual-degree programs with many of NSU’s other 17 colleges; dual-degree programs abroad in Rome, Barcelona, or Prague; concentrations in Health or International Law; degree and semester-abroad programs; and much more.

The College of Law’s faculty members, students, and staff members recognize the importance of law as an instrument of social justice, empowerment, and community engagement. Our program melds doctrine, skills, and ethical concerns to produce graduates who are both skilled and caring, and to produce scholarship that advances our understanding of the law.

Major

PARALEGAL STUDIES MAJOR

The paralegal studies major is approved by the American Bar Association. A paralegal, as defined by the American Bar Association, is “a person qualified by education, training, or work experience, who is employed or retained by a lawyer, law office, corporation, governmental agency or other entity, and who performs specifically delegated substantive legal work for which a lawyer is responsible.” The program prepares students for entry-level paralegal positions in the common areas of law practice. Paralegals are non-lawyers, and...
therefore, are prohibited from the unauthorized practice of law. This program trains paralegals and is not a program for training lawyers or legal administrators. Students pursuing a Bachelor of Science degree in Paralegal Studies are required to submit a paralegal portfolio at an exit interview with the program coordinator prior to degree conferral.

Current NSU students pursuing a non-paralegal studies undergraduate degree can concurrently register for the Post-Baccalaureate Certificate in Paralegal Studies.

**Paralegal Studies Major Objectives**

The objectives of the B.S. in Paralegal Studies program are to:

1. Provide students with a broad-based education in both liberal arts and paralegal studies;
2. Provide paralegal courses that enable students to obtain substantive legal knowledge, develop analytical skills, and apply the knowledge they have learned to tasks routinely performed by paralegals;
3. Be responsive in course offerings to the needs of paralegals and attorneys;
4. Ensure that students are familiar with the ethical guidelines for paralegals;
5. Provide students with the opportunity to utilize software that is used in most offices dealing with law-related issues;
6. Familiarize students with the paralegal profession and the opportunities that are available to them upon completion of the program.

**Paralegal Studies Major Learning Outcomes**

A successful paralegal studies graduate is expected to:

1. Explain the basic theories, doctrines, concepts, and associated principles that comprise the knowledge base of law, with specific emphasis on torts, contracts, wills and trusts, civil procedure, litigation, family law, business organizations, real estate, and criminal law;
2. Use legal research and critical thinking skills to categorize, organize, prioritize, and evaluate complex legal issues;
3. Prepare documents (e.g., memos, case briefs, correspondence, and pleadings) that meet professional legal standards.

**Paralegal Studies Major Curriculum**

LEGS courses offered online require proctored exams at approved sites.

**General Education Requirements (30 credits)**

Students are required to complete 30 credit hours as part of the General Education Program. For specific course requirements, refer to the “General Education Program” section on page 98 of this catalog.

**Paralegal Studies Major Requirements (54 credits)**

**Core Courses (45 credits)**

**Major Electives (9 credits)**
Select 9 credits from the following courses, a maximum of 6 credits of which can be in Special Topics courses, and a maximum of 6 credits of which can be in Internship courses:

- LEGS 4050  Advanced Practices in Criminal Law (3 credits)
- LEGS 4060  Debtor and Creditor Relations (3 credits)
- LEGS 4470  Emerging Technologies and the Legal Profession (3 credits)
- LEGS 4560  Elder Law (3 credits)
- LEGS 4600  Pleadings and the Courts (3 credits)
- LEGS 4700  Immigration Law (3 credits)
- LEGS 4900  Special Topics in Paralegal Studies (3 credits)
- LEGS 4950  Internship in Paralegal Studies (3 credits)

**Minors**

**Law, Science, and Technology Minor**

The minor prepares students in non-legal majors to understand the rules and policies that govern creative work in the arts and industrial works in computer science, business, technology and health industries. The minor provides a strategic advantage for candidates entering into these professional fields. The minor develops the students’ critical reasoning and communication skills while introducing the building blocks of the twenty-first century creative economy. This minor can be combined with any major and minor except the paralegal studies major and paralegal studies post-baccalaureate certificate.

Although this minor is offered by the College of Law, only the professional J.D. degree prepares students for the practice of law and only the undergraduate major in Paralegal Studies or the Paralegal Postbaccalaureate Certificate provide students the training to become a paralegal.

**Law, Science, and Technology Minor Requirements (18 credits)**

- LEGS 1150  Introduction to Law and the Legal Profession (3 Credits)
- LEGS 3600  Federal Privacy Law (3 Credits)
- LEGS 3601  Introduction to Intellectual Property (3 Credits)
- LEGS 3602  Social Values for Law, Science, and Technology (3 Credits)
- LEGS 3603  Electronic Commerce and Digital Trade (3 Credits)
- LEGS 3604  Cyber Law and Modern Mass Communications Policy (3 Credits)

**Paralegal Studies Minor**

The paralegal studies minor is designed to introduce students to the most common areas of law encountered in a legal and business context. The minor is not designed to encompass the entire range of skills needed in the paralegal profession. It is not a program for training paralegals and is not approved by the American Bar Association. The minor is an enhancement for those students pursuing other law-related careers or business careers and who desire to understand the federal and state legal systems to broaden their legal knowledge and skills. This minor can be combined with any major and minor except the paralegal studies major and paralegal studies post-baccalaureate certificate.

Current NSU students pursuing a non-paralegal studies undergraduate degree can concurrently register for the Post-Baccalaureate Certificate in Paralegal Studies.

**Paralegal Studies Minor Requirements (18 credits)**

LEGs courses offered online require proctored exams at approved sites.

**Core Courses (6 credits)**

- LEGS 1150  Introduction to Law and the Legal Profession (3 credits)
- LEGS 2100  Legal Research and Writing I (3 credits)
Minor Electives (12 credits)
Select 12 credit from the following courses:
- LEGS 3050  Criminal Law and Procedure (3 credits)
- LEGS 3260  Real Estate Practice I (3 credits)
- LEGS 3300  Torts and Civil Litigation (3 credits)
- LEGS 3360  Wills, Trusts, and Estates I (3 credits)
- LEGS 3400  Business Relations and Organizations (3 credits)
- LEGS 3550  Family Law (3 credits)

Certificate Program

POST-BACCALAUREATE CERTIFICATE IN PARALEGAL STUDIES

The Post-Baccalaureate Certificate in Paralegal Studies program is approved by the American Bar Association (ABA). A paralegal, as defined by the American Bar Association, is “a person, qualified by education, training or work experience, who is employed or retained by a lawyer, law office, corporation, governmental agency, or other entity, and who performs specifically delegated substantive legal work for which a lawyer is responsible.” The goal of the program is to prepare students for entry-level paralegal positions in the common areas of law practice. Paralegals are nonlawyers and therefore are prohibited from the unauthorized practice of law. This program trains paralegals and is not a program for training lawyers or legal administrators.

Students in this post-baccalaureate certificate program in Paralegal Studies are required to submit a paralegal portfolio at an exit interview with the program chair prior to certificate conferral. LEGS courses offered online require proctored exams at approved sites. The American Bar Association requires that a minimum of 9 semester credits of coursework be taken in synchronous format. This certificate can be pursued by non-paralegal baccalaureate students either subsequent to or simultaneously with a non-paralegal undergraduate degree. The baccalaureate degree must be awarded prior to the award of the Post-Baccalaureate Certificate in Paralegal Studies.

Students admitted to the Post-Baccalaureate Certificate in Paralegal Studies program may transfer up to 12 credits of “legal specialty” courses taken at an American Bar Association approved program. A course considered for transfer must have been taken no longer than five years prior to entry into the Paralegal Studies Post-Baccalaureate Certificate program, must be substantially similar to an existing NSU paralegal studies course, must have been passed with a grade of “C” or higher, and must be approved by the paralegal studies program coordinator.

Current NSU students pursuing a non-paralegal studies undergraduate degree can concurrently register for the Post-Baccalaureate Certificate in Paralegal Studies.

Paralegal Studies Post-Baccalaureate Certificate Learning Outcomes:
A successful paralegal studies post-baccalaureate certificate graduate is expected to:
1. Explain the basic theories, doctrines, concepts, and associated principles that comprise the knowledge base of law, with specific emphasis on torts, contracts, wills and trusts, civil procedure, litigation, family law, business organizations, real estate, and criminal law;
2. Demonstrate basic legal research and critical thinking skills used to categorize, organize, prioritize, and evaluate legal issues;
3. Prepare documents (e.g., memos, case briefs, correspondence, and pleadings) that meet professional legal standards.

LEGS 3550 Family Law (3 credits)
Any 4000-level LEGS course (3 credits)

Federal Disclosures:
Visit law.nova.edu/paralegal-certificate/ for details on this certificate program, including occupations the program prepares students to enter; on-time graduation rates; expected program lengths; tuition and fees; typical costs for books, supplies, room and board; post-completion job placement rate; and students’ median loan debt.
Course Descriptions
Undergraduate Course Descriptions

This section lists courses offered at Nova Southeastern University. Refer to the appropriate college or school section for curriculum requirements. Course descriptions for graduate courses in the R.N. to M.S.N. program may be found in the Health Professions Division catalog.

**ACT—Accounting**

**ACT 2020 Foundations of Accounting 1 (3 credits)**
This course integrates the accounting decision making process with the planning, coordinating, and control functions of the organization. Topics include strategic, tactical, and operational planning and decision making, responsibility accounting, and performance control measures. *Prerequisite:* MATH 1030 or higher. *Frequency:* Every Fall and Winter

**ACT 2030 Foundations of Accounting 2 (3 credits)**
Provides a continuation of accounting foundations through financial accounting and its decision-making elements. Areas covered are the business activities captured through financial accounting, the financial statements, and financial analysis. *Frequency:* Every Fall and Winter

**ACT 3030 Cost Management (3 credits)**
Students learn cost measurement techniques in the manufacturing and service sectors. Using a strategic approach, the course examines the design and operation of cost accounting systems in both traditional and advanced manufacturing environments. *Prerequisite:* ACT 2020 and ACT 3050. *Frequency:* Every Winter.

**ACT 3050 Intermediate Accounting I (3 credits)**
Study the conceptual framework of accounting and the development of the balance sheet and income statement. Examine the concepts underlying the valuation of current and noncurrent assets and current liabilities. Cover the recognition and measurement of Income. *Prerequisite:* ACT 2030. *Frequency:* Every Fall.

**ACT 3060 Intermediate Accounting II (3 credits)**
Continuation of Intermediate Accounting I. Study of long-term liabilities (including bonds, pensions, and leases), inter-period tax allocation, owners’ equity, and earnings per share. *Prerequisite:* ACT 3050. *Frequency:* Every Winter.

**ACT 3070 Intermediate Accounting III (3 credits)**
This course continues the analysis of the accounting principles used to generate financial statements. Topics covered include an investigation of stockholder’s equity, earnings per share, the statement of cash flows, investments, derivatives, and accounting changes and error correction. *Prerequisite:* ACT 3060. *Frequency:* Every Fall.

**ACT 3150 Business Law for Accountants (3 credits)**
A survey course focusing on the legal aspects of business decision-making, including torts, contracts, Uniform Commercial Code, and debtor/creditor law. The course provides students with an understanding of the role of legal rules and their impact on business. Students learn through assignments that teach them to analyze issues and appreciate the philosophy behind court decisions. The course focuses on those areas of business law that are necessary for successful completion and passing of the CPA exam. *Prerequisites:* MGT 2150, ACT 2020, and ACT 3050. *Frequency:* Every Winter.

**ACT 3900 Accounting Internship (3 credits)**
The Huizenga College internship fosters learning through the application of classroom theory in the workplace. During the course, the student also focuses on practical career skills and personal professional goals with individual guidance from the professor. The minimum work requirement is 180 hours during one semester (16 weeks). Contact Academic Advising for registration. *ACADEMIC REQUIREMENTS:* good academic standing, GPA of 2.5 or higher, and completion of at least 36 credit hours. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. *Frequency:* Every Fall and Winter.

**ACT 3910 Special Topics in Accounting (3 credits)**
Topics in accounting that are not included in a regular course offerings. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. *Frequency:* Upon request and see academic department chair.

**ACT 4010 Advanced Accounting (3 credits)**
Study of accounting principles and practices related to business combinations (accounting for mergers and acquisitions, constructing consolidated financial statements), foreign operations (recording foreign currency transactions and hedging exchange risk, currency translation of foreign subsidiary financial statements), and local governments. Examination of the cash flow statement and accounting changes. *Prerequisite:* ACT 3070 or equivalent. *Frequency:* Every Winter.

**ACT 4050 Accounting Information Systems (3 credits)**
Examines the design, construction, and operation of accounting information systems. Information theory, database construction, computer hardware and software selection, and internal control are also covered. Corequisites: ACT 3070. Experiential Education and Learning (ExEL): Successful completion of this course at Nova Southeastern University satisfies 1 ExEL unit. *Frequency:* Every Fall.

**ACT 4210 Auditing I (3 credits)**
Provides an overview of basic auditing concepts, auditing standards, and audit programs. Special emphasis is given to preparing the student for the auditing section of the CPA examination. *Prerequisite:* ACT 3060 Corequisite: ACT 4050. *Frequency:* Every Winter

**ACT 4920 Advanced Special Topics II (3 credits)**
Examines advanced topics in accounting that are not included in regular course offerings. Specific content and prerequisites may vary. Students may re-enroll for special topics covering different content. *Frequency:* Upon request see academic Department Chair

**ACT 4966 Travel Study in Accounting (3 credits)**
This travel study course aims to provide students with a thorough understanding and firsthand look at a specific area of the world through the lenses of business, finance and accounting. Students will be introduced to the challenges organizations face when working in the specific country of travel. The course is taught using a combination of in-country and pre-arrival lectures, company visits, and presentations.

**ACT 4990 Independent Study in Accounting (3 credits)**
The student works independently under the guidance of a faculty member to learn more about a subject area for credit. Faculty supervision is provided on an individual basis. *Prerequisite:* To be determined by the faculty and department chair. *Frequency:* Upon request and see academic department chair.

**ANTH—Anthropology**

**ANTH 1020 Introduction to Anthropology (3 credits)**
This course is an interdisciplinary examination of the ways in which anthropologists study people and their ways of life across cultures and across time. The four major fields of anthropology will be introduced with an overview of each of the following perspectives: cultural anthropology, biological anthropology, archaeology, and linguistics. Frequency: Every Fall and Winter.

**ANTH 2300 Cultural Anthropology (3 credits)**

The course compares and contrast cultures, the ways people live, through an anthropological lens. It will include examination of how humans create and transmit culture and cultural artifacts. Analysis of how humans view cultures other than their own and the ways in which this impacts the study of anthropology will also be addressed. Prerequisite: ANTH 1020 Frequency: Even Year Winter.

**ANTH 3100 Biological Anthropology (3 credits)**

Biological anthropology is the study of evolution, ecology, and behavior of all primate populations (extant and extinct) including humans. The goal of this course is to explore the origins of humanity and breadth of primate diversity as demonstrated through genetic, bio archaeological, comparative anatomical, and primatological contexts. Throughout the semester this course will utilize classic and modern peer-reviewed publications, textbook readings, and digital media to reinforce the key concepts within the field of biological anthropology including an overview of its subdisciplines which include paleoanthropology, paleopathology, biomedical anthropology, and forensics. This course does not include laboratory sessions. Frequency: Every Winter.

**ANTH 4900A Special Topics in Anthropology A: Myth, Ritual, and Mysticism (3 credits)**

This course will use selected case studies and readings to explore myths, rituals, mystical beliefs and frameworks that are held and observed by divergent ethnic and cultural groups over time. The course will explore how and why various cosmologies and worldviews are established, maintained, modified, and changed from anthropological perspectives. Prerequisite: ANTH 1020 or SOCL 1020

**ANTH 4950B Internship in Anthropology B (1-3 credits)**

This course is a 10-20 hour per week, paying or nonpaying work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of academic director. Frequency: Every Fall and Winter.

**APRS—Appl Professional Studies**

**APRS 2901 Professional Planning (3 credits)**

This course is designed to introduce students to the applied professional studies major. In this course students are introduced to multidisciplinary of applied professional studies. The course assists students in developing a career plan and in creating a course plan that will comprise their major and will help them develop the rationale that links the concentrations into a coherent program. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

**APRS 4901 Applied Professional Studies Portfolio (3 credits)**

Students complete a professional portfolio illustrating their program focus under the guidance of the instructor. This portfolio assists students in developing market-ready materials and industry-specific networks. Prerequisites: APRS 2901 and the completion of 27 credits in the major.

**ARAB—Arabic**

**ARAB 1210 Elementary Arabic I (3 credits)**

Essentials of Arabic language with emphasis on grammar, vocabulary, writing, and oral skills. Introduction to Arab culture. Not open to native speakers. Frequency: Every Fall and Winter.

**ARAB 1220 Elementary Arabic II (3 credits)**

Continuation of the essentials of Arabic language with emphasis on grammar, vocabulary, writing, and oral skills. Introduction to Arab culture. Not open to native speakers. Prerequisite: ARAB 1210. Frequency: Every Winter.

**ARTS—The Arts**

**ARTS 1000 Art and Society (3 credits)**

This course examines the ways in which artists and the arts have influenced Western society from the Renaissance to the 20th century, focusing on painting, sculpture, architecture, music, dance, and film. Students will also visit local museums and attend musical and theatrical events as a means of gaining a greater understanding of the arts. Frequency: Every Fall and Winter.

**ARTS 1200 Introduction to Drawing (3 credits)**

This course will emphasize the development of drawing and observational skills. Students will learn to effectively use various studio materials and drawing techniques while representing form and space on a two-dimensional plane. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

**ARTS 1250 Life Drawing (3 credits)**

This course will examine the anatomy, proportion and movement of the living form using live and skeletal models. Beginning with skeletal and muscular studies, the students will develop detailed drawings exploring gesture, movement and structure. Students will also learn historical and contemporary depictions of living forms.

**ARTS 1700 Fundamentals of Color (3 credits)**

This course will explore the basic principles of photography and digital imaging. Camera operation, exposure, effect of the shutter and aperture, composition for impact, lens selection, and the qualities of light will be covered. Frequency: Every Fall and Winter.

**ARTS 2100 Painting I (3 credits)**

This course explores painting as a studio medium emphasizing the practice of painting and compositional skills. Students will represent form and space on a two-dimensional plane and utilize traditional and contemporary techniques while examining the history and aesthetics of various painters and styles. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: ARTS 1200. Frequency: Winter.

**ARTS 2200 Digital Photography (3 credits)**

This course will explore the basic principles of photography and digital imaging. Camera operation, exposure, effect of the shutter and aperture, composition for impact, lens selection, and the qualities of light will be covered. Frequency: Every Fall and Winter.

**ARTS 2300 Art and Society (3 credits)**

This course examines the ways in which artists and the arts have influenced Western society from the Renaissance to the 20th century, focusing on painting, sculpture, architecture, music, dance, and film. Students will also visit local museums and attend musical and theatrical events as a means of gaining a greater understanding of the arts. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall and Winter.

**ARTS 2300H Art and Society Honors (3 credits)**

This course examines the ways in which artists and the arts have influenced Western society from the Renaissance to the 20th century, focusing on painting, sculpture, architecture, music, dance and film. Students will also visit local museums...
and attend musical and theatrical events as a means of gaining a greater understanding of the arts. (Honors students only). Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Year Fall.

**ARTS 2410 Graphic Design I (3 credits)**
This course provides an introduction to graphic design. The computer is introduced as a graphic design problem-solving tool. Students will use current industry-standard software and technology to create designs based on graphic design principles. Through various assignments, students will become familiar with the operation of the personal computer while exploring the visual language of text, image, and digital design. The course will familiarize students with basic aesthetic, technical, historical and conceptual issues as they relate to design. Frequency: Every Fall and Winter.

**ARTS 2450 Graphic Design II (3 credits)**
This course will focus on the understanding of the design process and developing effective graphic design concepts for a variety of formats, with an emphasis on form, content, and principles of design and layout composition. Students will further their knowledge of industry-standard computer software as applied to various formats of visual communication. Prerequisite: ARTS 2410. Frequency: Every Winter.

**ARTS 2600 Introduction to Arts Administration (3 credits)**
Description: This course introduces basic principles, theories, concepts, processes and practices relating to organizations in the arts industry. Emphasis will be placed on the structure of the arts industry, leadership in the arts industry, staffing, volunteerism, fundraising, and intellectual property. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

**ARTS 2900 Three-Dimensional Design/Sculpture (3 credits)**
In this course, students will further develop their understanding of basic design principles in a three-dimensional form. Students will explore processes, materials and sculpting techniques through the function of space, plane, scale, line, volume and mass. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Frequency: Every Winter.

**ARTS 3020 Women in the Arts (3 credits)**
A study of the particular contributions of women in art, music, theatre, and dance. Prerequisites: One ARTS course and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Year Winter.

**ARTS 3040 Museum Studies and Gallery Practices (3 credits)**
This course offers an investigation of the many characteristics of museum and gallery management including hands-on participation in Gallery 217’s ongoing productions. Students will gain experience with exhibition research, design, development, and management. Additionally, students will have a real-world application to the continued operations and/or programs of Gallery 217. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Prerequisites: COMP 2000 or COMP 2020 or COMP 2000H and any 1000 or 2000 level ARTS course. Frequency: Every Fall.

**ARTS 3100 Painting II (3 credits)**
This course will continue the study and practice of painting. Students will develop an individual creative direction working thematic projects in oils, acrylics, and mixed media. Students are expected to develop a command of both technical and conceptual components of painting related to both the studio practices and the history of painting. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Prerequisite: ARTS 2100. Frequency: Odd Year Fall.

**ARTS 3200 Digital Photographic Design (3 credits)**
This course provides the skills and concepts required to develop professional-quality illustrations, and photo manipulations. The focus of the course will be on both technical and aesthetic issues, and the relationship of image manipulation to different graphic design formats. Prerequisite: ARTS 2200. Frequency: Odd Year Fall.

**ARTS 3450 Graphic Design III (3 credits)**
Students explore the underlying principles of grid theory, text and display typography, sequence, page layout, and type and image integration as they relate to a range of publication design applications. Prerequisite: ARTS 3650. Frequency: Even Year Winter.

**ARTS 3550 Ceramics I (3 credits)**
Students will create pottery, using multiple techniques such as hand building as well as throwing on the potter's wheel. Students will apply ceramic glazes and firing procedures in order to produce finished ceramic ware. The course will also include some discussion of the historical development of the ceramic arts. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Prerequisite: Any 1000 or 2000 level ARTS course. Frequency: Even Year Fall.

**ARTS 3600 Advanced Arts Administration (3 credits)**
This course applies the basic principles, theories, concepts, processes and practices of arts administration to the creation and management of various types of arts organizations. Particular emphasis will be placed on audience development, special event planning, program planning, financial planning, proposal writing, grant writing and advocacy. Prerequisites: ARTS 2600 and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Year Winter.

**ARTS 3650 Typography (3 credits)**
This essential course explores the fundamentals of typography including the history, theory and practical employment of type. Through a variety of challenging and informative projects, the creative function of type as an illuminative graphic design element will be examined. Prerequisite: ARTS 2410. Frequency: Every Fall.

**ARTS 3700 Methods and Materials (3 credits)**
Through a practical exploration of theoretical/conceptual issues, students will become aware of the complexity and interrelatedness of the elements of art. Students complete a series of studio projects emphasizing the awareness, creative use, and practical application of various materials as a formal means of visual communication and expression. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Prerequisite: ARTS 1200. Frequency: Even Year Winter.

**ARTS 3750 Printmaking (3 credits)**
In this course, students will learn a variety of printmaking techniques and gain an understanding of the distinctive nature of printmaking including: tools, inks, paper, plate preparation, registration, printing processes and qualities of prints e.g. overlays, transparency, offset, and multiple images. Students will produce multiple images by hand printing and working on a press while exploring personal visual expression. Class sessions are comprised of independent and collaborative printing, lectures, demonstrations, discussions, and critique. Additionally, students will be introduced to the work of influential printers and the history/tradition of printmaking. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Prerequisite: ARTS 1200 or ARTS 1800 or ARTS 2410. Frequency: Even Year Fall.

**ARTS 3800 Art History I (3 credits)**
This course introduces students to the historical developments in artistic expression from the Prehistoric to Renaissance period. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Prerequisites: COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Year Fall.

**ARTS 3850 Art History II (3 credits)**
This course introduces students to the historical developments in artistic expression from the sixteenth century to the present. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Prerequisites: COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Odd Year Fall.

**ARTS 4400 Installation Art (3 credits)**
This course explores site specific and non-site specific installation art. Through historical study, students may incorporate a variety of media.
including photographs, paintings, drawings, video performances, and sound and sculptural materials in works that expand the physical boundaries of art. Students are introduced to techniques for documenting the installation project. Prerequisite: ARTS 3700. Frequency: Upon request; contact academic program.

ARTS 4500 Professional Print Design (3 credits)
The focus of this course is on multiple page documents and extended design systems. Students will create professional print design projects that reflect the range of work designers encounter in the studio, agency, or corporate design environment. Print production techniques will be investigated. Prerequisite: ARTS 2450. Frequency: Every Year Fall.

ARTS 4900 Special Topics in the Arts (3 credits)
This course is designed for students with an interest in a particular period or genre of art, music, or theatre, specific artist, composers, dramatists, or topics not covered in other art, music, or theatre courses. Specific focus to be announced. May be repeated once for credit if content changes and with permission of academic program. Prerequisites: One ARTS course and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4900A Special Topics in the Arts: Handmade Books (3 credits)
This art studio course visually examines traditional and alternative book structures in relationship to narrative content. Lectures and demonstrations introduce students to creative processes involved in book making, including traditional and alternative book formats, adhesives and sewn binding structures, archival concerns, and methods for generating original images and text. Prerequisites: One ARTS course and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4950 Internship in the Arts (3 credits)
Training and practice at a professional arts venue. Consult academic program for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; one ARTS course; COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4990A Independent Study A (1-4 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; one ARTS course; COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4990A Independent Study A (1-4 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; one ARTS course; COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4990A Independent Study A (1-4 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; one ARTS course; COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4990A Independent Study A (1-4 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; one ARTS course; COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4990A Independent Study A (1-4 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; one ARTS course; COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4990A Independent Study A (1-4 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; one ARTS course; COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ARTS 4990A Independent Study A (1-4 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; one ARTS course; COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ATTR—Athletic Training

ATTR 1100 Introduction to Athletic Training (3 credits)
This course is an introduction to the sports medicine team, legal considerations, environmental concerns, and the profession of athletic training. Students will be able to promote athletic training as a professional discipline in order to educate athletes, the general public, and the physically active. This course includes a minimum of 50 hours of scheduled clinical observations at an approved site, under the supervision of a Certified Athletic Trainer. Prerequisites: COMP 1000 or equivalent or SAT Verbal score of 520, ACT English score of 22, a TOEFL score of 650 (paper) or 280 (computer), a passing Writing Challenge Exam. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

ATTR 1200 Principles of Athletic Training (4 credits)
Emphasis will be on the basic concepts of preventing athletic injuries, injury recognition and assessment, and care and treatment procedures for proper management of athletic injuries. Additionally, students will be instructed in the arts and skills of taping and wrapping. This course includes a minimum of 50 hours of scheduled clinical observations at an approved clinical site, under the supervision of a Certified Athletic Trainer. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Winter.

ATTR 1201 Exercise and Sport Medicine (3 credits)
This course is designed to introduce the student to prevention, recognition, and acute care management techniques for athletic related injuries. Time will be spent addressing the art and science of appropriate taping and wrapping techniques for athletic injuries. Frequency: Fall and Winter.

ATTR 1300 Emergency Care and First Aid (3 credits)
Students will learn to recognize, assess, and treat the acute injuries and illnesses of athletes and others involved in physical activities, preventing disease transmission, emergency care of injuries such as splinting, and to provide proper medical referral. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

ATTR 1400 Health and Fitness (3 credits)
This course will provide students with the basic concepts of health, such as nutritional issues, physiological concerns, and wellness screening. Students will also gain an appreciation for lifetime fitness activities and an understanding of how community programs provide necessary health services to the general public. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

ATTR 2100 Injury Evaluation I (4 credits)
Emphasis will be on recognition, assessment, treatment, and appropriate medical referral of athletic injuries and illnesses of the lower extremities including the head and the lumbar spine. Additional emphasis will be placed on the psychosocial aspects of injury and illness. Only for students matriculated in the Athletic Training Education Program. Prerequisite: ATTR 1200. Frequency: Every Fall.

ATTR 2200 Injury Evaluation II (4 credits)
Emphasis will be on recognition, assessment, treatment, and appropriate medical referral of athletic injuries and illnesses of the upper extremities, including the head and cervical spine. Additional emphasis will be placed on clinical evaluation skills. Only for students matriculated in the Athletic Training Education Program. Prerequisite: ATTR 2100. Frequency: Every Winter.

ATTR 2300 Sports Nutrition (3 credits)
This course includes the study of nutrition, biochemical processes in energy metabolism, and nutrition-related health problems. Additional emphasis will be placed on nutrition as it relates to physical performance, sports, and fitness. Prerequisite: ATTR 1400. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.
ATTR 2400 Strength and Conditioning (3 credits)
Strength and Conditioning: This course includes the study of the varied aspects of strength and conditioning in a variety of sports. In addition to learning and practicing strength training techniques, students will design a conditioning program and explain their program to their peers. **Prerequisite:** ATTR 1400. **Frequency:** Every Fall and Winter. **Experiential Education and Learning (ExEL):** Successful completion of this course satisfies 1 ExEL unit.

ATTR 2610 Athletic Training Clinical I (3 credits)
This course focuses on field experiences and the application of learned principles from athletic training clinical skills. This course includes 200 hours of observation in various settings and specific clinical skills from ATTR 1200 to facilitate comprehensive learning. Students will be supervised and given the opportunity to practice learned skills in the clinical setting. Only for students matriculated in the Athletic Training major. **Frequency:** Every Fall.

ATTR 2620 Athletic Training Clinical II (3 credits)
This course focuses on field experiences and the application of learned principles from athletic training clinical skills. This course includes 200 hours of observation in various settings and specific clinical skills from ATTR 2610 to facilitate comprehensive learning. Students will be supervised and given the opportunity to practice learned skills in the clinical setting. Only for students matriculated in the Athletic Training major.

ATTR 3100 General Medicine in Sports (3 credits)
Students will acquire skills and knowledge on the recognition, treatment, and referral of general medical conditions related to each of the body systems, including but not limited to congenital and acquired abnormalities of athletes and other physically active individuals. Also included are physiological progression of injuries, illnesses, and diseases. An additional area of focus is related to pathology, medical diagnostics, medical interventions (pharmacological and procedural), and the implications of these for the athlete or others involved in physical activities. **Prerequisites:** ATTR 2220 or ATTR 2620 and BIOL 3312 or BIOL 3320. **Frequency:** Every Fall.

ATTR 3300 Therapeutic Modalities/Lab (4 credits)
A study of sports therapy physical agents used to treat injuries of the musculoskeletal, neuromuscular, and integumentary systems including, but not limited to cryotherapy, hydrotherapy, electrotherapy, biofeedback, and mechanical therapy. Students will apply the techniques and clinical skills related to the application of therapeutic modalities. Clinical hours in the athletic training room and other facilities (see Clinical Experience I through IV) will give the student the additional opportunity to use the knowledge, skills, and techniques learned in this course. Only for students matriculated in the Athletic Training Education Program. **Prerequisite:** ATTR 2100. **Frequency:** Every Winter.

ATTR 3500 Rehabilitation of Athletic Injuries/ Lab (4 credits)
The study of the principles of a comprehensive rehabilitation program; specifically related to design and implementation of a therapeutic program. Students will learn to incorporate exercises related to strength, proprioception and neuromuscular control to achieve sport specific goals and objectives. Students will assess rehabilitation progress and criteria for return to competition. **Prerequisite:** ATTR 3300. **Frequency:** Every Fall.

ATTR 3630 Athletic Training Clinical III (3 credits)
This course focuses on field experiences and the applications of learned principles from athletic training clinical skills. This course includes 150 hours of observation in various settings and specific clinical skills from the previous semester to facilitate comprehensive learning. Students will be supervised and given the opportunity to practice learned skills in the clinical setting. Only for students matriculated in the Athletic Training major.

ATTR 3640 Athletic Training Clinical IV (3 credits)
This course focuses on field experiences and the applications of learned principles from athletic training clinical skills. This course includes 150 hours of observation in various settings and specific clinical skills from the Nova Southeastern University Undergraduate Student Catalog. **Frequency:** Every Winter.

ATTR 3640 Athletic Training Clinical IV (3 credits)
This course focuses on field experiences and the applications of learned principles from athletic training clinical skills. This course includes 150 hours of observation in various settings and specific clinical skills from the Nova Southeastern University Undergraduate Student Catalog. **Frequency:** Every Winter.

ATTR 3640 Athletic Training Clinical IV (3 credits)
This course focuses on field experiences and the applications of learned principles from athletic training clinical skills. This course includes 150 hours of observation in various settings and specific clinical skills from the Nova Southeastern University Undergraduate Student Catalog. **Frequency:** Every Winter.

ATTR 4900 Special Topics in Athletic Training (1-3 credits)
Topics in sports medicine and athletic training that are not included in a regular course offering. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Students may reenroll for Special Topics covering different content. **Frequency:** Every Fall and Winter.

ATTR 4900A Special Topics in Athletic Training: Capstone in Athletic Training (1 credits)
This course prepares Athletic Training students to take the Board of Certification Inc. (BOC) Exam to earn the credential for an Athletic Trainer. Students will review didactic knowledge from previous courses in the Athletic Training Education Program. In addition to didactic material, this course will provide athletic training students with online testing similar to the Board of Certification Computer Based Examination consisting of multiple choice and hybrid questions. **Prerequisite:** ATTR 3630. **Frequency:** Every Fall and Winter.

ATTR 4950 Internship in Athletic Training (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. **Prerequisites:** cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director.

ATTR 4950A Internship in Athletic Training (A) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. **Prerequisites:** cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. **Frequency:** Every Fall and Winter.

ATTR 4950B Internship in Athletic Training (B) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. **Prerequisites:** cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. **Frequency:** Every Fall and Winter.

ATTR 4950C Internship in Athletic Training (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. **Prerequisites:** cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. **Frequency:** Every Fall and Winter.

ATTR 4950C Internship in Athletic Training (C) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. **Prerequisites:** cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. **Frequency:** Every Fall and Winter.
major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Every Fall and Winter.

ATTR 4950D Internship in Athletic Training (D) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Every Fall and Winter.

ATTR 4990 Independent Study in Athletic Training (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and the division director. Frequency: Every Fall and Winter.

ATTR 4990A Independent Study in Athletic Training (A) (1-4 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Equivalent: ATTR 4990B; ATTR 4990C. Frequency: Every Fall and Winter.

ATTR 4990B Independent Study in Athletic Training (B) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Frequency: Every Fall and Winter.

ATTR 4990C Independent Study in Athletic Training (C) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Frequency: Every Fall and Winter.

BHS—Bachelor of Health Science

BHS 3101 History of the US Health System (3 credits)
This course will examine the origins and ongoing development of the US health system. Students will gain historical understanding of the origins and forces that have influenced change within the US health care system. Frequency: Every Fall and Summer I.

BHS 3110 Health Care Ethics (3 credits)
This course is designed to introduce ethical thinking and concepts regarding health care to prepare the student with the essential vocabulary and thought processes to understand, evaluate and participate in ethical decision making. Students will be introduced to the idea that ethical problems are largely a matter of reason and that progress toward solutions can be gained through an application of normative ethical (philosophical) theory. Frequency: Every Spring, Every Summer I, Every Fall and Every Winter.

BHS 3120 Introduction to Epidemiology (3 credits)
The purpose of this course is to introduce the history and development of epidemiology in relation to public health and disease. Communicable, epidemic and endemic as well as social diseases will be discussed. Frequency: Every Summer I, Every Fall and Every Winter.

BHS 3130 Research and Design for Health Care (3 credits)
This course is designed as an introduction to basic research methods in health care. The student should gain an understanding of current, ongoing research in the field of health services. Research design and program evaluation will be discussed with emphasis on practical applications in health care settings. Every Winter.

BHS 3140 Health Care Practice (3 credits)
The purpose of this course is to study the legal implications of licensing, practice, and contractual employment. The importance of understanding rules of practice and standards of care are discussed. Frequency: Every Fall and Every Winter.

BHS 3145 Principle of Environmental Health (3 credits)
This course will introduce students to the principles of environmental health and their importance to human populations. Some of the topics covered include Environmental Quality, Occupational Health, Vector-borne and Pandemic Diseases, and Hazardous Materials Management, and the regulations promulgated to manage each. Prerequisite: COMP 1500. Frequency: Every Winter and Every Summer I.

BHS 3150 Current Issues in Health Care (3 credits)
This course discusses current issues and concepts regarding health care to prepare the student with the essential vocabulary and thought processes to understand and evaluate the legal, political and ethical challenges facing health care in the US. Frequency: Every Winter and Every Summer I.
BHS 3150 Principle of Leadership (3 credits)
This course will provide an overview of numerous leadership theories to prepare the student for a leadership role in Health Care. The course will critically analyze the differences between leadership and management. Frequency: Every Summer I, Every Fall and Every Winter.

BHS 3151 Health Services Management (3 credits)
This course will provide an overview of health care and general management to prepare the student for a managerial role in Health Care administration. Course topics include human resource issues and policy, personnel planning, staffing, development, coaching and training of employees. Frequency: Every Summer I and Every Fall.

BHS 3155 Conflict Resolution in Health Care (3 credits)
The purpose of this course is to develop an understanding of conflict and effective conflict resolution strategies that increase personal achievement and create collaborative relationships in the workplace. A variety of health care disputes including employee-employee conflict, supervisor-subordinate conflict, patient-patient conflict, and patient/client-provider conflict are analyzed. Frequency: Every Fall.

BHS 3160 Health Policy (3 credits)
This course provides the student with a broad understanding of Health Policy, how health care is organized, and how the practitioner can better work in the system. The focus will be on policy issues of population health and its determinants, access to care, and its impact on health. Students receive an introduction to key features in the US health care system, and will examine issues of rising health care costs and the quality of the care given. Frequency: Every Summer I, Every Fall and Every Winter.

BHS 3161 Concepts in Health Care Finance (3 credits)
The course introduces the fundamental tools, concepts, and applications aimed at providing students an understanding of numerous financial theories and techniques utilized in health care financial management. The course materials are structured around emerging health care policies and the role finance and economics play in establishing policy. Cases studies are drawn from a variety of sources such as health maintenance organizations, home health agencies, nursing units, hospitals, and integrated health care systems. Some topics of discussion also include: concepts of capital financing for providers, budgeting, financial ethics, payment systems, provider costs, high cost of health care, and measuring costs. Frequency: Every Summer I, and Every Fall.

BHS 3162 Economics of Health Services (3 credits)
This course will teach the student to use economic analysis to understand critical issues in health care and health policy. Issues to be studied include the demand for health care, health insurance markets, managed care, medical technology, government health care programs, national health reform, and the pharmaceutical industry. The course will focus on the US health care sector, but will also examine health care systems of other countries. Frequency: Every Winter and Every Summer I.

BHS 3170 Health Care Delivery Systems (3 credits)
The purpose of this course is to provide an overview and analysis of American health care delivery systems. An understanding of the economical, social, political and professional forces that shape the health care delivery system will be discussed as well as an examination of how the system is organized, how services are delivered, and the mechanisms by which health care services are financed. Frequency: Every Winter and Every Summer I.

BHS 3180 Interprofessional Collaboration (3 credits)
The purpose of this course is to explore interprofessional health care relationships and communication approaches for effective teamwork and collaboration. Looking at behaviors in teamwork and communication for collaboration to prevent gaps in communication during transitional points. Fundamentals of teamwork and communication using the Interprofessional Education Collaborative (IPEC) Core Competencies for Interprofessional Collaborative Practice. Pre-requisite or Corequisite: BHS 3000 Frequency: Every Fall and Winter.

BHS 3190 Patient Education in Health Care (3 credits)
Patient education is an integral part of health care in every setting, from patient treatment, to health and wellness promotion, to injury and illness prevention. The focus of this course is to explore the many issues that impact patient education, from both a health care professional and management perspective. Adult education theory, patient/therapist interaction, communication barriers, strategies for success, web-based patient education, documentation, federal laws and initiatives and standards for patient education are some of the topics that will be examined. Frequency: Every Winter.

BHS 3195 Therapeutic Communications for Health Care Professionals (3 credits)
This course covers a variety of general concepts and contemporary discussions in the area of therapeutic communications. Attention is paid to self-awareness, basic communication skills, and therapeutic responses from all health care professionals. Frequency: Every Winter and Every Summer I.

BHS 4000 Cultural Competency in Health Care (3 credits)
The purpose of this course is to develop competency and better understanding when confronted with issues related to culture, diversity and ethnically based customs, rituals, alternative health care choices, folk medicine, cultural structure and viewpoints and the practitioner’s delivery of health care. Frequency: Every Summer I, Every Fall and Every Winter.

BHS 4001 Individuals with Disabilities and Special Needs (3 credits)
With the continued graying of the American population and the extending life expectancy of individuals with disabilities there are a growing number of individuals facing chronic life challenges. These individuals are consumers of health care. It is incumbent on health care providers to understand how different challenges affect a person’s abilities. Topics of discussion include: laws that impact services, the history of disability care, and specific disabilities and their impact on functioning. Frequency: Every Winter and Every Fall.

BHS 4005 Alternative Medicine in Health Care (3 credits)
This course examines and analyzes alternative and complimentary medicine and their impact on the healthcare industry. The approach to the subject is to present selected alternative and complimentary medicine fields in an informative, non-judgmental format. Example topics include acupuncture, chiropractic, herbal medicine, homeopathy, massage and naturopathic medicine. Frequency: Every Winter, and Every Fall.

BHS 4006 Fundamentals of Chinese Medicine (3 credits)
This course will discuss and analyze the impact, origins and background of Chinese medicine. It is important to enter this class with an open mind, and understand that there are other forms of treatment for disease, different than those taught in westernized medicine programs. Critical analysis of the meridians and pathways and various signs and symptoms associated with disease will be covered. Frequency: Every Winter.

BHS 4009 Sports Medicine: Principles and Practice (3 credits)
This course will present a study of athletic injuries and the principle concepts and practices of Sports Medicine - including discussion of;
BHS 4010 Health Promotion and Disease Prevention (3 credits)
This course develops the knowledge and skills needed to work with communities to improve health status of the community. Major topics will include health promotion and disease prevention. Special emphasis will be placed on the “Healthy People 2020” initiatives. Frequency: Every Winter, and Every Fall.

BHS 4011 Bioterrorism: Health Care’s Readiness & Response (3 credits)
This course uses a systems perspective to provide health professionals with an understanding of the prevention and response to the intentional release of armful biologic agents. Category A diseases will be reviewed including anthrax and smallpox. Risk assessment and reduction for health care facilities will be discussed. The structure of public disaster response agencies and the potential difficulties integrating with privately-held critical infrastructure will be evaluated. Tactics and structural components from the class can also be used in unintentional outbreaks to reduce their impact. Frequency: Every Fall

BHS 4012 Torture, Violence and Trauma Health Care’s Healing Role (3 credits)
This course provides an overview of the physical and psychological effects of torture, violence, and trauma. It focuses on the relationship between health care professionals and victims of human rights violations. Discussion topics include the detection, treatment and documentation of victims of these events. The course examines the role health care as it relates to incidents of torture, violence and trauma. Frequency: Every Winter and Every Fall.

BHS 4013 Global Issues in Human Trafficking (3 credits)
This undergraduate level course is designed to raise awareness and knowledge of the global, national and local issue of human trafficking and contemporary slavery. Students will acquire important terminology related to the issue, and recognize the various forms human trafficking can take domestically and globally. Physical and psychological impact of exploitation on the victims and traffickers recruitment methods will also be explored. Students will research the role that private citizens, professionals, government agencies, the media or faith-based organizations can play in addressing the issue. Frequency: Every Fall.

BHS 4020 Topics in Maternal Child Health (3 credits)
The purpose of this course is to provide an overview of Maternal and Child Health (MCH) issues and topic areas. One to two MCH topics will be discussed weekly. To adequately prepare for class discussion questions and course assignments, students are expected to complete the required readings for each session. This course is designated for individuals who have an interest in working in the area of maternal and child health, program development and intervention. Frequency: Winter, Summer I and Every Fall.

BHS 4031 Statistics for Health Sciences (3 credits)
This course is designed to introduce the conceptual foundation of statistical analysis & statistical reasoning of health sciences data, and prepare the student to calculate, interpret and utilize appropriate software packages for basic statistical analysis. Prerequisite: math 1000 or Math 1030. Frequency: Every Winter, and Every Summer II.

BHS 4040 Community Capacity Building: an interprofessional approach (3 credits)
This course provides students an overview of the role health care professionals can take to improve the health of communities by introducing them to strategies for capacity building. Strategies including facilitating linkages and teambuilding between sectors, consensus-building, developing skill base ad resources of communities, organizations, and individuals to improve health. Students will learn to identify relevant organizations and stakeholders within the community, who by working together, can deliver health outcomes within the community. Frequency: Winter and Fall.

BHS 4100 Academic and Professional Writing (3 credits)
The purpose of this course is to introduce students to the format, content and thought processes for successful academic and professional writing through utilization of APA form and style manual. An overview of proper sentence and paragraph structure, grammar, punctuation usage, formatting and bibliographic referencing will be discussed. Must be taken during first semester of enrollment in program. Must be taken during the first semester of taking course work within major. Frequency: Summer I, Every Fall and Every Winter.

BHS 4110 Health Care and Aging (3 credits)
This course examines the psychosocial and cultural variations associated with maturing and aging. Topics covered will be an overview of life choices, living wills, and treatment, as well as cultural implications of senior care. Frequency: Every Winter, Every Summer I and Every Summer II.

BHS 4120 Topics in Maternal Child Health (3 credits)
The purpose of this course is to provide an overview of Maternal and Child Health (MCH) issues and topic areas. One to two MCH topics will be discussed weekly. To adequately prepare for class discussion questions and course assignments, students are expected to complete the required readings for each session. This course is designated for individuals who have an interest in working in the area of maternal and child health, program development and intervention. Frequency: Winter, Summer I and Every Fall.

BHS 4130 Statistics for Health Sciences (3 credits)
This course is designed to introduce the conceptual foundation of statistical analysis & statistical reasoning of health sciences data, and prepare the student to calculate, interpret and utilize appropriate software packages for basic statistical analysis. Prerequisite: COMP 1500. Frequency: Every Winter, Every Summer II.

BHS 4140 Independent Capstone Health Science Studies (3 credits)
Students select an area of study in cooperation with the course advisor and/or program director. The project may include such items as work-related studies, conference attendance, grant proposals and or planning documents. A comprehensive paper will be developed and delivered according APA form and style manual. Students must receive departmental and advisor approval in order to be allowed to register for this course. Pre-requisites: COMP 1500 and COMP 2000 or COMP 2020 and Senior status. Frequency: Winter, Fall, Summer.

BHS 4150 The Science of Sound (3 credits)
This course is designed to introduce students to acoustics. Students will study production of sound waves in general, and more specifically the production of sound waves during speech. Students will also study the characteristics of sound waves, how sound waves are propagated through a medium, and the perception of sound. Frequency: Every Fall.

BHS 4151 Linguistics & Psycholinguistic Variables of Normal Language Development (3 credits)
This course will provide an overview of speech and language development as it relates to the typically developing child from birth through adolescence. This course will include topic areas related to the dimensions of communication, neurological and anatomical basis of communication, models of speech and language development, and speech-language differences and diversity. Frequency: Every Winter.

BHS 4153 Speech and Language Disorders for Health Care Practitioners (3 credits)
Overview of speech and language delays and disorders, their etiology, and treatment. How health-care practitioners can identify persons with possible disorders and make appropriate referrals. Consideration of the communication needs within health-care system of persons with speech-language disorders. Frequency: Every Winter.

BHS 4160 Education for the Health Professions (3 credits)
This course will provide an opportunity to explore learning theories, learning styles, testing and assessment, education trends, and utilizing technology in instruction as it relates to the health professional and professions. Frequency: Every Winter and Every Fall.
BHS 4300 Interprofessional Education Seminar (3 credits)
This interprofessional education seminar focuses on preparing health sciences students with the foundational skills needed to work in teams to effectively collaborate and coordinate care in clinical and population health. This seminar provides learners with evidence-based knowledge and skills on selected health care topics through an interprofessional lens. Through lectures and presentations from leaders in Interprofessional Education and Collaboration, readings, case studies, and work groups, students will learn and practice competencies included in the four core competency domains of interprofessional collaborative practice, as well as leadership skills for team-based, community-oriented health care. Key themes include interprofessional communication, collaboration, leadership and professionalism will be integrate throughout the content. Pre-Requisite or Co-Requisite: BHS 3000. Frequency: Every Fall and Winter.

BHS 5105 Basic Life Support / CPR (1 credits)
An American Heart Association course that includes both didactic materials, including methods of reducing cardiovascular risk, and instruction in the psychomotor skills necessary for the initial resuscitation of the cardiac arrest patient.

BIOL—Biology

BIOL 1000 Introduction to Biology Research I Lab (3 credits)
This course is a unique undergraduate research opportunity designed for freshman and/or sophomore-level students interested in a career in the sciences. Students will take ownership of their own research project by formulating a hypothesis and designing experiments to test their hypothesis, thus allowing students to experience what it is like to be a research scientist. Throughout the process, students will collect and analyze their data and then present their findings. This course is part of a two-course sequence with BIOL 1001 and students should take both courses. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

BIOL 1001 Introduction to Biology Research II Lab (3 credits)
Students who have successfully completed Introduction to Biology Research I Lab will continue and expand upon their previous research. Students will work on a manuscript of their research and prepare a formal presentation for a symposium or conference. Prerequisite: BIOL 1000. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Winter.

BIOL 1040 Environmental Studies (3 credits)
Overview of environmental science that integrates social, economic, technical, and political issues. Problems of ecological disruptions, growth of human populations, land use, energy, water supplies, food supplies, pesticides, and pollution are covered. Frequency: Every Fall and Winter.

BIOL 1060 Amoebas to Zebras: Life on Earth (3 credits)
Tiptoe through the tulips, tapeworms, toadstools, tiger sharks, and tarantulas. This course is an overview of the diversity of life on earth, introducing the major groups of living things, from bacteria to mammals, with introductions to basic concepts in ecology, evolution, and life processes. This course is not intended for biology majors. Biology majors may not register for this course without permission of the department chair. Prerequisite: MATH 1000 or higher. Frequency: Every Fall and Winter.

BIOL 1070 Basics of Human Heredity (3 credits)
This course examines basic concepts of genetics and their application to human heredity and diversity. Topics covered include structure and function of DNA, genes and chromosomes, the role of genes in heredity, tracing of genetic traits in family trees, and advances in genetic technologies as applied to human medicine. This course is not intended for biology majors. Biology majors may not register for this course without permission of the department chair. Prerequisite: MATH 1030. Frequency: Every Fall and Winter.

BIOL 1080 Human Biology (3 credits)
This course is an introduction to the basic principles of cell and molecular biology. It includes the study of atomic, molecular, cellular structure and function; biochemical processes and pathways; molecular and classical genetics. This course is not intended for biology majors. Biology majors may not register for this course without permission of the department chair. Prerequisite: MATH 1000 or higher. Frequency: Every Fall and Winter.

BIOL 1100 Concepts and Connections in Biology (3 credits)
All species are a product of evolution and humans are no exception. Nevertheless, the Darwinian revolution that transformed biology a long time ago is only now taking place for the study of humans. Virtually every human related subject (e.g., the social sciences, the health sciences, and the humanities) can be approached from an evolutionary perspective. Evolution is truly a passport for the study of all things animate and their productions, therefore all things human, in addition to other organisms. In this course you will learn about evolution as a subject that applies to all aspects of humanity in addition to the rest of life. This course is not intended for biology majors. Biology majors may not register for this course without permission of the department chair. Prerequisite: MATH 1000 or higher. Frequency: Fall and Winter.

BIOL 1400 Introductory Cell Biology (3 credits)
This course is an introduction to the basic principles of cell and molecular biology. It includes the study of atomic, molecular, cellular structure and function; biochemical processes and pathways; molecular and classical genetics. This course is not intended for biology majors. Biology majors may not register for this course without permission of the department chair. Prerequisite: MATH 1000 or higher. Frequency: Every Fall and Winter.

BIOL 1500 Biology I/Lab (4 credits)
An introduction to the biological sciences for students interested in pursuing a career in this area. Includes subcellular and cellular organization, structures/function, biochemistry, classical/molecular genetics, and population dynamics - all arranged around evolution as a major theme. Includes laboratory sessions. Prerequisites: MATH 1040 or higher and COMP 1000 or higher. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

BIOL 1510 Biology II/ Lab (4 credits)
This course and related labs, the second part of a two-part sequence, introduces the basic principles of biological science at the level of the organism and above. It focuses on a survey of the five kingdoms and compares the structure and function of organ systems in plants and animals. It includes the study of evolution, phylogenetic relationships, species diversity and ecological interactions. Prerequisites: BIOL 1500 and MATH 1040 or higher and COMP 1000 or higher. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

BIOL 2210 Introduction to Anatomy & Physiology (4 credits)
A lecture that covers the basics of human anatomy and physiology including anatomical terminology, basic biochemistry, cells and tissues, and the integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lympthatic/immune, respiratory, digestive, urinary, and reproductive systems. Introduces common human disease processes. Classroom activities in addition to lecture include but are not limited to utilizing virtual computer anatomy and physiology software to prepare nursing and other allied-health profession students to take advanced anatomy and physiology courses. This course is not intended for biology majors. Biology majors may not register for this course without permission of the department chair. Pre- requisite: BIOL 1400. Frequency: Every Winter.

BIOL 2350 Human Nutrition (3 credits)
This course explores the various nutrients, their sources, digestion, absorption, metabolism, interaction, storage, and excretion. Current
research is presented against a background of basic nutritional concepts. Special emphasis is given to the role nutrition plays in individual health and the welfare of the population. Prerequisites: BIOL 1400 or BIOL 1500. Frequency: Every Fall and Winter.

BIOL 2400 Applied Microbiology (3 credits)
This course is an introduction to the basic principles of applied microbiology. It provides an overview of medical microbiology. It introduces the diversity and importance of microbes and their physiology. Aspects of pathogenicity and immunology are stressed. This course is not intended for biology majors. Biology majors may not register for this course without permission of the department chair. Prerequisites: BIOL 1400 or BIOL 1500; and MATH 1030 or higher. Frequency: Every Fall and Winter.

BIOL 2600 Medical Terminology (3 credits)
This course covers the basic structure of medical terms, including roots, prefixes, and suffixes. Emphasis will also be placed on the terminology of body systems. Medical terms related to anatomy, physiology, pathology, clinical procedures, laboratory tests, and medical abbreviations will be covered. Also, students will learn medical terminology related to specialized areas of medicine such as cancer medicines, nuclear medicines, radiology/radiotherapy, pharmacology, and psychiatry. Prerequisites: BIOL 1080, BIOL 1100, BIOL 1400, BIOL 1500, or BIOL 1510 or BIOL 1510H. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

BIOL 3100 Biological Anthropology (3 credits)
Biological anthropology is the study of evolution, ecology, and behavior of all primate populations (extant and extinct) including humans. The goal of this course is to explore the origins of humanity and breadth of primate diversity as demonstrated through genetic, bioarchaeological, comparative anatomical, and primatological contexts. Throughout the semester this course will utilize classic and modern peer-reviewed publications, textbook readings, and digital media to reinforce the key concepts within the field of biological anthropology including an overview of its sub-disciplines which include paleoanthropology, paleopathology, biomedical anthropology, and forensics. This course does not include laboratory sessions. Frequency: Every Winter.

BIOL 3200 General Ecology/Lab (4 credits)
Basic principles governing the interaction of organisms and their environment including food webs, energy flow, biogeochemical cycles, factors controlling distribution and abundance, biological and species interaction, species diversity, ecosystem stability, ecological succession, and impact of man. Includes laboratory sessions. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BIOL 1500 and BIOL 1510 or BIOL 1510H. Frequency: Every Winter.

BIOL 3220 Animal Behavior (3 credits)
This course focuses on the behavior of animals. Topics covered include foraging, mating, parental care, and conflict and cooperation. These behaviors are evaluated using the major theoretical models in the field, including game theory, optimal foraging, and multilevel selection. Through a combination of lectures and readings from classical and contemporary literature, students are given a solid foundation in the study of animal behavior, and the extent to which it is shaped by social and environmental conditions. Prerequisite: BIOL 1510 or BIOL 1510H. Frequency: Every Fall.

BIOL 3300 Invertebrate Zoology/Lab (4 credits)
Basic invertebrate zoology including introductory anatomy, physiology, phylogeny, and ecology of major animal phyla from protozoa through echinoderms with emphasis on marine organisms. Includes laboratory sessions. Prerequisites: BIOL 1500 and BIOL 1510 or BIOL 1510H. Frequency: Every Fall.

BIOL 3311 Vertebrate Zoology/Lab (4 credits)
This course introduces students to the identification, systematics, life history, anatomy, and adaptive strategies of the vertebrates. The course also exposes students to methods of collecting, preserving, and identifying local vertebrates, as well as the common techniques used in vertebrate research. Prerequisite: BIOL 1510. Frequency: Odd Year Winter.

BIOL 3312 Human Anatomy and Physiology/ Lab (5 credits)
This course deals specifically with form and function of human systems. The lecture period stresses human physiology; the laboratory is mainly devoted to gross anatomy. However, the lecture and laboratory are presented in a unified fashion with the aim that each reinforces the other in presenting a complete picture of functional morphology. Although lower vertebrates are used for comparative purposes, mammalian systems receive major emphasis in both lecture and laboratory. Prerequisite: BIOL 1400 or BIOL 1500. Frequency: Every Fall and Winter.

BIOL 3320 Anatomy and Physiology I/Lab (4 credits)
This is the first part of a two-part course that deals specifically with form and function of vertebrate organ systems. The lecture period stresses human physiology and the laboratory is mainly devoted to gross anatomy. However, the lecture and laboratory are presented in a unified fashion with the aim that each reinforces the other in presenting a complete picture of functional morphology. Although lower vertebrates are used for comparative purposes, mammalian systems receive major emphasis in both lecture and laboratory. Prerequisite: BIOL 1500 or equivalent. Frequency: Every Fall and Winter.

BIOL 3330 Anatomy and Physiology II/Lab (4 credits)
This is the second part of a two-part course that deals specifically with form and function of vertebrate organ systems. The lecture period stresses human physiology and the laboratory is devoted to histology and gross anatomy. The lecture and laboratory are presented in a unified fashion with the aim that each reinforces the other in presenting a complete picture of functional morphology. Although lower vertebrates are used for comparative purposes, mammalian systems receive major emphasis in both lecture and laboratory. Prerequisite: BIOL 3320. Frequency: Every Fall and Winter.

BIOL 3340 Microbiology/Lab (4 credits)
Introduction to basics of morphology, metabolism, growth, genetics, enumeration, and control and public health aspects of bacteria and viruses, with emphasis on marine processes and types. Includes laboratory sessions. Prerequisites: BIOL 1500 and CHEM 1310 or CHEM 1310H. Frequency: Every Fall and Winter.

BIOL 3350 Introduction to Virology (3 credits)
This course focuses on the introduction to basics of virus structure, replication, overview of diseases caused by viruses, metabolism, growth, genetics, enumeration, and control and public health aspects of viruses. Prerequisites: BIOL 1500 and CHEM 1310 or CHEM 1310H. Frequency: Every Winter.

BIOL 3400 Microbiology/Lab (4 credits)
Histology is the study of tissues. It is the science of relating microscopic cell and tissue structure, to function. The lecture period is devoted to tissue structure and function. In the laboratory session, students will be taught a systematic process in identifying histological sections, and how structure directly relates to function. The lecture and laboratory sessions will complement each other to provide a complete understanding of microscopic anatomy and function. Prerequisites: BIOL 1500 and CHEM 1310 or CHEM 1310H. Frequency: Every Fall.

BIOL 3600 Genetics/Lab (4 credits)
Review of principles of Mendelian and quantitative inheritance considered at a morphological and molecular level, including a survey of population genetics, theories of natural selection, the study of amino acids, and nucleotide substitutions as "evolutionary clocks. Prerequisites: BIOL 1510, BIOL 1510H and CHEM
BIOL 3900 Introduction to Parasitology/Lab (4 credits)
Through lectures and the examination of prepared slides in the laboratory, this course will survey the diversity, morphology, life cycles, and pathology of major protozoan and metazoan parasites of humans and domesticated animals. Pre-requisite: BIOL 1510 or BIOL 1510H. Frequency: Every Fall.

BIOL 4010 Evolution (3 credits)
This course provides the fundamental principles of evolutionary biology. Coverage will include history of evolutionary thought, population and quantitative genetics, paleobiology and experimental evidence, adaptations and radiation, biodiversity, evolution and development (evo-devo), molecular evolution, the impact of neo-Darwinian synthesis, genome evolution, phylogenetics, human evolution, macroevolution and coevolution. Prerequisites: BIOL 1500 and BIOL 1510 or BIOL 1510H. BIOL 3600 must be taken either as a prerequisite or concurrently with BIOL 4010. Frequency: Every Fall.

BIOL 4100 Genomics / Lab (4 credits)
This course provides students with an overview of high throughput technologies in biology. It focuses primarily on the fundamental methodologies associated with the modern studies of genomes, transcriptomes and proteomes. The computer-based analysis of the massive data sets generated by these technologies will also be introduced. The rise of technologies, and their impact on general biological research, as well as applied medical and pharmaceutical field, will be discussed. This course also includes laboratory sessions. Prerequisite: BIOL 3600. Frequency: Every Fall and Winter.

BIOL 4200 Neurobiology (3 credits)
This course is an introductory survey that covers nervous system function from the molecular level to behavior. The objective is to give the advanced student in the biological sciences insight into fundamental mechanisms of nervous integration. The instructional format will consist of lectures, discussion groups, computer simulations, and guest lectures by practicing neuro-scientists. Prerequisite: BIOL 3312 or BIOL 3320 or NEUR 2500. Frequency: Every Winter.

BIOL 4300 Microbial Pathogenesis (3 credits)
An introduction into the molecular mechanisms used by various microbes (including bacteria and viruses) to infect and cause disease in their hosts. The course will cover microbial attachment, virulence factors, host-parasite interactions, treatment strategies, and mechanisms of drug resistance. Prerequisites: BIOL 3400 and BIOL 3600. Frequency: Every Fall.

BIOL 4321 Systems and Synthetic Biology (3 credits)
This course will discuss the principles of systems and synthetic biology, two fields that integrate the disciplines of biology, mathematics and computation. It will touch upon how molecular biology and mathematics can be used to determine how multiple parts of the cell or environment work together to allow a behavior. Furthermore, it will discuss how synthetic biology can be used to program novel behavior in cells. This course serves as an excellent introduction for those wanting to understand how biological questions, including those pertaining to medicine, can be answered using an interdisciplinary approach. Prerequisites: MATH 2100 OR MATH 2100H and BIOL 3600. Frequency: Every Winter.

BIOL 4340 Cellular and Molecular Biology (3 credits)
Molecular and biochemical basis of cell structure and function. Topics covered include modern methods for studying cells; cell architecture, growth and divisions; structure and expression of prokaryotic and eukaryotic genes; chromosome structure; development; immune system and cancer biology. This course does not include laboratory sessions. Prerequisites: BIOL 3600 or NEUR 3000 and CHEM 1310 or CHEM 1310H or CHEM 2310. Frequency: Every Fall and Winter.

BIOL 4360 Immunology (3 credits)
A survey of, and introduction to, immunology, which includes innate and specific immunity, recognition of antigens, antibodies, the complement system, cytokines, cancer and the immune system, and autoimmunity. Prerequisite: BIOL 3400. Frequency: Every Winter.

BIOL 4401 Human Embryology (3 credits)
This course will cover human embryonic and fetal development from fertilization to birth. The emphasis will be on the morphological changes that take place during development. Underlying molecular mechanisms will also be considered. Relevant congenital anomalies will be considered for each developing organ system. The first portion of the course will focus on the embryonic development that takes place during the first 8 weeks after fertilization. The second portion of the course will focus on the development of the individual organ systems and the fetal period through birth. Prerequisites: BIOL 3330 or BIOL 3312. Frequency: Fall.

BIOL 4600 Evolution, Adaptation, and Health (3 credits)
This course formally rounds traditional proximate investigations of health and disease in the proper biological context. Human health and diseases have both proximate (mechanistic) and ultimate (evolutionary) causes, yet the classical medical approach has largely focused on the proximate while ignoring ultimate causations. Therefore, while we may understand the physiological process of diseases, we know far less of why we get sick. This course focuses on the evolutionary causes of disease. Prerequisites: BIOL 1510 and BIOL 3600. Frequency: Every Winter.

BIOL 4700 Advanced Human Physiology (3 credits)
Physiology is the study of the function of the organ systems and how they relate to the human body. The course will begin with cellular physiology and use this as the basis for an integrated approach to organ system physiology. The relationship among the organ systems will be emphasized in order to demonstrate homeostasis. Prerequisites: BIOL 3330 with a C or better and CHEM 2400 or CHEM 2400H. Frequency: Every Winter.

BIOL 4900 Special Topics in Biology (1-3 credits)
Topics in advanced biology that are not included in a regular course offering. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Students may re-enroll for Special Topics covering different content. Prerequisite: BIOL 1500. Frequency: Upon request and see academic department chair.

BIOL 4900E Special Topics in Biology – Electron Microscopy (3 credits)
This course introduces the basic principles, theory, and practical use of scanning and transmission electron microscopy. Topics to be covered include introduction to principles of electron microscopy: sources, detectors, beam materials interactions, techniques for image optimization, hi-res imaging, including nonconducting and delicate samples. This course combines study of physical and optical principles underlying EM, as well as hands-on training, operational procedures, basic troubleshooting. Prerequisites: BIOL 1500; BIOL 3400 and 3500 preferred. Frequency: Infrequent.

BIOL 4900F Special Topics in Biology - Cancer Biology (3 credits)
This course will focus on the cellular and molecular basis of cancer, with particular emphasis on the molecular pathways that convert normal cells into cancer cells and how knowledge of these pathways can be utilized to develop novel diagnostic and therapeutic tools against cancer. The class will utilize active learning experience-driven lectures and assignments from both the historical and current literature to examine selected topics in cancer biology. This course does not include laboratory sessions. Pre-Requisite: BIOL 4340. Frequency: Infrequent.

BIOL 4900G Special Topics in Biology – Fluorescent imaging techniques and data analysis (3 credits)
This is an intensive and comprehensive laboratory-oriented course focusing on applying...
BIOL 4901 APS Capstone Course in Biological and Physical Sciences (3 credits)
This course is reserved for students who are enrolled in the Applied Professional Studies Program. Through a series of written assignments, this course provides students with an opportunity to integrate previous learning and experience with a concentration in biological or physical sciences to form a unique course of academic study. Given that the APS major is individualized to a large extent based on a student’s interests and past experiences, this course ordinarily will be conducted as an independent study and will be taken during the student’s last semester prior to receipt of their degree. Prerequisite: To be determined by supervising faculty and the division director. Frequency: Upon request and see academic department chair.

BIOL 4950 Internship in Biology (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: Cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request and see academic department chair.

BIOL 4950D Internship in Biology (D) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: Cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request and see academic department chair.

BIOL 4960 Practicum in Biology I (3 credits)
An initial field experience for biology majors at an approved site through the Office of Career Services under the supervision of an approved practicum site supervisor, with face-to-face class group lecture meetings for 3-hours weekly led by the biology faculty member (course instructor) throughout the semester. The format of the course will include both didactic and experiential learning in applied settings where students will immerse themselves in the primary scientific literature of their field of interest. Prerequisites: Cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, and BIOL 1510 with the approval of the biology department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

BIOL 4961 Practicum in Biology II (3 credits)
This subsequent practicum course for Biology majors consists of a new or continued and expanded previously established field experience at an approved site through the Office of Career Services under the supervision of an approved practicum site supervisor. The course also includes face-to-face class group lecture meetings for 3-hours weekly led by the biology faculty member (course instructor) throughout the semester. The format of the course will include both didactic and experiential learning in applied settings where students will immerse themselves in the primary scientific literature of their field of interest. Prerequisites: successful completion of BIOL 4960 and a cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, approval of biology instructor and permission of department chair. Frequency: Every Winter.

BIOL 4990 Independent Study in Biology (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request and see academic department chair.

BIOL 4990A Independent Study in Biology (A) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request and see academic department chair.

BIOL 4990B Independent Study in Biology (B) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request and see academic department chair.

BIOL 4990C Independent Study in Biology (C) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request and see academic department chair.

BIOL 4990D Independent Study in Biology (D) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request and see academic department chair.

BIOL 4990E Independent Study in Biology (E) (1-12 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty...
and the division director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request and see academic department chair.

**BMS—Medical Sonography**

**BMS 3110 Introduction to Diagnostic Medical Sonography (3 credits)**
This course is designed to introduce students to the equipment used in diagnostic ultrasound. The course will be primarily taught in the ultrasound training laboratory in small groups. The focus of the course will be to lead students toward proficiency and competency in using the tools available on the ultrasound equipment for the production of quality images, as well as proper ergonomics and scanning techniques. This course is the foundation for all the following core courses. Frequency: Every Summer I.

**BMS 3120 Ultrasound Cross-Sectional Anatomy (4 credits)**
This course is designed to expand upon students' present knowledge and understanding of normal human anatomy through developing spatial relationships of organs, vessels, bones, muscles and connective tissues. Normal size, shape, internal and external anatomical landmarks, and imaging characteristics using Computed Tomography, Sonography and other imaging modalities will be examined. Normal spatial relationships of anatomic structures will be presented using standard imaging planes in two and three dimensions. An introduction to the imaging planes used in common sonographic exams along with basic sonographic characteristics of the normal structures will be included. This course serves as the foundation in preparation for the clinical specialty ultrasound courses. Frequency: Every Summer I.

**BMS 3130 Ultrasound Physics I/Lab (3 credits)**
This course is designed to help the student acquire knowledge of all the fundamental principles and concepts necessary to understand the properties of sound and ultrasound as used in diagnostic imaging. These principles and concepts will span from basic properties of sound in soft tissue to advanced techniques such as Doppler, spectral analysis, M-mode, etc. as they pertain to evaluation for abdominal, ob-gyn, small parts, vascular, and cardiac ultrasound imaging. The students will also learn about artifacts, safety, and the concepts of bioeffects, as well as quality assurance and image storage. Frequency: Every Summer I.

**BMS 3140 Small Parts Sonography (4 credits)**
This course will focus on the use of ultrasound for the evaluation of superficial structures such as the thyroid and parathyroid glands, breast, male reproductive system, superficial soft tissue structures, shoulder, hand and wrist; as well as the neonatal brain, pediatric spine, pediatric hip/pelvis, and pediatric abdomen. The students will have a have a strong hands-on component spending several hours in the laboratory. Lectures will focus in relevant normal and abnormal anatomical and physiological aspects as well as on clinical findings, signs and symptoms of disease related to these areas. Frequency: Every Summer I.

**BMS 3150 Obstetrics and Gynecology Ultrasound I (4 credits)**
This course will focus on the use of ultrasound for the evaluation of the organs contained in the human female pelvic cavity in both, normal and abnormal, gravid and non-gravid anatomy and physiology. This course will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. The lectures will focus on the aspects previously mentioned as well as on fetal abnormalities and abnormal conditions of the female reproductive system and the extracranial and intracranial cerebrovascular systems. This course will focus on hemodynamic principles and the use of ultrasound for the evaluation of the extracranial and intracranial cerebrovascular circulation. This course will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. Lectures will focus on anatomy, pathologies, treatment options, and analysis of data obtained by ultrasound, as well as some other imaging techniques. Frequency: Every Summer I.

**BMS 3160 Abdominal Sonography I (4 credits)**
This course will review the abdominal anatomy and physiology with a focus on the cine-framing anatomy. It will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory learning to recognize normal sonographic anatomy. Lectures will focus on the above mentioned aspects, as well as on how to collect patient information relevant to the different ultrasound studies and other imaging techniques. This course provides a foundation that will help students understand the clinical exam and the elements contributing to their role and the scope of practice as general sonographers. Frequency: Every Fall.

**BMS 3170 Venous Testing/Lab (4 credits)**
This course will focus on the use of ultrasound for the evaluation of the venous circulation of the upper and lower extremities. This course will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. Lectures will focus on anatomy, pathologies, treatment options, and analysis of data obtained by ultrasound, as well as some other imaging techniques. Frequency: Every Fall.

**BMS 3190 Peripheral Arterial Testing/Lab (4 credits)**
This course will focus on the use of ultrasound for the evaluation of the arterial circulation of the upper and lower extremities. This course will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. Lectures will focus on anatomy, pathologies, treatment options, and analysis of data obtained by ultrasound and other technologies specific to vascular laboratories, as well as some other imaging techniques. Frequency: Every Winter.

**BMS 3230 Ultrasound Physics II/SPI Exam (1 credit)**
This course is designed to expand upon a student’s present knowledge and understanding of normal anatomy through developing spatial relationships of organs, vessels, bones, muscles, and connective tissues. Frequency: Every Fall.

**BMS 3250 Obstetrics and Gynecology Ultrasound II (4 credits)**
This course is a continuation of Obstetrics and Gynecology Ultrasound I. It is a further comprehensive approach to in-depth studies of the organs contained within the human female pelvic cavity in both, normal and abnormal, gravid and non-gravid anatomy and physiology. The course will focus on fetal abnormalities and abnormal conditions of the fetus. Frequency: Every Winter.

**BMS 3260 Abdominal Sonography II (4 credits)**
This course will review normal abdominal anatomy and physiology with a focus on clinical correlations. It will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory strengthening the skills learned from Abdominal Sonography I. Lab assignments will incorporate case studies, clinical correlations, and other imaging modalities (e.g., MRIs, nuclear medicine, CTs, etc.). Lectures will focus on the above mentioned aspects, as well as on how to collect patient information relevant to the different ultrasound studies and pathologies. This course provides a foundation that will help students understand the clinical exam and the elements contributing to their role and the scope of practice as general sonographers. Frequency: Every Winter.

**BMS 3270 Cerebrovascular Testing/Lab (4 credits)**
This course will focus on hemodynamic principles and the use of ultrasound for the evaluation of the extracranial and intracranial cerebrovascular circulation. This course will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. Lectures will focus on anatomy, pathologies, treatment options, and analysis of data obtained by ultrasound, as well as some other imaging techniques. Frequency: Every Summer I.

**BMS 3280 Clinical Preparation and Review (4 credits)**
This course will provide and reinforce the nontechnical aspects of the profession of diagnostic medical sonography. This will include, but is not limited to, patient care, professionalism, and clinical rationale. This course will also prepare students for the clinical experience that follows in the second year. Frequency: Every Summer I.
BMS 4500 Clinical Externship I (6 credits)
This course will mainly be provided through immersion in a clinical setting assigned by the end of the first year. Students will be a daily integral part of the operations of the diagnostic ultrasound department they have been assigned to for the length of the term. Students will report to the clinical coordinator or an assigned professor of the program at NSU. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

BMS 4600 Clinical Externship II (7 credits)
This course is a continuation of Clinical Externship I.

BMS 4700 Clinical Externship III (8 credits)
This course is a continuation of Clinical Externship I. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit.

BMS 4800 Clinical Supplement (8 credits)
This course is designed to enhance the technical skills acquired during the didactic year of the program, through applications in a clinical setting, and the critical thinking based on real cases the student will observe or perform. The course is also designed to formally introduce the student and familiarize him/her to the clinical setting. Throughout the course, the student will feel as he/she is reviewing and relearning some of the concepts, terms, and information that were learned throughout the didactic year. This is expected and in fact, you, the student will take away a newer (and even better) understanding of medical sonography.

BPH—Undergrad Public Health

BPH 1010 Foundations of Public Health (3 credits)
This course provides an introduction to the concepts, values, principles, and practice of public health. Frequency: Every Fall, Winter and Summer.

BPH 1020 Principles of Health Behavior (3 credits)
This course examines the psychosocial, behavioral, and educational principles that determine health behavior. Cognition, communication, relationships, and the environment are explored in the context of theoretical models and the role they play in influencing health behavior and the acquisition of healthy lifestyles. Frequency: Every Fall and Winter.

BPH 2010 Human Genomics (3 credits)
This course addresses the principles and practices of genetics and genomics, as well as the ethical, legal, and social issues of genetics and genomics in public health practice. Prerequisites: BIOL 1400 or BIOL 1500. Frequency: Every Fall.

BPH 2022 Public Health Biology (3 credits)
This course further details the fundamental principles of the underlining mechanisms of human disease and how these mechanisms impact clinical outcomes. Prerequisites: BPH 1010. Frequency: Every Fall and Winter.

BPH 2030 Public Health Seminar (3 credits)
This course addresses the practice of public health. Topics include current public health issues and trends, chronic diseases and infections, environmental health, emergency preparedness and response, health education and promotion, access to healthcare, and the role of informatics. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

BPH 2040 Health Communication (3 credits)
Health communication facilitates the delivery of health information to the public. This course explores communication in health care delivery, health care organizations, health promotion and disease prevention, as well as in promoting personal and psychosocial wellbeing. Prerequisites: BPH 1010, BPH 1020, and COMP 1500 or 1500H. Frequency: Every Fall and Winter.

BPH 2050 Community Health (3 credits)
This course is designed to expose students to community health from a public health perspective with an emphasis on developing the knowledge and skills necessary for a career in public health. Students will explore strategies to improve the health of populations within the context of public health concepts that are key to understanding the community health, such as the ways in which health problems are analyzed and framed and how we study populations and the health issues they face. Then we will apply these concepts to specific areas of public health concern, including communicable and non-communicable diseases, nutrition, mental health, and environmental issues. Special attention will be given to the unequal distribution of health risks and outcomes across racial/ethnic groups, socioeconomic levels, and geographic locations. Students will have the opportunity to gain experiential hours while integrating the knowledge they have learned in the classroom as they synthesize and analyze public health issues from local and national perspectives. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

BPH 2060 Intro to School Health (3 credits)
Focuses on the Whole School Whole Community Whole Child (WSCC) model components and coordination. Includes the relationship of WSCC to public health and education outcomes. This course places special emphasis on practical application of organizational principles and school health strategies for addressing current student and staff health issues. Frequency: Every Fall.

BPH 2070 Introduction to Public Health Research (3 credits)
In this course students will begin the process of becoming researchers in the field of public health. They will learn the language of research, ethical treatment of research participants, categories of research methods, and the best matches between research questions and research methods. Students will leave the course with skills in describing research, in conducting literature reviews, in selecting research instruments, and in identifying common errors in research methodology. Prerequisites: BPH 1010. Frequency: Every Fall, Winter, and Summer.

BPH 2080 Dimensions of Wellness (3 credits)
This course provides a theoretical and practical treatment of the concepts within the dimensions of wellness in regard to disease prevention and health promotion. The course will cover topics such as emotional health; alcohol, tobacco, and drug abuse; physical fitness; nutrition and dieting; consumer health; chronic and communicable diseases; stress management; and environmental health. Frequency: Every Fall and Summer.

BPH 3010 Concepts in Epidemiology (3 credits)
The purpose of this course is to introduce students to the history and principals of epidemiology that can be applied to understand, characterize and promote public health. Students will learn and apply basic concepts of epidemiology and research to assess and improve health at a population level. Prerequisites: BPH 1010 and MATH 2020. Frequency: Every Fall and Winter.

BPH 3010H Epidemiology: Distribution & Determinants of Health Honors (3 credits)
Epidemiology is the scientific method used to investigate, analyze and prevent or control a health problem in a population. Using a multidisciplinary approach, this course will introduce students to the public health science of epidemiology and its applications to understand, characterize, and promote public health. Learning application and skill-building opportunities will presented in the context of public health as well as emphasize biology, mathematics, social sciences, education, environmental science, policy and ethics, and writing and communication. The aim of this approach is to cultivate critical and analogic thinking, deductive reasoning, problem solving with constraints, and concern for cultural and aesthetic values. Every winter. Satisfies BPH 3010 requirement. Course is limited to honor’s students only.

BPH 3020 Public Health Leadership and Management (3 credits)
Provides knowledge relevant to leading public health organizations while effectively managing and motivating employees. Includes organizational behavior and theories to examine management, leadership, and application of
skills in delivering public health programs. **Prerequisites:** BPH 1010, BPH 2022, BPH 2030, and BPH 2040. **Frequency:** Every Fall and Winter.

**BPH 3030 Introduction to Global Health (3 credits)**

Introduction to Global Health introduces students to the main concepts of population health using a global perspective. Students discuss the biological, social, economic, and geopolitical aspects of global health, with an emphasis on population groups at increased risk of health issues. Students critically think through issues of global concern, including communicable and non-communicable diseases, maternal and child health, global environmental health, malnutrition, key determinants of population health, reproductive health, and the socioeconomic and policy implications of global health. Students are taught the basics of global health assessment, planning, and intervention; the roles and functions of global health agencies; and how to locate tools and resources needed for lifelong learning in global health. **Prerequisites:** BPH 1010 and BPH 3010 or 3010H. **Frequency:** Every Fall and Winter.

**BPH 3040 Public Health Issues in Disasters (3 credits)**

The ever-changing field of public health issues in disasters has continued to make our communities vulnerable to social, economic, and political factors that both shape our response and influence our perceptions of responses at the local, state, and federal levels. Public health practitioners play a vital role in identifying, addressing, and recovering from such devastating disasters and emergencies. This course will provide students with a comprehensive guide for understanding and managing public health emergencies, provide thought-provoking approaches to the various challenges you will face a practitioner in this field. It will expand your knowledge, challenge your thinking, and act creatively and with compassion in your approach to emergencies and disaster response. **Prerequisites:** BPH 1010. **Frequency:** Every Fall.

**BPH 3970 Disparities in Health: Examining the Impact of Culture and Ethnicity (3 credits)**

This course introduces students to skills and insights necessary in promoting health in diverse populations. Issues discussed include the need for effective communication; understanding of cultural factors and how they impact preventive efforts; and health care status and utilization patterns on the health care system and expenditures. The course also explores traditional modalities of health maintenance among various populations. **Prerequisites:** BPH 1010, BPH 1020 and BPH 2050. **Frequency:** Every Fall and Winter.

**BPH 3990 Understanding Mental Health as Public Health (3 credits)**

This course provides students with an opportunity to explore mental health and illness from a public health perspective and multi-level framework. The overall aim of the course is to equip students with the knowledge to understand and interpret key epidemiological data, healthcare systems for people with a mental illness, the interaction between mental health and social and physical health factors, mental health across the lifespan, public health interventions such as preventive healthcare and mental health promotion, and mental health policies. Student assignments and projects will develop skills that apply knowledge to understand issues of mental illness and encourage behaviors that promote mental health within communities. **Prerequisites:** BPH 1020 and BPH 2050. **Frequency:** Every Winter.

**BPH 3990H Inside Out: Exploring Population Mental Health & Well-Being (3 credits)**

There is no health without mental health. Mental illness is a major issue facing every community and is the leading cause of disability in North America and Europe. Mental health and well-being should be treated with the same urgency and attention as physical health and wellness. In this course, we will explore population mental health and well-being through a multi-disciplinary perspective that draws from public health, psychology, sociology, anthropology, history, and biology. We will examine the spectrum of mental health, from wellness to illness, using a socio-ecological approach. Through the use of scientific literature, popular media, policy briefs, and discussions with experts in the field, you will develop the necessary skills that will enable you to make a positive difference as future leaders promoting healthy populations. **Prerequisites:** BPH 1010 and BPH 2050. **Frequency:** Every Fall.

**BPH 4020 Policies, Systems, and Environments of Health Care (3 credits)**

Healthcare, both in the U.S. and abroad, is the consequence of policymakers, public and private sector interests, and citizens making decisions about how to organize, finance, and deliver care to individuals and populations in the midst of evolving policies, systems, and environments. Through this course, students are able to understand and work within the factors that account for current population health, healthcare delivery arrangements, and health-related policies by applying their knowledge of the major theories and concepts available. **Prerequisites:** BPH 1010 and BPH 1020. **Frequency:** Every Fall and Winter.

**BPH 4900A Global Outreach and Applied Learning (3 credits)**

The Public Health outreach and applied learning experience is a practice-based field experience in India that involves participating in an underserved outreach experience in a public health capacity. The student will work under the supervision of a site-based preceptor, who identifies the appropriate educational objectives for the practicum. The student is expected to acquire skills and experiences in the application of basic public health concepts from a vulnerable and/or an underserved population context. **Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites:** BPH 1010 and BPH 2050. **Frequency:** Fall. Specific mission, cost, and travel dates will be announced prior to registration. Please email program director at km1320@nova.edu for details.

**BPH 4900B Global Outreach and Applied Learning (3 credits)**

The Public Health outreach and applied learning experience is a practice-based field experience in Puerto Rico that involves participating in an underserved outreach experience in a public health capacity. The student will work under the supervision of a site-based preceptor, who identifies the appropriate educational objectives for the practicum. The student is expected to acquire skills and experiences in the application of basic public health concepts from a vulnerable and/or an underserved population context. **Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites:** BPH 1010 and BPH 2050. **Frequency:** Winter. Specific mission, cost, and travel dates will be announced prior to registration. Please email program director at km1320@nova.edu for details.

**BPH 4900C Global Outreach and Applied Learning (3 credits)**

The Public Health outreach and applied learning experience is a practice-based field experience in Jamaica that involves participating in an underserved outreach experience in a public health capacity. The student will work under the supervision of a site-based preceptor, who identifies the appropriate educational objectives for the practicum. The student is expected to acquire skills and experiences in the application of basic public health concepts from a vulnerable and/or an underserved population context. **Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites:** BPH 1010 and BPH 2050. **Frequency:** Fall and Summer. Specific details, mission, cost, and travel dates will be announced prior to registration. Please email program director at km1320@nova.edu for details.
and/or an underserved population context. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BPH 1010 and BPH 2050; Frequency: Winter. Specific details, mission, cost, and travel dates will be announced prior to registration. Please email program director at km1320@nova.edu for details.

**BPH 4901A Domestic Outreach and Applied Learning (3 credits)**
The Public Health outreach and applied learning experience is a practice-based field experience in New Orleans that involves participating in an underserved outreach experience in a public health capacity. The student will work under the supervision of a site-based preceptor, who identifies the appropriate educational objectives for the practicum. The student is expected to acquire skills and experiences in the application of basic public health concepts from a vulnerable and/or an underserved population context. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BPH 1010 and BPH 2050. Frequency: Winter. Specific location, mission, cost, and travel dates will be announced prior to registration. Please email program director at km1320@nova.edu for details.

**BPH 4901B Local Outreach and Applied Learning (3 credits)**
The Public Health outreach and applied learning experience is a practice-based field experience in Florida that involves participating in a myriad of public health outreach experiences with underserved populations/areas. The student is expected to acquire skills and experiences in the application of basic public health concepts from a vulnerable and/or an underserved population context. Student fee of $100 required to cover transportation costs. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BPH 1010. Frequency: Every Fall and Winter.

**BPH 4901C Domestic Outreach and Applied Learning (3 credits)**
The Public Health outreach and applied learning experience is a practice-based field experience in Mississippi that involves participating in an underserved outreach experience in a public health capacity. The student will work under the supervision of a site-based preceptor, who identifies the appropriate educational objectives for the practicum. The student is expected to acquire skills and experiences in the application of basic public health concepts from a vulnerable and/or an underserved population context. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BPH 1010, BPH 2050. Frequency: Fall. Specific details, mission, cost, and travel dates will be announced prior to registration. Please email program director at km1320@nova.edu for details.

**BPH 4910 Environmental and Occupational Health (3 credits)**
This course focuses on preventing environmental and occupational health related disease. Causes and consequences of contamination and built environments that adversely impact human health will be explored in the context of how public health professionals can prevent and control environmental and occupational hazards as well as design appropriate interventions. Areas of exploration will include the following: health impacts of climate change, food systems, exposure, toxicology, hazardous waste management, worker health and wellness, and industrial hygiene. Prerequisites: BPH 1010 and BPH 3010. Frequency: Every Fall and Winter.

**BPH 4920 Population Health Outcomes Analysis (3 credits)**
This course is an introduction to the population health approach that is driving transformative change in today’s health care environment. Students will study and apply concepts related to team-based care, social determinants of health, identifying and stratifying priority populations, health information technology, value-based payment models, quality improvement and quality measures reporting. Students will assess the opportunities and challenges of implementing different population health models in today’s health care environment, and they will evaluate the feasibility of current and proposed models to achieve the vision of the Triple Aim. Prerequisites: BPH 1010, BPH 3010 and MATH 2020. Frequency: Every Fall and Winter.

**BPH 4920 Essentials of Public Health Planning (3 credits)**
The intersection of the social service and the healthcare sectors are explored on the most granular level in this course. Understanding the why and how of social service agencies, community leadership, identification of impacted constituencies, and the evaluation of health outcomes will provide an overview of community welfare within the public health scope. Conceptual social determinants of health will be addressed through respective service delivery, as a means of maximizing health outcomes, through weekly assignments, community journaling, and team projects. Students will learn from community leaders about the identification of community needs, effective organization and program development, and respective health outcomes necessary for healthy communities to exist. Learnings will be applicable in all aspects of public health and community welfare. Students will learn to identify appropriate service providers with the knowledge of mission and vision formation, insight into service provision, and role within the public healthcare system and beyond. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BPH 1010 and BPH 2070. Frequency: Every Fall and Winter.

**BPH 4951 Community-Based Health Project (3 credits)**
The Community-Based Health Project course serves as the capstone experience for Public Health majors. The student will have the opportunity to integrate, synthesize, and apply knowledge, skills, and methodologies through this practice-based experience. The student is expected to work directly with a community-based organization and address an identified community health need. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BPH 1010, BPH 1020, BPH 2050 and BPH 4950. Frequency: Every Fall and Winter.

**BPH 4980 Ethical Issues in Public Health (3 credits)**
This course will give an overview of the ethical principles underlying the practice of public health and will examine the important role ethics play in shaping the responsibilities and decision-making process of the different agencies and levels of government when designing and implementing services and programs. Students will develop skills in critical thinking, professionalism and ethical decision making. Prerequisites: BPH 1010. Frequency: Every Winter.

**BPH 4990A Independent Study in Public Health (A) (1-3 credits)**
Independent study in public health provides students with an opportunity to propose a project and collaborate with a faculty member on public health research, community projects, specialized research skills, or special studies. Written consent of instructor and program director are required. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BPH 2070. Frequency: Every Fall, Winter and Summer. For more information please email the BSPH Program Director at km1320@nova.edu.
BPH 4990B Independent Study in Public Health (B) (1-3 credits)
Independent study in public health provides students with an opportunity to propose a project and collaborate with a faculty member on public health research, community projects, specialized research skills, or special studies. Written consent of instructor and program director are required. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: BPH 2070. Frequency: Every Fall, Winter and Summer. For more information please email the BSPH Program Director at km1320@nova.edu.

BPH 4990C Independent Study in Public Health (C) (1-3 credits)
Independent study in public health provides students with an opportunity to propose a project and collaborate with a faculty member on public health research, community projects, specialized research skills, or special studies. Written consent of instructor and program director are required. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: BPH 2070. Frequency: Every Fall, Winter and Summer. For more information please email the BSPH Program Director at km1320@nova.edu.

BPH 4990D Independent Study in Public Health (D) (1-3 credits)
Independent study in public health provides students with an opportunity to propose a project and collaborate with a faculty member on public health research, community projects, specialized research skills, or special studies. Written consent of instructor and program director are required. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: BPH 2070. Frequency: Every Fall, Winter and Summer. For more information please email the BSPH Program Director at km1320@nova.edu.

BPH 4990E Independent Study in Public Health (E) (1-3 credits)
Independent study in public health provides students with an opportunity to propose a project and collaborate with a faculty member on public health research, community projects, specialized research skills, or special studies. Written consent of instructor and program director are required. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: BPH 2070. Frequency: Every Fall, Winter and Summer. For more information please email the BSPH Program Director at km1320@nova.edu.

BSHI—Health Informatics

BSHI 1001 Principles of Health Informatics (3 credits)
This course provides an overview of the field of health informatics. It provides coverage of the status of and trends about the field's origins and development. Students discuss patient informatics, electronic health records, health related data structures, software applications, enterprise architecture in health care and public health organizations. The concept of meaningful use is introduced and the importance of data quality assessment, data standards, data integrity, HIPAA, privacy confidentiality, health care decision support methods, and emerging health information technologies are discussed. Frequency: Fall, Winter, and Summer.

BSHI 1002 Overview of the United States Health Care System (3 credits)
This course provides an overview of how healthcare and public health are organized and how their services are delivered in the United States. Topics to be covered include public policy (including U.S. health reform initiatives); organization of healthcare systems; components and operation of healthcare organizations, including e-health delivery; professional roles and accreditation; and legal and regulatory issues, including licensure requirements. Frequency: Fall and Winter (Course Launch Academic Year: 2021-2022)

BSHI 2001 Principles of Health Care Quality (3 credits)
This course introduces concepts of continuous improvement (CI) and quality management (QM) approaches in today's information-driven health care organizations for delivery of care. Students address benefits and challenges in managing customer satisfaction benchmarking, performance measurement, QFD, statistical quality process, and related CI and QM activities. Methods for assessing utilization and resource management and other performance standards to improve quality are discussed. Regulatory standards and accreditation standards are reviewed in the context of their role to ensure quality. Various approaches to outcomes measurement and organizational performance are also discussed. The broader principles of ethics including data ownership, beneficial use, justice, and autonomy are also discussed. Prerequisites: BSHI 1002. Frequency: Fall and Winter (Course Launch Academic Year: 2022-2023)

BSHI 2002 Legal and Ethical Issues in Health Informatics (3 credits)
This course introduces students to the important role law and ethics play in determining the current and emerging issues taking place in health informatics. Students develop skills in analyzing political, legislative and ethical aspects of informatics issues. Frequency: Fall and Winter (Course Launch Academic Year: 2022-2023)

BSHI 2004 Health Information Exchange (3 credits)
This course provides fundamental knowledge of health information exchange (HIE). Topics covered include health information technology, governance, and policy of HIE. Prerequisites: BSHI 1001 and BSHI 1002. Frequency: Winter (Course Launch Academic Year: 2021-2022)

BSHI 2006 Principles of Management and Leadership in Health Care Organizations (3 credits)
The course teaches the fundamental concepts of management and leadership for health care organizational. Students will learn diversity training and apply these newly learned knowledge and skills to solving real organizational issues through case studies. Students will learn change management theory as it relates to technology. Prerequisites: BSHI 1001 and BSHI 1002. Frequency: Fall (Course Launch Academic Year: 2022-2023)

BSHI 2008 Principles of Health Information Technology Governance (3 credits)
Students will learn about minimizing information risks and the importance of maximizing value. This can only be accomplished by every department in the health care organization. Information governance is quickly becoming a critical area of organizational administration. Students will learn strategies to implement an information governance program. Prerequisites: BSHI 1001 and BSHI 1002. Frequency: Winter (Course Launch Academic Year: 2022-2023)

BSHI 2010 Principles of Project Management in Health Care (3 credits)
This course introduces the fundamental principles of project management from a health information technology (HIT) perspective. Students will learn key project management knowledge and skills including scope management, time management, cost management, quality management, human resource management, communication management, risk management, and procurement management. Students will develop hands-on skills with the project management software assignment. Prerequisites: BSHI 1001 and BSHI 1002. Frequency: Fall (Course Launch Academic Year: 2023-2024)

BSHI 3001 Electronic Health Records (3 credits)
This course is an introduction to the electronic health record (EHR). Students will study the use of the EHR in improving healthcare quality, accessibility, and cost-effectiveness. EHR implementation and its use within the internal clinical office will be examined. The EHR will be studied in the context of a comprehensive Health Information System (HIS) supporting our society's interdisciplinary clinical healthcare system. Prerequisites: BSHI 2002. Frequency: Fall and Winter (Course Launch Academic Year: 2023-2024)

BSHI 3002 Health Information Security (3 credits)
This course introduces processes, procedures,
and equipment for data storage, retrieval, and retention. Coursework addresses laws and regulations governing access to confidential healthcare information. Managing access to, and disclosure of, health information is covered. The course focuses on developing and implementing policies, procedures, and processes to protect the security and privacy of confidential healthcare. Frequency: Fall and Winter (Course Launch Academic Year: 2023-2024)

BSHI 3004 Bioinformatics (3 credits)
This course introduces students to the concepts and practice of bioinformatics. Topics that are focused on include biological databases, sequence alignment, gene, and protein structure prediction, molecular phylogenetics, genomics, and proteomics. Students will develop basic understanding of the skills required to collect and presentation of bioinformatics data. Prerequisites: BSHI 1001 and BSHI 1002. Frequency: Winter (Course Launch Academic Year: 2023-2024)

BSHI 3005 Health Informatics Seminar (3 credits)
The course focuses on developing an understanding of current and future directions for the use of information technology to improve the health and health care of patients cared for in the U.S. health system. Speakers with extensive informatics experience and knowledge from both academia and industry present their work and engage in scholarly discussions during a question and answer period. Prerequisites: BSHI 3002. Frequency: Fall and Winter (Course Launch Academic Year: 2023-2024)

BSHI 3006 Public Health Informatics (3 credits)
This course introduces students to public health informatics. Students will learn about the systematic application of information and computer science and technology as it relates to public health. Students will learn how information, computer science, and technology are linked to the practice of public health. Students will learn basic skills of using some informatics tools in public health practices. Prerequisites: BSHI 1001 and BSHI 1002. Frequency: Fall (Course Launch Academic Year: 2024-2025)

BSHI 4001 Health Informatics Internship I (3 credits)
This course allows the student to select an area of interest in which to apply the theories, concepts, knowledge, and skills gained during the didactic courses in a real-world setting. The student will work under the supervision of a site-based preceptor and a NSU-based faculty advisor. Placement is arranged at a relevant health care organization, and sites will include the medical school, hospitals, medical clinics, and community health centers. The student is expected to acquire skills and experiences in the application of basic health informatics concepts and specialty knowledge to the solution of health information technology problems. Students will be actively involved in the development, implementation, or evaluation of an informatics-based application or project. Prerequisites: BSHI 3005. Frequency: Fall and Winter (Course Launch Academic Year: 2023-2024)

BSHI 4002 Health Informatics Internship II (3 credits)
This course is a continuation of Health Informatics Internship I which allows the student to select an area of interest in which to apply the theories, concepts, knowledge, and skills gained during the didactic courses in a real-world setting. The student will work under the supervision of a site-based preceptor and an NSU-based faculty advisor. Placement is arranged at a relevant health care organization, and sites will include the medical school, hospitals, medical clinics, and community health centers. The student is expected to acquire skills and experiences in the application of basic health informatics concepts and specialty knowledge to the solution of health information technology problems. Students will be actively involved in the development, implementation, or evaluation of an informatics-based application or project. Prerequisites: BSHI 4001. Frequency: Fall and Winter (Course Launch Academic Year: 2024-2025)

BSHI 4004 Health Informatics Research Methods (3 credits)
This course provides students an opportunity to develop their knowledge and skills in research methods. Students will explore research language, ethical principles, various research approaches and challenges. The core elements of the research methods and processes will be explored that are both quantitative and qualitative, as well as mixed methods. Students will build their research knowledge and skills and use these theoretical underpinnings including critically reviews of literature relevant to health informatics to put together a research project. Prerequisites: BSHI 1001 and BSHI 1002. Frequency: Winter (Course Launch Academic Year: 2024-2025)

BSHI 4006 Independent Study in Health Informatics (1-3 credits)
The student will have the opportunity to explore a specific topic in the field of health informatics. While each students experience will be different the general flow is a written report on the topic area, impact on the health care system and findings that will be presented. Learning objectives for each student will be different so a general ideal is presented below. Prerequisites: BSHI 1001 and BSHI 1002. Frequency: Fall and Winter (Course Launch Academic Year: 2024-2025)

BSHN—Human Nutrition

BSHN 1200 Nutrition for the Health

Proessions (3 credits)
This course promotes an in-depth understanding of the fundamental principles of nutrition including digestion, absorption, and metabolism of macro and micronutrients, food safety, food insecurity, chronic diseases and nutrition across the lifespan. Learning objectives and experiential activities provide a basis for competent interprofessional communication of nutrition principles and practice for health professions. Frequency: Every Fall and Winter

BSHN 1300 Careers in Nutrition (3 credits)
Students explore professions and meet role models associated with nutrition and dietetics practice. Course emphasizes the knowledge, skills, and practical competencies needed for successful employment and/or post-graduate education in a nutrition-related field. Frequency Every Winter.

BSHN 1400 Nutrition Seminar (3 credits)
This survey course builds on the foundation of nutrition-related professions including food safety, medical terminology, and evidence-based practice. Frequency Every Winter.

BSHN 2000 Principles of Wellness (3 credits)
Course engages students in the active relationship between food consumption, personal health and wellness, including foundations of human behavior, physical activity and fitness, and motivational change. This is an experiential learning course that satisfies one (1) Experiential Education and Learning (ExEL) unit. Frequency: Every Fall.

BSHN 2100 Food and Culture (3 credits)
Students explore the relationship between food and culture along with influences on food accessibility, production and consumption. Students evaluate cultural dietary patterns on health status of populations and identify important priorities for health care providers in culturally-sensitive practice. Frequency Every Fall.

BSHN 2250 Hot Topics in Nutrition (3 credits)
Virtually no discipline attracts greater public attention than nutrition. This course will cover the most recent nutritional issues being discussed pertaining to culture, food policy, the environment, human health, dietary supplements, plant compounds, and social media. This course explores several hot topics in nutrition using science-based practice to balance the perspectives of scientists and consumers. Students will explore controversial trends and engage in debates designed to illuminate multiple points of view. Students will have the opportunity to research, evaluate, and present their findings on a nutrition-related topic that is of concern to them. Frequency Every Summer.

BSHN 2300 Nutrition Education, Counseling & Communication (3 credits)
Students are prepared with basic strategies in nutrition education, counseling and learning for individuals and groups. Course includes exposure to practice techniques such as interviewing, goal setting, lesson planning, assessment and evaluation. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BSHN 1200. Frequency: Every Fall.

BSHN 2400 Community Nutrition (3 credits)
Students are prepared with the fundamental guidelines of nutrition programming in the community to improve the health of individuals and groups. Course applies the basic concepts of needs identification, planning, developing, funding, and implementing effective nutrition-based strategies to advance population health. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites BSHN 2300. Frequency: Every Winter.

BSHN 2500 Introduction to Food Service Systems (3 credits)
Course presents an overview of integrated components in safe food service such as management styles, human resources, food supply, equipment and facilities. Topics include the application food systems management, menu planning, food sourcing, purchasing, production, safety and quality improvement. Course emphasizes the role of leadership and professional development skills in this sector. Prerequisites: BSHN 1200 and BSHN 2100. Frequency: Every Winter.

BSHN 3000 Lifespan Nutrition (3 credits)
Students explore the life stages including pregnancy, infancy, childhood, adolescence, and older adulthood from physiological, social, and behavioral perspectives. Course content focuses on the special nutritional needs of each life stage for optimal growth and development, maturation, aging, and prevention of disease. Prerequisite: BSHN 1200. Frequency: Every Fall and Winter.

BSHN 3100 Nutrition Advocacy and Public Policy (3 credits)
Course examines how nutritional status of individuals and populations is affected by local and global food and nutrition policies. Course addresses major public policy initiatives and legislation related to public health nutrition, health promotion and disease prevention, and professional practice and advocacy. Frequency: Every Fall.

BSHN 3200 Nutrition at the Cellular Level (3 credits)
Students examine in detail the nutritional biochemistry and metabolic pathways essential for human health. Course focuses on macronutrient and micronutrient metabolism at the cellular level, with an overview of numerous factors involved in deficiencies and excesses with the goal to maximize wellness and human function. Prerequisites: BSHN 1200, BIOL 1500, and CHEM 1300. Frequency: Every Winter.

BSHN 3300 Global Nutrition (3 credits)
Students explore concepts and policies related to global health and nutrition, with a focus on at-risk populations, cultural issues, agricultural systems, and food availability and security in local and global settings. Prerequisites: BSHN 2100, BSHN 2400, and BSHN 3100. Frequency: Every Fall.

BSHN 3400 Plant-Based Nutrition (3 credits)
This survey course examines current scientific principles associated with a plant-based eating patterns. Course includes a discussion of the impact of a plant-based lifestyle on optimal human health and the relationship between the diet and the development of chronic disease. Other topics include sustainability, global impact, and food supply chain in this area. Prerequisites: BSHN 2000 and BIOL 1500. Frequency: Every Winter.

BSHN 3500 Interprofessional Models of Nutrition Care (3 credits)
Students explore the roles of nutrition professionals and the team interactions within various settings. Course focuses on interprofessional communication skills and team leadership in addition to content related to decision-making, conflict resolution, and ethical integrity in a healthcare team. Prerequisite: BSHN 2300. Frequency: Every Winter.

BSHN 3600 Nutrition Implications for Special Populations (3 credits)
This survey course explores vulnerable populations such as those with genetic disorders, inborn errors of metabolism, and physical disabilities along with the nutritional interventions for management of specific chronic conditions and aging. Prerequisite: BSHN 3000. Frequency: Every Winter.

BSHN 4000 Exploring Nutrition Research (3 credits)
Course applies nutrition-based research through the systematic review of literature and the scientific method. Topics include the use of research ethics, basic design methods, human subjects’ protection, scientific communication and evidence-based practice. Prerequisites: BSHN 1200, BSHN 3200 and MATH 2020. Frequency: Every Winter.

BSHN 4100 Principles of Medical Nutrition Therapy (3 credits)
Students learn fundamentals of medical nutrition therapy which includes knowledge of environmental and pathophysiology factors. Major chronic illnesses are used as the basis for nutrition care as a primary treatment and preventative measure. Course includes principles and practices related to the Nutrition Care Process. Prerequisites: BSHN 2000 and BSHN 3000 and BSHN 3200. Frequency: Every Fall.

BSHN 4200 Human Function and Nutrition (3 credits)
Course details the nutritional needs for optimal function of the human body, including sports performance. Students examine nutritional requirements as well as complementary and integrative practices on health and human function for an active lifestyle. Topics includes a discussion of current healthy weight status. Prerequisites: BSHN 2000 and BSHN 3000 and BSHN 3200. Frequency: Every Fall.

BSHN 4300 Nutritional Sciences and Academic Writing (3 credits)
This writing-enriched course explores current research literature in nutritional sciences and engages students to master the basic foundation of scholarly work. Students analyze and transform complex information into articulate, innovative compositions worthy of publication. Prerequisites - BSHN 3100 and BSHN 4000. Frequency: Every Winter.

BSHN 4400 Directed Individual Study (1-4 credits)
This course provides the opportunity for a student to engage individualized course of study under the direct supervision of a faculty member. Students select a specific topic in nutrition that is not duplicated in other courses to provide additional preparation and experiential learning. Students take active responsibility for their own professional goals and development. Advisor’s Approval Needed. Frequency: Every Winter.

BSHN 4500 NDTR Practicum: Community and Client Services (3 credits)
Course comprises 120 hours of the supervised experiential learning component required for the Nutrition and Dietetic Technician, Registered program requirements as outlined by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Practice components take place in local facilities to provide experiences in clinical/patient care and community settings and programs. Advisor approval, reserved for cohort students admitted into the NDTR Professional Practice Concentration only. Frequency: Every Fall and Winter.

BSHN 4501 NDTR Practicum: Management and Food Service Systems (3 credits)
Course comprises 120 hours of the supervised experiential learning component required for the Nutrition and Dietetic Technician, Registered program requirements as outlined by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Practice components take place in local facilities to provide experiences in food production and foodservice administration/leadership. Advisor approval, reserved for cohort students admitted into the NDTR Professional Practice Concentration only. Frequency: Every Winter.
CENG—Computer Engineering

CENG 1600 Digital Logic/Lab (4 credits)
This course introduces how different types of numbers are represented and operated upon in binary systems. It provides fundamentals of Boolean algebra, basic logic gates, and how Boolean expressions and circuits are minimized using various methods. Students will learn how to design various types of combinational logic circuits including arithmetic circuits (i.e., adders, subtractors, and comparators), multiplexers, demultiplexers, encoders, decoders, programmable logic arrays (PLAs), read only memory (ROMs), and programmable array logic (PALs). They will also understand the operation of basic types of flip-flops, and how they are stacked together to create registers. They will design finite state machines (FSMs) using Mealy vs. Moore models and analyze them using state diagrams, state tables, timing diagrams, and algorithmic state machine charts. Prerequisites: MATH 1040 or higher. Frequency: Every Winter.

CENG 3720 Computer Systems Engineering (3 credits)
This course covers an array of topics such as system level modeling and evaluation of computer systems, life cycle cost analysis, requirements analysis and elicitation, specifications, architectural design, reliability and performance evaluation, testing, maintenance, project management, concurrent hardware and software design, implementation, and specialized systems. Prerequisite: CSIS 3750. Frequency: Every Fall.

CENG 4710 Embedded Systems (4 credits)
This course introduces a variety of topics such as embedded microcontrollers and microprocessors, embedded programming, real-time operating systems, low power computing, reliable system design, networked embedded systems, design methodologies, interfacing and mixed-signal systems, and tool support. Laboratory projects are oriented so that students have to successfully design, implement, debug and document computer solutions involving hardware and software. Each student is required to design various projects. Prerequisites: CSIS 3810 and CENG 3310. Frequency: Every Fall.

CENG 4750 VLSI Design (4 credits)
This course introduces how to design chips using high-level programming languages, and stresses the underlying circuits principles necessary to build high performance and low power systems. The course focuses on VLSI circuit design for modern CMOS technologies. The topics covered in this course include: logic design, high level design languages, basic transistor operation, circuit families (static CMOS, dynamic circuits, and domino), clocking, circuit simulation, physical design, and computer-aided design tools. Prerequisites: EENG 3710 and CSIS 3051. Frequency: Every Winter.

CENG 4900 Senior Capstone Design (4 credits)
This course covers a general design methodology and consideration of alternative solutions in project planning and design. Teams of students will be assigned a major design problem that will be the focus of the capstone design project throughout the course. Oral presentation and report writing are required. Prerequisite: Consent of department chair. Frequency: Every Winter.

CENG 4910 Engineering Ethics Seminar (1 credit)
This course presents how to avoid and, if possible, resolve any harmful situations in the workplace while being fully aware of legal constraints, implications, and the organizational structure of a business. Topics include the current framework of ethics and examples of ethical dilemmas in engineering practice, systematic methods for resolving ethical situations, and issues prevalent in professional ethics caused by cultural differences. Pre-Requisite: Junior or Senior. Frequency: Every Fall.

CENG 4950 Internship in Computer Engineering (1-12 credits)
A work experience for 16 weeks in the student's major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.0 or higher, major GPA of 2.25 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Upon Request see academic Department Chair.

CENG 4990 Independent Study in Computer Engineering (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and the division director. Frequency: Upon Request see academic Department Chair.

CHEM—Chemistry

CHEM 1100 Fundamentals of Chemistry (3 credits)
The fundamental laws, principles and theories of atomic structure, molecular structure and bonding, stoichiometry, states of matter/solutions, energy changes, and oxidation-reduction reactions are presented along with an introduction to organic chemistry and biochemistry. Prerequisite: MATH 1040 or higher. Frequency: Every Fall and Winter.

CHEM 1150 Essentials of Chemistry (3 credits)
A one-semester study of the essentials in chemistry with a foundation of energy and the nature of matter. Upon this foundation students will investigate chemical compounds, chemical reactions, chemical nomenclature, and reaction stoichiometry. It continues with chemical periodicity, chemical bonding, and gases. The course concludes with an introduction to kinetics, equilibrium, acid/base theory, and redox reactions. Prerequisite: MATH 1040 or higher. Frequency: Every Winter.

CHEM 1200 Survey of Forensic Science/Lab (4 credits)
This course is structured to introduce the basic disciplines of forensic science such as fingerprints, drug analysis, arson investigations and DNA analysis. This course is appropriate for non-science major students and students who are looking to pursue the field of forensic science. Frequency: Odd Year Fall.

CHEM 1300 General Chemistry I/Lab (4 credits)
This course and the related lab is the first part of a two-semester sequence that studies the laws, principles and theories of atomic structure, molecular structure and bonding, stoichiometry, states of matter/solutions, energetics, oxidation reduction, and laboratory chemistry, including their applications. Prerequisite: MATH 1200 or higher except MATH 2020 and/or other statistics classes. Frequency: Every Fall and Winter.

CHEM 1300H General Chemistry I/Lab Honors (4 credits)
This course and the related lab is the first part of a two-semester sequence that studies the laws, principles and theories of atomic structure, molecular structure and bonding, stoichiometry, states of matter/solutions, energetics, oxidation reduction, and laboratory chemistry, including their applications. Prerequisites: MATH 1200; Honors students only. Frequency: Every Fall.

CHEM 1310 General Chemistry II/Lab (4 credits)
This course and the related lab is the second part of a two-semester sequence that studies atomic structure, molecular structure and bonding, states of matter/solutions, dynamics (kinetics and thermodynamics), equilibrium, electrochemistry, and laboratory chemistry including their applications. Prerequisite: CHEM 1300 OR CHEM 1300H. Frequency: Every Fall and Winter.

CHEM 1310H General Chemistry II/Lab Honor (4 credits)
This course and the related lab is the second part of a two-semester sequence that studies atomic structure, molecular structure and bonding, states of matter/solutions, dynamics (kinetics and thermodynamics), equilibrium, electrochemistry, and laboratory chemistry including their applications. Prerequisite: CHEM 1300 or CHEM 1300H. Honors students only.
CHEM 1500 Introduction to Environmental Chemistry (3 credits)
This course teaches the basic principles of chemistry using examples from the environment. Through a brief introduction to areas of inorganic, organic, and biochemistry, the diversity of chemical pollutants in the environment will be explored. Emphasis will be placed on environmental issues such as the sources of chemical pollutants, the reactions that produce them, and their toxicity. A basic level of algebra is essential. Prerequisite: MATH 1030 or higher. Frequency: Every Winter.

CHEM 2200 Essentials of Organic Chemistry (4 credits)
A one-semester study of the structure, nomenclature, preparation, properties, and reactions of organic compounds, organized by functional groups and reaction mechanisms. Includes laboratory sessions. Prerequisite: CHEM 1310 or CHEM 2310 or CHEM 1310H. Frequency: Upon request and see academic department chair.

CHEM 2400 Organic Chemistry I/Lab (4 credits)
This course and the related lab is the first part of a two-semester sequence that studies the chemistry of carbon compounds, including their structure, nomenclature, preparation, reactions, analysis, spectroscopy, and properties. Reaction mechanisms are stressed within a functional group framework. The laboratory session introduces basic laboratory techniques frequently utilized in organic syntheses. Prerequisite: CHEM 1310 or CHEM 2310 or CHEM 1310H. Frequency: Every Fall and Winter.

CHEM 2400H Organic Chemistry I/Lab (4 credits)
This course and the related lab is the first part of a two-semester sequence that studies the chemistry of carbon compounds, including their structure, nomenclature, preparation, reactions, analysis, spectroscopy, and properties. Reaction mechanisms are stressed within a functional group framework. The laboratory session introduces basic laboratory techniques frequently utilized in organic syntheses. Prerequisite: CHEM 1310 or CHEM 2310 or CHEM 1310H. Frequency: Every Fall and Winter.

CHEM 2410H Organic Chemistry II/Lab (4 credits)
This course and related labs, the second part of a two-part sequence, study the chemistry of carbon compounds, including their structure, nomenclature, preparation, reactions, analysis, and properties. Reaction mechanisms within a functional group framework are stressed. Stability and reactivity, nucleophilicity and electrophilicity, and structure-activity relationships will also be examined. The laboratory session practices basic organic syntheses. Prerequisite: CHEM 2400 OR CHEM 2400H. Frequency: Every Fall and Winter.

CHEM 3050 Chemical Literature and Seminar (3 credits)
The history, structures, and use of literature search tools will be covered. Through the use of chemical literature searches and the literature itself, scientific papers and oral presentations will be prepared and delivered. Students will also be acquainted with the availability and expectations of different chemistry professions, the basic nature of science and chemistry, ethical issues in chemistry, and chemical safety. Prerequisite: CHEM 2410 or CHEM 2410H. Frequency: Every Winter.

CHEM 3150 Environmental Chemistry (3 credits)
In this course, fundamental principles of chemistry, such as kinetics, equilibrium and bonding, are used to understand the sources, fates and transformations of chemical components in the natural and polluted environments. The topics to be discussed include energy utilization, stratospheric ozone depletion, climate change, air pollution and control, water pollution and treatment, toxic chemicals. Some focus will be placed on environmental implications of energy utilization, chemistry of the atmosphere, hydrosphere, lithosphere, and biosphere. Prerequisite: CHEM 2400 or CHEM 2400H. Frequency: Odd Year Fall.

CHEM 3215 Survey of Rational Drug Design (3 credits)
This course aims to provide students with an understanding of the process of drug discovery and development from the identification of novel drug targets to their introduction into clinical practice. It covers the basic principles of how drugs are discovered with emphasis on lead identification, lead optimization, classification and kinetics of molecules targeting enzymes and receptors, prodrg design and applications, as well as structure-based drug design methods. Recent advances in the use of computational and combinatorial chemistry in drug design will also be presented. Prerequisite: CHEM 2410 or CHEM 2410H. Frequency: Infrequent: less than once every two years.

CHEM 3400 Biophysical Chemistry (3 credits)
Biophysical Chemistry covers thermodynamics concepts, electrochemistry, and introduction to statistical mechanics and their relation to thermodynamics functions. This course will explore a range of topics at the intersection between chemistry and biology. Prerequisites: MATH 2100 OR MATH 2100H, AND PHYS 2360 OR PHYS 2500, AND BIOL 1510 OR BIOL 1510H, AND CHEM 2410 OR CHEM 2410H. Frequency: Infrequent: less than once every two years.

CHEM 3405 Biophysical Chemistry/Lab (4 credits)
Biophysical Chemistry covers thermodynamics, quantum Mechanics and applies principles of Statistical Mechanics and their relation to thermodynamics functions. This course will explore a range of topics at the intersection between chemistry and biology. Pre-Requisites: (MATH 2100 OR MATH 2100H) AND (PHYS 2360 OR PHYS 2500) AND (BIOL 1510 OR BIOL 1510H) AND (CHEM 2400 OR CHEM 2400H). Frequency: Every Fall.

CHEM 3410 Biophysical Chemistry II/Lab (4 credits)
Biophysical Chemistry II is an introduction to the principles of Statistical Mechanics, and Quantum Mechanics. This course will explore a range of topics at the intersection between chemistry and biology. Prerequisite: CHEM 3400. Frequency: Infrequent: Less than once every two years.

CHEM 3460 Quantitative Analysis/Lab (4 credits)
The quantitation of chemical substances in complex mixture is the focus of this lab intensive course. Methods of sample preparation and analysis will be examined. The mathematical treatment of data to produce quantitative information for chemical substances will also be emphasized. Prerequisite: CHEM 2400 OR CHEM 2400H. Frequency: Every Fall.

CHEM 3650 Biochemistry/Lab (4 credits)
The chemical properties of amino acids, monosaccharides, lipids and nucleotides are discussed. The structure of proteins, carbohydrates and biological membranes are studied. Mechanisms of enzymatic catalysis are outlined in detail with an emphasis on the structure/function of cofactors. Glycolysis and citric acid cycle are described. Electron transport and ATP synthesis are discussed in both mitochondria and chloroplasts. Metabolism of lipids, amino acids and nucleotides are presented. In addition to mechanistic studies of biochemical pathways and cycles, regulation of these processes is also covered. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: BIOL 1500 and CHEM 2410 or CHEM 2410H. Frequency: Fall and Winter.

CHEM 3700 Physical Chemistry I/Lab (4 credits)
CHEM 3710 Physical Chemistry II/Lab (4 credits)
Physical Chemistry II is a continuation of the study of physical chemistry and covers chemical statistics, quantum mechanics, atomic and molecular spectroscopy, and molecular structure. This course also includes a lab which explores lab techniques used in physical chemistry. Prerequisite: CHEM 3700. Frequency: Every Winter.

CHEM 3800 Principles of Pharmaceutics (3 credits)
This course provides the scientific background and theories important in dosage form design. Emphasis will be placed on biopharmaceutical and physicochemical considerations of various routes of delivery and delivery systems. The basics of appropriate handling and incorporation of medicinal agents into select dosage forms will also be presented to illustrate important physical principals. The student will also be introduced to essential concepts behind parenteral and biological drug delivery. Prerequisites: CHEM 1310 General Chemistry II/Lab and PHYS 2350 General Physics I/Lab or PHYS 2400 Physics I/Lab. Frequency: Every Fall.

CHEM 3850 Principles of Pharmacology (3 credits)
This course provides students a detailed understanding of basic pharmacology. It introduces the basic principles of drug absorption, distribution, metabolism, and elimination, as it pertains to pharmacology. Special emphasis is placed on determinants of therapeutic window, factors that affect the mechanism of action and side effects of the most common drugs. The concepts of receptor theory including types of receptors, agonists, antagonists, receptor modulation and intracellular signaling pathways are discussed. The mechanism of action and relevant facts for selected drugs commonly used in the US are also presented. Prerequisites: BIOL 3330 Anatomy and Physiology II/Lab and CHEM 2410 Organic Chemistry II/Lab. Frequency: Every Fall.

CHEM 4005 Inorganic Chemistry I (3 credits)
In this course modern inorganic chemistry topics including the principles of molecular structure, bonding periodicity, band theory, and chemical reactivity with application to compounds of the main group and transition elements are studied. Prerequisite: CHEM 2410 or CHEM 2410H. Frequency: Every Fall.

CHEM 4010 Inorganic Chemistry II/Lab (5 credits)
In this course will cover advanced modern inorganic chemistry topics including ligand field, reactions mechanisms, and the 18 electron rule for inorganic and organometallic compounds are studied. The lab component covers modern techniques of inorganic and organometallic chemistry including experience with glovebox, Schlenk line, and vacuum line methods. Prerequisites: CHEM 3460 and CHEM 4005. Frequency: Every Winter.

CHEM 4101 Senior Chemistry Seminar (1 credit)
This senior seminar course is designed for chemistry major students in their senior year. It prepares students to give a seminar on their undergraduate research or a literature investigation of a related area. Prerequisite: CHEM 3101. Frequency: Every Winter.

CHEM 4150 Chemical Instrumentation (4 credits)
This is an applied chemistry course designed to emphasize the typical instrumentation methods used in chemistry. The course will focus on chemical analysis and chemical instrumentation. Classical methods such as gas chromatography, liquid chromatography, potentiometry, and electrochemistry will be supplemented with more modern and analytical instrumental methods such as UV-visible spectrophotometry, FT-IR, GC, fluorimetry, NMR, and atomic spectroscopy (absorption and emission). Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: CHEM 2410 or CHEM 2410H. Frequency: Winter.

CHEM 4200 Plant Drug Analysis (3 credits)
This course introduces the chemical techniques used to extract, separate, and identify medicinal drugs derived from plants. Eleven major drug classes—essential oils, alkaloids, anthracene derivatives, argentin, bitter principle, comar, flavinoids, cardiac glycoside, saponin, pungent principle, and mustard oil—will be covered. The course also examines the botanicals they are derived from. By the end of the course, the student is expected to execute a qualitative screening of an unknown drug and identify its class and the major pharmacetical components present. Prerequisite: CHEM 2410 or CHEM 2410H. Frequency: Infrequent: less than once every two years.

CHEM 4500 Principles of Pharmacokinetics (3 credits)
This course covers mechanisms and rates of the processes of drug absorption, distribution, metabolism, and elimination in the body. The course also examines how the fate of drugs in the body is influenced by physiologic and biochemical processes. Emphasis is placed on the mathematical techniques involved in the analysis of plasma concentration-time curves to determine phamacokinetic parameters. This course describes the application of basic pharmacokinetic principles in drug therapy. Simulations and case studies are also incorporated.

CHEM 4900 Special Topics in Chemistry: Principles of Medicinal Chemistry (3 credits)
The organic chemistry of medicinal agents: understanding the relationships between chemical structure and their individual mode of action. Including the principles involved in drug discovery and development, and in enzyme-inhibition. The first half will focus on the chemical and biochemical background needed to understand modern medicinal chemistry, whereas the second half will concentrate on the medicinal chemistry of select receptor-agent interactions. Prerequisite: CHEM 2410 or CHEM 2410H. Frequency: Upon request and see academic department chair.

CHEM 4900A Special Topics in Chemistry: Principles of Medicinal Chemistry (3 credits)
The organic chemistry of medicinal agents: understanding the relationships between chemical structure and their individual mode of action. Including the principles involved in drug discovery and development, and in enzyme-inhibition. The first half will focus on the chemical and biochemical background needed to understand modern medicinal chemistry, whereas the second half will concentrate on the medicinal chemistry of select receptor-agent interactions. Prerequisite: CHEM 2410. Frequency: Upon request and see academic department chair.

CHEM 4900B Special Topics in Chemistry: Nutritional Biochemistry and Metabolism (3 credits)
This course will provide a firm foundation of the biochemical functions of the macronutrients, micronutrients and trace nutrients in humans. Starting with the processes of digestion and absorption of the nutrients, and proceeding through their participation in the various metabolic pathways that occur inside cells, the focus will be on the precise enzymatic steps that require each vitamin and mineral, and the biochemical consequences of a lack of each nutrient in humans. These will then be related to the physiological and pathological features of deficiency for each nutrient in humans. The nutritional requirements for each nutrient will be related to guidelines promulgated by the U.S. Government (e.g. Dietary Reference Intakes) and other bodies that are used to assess human nutritional sufficiency. Prerequisite: CHEM 3650. Frequency: Upon request and see academic department chair.

CHEM 4950 Internship in Chemistry (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details.
and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of Department Chair. Frequency: Upon request and see academic department chair.

CHEM 4950A Internship in Chemistry (A) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of Department Chair. Frequency: Upon request and see academic department chair.

CHEM 4950B Internship in Chemistry (B) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of Department Chair. Frequency: Upon request and see academic department chair.

CHEM 4950C Internship in Chemistry (C) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of Department Chair. Frequency: Upon request and see academic department chair.

CHEM 4950D Internship in Chemistry (D) (1-12 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and Department Chair. Frequency: Upon request and see academic department chair.

CHEM 4950E Internship in Chemistry (E) (1-12 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and Department Chair. Frequency: Upon request and see academic department chair.

CHEM 4950F Internship in Chemistry (F) (1-12 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the Department Chair. Frequency: Upon request and see academic department chair.

CHEM 4950G Internship in Chemistry (G) (1-12 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the Department Chair. Frequency: Upon request and see academic department chair.

COMM—Communication

COMM 1100A Communication Practicum A (1 credit)
In this hands-on course, students learn, develop, and apply the skills necessary to function in a professional media setting. Students will gain practical experience related to the field of media by working in the Office of Student Media, under the supervision of a communication faculty member. Students will be able to work in fields such as newspaper, television, radio, web, public relations, and event planning. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

COMM 1100B Communication Practicum B (1 credit)
In this hands-on course, students learn, develop, and apply the skills necessary to function in a professional media setting. Students will gain practical experience related to the field of media by working in the Office of Student Media, under the supervision of a communication faculty member. Students will be able to work in fields such as newspaper, television, radio, web, public relations, and event planning. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

COMM 2040 Public Relations Writing (3 credits)
This course focuses on the process of writing in the practice of public relations, including research and composition of the following types of documents/publications: annual reports, news releases, brochures, communication audits, direct mail campaigns, newsletters, PSAs, and organization profiles. Prerequisite: COMP 2000 or COMP 2000H or COMP 2020. Frequency: Every Fall.

COMM 2060 Media and Gendered Images (3 credits)
This course examines gendered images in popular media other than literature, including film, music videos, television, and comic books, and their impact on mainstream America. Prerequisites: COMP 2000 or COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Fall.

COMM 2100 Mass Media (3 credits)
This course examines gendered images in popular media other than literature, including film, music videos, television, and comic books, and their impact on mainstream America. Prerequisites: COMP 2000 or COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Fall.

COMM 2200 Introduction to Broadcast Journalism (3 credits)
Training in the elements of broadcast reporting with emphasis on the modern electronic news story. Students will learn the elements of broadcast news, the style and structure of broadcast news writing, and the technology of radio production. Prerequisite: COMP 1500 or
COMM 2300 Intercultural Communication (3 credits)
The purpose of this course is to develop an understanding of communication across cultural boundaries and the role of diversity in interpersonal, public, and mass communication. Students will study communication differences across cultures and the importance of being rhetorically sensitive when communicating with diverse audiences. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Winter.

COMM 2400 Principles of Advertising (3 credits)
This course examines the efficacy of advertising in modern society. It provides students with a fundamental understanding from which to interpret, understand, and create advertising. The course also provides a foundation for further study of advertising. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

COMM 2500 Introduction to Video Editing (3 credits)
This course provides students hands-on opportunities to learn the art and craft of digital video editing through the use of various software programs. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

COMM 2800 Introduction to Field Video Production (3 credits)
This course offers an introduction to electronic field production equipment and techniques for various types of microphones, cameras, and editing equipment, including portable field camera set-up, operations, transportation, and maintenance video editing, lighting, scripting, media aesthetics, and logistics. Students will learn how to produce top-quality audio and video footage using shoot preparation, direction and production techniques. Students will develop both their creative and technical skills by engaging in a combination of production exercises, projects, readings, and critiques. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

COMM 2900 Research Methods in Communication (3 credits)
This course teaches the student to understand and interpret research applications, methods and results, and practice basic research writing skills. Students will become familiar with qualitative and quantitative research methods commonly required in communication studies. Prerequisites: One COMM course at or above the 2000 level, or one SPCH course; and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Fall.

COMM 3110 Communication Theory (3 credits)
This course focuses on different theories of communication at the levels of interpersonal, public, and mass communication. Students will learn numerous perspectives on the role and value of human interaction from fundamental communication theories and models to contemporary theoretical approaches for understanding the connection between human communication and human behavior. Prerequisites: One COMM course at or above the 2000 level and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Fall.

COMM 3200 Principles of Public Relations (3 credits)
This course focuses on the nature, role, and scope of public relations on national and international levels. Topics introduced are organizational behavior and the ways in which it is shaped, public relations ethics, public relations practice in private and public arenas, emphasizing management and public relations strategy. Prerequisites: COMM 2400 and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Winter.

COMM 3300 Multimedia Writing (3 credits)
Due to the convergence of media, this course will survey the different formats and styles used in multimedia writing. Students will learn to tailor messages to their intended audiences and produce effective writing across various mediums, including print, radio, television, and the web. It will familiarize students with the ever-changing media environment and help students acquire the skills necessary to communicate effectively across multiple mediums. The course will also discuss how students can prepare to transition from the classroom to a multimedia career. Prerequisites: COMP 2000 or 2020 or COMP 2000H; and COMM 2010 or COMM 2200. Frequency: Every Fall

COMM 3310 Organizational Communication (3 credits)
This course examines the interrelationships of communicative behavior and attitudes with organizational policies, structures, and outcomes, and it uses case studies to teach theoretical principles. Prerequisite: COMM 2400. Frequency: Every Fall.

COMM 3400 Strategic Visual Communication (3 credits)
Students gain insight into how visual components contribute to effective strategic communication by investigating the roles visuals play in reaching audiences and building organizational identity. Students learn about the communication functions served by visual components: images, color choices, and graphic design. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: COMM 2400 or COMM 3200. Frequency: Every Winter.

COMM 3500 Media Regulation (3 credits)
This course surveys media policy and regulation emphasizing issues of libel, free speech, privacy, confidentiality of information and sources, as they pertain to mass media, advertising, and public relations. Prerequisites: One COMM course at or above the 2000 level and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Winter.

COMM 3600 Persuasion (3 credits)
Students will learn theories and strategies relevant to the study of public persuasion and social influence. Topics will focus on the role of persuasion in public address, advertising, business, politics, government, and social movements. Students will study the tools and techniques used to understand audiences for the purposes of marketing communication messages. Prerequisites: One COMM course at or above the 2000 level and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Winter.

COMM 3700 Documentary Filmmaking (3 credits)
This course is designed to provide students with a framework for understanding the production of various documentary styles. Students will engage in readings, screenings, analysis, field production/editing. This course guides students through the pre-production, production and post-production processes. Media production skills will be developed through orientation to and working with various types of equipment. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: COMP 1500 or COMP 1500H and COMM 2800. Frequency: Odd Year Fall.

COMM 3710 Audio/Radio Production (3 credits)
This course introduces audio as a communication medium. Students learn audio production, including the principles of sound, announcing, scriptwriting, microphone technique, board operation, storytelling, program production, leadership, and organization. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: COMM 2800 or COMM 2500. Frequency: Every Year Fall.

COMM 3720 Advanced Video Editing (3 credits)
This course provides advanced training and practice in video editing. Students utilize appropriate software to create professional projects that utilize animation, color correction, and compositing techniques. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: COMM 2500. Frequency: Every Winter.
COMM 3800 Advanced Field Video Production (3 credits)
This course offers instruction in advanced electronic field production techniques, including scripting, lighting, portable field audio and video recording equipment operation, directing, and video editing. Students will master advanced creative, production, and aesthetic skills through a combination of readings, production exercises, individual and ensemble projects, and portfolio development. As television is a labor-intensive medium, students should expect to spend considerable time outside of class to complete the assignments. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Pre-requisite: COMM 2800. Frequency: Every Winter.

COMM 3820 Sports Reporting and Writing (3 credits)
This writing-intensive course prepares students to cover, report, and write sports stories that include game coverage, columns, features, and news. Students complete the course with an expanded writing portfolio. Prerequisite: COMP 2000 or COMP 2020 or COMP 2000H. Course Frequency: Every Fall.

COMM 3900 Web, Mobile, and Interactive Design for Communication (3 credits)
Students learn the historical background of the web's evolution, basic design guidelines for creating effective visual presentations, and essential design and building techniques for creating web sites and mobile applications. Using this foundational knowledge, students plan, design, and develop a website. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: ARTS 2410. Frequency: Even Year Winter.

COMM 4020 Media Planning (3 credits)
This course provides an introduction to strategic media planning, the process used to place messages in media in order to reach specific audiences. It combines concepts and skills as it engages critical thinking in the process of media planning for advertising, public relations, and health and political communication campaigns. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: COMM 2400 or COMM 3200. Frequency: Every Winter.

COMM 4100 Feature Writing (3 credits)
In this workshop-based class, students produce newspaper, magazine, and/or online feature stories for The Current and other markets. Types of stories may include personality profiles, travel, how-to, participatory, etc. Students complete the course with an expanded writing portfolio. Prerequisite: COMM 2010. Frequency: Every Winter.

COMM 4200 Public Relations Campaigns (3 credits)
This course is designed to familiarize students with public relations agencies, their structures and how they function as counseling and consulting services for many types of organizations. The preparation of problem-solving campaigns, programs and projects will be emphasized. Students will implement the four-step public relations process in the form of group and individual proposals. Students will utilize skills in critical thinking, writing, reading, research and new technologies. Prerequisite: COMM 3200. Frequency: Every Fall.

COMM 4300 Social Media Theory and Practice (3 credits)
This course will serve as both a primer for the context and forms of social media as well as an introduction to the various skills necessary to navigate social media effectively and collaboratively. Not simply a course designed for one specific technology or medium, the goal will be to learn how the digital world operates and is assessed, so that students attain the knowledge, critical thinking ability, and practical skills necessary to meet the personal, professional, and civic challenges posed by social media in an ever-changing landscape. Prerequisite: COMP 2000 or 2020 or COMP 2000H; and one COMM course. Frequency: Odd Year Winter

COMM 4400 Copy Editing (3 credits)
Students sharpen their journalistic skills as they learn about traditional and contemporary editorial roles and engage in the editing process. Because the news is fluid, students in this class learn to adapt to change and make informed decisions within the realm of solid journalistic standards. Prerequisites: COMP 2000 or COMP 2000H and COMM 3820 or COMM 4100. Frequency: Every Winter.

COMM 4900 Special Topics in Communication (3 credits)
This course offers a cross-sectional view of he media through a focus on a particular medium, theme, or genre. Specific focus to be announced. May be repeated once for credit if content changes and with permission of academic program. Prerequisites: One COMM course at or above the 2000 level, or one SPCH course, and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

COMM 4900A Special Topics in Communication (1-3 credits)
This course offers a cross-sectional view of he media through a focus on a particular medium, theme, or genre. Specific focus to be announced. May be repeated once for credit, if content changes and with written consent of division director. Prerequisites: One COMM course at or above the 2000 level, or one SPCH course; and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; see academic department chair.

COMM 4950A Internship in Communication (1-6 credits)
A minimum of 80 hours (per credit hour earned) of field or work experience in the student’s major area of study. Consult academic department for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of his course satisfies 1 ExEL unit. Prerequisites: Permission of academic program; COMM 1100A and COMM 1100B. Frequency: Every Fall and Winter.

COMM 4990A Independent Study (3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Prerequisites: Permission of academic program; one COMM course and COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

COMM 4990A Independent Study (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and department chair required. Prerequisites: One COMM course; and COMP 2000 or 2020 or COMP 2000H. Frequency: Upon Request; see academic department chair.

COMP—Composition

COMP 1000 Basic Writing (3 credits)
A writing workshop emphasizing the writing process, reflection, and the production of proficient writing at the sentence, paragraph, and document level. This course prepares students for COMP 1500 through hands-on experience with college-level writing conventions. Frequency: Every Fall and Winter.

COMP 1500 College Writing (3 credits)
A writing workshop emphasizing recursive writing and reflection within a variety of contexts. This course provides instruction in writing rhetorically, researching and documenting sources, and composing in multiple media. Prerequisites: SAT Evidence Based Reading and Writing score of
null
CRJU 3300 Corrections in America (3 credits)
An analysis of corrections with an in-depth view of the major components of the field. Emphasis is placed on the various systems of corrections, the practice of corrections, institutional custody, community-based corrections, probation and parole, the correctional client and the death penalty. Special attention will be given to trends in incarceration rates, including race, ethnicity, sex, special offenders and enhanced sentencing. Prerequisite: CRJU 1100. Frequency: Every Fall.

CRJU 3400 Criminal Investigations (3 credits)
This course will cover the fundamentals of investigation, crime scene search and recording, the collection, documenting and submission of evidence, scientific aids to criminal investigation, interviews and interrogation, follow-up investigation and case preparation. Emphasis is placed on the investigation of specific crimes, identification of information sources and procedures required for the handling of evidence. Also discussed are the legal elements of the crimes and field techniques for the gathering of data and presentation of cases to the courts. Prerequisites: CRJU 1100. Frequency: Every Fall.

CRJU 3500 Probation, Parole, and Community Corrections (3 credits)
This course explores the historical development and current administration of probation, parole, and other community corrections strategies in the United States. Topics covered include sentencing structures, supervision strategies, the pre-sentence investigation report, and the role and function of probation and parole officers. Students are exposed to current research and evaluate factors that may contribute to success or failure of community corrections programs. Prerequisite: CRJU 3300. Frequency: Every Fall.

CRJU 3600 Comparative Criminal Justice: Spain (3 credits)
This course examines the legal and criminal justice systems of select nations with a special focus on the criminal justice system of Spain. It highlights the differing approaches used by various countries to “the crime problem”, as they compare to the U.S. justice model. This course also addresses the influence of different historical, political, economic, social and cultural factors on the structures of legal institutions and systems of justice. Given the course’s special focus on Spain’s criminal justice system, required Spring Break travel to Spain will include visits to criminal justice agencies and facilities, along with interactions with criminal justice professionals and students. Students will identify and analyze points of convergence and divergence between the United States and Spain on perceived causes of crimes and approaches to crime prevention and control. Prerequisites: CRJU 1100 or LGST 2500 or LEGS 1150 or INST 1500 or POLS 1200 or INB 3550. Frequency: Winter - Odd Years.

CRJU 3700 The CSI Effect: Media and Criminal Justice (3 credits)
This course illustrates how media coverage and television programs influence the public’s perception of criminal justice. Fiction is often mistaken for reality, and this phenomenon, known as the “CSI Effect,” adds to the assumption that all criminal cases can be easily solved by the employment of high-tech forensic science, as depicted on television crime shows. This course explores the common misperceptions and their consequences, through real-world examples, providing students with the ability to critically analyze and assess information promoted by the media and entertainment television. Prerequisite: CRJU 1100. Frequency: Every Fall.

CRJU 4000 Victimology (3 credits)
This course will examine both the institutional and social factors and the issues and developments within the legal process that are relevant to the study of victims of crime. This includes an examination of the definition of a victim, crime, and a historical review of the role of the victim in the criminal justice system. Topics in this course may include psychological impacts of crime, the impact of victimization, legal approaches to victims, services provided to victims, restorative justice and emerging trends in the field of victimology. Prerequisite: CRJU 2220. Frequency: Every Winter.

CRJU 4200 Terrorism and Homeland Security (3 credits)
This course will provide students with a comprehensive introduction to terrorism and homeland security. The first section of the course will provide students with a basic understanding of terrorism as a definitional, theoretical and criminological issue. The second section of the course presents a detailed historical discussion of the birth and evolution of terrorism movements. The third section focuses on contemporary international and domestic terrorism. The final section concentrates on issues surrounding the prevention of terrorism through homeland security. Critical thinking will be encouraged through class discussions of controversial issues where students will be asked to consider various positions, choose their own approach, and cite evidence to support their positions. Students will also have the opportunity to study a specific terrorist group of interest through the writing of an in-depth research paper. Prerequisites: CRJU 1100. Frequency: Every Winter.

CRJU 4400 Police Organizational Behavior and Management (3 credits)
This course is an introduction to management principles as applied to law enforcement agencies. The student will explore how the organizational structure and occupational values of policing affect management actions and organizational outcomes. Case studies will be used to illustrate and analyze management issues and decision-making in a police environment. Topics include police organizational structure, police personality and occupational values, motivation, police discipline, police unionization, decision-making, leadership, and organizational change. Prerequisite: CRJU 3220. Frequency: Every Winter.

CRJU 4500 Research Methods in Criminal Justice (3 credits)
This is an introductory course in research methodology in criminal justice. It is designed to introduce the student to basic concepts and problems encountered in quantitative and qualitative investigation, including types of data and measurement, sampling, probability, and research design. This course will emphasize examples of methodology in the field and utilize actual data. Prerequisite: CRJU 2220. Frequency: Every Fall.

CRJU 4600 Gangs in America (3 credits)
This course will cover various aspects of the gang problem that involve the criminal justice system, including gang enforcement by law enforcement, gang laws and pending legislation, gang prosecution, and the effect of the gang culture on the streets of America. Also discussed are issues dealing with gang theory, including concepts of street gangs, graffiti, violence, and gang structure and organization. Students will explore the reasons why gangs exist, how they are formed, and the impact of gang crime and victimization on society. Prerequisite: CRJU 1100. Frequency: Every Winter.

CRJU 4880 Senior Seminar in Criminal Justice (3 credits)
This course provides an in-depth analysis of historical and contemporary literature in the field of criminal justice. Students will read classic and contemporary literature and apply this literature to real life dilemmas in the criminal justice system. This course challenges students to integrate and critically examine theories and concepts from criminal justice literature, appreciate the relationship between theory and policy, and challenges students to build on skills and knowledge acquired through earlier academic experience. Prerequisite: CRJU 4500. Frequency: Every Winter.

CRJU 4900 Special Topics in Criminal Justice (3 credits)
Topics in criminal justice that are not included in regular course offerings. Specific content is announced in the course schedule for a given term. Students may re-enroll for special topics covering different content. Prerequisites: CRJU 1100 and any other prerequisite deemed appropriate by the instructor depending on the course topic.

CRJU 4950 Internship in Criminal Justice (3 credits)
This course is designed to provide students with an opportunity to integrate academic and experiential knowledge. Students will be placed in
an agency or organization, of their choice, related to the practice of criminal justice. Additionally, students are required to complete a minimum of 140 hours at the internship placement site during the 16 weeks of enrollment. Prerequisites: (1) a minimum grade point average of 2.5 as calculated by NSU; (2) completion of 60 credit hours and CRJU 4500; (3) an approved placement site prior to enrolling in the course; and (4) permission from the academic director. Frequency: Every Winter.

CRJU 4950A Internship A in Criminal Justice (3 credits)
This course is designed to provide students with an opportunity to integrate academic and experiential knowledge. Students will be placed in an agency or organization, of their choice, related to the practice of criminal justice. Additionally, students are required to complete a minimum of 140 hours at the internship placement site during the 16 weeks of enrollment. Prerequisites: (1) a minimum grade point average of 2.5 as calculated by NSU; (2) completion of 60 credit hours and CRJU 4500; (3) an approved placement site prior to enrolling in the course; and (4) permission from the academic director. Frequency: Every Fall and Winter.

CRJU 4990 Independent Study in Criminal Justice (3 credits)
The student selects and carries out independently library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: CRJU 1100 or CRJU 1200 and written consent of instructor and division director. Frequency: Every Fall and Winter.

CRJU 4990C Independent Study C in Criminal Justice (1-3 credits)
The student selects and carries out independently library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: CRJU 1100 or CRJU 1200 and written consent of instructor and division director. Frequency: Every Fall and Winter.

CRJU 4990D Independent Study D in Criminal Justice (1-3 credits)
The student selects and carries out independently library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: CRJU 1100 or CRJU 1200 and written consent of instructor and division director. Frequency: Every Fall and Winter.

CSAD—Comm Sci & Disorders

CSAD 2010 Communication Disorders Through Film and Media (3 credits)
Overview of communication disorders through a representation in films, literature, and media. This course provides an overview of speech, language, and hearing disorders from a clinical perspective. Communication disorders will be examined through the perception of society.

Prerequisite: COMP 1500. Frequency: Winter and Fall.

CSAD 2015 Introduction to American Sign Language One (3 credits)
Students will learn background and historical information related to American Sign Language (ASL) and the Deaf Community. Students will learn the basic parameters, components, linguistic principles, and syntax of ASL. Students will learn how to execute finger-spelled words correctly. Students will demonstrate, both expressively and receptively, mastery of signed vocabulary words totaling approximately 300 concepts. Frequency: Fall and Winter.

CSAD 2020 Introduction to American Sign Language Two (3 credits)
Students will continue to learn background and historical information related to American Sign Language (ASL) and the Deaf Community. Students will continue to learn the basic linguistic principles, and syntax of ASL. Students will demonstrate, both expressively and receptively, mastery of signed vocabulary words totaling approximately 350 concepts. Pre-Requisite: CSAD 2015. Frequency: Every Winter and Fall.

CSAD 2025 American Sign Language-Three (3 credits)
Students will continue to learn background and historical information related to American Sign Language (ASL) and the Deaf Community. Students will continue to learn the basic linguistic principles, and syntax of ASL. Students will demonstrate, both expressively and receptively, mastery of signed vocabulary words totaling approximately 400 concepts. Frequency: Winter Only.

CSAD 3010 Phonetics (3 credits)
This class will cover the study of the history, theory and application of phonetics. Students review sampling and transcription techniques and applications to clinical practice. Prerequisite: CSAD 2010. Frequency: Winter and Fall.

CSAD 3020 Anatomy & Physiology of the Speech and Hearing Mechanism (3 credits)
This course is an introduction to the anatomy and physiology of the auditory and vocal mechanisms. The Structure and function of the skeletal, neurological, and muscular systems involved in respiration, phonation, resonance, articulation, and audition are reviewed. The normal anatomy and functioning of these systems is contrasted with disordered or damaged systems. Pre-Requisites: CHEM-1100 or PHYS 2350 Frequency: Every Winter and Fall.

CSAD 3025 Language Science (3 credits)
This course will provide the foundation for understanding the morphological and syntactic processes in typical language development. Students will learn to apply this knowledge to the clinical analysis of language. The study of syntactic and morphological processes as it relates to clinical analysis of language. Prerequisite: CSAD 2010. Frequency: Winter and Fall.

CSAD 3030 Speech & Language Development (3 credits)
Study of prelinguistic and psycholinguistic variables related to normal development from infancy through adolescence. Prerequisites: CSAD 3025 and PSYC 1020. Frequency: Winter and Fall.

CSAD 3035 Foundations of Language and Literacy (3 credits)
This course will explore the foundations of language and literacy development as content background for effective language and literacy instruction, birth to age 5. Topics include theories of language and literacy development, history of reading and writing instruction, literacy and technology, cultural and linguistic aspects of literacy, and various perspectives and models of literacy learning. Prerequisite: CSAD 3030. Frequency: Winter and Fall

CSAD 3040 Neuroanatomy (3 credits)
This course provides an introduction to the gross structure of the brain and spinal cord and functional relationship of their parts with emphasis on the auditory and vestibular peripheral and central nervous systems. Pre-requisite: CSAD 3020. Frequency: Winter and Fall

CSAD 3050 Hearing and Speech Science (3 credits)
This course covers the nature of sound, sound transmission, and units of measurement necessary to understand the physiologic, acoustic, and perceptual parameters of hearing and speech production. A basic review of instrumentation and technology available and utilized in speech, hearing, and language research, intervention and assessment is provided. Prerequisite: CSAD 3020. Frequency: Winter and Fall

CSAD 3060 Directed Observation (1 credits)
Students must observe twenty-five clinical clock hours of evaluation and treatment by an ASHA certified and state licensed SLP as an orientation to the clinical aspect of speech-language pathology. Observation hours must be completed at university-affiliated sites and must precede clinical assignments. Prerequisites: CSAD 4010 and CSAD 4030. Frequency: Winter and Fall

CSAD 3080 Introduction to Research in CSD (3 credits)
This course will provide an introduction to research methods used in speech-language and communication disorders. Research studies will be used to illustrate research designs used in the discipline. Ethics of research will be discussed. Academic writing and APA style will be highlighted. Pre-Requisites: CSAD 2010. Frequency: Every Winter and Fall.
CSAD 4010 Evaluation of Speech and Language Disorders (3 credits)
Principles of screening and evaluation of clients typically seen in a clinic, school, hospital or nursing home settings, including administration of specific evaluation instruments. Prerequisites: CSAD 3010 and CSAD 3030. Frequency: Every Winter and Fall.

CSAD 4030 Treatment of Speech and Language Disorders (3 credits)
Overview of communication disorders, professional terminology, and intervention strategies. Prerequisites: CSAD 3010 and CSAD 3030. Frequency: Fall only.

CSAD 4050 Audiology (3 credits)
Instruction in test administration and interpretation of standard and specialized tests of auditory function. Prerequisite: CSAD 3050. Frequency: Winter and Fall.

CSAD 4060 Audiology and Aural Rehabilitation (3 credits)
This course for non-degree seeking students will provide information regarding administration and interpretation of standard and specialized tests of auditory function. Etiologies and pathologies of the hearing and balance mechanism are discussed. Information about evaluation and treatment of hearing disorders as well as prevention is provided. Frequency: Winter and Fall.

CSAD 4070 Rehabilitation for People having Hearing Impairment (3 credits)
Prevention and remediation of communication problems resulting from hearing impairment, in populations from birth to geriatrics. Prerequisites: CSAD 3030, CSAD 4010, CSAD 4030, and CSAD 4050. Frequency: Winter and Fall.

CSAD 4080 Capstone (2 credits)
A culminating experience which incorporates knowledge gained in coursework in speech/language and communication science and disorders. The capstone experience offers students the opportunity to bridge theory-to-practice. This experience may be a service-learning project, research paper, or clinical experience. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: CSAD 3080, CSAD 4010, and CSAD 4030. Frequency: Winter and Fall.

CSIS—Computer & Info Systems
CSIS 1800 Introduction to Computer and Information Sciences (3 credits)
An introductory course to study computer systems layer by layer. The material covers Information Layer, Hardware Layer, Programming Layer, Operating Systems Layer, Application Layer, and Communication Layer. Each layer is covered in great detail and the concepts are supplemented by real examples. Frequency: Every Fall and Winter.

CSIS 2000 Introduction to Database Systems (3 credits)
This course will give students an introduction to the structured query language (SQL). The course introduces relational, object-oriented, distributed, and multimedia database systems. This course covers concepts and tools necessary to analyze a business scenario, then design and implement a database system that is in 3rd Normal Form. Students will build, populate, query, and write transactions for a relational database. The students also learn how to interface Web based data access via database connection using modern languages and tools. Prerequisite: CSIS 2101 or TECH 2020. Frequency: Every Winter.

CSIS 2050 Discrete Mathematics (4 credits)
An introduction to the concepts and techniques of discrete mathematical structures that are used in the theory and application of computer science and computer information systems. Topics covered include set theory, relations, functions, proof techniques, predicate logic, combinational and sequential logic and circuitry, recurrence relations, Boolean algebra, graph theory, trees, and discrete probability. Prerequisite: MATH 1200 or higher. Frequency: Every Winter.

CSIS 2101 Fundamentals of Computer Programming (4 credits)
This course provides an introduction to computer programming using a modern programming language. Major topics to be covered are: syntax, expressions, variables and data types, blocks and scope, input/output and file handling, conditional selection statements, loops and iteration statements, functions, arrays, classes, inheritance and simple Graphical User Interface(GUI) programming all through program development. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: MATH 1040. Frequency: Every Fall and Winter.

CSIS 3020 Web Programming and Design (3 credits)
This course will introduce the essentials of Internet programming. Students will design and write WWW pages in HTML, JavaScript, and shell scripting languages. Programs will manipulate many forms of data, including hypertext, graphics, audio, and video. Students will develop interactive/executable Web pages. Other topics covered will include clickable image maps, CGI-bin scripting, and security. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: CSIS 2100 or CSIS 2101. Frequency: Every Fall.

CSIS 3023 Legal and Ethical Aspects of Computers (3 credits)
This course focuses on issues that involve computer impact and related societal concerns. Topics covered include computer ethics, computer crime, software ownership, privacy risk management, professional codes, transborder data flow, Telecommunications Act of 1996, the national computer policies of other nations, and the status of regulation and emerging standards. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

CSIS 3051 Computer Organization and Architecture (4 credits)
A structured approach to the architecture of computers is presented as the interrelation of software and hardware design: digital logic, machine level, assembly language level, and operating system level. Topics include: logics design, fundamental structure of computer hardware systems (CPU/ALU, memory, cache, registers, I/O), instruction sets, assembly language programming, computer arithmetic, pipelining, and memory hierarchy. Alternative architecture such as parallel architectures and embedded systems are discussed. Performance measurement and analyses techniques are introduced. Prerequisites: CSIS 2050 and CSIS 2101. Frequency: Every Winter.

CSIS 3101 Advanced Computer Programming (4 credits)
The course addresses advanced programming concepts that are specific to generic programming languages that require understanding of how data and objects are represented in memory. Illustration of difference between structured programming and object-oriented programming are discussed by examples. Advanced topics like Inheritance, abstract classes, multithreading, Graphical User Interfaces are covered in this class. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: CSIS 2101 or CSIS 2100. Frequency: Every Winter.

CSIS 3110 Foundations of Computer Science (3 credits)
Included are the mechanization of abstraction in computer science, prepositional logic and predicate logic, induction versus recursion, countable and non-countable sets, finite state automata and regular expressions, pushdown automata and context-free languages, Turing
CSIS 3200 Organization of Programming Language (3 credits)
Development of an understanding of the organization of programming languages, introduction to formal study of programming language specification and analysis, comparison of two or more high-level modern programming languages. Prerequisites: CSIS 3101 or CSIS 3100. Frequency: Every Fall.

CSIS 3400 Data Structures (4 credits)
A course in fundamental data structures and their application. Advanced data structure concepts are developed including linked data representation, pointers, binary trees, B trees, AVL trees, queues, stacks, hashing, searching, directed and undirected graphs, and priority queues. Recursive algorithms are investigated. Quantitative analysis of algorithms is employed. Advanced sorts are studied and analyzed for order of magnitude. Abstract data types are introduced. Prerequisites: CSIS 3101 and CSIS 2050. Frequency: Every Fall. (Description Last Updated: Fall 2019 (202020)).

CSIS 3460 Object Oriented Design (3 credits)
This course provides an introduction to object oriented design using a modern OO friendly programming language. Objects, class implementations, types, aggregation, inheritance, and polymorphism will be covered. Complete OO software development paradigm, that includes preparing functional specifications using use cases, design and implementation will be introduced. Prerequisite: CSIS 3750. Frequency: Every Winter.

CSIS 3500 Networks and Data Communication (3 credits)
This course provides an introduction to basic data communications and how the Internet and World Wide Web work. It develops the fundamentals essential to understand wired and wireless network topologies, connection-oriented and connection-less protocols, and routing. Students develop an understanding of how protocols are layered and the concepts of services available at each layer, as well as, how errors affect communication and various mechanisms to mitigate the errors. They will also learn how to appropriately apply various reliable and unreliable protocol based services to various high-level applications including text, data, images, speech, and video streams for both real-time and non-real-time communications. The course will introduce security related issues. It places specific emphasis on the TCP/IP protocol stack and the protocols that are currently critical. Prerequisites: CSIS 1800 and MATH 1040 or Higher. Frequency: Every Fall.

CSIS 3530 Artificial Intelligence (3 credits)
Introduction to basic concepts and techniques of artificial intelligence. Topics include heuristic search strategies for combinatorial optimization, machine learning for prediction and classification, and deep learning for image recognition and understanding language. Pre-Requisites: CSIS 3400. Frequency: Fall.

CSIS 3610 Numerical Analysis (4 credits)
A numerical analysis course that introduces students to computing issues regarding the implementation of algorithms and high performance computing. The algorithms are used extensively in all computing and engineering fields. Topics include matrix computations, interpolation and zero finding, linear least squares problems, quadrature analysis, Fourier analysis, and eigenvalue and singular value decompositions. Prerequisites: CSIS 3400, MATH 2200 or MATH 2200H, and MATH 3300. Frequency: Every Fall.

CSIS 3750 Software Engineering (4 credits)
An introduction to the process of developing software systems. Topics include software life-cycle models, quality factors, requirements analysis and specification, software design (functional design and object-oriented design), implementation, testing, and management of large software projects. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: CSIS 3400. Frequency: Every Winter.

CSIS 3810 Operating Systems Concepts (3 credits)
Explore, examine and apply Operating and Distributed Systems Concepts. Topics include: the history of operating systems, computer system organization, operating system structure, virtualization, resource management, scheduling, processes, threads, concurrency, synchronization, parallel computing, system calls, input/output, memory management, file systems, protection mechanisms, security and distributed systems. Pre-Requisites: CSIS 3400. Frequency: Every Fall.

CSIS 4010 Computer Security (3 credits)
Overview of technical and theoretical aspects of computer and data security with emphasis on attacks and defenses on host machines, access control mechanism, viruses and anti-viruses, cryptography, intrusion detection algorithms, and application security. Students will learn how to configure secure databases, applications and machines. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: CSIS 2101 or TECH 2020. Frequency: Every Fall.

CSIS 4020 Mobile Computing (3 credits)
This hands-on course is designed for individuals who wish to design and build mobile applications using an advanced mobile Application Development Framework. The following features will be covered: development environment and tools; the setup of the IDE-based development environment; the mobile SDK; all the essential features to create basic and advanced applications using services, accelerometers, graphics, internet access, multimedia, mapping, and GPS; as well as what you need to know to publish your application on the mobile market. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: CSIS 3101 or CSIS 3100. Frequency: Every Winter.

CSIS 4030 Information Security Technologies (3 credits)
This course presents a comprehensive overview of the issues surrounding information assurance and computer security. Risk assessment, designing and implementing security policies and maintaining a secure technological organization are the primary foci. A solid grounding in the most important encryption standards, including private, symmetric encryption technology, will be covered. It will be shown why AES (Advanced Encryption Standard) is important and will review the issues leading to its development. Prerequisite: CSIS 4010. Frequency: Upon Request see academic Department Chair.

CSIS 4310 Distributed Data Processing (3 credits)
Explore and apply the concepts and mechanisms in the design and implementation of distributed systems. Topics include architecture, protocols, distributed process synchronization, reliability, distributed resource management, and performance evaluation. Pre-Requisite: CSIS-3810. Frequency: Every Winter.

CSIS 4311 Web Services and Systems (3 credits)
This course covers the architecture, deployment, implementation and testing of web-based applications including related software, databases, interfaces and digital media. It also covers social, ethical and security issues arising from the Web, networking and social software. Prerequisite: CSIS 3020. Frequency: Every Winter.

CSIS 4351 Human-Computer Interaction (3 credits)
This course stresses the importance and the advocacy of the user in the development of Information Technology (IT) applications and systems. Students will develop knowledge of Human Computer Interaction (HCI), such as user and task analysis, human factors, ergonomics, accessibility standards, and cognitive psychology. They will also learn about human cognition, HCI theories, user observation, prototyping and evaluation techniques, user interface modalities and graphical user interface components. Prerequisite: CSIS 2101. Frequency: Every Winter.

CSIS 4500 Network Security (3 credits)
This course provides an overview of technical and theoretical aspects of network security with emphasis on the Internet. It discusses topics such as design of secure networks, concerns at all architectural levels, modern security protocols and their applications, public key infrastructure (PKI) infrastructure and digital certificates. The course teaches students how to secure open source web servers, secure shell (SSH) servers, virtual private networks (VPN), and to setup subnets with firewalls. It prepares student for providing protection against internal and external attacks in an enterprise. Prerequisite: CSIS 3500.
Frequency: Every Fall.

CSIS 4501 Wireless Network Infrastructures (3 credits)
This course begins with a simplified discussion on propagation characteristics of radio waves and discusses the distinctions between CDMA and TDMA technologies. Students discuss the concept of cellular infrastructure and how to calculate the network capacities for the two technologies. The course then covers various mobile protocols as well as Bluetooth, 802.11, WiMax protocols and other emerging protocols. Students also discuss VoIP technologies and UTMS standard to understand how VoIP technologies will evolve in the future. Prerequisite: CSIS 3500. Frequency: Every Winter.

CSIS 4530 Database Management (3 credits)
The introductory and fundamental concepts, principles, techniques, and methodologies of database management systems. The topics include, but not necessarily limited, database architectures, data models, and database modeling and design techniques, database query languages and query processing, indexing and hashing techniques for database storage and retrieval, concurrency control and transaction processing, and new trends of database applications. Prerequisites: CSIS 2101 or TECH 1500. Frequency: Every Winter.

CSIS 4610 Design and Analysis Algorithms (3 credits)
Topics include algorithmic paradigms such as divide-and-conquer, greedy methods, and concepts relating to analysis such as asymptotic notation and NP-completeness. Sorting and searching algorithms are designed and analyzed, as are algorithms for manipulating trees, graphs, and sets. Prerequisites: CSIS 3400 and MATH 2200 or MATH 2200H. Frequency: Every Winter.

CSIS 4840 Unix Operating System Environment (3 credits)
The concepts of the UNIX operating system are presented. Topics include system commands, system editors, awk, set, text formatting tools, and shell programming. The use of modem and terminal software and system maintenance utilities are covered. Prerequisite: CSIS 2101.
Frequency: Every Fall.

CSIS 4880 Special Topics in Computer Science (1-4 credits)
Topics in computer science that are not included in regular course offerings. Specific contents are announced in the course schedule for a given term. Prerequisites: requires senior standing and consent of instructor. Frequency: Upon Request see academic Department Chair.

CSIS 4900 Directed Project (3-8 credits)
A major project will be completed by the student under the direction of a faculty member. Frequency: Upon Request see academic Department Chair.

CSIS 4900A Directed Project (A) (3-8 credits)
A major project will be completed by the student under the direction of a faculty member. Frequency: Upon Request see academic Department Chair.

CSIS 4900B Directed Project (B) (3-8 credits)
A major project will be completed by the student under the direction of a faculty member. Frequency: Upon Request see academic Department Chair.

CSIS 4900C Directed Project (C) (3-8 credits)
A major project will be completed by the student under the direction of a faculty member. Frequency: Upon Request see academic Department Chair.

CSIS 4900D Directed Project (D) (3-8 credits)
A major project will be completed by the student under the direction of a faculty member. Frequency: Upon Request see academic Department Chair.

CSIS 4903 Capstone Project for Computer Science (1-3 credits)
This course must be taken by students in the senior year, preferably in the last semester of their study. Prior to taking this course, the student must develop a project proposal that covers concepts and skills learned in more than one upper division Computer Science course. The proposal must be approved by a faculty member supervising the project and the department chair. The student will be required to routinely report progress to the project instructor during the semester, write a final project report and to present the project at the end of the semester. Prerequisites: Senior standing, supervision of instructor, and permission of department chair Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon chair approval.

CSIS 4950 Internship in Computer Science and Information Systems (A) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Upon Request see academic Department Chair.

CSIS 4950C Intern in ComSciInfoSy C (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Upon Request see academic Department Chair.

CSIS 4950G Internship in Computer Science and Information Systems (B) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Upon Request see academic Department Chair.

CSIS 4953 Capstone Internship in Computer Science (3 credits)
Computer Science majors who are not already employed can use this course to satisfy the capstone requirement. It can be taken in their senior year preferably in their last semester. An Internship constitutes a relevant work experience for 16 weeks based on a project with specific goals agreed on by the work supervisor, student and the department chair before enrolling in this course. The project should cover concepts and skills learned in more than one upper division computer science course. Frequency: Upon chair approval.

CVS—Cardiovascular Sonography
CVS 3000 Introduction to Cardiovascular Sonography Instruments (3 credits)
This course is designed to introduce the students to the equipment used in cardiovascular ultrasound. The course will, therefore, be primarily taught in the ultrasound training laboratory in small groups, with supplemental online content and challenge-based learning assignments. The focus of the course will be to lead the students toward proficiency and competency in using all the tools available on the ultrasound equipment for the production of quality images, as well as proper ergonomics, patient handling, and care of the equipment. This course is the foundation for all the following core courses. Frequency: Every Summer.

CVS 3001 Correlative Imaging & Anatomy (4 credits)
“This course will meet twice a week for a nominal 16-week semester. The course will consist of dynamic guided exercises in the classroom and computer lab, combined with instructor-led case study and image analysis. The course will teach the student detailed normal anatomy in various planes used during all of the common imaging examinations of ultrasound and other medical imaging modalities. Information will be described according to relative location, proportionality, sonographic characteristics, and appearance under other imaging modalities. Anatomy will be identified in both gross-anatomy and cross-sectional imaging modes. Anatomic correlation subject areas will include; intracranial, cervical, thoracic, cardiac, abdomen, pelvis, and extremities. Imaging modalities will include; Sonography, MRI, CT, Nuclear Medicine, PET scanning, Plain film Radiography and Angiography. Emphasis will be placed on teaching the students to identify normal cross sectional anatomy based on the characteristics of each imaging modality, the position of other relative anatomy (anatomical landmarks), proportionality of size and correlation with other imaging modalities. Frequency: Every Summer.

CVS 3010 Echocardiography I: Adult Cardiac Sonography I/Lab (5 credits)
This course is a basic study of two-dimensional, M-mode, Doppler echocardiography and left ventricular systolic function. There will be discussion of various pathologies to include congestive heart failure, pericardial diseases, cardiomyopathies, and cardiac masses. The course will emphasize the understanding of echocardiographic findings and treatment. The lab will include an introduction to basic scanning protocol, proper patient positioning and correct ergonomics. In addition basic M-mode and Doppler echocardiography are presented. Imaging planes and windows are explained and demonstrated.

CVS 3020 Adult Echocardiography II (3 credits)
This is an intermediate course on the use of ultrasound for the evaluation of the adult heart and heart function. It will have a strong hands-on component and students will spend several hours per week in the ultrasound training laboratory acquiring advanced imaging skills to begin mastery of the adult echocardiography examination. Lectures will continue with advanced subjects including, but not limited to, acquired and congenital pathologies, pathophysiology, and treatment options. In-depth analysis of echocardiographic findings and presentation of same in preliminary reporting will also be covered in detail. Prerequisite: CVS 3010. Frequency: Every Winter.

CVS 3030 Echocardiography III (4 credits)
“This is an advanced course on the use of specialized ultrasound techniques for the evaluation of the adult heart, with additional content for pediatric echocardiography and other advanced imaging techniques and considerations. It will have a strong hands-on component and students will spend several hours per week in the ultrasound training laboratory acquiring advanced imaging skills. Lectures will cover special considerations for advanced imaging, specific pathologies and anatomical considerations for pediatric imaging, pediatric congenital pathologies, pathophysiology, treatment options, and analysis of data obtained by ultrasound, as well as other cardio-focused techniques. Additional topics will cover the scanning techniques and other considerations surrounding the performance of the echocardiography exam that will be encountered in a clinical setting, preparing the student for clinical externships in year two of the program. Prerequisite: CVS 3020. Frequency: Every Summer.

CVS 3040 Ultrasound Physics (4 credits)
This course is designed to help the student acquire knowledge of all the fundamental principles and concepts necessary to understand the properties of sound and ultrasound as used in diagnostic imaging. These principles and concepts will span from basic properties of sound in soft tissue to advanced techniques such as Doppler, spectral analysis, M-mode, etc. As they pertain to evaluation for vascular and cardiac ultrasound imaging. The students will also learn about artifacts, safety, and the concepts of bio-effects. Key physics principles will be illustrated with hands-on exercises and activities in the classroom and lab, utilizing both the imaging equipment and more everyday materials to facilitate understanding. Challenge-based learning physics assignments will also be given to further the learning process. Frequency: Every Summer.

CVS 3050 Ultrasound Physics Review (2 credits)
This course reviews the principles and concepts learned in CVS 3040 through quizzes and exams to help the student prepare for the Sonography Principles and Instrumentation (SPI) exam administered by the ARDMS. The students will take the exam after completion of the course. Prerequisite: CVS 3040. Frequency: Every Fall.

CVS 3060 Cerebrovascular Testing (3 credits)
This course will focus on the use of ultrasound for the evaluation of the extracranial and intracranial cerebrovascular circulation. It will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. Lectures will focus on anatomy, pathologies, treatment options, and analysis of data obtained by ultrasound and other diagnostic techniques. Frequency: Every Fall.

CVS 3070 Peripheral Arterial Testing (3 credits)
This course will focus on the use of ultrasound for the evaluation of the arterial circulation of the upper and lower extremities. It will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. Lectures will focus on anatomy, pathologies, treatment options, and analysis of data obtained by ultrasound and other technologies specific to vascular laboratories. Frequency: Every Winter.

CVS 3071 Peripheral Vascular Testing I/Lab (4 credits)
This course will review the peripheral vascular anatomy and physiology associated with peripheral vascular system. The student will learn the scanning protocols for upper and lower extremity vascular testing and the diagnostic criteria for assessing disease. The student will also review various diagnostic and treatment options for the patient. Frequency: Fall.

CVS 3080 Peripheral Venous Testing (3 credits)
This course will focus on the use of ultrasound for the evaluation of the venous circulation of the upper and lower extremities. It will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. Lectures will focus on anatomy, pathologies, treatment options, and analysis of data obtained by ultrasound and other techniques. Frequency: Every Fall.

CVS 3090 Abdominal Vascular Testing (3 credits)
This course will focus on the use of ultrasound for the evaluation of the arterial and venous circulation of organs of the abdomen. It will have a strong hands-on component with students spending several hours per week in the ultrasound training laboratory. Lectures will focus on anatomy, pathologies, treatment options, and analysis of data obtained by ultrasound and other diagnostic imaging techniques. Frequency: Every Winter.
COURSE DESCRIPTIONS

CVS 4000 Clinical Preparation (3 credits)
This course will provide for and reinforce the nontechnical aspects of the profession of diagnostic medical sonographers. This will include, but is not limited to, professionalism, billing, quality assurance, image storage, and reporting. The course will prepare students for the clinical experience that follows in the second year. Embedded in this course will also be a certification training seminar for Basic Life Saving (BLS) for Health Care Providers, and required HIPAA training. Frequency: Every Summer.

CVS 4500 Clinical Externship I (9 credits)
“In the second year of the program, students may have the option of performing their clinical externships in a vascular, adult echo, or combined vascular/echo clinical experience, depending on their interests and demonstrated competencies. This course will be mainly provided in a clinical setting assigned at the end of the first year. Students will be an integral part of the daily operations of the vascular laboratory and/or echocardiography imaging department they have been assigned to. They will report to the clinical coordinator or an assigned professor of the program.”

CVS 4600 Clinical Externship II (9 credits)
“This course provides the student with initial clinical opportunities to observe and participate in the noninvasive vascular and/or echocardiography departments. Clinical activities are performed under the direct supervision of an appropriately credentialed sonographer. All clinical activities will be documented by the student on a daily basis utilizing the Trajecsys online system. The student will also clock-in and clock-out every day utilizing the Trajecsys system. Evaluation of the student’s progress will be also recorded by the clinical mentor(s) via the Trajecsys system. Topics include equipment utilization; patient history, identifying risk factors, and contributing disease; procedural skills and patient care, vascular procedures and echocardiography procedures. Course work will include evaluations and competencies. Students are responsible for completing the mandatory competencies for their second specialty (echo or vascular) during this course.

DANC—Dance

DANC 1200 Ballet I (3 credits)
A beginning performance-based course designed to develop an understanding of ballet as a technique and an art form. This class will also focus on basic anatomy and movement principles related to ballet. Students will be introduced to a ballet vocabulary and will build a strong technical foundation as preparation for more advanced ballet work. Frequency: Every Fall and Winter.

DANC 1400 Jazz Dance I (3 credits)
A beginning performance-based course designed to develop an understanding of jazz dance as a technique and an art form. This class will also focus on basic anatomy and movement principles related to jazz dance. Students will be introduced to a jazz dance vocabulary and will build a strong technical foundation as preparation for more advanced jazz dance work. Frequency: Every Fall and Winter.

DANC 1500 Contemporary Dance Techniques (3 credits)
A performance-oriented course designed to introduce students to contemporary techniques in modern, jazz, hip-hop, and folk styles. Frequency: Every Fall.

DANC 1600 Modern Dance I (3 credits)
A beginning performance-based course designed to develop an understanding of modern dance as a technique and an art form. This class will also focus on basic anatomy and movement principles related to modern dance. Students will be introduced to a modern dance vocabulary and will build a strong technical foundation as preparation for more advanced modern dance work. Frequency: Every Fall and Winter.

DANC 2101 Dance Laboratory I (1 credits)
Participation in one or more of NSU’s dance productions. Pass/fail only. Frequency: Every Fall and Winter.

DANC 2102 Dance Laboratory II (1 credits)
Participation in one or more of NSU’s dance productions. Pass/fail only. Frequency: Every Fall and Winter.

DANC 2103 Dance Laboratory III (1 credits)
Participation in one or more of NSU’s dance productions. Pass/fail only. Frequency: Every Fall and Winter.

DANC 2104 Dance Laboratory IV (1 credits)
Participation in one or more of NSU’s dance productions. Pass/fail only. Frequency: Every Fall and Winter.

DANC 2201 Ballet II (3 credits)
A performance-based course designed to develop a deeper understanding of ballet as a technique and an art form. This class will focus on technical skills and movement principles related to ballet. Students will continue to build a strong technical foundation in ballet at the intermediate/advanced level and increase knowledge of ballet terminology and history. Prerequisites: DANC 1200 or permission of academic program. Frequency: Every Year Fall.

DANC 2350 Dance for the Camera (3 credits)
This course introduces video technology to emerging choreographers through the acquisition of skills needed to choreograph, edit and direct an original dance for the camera. Students will examine the theory and advanced technique of various genres of dance for the camera while also exploring individual artistic expression. Prerequisite: Any DANC course. Frequency: Every Fall.

DANC 2400 Jazz Dance II (3 credits)
An intermediate performance-based course designed to expand upon Jazz Dance I and the understanding of jazz dance as a technique and an art form. Prerequisites: DANC 1400 and permission of academic program. Frequency: Odd Year Winter.

DANC 2600 Modern Dance II (3 credits)
An intermediate performance-based course designed to expand upon Modern Dance I and the understanding of modern dance as a technique and an art form. Prerequisite: DANC 1600 and permission of academic program. Frequency: Odd Year Fall.
DANC 3100 Dance Improvisation (3 credits)
A performance-based course that provides a variety of methods and resources for generating improvised movement material. Class will culminate in the creation of an improvised score for performance. Prerequisite: Any DANC, MUSC or THEA course. Frequency: Even Year Winter.

DANC 3200 Dance History (3 credits)
A theory-based course designed to introduce students to the development of Western concert dance with particular focus on ballet and modern. The course examines the historical origins and social context of ballet and modern dance, by highlighting significant choreographers, performers, artistic periods and aesthetics for each genre from the 15th century to the present. Prerequisite: DANC 2201 or DANC 2400 or DANC 2600 or DANC 3100. Frequency: Even Year Fall.

DANC 3500 Global Dance Perspectives (3 credits)
A theory-based course designed to introduce students to various dance forms from around the world. This course will focus on social, ritual, folk and concert dance forms and will examine the social context, cultural/aesthetic values and significant historical events that helped shape them. In addition, the course will explore the power of dance to build community, promote change and preserve tradition. Prerequisites: One DANC course and COMP 2000 or COMP 2000H or COMP 2020. Frequency: Odd Year Fall.

DANC 3550 World Dance (3 credits)
A performance-based course aimed at developing the understanding of a specific World Dance style as a technique and an art form. Prerequisite: Any DANC course. Frequency: Odd Year Fall.

DANC 3600 Modern Dance III (3 credits)
An advanced performance-based course designed to further develop an understanding of modern dance as a technique and an art form. Prerequisite: DANC 2600. Frequency: Winter Even

DANC 3700 Solo Dance Composition (3 credits)
A performance-based course that provides a variety of methods and resources for generating innovative movement ideas. Students will work on dance compositional elements such as time, space and energy and will discover new ways to communicate ideas through movement. Students will develop solo studies as an initial approach to structure choreography. Prerequisite: Any DANC 2000 or 3000 level course. Frequency: Odd Year Winter.

DANC 3900 Advanced Studio Technique (3 credits)
An advanced level course designed to further develop technical and performance skills in a particular dance genre. Prerequisite: DANC 2201 or DANC 2400 or DANC 2600. Frequency: Even Year Winter.

DANC 4000 Dance Composition (3 credits)
A performance-based course that provides a variety of methods and resources for generating movement ideas for choreography. Students will work on compositional elements in the creation of solo and group dances and will discover new ways to communicate ideas through movement. Prerequisite: DANC 2201 or DANC 2400 or DANC 2600 or DANC 3100. Frequency: Even Year Fall.

DANC 4300 Dance Choreography (3 credits)
A performance-based course designed to develop choreographic ability. In this course, students create and direct an original dance that is performed at the end of the semester. Students participate in regular workshops where they exchange feedback on their choreographed dances. Prerequisite: DANC 4000. Frequency: Winter

DANC 4900 Special Topics in Dance: (3 credits)
An advanced course in a particular dance genre or related area of interest. Specific focus to be announced. May be repeated for credit if content changes and with written consent of the division director. Prerequisites: One DANC course and COMP 2000, COMP 2010 or COMP 2020. Frequency: Upon Request, See academic chair

DANC 4950 Internship in Dance (3 credits)
Focused dance or dance related study with a professional dance company, nationally recognized dance festival, choreographer or dance-presenting organization. Consult academic program for specific details and requirements. Prerequisites: Cumulative GPA of 2.5 or higher, completion of 60 or more credit hours, and permission of academic program. Frequency: Every Fall and Winter.

DANC 4990 Independent Study in Dance (3 credits)
The student selects, and carries out a focused dance or dance related study with a professional dance company, nationally recognized dance festival, choreographer or dance-presenting organization. Consult academic program for specific details and requirements. Prerequisites: Permission of academic program, one DANC course, COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon Request; see academic department chair.

DANC 4990A Independent Study in Dance A (3 credits)
The student selects, and carries out independently, library and/or empirical research as it relates to dance practices. Faculty supervision is provided on an individual basis. Consult academic program for specific details and requirements. Prerequisites: Permission of academic program, one DANC course, COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Upon request; contact academic program.

ECA—Early Childhood

ECA 001 Special Topics in Dance: (3 credits)
A performance-based course that provides a variety of methods and resources for generating movement ideas for choreography. Students will work on compositional elements in the creation of solo and group dances and will discover new ways to communicate ideas through movement. Prerequisite: DANC 2201 or DANC 2400 or DANC 2600 or DANC 3100. Frequency: Even Year Fall.

ECA 0101 Introduction to Early Childhood Education: Professionalism, Safety, Health, and Learning Environment (3 credits)
In this course students learn about the developmental needs of children from birth to age five. Students learn to support children's physical development, encourage cognitive learning and the development of communication skills and enhance creative expression. This course covers the Child Development Associate-CDA Functional Areas of Physical, Cognitive, Communication, and Creativity. Prerequisite: ECA 101. Frequency: Every Fall and Winter.

ECA 0111 Intro to Early Childhood Education: Physical, Cognitive, Communication, and Creative Development (3 credits)
In this course students learn about the developmental needs of children from birth to age five. Students learn to support the social and emotional development of young children and to provide positive guidance. Students explore ways to work effectively with families, and develop program management skills related to observing children and delivering appropriate curriculum. This course covers the Child Development Associate-CDA Functional Areas of Self, Social, Guidance, Families, and Program Management. Prerequisites: ECA 0101 and ECA 0112. Frequency: Every Fall and Winter.

ECA 0203 Foundations of Early Care and Education (3 credits)
This course introduces the students to the historical, philosophical, and sociological foundations of programs for young children. Professional and ethical behavior in early childhood education will be discussed. Students will be engaged in the analysis of different program models and instructional strategies. Appropriate field experiences are integrated and required. Prerequisite: None. Frequency: Every Fall and Winter.

ECA 0215 Creative Activities for Young Children (3 credits)
In this course students will explore creative activities in several curriculum areas and adapt plans to meet the needs of all children. The
classroom environment will be discussed as a means of children’s learning. Frequency: Every Fall and Winter.

ECA 0218 Child Observation & Assessment for Decision Making (3 credits)
In this course students will become familiar with common methods of assessment used in educational settings, including direct observation. Cultural and ethical considerations in the selection, use, and interpretation of test instruments will be covered, in addition to the differences between standardized and non-standardized assessments. Emphasis will be placed on the ways in which assessments are used to guide developmental, educational, and psychological interventions for children and adolescents. Prerequisite: None. Frequency: Every Fall and Winter.

ECA 0227 Developmental Curriculum: Language, Literacy, and Social Studies (3 credits)
This course will focus on the elements of developmentally appropriate curriculum for children. Students explore ways in which children, beginning in infancy, acquire language, develop the basis of literacy, and come to understand their social world. Students learn ways of creating appropriate activities that foster concept and increase and promote social and scientific awareness. Appropriate field experiences are integrated and required. Prerequisite: None. Frequency: Every Fall and Winter.

ECA 0228 Developmental Curriculum: Math and Science (3 credits)
This course focuses on the ways in which children construct knowledge through play and exploration. Students learn ways of helping children develop early math concepts. Engage in scientific explorations, and engage in creative problem solving. Appropriate field experiences are integrated and required. Prerequisite: None. Frequency: Every Winter.

ECA 0241 Child Guidance (3 credits)
Students will develop appropriate ways to guide children’s behavior through effective organization of the environment (emphasizing schedule, activities, and materials) and guidance techniques that minimize conflict and encourage children to play and learn cooperatively. Appropriate field experiences are integrated and required. Prerequisite: None. Frequency: Every Fall and Winter.

ECA 0242 Foundations of Literacy Development (3 credits)
This course provides students with the opportunity to explore the emergent literacy process during the early childhood years. Exploration of classroom teaching practices that encourage expressive and receptive language will engage students in a variety of field activities. Prerequisite: None. Frequency: Every Fall and Winter.

ECA 0252 Managing Early Literacy (3 credits)
In this course students will examine appropriate ways to create and organize the classroom for effective language and literacy development. Use of classroom centers, selection of materials, and resources for planning and teaching literacy experiences are discussed. Field experiences are integrated. Prerequisite: None. Frequency: Every Fall and Winter.

ECA 0267 Literacy Development in Multilingual Communities (3 credits)
Through this course students will have opportunities to discuss how to support children’s native languages as they transition into the acquisition of a second language. Students explore the role of culture, home and classroom context in the acquisition and development of language. Appropriate ESL activities, resources, and teacher’s role in literacy development are explored. Home, school and community connections to language development are discussed. Prerequisite: None. Frequency: Every Fall and Winter.

ECA 0270 Administration of Child Care and Education Program (3 credits)
In this course students develop skills required in the operation and management of an early care and education program. Students learn about organizational management, financial, legal and ethical issues, establishing operational systems, and programming for children and families. (This course meets the training requirements for the Florida Child Care and Education Program Director Credential.) Prerequisite: None. Frequency: Every Fall and Winter.

ECA 0275 Early Childhood Administration: Financial and Legal Issues (3 credits)
This 3-credit course presents an examination of the skills and knowledge required to manage and direct an early care and education program with a focus on the major responsibilities of the director/manager to ensure an ethicly responsive organization. Students will be able to articulate the importance of a clear, well-communicated vision, policies and procedures that reflect that vision, and employment practices that support a positive work climate. This course meets the requirements for the Advanced Level Florida Director’s Credential in the area of Child Care and Education Organizational Leadership and Management as defined by the Florida Department of Children and Families. Prerequisite: None. Frequency: Every Fall.

ECDP—Early Child Development

ECDP 3321 Infant and Toddler Development (3 credits)
Students will examine the process of development throughout the prenatal, infancy, and toddler years. Theoretical perspectives and findings from current developmental research will be explored to build knowledge of developmental milestones and the needs of infants and toddlers. Course activities will focus on the examination of how the prenatal stage affects overall child development, the investigation of factors that influence social and emotional development, the creation of a workshop plan to enhance knowledge of brain and cognitive development, and the design of a developmentally appropriate setting for targeted age groups based on guidelines and standards. Prerequisites: PSYC 1020 or PSYC 2370. Frequency: Every Fall, Winter, and Summer.

ECDP 3334 Preschool, Primary & Middle Childhood Development (3 credits)
This course explores critical milestones, characteristics, stages of development across the physical, socio-emotional, cognitive, and language domains during the preschool, primary and the school-age years. Students engage in examining implications of current research-based tenets and developmental milestones for appropriate and responsive education practices.
ECDP 3338 Cultural & Social Issues in Child Development (3 credits)
In this course, students will explore cultural and social issues in Child Development. Emphasis will be placed on learning multiple perspectives and using culturally relevant practices to support the development of each child in a multicultural and diverse society. Prerequisite: ECDP 3321 and ECDP 3334. Frequency: Every Fall and Winter.

ECDP 3340 Psychosocial Development during the Preschool Years (3 credits)
Students examine developmental theories related to the psychosocial development of children during the preschool years (birth - age five). Field experiences are integrated into the course. Prerequisite: ECDP 3321 or ECDP 3334. Frequency: Every Fall and Winter.

ECDP 3341 Child and Adolescent Mental Health (3 credits)
This course will examine mental health concerns and overall well-being as this relates to children and adolescents. An overview of the historical, social, and cultural aspects of mental health will be discussed. Students will gain an understanding of the various mental health disorders that are common and specific to the child and adolescent population. Students will also obtain knowledge of a variety of assessment, intervention, and communication skills needed when working with children and adolescents with mental health issues. Finally, discussion of current trends and issues in working with children will be provided to equip students with the skills necessary to manage societal changes, especially in the context of education. Prerequisite: PSYC 1020. Frequency: Every Fall and Summer.

ECDP 3345 Parenting Theory and Practice (3 credits)
This course engages students in the analysis of current parenting theoretical tenets and models, child-rearing practices, and strategies promoting positive parent and child relationships (infancy to adolescence). Students examine societal realities, economics, and cultural diversity challenges on family dynamics and their influence on parenting practices influencing how parents and children build and maintain relationships. Prerequisites: PSYC 1020, ECDP 3321, and ECDP 3334. Frequency: Every Fall and Winter.

ECDP 3349 Fatherhood: Cross-Cultural Perspectives (3 credits)
In this course, students analyze the role of fathers in the process of child development. Students engage in the discussion of fatherhood roles across selected cultural groups. Field experiences are integrated into this course. Prerequisite: ECDP-3345. Frequency: Every Fall and Winter.

ECDP 3510 Foundations in Child Life and Family Centered Care (3 credits)
This course will provide students with a comprehensive overview of the child life profession through the examination of historical and theoretical perspectives that have shaped the field over time. An introduction to child life interventions will be presented through a multifaceted lens of play, child development, and patient and family-centered care; alongside the principles of ethics and boundaries in therapeutic relationships that guide the child life scope of psychosocial practice. Students will gain knowledge of the core competencies set forth by the Association of Child Life Professionals (ACLP), and how each contributes to supporting, educating, and empowering children and families impacted by illness, injury, and death. Frequency: Every Fall and Winter.

ECDP 3678 Assessment of Young Children with Special Needs (3 credits)
Students will gain knowledge of the process and recommended practices in the assessment of young children with special needs ages birth to five. In addition, special concerns in the assessment of young children with special needs will be addressed. The assessment of cognitive, motor, communication, social interaction, and play skills with this population will be examined. Finally, the use of assessment information to plan instructional programs for young children and the use of assessment in progress monitoring will be discussed. Prerequisite: None. Frequency: Every Fall.

ECDP 4367 Play and Children Curricular Applications (3 credits)
This course examines the role of play as a developmentally based teaching and curricular strategy for children. Students explore selected play theoretical frameworks and their implications on children's development and learning experiences. They examine ways to apply play as a learning curricular strategy with attention to the individual needs of children. Field experiences are integrated. Prerequisite: None. Frequency: Every Winter.

ECDP 4423 Child Abuse and Neglect (3 credits)
This course will provide students with knowledge regarding the issues associated with child abuse and neglect. In particular, the definitions of child abuse and neglect and how these definitions have evolved over time will be covered. The historical context of these areas will also be reviewed along with national incidence and prevalence rates. Causal and other factors associated with abuse and neglect will be a focus of the course, as well as the typical warning signs. Furthermore, the physical and psychological impact of abuse and neglect will be covered along with an overview of current treatment practices. Students will also gain familiarity with legal and ethical reporting requirements. Finally, future directions for research and public policy will also be discussed. Prerequisite: None. Frequency: Every Fall and Winter.

ECDP 4510 Research Methods and Program Evaluation (3 credits)
This course will cover the fundamentals of research, with specific emphasis on quantitative, qualitative and mixed method research approaches. Students will gain an understanding of the strengths and limitations of methodological approaches. Students will learn the process of identifying research problems and formulating testable hypotheses. This course will also provide students with an understanding of operationalizing variables, research design, data collection and data analysis strategies. Program evaluation will also be reviewed with an emphasis on the use of practical approaches. Student will also learn about relevant ethical issues in research and evaluation. Frequency: Every Fall and Winter.

ECDP 4518 Family Systems (3 credits)
This course will examine historic and current family systems theories. It will utilize a family systems approach to describe human behavior and relationships, with a specific emphasis on the interplay between individual development and family and cultural context. The course will also focus on the impact of patterns, interactions, and communication on family structure and function. In addition, the role of diversity and cultural variance in relation to family structure and function will be explored. Current family systems research and theory will also be considered. Frequency: Every Fall and Winter.

ECDP 4990 Advanced Senior Year Seminar (3 credits)
This course examines current policy and advocacy issues in the field of child development (birth to age 18). Students select and conduct an in-depth investigation of topics and issues relevant to ensure childhood developmental wellbeing and develop a plan proposing advocacy actions. Prerequisites: By permission only. Frequency: Every Fall, Winter, and Summer.

ECN—Economics

ECN 2000 Economics of Doing Business Across Asian Communities (3 credits)
Introduces theoretical and practical knowledge of business, economics, finance, culture and politics across Asian countries in an effort to increase the understanding of the complex interactions across Asian countries. The course will also explore socioeconomic and political directions of major Asian economies, and their implications to other countries.

ECN 2020 Principles of Microeconomics (3 credits)
Microeconomics focuses on how market systems function as opposed to alternative economic systems. This course will investigate
the factors which influence consumer choice and how consumers react to changes in the factors, the costs of production for the firm and production decisions for firms operating in various types of market structures, the impact of market structure on society, regulation and de-regulation of business, environmental issues and labor markets. Prerequisite: MATH 1040 or higher except MATH 2020 and/or other statistics classes. See advisor for specific prerequisites. Frequency: Every Fall and Winter.

ECN 2020H Principles of Microeconomics Honors (3 credits)
This course is designed to acquaint the student with the tools and methodology utilized by economists to analyze how the macro economy functions in both the short and long terms. The course will begin with a study of how market systems and nonmarket systems address the problem of scarcity and unlimited wants. Theories of consumption, investment, the public sector and foreign trade will be developed to illustrate their role in determining the levels of output, employment and prices in both a closed and open economy. The role of Fiscal and Monetary Policies and their short and long run impacts as well as supply side economic theories will be followed by the study of investment in Human and Physical Capital and how these investments influence economic growth and development. The course will conclude with the study of international trade and finance and their impact on the domestic economy. This course is open to HONORS students only. Prerequisite: MATH 1040 or higher. Frequency: Odd Years, Winter.

ECN 2025 Principles of Macroeconomics (3 credits)
This course is designed to acquaint the student with the tools and methodology utilized by economists to analyze how the macro economy functions in both the short and long terms. The course will begin with a study of how market systems and nonmarket systems address the problem of scarcity and unlimited wants. Theories of consumption, investment, the public sector and foreign trade will be developed to illustrate their role in determining the levels of output, employment and prices in both a closed and open economy. The role of Fiscal and Monetary Policies and their short and long run impacts as well as supply side economic theories will be followed by the study of investment in Human and Physical Capital and how these investments influence economic growth and development. The course will conclude with the study of international trade and finance and their impact on the domestic economy. Prerequisite: MATH 1040 or higher. Frequency: Every Fall and Winter.

ECN 2025H Principles of Macroeconomics Honors (3 credits)
This course is designed to acquaint the student with the tools and methodology utilized by economists to analyze how the macro economy functions in both the short and long terms. The course will begin with a study of how market systems and nonmarket systems address the problem of scarcity and unlimited wants. Theories of consumption, investment, the public sector and foreign trade will be developed to illustrate their role in determining the levels of output, employment and prices in both a closed and open economy. The role of Fiscal and Monetary Policies and their short and long run impacts as well as supply side economic theories will be followed by the study of investment in Human and Physical Capital and how these investments influence economic growth and development. The course will conclude with the study of international trade and finance and their impact on the domestic economy. The role of Fiscal and Monetary Policies and their short and long run impacts as well as supply side economic theories will be followed by the study of investment in Human and Physical Capital and how these investments influence economic growth and development. The course will conclude with the study of international trade and finance and their impact on the domestic economy. This course is open to HONORS students only. Prerequisite: MATH 1040 or higher. Frequency: Odd Years, Winter.

ECN 3020 Intermediate Macroeconomics (3 credits)
This course expands upon the tools of economic analysis covered in ECON 2020 Principles of Microeconomics. Mathematical tools will be employed to further analyze the theory of consumer choice, elasticity, costs and production industry structure, regulation and deregulation. Prerequisites: ECN 2020 and ECN 2025. Frequency: Upon request see academic Department Chair.

ECN 3025 Intermediate Macroeconomics (3 credits)
This course expands upon the tools of economic analysis covered in Principles of Macroeconomics. An overview of current macroeconomics events is followed by an in depth study of the methodologies used to predict economic activity. Prerequisites: ECN 2020 and ECN 2025. Frequency: Fall.

ECN 3040 Law and Economics (3 credits)
This course introduces students to the economic approach to the analysis of law. The approach confronts challenges by seeking to identify how best to design legal rules in order to maximize social welfare. To do so, the course will ask (i) how do legal rules affect the behavior of individuals and of organizations? and (ii) how do legal rules compare to each other, in terms of promoting overall social welfare? Frequency: Upon request see academic Department Chair.

ECN 3210 Monetary Theory & Policy (3 credits)
Examines the structure and function of the American banking system, the Federal Reserve System, and the function of monetary policy in the regulation of the national economy. Prerequisite: ECN 2025. Frequency: Winter.

ECN 3910 Special Topics in Economics (3 credits)
Topics in economics that are not included in a regular course offerings. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Frequency: Upon request and see academic department chair.

ECN 4210 Econometrics I (3 credits)
The purpose of this course is to introduce students to the theory and application of econometric methods to test economic relationships. It will familiarize students with the various sources of economic data and with the difficulties encountered in empirical testing of economic models. It covers the basic tools of estimation and inference in the context of the single-equation linear regression model, and deals primarily with least squares methods of estimation. The course emphasizes the intuitive understanding and practical application of these basic tools of regression analysis, as distinct from their formal development. Frequency: Upon request see academic Department Chair.

ECN 4215 Econometrics II (3 credits)
Advanced topics in econometrics. Topics include estimation of linear regression models with endogeneity, economic methods designed for panel data sets, estimation of discrete choice models, time series analysis, and estimation in the presence of auto correlated and heteroskedastic errors. Prerequisite ECN 4210. Frequency: Upon request see academic Department Chair.

ECN 4300 International Economics (3 credits)
Reviews theories and practices of trade, comparative advantage, trade barriers, balance of payments, economic development, and regional economic integration. Prerequisite: ECN 3025. Frequency: Upon request see academic Department Chair.

ECN 4310 Economic Development 1 (3 credits)
Economic Development 1 (3 Credits): This course is designed to provide a working familiarity with the theoretical and empirical investigations used for understanding economic development. It will examine the economic structural shift that usually accompanies economic growth when human development occurs. It will also survey the statistical resources used to measure and analyze performance among developing countries. Topics include: income distribution and human resources, investment and capital flows, production and international trade. Prerequisite ECN 2025. Frequency: Upon request see academic Department Chair.

ECN 4320 Latin American and Caribbean Economics (3 credits)
This course examines the dynamics of economic development in Latin America and the Caribbean. Topics include primary product export dependence, industrialization, macroeconomic stabilization and trade liberalization. The focus then shifts to the economic integration of the Western Hemisphere. The course will finish with
a survey of the economic relations between Latin America and other emerging markets. Prerequisite: ECN 2025. Frequency: Upon request see academic Department Chair.

ECN 4500 Principles of Health Economics (3 credits)
This course is designed to acquaint the student with applying the economic tools and methodology utilized by economists to analyze how a specific industry, health care, functions in both the short and long terms. Theories of consumption, investment, the public sector and comparative systems will be developed to illustrate their role in determining the critical contributions and dependency of the national economy on levels of output, employment and prices of the health care sector. This elective course will study the economics of health care and the impact on national and international policy issues. Students will be required to write a 30-page paper on the economics of one sector of the health economy. The paper will be prepared over the term and students will be prepared to lead presentations and panel discussions. Prerequisite: ECN 2025. Frequency: Upon request see academic Department Chair.

ECN 4600 Law and Economics (3 credits)
This course introduces students to the fundamentals of economic approach to law, focusing on the common law areas of torts, contracts, and property, as well as legal procedure, criminal law, and antitrust law. Among the important issues we study throughout this course are: (i) how does the legal system shape economic incentives in ways that lead to socially optimal behavior? (ii) how does one measure the benefits and costs of changes in legal rules? (iii) what is the nature of private property in a market economy?, and (iv) what is the appropriate role of a legal system in settling private disputes? Upon completing this course, students should be able to understand the effects of the legal system on economic behavior and understand discussions involving law and economics. Frequency: Upon request see academic Department Chair.

ECN 4920 Advanced Special Topics II (3 credits)
Examines advanced topics in economics that are not included in regular course offerings. Specific content and prerequisites may vary. Students may re-enroll for special topics covering different content. Frequency: Upon Request see academic Department Chair.

ECN 4990 Independent Study in Economics (3 credits)
The student works independently under the guidance of a faculty member to learn more about a subject area for credit. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request and see academic department chair.

EDUC—Education

EDUC 2405 Supporting Children & Adolescents with Special Needs (3 credits)
The focus of this course will be on the assessment process and recommended practices in assessing children and adolescents with special needs. In addition, special concerns in the assessment of children with special needs will be addressed. Also, the importance of working with families of children and adolescents with special needs will be addressed. Finally, the use of assessment information to plan interventions and programs for children and adolescents and the use of assessment in monitoring progress will be included. Prerequisite: None. Frequency: Every Fall and Winter.

EDUC 3420 Families of Children with Special Needs: Challenges and Opportunities (3 credits)
This course examines practices to support and engage families of young children with special needs. Students explore the diversity of issues and needs experienced by families of young children with disabilities and examine programs and services available in the community. Field experiences are integrated (10 hours). Prerequisite: ECA 203. Frequency: Every Fall and Winter.

EDUC 3530 Diagnosis, Assessment, and Evaluation of Young Children (3 credits)
Students in this course will be introduced to a philosophic overview of the assessment process, including transdisciplinary assessment teams and provisions for appropriate information gathering techniques - formal and informal - which include the construction, selection, interpretation, and evaluation of diagnostic instruments. The role of technology in testing, record maintenance, and composition of IEP/IPPS will be discussed/modelled. In addition to class meetings, a minimum of 10 hours of observation and participation in a clinical setting is required. Prerequisite: ECA 0203. Frequency: Every Fall and Winter.

EDUC 4320 Cultural Perspectives in Working with Children and Families (3 credits)
This course will provide students with knowledge on the role of families on child development from the perspective of diversity and culture. The students learn about how culture shapes families’ views on child rearing practices. Students in this course will also learn the benefits of positive reciprocal partnerships with families to foster child development. Emphasis will be placed on creating a vital link among school, community, and home in our multithenic society. Prerequisite: None. Frequency: Every Winter and Summer.

EDUC 1000 General Knowledge Preparation Mathematics (0 credits)
This course is designed to review the mathematics skills necessary to be successful on the General Knowledge Test (GKT). These skills are included in the four broad areas; Arithmetic; Geometry; and Measurement; Algebra; and Statistics and Probability. Logical Reasoning, test-taking strategies and problem-solving techniques will also be addressed in this course. Prerequisite: None. Frequency: Upon request. See academic Department Chair.

EDUC 1010 Writing Skills for General Knowledge Test (0 credits)
Students will learn and practice writing and English usage strategies to prepare for the General Knowledge Test. Prerequisite: None. Frequency: Upon request. See academic Department Chair.

EDUC 1100 Exploration of the Education Profession (3 credits)
Exploration of the Education Profession is designed to provide teacher candidates with an orientation to the education profession, including the examination of the institution of schooling in its social, legal, historical, and philosophical contexts. Teacher candidates engage in self-reflection and analysis of their perceptions of education and develop a general understanding of the realities of American education. Prerequisite: None. Frequency: Every Winter.

EDUC 1200 Guidance Purpose Success (GPS) for Life (3 credits)
The purpose of this course is to facilitate the development of students’ capacity to engage in the world in meaningful, purposeful, and thoughtful ways. In this course, students will reflect on their mindset and consider research-based approaches to shifting their habits, attitudes, beliefs and expectations to grow personally, collegiately, interpersonally and intra-personally. Students will reflect, evaluate and apply proven principles to increase their personal well-being, educational achievement. Prerequisites: None. Frequency: Every Fall and Winter.

EDUC 2010 Foundations of Education (3 credits)
This course will focus on historical and social aspects of education; particularly as it pertains to issues of social justice and cultural awareness. Students will learn about social and historical factors that inform education, identify the role of biases in instruction and develop a broader understanding of political forces that influence teaching and learning in the US school context. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

EDUC 2010F Foundations of Education (3 credits)
EDUC 3360 Educational Psychology (3 credits)
Educational Psychology focuses on how to improve the teaching and learning process based on research in the field. Teacher candidates will gain knowledge of principles and theories that relate to human development, diversity, and motivation. Additionally, candidates will analyze teacher codes of ethics and solve ethical scenarios appropriately. Frequency: Every Fall and Winter.

EDUC 3360F Educational Psychology (3 credits)
Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

EDUC 3525 Practices of Instruction (3 credits)
This course focuses on building teacher candidates’ knowledge of research-based instructional practices, lesson planning, and classroom management. Teacher-centered and student-centered pedagogical models of instruction will be examined. Candidates will learn methods for effective teaching and create a lesson that promotes student motivation, engagement, and achievement. This course is ESOL infused. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite(s): EDUC 3360. Frequency: Every Fall.

EDUC 3525F Practices of Instruction (3 credits)
Practices of Instruction focuses on building teacher candidates’ repertoire of instructional practices and lesson planning skills. Candidates learn about six pedagogical models: presentation, concept teaching, direct instruction, cooperative learning, problem-based instruction, and discussion. Candidates apply their knowledge of the instructional practices as they learn how to plan a lesson that promotes students’ achievement. This course is ESOL infused. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

EDUC 3535 Educational Assessment (3 credits)
In this course assessment of students for instructional planning purposes is stressed for students in the K-12 setting. Topics include formal and informal evaluation techniques. Emphasis will be placed on observation, screening, evaluations, interpretation and communication of evaluation results. This is an ESOL infused course. In addition to class meetings, a minimum of 10 hours of observation and participation in a field setting is required. Prerequisite(s): EDUC 3330, EDUC 3350, ESOL 3340, and passing scores on the Florida Teacher Certification Examination General Knowledge Test. Frequency: Every Fall and Winter.

EDUC 3535F Educational Assessment (3 credits)
Assessment of students for instructional planning purposes is stressed for students in the K-12 setting. Topics include formal and informal evaluation techniques. Emphasis will be placed on observation, screening, evaluations, interpretation and communication of evaluation results. This is an ESOL infused course. In addition to class meetings, a minimum of 10 hours of observation and participation in a field setting is required. Prerequisite(s): None. Frequency: Every Fall and Winter.

EDUC 4010 Foundations of Curriculum Development (3 credits)
In this course, candidates will develop their understanding of the curriculum development process and the political and social issues that influence its development. Prerequisite(s): None. Frequency: Every Fall and Winter.

EDUC 4010F Foundations of Curriculum Development (3 credits)
This course offers students the opportunity to enhance their understanding of curriculum through a comprehensive assessment of the historical and social factors, which influenced modern approaches to curriculum development. Prerequisite(s): Passing scores on all subtests of the Florida General Knowledge Examination (GKEG, GKES, GKMA, and GKRE). Frequency: Every Fall and Winter.

EDUC 4200 Simulation Experience - Diversity and Ethics (3 credits)
The Simulation Experience is a three credit, eight week course that all students must complete prior to internship. Students (in teams) are (placed) in simulated school settings and required to recommend interventions relating to issues that arise relating to diversity. The Simulation Experience takes place over three phases; these phases take place in a kindergarten, middle school, or high school setting. The Simulation Experience is directly related to the QEP (Quality Enhancement Plan) within the Abraham S. Fischler College of Education at Nova Southeastern University. Prerequisite(s): EECP 3550, or ELEM 4320, or ESED 4320, or SECE 4320. Frequency: Every Fall and Winter.

EDUC 4322 Foundations of Classroom Management (3 credits)
This course examines classroom management as the interrelationship of appropriate curricula, methods, materials, student behavior, family factors, and teacher behavior from culturally diverse perspectives. Additionally, this course addresses the classroom management needs of students with Emotional/Behavioral Disorders (EBD), focusing on the history, identification, and screening/evaluation approaches. Academic
and data-based ethical behavioral strategies for intervention are discussed and applied. A minimum of 10 hours of field experience in a classroom is required. This course is ESOL infused. **Prerequisites:** EDUC 3535; EDUC 3360; and EDUC 3350. **Frequency:** Every Fall and Winter.

**EDUC 4322F Foundations of Classroom Management (3 credits)**
This course examines classroom management as the interrelationship of appropriate curricula, methods, materials, student behavior, family factors, and teacher behavior from culturally diverse perspectives. Additionally, this course addresses the classroom management needs of students with Emotional/Behavioral Disorders (EBD), focusing on the history, identification, and screening/evaluation approaches. Academic and data-based ethical behavioral strategies for intervention are discussed and applied. A minimum of 10 hours of field experience in a classroom is required. This course is ESOL infused. **Prerequisites:** EDUC 3535F; EDUC 3360F; and EDUC 3350F. **Frequency:** Every Fall and Winter.

**EDUC 4510 Diversity and Ethics (3 credits)**
Ethics and Diversity is a simulated lab course that all students must complete prior to the clinical practice (internship). Ethical, legal, and classroom management techniques will be explored and implemented in a simulated classroom environment creating viable ethical solutions to address these cases. Students (in teams) are placed in simulated school settings and required to recommend interventions relating to scenarios that arise focused on diversity and ethics. This course features a simulation experience component, embedded within Canvas that takes place in three school settings; kindergarten, middle school, and a high school setting. **Frequency:** Every Fall.

**EDUC 4510F Diversity and Ethics (3 credits)**
Ethics and Diversity is a simulated lab course that all students must complete prior to the clinical practice (internship). Ethical, legal, and classroom management techniques will be explored and implemented in a simulated classroom environment creating viable ethical solutions to address these cases. Students (in teams) are placed in simulated school settings and required to recommend interventions relating to scenarios that arise focused on diversity and ethics. This course features a simulation experience component, embedded within Canvas that takes place in three school settings; kindergarten, middle school, and a high school setting. **Frequency:** Every Fall.

**EDUC 4514 General Methods in Field Experiences (3 credits)**
The focus of this course is a 45-hour field experience that allows the teacher candidate to conduct classroom observations in his/her content area and participate in the instructional process. The field experience emphasizes instructional delivery and facilitation, continuous professional improvement, and ethics in teaching. The candidate prepares and delivers effective lessons, acquires the necessary vocabulary/educational terminology, uses techniques and strategies that meet the needs of diverse student populations, and uses effective classroom instructional management techniques. Teacher candidates are placed in classrooms with experienced cooperating teachers who have clinical educator training and a history of successful teaching. This placement occurs through the Office of Placement Services in cooperation with school districts. **Prerequisites:** None. **Frequency:** Every Fall and Winter.

**EDUC 4900 Undergraduate International Arts & Culture Infusion (3-6 credits)**
This course introduces a unique interdisciplinary arts education methodology and demonstrates how its techniques and activities can be infused into an international setting. The Lovewell Method is an applied arts-education philosophy and pedagogy. This methodology not only trains students in creative, conceptual academic and performing arts skills, it develops higher levels of social, organizational and motivational skills. Interfacing with the culture and artists of the host country, participants will explore arts education built on authentic experience, cognitive thinking, and problem solving. Students will have the opportunity to observe three primary components of the Lovewell Process: the educational, the artistic, and the social/therapeutic as they interweave various arts disciplines such as drama, music, design, dance, video, stage management and technology. This course provides an opportunity to experience the arts as a vehicle for learning in all subject areas. **Prerequisite/s:** None.

**EDUC 4910 Introduction to Driver’s Education (3 credits)**
This course will be a study of basic content, methodology, and appropriate activities for the purpose of teaching high school students basic driver’s education. Participants will review basic driving rules and procedures associated with driving as well as how to implement these procedures using engaging instructional strategies. Participants will be introduced to the highway transportation system and be provided with an in-depth study of the scope and nature of accident problems and their solutions. Teaching strategies to assist the participant with classroom implementation will be used throughout the course. Sample teaching strategies and curriculum connections are included in this syllabus. The course objectives will be taken from the Florida Department of Education Driver’s Education outlined expectations. **Prerequisite:** None. **Frequency:** Every Winter.

**EDUC 4912 Administration and Supervision of Driver Traffic Safety Education (3 credits)**
This course will be a study of basic content, methodology, and appropriate activities for the purpose of teaching high school students basic driver’s education. Participants will review basic driving rules and procedures associated with driving as well as how to implement these procedures using engaging instructional strategies. Participants will be introduced to the highway transportation system and be provided with an in-depth study of the scope and nature of accident problems and their solutions. Teaching strategies to assist the participant with classroom implementation will be used throughout the course. Sample teaching strategies and curriculum connections are included in this syllabus. The course objectives will be taken from the Florida Department of Education Driver’s Education outlined expectations. **Frequency:** Every Winter.

**EECP—Early Chldhd Ed Primary**

**EECP 3330 Integrating Instructional Technology in the Classroom (3 credits)**
Integrating Instructional Technology in the Classroom presents strategies for technological integration into the classroom curriculum in elementary/secondary learning environments. Hands-on experiences will allow students to apply teaching practices and research to specific learning needs of typical and atypical learners. **Prerequisites:** COMP 1500, COMP 2000 or COMP 2020, and MATH 1040. **Frequency:** Every Fall and Winter.

**EECP 3351 Adolescent Development (3 credits)**
This course will provide an overview of history and theory in studying adolescent development. In addition, students will obtain knowledge about the physical, cognitive, personality and social development during adolescence, in the contexts of family, school, peers, work, and culture. Further, students will learn about
common challenges that adolescents face such as establishing an identity, sexuality concerns, becoming more independent and autonomous human beings and developing good judgement and problem-solving skills. Finally, topics that will be explored include behavioral and emotional problems, depression, suicide, substance abuse, eating disorders, and diversity issues to be considered when discussing development in these areas. Prerequisite: None. Frequency: Every Winter and Summer.

EECP 3550 Child Guidance and Classroom Management (3 credits)
Students in this course will examine appropriate and developmentally sensitive strategies for managing behavior in typically and atypically developing children ages three through eight years. Performance of functional analysis of behavior and collaboration with support specialties will be discussed. The importance of consistency and proactive strategies and understanding the affective domain of the child will be stressed. Prerequisite: ECA 0203. Frequency: Every Fall and Winter.

EECP 4330 Promoting Child Health and Safety (3 credits)
This course will provide students with knowledge of healthy behaviors and environments which promote optimal growth, well-being, and physical and psychological safety of children and adolescents. Childhood disease, injury, and prevention will be covered, in addition to important factors impacting health and well-being, such as sleep, nutrition, and physical activity. Strategies to promote child safety and well-being in the school setting and at home via family support will also be addressed. Special considerations with regard to the child’s developmental level will be covered. Prerequisite: None. Frequency: Every Fall and Summer.

EECP 4340 Developmentally-Appropriate Practices For Teaching Literacy And Language Arts In Early Childhood (3 credits)
Students will plan, implement and evaluate developmentally appropriate methods for evaluating, improving and remediating individual prereading skills to ensure future success of all students within a diverse early childhood setting. In addition to class meetings, a minimum of 10 hours of clinical observation and participation within an early childhood setting (prekindergarten-grade three) is required. Prerequisite: EECP 4340 or EECP 4520 or ECA 0242. Frequency: Every Fall and Winter.

EECP 4520 Developmentally Appropriate Practices for the Teaching of Reading in Early Childhood (3 credits)
This course examines concepts in reading, including sequential development, skills in word recognition, and comprehension methods and materials. The rationale for each method is discussed and practical application with young children is stressed. This course is designed to focus on prereading and reading skills of students from age three to grade three. The relationship of writing, listening, and language to reading development is included. In addition to class meetings, a minimum of 10 hours of observation and participation in a clinical setting is required. Prerequisite: EECP 4340. Frequency: Every Fall and Winter.

EECP 4530 Developmentally-Appropriate Practices For The Integration Of Creative Arts Across The Early Childhood (3 credits)
Students will plan, implement, and evaluate developmentally appropriate and integrated content and methodology in the area of emergent and developing understanding of art, drama, movement, and music. In addition to class meetings, a minimum of 10 hours of observation and participation in a clinical setting are required. Prerequisite: None. Frequency: Every Fall and Winter.

EECP 4545 Developmentally Appropriate Practices for Integrating Math and Science in Early Childhood Education (3 credits)
Students will focus on instruction and integration of mathematics and science content and methodology in the areas of emergent and developing mathematical and scientific principles. Theories of child development and learning will be reviewed as they apply to hands on instruction as well as assessment in both content areas for children in the age range 3 through 5th grade. Students will plan, implement, and evaluate developmentally appropriate lessons while demonstrating best practices. Integration of both mathematics and science content area throughout the curriculum in developmentally appropriate ways will be stressed. Additionally, strategies for involvement of family and community will be stressed. In addition to class meetings, a minimum of 10 hours of observation and participation in a clinical setting is required. Prerequisite: ECA 0203. Frequency: Every Fall and Winter.

EECP 4550 Developmentally Appropriate Practices for Teaching Social Studies in Early Childhood Education (3 credits)
Students will plan, implement, and evaluate developmentally appropriate and integrated content and methodology in the area of emergent and developing understanding of social science. In addition to class meetings, a minimum of 10 hours of observation and participation in a clinical setting are required. Prerequisite: ECA 0203. Frequency: Every Fall and Winter.

EECP 4560 Integrating Literacy Throughout the Early Childhood Curriculum (3 credits)
Students will be made aware of the vital role of early exposure to literature in developing voluntary, avid, and competent readers. The course will focus on components and types of literature, a review of varied literary samples and application of literature to the total curriculum. Elements of cultural, family involvement, and special needs students will be addressed. The course will further examine the teacher’s role in evaluating and selecting appropriate and valuable literature to be used in the classroom. Techniques for fostering students’ ability to understand, recall, integrate information and improve comprehension as independent learners will be presented through the world of literature. In addition to class meetings, a minimum of 10 hours of clinical interaction, observation and instructional participation in a early childhood setting (Pre-K - Gr. 3) is required. Prerequisite: EECP 4340 or ECA 0242. Frequency: Every Fall and Winter.

EECP 4570 PreK-Primary Internship (12 credits)
This course for PreK-Primary Education majors offers a comprehensive review and practical application of educational philosophy, methods, and strategies through a 12-week clinical experience (internship) consisting of 450 hours that includes coursework and seminars. The central coursework is composed of a 12-week clinical experience, with the concurrent seminar serving as a supportive and reinforcing component. During the seminar sessions, the teacher candidate will explore, in depth, such topics as school board rules, regulations and policies; professional ethics; best practices; national and state standards; teaching strategies; current trends in education; teaching competencies; student assessment; and reflective practices. This course requires candidates to demonstrate professional, pedagogical, and content standards, including ESOL competencies and skills. Prerequisites: EDUC 2500, ESOL 2903, ECA 0203, EECP 3330, EDEC 2405, EDEC 3420, EDEC 3530, EECP 3550, EDEC 4320, EECP 4330, EECP 4340, EECP 4345, EDEC 4200, EECP 4520, EECP 4530, EECP 4545, EECP 4550, EECP 4560, and passing scores on all sub-tests of the Florida Teacher Certification Examination. Frequency: Every Fall and Winter.
EENG—Electrical Engineering

EENG 2710 Electrical Circuits/Lab (4 credits)
This course covers the fundamentals of electrical circuit theory, through the application of Ohm’s law and Kirchhoff’s current and voltage laws to solve basic resistive circuit problems. It also covers mesh and nodal analysis, Thévenin and Norton equivalent circuits, the analysis of resistive circuits with inductors and capacitors in both DC and AC steady-state conditions. Reactive circuits and networks are also covered for sinusoidal currents and voltages. Transient analysis and variable frequency response concepts are also introduced. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: MATH 2100 or MATH 2100H. Frequency: Every Fall.

EENG 3310 Signals and Systems (3 credits)
This course covers fundamentals of linear systems techniques for the analysis of signals and systems in both the discrete and continuous time domains. It also covers signal representation in the Fourier, Laplace, and Z transform domains, as well as the sampling theorem. The course also emphasizes basic operations of linear systems and its system theory interpretations, such as convolution, sinusoidal analysis, frequency response, window analysis, discrete Fourier transforms, and digital filters. Prerequisites: EENG 2710 and MATH 3400. Frequency: Every Winter.

EENG 3710 Electronic Circuits/Lab (4 credits)
This course introduces the electronic properties of semiconductor materials and basic electronic devices such as diodes, transistors, and amplifiers. The course also covers the operating principles of electronic devices, including the analysis of electronic circuits operating under DC bias and switching conditions. Both single and multistage analysis and designs are carried out. Computer aided design (CAD) software is used to reinforce concepts and to perform calculations specific to the application of devices in electronic circuits. Other topics include bipolar junction transistors, field effect transistors, operational amplifiers, amplifier frequency response, active filters, and circuit modeling and simulation. Prerequisites: EENG 2710. Frequency: Every Winter.

EENG 4950 Internship in Electrical Engineering (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.25 or higher, major GPA of 2.5 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Upon Request see academic Department Chair.

EENG 4990 Independent Study in Electrical Engineering (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and the division director. Frequency: Upon Request see academic Department Chair.

ELEM—Elementary Education

ELEM 3530 Methods of Teaching Social Studies in the Elementary School (3 credits)
This course is a study of content, methodology, program development, appropriate activities, and assessment techniques for elementary school social studies. In addition, students will implement ESOL strategies in planning and presenting lessons. Students will also become familiar with the Florida Accomplished Practices as appropriate. Students are required to teach a social studies lesson in an elementary school during the 10 hour clinical experience required for this class. This is an ESOL infused course. Prerequisites: EDUC 2500, EDUC 3330, EDUC 3350, EDUC 3360, EDUC 3525, and ESOL 3340, and passing scores on the Florida Teacher Certification Examination General Knowledge Test. Frequency: Every Fall and Winter.

ELEM 3530F Methods of Teaching Social Studies in the Elementary School (3 credits)
This course is a study of content, pedagogy, and assessment strategies used to teach Social Studies in the elementary school classroom. Additionally, students will implement ESOL strategies in planning and presenting lessons. This course features 10 hours of required field experience. Frequency: Every Fall.

ELEM 3532 ONLINE SCIENCE CURRICULUM FOR ELEMENTARY EDUCATION (3 credits)
This online course explores the preK-12 science curriculum content based upon the National Research Council Science Education Standards, InTASC Principles, and Clark County School District Curriculum Essentials Framework guidelines. Attention is given to the connections among science concepts with reference to vertical scope and sequence throughout the grade levels. The student will record the exploration of each science strand in a journal as a permanent record of the knowledge composing the preK-12 science curriculum. There will be a ten (10) hour field experience observing science standards practiced in a local community school. Prerequisite: EDUC 2500. Frequency: Upon request. See academic Department Chair.

ELEM 3550 Methods of Teaching Science in the Elementary School (3 credits)
The purpose of this course is to examine content and methods for teaching science in the elementary school. You will explore a variety of techniques and reflect on approaches most applicable to teaching and learning when working with students who are typical in learning styles, who are Limited in English Proficiency (LEP) or who are exceptional learners. This is an ESOL-infused course. Hands-on approaches, resources, materials, technology, and ideas drawn from the student’s experience will be discussed. There will be a Field experience in a community school. Prerequisites: EDUC 2500, EDUC 3330, EDUC 3350, EDUC 3360, ESOL 3340, and passing scores on the Florida Teacher Certification Examination General Knowledge Test. Frequency: Every Fall and Winter.

ELEM 3550F Methods of Teaching Science in the Elementary School Classroom (3 credits)
The purpose of this course is to examine content and methods for teaching science in the elementary school. You will explore a variety of techniques and reflect on approaches most applicable to teaching and learning when working with students who are typical in learning styles, who are Limited in English Proficiency (LEP) or who are exceptional learners. This is an ESOL-infused course. Hands-on approaches, resources, materials, technology, and ideas drawn from the student’s experience will be discussed. There will be a Field experience in a community school. Frequency: Every Fall.

ELEM 3810 Assessing and Teaching Literacy in the Elementary School (3 credits)
This course examines the assessment of literacy and the use of research-based strategies to support the development of strong readers in the elementary classroom. Candidates learn the appropriate use of methods and materials to improve reading performance based on assessment data. Special needs population, including those in ESOL programs, are addressed. Practical application through fieldwork is a requirement. Frequency: Every Fall and Winter.

ELEM 3810F Assessing Literacy (3 credits)
This course examines the assessment of literacy and the use of research-based strategies to support the development of strong readers in the elementary classroom. Students learn the appropriate use of methods and materials to improve reading performance based on assessment data. Special needs populations, including those in ESOL programs, are addressed. Practical application through fieldwork is a requirement. Frequency: Every Fall.

ELEM 4320 Elementary School Classroom Management for Typical and Atypical Learners in Multicultural Classrooms (3 credits)
This course examines research-based knowledge, skills, and strategies that promote effective classroom management at the elementary school level. Teacher candidates apply the content learned in the course by developing a classroom management plan that focuses on safety and instruction for diverse students. Ten hours of field experiences are required to further promote candidates’ application of knowledge, skills, and strategies. This course is ESOL infused.
Mathematics in the Elementary School (3 credits)
This course will focus on methods of teaching mathematics to elementary children. Students will explore major concepts and procedures that define Number and Operation, Algebra, Geometry, Measurement, and Statistics and Probability using a variety of techniques (using various manipulatives as well as mathematics-specific technology) as they move from concrete to abstract conceptual and procedural understanding. They will reflect on approaches most applicable to teaching and learning when working with students who are typical in learning styles, who are Limited in English Proficiency (LEP) or who are exceptional learners. In doing so, they will constantly engage in activities to develop several mathematical processes: problem solving, reasoning and proof, communication, connections, and representation. There will be a ten (10) hour field experience in an elementary school. Field experience activities include collecting observation data using pre-selected tools, teaching and reflecting on the delivery of a lesson, and working with the teacher and students. Prerequisites: EDUC 2500, EDUC 3350, EDUC 3525, ESOL 3340, and passing scores on the Florida Teacher Certification Examination General Knowledge Test. Frequency: Every Fall and Winter.

ELEM 4350F Methods of Teaching Mathematics in the Elementary School Curriculum (3 credits)
This course will begin with an examination of the national standards associated with the individual STEM standards and practices as well as current and developing STEM curriculum models. Concurrently, the research-based instructional practices that effectively foster concept formation in early childhood will be examined. Emphasis will be placed on problem-based learning and scientific inquiry as effective instructional strategies. Additionally, the curriculum topics associated with a standards-based STEM curriculum for elementary learners will be examined. Frequency: Every Fall and Winter.

ELEM 4535 Inquiry Approaches to STEM Education in the Elementary Classroom (3 credits)
This course focuses on how K-5 teachers can support classroom teaching, in moving toward an inquiry-based approach in which students take more responsibility for their learning. Frequency: Every Fall Winter.

ELEM 4535F Inquiry Approaches to STEM Education in the Elementary Classroom (3 credits)
This course examines recent trends in testing of word recognition and comprehension techniques. Students learn the appropriate use of methods and materials to improve reading performance. The rationale for each assessment technique is discussed and practical application with an elementary school youngster is required. The relationship of writing, listening, and speaking to reading is included. Students will implement ESOL strategies in planning and presenting lessons. This is an ESOL infused course. In addition to class meetings, at least ten hours of field experience are required. Prerequisites: EDUC 2500, EDUC 3350, EDUC 3360, ESOL 3340, and passing scores on the Florida Teacher Certification Examination General Knowledge Test. Frequency: Every Fall and Winter.

ELEM 4530 Integrating Art, Music, PE, and Health Education Across the Curriculum (3 credits)
This course examines the methodology for the integration of art, music, physical education (PE), and health education into the elementary school curriculum based on the theory of multiple intelligences. Age and grade appropriate methods, materials, activities and assessment will be introduced through practical applications, which are based on current research. In addition to class sessions, field experience is required for this course. Prerequisites: EDUC 3350, EDUC 3360, ESOL 3340, and passing scores on the Florida Teacher Certification Examination General Knowledge Test. Frequency: Every Fall and Winter.

ELEM 4340 Methods of Teaching Language Arts in the Elementary School (3 credits)
This course examines content and teaching strategies for teaching language arts through the use of children's literature. Emphasis is on the identification of high-quality children's books and the development of teaching strategies for integrated language arts instruction. Students will implement ESOL strategies in planning and presenting language arts lessons. This is an ESOL infused course. In addition to class meetings, a minimum of 10 hours of observation and participation in a clinical setting are required. Prerequisites: EDUC 2500, EDUC 3330, EDUC 3350, EDUC 3360, and EDUC 3525. Frequency: Upon request. See academic Department Chair.

ELEM 4340F Methods of Teaching Language Arts in the Elementary School Classroom (3 credits)
This course is a study of the content, pedagogy, and assessment strategies used to teach Language Arts lessons in the elementary school classroom. Additionally, students will implement ESOL strategies in planning and presenting lessons. This course features 10 hours of required field placement. Frequency: Every Fall and Winter.
with an elementary school youngster is required. Students will consider ESOL influences when administering assessments and interpreting data. This is an ESOL infused course. In addition to class meetings, at least ten hours of field experience are required. Prerequisites: EDUC 2500, ELEM 4340, and ELEM 4360. Frequency: Every Fall and Winter.

ELEM 4560 Methods of Teaching Reading Across the Elementary Curriculum (3 credits)
This course addresses methods of teaching reading across the elementary curriculum. Candidates identify the components and phases of reading and learn how to integrate language and literacy instruction across grade levels to diverse students. They develop strategies for teaching phonics, oral reading, vocabulary, comprehension, fluency and critical reading. They implement ESOL strategies in planning and presenting lessons. A minimum of 10 hours of field experience is required, where candidates observe and work with students in an educational setting. Candidates will create a unit plan in a content area, teach one of the lessons in the plan, and work with classroom students under the teacher’s direction. Prerequisites: ELEM 4340 and ELEM 4360 Frequency: Every Fall and Winter.

ELEM 4560F Methods of Teaching Reading Across the Elementary Curriculum (3 credits)
This course addresses the significance of reading ability and study skills throughout the elementary school curriculum. The emphasis is on identifying sources of difficulties experienced by elementary students in reading and learning in the content areas. General strategies for learning from textbooks are examined, as well as study skills and specific strategies for handling rigorous academic text. Special needs populations, including those in ESOL and ESE programs, are addressed. Practical application through fieldwork is a requirement. Prerequisites: Passing scores on all subtests of the Florida General Knowledge Examination (GKEG, GKES, GKMA, and GKRE). Frequency: Every Winter.

ELEM 4570 Elementary Education Internship (12 credits)
This course for Elementary Education majors offers a comprehensive review and practical application of educational philosophy, methods, and strategies through a 12-week clinical experience (internship) consisting of 450 hours in an elementary classroom setting that includes coursework and seminars. The central coursework is composed of a 12-week clinical experience, with the concurrent seminar serving as a supportive and reinforcing component. During the seminar sessions, the teacher candidate will explore, in depth, such topics as school board rules, regulations, and policies; professional ethics; best practices; national and state standards; teaching strategies; current trends in education; teaching competencies; student assessment; and reflective practices. This course requires candidates to demonstrate professional, pedagogical, and content standards, including ESOL competencies and skills. Prerequisites: EDUC 2500, ESOL 2903, EDUC 3330, ESOL 3340, EDUC 3350, EDUC 3360, EDUC 3525, ELEM 3530, EDUC 3535, ELEM 3550, ELEM 4320, ELEM 4340, ELEM 4350, ELEM 4360, EDUC 4200, ELEM 4530, ELEM 4540, ELEM 4560, ESOL 4565, and passing scores on all subtests of the Florida Teacher Certification Examination. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

ELEM 4810 Integrating PE and Health Education into the Elementary School (3 credits)
The candidate plans developmentally appropriate standard based educational activities that provide diverse elementary students with the knowledge, skills, fitness, and attitudes necessary to lead a socially responsible and healthy lifestyle. Culturally responsive learning environments that promote the health and safety of all elementary students are created. The candidate applies instructional and behavioral strategies and the use of technology tools to promote physical activity and healthy nutritional habits in all elementary students. The candidate integrates movement concepts, principles, strategies, and approaches in the development of physical education and health lessons for diverse elementary students. Formative and summative assessments are implemented to measure knowledge of PE and health and promote goal setting and improvement of one’s personal physical activity and health. Frequency: Every Fall and Winter

ELEM 4810F Integrating PE & Health Education into the Elementary School (3 credits)
This course examines the methodology for the integration of physical education (PE) and health education into the elementary school curriculum, based on the theory of multiple intelligences. Age and grade appropriate methods, materials, activities and assessments will be introduced through practical applications, which are based on current research. In addition to class sessions, field experience is required for this course. Frequency: Every Fall.

ELEM 4815 Integrating Art and Music Education across the Curriculum (3 credits)
This course examines the integration of art and music into the elementary school curriculum. The candidate uses grade level standards to plan a thematic unit and create lessons that integrate art and music with various core subjects. Frequency: Every Fall and Winter.

ENT—Entrepreneurship

ENT 2000 Entrepreneurial Opportunities & Analysis (1 credits)
Produce an enhanced business plan for an on-campus business and make a presentation to gain funding from NSU, including financial analysis for viability of the business. Content areas for the course include: Competitive Analysis, Industry Analysis, Market Research, Customer Needs Identification, Implementation Planning, Financial Analysis, and Networking. Other course
features include students meeting with various NSU departments to understand logistical, legal, and other issues related to getting business ready to launch. Only open to Razor’s Edge Shark Cage Scholars Program students. Prerequisite ENT 2100. Frequency: Every Winter.

**ENT 3010 Maturing Businesses (1 credits)**

Develop an exit strategy for on-campus business. Content areas for course include: Structuring deals, close down of business, taking business to next level, generational transfers and other issues related to leadership and business transitions. Only open to Razor’s Edge Shark Cage Scholars Program students. Frequency: Every Winter.

**ENT 3010 Entrepreneurial Mindset (3 credits)**

Re-evaluate your own views of entrepreneurship within the framework of entrepreneurial thinking, and putting this mindset into action. Develop a mindset that will enable you to build a toolkit to create and evaluate entrepreneurial opportunities, marshal resources, and form teams driven by creativity, leadership, and smart action. In sum, it is a journey through the fuzzy front-end of early stage entrepreneurial activity. Frequency: Every Fall and Winter.

**ENT 3130 HBlA Studio 1 (3 credits)**

Spend an intensive two weeks to get better acquainted and work together with the students in the Huizenga Business Innovation Academy Class of 2024. Read and discuss important business books that will help students to learn how to: (1) reframe problems to develop more precise business ideas; (2) gain strategies to cope with chaotic and ever-changing business conditions; (3) develop habits to help students to become highly effective entrepreneurs. Develop the skills to identify opportunities and to formulate them into business ideas. Learn basic skills that will help students become more effective entrepreneurs including: (1) developing and administering customer surveys to shape business ideas; (2) understanding the fundamentals of sales techniques and sales revenue; (3) learning the essentials of marketing and how to develop traditional and social media marketing plans; (4) learning about the choices of corporate legal structures and basic principles of intellectual property law; (5) learning the basics of business financials and developing financial projections; and, (6) learning the importance of ethical business practices. At the beginning of the course, each student will submit three potential business ideas (approximately 255 ideas from the group), and over the course of the two-week boot camp, students will narrow down that list of ideas to 40-42 businesses from which they will choose to work on either an on-campus or off-campus business (a team of 2-3 students per business) to further develop in ENT 3140, and to launch during their second/third years as NSU students. Finally, students will learn how to develop and present effective Pitch Decks for business ideas. Identified teams will create and present a Pitch Deck of their selected businesses.

**ENT 3140 Ent. Opportunities & Analysis (3 credits)**

Building on Studio I and using business model canvas. Learn to validate why customers will buy your product/service; how you will meet customer needs; why you think there is a need for your business; why you think it will be profitable; and a thorough review of your business model. Content areas for the course include Competitive Analysis, Industry Analysis, Market Research, Customer Needs Identification, Prototyping, Financial Analysis, Promotional Planning, and Networking. Prerequisite: ENT 3100 and ENT 3130. Frequency: Every Fall.

**ENT 3150 HBIA Studio 2 (6 credits)**

Learn to start up and run a company. Build an entrepreneurial firm, experiment with strategies, and compete with real businesses. Gain experience in market analysis, strategy formulation, and management of a new venture. Learn to skillfully adjust your strategy as you discover the nature of real-life decisions, including the available options, linkages to other parts of the business, conflicts, tradeoffs, and potential outcomes. Apply tools and ways of thinking as the firm expands its operations and must take on new tasks and responsibilities. Acquire seed funding to startup the company, organize the team into functional responsibilities, analyze market research, establish the firm’s strategic direction and set up shop (design brands, website and the like). Test market brands, prices, ad copy, media campaigns, and sales tactics. Study the market’s response, competitive tactics, and one’s own operational and financial performance and adjust strategy. Prepare business plan and obtain financing (micro loan, crowdfunding, angel investors, venture capitalist, etc.) Undertake an international rollout campaign based upon the business plan. Adjust the strategy to market opinion, competitive tactics, and operational and financial performance and any unexpected economic developments that might occur. Prepare a Report to the Board of Directors (investors) regarding the firm’s performance, departures from the business plan and justification and how well the firm is prepared to compete in the future. Lessons learned. This is a six-week summer intensive. Prerequisite: ENT 3100; ENT 3130; ENT 3140.

**ENT 3160 Running Your Business (2 credits)**

Learn to run a successful and impactful business. Content areas include: Sales and Marketing, Budgeting, Human Resource Management (employee issues), Motivation, Leadership, Legal, Insurance and Risk, Accounting, Financing and Strategy. Prerequisites: ENT 3130 AND ENT 3140 AND ENT 3100. Frequency: Every Fall.

**ENT 3170 Maturing Businesses (1 credits)**

Develop an exit strategy for business. Content areas for course include: Structuring deals, close-down of business, taking business to next level, generational transfers, IPO, merge, acquisition and other issues related to leadership and business transitions. Frequency: Every Winter.

**ENT 3200 Global Trading and Negotiations for Entrepreneurs (3 credits)**

This course is designed for students interested in starting, joining, or holding stakes in international ventures. It examines the creation and management of business ventures that have international dimensions and provides insights into economic and formal/informal institutions affecting entrepreneurship. This course further addresses the issues specific to international venturing including search and identification of opportunities in foreign markets, logistics of international business expansion, cross-cultural business communication, international sourcing, international deal-making and networking. This course will also demonstrate the importance of cross-cultural communication and the benefits of being sensitive and mindful of cultural differences in international business. Concepts of negotiation styles, cultural differences and etiquette, and conflict analysis will be discussed at length. Frequency: Every Winter.

**ENT 3900 Entrepreneurship Internship (3 credits)**

The Huizenga College internship fosters learning through the application of classroom theory in the workplace. During the course, the student also focuses on practical career skills and personal professional goals with individual guidance from the professor. The minimum work requirement is 180 hours during one semester (16 weeks). Contact ENT Faculty for registration. Prerequisites: ENT Faculty permission, good academic standing, GPA of 2.5 or higher, and completion of at least 36 credit hours. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Fall and Winter.

**ENT 3910 Special Topics in Entrepreneurship (3 credits)**

Topics in entrepreneurship that are not included in a regular course offerings. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Frequency: Upon request and see academic department chair.

**ENT 4400 Franchise Management (3 credits)**

This course emphasizes the important aspects of starting and managing a franchise business. Specific attention is placed on the characteristics of the franchisor and franchisee; evaluation of franchising opportunities; legal concerns of franchising; the development of appropriate strategies and the successful planning, implementation and launching of a new business. Frequency: Every Fall and Winter.

**ENT 4800 Entrepreneurship Experience (3 credits)**

The course in entrepreneurship experience will be determined by the course title and description. Topics in entrepreneurship that are not included in a regular course offerings. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Frequency: Upon request and see academic department chair.
Students will learn through the case study method, computer simulations, and from local businesses researching the issues and challenges facing entrepreneurs. The course includes finance, marketing, human resources, valuation techniques, turnaround management, exit strategies, and ethical considerations. Student teams will choose a function business for their term project. They will identify specific issues, problems, and recommend solutions through written and oral presentations. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit.

**COURSE DESCRIPTIONS**

**ENVS 0000 Introduction to Environmental Science (3 credits)**

General Environmental Science provides students with a broad overview of a highly interdisciplinary subject by examining how humans can best live with Earth’s environment. This course concentrates on the biological nature of environmental science: NIMBY, environmental justice, biological communities, biodiversity, population, food, and hunger. **Frequency:** Every Winter.

**ENVS 1200 Environmental Science (3 credits)**

Environmental Science provides students with a broad overview of a highly interdisciplinary subject by examining how humans can best live within the limits of the environment. The course concentrates on the biological and physical elements of natural systems, including the concepts of ecology, evolution, and earth systems science. The course includes an ethical and philosophical perspective, including stewardship, law, policy, and environmental justice. Also discussed are solutions to environmental problems with respect to current events. **Frequency:** Every Winter.

**ENVS 1500 Natural History of South Florida (4 credits)**

Through classroom, field trip, and practical experience, this course provides instruction on the general ecology, habitats, vegetation types, wildlife, and conservation issues of Fresh Water Wetlands, Coastal Systems and Upland Systems in South Florida. The course addresses society’s role toward various ecosystems and discusses environmental ethics. The course will provide students with examples of common behaviors that negatively affect local species and present simple alternatives that can be incorporated into their daily lives. Students will also be taught naturalist interpretation skills during hikes through local natural areas. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. **Frequency:** Every Fall.

**ENVS 2000 Biodiversity of Alaskan Ecosystems (3 credits)**

This course is an introduction to Alaska’s diverse wildlife in a biological, ecological and evolutionary context. The course will cover biological and ecological aspects of the diverse flora and fauna located throughout Alaska’s ecosystems including such topics as natural history, geography and geology, ecosystem characterization and connections, and wildlife populations and conservation. This course is designed to prepare students for a 10 day field course to explore Alaska’s wilderness and observe its biodiversity firsthand. **Prerequisite:** BIOL 1100 or higher. **Frequency:** Every Fall, odd Year.

**ENVS 2100 Environmental Science Laboratory (3 credits)**

Environmental science laboratory presents students with an opportunity to experience the practical work of an environmental scientist. Students will work collaboratively and use hands-on approaches to gain practical experience in many areas of this interdisciplinary science. Through laboratory, classroom, and off-campus field experiences, students will learn to use equipment, make observations, collect data and test hypotheses related to environmental problems. Specific topics include population biology, biological diversity, geographic information systems, environmental quality/pollution, geology, environmental justice and environmental restoration. The course will include a collaborative capstone project investigating an ongoing, local environmental issue. **Prerequisites:** ENVS 1100 or ENVS 1200 or BIOL 1510 or BIOL 1510H. **Frequency:** Every Winter.

**ENVS 2200 Introduction to Geology/Lab (4 credits)**

Introduction to Geology/Lab covers elements of historical and physical geology, two essential courses from the geology curriculum. The course includes an introduction to the composition and physical processes of the earth, as well as the history of the planet. This course will serve as a prerequisite Environmental Geology (ENVS 3000). **Frequency:** Fall.

**ENVS 3000 Environmental Geology/Lab (4 credits)**

Environmental geology is an applied science that uses geologic principles to identify, analyze and mitigate problems that occur where humans interact with geologic environments. This course covers basic concepts of physical geology including earth materials, plate tectonics, deformation and mountain building, and earth surface processes. Additional topics may include sustainability, environmental hazards, environmental policy, and transport and fate of environmental contamination. Students will examine environmental problems on a global and local scale. **Prerequisite:** ENVS 2200 and CHEM 1300 or CHEM 1300H or CHEM 1500. **Frequency:** Every Winter.

**ENVS 3100 Environmental Issues (3 credits)**

Environmental Issues is designed to teach students that most of today’s issues in environmental science are highly controversial and that advocating a policy stand on an environmental concern requires the balancing of the pros and cons of an issue. Several current areas will be introduced in an unbiased manner. The students will gain experience taking sides and debating issues by presenting objective perspectives on environmental topics. **Prerequisites:** BIOL 1040, ENVS 1100, or ENVS 1200. **Frequency:** Every Fall.

**ENVS 3170 Everglades Ecology and Conservation (3 credits)**

An overview of the Greater Everglades Ecosystem that integrates biological, geological, ecological, conservation, social, economic and political aspects to the ecosystem and its current restoration efforts. The course will examine the main biological and physical features of South Florida, and the ecological processes that make this a unique ecosystem. The course will also examine man’s relationship with the ecosystem since the times of their earliest occupation in the region to present. The course incorporates classroom time and 4 all-day Saturday fieldtours.
ENVS 3200 Ocean and Earth Cycles (3 credits)
Did you know that nearly the entire periodic table of elements is dissolved in seawater? Or that changes in seawater chemistry caused some of Earth's largest mass extinction events? Containing about 97% of Earth's water, the ocean acts as a giant solvent that dissolves rocks, minerals, and atmospheric gases. This course will serve as an introduction to the field of marine chemistry and the study of chemical cycles within the Earth system. Students will learn about the chemical composition of seawater, biogeochemical cycles, and how humans are currently changing ocean chemistry at geologically unprecedented rates. Course frequency: Winter, odd years.

ENVS 3300 Introduction to Global Climate Change (3 credits)
The Earth's climate is changing at an unprecedented rate, which will result in a range of consequences including increased global temperatures, glacial retreat, sea level rise, and changes in global and local precipitation patterns. This class will provide students with an overview of the current state of climate science and the potential impacts of modern climate change on society. By taking an Earth systems perspective, students will examine climate change from global to local scales, learn about global biogeochemical cycles, and place modern climate change in the context of the geological past. Prerequisites: BIOL 1500 and CHEM 1300. Frequency: Fall Odd Years.

ENVS 3400 Symbiosis (3 credits)
Symbioses are intimate and persistent interspecific interactions that encompass the continuum of relationship outcomes from mutualisms to parasitism, and along with evolution, form the basis of our understanding of life on the planet. These relationships are biologically important because they are globally ubiquitous and form the basis of most ecosystems, but they also challenge multiple tenets of biology: (1) the concept of an individual, (2) the primacy of antagonism in explaining ecological patterns, and (3) the universality of descent with modification in evolution. In our symbiotic world, you are never alone. This course emphasizes the enormous diversity of intimate interactions between organisms and is an introduction to the biology and ecology of symbiotic associations and their evolution. This course is a reading and discussion intensive course that is intended to inspire independent thinking and scientific debate among the students. There is no text sufficient to cover the scope of this course, rather students will read selected primary literature, reviews, and book chapters to survey broad perspectives and identify broad patterns across multiple disciplines. Frequency: Even Years Winter.

ENVS 4900 Special Topics in Environmental Science (3 credits)
Topics in advanced environmental science and studies that are not included in a regular course offering. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Students may re-enroll for Special Topics covering different content. Frequency: Upon request.

ENVS 4900A Special Topics in Environmental Science (3 credits)
Topics in advanced environmental science that are not included in a regular course offering. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Students may re-enroll for Special Topics covering different content. Frequency: Upon request.

ENVS 4900B Special Topics in Environmental Science (3 credits)
Topics in advanced environmental science that are not included in a regular course offering. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Students may re-enroll for Special Topics covering different content. Frequency: Upon request.

ENVS 4950 Internship in Environmental Science (1-3 credits)
A work experience for 16 weeks in the student's major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request.

ENVS 4950A Internship in Environmental Science (1-3 credits)
A work experience for 16 weeks in the student's major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of department chair. Frequency: Upon request.

ENVS 4990A Independent Study in Environmental Science (1-3 credits)
The student selects and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request.

ENVS 4990B Independent Study in Environmental Science (1-3 credits)
The student selects and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request.

ENVS 4990C Independent Study in Environmental Science (1-3 credits)
The student selects and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request.

ENVS 4990D Independent Study in Environmental Science (1-3 credits)
The student selects and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request.

ESED—Exceptional Student Ed
ESED 3540 Introduction to Language and Speech Disabilities (3 credits)
The study of language development and disorders, which includes the impact of language on learning and augmentative forms of communication, is investigated. Individual needs and remediation concerns are addressed from early childhood to adulthood in the area of Language development. Impact of inclusion and alternate strategies for delivery of services in the mainstream for exceptional language learners is investigated. In addition to class meetings, a minimum of ten (10) hours of field experience is required. Prerequisites: EDUC 3330, EDUC 3350, and passing scores on the Florida Teacher Certification Examination General Knowledge Test. Frequency: Every Fall and Winter.

ESED 3540F Introduction to Language & Speech Disabilities (3 credits)
The study of language development and disorders, which includes the impact of language on learning and augmentative forms of communication, is investigated. Individual needs and remediation concerns are addressed from early childhood to adulthood in the area of Language development. Impact of inclusion and alternate strategies for delivery of services in the mainstream for exceptional language learners is investigated. In addition to class meetings, a minimum of ten (10) hours of field experience is
ESED 3561 Families, Professionals, and Exceptionality (3 credits)
A study of theory, research, and best practices related to family-professional partnerships from both general and special education is conducted. Families are studied as interactive systems from a multicultural perspective. Concepts and techniques of developing empowerment through collaboration are discussed and applied for it is through such partnerships that reliable alliances develop. In addition to class meetings, observation, and participation in a field setting is required. Prerequisites: ESOL 3340, EDUC 3330, and EDUC 3350. Frequency: Every Fall and Winter.

ESED 3570 Foundations of Learning Disabilities (3 credits)
This course is a study in the fundamental knowledge in the field of specific learning disabilities. Concepts, theories, characteristics, causes of specific learning disabilities as well as assessment and teaching methods are presented to the teacher candidate. Pre-requisite/s: EDUC 3330, EDUC 3350, and ESOL 3340. Frequency: Every Fall and Winter.

ESED 3570F Foundations of Exceptional Student Education (3 credits)
This course is a study in the fundamental knowledge in the field of specific learning disabilities. Concepts, theories, characteristics, causes of specific learning disabilities, as well as assessment and teaching methods are presented to the teacher candidate. Frequency: Every Fall.

ESED 4320 Classroom Management for Typical & Atypical Learners in the Multicultural Classroom (3 credits)
This course examines classroom management as the interrelationship of appropriate curricula, methods, materials, student behavior, family factors, and teacher behavior from culturally diverse perspectives. Additionally, this course addressed the classroom management needs of students with Emotional/Behavioral Disorders (EBD), focusing on the history, identification, and screening/evaluation approaches. Academic and data-based behavioral strategies for intervention are discussed and applied. A minimum of 10 hours of field experience in a classroom is required. This course is ESOL infused. Prerequisites: EDUC 3330, EDUC 3350, EDUC 3360, EDUC 3535, ESED 3570, and ESOL 3340. Frequency: Every Fall and Winter.

ESED 4320F Elementary Classroom Management for Typical & Atypical Learners in Multicultural Classrooms (3 credits)
This course examines classroom management as the interrelationship of appropriate curricula, methods, materials, student behavior, family factors, and teacher behavior from culturally diverse perspectives. Additionally, this course addresses the classroom management needs of students with Emotional/Behavioral Disorders (EBD), focusing on the history, identification, and screening/evaluation approaches. Academic and data-based behavioral strategies for intervention are discussed and applied. A minimum of 10 hours of field experience in a classroom is required. This course is ESOL infused. Frequency: Every Winter.

ESED 4340F Classroom Procedures for Emotional/Behavioral Disorders (3 credits)
This course addresses information about learners with Emotional/Behavioral Disorders (EBD). The nature, history of the problem and relevant conceptual approaches are presented along with specific identification, screening and evaluation techniques. Additionally, factors related to family, school and culture are emphasized within a social systems perspective. Finally, academic and behavioral strategies for intervention are discussed and applied. In addition to class meetings, observation, and participation in a clinical setting are required. Prerequisites: EDUC 3330, EDUC 3350, and EDUC 3355. Frequency: Every Fall and Winter.

ESED 4350 Classroom Procedures for the Intellectually and Developmentally Delayed (3 credits)
Emphasis is placed on instructional strategies for teaching students who are intellectually and developmentally disabled. The development, implementation and evaluation of individualized educational plans are stressed. Special approaches to teaching functional skills, developmental programming, and data based management for students ranging in age from kindergarten through high school are investigated and applied. In addition to class meetings, a clinical experience is required. Frequency: Every Winter.

ESED 4350F Classroom Procedures ESE (3 credits)
Emphasis is placed on instructional strategies for teaching students who are intellectually and developmentally disabled. The development, implementation and evaluation of individualized educational plans are stressed. Special approaches to teaching functional skills, developmental programming, and data based management for students ranging in age from kindergarten through high school are investigated and applied. In addition to class meetings, a clinical experience is required. Frequency: Every Winter.
ESOL 2903 Cross Cultural Studies (3 credits)
This course will enable students to expand their knowledge of a multiplicity of cultural groups nationwide. This knowledge will allow them to identify culture-specific verbal and nonverbal communications and school behaviors resulting from cultural variations and their influence on student behavior/attitudes. The use of recent research findings and cross-cultural awareness will assist participants in maximizing student learning and in designing culturally-sensitive instructional materials while exhibiting appropriate teacher behaviors in cross-cultural school settings. In addition to class meetings, a 10 hour virtual field experience is required for this course. Prerequisite: None. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

ESOL 4565 Second Language Learning (3 credits)
This course will assist participants in identifying and selecting instructional strategies, approaches, and materials for the development of listening, speaking, reading and writing skills in ESOL classrooms. Knowledge of these elements will be demonstrated by development and presentation of lesson plans appropriately based on age, language proficiency, cultural background and learning styles. A 10 hour field experience is required for this course. Frequency: Winter

ESOL 2903F Cross Cultural Studies (3 credits)
This course will enable students to expand their knowledge of a multiplicity of cultural groups nationwide. This knowledge will allow them to identify culture-specific verbal and nonverbal communications and school behaviors resulting from cultural variations and their influence on student behavior/attitudes. The use of recent research findings and cross-cultural awareness will assist participants in maximizing student learning and in designing culturally-sensitive instructional materials while exhibiting appropriate teacher behaviors in cross-cultural school settings. In addition to class meetings, a 10 hour virtual field experience is required for this course. Prerequisite: None. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

ESOL 4901 Methods of Teaching ESOL (3 credits)
This course will assist participants in identifying and selecting instructional strategies, approaches, and materials for the development of listening, speaking, reading and writing skills in ESOL classrooms. Knowledge of these elements will be demonstrated by development and presentation of lesson plans appropriately based on age, language proficiency, cultural background and learning styles. A 10 hour field experience is required for this course. Prerequisite: None. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

ESOL 3340 Survey of TESOL for Teachers (3 credits)
This course will assist participants in identifying and selecting instructional strategies, approaches, and materials for the development of listening, speaking, reading and writing skills in ESOL classrooms. Knowledge of these elements will be demonstrated by development and presentation of lesson plans appropriately based on age, language proficiency, cultural background and learning styles. A 10 hour field experience is required for this course. Prerequisite: ESOL 2903. Frequency: Every Fall and Winter.

ESOL 4902 ESOL Curriculum and Materials Development (3 credits)
This course will assist participants in identifying and selecting instructional strategies, approaches, and materials for the development of listening, speaking, reading and writing skills in ESOL classrooms. Knowledge of these elements will be demonstrated by development and presentation of lesson plans appropriately based on age, language proficiency, cultural background and learning styles. A 10 hour field experience is required for this course. Prerequisite: ESOL 2903. Frequency: Every Fall and Winter.

ESOL 4904 Linguistics for ESOL Educators (3 credits)
This course provides insight into dialect diversity and the structure of language, including phonology, morphology, and syntax. Causes of linguistic interference for students from diverse language backgrounds are analyzed. An emphasis is placed on students being able to apply the International Phonetic Alphabet (IPA) for purposes of spoken language analysis. Students will analyze language and determine appropriate instructional strategies, using knowledge of phonology, morphology, syntax, semantics, and discourse. A course in applied linguistics is essential to understand how first and second languages develop in students. For the teacher of LEP students significant insights can be made regarding the student’s rate of progress in learning a new language and the potential difficulties that student might encounter. This course is required by all students seeking their ESOL endorsement. Students should check with their advisors as to the full sequence of ESOL course that they may be required to take to obtain their ESOL endorsement. Prerequisite: ESOL 2903. Frequency: Every Fall and Winter.

ESOL 4905 Testing and Evaluation in ESOL (3 credits)
Participants will learn to identify suitable ESOL assessment instruments and placement tests for ESOL students. Identification of available tests and construction of necessary ESOL test items in the cultural and language arts areas will be learned. The design and interpretation of appropriate testing—proficiency and achievement measures—as well as the interpretation of such assessment, will be stressed. Traditional assessment procedures as well as authentic assessment will be incorporated into required activities. The bilingual/special education interface is also considered. A variety of necessary record keeping methods for different types of assessment will be discussed and used in assignments. A 10 hour field experience is required for this course. Prerequisite: ESOL 2903. Frequency: Every Fall and Winter.

EXSC—Exercise Science

EXSC 1001 Lifetime Aerobic Activity (1 credits)
This course provides students with an opportunity to experience various aerobic activities that can be continued throughout the lifespan. Students will learn to assess a baseline level of fitness, devise and implement a plan to improve that fitness level, and reassess at the end of the class. They will learn criteria for determining selection of activity. Frequency: Fall, Winter and Summer.

EXSC 1001 Strength Training for Life (1 credits)
This course provides students with an opportunity to experience various aerobic activities that can be continued throughout the lifespan. Students
will learn to assess a baseline level of fitness, devise and implement a plan to improve that fitness level, and reassess at the end of the class. They will learn criteria for determining selection of activity.

EXSC 1002 Introduction to Group Exercise (1 credit)
This course provides students with an opportunity to experience various modes of group exercise that can be continued throughout the lifespan. Students will learn to assess a baseline level of fitness, participate in group fitness sessions, and reassess at the end of the class. They will learn criteria for determining selection of activity. Frequency: Fall, Winter, Summer.

EXSC 1201 Exercise and Sports Medicine (3 credits)
Introduction to prevention, recognition, and acute care management techniques of injuries to the physically active. The focus will be on application to populations engaging in various intensities of exercise and sport. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

EXSC 1400 Health and Fitness (3 credits)
This course will provide students with the basic concepts of health and wellness. Students will also identify strategies for health promotion and chronic disease management across the lifespan. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Fall and Winter.

EXSC 1450 Introduction to Exercise Science (3 credits)
This course is designed to introduce all the core concepts of exercise science early in the curriculum. It will provide beginning students with an overview of the foundational content within the area of exercise science as well as options available for professional career opportunities, career development, and employment. Through an introductory review of body systems and physiological concepts, students will gain an understanding and appreciation for the how the body adapts to exercise both acutely and chronically. Basic concepts related to metabolism, skeletal muscle physiology, biomechanics, cardiovascular fitness, nutrition and sports neuroscience will be covered.

EXSC 2090 Sports Neuroscience (3 credits)
This course integrates the fields of neuroscience with exercise and sports science. The course will explore the neuroscience of exercise and performance, including measures of motor and sensory systems (e.g., afferent and efferent motor pathways) and brain function (e.g., motivation, behavior, and arousal) as it applies to exercise. This course includes an analysis of these measures as they affect exercise and sports performance. Frequency: Fall and Winter.

EXSC 2300 Sports Nutrition (3 credits)
This course includes the study of nutrition, biochemical processes in energy metabolism, and nutrition-related health problems. Additional emphasis will be placed on nutrition as it relates to physical performance, sports, and fitness. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

EXSC 2400 Strength and Conditioning (3 credits)
This course will be an introduction to basic principles of weight training. Introductory techniques for strength and conditioning will be presented, practiced, and evaluated.

EXSC 3300 Emergency Care and First Aid (3 credits)
Students will learn to recognize, assess, and treat the acute injuries and illnesses of athletes and others involved in physical activities, preventing disease transmission, emergency care of injuries such as splinting, and to provide proper medical referral. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Fall and Winter.

EXSC 3700 Kinesiology (3 credits)
A study of the anatomy, physiology, and biomechanics of the muscle system as it relates to the principles of movement. Students will learn the muscle groups involved with specific movements and the results of the action of particular muscle groups on overall movement. Both normal and impaired movements will be analyzed. Prerequisite: BIOL 3320. Frequency: Every Fall and Winter.

EXSC 3740 Exercise Physiology with Lab (4 credits)
Study of the integration of cardiopulmonary, neuromuscular, and musculoskeletal systems as they apply to the movement of the body through space. Studied at the chemical, cell, and organismal levels. Includes use of instrumentation and procedures commonly employed to measure and analyze cardiopulmonary, neuromuscular, and musculoskeletal systems. Prerequisite: BIOL 3320. Frequency: Every Fall and Winter.

EXSC 3760 Biomechanics of Human Movement with Lab (4 credits)
This course provides the application of mechanical concepts to movement problems in sport, rehabilitation, and fitness. The anatomical and mechanical principles that dictate the limits and potential of human movement will be addressed. There is an overlying theme of movement observation, interpretation, and remediation with regard to biomechanics. Includes a laboratory component. Prerequisite: EXSC 3700. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

EXSC 3820 Exercise Prescription with Lab (4 credits)
This course is designed to assist the student with measurement and interpretation of health and fitness related factors necessary for prescribing preventative and rehabilitative exercise programs. Focus areas include cardiorespiratory fitness, flexibility, body composition, muscular strength and endurance, and risk stratification. Includes a laboratory component. Prerequisite: ATTR 2400. Frequency: Every Fall and Winter.

EXSC 3850 Adapted Community Fitness Programming (3 credits)
This course offers hands on experience personal training Special Olympic athletes. Students will be partnered with an athlete with special needs with whom they will conduct a fitness assessment, develop a fitness program, and implement the program directly. Students will work directly with staff from Broward Special Olympics as well as faculty in the Health and Human Performance Department. Experiential Education and Learning (ExEL): Successful completion of this course at Nova Southeastern University satisfies 1 ExEL unit. Course pre-requisites: EXSC 3820

EXSC 3900 Sports Supplements for Athletic Performance (3 credits)
This course includes the study of macronutrient manipulation, nutrient timing, and the use of dietary supplements (e.g. creatine, beta-alanine, amino acids, etc.) to enhance sports performance, increase skeletal muscle mass and muscle fiber cross-sectional area, decrease fat mass, and optimize recovery. This course thus explores the physiology of the human organism and is designed to provide a framework in which the student can understand how the human body adapts to various nutritional strategies at the cellular, molecular, and organismal levels in exercising individuals. The course will cover both the basic and applied science aspects of nutritional and supplemental strategies as they relate to the acute and chronic response to exercise. Prerequisite: EXSC 3740. Frequency: Every Fall.

EXSC 4100 Adapted Physical Activity (3 credits)
This course is designed to provide students with the scientific knowledge and practical skills to assess, prescribe and implement exercise and fitness programs for clients with a wide variety of disabilities. Specifically, students will learn federal legislation influences, unique physiological and biomechanical aspects, exercise cautions and contraindications, and effective methods of instruction for these clients. This course is designed to enhance students’ current level of knowledge of the material required to prepare for either the Certified Special Populations Specialist (CSPS) or Certified Inclusive Fitness Trainer (CIFT)
EXSC 4200 Motor Learning/Development (3 credits)
This course provides students with the ability to analyze the emerging interrelationships among the motor, social, emotional, and cognitive forms of behavior and development. The course will discuss topics related to, but not limited to the developmental perspectives, physical growth, maturation and aging, perceptual motor development, physiological changes and exercise, sociocultural influences on motor development, theories, experimental studies and current issues in the acquisition, performance, and retention of motor skills. Prerequisite: PSYC 3400

EXSC 4220 Motor Learning with Lab (4 credits)
This course provides students with the ability to analyze the emerging interrelationships among the motor, social, emotional, and cognitive forms of behavior and development. The course will discuss topics related to, but not limited to the developmental perspectives, physical growth, maturation and aging, perceptual motor development, physiological changes and exercise, sociocultural influences on motor development, theories, experimental studies and current issues in the acquisition, performance, and retention of motor skills, includes a laboratory component. Prerequisites: EXSC 3700. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

EXSC 4300 Research Methods in Sport and Physical Education (3 credits)
This course offers a foundation for conducting research in the areas of exercise/physical activity and sport. Specific attention will be on structure and interpretation of the research structure and data analysis (qualitative and quantitative) for publication and presentation. Frequency: Every Fall and Winter. Prerequisite: MATH 3020 or MATH 3020H or MATH 2020 or MATH 2020H. Frequency: Every Fall and Winter.

EXSC 4400 Exercise and Sport Administration (3 credits)
Description: This course offers an in-depth background of the standards, policies and practices of organization, supervision and administration for sport and exercise programs and facilities. Frequency: Every Fall and Winter. Prerequisite: EXSC 3800.

EXSC 4500 Advanced Strength and Conditioning (3 credits)
This course is designed to provide students with the scientific knowledge and practical skills to train various active populations for the primary goal of improving athletic performance. Specifically, students will learn to conduct sport-specific testing sessions, design and implement safe and effective strength training and conditioning programs and provide guidance regarding nutrition and injury prevention relative to strength and conditioning. The course is designed to enhance students’ current level of knowledge of the material required to prepare for either the Certified Strength and Conditioning Specialist (CSCS) or Certified Personal Trainer (CPT) exams sponsored by the National Strength and Conditioning Association. Prerequisites: EXSC 3800 or EXSC 3820, and EXSC 2400 and EXSC 3700. Frequency: Every Winter.

EXSC 4901 Practicum in Exercise Science (3 credits)
This course places students in the workplace with the expectation that the experience will allow them the opportunity to apply and integrate content from all the courses in the program. Workplace site selection is based upon individual student goals and include, but are not limited to, rehabilitation facilities, professional fitness centers, sport performance centers, senior centers, and wellness centers (corporate and community). The Practicum Director and site supervisors will evaluate students’ performances throughout the semester. Additionally, registration for a national certification in the exercise science field (i.e. NSCA-CSCS) is required prior to the completion of the course. Experiential Education and Learning (ExEL): Successful completion of this course at Nova Southeastern University satisfies 1 ExEL unit. Course Pre-requisites: EXSC 3740, EXSC 4400 (EXSC 4400 may be taken concurrently)

EXSC 4950 Internship in Exercise and Sport Sciences (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Every Fall and Winter.

EXSC 4950A Internship in Exercise and Sport Sciences (A) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Every Fall and Winter.

EXSC 4950B Internship in Exercise and Sport Sciences (B) (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic director. Frequency: Every Fall and Winter.

EXSC 4990A Independent Study in Exercise and Sport Science (A) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

EXSC 4990B Independent Study in Exercise and Sport Science (B) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Frequency: Every Fall and Winter.

EXSC 4990C Independent Study in Exercise and Sport Science (C) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and the division director. Frequency: Every Fall and Winter.

FCAP—Family Ctr Access Plus
FCAP 0173 Access Plus (0 credits)
Access Plus program is a college support program for students with Autism Spectrum Disorder, who are accepted and enrolled in NSU’s undergraduate programs.

FILM—Film Studies
FILM 2000 Introduction to Film (3 credits)
This course focuses on understanding film as an art form through examining its history and stylistic elements. Emphasis will be on technological, aesthetic, and social elements of film; various genres and periods in film will be
studied, along with the application of techniques and criticism and evaluation to film. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall and Winter.

FILM 3040 Women and Film (3 credits)
This course focuses on the application of film to examine how gendered images construct and marginalize women in both mainstream and independent cinema. Prerequisite: one FILM course; and COMP 2000 or 2010 or 2020 or COMP 2000H. Frequency: Odd Year Winter.

FILM 3050 Literature and Film (3 credits)
This course focuses on the adaptation of literary texts into film texts. Emphasis will be on the process and consequences of literary adaptation into film and the similarities and differences between the reading and analysis of literary texts and film texts. Prerequisite: one FILM course; and COMP 2000 or 2010 or 2020 or COMP 2000H. Frequency: Odd Year Fall.

FILM 3060 Film Noir (3 credits)
This course focuses on film noir, a series of films from the 1940's and 1950's that share characteristics of complex narrative, expressionist photography, alienated characters, and psychological themes. Emphasis will also be on the study of the way these films were influenced by social, political, and economic factors of the time. Prerequisite: one FILM course; and COMP 2000 or 2010 or COMP 2020 or COMP 2000H. Frequency: Every Fall.

FILM 3100 Black Cinema (3 credits)
This course focuses on the study of films made within or about the African Diaspora and considers the socio-political commentary made by these films. The course also examines how racially constructed images are developed in film and the connection between black and mainstream cinema. Prerequisite: one FILM course; and COMP 2000 or COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Year Fall.

FILM 4000 History of Film (3 credits)
This course focuses on the history of film, from the silent era to the modern, digital era. Emphasis will be on the technological developments of film science, and the historical and social contexts that influenced the production of film over the last century. Prerequisite: one FILM course; and COMP 2000 or COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Even Year Winter.

FILM 4500 Major Directors (3 credits)
This course examines the life and work of a major film director from a variety of critical perspectives and using a variety of films. Directors that may be focused on include Alfred Hitchcock, Stanley Kubrick, Martin Scorsese, and Woody Allen. Prerequisite: one FILM course; and COMP 2000 or COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Year Fall.

FILM 4900 Special Topics in Film (3 credits)
Topics, which vary from year to year, may include a study of film in relation to a specific field (politics, philosophy, history), an exploration of a particular genre of film (comedy, western, musical, crime), or period (silent film). Specific focus to be announced. May be repeated once for credit, if course changes and with written consent of division director. Prerequisite: one FILM course; and COMP 2000 or COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Even Year Winter.

FILM 4990 Independent Study in Film (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisite: one FILM course; and COMP 2000 or 2010 or 2020 or COMP 2000H. Frequency: Every Fall and Winter.

FIN—Finance

FIN 2000 Personal Finance (3 credits)
A course designed to help students cope with the financial aspects of life such as taxes, budgeting, insurance, savings, investing, credit and credit card financing, auto and home financing, retirement planning, and estate planning. Prerequisite: MATH 1040 or higher. Frequency: Every Fall and Winter.

FIN 2000H Personal Finance Honors (3 credits)
Excellent personal financial management is important for wealth creation. Students will get a comprehensive hands-on overview of the core areas of personal finance. This includes: a financial plan, personal financial statements, personal taxes, cash management, buying big items like a house and a car, credit score, credit card management, consumer loans, life, health and property insurance, investment planning, retirement planning, and estate planning. This knowledge will assist you to develop good personal financial management practices. This is an essential course for all students. This course is open to HONORS students only. Prerequisite: MATH 1040 or higher. Frequency: Upon request see academic Department Chair

FIN 2020 Introduction to Stock Market and Sustainability (3 credits)
The course introduces the basics of investing in the stock market. It introduces the concept of risks and returns, describes the link between the economy and the stock market. Provides a general overview of investment strategies and valuation, and incorporates environmental, social and governance factors into the fundamental investment process. Frequency: Fall and Winter.

FIN 3010 Corporation Finance (3 credits)
Applies financial management to organizations. Topics include ratio analysis, leverage, cash budgeting, and capital structure. Prerequisite: ACT 2030 or ACT 2200, ECN 2020, and MATH 2020. Frequency: Every Fall and Winter.

FIN 3110 Financial Management (3 credits)
A continuation of Corporation Finance. Topics include risk and return, cost of capital, capital structure, dividend policy, short-term financial management, and international aspects of financial management. Prerequisite: FIN 3010. Frequency: Every Fall and Winter.

FIN 3120 Principles of Investments (3 credits)
This course covers modern investment theory with applications in the debt, equity and derivative markets, with an introduction to portfolio management. Topics include financial assets, risk/return, bond yields, durations, option pricing, and futures. The concepts can be applied to personal investing, but the course is geared more toward institutional investing. Prerequisite: FIN 3010. Frequency: Every Fall.

FIN 3130 Securities Analysis (3 credits)
Securities Analysis builds on the foundation of investment management developed in FIN 3120 by focusing on efficient diversification, portfolio management, fundamental and technical analysis, equity valuation, and portfolio performance evaluation. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: FIN 3120. Frequency: Every Winter.

FIN 3150 Banking and Financial Institutions (3 credits)
Studies the operation in commercial banks, savings and loan associations, and saving banks. Topics include loans, mortgages, bonds, investments, trusts, marketing, and auditing. Discusses the impact of federal and state regulations on financial institutions. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: FIN 3100. Frequency: Every Fall.

FIN 3900 Finance Internship (3 credits)
The Huizenga College internship fosters learning through the application of classroom theory in the workplace. During the course, the student also focuses on practical career skills and personal professional goals with individual guidance from the professor. The minimum work requirement is 180 hours during one semester (16 weeks). Contact Academic Advising for registration. ACADEMIC REQUIREMENTS: good academic standing, PA of 2.5 or higher, and completion of at least 36 credit hours. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

FIN 3910 Special Topics in Finance (3 credits)
Topics in finance that are not included in a regular course offerings. Prerequisites may be
FIN 4120 Advanced Financial Management (3 credits)
This course explores the role of the financial manager in finding sources of corporate funds, valuation, and capital budgeting. This course also examines financial forecasting and short and long-term financing. Prerequisites: FIN 3115 OR FIN 3110. Frequency: Every Winter.

FIN 4130 Portfolio Theory (3 credits)
This course covers portfolio theory with an emphasis on capital asset pricing, arbitrage pricing, pricing of derivatives, interest rates, and bond management. Internet exercises will be used extensively. Prerequisite: FIN 3130. Frequency: Upon request see academic Department Chair.

FIN 4310 Financial Planning Fundamentals and Insurance (3 credits)
Financial Planning Fundamentals is the first course in the Financial Planning Minor program, which meets specific criteria for educating students who wish to fulfill the education component for obtaining CFP® certification. This course is intended to cover the CFP Board’s principal knowledge topics in the areas of Professional Conduct and Regulation, General Financial Planning Principles, Education Planning and Risk Management and Insurance Planning. This course introduces the fundamental knowledge in various areas of financial planning from a professional financial planning viewpoint. More specific topics include personal financial statements, time value of money, education funding, economic and legal environments, ethics and professional conduct, interpersonal communication, insurance principles and needs analysis; various insurances in health, disability, long-term care, life and property and casualty, and business use of insurances. Frequency: Fall.

FIN 4320 Investment Planning (3 credits)
Investment Planning is one of the required courses in the Financial Planning Minor program, which meets specific criteria for educating students who wish to fulfill the education component for obtaining CFP® certification. This course is intended to cover CFP Board’s principal knowledge topics in the area of Investments Planning. Topics include investment vehicles and risks; quantitative investment analysis; securities and portfolio analysis; investment strategies; and alternative investments.

FIN 4330 Tax Planning (3 credits)
Tax Planning is one of the required courses in the Financial Planning Minor program, which meets specific criteria for educating students who wish to fulfill the education component for obtaining CFP® certification. This course is intended to cover CFP Board’s principal knowledge topics in the area of Tax Planning. Topics include basic tax laws; taxation of individuals, businesses, trusts and estates; alternative minimum tax; tax management techniques; taxation of property transactions and passive activity; and charitable donations. Frequency: Fall.

FIN 4340 Retirement Planning (3 credits)
Retirement Planning is one of the required courses in the Financial Planning Minor program, which meets specific criteria for educating students who wish to fulfill the education component for obtaining CFP® certification. This course is intended to cover CFP Board’s principal knowledge topics in the area of Retirement Savings and Income Planning. Topics include retirement needs analysis; social security, Medicare and Medicaid; qualified and other tax-advantaged plans; distributions; and business succession planning. Frequency: Winter.

FIN 4350 Estate Planning (3 credits)
Estate Planning is one of the required courses in the Financial Planning Minor program, which meets specific criteria for educating students who wish to fulfill the education component for obtaining CFP® certification. This course is intended to cover CFP Board’s principal knowledge topics in the area of Estate Planning. Topics include titling and transfer of property; estate planning documents; gift and estate tax; marital deduction; trust and business transfer techniques; and postmortem and nontraditional estate planning. Frequency: Winter.

FIN 4360 Financial Planning Capstone (3 credits)
Financial Planning Capstone is the last course in the Financial Planning Minor program, which meets specific criteria for educating students who wish to fulfill the education component for obtaining CFP® certification. In this course, students are required to demonstrate the ability to integrate, apply and communicate their knowledge of financial planning topics taught in the courses in the Financial Planning Minor program. Students need to prove their ability to apply the financial planning process to real-life situations. Prerequisites: FIN 4320 & FIN 4330 & FIN 4340 & FIN 4350; or by instructor approval. Frequency: Winter.

FIN 4370 Financial Planning Review (3 credits)
Financial Planning Review is an elective course in the Financial Planning Minor program. This course is intended to review most areas of the CFP Board’s principal knowledge topics, and appropriate for the students who met the CFP Board’s education requirements and registered for the CFP® Certification Examination. The Exam maintains the knowledge and abilities required to deliver financial planning services to clients, as outlined in Job Task Domains and Principal Topics of CFP Board. This course is usually offered in a term preceding the July CFP® Exam Testing Window. Frequency: Summer.

FIN 4550 International Finance (3 credits)
Topics include international monetary systems, foreign exchange markets, international parity conditions and currency rates, management of currency exposures, and multinational capital budgeting and capital structure. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: FIN 3010 and EGN 2025 or EGN 2025H. Frequency: Every Winter.

FIN 4560 Advanced Special Topics (3 credits)
Examines topics in finance that are not included in regular course offerings. Specific content and prerequisites may vary. Students may re-enroll for special topics covering different content. Frequency: Upon request see academic Department Chair.

FIN 4966 Travel Study in Finance (3 credits)
This travel study course aims to provide students with a thorough understanding and firsthand look at a specific area of the world through the lenses of business and finance. Students will be introduced to the challenges organizations face when working in the specific country of travel. The course is taught using a combination of in-country and pre-arrival lectures, company visits, and presentations.

FIN 4990 Independent Study in Finance (3 credits)
The student works independently under the guidance of a faculty member to learn more about a subject area for credit. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request and see academic department chair.

FREN—French

FREN 1210 Elementary French I (3 credits)
Introduction to the essentials of French language with emphasis on grammar, vocabulary, writing, and oral skills. Introduction to the cultural practices of the Francophone world. Not open to native speakers. Frequency: Every Fall and Winter.

FREN 1220 Elementary French II (3 credits)
Continuation of the essentials of French language with emphasis on grammar, vocabulary, writing, and oral skills. Continuation of study of the cultural practices of the Francophone world. Not open to native speakers. Prerequisites: FREN 1210 or permission of instructor or a French Placement Exam score of 20-35. Frequency: Every Fall and Winter.

FREN 2210 Intermediate French I (3 credits)
Readings in French literature and culture. Study of French idioms and syntax. Further
development of oral and written French. Not open to native speakers. **Prerequisite:** FREN 1220 or a French Placement Exam score of 36-50. **Frequency:** Every Fall.

**FREN 2220 Intermediate French II (3 credits)**
Continuation of French 2210. Readings in French literature and culture. Study of French idioms and syntax. Further development of oral and written French. Not open to native speakers. **Prerequisites:** FREN 2210 or a French Placement Exam score of 51 or higher. **Frequency:** Every Winter.

---

**GENG—General Engineering**

**GENG 1000 Introduction to Engineering (1 credit)**
Topics in this course include introduction to the engineering profession, engineering design, and problem solving. Focus on communications, collaborative learning, use of resources, development of engineering study skills, and strategies for student success. Pre-requisite: MATH 2200 or higher. **Frequency:** Every Fall.

**GENG 2012 Engineering Graphics (3 credits)**
Topics in this course include engineering graphics in a professional engineering context, including sketching and working drawings, multiple views, sections, solid modeling software, drawing standards, tolerance and dimensioning. **Experiential Education and Learning (ExEL):** Successful completion of this course satisfies 1 ExEL unit. **Prerequisites:** MATH-1200 or higher. **Frequency:** Every Fall.

**GENG 1016 Introduction to Engineering Design (3 credits)**
This class focuses on giving students core engineering background used in engineering design. Topics include statics; strength of materials; design stress and safety factors; electrical theory for circuits in series and parallel; engineering economics; and fundamental energy principles. This class focuses on giving students core engineering background used in engineering design. Topics include statics; strength of materials; design stress and safety factors; electrical theory for circuits in series and parallel; engineering economics; and fundamental energy principles. **Pre-requisites:** GENG 1000 and GENG 1012.

**GENG 2000 Engineering Design and Project Management I (2 credits)**
Topics in this course include historical engineering achievements, focusing on the design process and project management issues; engineering failures, emphasizing the impacts on the engineering profession and society; and contemporary issues facing society, focusing on the role of engineering solutions. **Prerequisite:** GENG 1016. **Frequency:** Every Fall.

**GENG 2022 Statics (3 credits)**
Topics in this course include analysis of equilibrium of particles, addition and resolution of forces, equivalent system of forces, equilibrium of rigid bodies, centroid and moment of inertia, structural analysis, internal forces, friction, and virtual work. **Pre- Requisite:** MATH 2200. **Co- Requirement PHYS 2400.** **Frequency:** Every Fall.

**GENG 2050 Computer Applications in Engineering (3 credits)**
This course emphasizes the fundamental principles of thermodynamics, fluid mechanics, and heat transfer. Topics include laws of thermodynamics, power systems, refrigeration systems, fluid statics, viscous flow, heat conduction, convection, radiation, and design of representative fluid-thermal energy components and systems. **Pre-Requisites:** MATH 3300, MATH 3400, PHYS 2400. **Frequency:** Every Winter.

---

**GENG 3024 Mechanics of Materials (3 credits)**
Topics in this course include the behavior of deformable bodies subjected to axial loading, torsion, and bending. Includes stress-strain relations, elastic deflections of beams, effects of combined loading, buckling of slender columns, and failure criteria for ductile and brittle materials. **Prerequisites:** GENG 2022 and GENG 2070. **Frequency:** Winter.

**GENG 3050 Sensors, Measurements, and Controls (3 credits)**
This course covers fundamentals of linear systems techniques for the analysis of signals and systems in both the discrete and continuous time domains. It also covers signal representation in the Fourier, Laplace, and Z transform domains, as well as the sampling theorem. The course also emphasizes basic operations of linear systems and its system theory interpretations, such as convolution, sinusoidal analysis, frequency response, window analysis, discrete Fourier transforms, and digital filters. **Pre-Requisites:** EENG 2710 and MATH 3400. **Frequency:** Every Winter.

**GENG 3420 Engineering Economics (3 credits)**
Topics in this course include analysis of cash flows including cost, revenue, and benefits that occur at different times. Evaluation of engineering projects using equivalent worth, benefit-cost, and rate of return including impact of depreciation, and taxes. **Prerequisite:** MATH 2200. **Frequency:** Every Fall.

**GENG 3800 Quality Control of Engineers (3 credits)**
Topics in this course include analytical procedures associated with Statistical Quality and Process Control. Includes design of experiments, and system approaches to maintenance and improvement of process quality. **Experiential Education and Learning (ExEL):** Successful completion of this course satisfies 1 ExEL unit. **Prerequisite:** MATH 4500. **Frequency:** Fall.

**GENG 4010 Senior Capstone Design Project I (3 credits)**
The emphasis in this course is an open-ended design project that exposes students to the practice of engineering design and problem solving. An emphasis on real problems and working with real clients. Students are required to visit facilities, interact with client employees, determine on-site data measurement strategies, and perform any necessary literature search. Develop proposal for project to be performed in GENG 4020 Senior Capstone Design Project II. **Prerequisite:** GENG 3000. **Frequency:** Every Fall.

**GENG 4020 Senior Capstone Design Project II (3 credits)**
This course completes the project established in GENG 4010. In this course, a prototype of
an engineering product is made and tested. Quality control is performed to ensure satisfactory performance, based on the original requirements. In the case that the project is a research study, data gathering, and data analysis are performed, and the results are included in a poster presentation. Prerequisite: GENG 4010.
Frequency: Every Winter.

GEOR—Geography

GEOR 4910 Engineering Ethics Seminar (1-4 credits)
This course aims to teach computer engineering students how to avoid, and if possible resolve, any harmful situation in the workplace or profession, while being fully aware of the legal constraints, implications, and the organizational structure. This seminar course will briefly review the current frameworks of ethics and discuss examples of ethical dilemmas in computer engineering practice, present an established systematic method for resolving ethical situations, and discuss issues prevalent in professional ethics caused by cultural differences. Prerequisite: Consent of division director. Frequency: Every Fall.

GEOG 2075 Geographical Information Systems (3 credits)
Geographical Information Systems is an introductory survey course that gives the student a comprehensive introduction to the basic design principles of data-based management systems for the capture, analysis, and display of spatial data. Frequency: Every Fall and Winter

GEOG 2260 Geography of Natural Resources (3 credits)
Study of natural resources within the framework of the man-environment system. Included are problems related to pollution, populations, technology, growth, conservation of the environment, and developmental planning as they relate to the various geographic areas of the Western world and the non-Western world. Frequency: Every Fall.

GEOG 2900 Special Topics in Geography (1-3 credits)
Topics in geography that are not included in regular course offerings and may be taken without prerequisites. Specific content is announced in the course schedule for a given term. Students may reenroll for special topics covering different content. Frequency: Upon request.

GEOG 3000 Geography of Ecotourism (3 credits)
Geography of Ecotourism examines physical and cultural attributes of countries and regions in the context of tourism. A general emphasis provides a broad overview of tourism around the world, but the majority of the instruction deals with the examination of ecotourism from a thematic viewpoint so that practitioners can learn to identify geographic locations with specific attractions and apply concepts so as to construct activities in any country. Frequency: Every winter.

GEOG 3050 Applied Geographic Information Systems (3 credits)
The course will explore applied topics in GIS including: GIS database development, Web-based GIS applications, spatial and 3-D analysis, and model development. This course builds on basic principles and applications developed in GEOG 2075, and will prepare students from various disciplines to use advanced GIS analytical tools in project development. Prerequisite: GEOG 2075. Frequency: Every Fall.

GEOG 3075 Geospatial Field Methods (3 credits)
This course teaches students to geo-reference field observations, photos, and data for analysis and reports. Students are introduced to geospatial technology, including Global Positioning System (GPS), mobile Geographic Information System (GIS) tools, and basic GIS for field data gathering. The course consists of lecture, computer laboratory, student presentations, and field trips for data collection. This course is designed for students from diverse disciplines interested in using geospatial technology in their studies, research, and career. Prerequisite: GEOG 2050 or GEOG 2075. Frequency: Winter, odd years.

GEOG 4050 Space-Borne and Aerial Image Processing (3 credits)
This course is designed to introduce students to the principles of satellite and aerial remote sensing and to teach methods for analysis and interpretation of digital imagery. Students will explore digital image processing of color satellite imagery used for monitoring soil, vegetation and water resources. In addition, the integration of GIS technology with remote sensing will be discussed. Students will also be exposed to the latest developments in airborne and satellite remote sensing technology and how it enhances decision making in science, engineering, emergency management and agriculture. Students who take this course will gain essential training towards a career in the natural resource, urban planning, emergency management, or intelligence communities. Prerequisite: GEOG 2075. Frequency: Even Year Winter.

GEOG 4900 Advanced Special Topics in Geography (1-3 credits)
Advanced topics in geography that are not included in regular course offerings. Specific content and prerequisites are announced in the course schedule for a given term. Students may reenroll for special topics covering different content. Frequency: Upon request.

GEOG 4950 Internship in Geography (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of department chair. Frequency: Upon request.

GERO—Gerontology

GERO 2000 Introduction to Gerontology (3 credits)
This course explores the demography of aging and its implications for society, social structure, work and retirement, health care and housing, and the effects of an aging society on public policy. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Fall.

GEST—Gender Studies

GEST 2050 Introduction to Gender Studies (3 credits)
This course introduces students to the interdisciplinary field of gender studies. It is designed to help students develop a critical framework for thinking about questions relating to gender and the ways that gender is constructed and institutionalized. Attention is paid to ongoing debates concerning public and private, the politics of embodiment and sexuality, equality and difference, the intersection of gender with other axes of subordination, identity politics and essentialism. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

GEST 4090 Special Topics in Gender Studies (3 credits)
This course serves as a capstone to gender studies and provides the opportunity for treatment of special topics and/or internships combined with independent research projects. Prerequisites: GEST 2050; and COMP 2000 or COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Year Fall.

GEST 4990 Independent Study in Gender Studies (3 credits)
The student selects, and carries out independently, research and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisites: GEST 2050; and COMP 2000 or COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Fall and Winter.

GNST—General Studies

GNST 2901 Workshop in General Studies (1 credit)

This course is designed to introduce students to the multidisciplinary, general studies major. In this course students are introduced to the concept of multidisciplinary studies. The course assists students in identifying the concentrations that will comprise their major and will help them develop the rationale that links these concentrations into a coherent major. Prerequisite: COMP 1500 or COMP 1500H and completion of 30 undergraduate credits. Frequency: Every Fall and Winter.

GNST 4901 General Studies Capstone Experience (3 credits)
This course serves as the capstone for the General Studies major. Students will be required to complete a research project drawing on the two concentrations they have chosen for their program under the guidance of the instructor, employing appropriate methodologies for the disciplines selected. Students will select a faculty member with expertise in the relevant disciplines as a reader for their capstone project. The reader will provide guidance in the development of the capstone project. Students will also read and discuss scholarship relating to disciplines from a variety of disciplinary areas. Prerequisites: COMP 2000 or COMP 2000H or COMP 2010 or COMP 2020 and GNST 2901 and 90 or more earned credits. Frequency: Every Fall and Winter.

HAWC—Health & Wellness Coaching
HAWC 1000 Introduction to Coaching (3 credits)
This course introduces students to the role of the coach in diverse settings. Students will learn key skills, techniques, and gain an understanding of the coaching process. Frequency: Every Fall and Winter.

HAWC 1001 Human Systems and Family Relationships (3 credits)
This course considers the individual in context, assisting students to understand the complexity of interactional factors shaping their clients’ lives. This course will assist students to understand their own relationships better, as well as those of their clients and colleagues. This course covers general systems theory, cybernetics, language systems, and natural systems theory. This overview of the most important systems theories will broaden the student’s understanding of the complexity of systems, and how systems shape and determine individual responses. Frequency: Every Fall and Winter.

HAWC 1002 Overview of Lifespan Wellness (3 credits)
This course covers the different health and wellness needs of individuals as they progress through developmental stages from early childhood to old age. Students will learn to vary approaches and coaching strategies depending on the developmental needs of individual clients. Just as individuals move through recognizable stages of development during the life cycle, couples and families also move through defined developmental stages. This course will also cover important family life cycle events such as family formation, family loss and reintegration, and expanding/contracting boundaries. Frequency: Every Winter and Summer.

HAWC 2003 Ethics of Coaching (3 credits)
This course prepares the student for the ethical and legal practice of coaching. Emphasis will be on state, national, and international guidelines for the practice of coaching. Frequency: Every Fall and Winter.

HAWC 2004 Coaching in Schools and Community Agencies (3 credits)
This course prepares the student to practice in community and school-based settings. Larger systems issues that are specific to school and community service agencies will be discussed, and practical strategies for coaching clients within these systems will be identified and practiced. Prerequisite: HAWC 1000, 1002 and 2003; Frequency: Every Winter.

HAWC 2005 Coaching in Health Care Systems (3 credits)
This course prepares the student for practice in the medical settings. Larger systems issues specific to medical settings will be discussed, and practical strategies for advocating for coaching clients within these systems identified and practiced. Prerequisite: HAWC 1000, HAWC 1001, HAWC 2003; Frequency: Every Fall (Course Launch Academic Year: 2023-2024).

HAWC 2006 Mindfulness and Meditation for Health (3 credits)
Mindfulness and meditation practices offer evidence-based positive results in both psychotherapy and medicine. In this course students will learn the basics of meditation, and the techniques for reorienting to the present moment. Frequency: Every Winter and Summer.

HAWC 2007 The Family Life Cycle (3 credits)
Just as individuals move through recognizable stages of development during the life cycle, couples and families also move through defined developmental stages. This course will cover important family life cycle events such as family formation, family loss and reintegration, and expanding/contracting boundaries. Frequency: Every Fall and Winter (Course Launch Academic Year: 2021-2022).

HAWC 2030 Couple and Family Coaching (3 credits)
This course focuses on the special issues involved in coaching individuals in a couple relationship. The student will learn evidence-based practices for promoting positive couple relationships and contextual factors which can influence the couples, such as culture, sexuality, and past relationship experiences. Identify the student’s own particular and individual strengths as a coach. This course also focuses on the special issues involved in coaching individuals who are parents. The student will learn about parenting practices and contextual factors which can influence the client’s ability to cope with parenting, such as social support and remembered childhood experiences. Specific attention will be given to parents of children who are not ‘typical’ due to medical or communication reasons. Prerequisite: HAWC 1000, 1001, 1002, 2003; Frequency: Every Fall and Winter.

HAWC 2031 Coaching across the Lifespan (3 credits)
This course focuses on the special issues involved in coaching children and teens. The student will learn basic developmental information, and contextual factors which can influence development. Examples of such factors are individual learning differences, family and social support, and school context. This course focuses also focuses on the special issues involved with coaching individuals in later life. The student will learn basic aging information, and the contextual factors which can influence the client’s ability to cope with aging, such as social support and effective caregiving. Prerequisites: HAWC 1000, 1002 and 2003; Frequency: Every Winter.

HAWC 2050 Coaching Diverse Populations (3 credits)
Best practices in coaching require the coach to have a sensitive awareness of race, class, culture and gender issues, within a context of equity and respect for difference. This course will explore individual and group privilege, and how coaches may promote social justice for their clients. Prerequisite: HAWC 1000, HAWC 1001, and HAWC 2003; Frequency: Every Fall and Winter.

HAWC 3007 Solution Focused Coaching (3 credits)
This course introduces the student to the practice of solution focused coaching. Basic principles of the solution focused approach are outlined, and the practice of coaching is clearly defined and practiced. Prerequisite: HAWC 1000, HAWC 1001, and HAWC 2003; Frequency: Every Fall and Winter.

HAWC 3008 Coaching Practicum I (3 credits)
This course allows the student to practice coaching with individuals, couples, families and groups. Placement will be arranged at a relevant community setting. Prerequisite: HAWC 1000 and HAWC 2003; Frequency: Every Fall and Winter (Course Launch Academic Year: 2022-2023).

HAWC 3010 Private Practice of Coaching (3 credits)
COURSE DESCRIPTIONS

HAWC 3011 Coaching Practicum II (3 credits)
This course allows the student to practice coaching in the community with individual, couple, family I and group. Placement is arranged at a relevant community setting. The course is a continuation of Coaching Practicum I. Prerequisites: HAWC 1000, 2003 and 3008; Frequency: Every Fall and Winter (Course Launch Academic Year: 2022-2023).

HAWC 3019 Integrative Wellness Approaches (3 credits)
This course explores insights of traditional folk and non-Western approaches to health and wellness, as well as key concepts of both osteopathic and allopathic medicine. The student will learn evidence-based best practices gleaned from diverse traditions. Frequency: Every Fall and Winter.

HAWC 3020 Diabetes Education and Coaching (3 credits)
This course focuses on the special issues involved in coaching individuals with diabetes mellitus, Type I or Type II. The students will learn basic disease information, and contextual factors which can influence the client’s ability to cope with the illness, such as peer pressure in the teenage years and lack of time to plan meals in the middle years. Prerequisite: HAWC 1000, 1002, 2003; Frequency: Every Fall and Winter (Course Launch Academic Year: 2022-2024).

HAWC 3030 Recovery Coaching (3 credits)
In this course students will learn principles of recovery coaching. Recovery coaching is a form of strength-based support for clients dealing with addiction related issues and are in recovery from alcohol, other drugs, food and other forms of addictive behaviors. Prerequisite: HAWC 1000, HAWC 1001, HAWC 2003; Frequency: Every Fall and Winter (Course Launch Academic Year 2022-2023).

HAWC 3031 Narrative Coaching (3 credits)
In this course students will learn the basic ideas and principles of narrative coaching and to apply these principles to coaching case scenarios. Power of story telling in changing lives will be highlighted. Student will learn to identify and tap into such client stories to facilitate their process of overcoming, healing, and transforming. Prerequisites: HAWC 1000; HAWC 1001; HAWC 2003; Frequency: Fall and Winter (Course Launch Academic Year 2022 - 2023).

HAWC 3032 Trauma Coaching (3 credits)
In this course the role coaches can play in supporting clients with trauma and how it differs from therapists will be described. Introduction to the theoretical aspects of trauma will be provided. Emphasis will be placed on its practical application in the context of coaching. A bio-psycho-social approach will also be taken. Specific traumas to include but are not limited to: mass shootings, pandemics, witnessing an accident or death, and abuse, etc. Prerequisites: HAWC 1000, HAWC 1001, and HAWC 2003; Frequency: Every Fall (Course Launch Academic Year: 2022-2023).

HAWC 3033 Grief Coaching (3 credits)
In this course students will learn about the meaning of grief coaching and the role of a grief coach. The responsibilities of a grief coach such as supporting the client during the transition post the loss and assisting them in understanding the grieving process will be highlighted. Introduction to the theoretical aspects of grief will be provided. Emphasis will be placed on its practical application in the context of coaching. A bio-psycho-social approach will also be taken. Prerequisites: HAWC 1000; HAWC 1001; HAWC 2003. Frequency: Every Fall and Winter.

HAWC 4012 Advanced Solution Focused Coaching I (3 credits)
This course broadens the student’s understanding of solution focused coaching with in-depth attention to best practices. Advanced issues in solution focused coaching are considered. Prerequisites: HAWC 1000; HAWC 1001; HAWC 2003 and 3007 Frequency: Every Winter (Course Launch Academic Year: 2022-2023).

HAWC 4014 Research Methods and Evaluation in Coaching (3 credits)
This course prepares the student to become an educated and critical consumer of research in the health and wellness field. In addition, this course prepares students to evaluate their own practice. Prerequisite: HAWC 1000 and 2003 Frequency: Every Fall and Winter (Course Launch Academic Year: 2022-2023).

HAWC 4025 Advanced Solution Focused Coaching II (3 credits)
This course moves to a deeper consideration of solution focused coaching, with a critical examination of best practices. Faculty work individually with students to assist with the identification of individual strengths as a coach and future professional niche. Prerequisites: HAWC 1000, 1002, 2003, 3007, 4012; Frequency: Every Fall (Course Launch Academic Year: 2022-2024).

HAWC 4990 Independent Study (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and program director required. Prerequisite: BPH 2070; Frequency: Every Fall, Winter and Summer (Course will Launch: Winter 2022 (Student request IS from Public Health Faculty and department approval).
allow students to gain new perspectives, as well as apply knowledge from prior courses and experiences. This course is presented as a capstone experience; therefore students with advanced standing in the HDFS major will benefit the most from the seminar. Prerequisite: HDFS 3000. Frequency: Every Winter.

HDFS 4990A Independent Study A in Human Development and Family Studies (3 credits)
The student selects and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: HDFS 3000 and written consent of instructor and division director. Frequency: Every Fall and Winter.

HDFS 4990B Independent Study B in Human Development and Family Studies (3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: HDFS 3000 and written consent of instructor and division director. Frequency: Every Fall and Winter.

HDFS 4990C Independent Study C in Human Development and Family Studies (3 credits)
The student selects and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: HDFS 3000 and written consent of instructor and division director. Frequency: Every Fall and Winter.

HDFS 4990D Independent Study D in Human Development and Family Studies (3 credits)
The student selects and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: HDFS 3000 and written consent of instructor and division director. Frequency: Every Fall and Winter.

HIPS—HIPS-History and Political Science

HIPS 2900 Research Methods in History and Politics (3 credits)
This course provides an introduction to the research methods that political scientists, historians, and international studies scholars use to answer questions. The course is intended to provide students with analytic tools with which they can critically evaluate research in these fields and train the student to pose and answer research questions of their own. Students complete a semester-long research assignment with an emphasis on using appropriate methodology, employing original sources, developing interpretative skills grounded in creative and responsible scholarship, improving writing skills, using discipline specific citation, and delivering oral presentations. Prerequisites: POLS 1200 or INST 1500 or one HIST course and COMP 2000 or 2020 or COMP 2000H. Experiential Education and Learning (ExEL):

Successful completion of this course satisfies 1 ExEL unit. Course frequency, every Fall

HIPS 4500 Special Topics in History and Politics (3 credits)
An advanced course in selected topics in history and political science. Specific focus to be announced. May be repeated once for credit, if content changes and with written consent of division director. Pre-requisites: One POLS or one HIST class, plus COMP 2000, COMP 2010, or COMP 2020 Frequency; Every Winter.

HIPS 4900 Senior Seminar Capstone (3 credits)
This course is intended as a capstone experience for all history, political science, and international studies majors. The objective is to have the student draw on everything they have learned in their prior courses by means of an intensive study of a single topic of historical, political, or international concern or controversy. The learning method employed in this class will combine extensive readings in primary and secondary source materials with a major research paper that is subject to rigorous academic standards. Topics will vary. Prerequisites: Completion of a minimum of 90 credits and HIPS 2900 or INDS 2901. Research Methods in History and Political Science. Frequency: Every Winter.

HIST—History

HIST 1030 American History to 1865 (3 credits)
American history from its colonial origins through the Civil War. Special emphasis is given to analyzing and evaluating the major forces and ideas that have shaped American political, social, and economic life. Frequency: Every Fall and Winter.

HIST 1040 American History Since 1865 (3 credits)
A study of the development of world civilizations, examining the interrelationships of the various regions of the world from Prehistoric times through 1500, including the rise of world communities, cultures, religions, and empires, tracing the development of trade, economics, political forms, the creation of the nation-state, and on the development of technology and the use of war for resolve cultural/religious/national conflicts. Frequency: Every Fall.

HIST 1090 Early Western History (3 credits)
A historical study of the major political, social, economic, philosophical, and religious movements shaping Western society in the period preceding the Renaissance. Frequency: Every Fall.

HIST 1110 Modern Western History (3 credits)
A historical examination of modern western society since the Middle Ages, emphasizing political, social, and economic movements, and the religious and philosophical ideas that have shaped its development. Frequency: Every Winter.

HIST 1120 The West: Patricians, Serfs, and Citizens (3 credits)
This course provides an overview of western history from Greek and Roman civilization to the present, with a particular emphasis on the evolution of western political institutions, legal systems, social structures and culture. The course will develop themes highlighting key developments, episodes or periods in western history that have proved critical in shaping the political, legal, and social systems of modern Europe. These themes will serve as the focal point for all classroom activities and assignments. Prerequisite: COMP 2000, COMP 2010, or COMP 2020. Frequency: Every Fall.

HIST 1150 Early World History (3 credits)
A study of the development of world civilizations, examining the interrelationships of the various regions of the world in the post-Renaissance era, examining the major world communities, cultures, and religions, tracing the modernization of economics and political systems, and the relations between modern nation-states. The course will also examine the collapse of colonialism, the beginning and end of the Cold War, the use of technology and warfare to resolve cultural/religious/national conflicts, and the role played by the United States in world affairs in the modern era. Frequency: Every Winter.

HIST 1160 Modern World History (3 credits)
A study of the interrelationships of world civilizations of the various regions of the world in the post-Renaissance era, examining the major world communities, cultures, and religions, tracing the modernization of economics and political systems, and the relations between modern nation-states. The course will also examine the collapse of colonialism, the beginning and end of the Cold War, the use of technology and warfare to resolve cultural/religious/national conflicts, and the role played by the United States in world affairs in the modern era. Frequency: Every Winter.

HIST 1170 The World: From Gatherers to Globalization (3 credits)
This course examines the theme of how the modern, interconnected world is rooted in a complex interplay of factors that have shaped the global human story. The course will develop this theme by highlighting key developments,
episodes or periods in history that have proved critical in shaping the make-up of the modern world, including states, cultures and societies. These changes and developments will serve as the focal point for all classroom activities and assignments. Prerequisite: COMP 2000, COMP 2010, or COMP 2020. Frequency: Every Winter.

HIST 2130 Formation of Latin America (3 credits)
An interdisciplinary study of ancient American and Latin American systems and societies. The course examines ways in which essential elements of indigenous cultures have had an impact on the development of Latin American political, social, and economic institutions; the impact of Iberian history and socioeconomic systems on the discovery, colonization, and development of American nations; the legacy of Spanish and Portuguese colonialism to emerging Latin American states; and the major goals and consequences of 19th century neocolonialism. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

HIST 2140 Modern Latin America (3 credits)
Using Latin America and the Caribbean as a focal point, the course provides an interdisciplinary overview of contemporary American systems and societies and their place in a rapidly changing, increasingly interdependent world. Topics discussed will include the causes and goals of revolution in Latin America, Latin American debt and development, U.S.-Latin American relations, and a new hemispheric order for the 21st century. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Winter.

HIST 2150 Latin American and Caribbean History (3 credits)
This course involves a survey of Latin America and the Caribbean history from the 15th century to the present. Beginning with an examination of indigenous cultures at the time of European arrival, the course will trace the impact of colonialism, slavery, and political revolution on the history of Latin America and the Caribbean. The course will also provide an overview of modern American systems and societies and their place in a rapidly changing, increasingly interdependent world. Prerequisite: COMP 1500, COMP 2000, COMP 2010, or COMP 2020. Frequency: Fall Even Years.

HIST 2300 Caribbean History (3 credits)
This course traces the history of the Caribbean from the fifteenth century to the present, examining such issues as indigenous peoples and the early years of European settlement and colonization, the construction of African slavery, the changing place of the Caribbean in the world economy, various aspects of slave society, and the abolition of slavery. Revolution and struggles for independence will be emphasized, as will be U.S. imperialism, migration, and the rise of intellectual, artistic and literary movements in Caribbean island nations. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Year Fall.

HIST 2400 African History (3 credits)
This class will focus on Africa as a vast continent that is characterized by enormous ethnic, religious, geographic, and historical diversity. Emphasis will be on the transatlantic slave trade and its impact on Africa and Africa's relations with the outside world. European colonization of Africa and the extent to which it shaped the modern history of the continent; and the history of South Africa and the rise and fall of the Apartheid Regime. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Odd Year Fall.

HIST 2500 Topics In Asian History (3 credits)
HIST 3010 Constitutional History I (3 credits)
A study of the origin and development of the American constitutional system from the colonial period to 1870. The course will examine seminal decisions of the United States Supreme Court during this period in their political, social, and economic context. Prerequisites: COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Fall.

HIST 3020 Constitutional History II (3 credits)
Continuation of the study of the constitutional system of the United States. The course covers the period 1870 to the present with special emphasis on Supreme Court decisions in the areas of federal-state relations, individual liberties, and civil rights. Prerequisite: HIST 3010. Frequency: Winter.

HIST 3130 Vietnam (3 credits)
This course takes an interdisciplinary approach to examine the origins and causes of the Vietnam War, explore the ways it was fought, and evaluate its impact on American society, politics, and life. Specific focus will be on the way that the Vietnam conflict inspired feelings of strife and anger, confusion and frustration to an entire generation of Americans as America's first “lost” war. Prerequisites: COMP 2000, COMP 2010, or COMP 2020. Frequency: Odd Year Winter.

HIST 3140 The Holocaust (3 credits)
A study of the history of the Holocaust. This course will look at the causes, reasons, results, and implications of the Holocaust from both a European and American perspective. Prerequisites: COMP 2000, COMP 2010, or COMP 2020. Frequency: Even Year Fall.

HIST 3230 The Great Depression (3 credits)
This course will examine the origins and causes of the Great Depression, exploring its impact on American society and life and evaluating its effects on the politics of reform that grew up in response to this crisis. Specific topics, such as this era's impact on confidence about the future, the New Deal, the welfare state and modern liberal politics, and how events of the era have helped form contemporary American society, will be covered. Prerequisite: COMP 2000, 2010, or 2020 or 2020H. Frequency: Even Year Fall.

HIST 3240 Irish History (3 credits)
This course will study Irish history from the Neolithic era to the 21st century, focusing on the colonial relation between Britain and Ireland, including the 17th-century Plantation, the Cromwellian and Williamite wars, the United Irishmen and the 1798 Rising, the Act of Union, the Great Hunger (Famine) and emigration to America, and the formation of the Irish Republic and the Northern Irish state in 1922. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: COMP 2000 or COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Odd Year Fall.

HIST 3300 Contemporary U.S. History (3 credits)
This course follows a thematic approach to the history of the United States since 1945. The course will involve some general background on many of the major political, cultural, and social themes of this period, such as the civil rights movement, the politics of the welfare state, Watergate, the culture wars of the 1980s, etc. Four specific social and cultural issues will be emphasized: the impact of the Cold War on modern American culture; the social and cultural implications of the postwar growth of the middle class and suburbia; the counterculture of the 1960s and its impact on contemporary society; and the influence of the “moral majority” and the religious right on contemporary politics. Prerequisite: COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Odd Year Winter.

HIST 3400 U.S. Foreign Relations (3 credits)
This course will examine the emergence of the United States as the dominant political, economic, and military power on the world stage in the twentieth century. Students will attempt to identify reasons for this development and endeavor to come to a fuller understanding of the nature and scope of America’s global commitments. The course will trace the development of American foreign relations from the Spanish-American War of 1898 through the Cold War, concluding with an examination of the evolution of American foreign policy in the post-Cold War and the ramifications of recent developments at home and abroad. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Even Year Winter.

HIST 3430 Renaissance and Reformation Europe (3 credits)
This course examines the reemergence of Europe in the fourteenth century as a center for political, intellectual, economic, and artistic developments. It also explores the religious, political, and social upheavals of the sixteenth century.
and seventeenth centuries by focusing on the split between Protestants and Catholics, the development of powerful nation states, and the newly emerging “scientific” theories of the era. Prerequisites: COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Even Year Fall.

HIST 3440 Enlightenment and Revolution in Europe (3 credits)
This course examines the challenges to traditional authority by Enlightenment thinkers about the nature of reality, and how these objections shaped the interactions between society, politics, and culture that characterized the Enlightenment and the French Revolution. The overarching aim of this course is to understand the complex nature of these cultural upheavals in their political, religious, economic, scientific, and cultural dimensions, and to appreciate how their effects have continued to shape Western attitudes and values. Prerequisites: COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Odd Year Fall.

HIST 3450 History of American Immigration (3 credits)
History of American Immigration: This course will examine the history of American immigration. The course will study the motivation for those coming to America, immigration demographics, the impact of immigration on American society, American reaction to immigration in public opinion, and the political, social, and legal response to immigration. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Even Year Winter.

HIST 3510 The Civil War and Reconstruction (3 credits)
This course examines the causes, character and consequences of the American Civil War. Emphasis will be placed on antebellum society and the growth of sectionalism, political breakdown, the institution of slavery; the war itself and how it transformed American economic, social and political institutions; Reconstruction and the War’s aftermath. Prerequisites: COMP 2000, 2010, or COMP 2020. Frequency: Odd Year Winter.

HIST 3550 America Transformed (3 credits)
This course follows a thematic approach to the history of the United States from the 1920s into the twenty-first century. The course will emphasize the political, cultural, and social transformation of the U.S. throughout this period by focusing on major episodes or developments that have shaped the modern United States e.g. the Roaring Twenties, the Great Depression, McCarthyism, the Civil Rights movement, the Watergate era, etc. Prerequisite: COMP 2000, COMP 2010, or COMP 2020. Frequency: Even Winter.

HIST 3850 The Civil Rights Trail (3 credits)
This travel will meet as a regular sixteen-week ground course every fall semester and involves two mandatory travel trips. The course will involve an in depth exploration of the history of Civil Rights movement, from the historic Supreme Court Brown decision in 1945 until the assassination of Martin Luther King, Jr. in 1968. The travel portion of the course will involve visits to locations on the Civil Rights Trail such Atlanta, Georgia, and Birmingham, Alabama. The course may also involve some shorter day trips to sites such as Dodgertown in Vero Beach, the African-American Research Library in Fort Lauderdale, St. Augustine Civil Rights Museum or Mims in Brevard County. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: COMP 2000, COMP 2010, or COMP 2020. Frequency: Fall Even.

HIST 4700 Genocide in the 20th Century and Beyond (3 credits)
This course will examine the history of genocide beginning in the 20th century focusing mostly on Europe and Africa: the Holocaust, the Balkans, Rwanda and Darfur. As part of this study, students will travel to see the first-hand manifestations and implications of genocide. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Pre-requisites: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Even Year Winter.

HIST 4950 Internship in History (1-12 credits)
A 10-20 hour per week field or work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisite: cumulative GPA of 2.5 or higher, completion of 60 or more credit hours, and permission of department chair. Frequency: Every Fall and Winter.

HIST 4990 Independent Study in History (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisites: COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Fall and Winter.

HONR—Honors
HONR 1000C Honors Seminar: Myth and Fairy Tale in Modern Culture (3 credits)
This course will focus on the influence of mythology and fairy tale on the cultural and psychological fabric of modern life. As students read various myths, fairy tales, and literature, as well as study images of myth and tale in advertising and film, they will attempt to make connections between underlying recurrent themes that find their roots in the earliest stories of humanity. The reading and analysis of texts and images will be complemented by the development of individual writing skills, emphasizing critical thinking and the clear, sophisticated, and creative expression of ideas. Satisfies general education requirement in Arts and Humanities. Prerequisite: Honors students only. Frequency: Odd Year Fall.

HONR 1000D Honors Seminar: Future History (3 credits)
This course is an extrapolation of the future based on assumptions about, and concerns with, the present. Taking both a utopian and a dystopian form, these explorations of historic imagination say as much about where we think we are today as where we think we are heading in the future. It will further explore the various forces that shape historic change and seek to place ourselves and our personal world within this process. Satisfies general education requirement in Arts and Humanities. Prerequisite: Honors students only. Frequency: Odd Year Fall.

HONR 1000G Honors Seminar: The Problem of Consciousness (3 credits)
What is consciousness? How does the brain do its work and produce its dazzling, if often for-granted, capabilities? If we all share similar capacities, how does each brain manage to make itself unique? Although these similar questions have been asked for hundreds, if not thousands, of years, the past decade has provided more tools for answering them than at any other time in human history. Data from many fields of inquiry have begun to converge. Students who take this course will be exposed to these exciting new findings and will also explore resulting controversies. Satisfies general education requirements in Social and Behavioral Sciences.

HONR 1000M Honors Seminar: Wicked Wit: Satire in Literature, Film, and Television (3 credits)
This course focuses on the methods, intentions, and impact of satire, from its origins in classical literature through its “Golden Age” in the eighteenth century and its enduring, acerbic presence in 20th- and 21st-century literature, film, television, and on the Web. Students will explore the ways that satire challenges routinely accepted ideas and practices, and targets injustice, selfishness, and hypocrisy in people and in their social institutions. Satisfies general education requirements in Arts and Humanities.
This course will examine how the various personal information about themselves. Honors or assignments require students to disclose some how they view themselves. The course will focus choose to live life and will think critically about social science lens, various areas of how they their future. Students will explore, through a
designed to give students the ability to see or hear news stories about the latest scientific discoveries and current events in science and assess the importance of these issues in our daily lives. Scientific topics may include but are not limited to: medicine, natural sciences, meteorology, climatology, and physics. This course satisfies general education requirements in Arts and Humanities. Prerequisite: Honors students only. Frequency: Every Fall and Winter.

HONR 1000S Honors Seminar: The Nature of Truth (3 credits)
This seminar will examine the nature of the concept of truth as it appears in the human culture and civilization. Special attention will be paid to truth as disposition or virtue of character and the notion of truth as it has appeared in various religious contexts, as well as the impact these notions have had on philosophy, history, psychology, literature and the arts, and science. Satisfies general education requirements in Arts and Humanities. Prerequisite: Honors students only. Frequency: Every Year Fall.

HONR 1000T Honors Seminar: Science in the News (3 credits)
This general education honors seminar is designed to give students the ability to see or hear news stories about the latest scientific discoveries and current events in science and assess the importance of these issues in our daily lives. Scientific topics may include but are not limited to: medicine, natural sciences, meteorology, climatology, and physics. This course satisfies general education requirement in Science. Prerequisite: Honors students only. Frequency: Every Fall.

HONR 1000U Honors Seminar: You: A Critical Analysis (3 credits)
This course is designed for students to be able to take an introspective view of who they are, including their history, their belief systems, and their future. Students will explore, through a social science lens, various areas of how they choose to live life and will think critically about how they view themselves. The course will focus on aspects of personal growth and a scientific understanding of choice making. Course activities or assignments require students to disclose some personal information about themselves. Honors students only. Frequency: Odd Year Winter.

HONR 1000W Honors Seminar: We Are All Biased: Social Stratification (3 credits)
This course will examine how the various groups with which people identify impact their perspectives on a variety of current and historic issues as well as one-on-one interaction with others. Using socio-economic class, race, ethnicity, sex, and gender as independent variables as well as combinations of these groups, students will analyze and evaluate historic and current events to determine how inequality is established and maintained in our society. Prerequisite: Honors students only. Frequency: Even Year Fall.

HONR 1000Y Honors Seminar: Menace to Society: Comics, Art, & More (3 credits)
This seminar will attempt to teach students how to synthesize theories and ideas about how images make meaning, critically analyze images in various cultural contexts, and produce visuals with deliberate thought to form, function, rhetorical purpose, and context. Satisfies general education requirements in Arts and Humanities. Prerequisite: Honors students only. Frequency: Odd Year Winter.

HONR 1000Z Reel Music: A Survey of Music in Film (3 credits)
This course is a survey of the metaphysics of music in films and its history. The course will also concentrate on various artistic and production perspectives. Additionally, it will discuss the works of composers who have contributed extensively to the development of film music, including representatives of newer trends in recent years with the use of extensive visual examples. Prerequisite: Honors students only. Frequency: Every Year Winter.

HONR 1010A Honors Seminar: Read It, Watch It, Play It: Transmedia Storyworlds (3 credits)
This course focuses on understanding the ways in which dynamic storyworlds influence our perception and consumption of narratives. We will examine how these worlds are presented to audiences, as well as the ways in which industries, creators, and audiences interact with and influence these worlds. Exploring the sociocultural importance of various narratives facilitates critical participatory accountability and responsibility, as well as a critical awareness of the consumer materiality surrounding us. Using a variety of theoretical perspectives, this seminar critically examines the ways in which we understand the production, distribution, and consumption of popular storyworlds across written texts, film, and television, and gaming media. Prerequisite: Honors students only. Frequency: Even Year Fall.

HONR 1010B Honors Seminar: The Healthy Woman, Mothers to Cyborgs (3 credits)
What defines a healthy woman? This course provides students with an opportunity to explore this question from a humanities perspective. Course goals are to analyze the ways women’s health has been imagined and expressed in literary and cultural texts. Materials will emphasize how the myths, attitudes, and beliefs surrounding women’s health have evolved since the advent of modern medicine in 1800s America and Britain. Prerequisite: Honors students only. Frequency: Even Year Fall.

HONR 1010C Honors Seminar: Alt-Facts & Fake News: Media Literacy in the Digital Age (3 credits)
Alternative facts. Fake news. Post-truth. These terms have each gained much circulation in the last few years. But, what is fake news? How can you tell if news is fake? Why is fake news used and how does it work? When did people first start making fake news? In this general education honors course, we will answer these questions as we learn to critically read and understand many kinds of information/misinformation (news stories, statistics, images, social media posts); analyze the persuasiveness of news articles; review how misinformation spreads across different platforms; consider multiple perspectives and opinions while confronting biases; and research and write your own persuasive news stories. Prerequisite: Honors students only. Frequency: Every Year Winter.

HONR 1010D Honors Seminar: Water & Sustainability (3 credits)
Water is essential. It sustains us as human beings, supports economic productivity, and plays a central role in global climate. Water is also a key element to international peace and stability. Yet the value of water and its infrastructure are largely invisible and receive little media coverage unless a problem is imminent such as a broken water pipe or prolonged drought. As reports around the world indicate that a global water crisis is looming, it is important that we understand the basics of water from various disciplinary perspectives so that we may develop innovative solutions to water needs. During this experiential learning seminar, students will explore the basic principles of water and explore ways we can ensure availability and sustainable management of water and sanitation for all (UN Sustainable Development Goal #6). Through active learning, field trips, readings, information presentations, class discussions, individual and collaborative projects, and reflection, students will gain a broad understanding of water-related issues from various perspectives including science, law, business, education, engineering, conflict resolution, and others. Prerequisite: Honors students only. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Less than once every two years.

HONR 1010E The US Supreme Court and the Cultural Revolution: Studying the Legacy of the Warren Court (3 credits)
The purpose of this course is to explore societal and cultural issues in various areas of the law and the legal implications that result. Students will evaluate case law and literature that probe the centerpiece cases heard by the Warren Court.
Students will evaluate how an era so affected American history and answered questions on segregation, a person’s right to counsel, freedom of religion, right to privacy, criminal procedure, and free speech. This course satisfies general education requirement in social and behavioral sciences. Prerequisite: Honor students only. Frequency: Even Year Fall.

HONR 1010F The Physiology of Stress (3 credits)
Using a combination of lectures, peer-reviewed journal articles, group discussions, case studies, and personal evaluations and applications, students will learn about the physiological aspects of stress and its effects on the human body – with emphasis being placed on the physical, hormonal, and neurological aspects of human physiology. Students will be expected to keep a notebook with their personal applications and will be required to present their applications in class. Frequency: Even Year Fall.

HONR 1010G Intro to Protein Modeling (3 credits)
This course will give students an overview and introduction to the research process in the sciences by designing a protein model based on a yearly theme. The course will introduce students to the process of using computational tools to explore protein structures, and connect structure to function. Students will develop a research question and use 3D protein models to begin to look for an answer. Students will present their protein models to the class and have the opportunity to present their findings at local and national conferences. Frequency: Every Summer.

HONR 1500 Honors Reading Seminar (1 credits)
The Honors Reading Seminar is designed to provide focused study on one selected text. Under faculty leadership, honors students will read and discuss the text in small groups. Students will take a leadership role to prepare discussions. Texts will be selected on a semester to semester basis and may reflect the annual theme. This course is an elective and does not satisfy requirements for general education. This seminar is open to honors students only. Frequency: TBA.

HONR 1510K Honors Reading Seminar: Ta Nehisi Coates (1 credits)
The honors reading seminar is designed to provide focused study on one selected text. Under faculty leadership, honors students will read and discuss the text in small groups. Students will take a leadership role to prepare discussions. This course is an elective and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Less than every two years.

HONR 1510L Honors Reading Seminar: Kurt Vonnegut Jr. (1 credits)
The honors reading seminar is designed to provide focused study on one selected text. Under faculty leadership, honors students will read and discuss the text in small groups. Students will take a leadership role to prepare discussions. This course is an elective and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Less than every two years.

HONR 1510M Honors Reading Seminar: Mosshin Hamid (1 credits)
The honors reading seminar is designed to provide focused study on one selected text. Under faculty leadership, honors students will read and discuss the text in small groups. Students will take a leadership role to prepare discussions. This course is an elective and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Less than every two years.

HONR 1510N Honors Reading Seminar: Alexi Zentner (1 credits)
The honors reading seminar is designed to provide focused study on one selected text. Under faculty leadership, honors students will read and discuss the text in small groups. Students will take a leadership role to prepare discussions. This course is an elective and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Less than every two years.

HONR 1510P Honors Reading Seminar: Karla Cornejo Villavicencio (1 credits)
The honors reading seminar is designed to provide focused study on one selected text. Under faculty leadership, honors students will read and discuss the text in small groups. Students will take a leadership role to prepare discussions. This course is an elective and does not satisfy requirements for general education. Frequency: Less than every two years.

HONR 1510Q Honors Reading Seminar: John Carreyrou (1 credits)
The honors reading seminar is designed to provide focused study on one selected text. Under faculty leadership, honors students will read and discuss the text in small groups. Students will take a leadership role to prepare discussions. This course is an elective and does not satisfy requirements for general education. Frequency: Less than every two years.

HONR 2000C Honors Seminar: History of Economic Development (3 credits)
This course will examine the history and evolution of economics as a basic human institution with emphasis on distinctions between growth and development. The challenge of sustainable development will be analyzed within the broader historical context of human rights, environmental consequences, and ideological goals and outcomes. Students will design and discuss alternative economic models for the future that emphasize sustainability. Satisfies general education requirement in Arts and Humanities. Prerequisite: Honors students only. Frequency: Odd Year Fall.

HONR 2000E Honors Seminar: Utopias and Dystopias (3 credits)
This course focuses on the dual concepts of utopias and dystopias—ideal visions of society and nightmarish visions of society. Various manifestations of utopias and dystopias in literature, philosophy, film, and mythology will be focused on as students explore the desire of humans to conceive of an ideal society, as well as the advantages and dangers of such conceptions. Satisfies general education requirement in Arts and Humanities. Prerequisite: Honors students only. Frequency: Even Year Fall.

HONR 2000H Honors Seminar: Famous American Trials (3 credits)
This course will examine famous trials in American history that reflect major social changes, cultural conflicts and political struggles from the late 19th century through the 20th century. Satisfies general education requirements in Arts and Humanities. Prerequisite: Honors students only. Frequency: Odd Year Winter.

HONR 2000K Honors Seminar: Inappropriate Relationships (3 credits)
This course will focus on various types of relationships that have been deemed “inappropriate”. A social science perspective will be used to examine the societal context in which these relationships develop, are maintained, and terminate. The course will also focus on the impact that these relationships have on society and society’s impact on the individuals in the relationship. Satisfies general education requirements in Social & Behavioral Sciences. Prerequisite: Honors students only. Frequency: Even Year Winter.

HONR 2000L Honors Seminar: Ideologies of the Twentieth Century (3 credits)
This course will examine the competing great ideologies of the twentieth century - Communism, Fascism, Liberalism and Socialism. After an examination of Liberalism and the ideas of the Enlightenment, students will discuss why Communists, Fascists and Socialists rejected classical Liberalism, with its emphasis upon limited government, the rights of the individual, and free market economics. Students will then consider the characteristics of the societies that anti-liberal thinkers created. Satisfies general education requirements in Arts and Humanities. Prerequisite: Honors students only. Frequency: Less than once every two years.

HONR 2000N Honors Seminar: The “F” Word: Feminism and Culture (3 credits)
This course will examine the role of 1st, 2nd, and 3rd wave feminisms in women’s cultural history. By exploring the social and political contexts of the
struggle for equal rights for women, students will learn to separate the myths (images of feminism) from the reality (contributions of feminism) in the lived experience of women. Although it will focus primarily on American feminist history, the course will consider its European roots. Satisfies general education requirements in Arts and Humanities. Prerequisite: Honors students only. Frequency: Odd Year Winter.

HONR 2000X Honors Seminar: Conspiracy Theories (3 credits)
This course examines the role conspiracy theories have played in U.S. history from the inception of the Republic to the present day. At various times charges of conspiracies involving Masons, Jews, Slaves, Communists and Right Wing extremists (to name but a few) have played an integral role in U.S. history, while conspiracy theories involving U.F.O.s, presidential assassinations, and terrorist attacks have often taken deep root in the public imagination despite concerted efforts to refute them. This course will challenge students to think objectively and critically about these conspiracies (and the tendency towards paranoia in American politics) by analyzing them within the context of the passage of American history and the evolution of American democracy. Satisfies general education requirements in Arts and Humanities. Prerequisite: Honors students only. Frequency: Odd Year Winter.

HONR 2010J Witch-Hunts! (3 credits)
Throughout American history the identity of specific individuals and/or groups have been branded by those in power as so great of a threat to the public good that it justified extreme, even violent, acts of suppression by the government or private citizens. Ironically, over time, the judgment of history often reverses the picture, branding those doing the attacking as evil and the oppressed as good people wrongfully victimized. This course will explore this dynamic, examining the origins, content, and effects of specific historical witch-hunts as well as the evolving verdict of history about these events. Satisfies general education requirement in Arts and Humanities. Prerequisite: Honors students only. Frequency: Infrequent.

HONR 2010K Honors Seminar: Assassin’s Creed (3 credits)
This course is a social and cultural history of assassination, especially in American history. The course will focus on how each assassination helps inform one’s understanding of American history and the political, social and cultural forces at work surrounding each assassination and attempted assassination. This course satisfies general education requirements in arts and humanities. Prerequisite: Honors students only. Frequency: Even Year Winter.

HONR 2010N Honors Seminar: Alcohol, Drugs, and Society (3 credits)
This course will employ a sociological perspective to examine substance use, as well as problems and policies related to substance use. Topics reviewed in this course include a brief history of substance use in the U.S., classical and contemporary theoretical explanations, substance use cultures, vulnerable populations, substance use prevention, and legal issues and drug policies. In addition, each week will include a special topic students will explore in detail using sociological-based research. This course will require students to read, engage in critical thinking, and participate in discussions. Satisfies general education requirements in Social and Behavioral Sciences. Prerequisite: Honors students only.
COURSE DESCRIPTIONS

HONR 2010P Honors Seminar: Law and Literature (3 credits)
This honors seminar will examine the interrelationship of the law and literature. The seminar considers how attorneys may use literary techniques and devices and how literary themes influence the life and practice of the lawyer. The course will compare approaches of the law and literature to various problems, from assisted suicide to murder, focusing on when the human element as expressed in literature can properly serve as a tool for the lawyer. Students will analyze rhetorical strategies common to legal and literary texts, and recognize the value of good writing technique. Prerequisite: Honors students only. Frequency: Even Year Fall.

HONR 2010R Honors Seminar: Design Thinking (3 credits)
Design thinking is a process and a mindset that encourages creativity and innovation to solve complex problems and create solutions such as products, programs, services, experiences, spaces, and business strategies. This project-based course introduces students to design thinking and how it can be applied in various disciplines such as business, education, engineering, healthcare, and information systems. Through information presentations, readings, class discussions, activities, individual and multi-disciplinary collaborative projects, and reflection, students will apply design thinking tools and techniques to solve problems and create innovative solutions. There are no pre-requisites and no technical experience is required. Satisfies general education requirements in science. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: Honors students only. Frequency: Even Year Winter.

HONR 2010S Introduction to Biomedical Research (1 credits)
This course provides students an overview and introduction to the research process in the medical and other health professions. Each student will prepare and submit a proposal for a medical or other health professions research project. The course introduces students to the process of developing research proposals designed to expand the body of knowledge in the field of medicine and other health professions. Prerequisite: Honors students only. Frequency: Less than once every two years.

HONR 2010T The Nuclear Dilemma (3 credits)
Drawing from the resources of the social sciences, this course presents an overview of those factors which led to the creation of atomic weapons as well as an examination of the social and political forces which contributed to their use and continued deployment. The course provides portraits of the relevant key personalities involved in weapons development and investigates the causal factors which led to the decision to use atomic weapons at Hiroshima and Nagasaki. The social, political, psychological, and economic impact of atomic weapons on the national consciousness is examined through a detailed study of the Cold War economy, the Cuban Missile Crisis and the continued threat posed by such weapons. Prerequisite: Honors students only. Frequency: Odd Year Fall.

HONR 2010U Reel Science (3 credits)
This course focuses on how depictions of science in film and television affect and influence culture and society. Various realms of science, such as biomedical, environmental, genetic, and geophysical, are explored. The course examines questions of scientific accuracy, ethical dilemmas, aesthetic rendering, and societal impact. Prerequisite: Honors students only. Frequency: Even Year Winter.

HONR 2010W War Stories: Gender and Soldering in Contemporary America (3 credits)
With an emphasis on the late 20th- and early 21st century, “War Stories: Gender and Soldering in War-time America” will use a combination of fiction and non-fiction readings as well as narrative and documentary films to look at the ways in which gender informs, shapes and is impacted by soldiers’ experiences of war on the battlefield and on the home front in contemporary America. Veterans and campus professionals who are familiar with social, psychological and physiological problems associated with war trauma may be invited as guest speakers. Prerequisite: Honors students only. Frequency: Odd Year Fall

HONR 2010X Race in Art (3 credits)
The history of art is usually introduced through the Western perspective. This honors course will examine and introduce a non-western approach to understanding the history of art through the social construct of race. Students will begin to deconstruct the way images, media, and perspective interfere in art globally. The chronological review of art history through readings, writing assignments, and demonstrations will further identify how western art history is perceived and learned in response to the vision of the “other.” Prerequisite: Honors students only. Frequency: Even Year Winter.

HONR 2020A Honors Seminar: Autism Today: The Individual and Family (3 credits)
Through a combination of traditional lectures, guest speaker appearances, Autism Spectrum Disorder (ASD) will be explored through individuals with autism and their family members, and the personnel and agencies who support them. Beginning with a historical look at the recognition of this disorder, changes in the understanding of the disorder and diagnostic criteria over time, and the impact on prevalence rate, the course will then address issues in a variety of family issues and the resources in the community to support both the individual with ASD and his or her family members. The course will be presented by professionals from a variety of agencies and programs to give undergraduate students in the Honors College information about autism, the positive and negative impacts on the family, and resources to help them cope. Assignments are designed to foster critical thinking and reflection on the experiences of individuals with autism and their families. Prerequisite: Honors students only. Frequency: Every Fall.

HONR 2020B Honors Seminar: Autism Today: Field Experience (3 credits)
Through a combination of traditional lectures and active participation experiences, autism spectrum disorder (ASD) will be explored through educational and clinical experiences. The lectures will be presented by professionals from a variety of disciplines to allow undergraduate students in the Honors College to experience autism from different professional viewpoints. Field experiences will be designed to match the information within the week’s lecture. Assignments are designed to foster critical thinking and reflection on the experiences of service providers working with individuals with ASD. Prerequisite: Honors students only. HONR 2010Q or HONR 2020A. Frequency: Every Winter

HONR 2020C You Be the Judge (3 credits)
This course provides students with an opportunity to think about societal and legal issues from a unique perspective – that of judge. Students will have a chance to try their hand at deciding real cases with their own attempts at principled and fair reasoning through exploration of interesting and sometimes strange legal controversies. Through examination of the court’s actual solutions to the cases considered, students will be able to compare the legal and ethical repercussions of the original judges’ decisions to their own. Additionally, philosophical issues embedded in these legal controversies will be more fully explored through examination of works in legal philosophy. This course does not require any previous background in law. The course satisfies general education requirements in arts and humanities. Prerequisite: COMP 1500. Pre-Requisites: Honors students only. Frequency: Even Year Winter.

HONR 2020D Invasive Species Ecology and Management (3 credits)
This Honors College course will cover the main biological and historical aspects of invasive species ecology, including both terrestrial and aquatic systems. Particular emphasis is placed on the development of government policies regarding exotic and invasive species and the state, U.S. federal, and international management measures intended to control the effects of current invasive species and to minimize the
risk of future introductions. Over the semester-long course, students will be provided with a broad overview of exotic and invasive species, including lectures, interactive discussions, and outside reading and synthesis assignments. The beginning third of the course will cover basic concepts of invasive species biology, ecology, and theory; the second third will discuss predicting and describing impacts; and the last third will put the concepts from the prior two thirds into larger policy and management contexts. Students will also attend an invasive species collection event and a meeting of the Florida Fish and Wildlife Conservation Commission (FWC) during the term. Pre-Requisites: Honors Student Only. Frequency: Every Winter.

HONR 2020E Grant Writing for Human Subjects Research and Human Services Programming (3 credits)
This course introduces the skills of writing grant proposals to governmental and private foundation funding agencies for human subjects research and human services programming projects. It provides hands-on application of planning and communication skills in grant writing through faculty and peer-group iterative feedback. Necessary skills that will be developed in this course include how to seek funding opportunities; articulate specific aims; develop goals, objectives, and implementation plans; write literature reviews that express the background and relevance of one’s proposal; craft a research strategy/program plan; construct a budget and budget justification; and develop a logic model. Each student will develop one Letter of Intent and one grant proposal during the course of the semester in a topic area they select based on intellectual interest and passion for further exploration. When students finish the class they will have an informed understanding of the grant cycle, and they will be able to perform basic grant writing effectively and to serve as a peer-reviewer on small grant proposals. Prerequisite: Honors students only; COMP 1500 and COMP 2000. Frequency: Every Other Winter.

HONR 2020F Public Health and Health Disparities (3 credits)
This course will examine social and behavioral health disparities from a public health perspective. Topics reviewed in this course will include historical factors contributing to racial/ethnic inequalities, social determinants of health, vulnerable and at risk populations, and recent and current events, including the Flint water Crisis and disparities related to climate change. In addition, each student will have the opportunity to explore a topic of interest over the course of the semester, culminating in a final presentation. This course is discussion-based and students will be required to read, engage in critical thinking and participate in classroom activities. Prerequisite: Honors students only. Frequency: Every Other Winter.

HONR 2020G Play to Win: Research Methods for Video Game Studies (3 credits)
This course focuses on several methods for studying video games as primary objects of research. Students will play a wide selection of games across genres and platforms to better understand the scope of the medium and its media ecologies. Students will also read foundational video game studies texts, lead discussions, and produce research about games in different formats as means to participate in interdisciplinary scholarship. Tracking the development of the medium from its non-digital origins alongside exploring contributions to the field of game studies can facilitate critical awareness and responsibility in the ways we engage with video games and their sociocultural, political, and economic effects. Prerequisite: Honors students only. Frequency: Every Odd Winter.

HONR 2020H Backyard Ecology (3 credits)
Biodiversity is a desirable quality in the function and esthetic appreciation of ecosystems. Its decline is worrisome since humans rely on many “free” ecological services provided by functional ecosystems. Scientists have coined the name “Anthropocene” as the recent age in which humans have caused profound alterations to our natural world. The most significant human impacts include habitat destruction and species introductions. Establishing small spaces for wild organisms around our homes can partially offset this impact and associated loss of species from local areas. This course will introduce basic concepts of biology and ecology and encourage the exploration of urban refuges for wild organisms. The documentation of species living near human dwellings and descriptions of their contributions to local ecosystem function forms the backbone of this course. Students may choose to work on campus or near their residence to obtain the required photographic images and/or videos documenting the diversity of life at that location. A presentation at the end of the semester will summarize their findings and provide context for a better understanding of their specific altered ecosystem. Prerequisites: Honors students only. Frequency: Every Winter.

HONR 4150 Honors Travel Study (1-6 credits)
This interdisciplinary honors travel course involves academic instruction and directed learning outside of the traditional classroom. The course enables students to explore important themes and issues in specific areas of knowledge related to our diverse and interdependent world. Students work in groups under leadership of faculty and will reflect their travel experiences through the examination of art, history, science, literature, psychology, and culture. Prerequisite: Honors students only. Frequency: Infrequent.

HONR 4990 Independent Study: Honors Thesis Research (1-3 credits)
Students carry out independent research related to an approved project or honors thesis. Faculty mentoring is provided on an individual basis. Approval of faculty member, department chair, and dean of the Honors College is required. This course is an elective course and does not satisfy requirements for general education. Prerequisite: Honors students only.

HONR 4990A Independent Study: Honors Thesis Research (A) (1-3 credits)
Students carry out independent research related to an approved project or honors thesis. Faculty mentoring is provided on an individual basis. Approval of faculty member, department chair, and dean of the Honors College is required. This course is an elective course and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Upon Request

HONR 4990B Independent Study: Honors Thesis Research (B) (1-3 credits)
Students carry out independent research related to an approved project or honors thesis. Faculty mentoring is provided on an individual basis. Approval of faculty member, department chair, and dean of the Honors College is required. This course is an elective course and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Upon Request

HONR 4990C Independent Study: Honors Thesis Research (C) (1-3 credits)
Students carry out independent research related to an approved project or honors thesis. Faculty mentoring is provided on an individual basis. Approval of faculty member, department chair, and dean of the Honors College is required. This course is an elective course and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Upon Request

HONR 4990D Independent Study: Honors Thesis Research (D) (1-3 credits)
Students carry out independent research related to an approved project or honors thesis. Faculty mentoring is provided on an individual basis. Approval of faculty member, department chair, and dean of the Honors College is required. This course is an elective course and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Upon Request

HONR 4990E Independent Study: Honors Thesis Research (E) (1-3 credits)
Students carry out independent research related to an approved project or honors thesis. Faculty mentoring is provided on an individual basis. Approval of faculty member, department chair, and dean of the Honors College is required. This course is an elective course and does not satisfy requirements for general education. Prerequisite: Honors students only. Frequency: Upon Request

HONR 4990F Independent Study: Honors Thesis Research (F) (1-4 credits)
Students carry out independent research related to an approved project or honors thesis. Faculty
mentoring is provided on an individual basis. Approval of faculty member, department chair, and dean of the Honors College is required. This course is an elective course and does not satisfy requirements for general education.

HONR 4990G Independent Study: Honors Thesis Research (G) (1-4 credits)

Students carry out independent research related to an approved project or honors thesis. Faculty mentoring is provided on an individual basis. Approval of faculty member, department chair, and dean of the Honors College is required. This course is an elective course and does not satisfy requirements for general education.

HRM—Human Resource Mgmt

HRM 4160 Human Resource Management (3 credits)

Surveys personnel policies, techniques, and methods. Topics include wage and salary management, personnel selection and placement, labor relations, and employee rights. Frequency: Every Fall and Winter.

HRM 4300 Managing Workplace Diversity (3 credits)

Prepares students to manage in the diverse work place. Emphasis is on practical, experiential classroom activities designed to help students understand the range of cultural behaviors and expectations found in the work place. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

HRM 4310 Training and Development (3 credits)

Training and development are effective practices that support organizations in socialization, development, and retention of human resources. This course examines theories and practices relevant to training and development. Following the structure of the ADDIE model, the course introduces the concepts and methods used in needs assessment, training design, development and implementation, and evaluation. Popular training programs are also reviewed in terms of their relations to the organizational strategy. Frequency: Every Winter

HRM 4320 Recruitment and Staffing (3 credits)

This course focuses on the effective management of the movement of employees into and through organizations. In order to achieve a competitive advantage through human resources, organizations strive to attract, develop, and retain talent by matching them with compatible positions and assignments. The course examines concepts and administrative tools and practices staffing planning, recruitment, selection, performance management. It also discusses the legal issues related to recruitment and staffing. Frequency: Every Years, Fall

HRM 4330 Total Rewards: Compensation and Benefits (3 credits)

This course focuses on how organizations use pay systems and benefit plans as a method of attracting and retaining top talent. It also introduces and analyzes the basic concepts of compensation administration in organizations by providing an intensive study of the wage system, methods of job evaluation, wage and salary structures, and the legal constraints on compensation programs. Topics include design of pay systems, analysis and evaluation of pay systems, legally required and voluntary benefit options. Prerequisite: HRM 4160 Frequency: Every Winter

HS—Human Services

HS 1100 Social Issues and Human Services Delivery Systems (3 credits)

This course will review contemporary and historical social issues in the United States, with an emphasis on at-risk populations and disenfranchised groups. Social problems such as gangs, substance abuse, homelessness, child abuse, poverty, and immigration will be addressed, in addition to political, economic, policy, and educational implications. Systems of delivery within the human services field will be introduced and examined. Frequency: Every Fall.

HS 1200 Introduction to Human Services Administration (3 credits)

This course provides an overview of Human Services Administration as a profession. Emphasis is placed on providing familiarity with the roles and functions of Human Services workers/administrators and an examination of the factors necessary to enter the Human Services field. The course focuses on the history of helping, the human services movement, current issues related to human services, managed care, and models of service delivery. The ethical principles that guide the Human Services Administration profession will also be examined. Frequency: Every Fall.

HS 1300 Interpersonal Assessment Skills in Human Relations (3 credits)

This course provides an opportunity to learn basic skills essential for the assessment of interpersonal relations. Students will examine interpersonal dynamics and communication in families, the workplace, community organizations, and social settings. An emphasis is placed on developing skills in listening, observation, and analysis. Case studies will be used to explore a variety of presenting problems and appropriate assessment strategies. Frequency: Every Fall and Winter.

HS 1400 Counseling and Assessment in Human Services (3 credits)

Provides an overview of assessment procedures used in counseling settings including intelligence, achievement, interests, personality, observational assessments, and career. Students will consider cultural and ethical factors in determining appropriate evaluation instruments, procedure and interpretation of test data. Application of test data in human services settings will be emphasized. Frequency: Every Fall and Winter.

HS 2100 Administration of Recreational and Leisure Services (3 credits)

This course will discuss contemporary recreational therapy program organizational principles and administrative issues, such as assessment, instruction, evaluation, and supervision of staff and clients in recreational activities as part of a therapeutic/rehabilitative program. Frequency: Every Winter.

HS 3120 Grant Writing and Management (3 credits)

This course will introduce students to the purpose of grant writing and the basic components of a variety of grant applications/proposals. Students will learn how to identify an organization’s needs, locate funding opportunities, access resources, and organize team members to create a competitive grant proposal. Emphasis will be placed on developing skills needed to read and understand application guidelines, and write a successful grant proposal. Students will also be introduced to post-award procedures and grant management, including evaluation and reporting. Frequency: Every Fall.

HS 3130 Nonprofit Leadership (3 credits)

This course will equip students with a foundation in leadership through learning major leadership theories and their applications in the nonprofit sector. Students will build upon skills of decision-making, understand issues related to compliance, gain knowledge of the importance and function of community collaborations, and will be able to demonstrate ethical decision-making. Case studies that demonstrate challenges within nonprofit organizations will be discussed and analyzed. Frequency: Every Fall.

HS 3140 Fundraising and Philanthropy (3 credits)

This course examines various funding streams of nonprofit organizations, including government sources, public and private foundations, corporations, and individuals. This course explores historical issues related to philanthropy in the United States and the role of philanthropy in the nonprofit sector. Students will develop an understanding of fundraising plans, which include strategies for identifying and building relationships with potential donors. Legal and ethical issues pertaining to fundraising will be discussed. Frequency: Every Winter.

HS 3150 Strategic Planning in Human Services (3 credits)

This course will examine the strategic planning process in public and non-profit organizations. Emphasis will be placed on the theory and practice
of strategic planning and management theory in the non-profit sector. The course will cover various approaches to designing and conducting strategic planning, including involvement of stakeholders and specific techniques for conducting environmental scans, strategic issue identification, strategy formulation. Frequency: Every Winter.

HS 3300 Ethical and Professional Issues in Human Services (3 credits)
This course provides a basic overview of the legal and ethical issues associated with the human services profession. A case study approach will be applied to provide a variety of realistic situations to illustrate potential ethical challenges and dilemmas. In addition, students will gain familiarity with the ethical standards of the American Counseling Association, the American Psychological Association, and related professional organizations. Frequency: Every Fall.

HS 3315 Human Services and Cultural Diversity (3 credits)
This course will examine the role of cultural diversity in human services/helping professions and will allow students the opportunity to increase self-awareness with regard to worldviews and personal beliefs about diversity issues. Key aspects of cultural competency will be reviewed including its history, definitions, and selected conceptual models, in addition to its relevance and importance in the development and administration of human services organizations. Frequency: Every Fall and Winter.

HS 3330 Human Behavior and the Social Environment (3 credits)
This course will examine theories of how the environment affects human behavior. Interactions between individuals and groups of people, impact of culture and society on one's values, perceptions of the world, and beliefs will be explored. Additionally, influence of gender, sexual orientation, religion, spirituality, and socioeconomic class, on perceptions, experiences, and development across the lifespan will be discussed as well. Students will have the opportunity to self-reflect on how the multiple dimensions of the environment impacts their behavior and how it makes sense in context. The application of theoretical frameworks, such as the ecological model, to assessment and intervention practices in social work will also be examined. Frequency: Every Fall and Winter.

HS 3340 Interviewing and Assessment (3 credits)
Social workers use interviewing skills to develop and foster therapeutic relationships with their clients, gather information, and facilitate change. This course is designed to teach basic interviewing techniques, including active listening, observation, interpretation, and communicating empathy. In addition, students will learn mental health diagnostic codes, and assessment writing skills and techniques. The course will also address issues in cross-cultural interviewing and in specific problematic interview situations. Frequency: Every Winter and Summer.

HS 3350 Social Work Practice (3 credits)
This course will prepare students for practice in the field of social work through developing a wide range of skills needed for generalist social work practice. Students will develop interviewing skills, listening skills, and learn how to create an alliance and co-collaborate goals with clients. Additionally, students will gain an understanding of ethical standards in social work practice, learn the stages of the helping process, and identify common methods of assessment. Contextual variables will be examined, such as environmental and interpersonal stressors. Overall, students will gain knowledge and build upon skills that assess and provide assistance for individuals, families, groups, and communities. Frequency: Every Winter and Summer.

HS 3410 Case Management Methods (3 credits)
Students will explore case management practice from intake to termination including completing an initial interview, dealing with difficult topics, receiving and releasing information, preparing a plan of service, documentation, and termination. Topics to be explored include a theoretical approach to case management, cultural competence, resources and referrals, and creating a treatment plan in accordance with best practices. Frequency: Every Fall.

HS 3420 Advocating for Individuals with Special Needs (3 credits)
Advocating for Individuals with Special Needs: (3 credits) This course focuses on teaching students principles and strategies of advocacy for individuals with special needs in a variety of settings, including agency, legislative, legal, and community. Included are such topics as ethics in advocacy, important related laws, types of services available, how to find services, and strategies for advocacy. Frequency: Every Winter.

HS 3430 Special Topics in Advocacy (3 credits)
This class is designed for exploring contemporary issues and topics in advocacy. An overview of the impact of government policies on families and contemporary American social services will be provided. Students will learn how to assess the effectiveness of policies and programs from a family perspective, learn about the policy-making process, and critically examine different roles professionals can play in influencing policy development. In addition, awareness on a range of social issues, such as poverty and homelessness, disabilities, mental illness, and racial and gender inequality will be covered. This course will allow students to assess and develop their personal leadership, while emphasizing the values, knowledge, and skills required for effective advocacy. Frequency: Every Winter and Summer.

HS 3440 Assessment and Treatment Planning (3 credits)
This course examines all the components that are essential when completing assessments and treating plans. Methods used to screen and evaluate clients? needs, issues, strengths, and weaknesses through various techniques are examined and then tied to the treatment planning process. Understanding the client in context and use of referrals and resources is discussed. Proper documentation of assessment and treatment planning, as well as ethics involved, will be examined as well. Frequency: Every Fall.

HS 3500 Introduction to Human Factors in Aviation (3 credits)
This course examines the effects of human factors on the aviation industry; namely, how human behaviors affect flight safety, planning, problem solving, resource management, organization, and communication. Students will explore how these variables are impacted by the ability to recognize and manage stress and will have the opportunity to learn anxiety reduction strategies to enhance effective decision-making in the cockpit. Emphasis will be placed on understanding the steps necessary for good judgment and developing decision-making skills to mitigate risk. Students will also gain an understanding of human factors in aviation within the changing landscape of the aviation industry and public policy related to aviation. Frequency: Every Fall and Winter.

HS 3510 Systems Analysis of the Impact of Human Factors on Decision Making in Aviation (3 credits)
This course is designed to ground students in the fundamentals of cockpit management. Specifically, students will be oriented to the principles of aerodynamics, airplane control, and flying rules and regulations. Considerations and steps in aircraft inspection and maintenance, in addition to cockpit orientation and the basic tenets of cockpit management will be covered. Students will be introduced to pre- and post-flight procedures, in addition to aircraft and environmental considerations through take-off, flight, and landing. Emphasis will be placed on human factors impacting cockpit management, including physiological and psychological mechanisms. Basic emergency procedures are also covered. Frequency: Every Fall and Winter.

HS 3520 Strategic Forecasting & Evaluation of Human Performance Factors in Aviation (3 credits)
This course provides students with advanced instruction on factors affecting cockpit/flight management. Topics include managing aircraft systems in a variety of environments, flight
planning, communications, navigation, laws and rules related to private aviation, and orientation to in-flight environmental considerations unique to flight. Prerequisite: HS 3510. Frequency: Every Fall and Winter.

HS 3530 Integration of Technical Foundations of Flight Management (3 credits)
In this course, students will gain Instrument Flight Rules (IFR) training. This training will enable students to develop proficiencies in using the aircraft’s instruments and navigational equipment. Organization and planning are emphasized to effectively combine the information from charts, plates, radios and ATC. Furthermore, this course will provide students with an understanding of instrument management through take-off, flight, and landing while simultaneously exploring the human factors that affect each phase of flight. Examines in detail how human factors such as stress, emotion, attention management, health/physiology, and human psychology impact cockpit management. Advanced strategies for monitoring and modulating human factors are also discussed. Case examples will be utilized to further students understanding of how mistakes could have been avoided or have been avoided in the aviation industry. Prerequisite: HS 3520. Frequency: Every Winter.

HS 3540 Application of fundamental Competencies in Commercial Aviation (3 credits)
The Commercial License course examines in greater depth and breadth flight management by analyzing issues and topics unique to commercial aviation. This course is designed to develop the student’s advanced aeronautical knowledge and skill in the operation of complex airplanes to a level commensurate with safe operations as a commercial pilot. Topics include management of commercial aircraft systems in a variety of environments, commercial flight planning, laws and rules governing commercial aviation, and the development of skills needed to communicate and navigate commercial flights. Prerequisite: HS 3530. Frequency: Every Fall and Winter.

HS 3550 Leadership Principles & Effective Communication in Flight Instruction (3 credits)
The Certified Flight Instructor course provides students with the fundamentals of flight instruction. Specifically, the objective of this flight training course is to develop in each student adequate instructional knowledge and skill in the procedures and pilot operations needed to safely exercise the privileges of a certified flight instructor certificate with an airplane - single-engine rating. The course examines flight management while simultaneously educating students in the skills necessary to teach others how to fly. Topics include human learning, memory, and motivation; teaching and supervisory methods; overcoming barriers to effective communication; professionalism; and lesson planning. Prerequisite: HS 3540. Frequency: Every Fall and Winter.

HS 3990 Supervised Experience in Human Services (3 credits)
This field experience will be individually arranged and will provide supervised on-site experience (175 hours). Students are expected to propose three agencies in the human services field and will complete their field experience in one of these. These experiences will provide an in-depth look at the operations and organization of human services agencies, program development and evaluation, fundraising and issues faced by human services organizations in changing economic and political climates and will be supervised by NSU faculty on a weekly basis. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Fall and Winter.

HS 4100 Rehabilitation Principles and Case Management (3 credits)
The purpose of this course is to study the progression of rehabilitating individuals with disabilities in our society today. The relationship that exists among the different agencies and entities in the rehabilitation process will be highlighted and emphasized along with factors that facilitate or hinder the collaborative process. Principles and current practices in the process of rehabilitation will be introduced. These may include: the goals and models of case management in rehabilitation, client/consumer interviewing and assessment, planning for appropriate and effective intervention strategies, services, and benefits included in a rehabilitation plan, monitoring & evaluation of client progress, and follow up and closure. Frequency: Every Winter and Summer.

HS 4200 Accountability in Human Services Administration (3 credits)
This course provides an overview of the concept of accountability in Human Services Administration. Students will be introduced to the many ways individuals and agencies are held accountable (i.e., financially, legally, ethically) and the roles stakeholders serve in human services organizations. Special emphasis will be placed on strategies to ensure legal and ethical practices, and to maintain compliance with oversight agencies (i.e., accrediting bodies, grantors, ethical oversight committees, etc.). Frequency: Every Winter.

HS 4250 Program Planning and Evaluation (3 credits)
This course provides an overview of the competencies necessary to critically plan, implement and evaluate human service programs. Relevant program evaluation models are reviewed and a primer of quantitative and qualitative research methods is provided. Data collection techniques and the ethics and standards of evaluation practice are also covered. Social and human service trends relevant to program planning are also addressed in order to assist in the development of human service programs to meet future societal needs. Frequency: Every Winter.

HS 4800 Directed Study in Applied Human Services I (3 credits)
Students work collaboratively with faculty to create an applied learning experience in the human services. This experience will provide an in-depth look at the operations and organization of human services agencies, program development and evaluation, ethics, communication, supervision, and the myriad issues faced by human services organizations in changing economic and political climates. Students will be supervised by NSU faculty on a weekly basis. Frequency: Every Fall.

HS 4850 Directed Study in Applied Human Services II (3 credits)
Students work collaboratively with faculty to create an applied learning experience in the human services that builds on the experience and knowledge gained in HS 4800 Directed Study in Applied Human Services I. This experience will provide an in-depth look at the operations and organization of human services agencies, program development and evaluation, fundraising and issues faced by human services organizations in changing economic and political climates and will be supervised by NSU on a weekly basis. Prerequisites: HS 3990 or HS 4800 and Approval by the program. Frequency: Every Winter.

HS 4995 Supervised Experience in Human Services II (3 credits)
The second component of the field experience will be individually arranged as well and will provide supervised on-site administrative experience (175 hours). Students will select their second choice of Community Based Organization (CBO) and will complete their field experience in this site. These experiences will now provide a hands-on implementation of principles and theory learned as it relates to nonprofit systems, program development and evaluation, fundraising, finance and budget issues faced by nonprofit organizations along with factors that impact change in economic and political climates. Students will be supervised by NSU faculty on a weekly basis. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

HUMAN—Humanities
HUMN 1000A Aristotle’s Nicomachean Ethics (1 credits)
This one-credit seminar course will introduce students to one of the most widely read and influential works of moral philosophy in the
western tradition, Aristotle's Nicomachean Ethics. No previous preparation is presupposed. Pass/Fail Only. Frequency: Odd Year Fall.

HUMN 1000B Dante's Inferno (1 credits)
The one-credit seminar course will examine the Inferno, the first and perhaps most well-known section of Dante Alighieri's Divine Comedy. Themes of study will include Dante's religious theories and cosmological philosophy, the motivations, religious and cultural, behind Dante's conceptions of sin and punishment, and the influence that Dante's ideas have had on subsequent writers, thinkers, and the general public. No previous preparation is presupposed. Pass/Fail only. Frequency: Even Year Fall.

HUMN 1000C Eliot's Middlemarch (1 credits)
This one-credit seminar course will introduce students to the social and cultural milieu of the Victorian period, through one of the most widely read and influential novels in English literature, George Eliot's Middlemarch. No previous preparation is presupposed. Pass/Fail only. Frequency: Even Year Winter.

HUMN 1000D Austen's Emma (1 credits)
This one-credit seminar course will introduce students to the late eighteenth century author, Jane Austen, and one of the most widely read and influential novels in English literature, Emma. No previous preparation is presupposed. Pass/ Fail only. Frequency: Odd Year Winter.

HUMN 1000F Cervantes' Don Quixote (1 credits)
The novel, Don Quixote, by Cervantes, is probably one of the world's most influential and recognized books ever written. The exchanges between the novel's two main characters, Don Quixote and Sancho Panza, will engage students in a story that, while entertaining, makes very profound statements about medieval society, politics, and values. From a critical perspective, the novel occupies a seminal position in the development of modern writing. Through his novel Cervantes reveals the fascination with narrative processes and techniques that have made him an inspiration for many writers of our time. No previous preparation is presupposed. Pass/Fail only. Frequency: Odd Year Fall.

HUMN 1000G Shelley's Frankenstein (1 credits)
This one-credit seminar course will examine Mary Shelley's Frankenstein, one of the most seminal works of world literature. Themes of study will include the influence of Shelley’s parentage and marriage on her work, scientific theories of the 19th century that influenced the novel, issues of human heroism and frailty, and the ethical concerns that transcended Shelly's own time period. Consideration will also be given to the various ways that the Frankenstein story has manifested itself in popular culture up through the modern era. No previous preparation is presupposed. Pass/fail only. Frequency: Even Year Fall.

HUMN 1000I Hume's Enquiry (1 credits)
This one-credit seminar course involves a close reading of a seminal work in early modern philosophy, David Hume's An Enquiry Concerning Human Understanding. No previous preparation is presupposed. Pass/fail only. Frequency: Even Year Winter.

HUMN 1000J Descartes’ Meditations (1 credits)
This one-credit seminar course involves a close reading of a seminal work in early modern philosophy, Descartes’ Meditations on First Philosophy. No previous preparation is presupposed. Pass/fail only. Frequency: Odd Year Winter.

HUMN 1000K Woolf's Mrs. Dalloway (1 credits)
This course examines Virginia Woolf’s classic novel, Mrs. Dalloway, in light of The Hours, the film adaptation based on Michael Cunningham’s re-working of the Dalloway novel. The course will explore Woolf’s pioneering use of stream of consciousness/interior monologue, as well as the feminist and existential themes at the heart of Woolf’s artistic vision. Comparing it to The Hours encourages students to recognize the enduring values of a classic work within a contemporary frame. No previous preparation is presupposed. Pass/fail only. Frequency: Odd Year Fall.

HUMN 1000M Nietzsche's Beyond Good and Evil (1 credits)
This one-credit seminar course will introduce students to one of the most widely read and influential works of philosophy in the western tradition, Nietzsche's Beyond Good and Evil. No previous preparation is presupposed. Pass/Fail only. Frequency: Even Year Fall.

HUMN 1000N Plato's Apology (1 credits)
This one-credit seminar course will introduce students to one of the most widely read and influential works of philosophy in the western tradition, Plato’s Apology. No previous preparation is presupposed. Students will be graded on a pass/fail basis only. Frequency: Odd Year Winter.

HUMN 1000Q Plato’s Phaedo (1 credits)
This one-credit seminar course will introduce students to one of the most widely read and influential works of philosophy in the western tradition, Plato’s Phaedo. No previous preparation is presupposed. Students will be graded on a pass/fail basis only. Frequency: Odd Year Fall.

HUMN 1200 Introduction to World Religions (3 credits)
This course provides an introduction to significant forms of religion around the world, including Hinduism, Buddhism, Confucianism, Taoism, Shinto, Judaism, Christianity, and Islam, as well as tribal religious traditions and beliefs. The course will focus on the historical development of these faiths, as well as look at the worldview of each of these traditions, to develop a better understanding and appreciation for the diverse religious traditions of the world. Frequency: Every Fall.

HUMN 1995 Prior Learning in Foreign Language (1-12 credits)
This course number and prefix indicate award of lower-level undergraduate prior learning credit in foreign language. This course is repeatable up to 12 credits.

HUMN 2200 Introduction to Medical Humanities (3 credits)
This course provides students with an opportunity to explore the relationship between medicine, medical practice, and two or more disciplines within the humanities: the arts, philosophy, history, literature, and cultural studies. Students will assume an active role in discussions, presentations, and other aspects of the course. Prerequisite: COMP 1500. Frequency: Every Fall.

HUMN 2300 Introduction to World Mythology (3 credits)
This course provides a broad overview of myths from various geographic areas and historical periods, including Egyptian, Mesopotamian, Greek, Roman, Celtic, Germanic, Asian, North and South American, African and Australian traditions. The course emphasizes the importance of myth in world cultures. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Even Year Fall.

HUMN 2350 Introduction to Folklore (3 credits)
This course explores various definitions of folklore, focusing on the ways that literature, art, music, performance, and religion all contribute to a culture. Students will be exposed to multiple storytelling techniques and how the many disciplines included in the study of folklore can be understood as forms of narration that tell the story of a culture’s evolution. Folklore of different ethnographic backgrounds will be covered, including modern American folklore. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Odd Year Fall.

HUMN 2400 Introduction to Celtic Studies (3 credits)
This course provides an introduction to the...
languages, literatures, history, art, mythology and cultures of the Celtic peoples of Europe, from ancient Gaul, Britain and Ireland to the 21st century. Prerequisites: COMP 1500 or COMP 1500H. Frequency: Odd Year Fall.

HUMN 3010 Communication Traditions (3 credits)
This course addresses the role of argument and communication in public discourse. Students will become intelligent consumers of public discourse through learning the traditions of the art of communication from ancient times through the present. Students will study compelling speakers and speeches from rhetorical and philosophical viewpoints. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Odd Year Winter.

HUMN 3300 Native American Myth and Storytelling (3 credits)
This course will investigate traditional Native American and Inuit (Eskimo) oral narratives, including tales of shamans (medicine men) and tricksters, warriors and corn goddesses. The material will be studied from both native and scholarly perspectives. Students will be exposed to local Native American (i.e. Seminole and Miccosukee) traditions in the course. Prerequisites: HUMN 2300 or HUMN 2350 and COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Even Year Winter.

HUMN 3400 The Beat Generation (3 credits)
This course is a study of the literature, film, and music of the “Beat Generation,” a diverse group of artists and writers active in the early 1950s in America, who challenged the status quo in America’s literary scene, as well as the social and political conservatism of post-war America. Prerequisite: COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Even Year Fall.

HUMN 3610 The Harlem Renaissance (3 credits)
This course will examine the Harlem Renaissance, the period from the end of World War I and through the middle of the 1930’s Depression, during which African-American artists produced a body of work in the graphic arts, poetry, fiction, drama, essay, music, particularly jazz, spirituals and blues, painting, dramatic revues, and others. The notions of racial consciousness will be explored, as well as the common themes of alienation, marginalization, the use of folk material, the use of the blues tradition, and the problems of writing for an elite audience. Prerequisite: COMP 2000, COMP 2010, COMP 2020 or COMP 2000H. Frequency: Odd Year Winter.

HUMN 3800 Mexican Cult of Death in Myth and Literature (3 credits)
This course examines the Mexican Cult of Death as an ubiquitous theme in Mexican arts and letters. Prerequisites: One ARTS, FILM, HIST, HUMN, LITR, or PHIL course; and COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Odd Year Fall.

HUMN 3995 Prior Learning in Foreign Language (1-12 credits)
This course number and prefix indicate award of upper-level undergraduate prior learning credit in foreign language. This course is repeatable up to 12 credits.

HUMN 4100 Death and Dying (3 credits)
A multidisciplinary examination of significant topics related to the process of dying and death, such as changing western attitudes toward death, problems and solutions that may arise for those experiencing the dying process (including the dying, family, and friends), the grieving process, and non-western approaches to death and dying. Prerequisites: one ARTS, HIST, HUMN, FILM, LITR, PHIL, or THEA course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Fall and Winter.

HUMN 4200 Asian Thought (3 credits)
An introduction to the fundamental teachings of significant religious and philosophical systems of Asia, offering a broad overview of such topics as Wu Wei, karma, reincarnation, impermanence, the nature of the mind, the paths of enlightenment, and basic practices such as meditation and compassionate action. Prerequisites: one ARTS, FILM, HIST, HUMN, LITR, PHIL or THEA course; and COMP 2000, COMP 2010, or COMP 2020. Frequency: Every Winter.

HUMN 4310 The Vampire (3 credits)
This course investigates the development of the vampire tradition in Eastern and Western myth and legend; 19th and 20th century literary and artistic representations of the vampire; and psychological and medical explanations of the phenomenon. Prerequisites: one ARTS, HIST, HUMN, LITR, PHIL, or THEA course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Winter.

HUMN 4400 Issues in Latin American Development and Sustainability (3 credits)
In this course, theory and history are combined in an attempt to understand the various forces that have shaped development in Latin America, past, present and future. We start by examining divergent theories of development and their applications to the region. The historical roots of modern institutions are explored. The course then turns to the modern political and economic challenges confronting the region. The role of the state, the market, and the informal sector in the development process will be debated, as well as the prospects of reform and sustainable development in the future. Prerequisites: COMP 2000 or 2020 and INST 1500 or HIST 2130 or HIST 2140. Frequency: Odd Year Winter.

HUMN 4900 Special Topics in the Humanities (3 credits)
Advanced studies in selected cross-disciplinary areas of the humanities, including such topics as comparative religion, death and dying, or popular culture. Specific focus to be announced. May be repeated once for credit, if content changes and with written consent of division director. Prerequisites: one ARTS, FILM, HIST, HUMN, LITR, PHIL, or THEA course; and COMP 2000, COMP 2010, or COMP 2020 or ARTS 2300H or HIST 1030H or HIST 1040H or PHIL 3180H. Frequency: Every Year Winter.

HUMN 4950 Internship in the Humanities (1-12 credits)
A 10-20 hour per week field or work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisite: cumulative GPA of 2.5 or higher; completion of 60 or more credit hours, and permission of division director. Frequency: Every Fall and Winter.

HUMN 4990 Independent Study in Humanities (1-6 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisites: one ARTS, HIST, HUMN, LITR, or PHIL course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H or ARTS 2300H or HIST 1030H or HIST 1040H or LITR 2011H or LITR 2021H or LITR 2030H or LITR 2031H or PHIL 3180H. Frequency: Every Fall and Winter.

IENG—Industriall & Syst Eng
IENG 3010 Principles and Methods of Industrial and Systems Engineering (3 credits)
Topics in this course include systems engineering methodologies, and processes; conceptual system design; testing; design review; multiple criteria decision designs; and design for reliability. Introduces engineering management and organization principles, team building, leadership, motivation, and quantitative decision making. Prerequisite: GENG 2000. Frequency: Every Fall.

IENG 3060 Systems Optimization (3 credits)
Introduces mathematical tools applied to system optimization, including problem formulation, identification of decision variables, use of graphical methods, linear programming, concepts of duality, and sensitivity analysis. Applications include transportation, network analysis, project management and other engineering areas. Prerequisites: MATH 2200 and MATH 4500. Frequency: Every Winter.

IENG 4010 Work Measurement and Human Factors (3 credits)
Topics in this course include work place design
and analysis: Human information processing, motor skills, hand tool designs, biomechanics, and work-related injuries. Work measurement, motion analysis, human interface design and response. In addition, muscle fatigue analysis will be utilized as a quantitative method for ergonomic assessment. Prerequisites: GENG 2050 and GENG 3000. Frequency: Every Fall.

IENG 4020 Analysis of Production Systems and Facility Design (3 credits)
Topics in this course include tools and approaches for design and analysis of production systems including strategy, aggregate planning, inventory, location, layout, scheduling, forecasting, and production control systems. Prerequisites: GENG 2050 and GENG 2070 and GENG 3000. Frequency: Every Fall.

INDS 2901 Interdisciplinary Reading Seminar (1 credits)
The interdisciplinary studies reading seminar is designed to provide focused study on one selected text. Under faculty leadership, INDs students will read and discuss the text in small groups. Students will take a leadership role to prepare discussions. Texts will be selected on a semester-by-semester basis with a view to the highlighting an interdisciplinary approach to our understanding of our world and the society we live in. Instructors will use debate and discussion around the reading to help students select the minor concentrations they wish to pursue for the major. Prerequisite: None. Frequency: Every Fall and Winter.

INST—International Studies
INST 1500 Global Issues (3 credits)
This course examines some of the increasingly complex and diverse issues confronting humanity. It examines the great diversity of opinion that people hold on important global issues, such as population, natural resource utilization, development, human rights, and values. Students may not receive credit for both INST 1500 and GLBS 1500. Experiential Education and Learning (ExEl); Successful completion of this course satisfies 1 ExEl unit. Frequency: Every Fall and Winter.

INST—International Business
INB 3550 International Business (3 credits)
Surveys the legal and cultural environment of international business; the international financial system; management of international operations; personnel and labor relations; international marketing; international economics, trade, and finance; multinational enterprise; and international accounting. Prerequisite: ECN 2025. Frequency: Every Fall and Winter.

INB 2000 International Political Economy (3 credits)
This course is an examination of the intersection of the political and economic worlds. Although these worlds are often presented as self-contained spheres, the reality is that politics and economics are inherently intertwined. This course focuses on the post-World War II era and the processes often described as “globalization.” We begin by introducing the competing theoretical perspectives that scholars and policymakers use to understand and explain international political economy. We will also identify and examine the roles that the three main actors (states, markets, and corporations) play in our increasingly globalized world and how their roles have shifted and changed since 1945. Throughout the course we will focus on several larger themes concerning international political economy, including the following: What exactly do we mean by “globalization”? What role have states and corporations played in facilitating globalization? What institutions have been created to implement and manage globalization? And perhaps most important: Who have been the winners and losers under globalization? Frequency: Every Year Winter

INB 4300 Export/Import Trade (3 credits)
Studies the management of the export/import department, including government regulations affecting imports; financing, insuring, transporting, and marketing of exported or imported raw materials and finished products; methods of purchasing foreign products and selling domestic goods abroad; joint marketing; licensing; and distributor relations. Prerequisite: MKT 3320. See Department Chair. Frequency: Fall.

INB 4970 Disparities in Health: Examining the Impact of Culture and Ethnicity (3 credits)
This course introduces students to skills and insights necessary in promoting health in diverse populations. Issues discussed include the need for effective communication; understanding of cultural factors and how they impact preventive efforts; and health care status and utilization patterns on the health care system and expenditures. The course also explores traditional modalities of health maintenance among various populations. Frequency: Every winter

INB 4990 Independent Study in International Studies (1-12 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisites: One INST course and COMP 2000, 2010, or 2020. Frequency: Every Fall and Winter.
ISMO 3660 Management Information Systems (3 credits)
As technology continues to change the way organizations do business, knowledge of MIS is critical. This course illustrates how organizations use information systems to solve business problems every day, discussing the use of computers in business, as well as database management and information system fundamentals. Frequency: Every Fall and Winter.

LED—Leadership

LED 3000 Introduction to Leadership (3 credits)
Welcome to Introduction to Leadership! This course is designed to introduce students to major leadership concepts and demonstrate effective application of the theoretical knowledge to real world business environment. Upon the completion of the course, students are expected to develop a comprehensive knowledge of leadership principles and acquire an understanding of current challenges and opportunities associated with this particular competency. Through interactive discussions, case analysis and practical applications, students will develop a working knowledge of relevant leadership skills and behaviors. Frequency: Every Fall and Winter.

LED 3200 Creativity and Work Performance (3 credits)
This course will address the tools and techniques that individuals and organizations use to increase their creative capacity and work place applications. The focus will be on creative behaviors and the value creativity brings to all types of organizations from entrepreneurial businesses to large companies, from hospitals to law offices, from solo practitioners to government agencies and not for profits. Creative leaders such as Steve Jobs, Robert Johnson and Marissa Mayer will be discussed. The influence of both individual and team creativity on organization success will be considered. The course will be offered in a seminar format and will include many experiential learning activities, including work at an international innovative company. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

LED 4300 Situational Leadership (3 credits)
This course presents the concepts of leadership style and follower readiness using the Situational Leadership model developed by Paul Hersey. The importance of matching leadership style with follower readiness through a task-specific diagnosis is also presented. Situational Leadership will aid students in appreciating how their own leadership style affects others whenever they try to influence anyone within their organizations or in other aspects of their lives. Prerequisite: LED 3000 or RAZR 3000. Frequency: Every Fall.

LEGSS—Legal Asst/Paralegal

LEGSS 1150 Introduction to Law and the Legal Profession (3 credits)
Topics will include the structure and decisional processes of the American legal system, sources of law, methods of dispute resolution, the roles of the attorney and the legal assistant, legal analysis, interviewing techniques and ethics for legal assistants. This course is not required for those students who have taken LGST 2500. Frequency: Every Fall and Winter.

LEGSS 2100 Legal Research and Writing I (3 credits)
Students will study primary and secondary sources of law, obtain legal research and writing skills, learn how to use a law library, and obtain computer-assisted legal research training. Frequency: Every Fall.

LEGSS 2200 Computer Applications for the Legal Profession (3 credits)
Theory and application of programs for computers that are used in the legal profession. Hands-on experience with microcomputers and specialized software utilized by the legal profession. Frequency: Every Winter.

LEGSS 3050 Criminal Law and Procedure (3 credits)
This course covers the study of both substantive criminal law and criminal procedure for the paralegal student. Students will learn the elements of major crimes and defenses. Students also will examine the constitutional aspects of criminal procedure, including searches, seizures and arrests; interrogation; the pretrial process; trial; sentencing; and appeal. Prerequisite: LEGS 1150 or LGST 2500. Frequency: Every Winter.

LEGSS 3260 Real Estate Practice I (3 credits)
Topics will include interests in real property, contracts, deeds, mortgages and other encumbrances, mortgage foreclosures, title searches, title insurance, and leases. Students will prepare closing documents for a residential real estate transaction. Prerequisite: LEGS 1150 or LGST 2500 or MGT 2150. Frequency: Every Fall.

LEGSS 3300 Torts and Civil Litigation (3 credits)
This course covers tort law, including such topics as intentional torts, negligence, strict liability, products liability, defamation, and defense to torts. Students also will examine the civil litigation process, including evidence, the rules of civil procedure, discovery, jury selection, and pre-trial work. Students will prepare pleadings and pre-trial discovery. Prerequisite: LEGS 1150 or LGST 2500. Frequency: Every Fall.

LEGSS 3360 Wills, Trusts, and Estates I (3 credits)
Topics will include intestacy, wills, trusts, living wills, will substitutes, probate, estate administration, and estate and gift taxes. Students will prepare wills and estate administration documents. Prerequisite: LEGS 1150 or LGST 2500. Frequency: Every Winter.

LEGSS 3400 Business Relations and Organizations (3 credits)
Topics will include contracts (the essential elements, defenses to enforceability, third party beneficiaries, and assignments), the Uniform Commercial Code, sole proprietorships, general and limited partnerships, and corporations. Prerequisite: LEGS 1150 or LGST 2500. Frequency: Every Winter.

LEGSS 3550 Family Law (3 credits)
Topics will include prenuptial and postnuptial agreements, marriage, dissolution, equitable distribution, alimony, shared parental responsibility, child support, property settlement agreements, adoption, and paternity and juvenile law. Prerequisite: LEGS 1150 or LGST 2500. Frequency: Every Fall.

LEGSS 3600 Federal Privacy Law (3 credits)
As information technology advances, the legal issues surrounding information privacy, data collection, data retention, data access, and data disclosure grow increasingly complicated. This course will explore information privacy and security issues arising from technological change and resulting shifts in societal perceptions of individual privacy, including how private and government actors electronically gather data, what type of data is gathered (personally identifiable information, biometric data, geolocation data, intimate personal details), and how such data is compiled, shared, bought, and sold across private industry data platforms and government electronic databases. The course overviews the current legal regime in the United States meant to address such issues.

LEGSS 3601 Introduction to Intellectual Property (3 credits)
This course will survey the protection of proprietary rights in inventions, writings, creative expression, trade secrets, and other intangible intellectual right by federal patent, copyright, trademark and unfair competition law, publicity rights, and by state trade secrecy and unfair competition law. Intangible assets have become some of the most valuable assets of corporate and nonprofit enterprises. These regimes shape primary research for education, science, and industry. A central theme will be the challenges to traditional legal paradigms posed by new science and technology and the shift to an information-based economy.

LEGSS 3602 Social Values for Law, Science, and Technology (3 credits)
This course presents law as an evolving social institution, with special emphasis on the legal regulation of business, science, and technology in the context of social values. It considers
basic concepts of law and legal process, in the U.S. and other legal systems, and introduces the fundamentals of rigorous legal analysis. Topics include legal, ethical, and moral issues in software development, advertising and pricing; financial management; corporate responsibility; product safety; and decision-making across borders and cultures.

LEGS 3603 Electronic Commerce and Digital Trade (3 credits)
The course will explore the structure, electronic commerce, online payment systems, and Internet-of-Things products and services. Topics will include the legal, regulatory and policy implications of internet commerce, marketing, sales, distribution, digital currencies, online payment systems, and social interaction. The legal policy framework governing the overlapping jurisdiction of state laws, FTC regulations, international treaties, and related governance of business on the Internet and through digital technologies.

LEGS 3604 Cyber Law and Modern Mass Communications Policy (3 credits)
This course will explore the development, regulation and governance of the Internet as a transnational, content, distribution and communications platform. Topics will include the legal, regulatory and policy implications of internet communications, social interaction in the U.S. and abroad. The legal and policy framework governing privacy, free speech, social media, national security, copyright, trademark, network ownership and access, private versus public regulation of cyberspace, jurisdiction and related topics will be examined to provide a foundational basis for contextualizing the legal intersections in our electronic lives.

LEGS 4050 Advanced Practices in Criminal Law (3 credits)
This course is designed to expand on the knowledge gained in the student’s study of Criminal Law. It will review past landmark cases as well as current criminal cases faced by the courts and counsel. The course will evaluate the criminal cases from an historical and Constitutional background to include the rights and procedures when charging a person with a crime, procedural rights and protections at trial, and post-conviction rights. Students will interpret and justify legal arguments from both the prosecution and defense perspective. The course will also identify a variety of Criminal Law issues including: forensic evidence, sentencing, ethics, the death penalty, and recent case law applied in the criminal justice system. Prerequisites: LEGS 1150 or LGST 2500; and LEGS 2100 or LGST 4000; and LEGS 3050. Frequency: Even Year Winter.

LEGS 4060 Debtor and Creditor Relations (3 credits)
Topics will include the following: the bankruptcy process and alternative remedies; secured parties under the Uniform Commercical Code; judgment liens; locating debtors’ property; enforcement of judgments by way of garnishment, attachment, and replevin; and exempt property. Prerequisites: LEGS 1150 or LGST 2500. Frequency: Even Year Fall.

LEGS 4110 Legal Research and Writing II (3 credits)
This course will commence with a review of all basic primary and secondary sources. Florida research tools and special topical reference materials will also be covered. Advanced training in computer-assisted legal research will be provided. Legal writing will be emphasized. There will be a variety of written work ranging from everyday correspondence to memoranda of law. Prerequisites: LEGS 2100 or LGST 4000. Frequency: Every Winter.

LEGS 4270 Real Estate Practice II (3 credits)
Topics will generally be chosen from among the following: title problems, mortgage foreclosures, landlord-tenants, commercial real estate transactions, condominiums, construction liens, and environmental matters. Prerequisites: LEGS 3260. Frequency: Every Fall.

LEGS 4310 Advanced Litigation (3 credits)
This course will commence with a review of all basic primary and secondary sources. Florida research tools and special topical reference materials will also be covered. The following topics under the Florida Rules of Civil Procedure will be covered: pleadings, service of process, parties, default, dismissals, discovery in all of its forms, the trial stage, judgments, and post-judgment relief. Students will work on civil cases in several areas of law, where they will apply many of the procedural rules that they have studied. Prerequisites: LEGS 3300. Frequency: Every Fall.

LEGS 4370 Wills, Trusts, and Estates II (3 credits)
Topics will generally be chosen from among the following: probate litigation, mechanisms to transfer property, will and trust drafting, homestead, and federal estate and gift tax system, the Florida estate tax, and preparation of federal estate and gift tax returns. Prerequisites: LEGS 3360. Frequency: Every Winter.

LEGS 4410 Corporate Regulation and Change (3 credits)
Topics will include the following: capitalization, debt and equity financing, federal and state securities regulation, mergers, asset and stock acquisitions, reorganizations, and drafting corporate documents. Prerequisites: LEGS 1150 or LGST 2500; and LEGS 2100 or LGST 4000; and LEGS 3400. Frequency: Every Winter.

LEGS 4470 Emerging Technologies and the Legal Profession (3 credits)
This course covers emerging technologies and their impact on the legal profession. Topics covered will include an overview of the Internet, conducting legal research on the Internet, electronic filing with government agencies and the courts, “non-legal” Web sites with legal-specific applications, using email in law practice, legal trends on the Internet, ethical issues pertaining to emerging technologies, and law as applied to computers and other technology. Prerequisites: LEGS 1150 or LGST 2500. Frequency: Even Year Fall.

LEGS 4560 Elder Law (3 credits)
Topics will include the following: incapacity; types of guardians; guardianship practice and procedure; alternatives to guardianships, such as durable powers of attorney, trusts, health care surrogates, and representatives payers; government benefits such as Social Security, Medicare, and Medicaid; and housing options such as “reverse mortgages,” life care contracts, adult congregate living facilities, and nursing homes. Prerequisites: LEGS 1150 or LGST 2500; and LEGS 2100 or LGST 4000. Frequency: Odd Year Fall.

LEGS 4600 Pleadings and the Courts (3 credits)
This advanced course focuses on the paralegal’s role in discovery procedure and trial practice as it relates to civil and criminal actions through a transactional approach. The course will focus on state rules of civil and criminal procedures in the drafting of legal pleadings required for each area of the law. Students will be involved in preparing materials for a hypothetical trial. Prerequisites: LEGS 1150 or LGST 2500; and LEGS 2100 or LGST 4000. Frequency: Odd Year Winter.

LEGS 4700 Immigration Law (3 credits)
This course provides students with a foundation in the underlying policies and basics of immigration and nationality law. Topics include immigrant and nonimmigrant visa categories, citizenship and nationality, removal proceedings, and asylee and refugee status. Emphasis is placed on applying legal principles to practical situations by working on hypothetical immigration client files, including preparation of forms to be filed with the United States Citizenship and Immigration Services. Prerequisites: LEGS 1150 and LEGS 2100. Frequency: Even Year Winter.

LEGS 4800 Advanced Practicum in Paralegal Studies (3 credits)
This advanced practicum simulates a law office environment in which students work for senior and junior law partners in a generalized law practice. This experiential approach is designed to integrate and apply substantive law, procedural application and legal computer application drawing on materials in a variety of legal areas including but not limited to civil litigation, real estate, estate planning, family law, legal research, criminal law, contracts and corporate law. Students take this course in the last semester of
their paralegal studies curriculum. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. 

**Prerequisites:** LEGS 2100 and LEGS 3050 and LEGS 3210 or LEGS 2200 and LEGS 3260 and LEGS 3300 and LEGS 3360 and LEGS 3400 and LEGS 3550. **Frequency:** Every Winter.

**LEGS 4900 Special Topics in Paralegal Studies (3 credits)**

The subjects covered by this course will generally be chosen from among the following: administrative law; alternative dispute resolution; employment law; health law; immigration law; insurance law; international law; and patents, trademark, and copyright law. 

**Prerequisites:** LEGS 1150 or LGST 2500; and LEGS 2100 or LGST 4000.

**LEGS 4950 Internship in Paralegal Studies (3 credits)**

A 20-hour per week work experience for 16 weeks in the student’s major area of study at an internship site registered with the paralegal studies program as an approved site. Consult academic division for specific details and requirements. 

**Prerequisites:** cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of paralegal coordinator. Students may take a maximum of two internships, which must be taken at different internship sites. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. **Frequency:** Upon Request; see departmental chair.

**LEGS 4950A Internship A in Paralegal Studies (3 credits)**

A 20-hour per week work experience for 16 weeks in the student’s major area of study at an internship site registered with the paralegal studies program as an approved site. Consult academic division for specific details and requirements. 

**Prerequisites:** cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of paralegal coordinator. Students may take a maximum of two internships, which must be taken at different internship sites. **Frequency:** Every Fall and Winter.

**LEGS 4950B Internship B in Paralegal Studies (3 credits)**

A 20-hour per week work experience for 16 weeks in the student’s major area of study at an internship site registered with the paralegal studies program as an approved site. Consult academic division for specific details and requirements. 

**Prerequisites:** cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of paralegal coordinator. Students may take a maximum of two internships, which must be taken at different internship sites. **Frequency:** Every Fall and Winter.

**LGST—Legal Studies**

**LGST 2500 Introduction to Legal Studies (3 credits)**

This course provides an introduction to the structure and basic decisional processes of the American legal system, as well as a study of the historical and social development of the legal profession in America from the colonial period to the present. Particular focus is on examination of the central issues and processes of the legal system from the perspective of their everyday working relationships and how courts work. 

**Prerequisite:** COMP 1500 or COMP 1500H. **Frequency:** Every Fall and Winter.

**LGST 3350 Environmental Law and Policy (3 credits)**

This course analyzes environmental quality in terms of law and policy. Specific public policy issues are surveyed to develop alternative approaches for dealing with ecological problems and for illustrating the power of public opinion. This course also provides an understanding of the norms and institutions that comprise national and international environmental law. Specific topics considered include air pollution and protection of the atmosphere, hazardous waste, endangered species, the global commons, and laws of the sea. Statutes, regulations, and judicial decisions are emphasized to provide an overall analysis of environmental law. 

**Prerequisite:** COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. **Frequency:** Every Winter.

**LGST 3400 Comparative Legal Systems (3 credits)**

A study of the interrelationship between cultures and legal systems; how legal systems develop as a response to, and expression of, the cultures from which they derive. 

**Prerequisite:** LGST 2500 and COMP 2000, 2010, or 2020 or COMP 2000H. **Frequency:** Even Year Fall.

**LGST 4000 Legal Research and Trial Advocacy (3 credits)**

Students will learn legal research and writing skills, as well as the basics of case preparations, courtroom strategy and presentation, and legal argumentation. Library and Internet primary and secondary legal resources will be utilized, and legal memoranda and research skill exercises will be required. The students will create a trial notebook of their research and writing work, which they will then present in a mock trial/appellate setting. 

**Prerequisites:** LGST 2500 and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. **Frequency:** Winter.

**LGST 4100 The First Amendment (3 credits)**

This course focuses on study of the First Amendment, emphasizing freedom of speech and religion and how those rights have been exercised and interpreted both historically and in the modern era. 

**Prerequisites:** LGST 2500 and COMP 2000 or 2020 or COMP 2000H. **Frequency:** Odd Year Winter.

**LGST 4200 Crime and the Constitution (3 credits)**

This course focuses on the study of the 4th, 5th, and 6th amendments and their relationship to criminal procedure. Additional emphasis will be on the 8th amendment and the death penalty. 

**Prerequisites:** LGST 2500 and COMP 2000 or 2020 or COMP 2000H. **Frequency:** Even Year Fall.

**LGST 4270 Judicial Politics and Process (3 credits)**

This class will examine both the formal and informal practices and rules that shape the American judicial system. Using a political science/legal anthropology approach, it will ask who uses the courts, why they use the courts, and what they hope to achieve. In doing so, it will seek to assess the effectiveness of American justice by analyzing such topics as the formal structures of the American judicial system and the judicial appointment, socialization, and the decision-making process. 

**Prerequisite:** LGST 2500 and COMP 2000, COMP 2010 or COMP 2020 or COMP 2000H. **Frequency:** Odd Year Fall.

**LGST 4310 Individual Rights and the Law (3 credits)**

A study of the crucial role the Supreme Court has played in the expansion and diminution of the rights of individuals. This course focuses on civil rights issues (discrimination on the basis race, sex, etc.) and the rights of the individual to privacy. 

**Prerequisites:** LGST 2500 and COMP 2000 or 2020 or COMP 2000H. **Frequency:** Odd Year Fall.

**LGST 4400 Special Topics in Legal Studies (3 credits)**

Special Topics in Legal Studies: This course examines selected topics in legal studies. Topics vary each semester. This course may be repeated once for credit, if content changes and with departmental approval. **Frequency:** Odd Year Winter.

**LGST 4410 International Law (3 credits)**

An introduction to basic legal principles governing relations between nations. Topics include recognition of states, jurisdiction, human rights, treaties and agreements, law of the sea and claims against nations. 

**Prerequisites:** one LGST course; and COMP 2000, COMP 2010, or COMP 2020. **Frequency:** Every Winter.

**LGST 4420 War Crimes (3 credits)**

This course focuses on the issue of war crimes as well as trials of war criminals during the last hundred years. Students will consider the development and evolution of the law particularly as it relates to the definition of war crimes, genocide, ethnic cleansing, and crimes against humanity. Students will examine key historical trials as well as consider how war crimes doctrines are being applied currently in national and international venues. 

**Prerequisite:** one LGST course and COMP 2000 or 2020 or
COURSE DESCRIPTIONS

LGST 4950 Internship in Legal Studies (1-12 credits)
A 10-20 hour per week field or work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 higher, completion of 60 or more credit hours, and permission of division director. Frequency: Every Fall and Winter.

LGST 4950A Internship in Legal Studies (A) (3 credits)
A 10-20 hour per week field or work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, completion of 60 or more credit hours, and permission of division director. Frequency: Every Fall and Winter.

LGST 4990 Independent Study in Legal Studies (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: one LGST course and written consent of instructor and division director. Frequency: Every Fall and Winter.

LITR—Literature

LITR 2010 British Literature I (3 credits)
A survey of major literary movements and writers, from Old English through the 18th century. The course examines themes common to various historical periods. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

LITR 2011 British Literature II (3 credits)
A survey of major literary movements and writers, from the Romantic period through the present. The course examines themes common to various historical periods. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Winter.

LITR 2020 American Literature I (3 credits)
A survey of American literature from the colonial period through the Civil War, emphasizing major authors and identifying themes common to various historical periods. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

LITR 2020H American Literature I Honors (3 credits)
A survey of American literature from the colonial period through the Civil War, emphasizing major authors and identifying themes common to various historical periods. Prerequisite: COMP 1500. Honors students only. Frequency: Every Fall.

LITR 2021 American Literature II (3 credits)
A survey of American literature from the end of the Civil War through the present, emphasizing major authors and identifying themes common to various historical periods. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Winter.

LITR 2021H American Literature II Honors (3 credits)
A survey of American literature from the end of the Civil War through the present, emphasizing major authors and identifying themes common to various historical periods. Prerequisites: COMP 1500 or COMP 1500H; Honors students only. Frequency: Every Winter.

LITR 2030 World Literature I (3 credits)
A survey of selected masterpieces by international writers from antiquity through the Renaissance, emphasizing the evolution of world culture. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

LITR 2030H World Literature I Honors (3 credits)
A survey of selected masterpieces by international writers from antiquity through the Renaissance, emphasizing the evolution of world culture. Prerequisite: COMP 1500 or COMP 1500H. Honors students only. Frequency: Every Year Fall.

LITR 2031 World Literature II (3 credits)
A survey of selected masterpieces by international writers from the 17th century through the 20th century, emphasizing the evolution of world culture. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Winter.

LITR 2031H World Literature II Honors (3 credits)
A survey of selected masterpieces by international writers from the 17th century through the 20th century, emphasizing the evolution of world culture. Prerequisites: COMP 1500 or COMP 1500H; Honors students only. Frequency: Odd Year Winter.

LITR 2031A World Literature II Honors (3 credits)
A survey of selected masterpieces by international writers from the 17th century through the 20th century, emphasizing the evolution of world culture. Prerequisites: COMP 1500 or COMP 1500H; Honors students only. Frequency: Odd Year Winter.

LITR 3040 Women in Literature (3 credits)
A study of the rich and extensive contributions of women to the various literary genres (autobiography, poetry, fiction). Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020. Frequency: Every Year Fall.

LITR 3060 History and Structure of the English Language (3 credits)
A study of the structure and development of the English language from Old English to Modern English, including changes in word forms, meaning and sounds, syntax and grammar. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020. Frequency: Every Fall.

LITR 3500 Literature and Medicine (3 credits)
This course explores the relationship between literary and historical texts and medical practice. Using critical perspectives from the humanities, the course examines such topics as the medical practitioner’s role, medical themes in literature, and pathographies. Prerequisites: one LITR course; and COMP 2000, COMP 2010, COMP 2020 or COMP 2000H. Frequency: Odd Year Fall.

LITR 3510 Irish Literature (3 credits)
A study of Irish and Celtic literatures, focusing on early Irish myth and medieval literature translated from Gaelic, the literature of the Irish Renaissance in the early 20th century, and contemporary Irish poetry and prose. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Odd Year Winter.

LITR 3520 African-American Literature (3 credits)
A study of African-American literature, from slave narratives to modern African-American poetry and prose. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Odd Year Fall.
LITR 3530 Caribbean Literature (3 credits)
A study of Caribbean literature from early post-Colombian literature, such as slave narratives and travel writing, to modern Caribbean poetry and prose. The emphasis is on literature written in English, but the course includes works that have been translated into English from other languages, including French and Spanish. This course provides an introduction to the literature of the Caribbean and a framework for studying that material. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Fall.

LITR 3540 Latin American Literature (3 credits)
A survey of Latin American literature in translation. Prerequisite: one LITR course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Winter.

LITR 3620 Studies in Poetry (3 credits)
A detailed study of the genre of poetry through the reading of important works on various periods and countries from the ancient through the modern era, focusing on the main poetical categories of epic, lyric, and dramatic poetry. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Odd Year Winter.

LITR 3630 Studies in the Novel (3 credits)
A detailed study of the novel through the reading of important works of various periods and countries from the 18th century through the modern era. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Odd Year Fall.

LITR 3640 Studies in Drama (3 credits)
A detailed study of drama through the reading of important works of various periods and countries from the ancient through the modern era. Prerequisites: one LITR course; and COMP 2000, COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Year Fall.

LITR 3660 Young Adult Literature (3 credits)
A study of the genre of literature written for, marketed to, and taught to young adults (primarily ages 12-17), examining relevant themes, motifs, and pedagogical strategies involved with such literature. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Year Winter.

LITR 4050 Literary Criticism and Theory (3 credits)
This course introduces students to critical approaches to literature and explores the potential usefulness of theoretical constructs in examining literary texts. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020. Frequency: Every Winter.

LITR 4060 Critical Theories and Gender (3 credits)
This course introduces students to contemporary feminist criticism and gender theory from Simone de Beauvoir to the present and explores the potential usefulness of theoretical constructs in examining literature. Prerequisites: one LITR course; and COMP 2000, COMP 2010, COMP 2020, or COMP 2000H. Frequency: Every Year Winter.

LITR 4510 King Arthur (3 credits)
This course traces the origins and development of the legend of King Arthur, Queen Guinevere, and the Knights of the Round Table from the 5th to the 21st century. Prerequisites: one LITR course; and COMP 2000, COMP 2010, or COMP 2020. Frequency: Every Year Winter.

LITR 4760 Major Authors (3 credits)
This course will examine the life and work of an influential single literary author from a range of critical perspectives, using a variety of selections from the author's work. Prerequisite: one LITR course; and COMP 2000 or COMP 2000H or COMP 2020. Frequency: Every Winter.

LITR 4900 Special Topics in Literature (3 credits)
Topics, which vary from year to year, may include a history of literary criticism, a study of literature in relation to a specific field (politics, law, science), an exploration of a particular form of literature (travel literature, autobiography, etc.), or theme (literature and the city, literature and the self), or an interdisciplinary approach to a particular era. Specific focus to be announced. May be repeated once for credit, if content changes and with written consent of division director. Prerequisites: one LITR course; and COMP 2000, COMP 2010, COMP 2020 or COMP 2000H. Frequency: Odd Year Winter.

LITR 4990 Independent Study in Literature (1-3 credits)
The student selects, and carries out, a specific study of a particular area. The student must submit a written program that is reviewed and approved by the division director. Prerequisites: one LITR course; and COMP 2000 or COMP 2000H or COMP 2020. Frequency: Every Fall and Winter.

MATH—Mathematics

MATH 1000 Essential Mathematics (3 credits)
This course is designed to provide a brief review of basic computational skills in fractions, decimals, and rational numbers. It expands into a comprehensive study of introductory algebra including: variable expressions, linear equations and inequalities, polynomials, exponents, algebraic word problems, factoring, and quadratic equations. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: Every Fall and Winter.

MATH 1030 Intermediate Algebra (3 credits)
This course is designed for students who have had some algebra. Topics include: algebraic expression and real numbers; linear equations and inequalities in one and two variables; quadratic equations; polynomials and factoring; graphs of basic functions; systems of linear equations; and applications. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MyMathTest Challenge Exam Level 1 score of 70 or higher or MATH 1000. Frequency: Every Fall and Winter.

MATH 1040 Algebra for College Students (3 credits)
This course is designed to provide students with a full range of algebra skills. Topics include: graphs of functions and relations; inverse functions; rational and radical expressions; linear, quadratic, and rational functions; absolute value and radical functions; properties and graphs of exponential and logarithmic functions and applications. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: Challenge examination or Math 1030. Frequency: Every Fall and Winter.

MATH 1050 Concepts in Geometry and Logic (3 credits)
This course is designed to meet the general education requirements for only those students intending to enter education majors. The course addresses essential mathematical competencies related to sets, logic, and geometry. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: Odd Year Fall.

MATH 1060 Concepts in Statistics and Probability (3 credits)
This course is designed to meet the general education requirements for only those students intending to enter education majors. The course addresses essential mathematical competencies related to probability and both inferential and descriptive statistics. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: Every Year Winter.

MATH 1120 Games of Chance (3 credits)
This course presents elementary probability theory and statistics through the view point of games, sports, and gambling. Topics include counting principles, probability, probability distributions, expectation, and descriptive statistics. Examples are taken from games of chance and sports. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MATH 1030 Frequency: See Academic Department Chair.

MATH 1130 Introductory Seminar in
Mathematics (1 credits)
This course is basic, nontechnical introduction to current and/or classical topics in mathematics. Specific topics for the course vary by semester. Prerequisite: MATH 1040. Frequency: See Academic Department Chair.

MATH 1200 Precalculus Algebra (3 credits)
This course is for students with a strong background in algebra. Students will study fundamental concepts of algebra; equations and inequalities; functions and graphs; polynomials; and rational, exponential, and logarithmic functions. This course has been exemted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MyMathTest Challenge Exam Level 3 score of 70 or higher or MATH 1040. Frequency: Every Fall and Winter.

MATH 1250 Trigonometry (3 credits)
This course will complete the sequence of courses necessary to begin the study of calculus. A thorough study of trigonometric functions, analytic trigonometry, and numerous applications will be covered. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MyMathTest Challenge Exam Level 4 score of 70 or higher or MATH 1200. Frequency: Every Fall and Winter.

MATH 2001 Introduction to Math Models in Biology I (3 credits)
This course is designed for students with a mathematical background sufficient to take calculus and an interest in the biological sciences. Students will be introduced to the interplay of mathematical modeling and biology, as well as an introduction to a broad mathematical tool chest. Topics include linear and nonlinear difference equations and matrix algebra. The Mathlab's computer software program will be used in this course. Frequency: See Academic Department Chair.

MATH 2020 Applied Statistics (3 credits)
This course is an introductory course in the use of descriptive and inferential statistics. Topics include graphical and numerical descriptive measures, probability, common random variables and their distributions including the binomial and normal distributions, the Central Limit Theorem, sampling procedures, confidence intervals and hypothesis testing of one variable, and an introduction to correlation and simple linear regression. Honors students only. Prerequisite: MATH 1040 or higher; Honors students only. Frequency: Every Fall and Winter.

MATH 2080 Applied Calculus (3 credits)
Functions, graphs and derivatives of algebraic functions; introduction to derivatives of trigonometric functions, application of derivatives to business problems; and related rates and maximum/minimum problems. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MATH 1200. Frequency: See Academic Department Chair.

MATH 2100H Calculus I Honors (4 credits)
Functions, limits, and derivatives of algebraic functions. Introduction to derivatives of trigonometric functions, logarithmic functions; application of derivatives to physics problems; related rates and maximum/minimum problems; and definite and indefinite integrals with applications. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MATH 2200H. Frequency: Every Fall and Winter.

MATH 2100 Calculus I (4 credits)
Functions, limits, and derivatives of algebraic functions. Introduction to derivatives of trigonometric functions, logarithmic functions; application of derivatives to physics problems; related rates and maximum/minimum problems; and definite and indefinite integrals with applications. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: See Academic Department Chair.

MATH 2100H Calculus I Honors (4 credits)
Functions, limits, and derivatives of algebraic functions. Introduction to derivatives of trigonometric functions, logarithmic functions; application of derivatives to physics problems; related rates and maximum/minimum problems; and definite and indefinite integrals with applications. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: See Academic Department Chair.

MATH 2200H Calculus II Honors (4 credits)
Riemann sums; the definite integral; method of integration; continuation of exponential, logarithmic functions, and inverse trigonometric functions. L'Hopital's rule and improper integrals. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MATH 2100 or MATH 2100H. Frequency: Every Fall and Winter.

MATH 2200H Calculus II Honors (4 credits)
Riemann sums; the definite integral; method of integration; continuation of exponential, logarithmic functions, and inverse trigonometric functions. L'Hopital's rule and improper integrals. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: Odd Year Winter.

MATH 2200 Calculus II (4 credits)
Riemann sums; the definite integral; method of integration; continuation of exponential, logarithmic functions, and inverse trigonometric functions. L'Hopital's rule and improper integrals. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: Even Year Fall.

MATH 2200H Calculus II Honors (4 credits)
Riemann sums; the definite integral; method of integration; continuation of exponential, logarithmic functions, and inverse trigonometric functions. L'Hopital's rule and improper integrals. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: Odd Year Winter.

MATH 2200 Calculus II (4 credits)
Riemann sums; the definite integral; method of integration; continuation of exponential, logarithmic functions, and inverse trigonometric functions. L'Hopital's rule and improper integrals. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: Even Year Fall.

MATH 2200H Calculus II Honors (4 credits)
Riemann sums; the definite integral; method of integration; continuation of exponential, logarithmic functions, and inverse trigonometric functions. L'Hopital's rule and improper integrals. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Frequency: Odd Year Winter.

MATH 2300 Introduction to Advanced Mathematics (3 credits)
This course is an introduction to concepts encountered in abstract mathematics that are common to most fields in mathematics. Topics covered include: logic, set theory, functions, relations, cardinality, mathematical induction, algebraic structures and the real number system. Optional topics may be included based upon the discretion of the instructor. There will be an emphasis in writing formal mathematical proofs. Prerequisite: MATH 2200. Frequency: Odd Year Winter.

MATH 3030 Applied Statistics II (3 credits)
Introductory and more advanced topics in statistics and experimental design are covered. Course material includes hypothesis testing for two-samples, linear and multiple correlation and regression methods, Chi-Squared tests, analysis of variance, nonparametric techniques, survival analysis, relative risk and odds ratios, and an introduction to Bayesian approaches and bootstrapping techniques. Stress will be placed on interpreting studies that employ these techniques. Prerequisite: MATH 3020 or MATH 3020H or MATH 2020 or MATH 2020H. Frequency: Odd Year Winter.

MATH 3050 Mathematics and Biology (3 credits)
This course is designed for students with a mathematical background at the level of calculus and an interest in the interplay of mathematics and biology. Models for biological processes based on difference equations and ordinary differential equations are explored. Students will be introduced to the use of matrices, eigenvalues and phase-plane to understand dynamical systems. Topics selected from models of biological systems such as those representing population growth, structured populations, predator-prey dynamics, biological oscillators, or other models as appropriate. Prerequisite: MATH 2100 or MATH 2100H. Frequency: Even Year Fall.

MATH 3200 Calculus III (4 credits)
Functions of several variables, surfaces, in three-space, vectors, techniques of partial differentiation and multiple integration with applications. Vector calculus topics will include the theorems of Green, Gauss and Stokes. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MATH 2200 or MATH 2200H. Frequency: Every Fall and Winter.
MATH 3260 Combinatorics (3 credits)
This course begins with the Pigeonhole principle and studies permutations and combinations. Students will learn the techniques for counting and enumeration including generating functions, the principle of inclusion and exclusion, as well as graph theory. Prerequisite: MATH 2200 or MATH 2200H. Frequency: See Academic Department Chair.

MATH 3270 Logic (3 credits)
Topics covered are syntax and semantics of formal languages; sentential logic, proofs in first order logic; Godel’s completeness theorem; compactness theorem and applications; cardinals and ordinals; the Lowenheim-Skolem-Tarski theorem; Beth’s definability theorem; effectively computable functions; Godel’s incompleteness theorem; undecidable theories. Prerequisite: MATH 2500. Frequency: See Academic Department Chair.

MATH 3300 Introductory Linear Algebra (3 credits)
This is an elementary linear algebra course. The focus of the course is on the methods in matrix computations and the basic theory of vector spaces. Prerequisite: MATH 2100 or MATH 2100H. Frequency: Every Fall and Winter.

MATH 3340 Linear Algebra II (3 credits)
This advanced linear algebra (mainly matrix theory) course covers linear vector spaces, inner product spaces, minimal and characteristic polynomials, eigenvalues and eigenvectors, canonical forms of matrices, tensor and Hadamard products, and properties of positive definite matrices, Hermitian matrices and normal matrices. Prerequisites: MATH 3300 and MATH 2200 or MATH 2200H. Frequency: Even Year Winter.

MATH 3350 Number Theory (3 credits)
This introductory course to Number Theory is designed primarily for secondary math education majors. Includes from the early development in mathematics to current thinking. Students will gain the perspective that mathematics is the cumulative creation of many people over time. Prerequisite: MATH 2200 or MATH 2200H. Frequency: See Academic Department Chair.

MATH 4020 Applied Regression Analysis (3 credits)
An applied course in regression analysis discussing simple, multiple regression; exponential and logistic regression; resolution of fit of a model, including, residual analysis; precision of estimate; ANOVA and tests of general hypotheses; model building; step-wise regression; use of indicator variables, and multi co-linearity. Prerequisite: MATH 3030. Frequency: See Academic Department Chair.

MATH 4040 Applied Multivariate Statistical Analysis (3 credits)
An applied course in multivariate statistical analysis. This includes the study of the multivariate normal distribution and inference about one and several multivariate means. Also, students will study principal components and factor analysis and apply such techniques to real multivariate data. Also, the study of classification and cluster analysis will enable the students to better apply such techniques in marketing research, biological models, and social studies. Prerequisites: MATH 3030 and MATH 3300. Frequency: See Academic Department Chair.

MATH 4050 Advanced Calculus I (3 credits)
The course is an introduction to the theoretical treatment of the real numbers, sets, functions, sequences, limits and calculus. The course places an emphasis on reading and writing formal mathematical proofs. Topics include: the real number system, convergence of sequence and series, continuity, limits, functions of one real variable, and the theoretical foundations of differentiation and integration of functions of a single variable. Pre-requisite: MATH 3200. Frequency: Even Year Fall.

MATH 4060 Advanced Calculus II (3 credits)
This course is a continuation of Advanced Calculus I providing an introduction to metric spaces and their topology. The course places an emphasis on extending results for real functions to multivariable functions. Topics include: metric spaces and topology, integration, differentiation, optimization and analysis in several variables. Pre-requisite: MATH 4050. Frequency: Odd Year Winter.

MATH 4080 Introduction to Statistical Computations (3 credits)
This class gives the students the opportunity to learn writing codes for performing statistical analysis and data manipulation including writing their own functions or macros in one of the high level programming languages. Students will have a better hand on one/more statistical programming language(s) so as to carry out statistical analysis. Students will be prepared to handle and manipulate different types of data files and write their own functions (macros) to perform specific procedures. Prerequisites: MATH 3030 and MATH 3300. Frequency: See Academic Department Chair.

MATH 4100 Introduction to Topology (3 credits)
This course is an introduction to topology and elements of algebraic topology, including metric spaces, continuity, compactness, topological spaces, separation axioms, product spaces, subspaces, quotient spaces, connectedness, and the fundamental group. Prerequisite: MATH 2200 or MATH 2200H. Frequency: See Academic Department Chair.

MATH 4200 Complex Variables (3 credits)
This is a first course in complex variables. Topics covered in this course include the origin, algebra, topology and geometry of complex numbers, the mappings, continuity, branches, and transformations of analytic and harmonic functions, and the computation of contour integrals. Prerequisite: MATH 3200. Frequency: Odd Year Winter.

MATH 4300 Numerical Methods (3 credits)
This is an introductory survey course to standard numerical methods, the mathematical ideas behind them and their use in obtaining numerical solutions. Topics include polynomial interpolation, numerical integration and differentiation, numerical solution of nonlinear equations and ordinary differential equations. Prerequisite: MATH 2200 or MATH 2200H. Frequency: See Academic Department Chair.

MATH 4350 Abstract Algebra I (3 credits)
This course is an introduction to the concepts of groups and rings from modern abstract algebra. Group theoretic topics include: modular arithmetic, groups, cyclic groups, permutation
COURSE DESCRIPTIONS

MATH 4360 Abstract Algebra II (3 credits)
This course, which is a continuation of Math 4350, further develops the theory of groups and rings and introduces the concept of field theory. Group theoretic topics include: group theory, Sylow’s theorem, symmetric groups, Burnside’s theorem. Ring theoretic topics include: ring theory, polynomial rings, factorizations, and divisibility. Field theoretic topics include: extension fields, algebraic extension, finite fields, and Galois theory. **Prerequisite:** MATH 4350. **Frequency:** Even Year Winter.

MATH 4400 Partial Differential Equations (3 credits)
Introduction to second-order linear partial differential equations (heat, wave and Laplace equations), separation of variables, Sturm-Liouville eigenvalue problems, method of eigenfunction expansions (Fourier analysis), and Green’s functions. Possible introduction to first-order PDEs, the method of characteristics, and non-linear PDE as time permits. **Prerequisites:** MATH 3200 and MATH 3400. **Frequency:** Odd Year Fall.

MATH 4450 Basic Probability (3 credits)
Probability spaces, discrete and continuous distributions, conditional probability space, effect on distributions by linear, and non-linear functions of one and two random variables, moments, characteristic functions, vectors and sequences of one and two random variables, laws of large numbers, central limit theorem, special probability laws. **Prerequisite:** MATH 2200 or MATH 2200H. **Frequency:** See Academic Department Chair.

MATH 4500 Probability and Statistics (3 credits)
A calculus-based probability and statistics course designed for engineers and scientists. Topics include probability and probability mass, density, and distribution functions, hypothesis testing for one- and two-samples, and the fundamentals of linear regression. **Prerequisite:** MATH 2200 or MATH 2200H. **Frequency:** Every Fall and Winter.

MATH 4600 Introduction to Applied Mathematics (3 credits)
This course provides an introduction to the methods of applied Mathematics. Topics include the spectral theory of vector and function spaces, orthogonal functions, series expansion, differential operators, Green’s functions, complex variables including derivatives and integrals, laurent series, special functions, and transforms. **Prerequisites:** MATH 3200 and MATH 3300. **Frequency:** See Academic Department Chair.

MATH 4700 Applied Cryptography (3 credits)
This is an introductory course to applied cryptography. Symmetric-key cryptography topics include stream ciphers, block-ciphers, permutations, groups and Galois fields. Public-key cryptography topics include factorization, discrete logarithm problem, and elliptic curves. **Prerequisite:** MATH 4350. **Frequency:** See Academic Department Chair.

MATH 4900 Special Topics in Mathematics (3 credits)
The Special Topics in Mathematics course presents mathematical topics that are not covered in any of our current courses. Course contents and schedule are announced in the course syllabus. **Prerequisites:** Junior standing. Specific course content and prerequisites are announced in the course schedule for the given term. **Frequency:** See Academic Department Chair.

MATH 4950 Internship in Mathematics (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. **Prerequisites:** cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic department chair. **Frequency:** See Academic Department Chair.

MATH 4950A Internship in Mathematics (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. **Prerequisites:** cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic department chair. **Frequency:** See Academic Department Chair.

MATH 4950B Internship in Mathematics (1-12 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. **Prerequisites:** cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of academic department chair. **Frequency:** See Academic Department Chair.

MATH 4900A Independent Study in Mathematics (A) (1-3 credits)
The student selects and independently carries out, library and/or empirical research. Faculty supervision is provided on an individual basis. **Prerequisite:** Determined by faculty and academic department chair. **Frequency:** See Academic Department Chair.

MATH 4900B Independent Study in Mathematics (B) (1-3 credits)
The student selects and independently carries out, library and/or empirical research. Faculty supervision is provided on an individual basis. **Prerequisite:** Determined by faculty and academic department chair. **Frequency:** See Academic Department Chair.

MATH 4900C Independent Study in Mathematics (C) (1-3 credits)
The student selects and independently carries out, library and/or empirical research. Faculty supervision is provided on an individual basis. **Prerequisite:** Determined by faculty and academic department chair. **Frequency:** See Academic Department Chair.

MATH 4900D Independent Study in Mathematics (D) (1-3 credits)
The student selects and independently carries out, library and/or empirical research. Faculty supervision is provided on an individual basis. **Prerequisite:** Determined by faculty and academic department chair. **Frequency:** See Academic Department Chair.

MATH 4900E Independent Study in Mathematics (E) (1-3 credits)
The student selects and independently carries out, library and/or empirical research. Faculty supervision is provided on an individual basis. **Prerequisite:** Determined by faculty and academic department chair. **Frequency:** See Academic Department Chair.

MATH 4900F Independent Study in Mathematics (F) (1-3 credits)
The student selects and independently carries out, library and/or empirical research. Faculty supervision is provided on an individual basis. **Prerequisite:** Determined by faculty and academic department chair. **Frequency:** See Academic Department Chair.

MBIO—Marine Biology

MBIO 1060 Introduction to Oceanography (3

...
MBIO 1220 Introduction to Marine Biology (3 credits)
Introduction to marine environments of South Florida with emphasis on adaptation of local organisms to a variety of habitats including mangrove swamps, the intertidal zone, sea grass meadows, coral reefs, and the Gulf Stream. Frequency: Every Fall, Winter, and Summer

MBIO 1300 Introduction to Scuba Science (3 credits)
This introductory course for the marine biology major will acquaint the student with basic principles of marine biology and function as a complementary course to Oceanography/Lab (MBIO 2500). The course will touch upon basic aspects of physical, chemical, and geological oceanography, and then focus upon marine communities found in the open ocean, deep sea, coastal shelf and inter tidal regions. Species diversity, phylogenetic relationships, organisms function, symbiotic relationships, and ecological interactions will be examined. Prerequisite: MBIO 1510 or BIOL 1510H. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Winter.

MBIO 2410 Marine Biology and Lab (4 credits)
This introductory course for the marine biology major will acquaint the student with basic principles of marine biology and function as a complementary course to Oceanography/Lab (MBIO 2500). The course will touch upon basic aspects of physical, chemical, and geological oceanography, and then focus upon marine communities found in the open ocean, deep sea, coastal shelf and intertidal regions. Species diversity, phylogenetic relationships, organisms function, symbiotic relationships, and ecological interactions will be examined. Prerequisite: MBIO 1510 or BIOL 1510H. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Fall, Winter and Summer.

MBIO 2500 Oceanography/Lab (4 credits)
This introductory course for the marine biology major will expose the student to more comprehensive principles of physical, chemical and geological oceanography, and functions as a complementary course to Marine Biology (MBIO 2410). Oceanographic sampling and laboratory analysis techniques will be covered. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Winter.

MBIO 3200 Functional Biology of Marine Animals (3 credits)
This course examines various aspects of the physiology of marine animals, including respiratory, digestive, circulatory systems, and excretory systems, feeding morphologies, temperature and metabolic adaptations, locomotion and buoyancy, and sensory biology (vision, magnetoreception, chemoreception, electroreception, mechanoreception). Basic functional biology and physiological concepts will be taught, and then expanded upon to understand how animals have adapted to deal with major biological challenges found in the marine environment, such as pressure and temperature extremes, extremely low light levels, hydrothermal vent environments, how can elephant seals hold their breath for an hour, etc. Pre-Requisites: BIOL 150 and BIOL 1510. Frequency: Even Years Winter.

MBIO 3300 Deep Sea Ecology (3 credits)
The deep oceans cover over 70% of the planet’s surface, and provide the living space for an enormous diversity of highly-specialized organisms. Due to its remoteness and vast size, the deep sea has historically been understudied, but technological and computational advances in recent decades have allowed exciting new advances in our understanding to be made, which underscore the global value and fragility of the deep oceans. This Deep-Sea Ecology course will: introduce the deep-sea environment and its unique habitats; introduce the diversity of organisms that inhabit the deep oceans and their adaptations; demonstrate how the deep oceans are intimately linked to all other marine ecosystems; discuss current and emerging human impacts on the deep oceans and their relevance to quantitatively predicting future change on a global scale. Frequency: Even Year Winters.

MBIO 3400 Marine Community Ecology (3 credits)
The study of ecological communities is a powerful tool with which we can understand real-world patterns of biodiversity and how they are affected by environmental change. These studies are widely used in marine environmental management to understand how, when and where different impacts might be causing changes within marine ecosystems, and an ability to conduct community analyses a sought-after graduate skill with many employers in environmental fields. In this course, you will learn how to identify, analyze and interpret patterns of marine biodiversity and community composition using PRIMER software, and learn how typical marine communities are structured. Frequency: Odd Years Winter.

MBIO 3450 Survey of Marine Mammals (3 credits)
This course provides an overview of the anatomy, biomedicine, evolution, husbandry, natural history, pathology, and physiology of the cetaceans, pinnipeds, sirenians, and allies. The course consists of lectures and field trips. Pre-requisite: MBIO 2410. Frequency: Winter, odd years.
MBIO 3500 Food Web Dynamics (3 credits)
A food chain is simply “who eats what”. The linear relationships of a food chain will be contrasted with the more complex interactions of a food web. The biological and physical processes which contribute to a food web, such as population dynamics and energy flow, will be introduced in multiple estuarine and marine ecosystems, from coastal mangroves to offshore open waters. Specialized food webs, such as sea ice and hydrothermal vent communities, will also be introduced. Prerequisites: MBIO 2410. Frequency: Winter, odd years.

MBIO 3600 Plankton Ecology (1-3 credits)
Marine and freshwater zooplankton, with limited discussion of phytoplankton, protozoans and bacteria, will be discussed. A survey of holoplanktonic and meroplanktonic zooplankton will be conducted, including phylogeny, ecology and processes which influence production and diversity. A discussion of field and laboratory sampling techniques and methodology will include introductions for collecting, preserving, subsampling, identifying and quantifying collections. A one-day field trip will allow students to collect marine samples and they will learn to identify organisms based on those samples throughout the course. Prerequisites: MBIO 2410 or MBIO 2500. Frequency: Winter, even years.

MBIO 3700 Biology of Fishes/Lab (4 credits)
This is an introduction to the major groups of fishes such as jawless, cartilaginous and bony fishes. Topics will include the diversity of extant fishes from various aquatic habitats, with emphasis on local species, the anatomy, physiology, behavior, ecology and evolution of fishes, and fisheries conservation and enhancement practices. Prerequisites: BIOL 1510 or BIOL 1510H. Frequency: Fall.

MBIO 3750 Coral Reefs and Coral Communities (3 credits)
This class introduces students to the biology and ecology of corals and coral-associated organisms. Topics include coral distribution, abundance, diversity, taxonomy, endosymbionts, reproduction, predator-prey relationships, and anthropogenic and natural disturbances. Active classroom discussion will be encouraged during and following the presentation of material by the professor. A formal discussion period on selected papers will be conducted during each class. Material will be presented from a global perspective, with focus on South Florida and Caribbean marine environments. Two weekend field trips are required. Prerequisite: MBIO 2410. Frequency: Fall, even years.

MBIO 3800 Island Biogeography (1-3 credits)
Island biogeography is the study of the distribution and dynamics of species in island environments. Due to their isolation from more widespread continental species, islands are ideal places for unique species to evolve, but they are also places of concentrated extinction. There is little understanding of island geology, geography, climate, or the impact of colonization by plants, animals and humans. Natural and anthropogenic disturbances are common to island groups, all of which face extinctions of endemic flora and fauna, growing populations of invasive species, and increasing human resident and tourist populations. This course will examine the natural and human history of several island groups from early geologic development to plant and animal adaptation to anthropogenic influences on extinction and sustainable growth. Prerequisites: MBIO 2410 or MBIO 2500 or BIOL 3200. Frequency: Winter, even years.

MBIO 3801 Island Biogeography Field Course (0-1 credits)
Island biogeography is the study of the distribution and dynamics of species in island environments. Due to their isolation from more widespread continental species, islands are ideal places for unique species to evolve, but they are also places of concentrated extinction. There is little understanding of island geology, geography, climate, or the impact of colonization by plants, animals and humans. Natural and anthropogenic disturbances are common to island groups, all of which face extinctions of endemic flora and fauna, growing populations of invasive species, and increasing human resident and tourist populations. This field course will examine the natural and human history of the Hawaiian Islands from early geologic formation of the Big Island to plant and animal adaptation 5 million years in the future on the island of Kauai. Both islands will be explored from a terrestrial and aquatic perspective. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: MBIO 3800. Frequency: Summer, even years.

MBIO 3910 Sharks and Their Relatives (3 credits)
This is a survey of three major groups of elasmobranch fishes: sharks, skates and rays, and chimera. This course will be divided into three main bodies of information: 1) the history and evolution of sharks and their relatives; 2) elasmobranch taxonomy; and 3) current and future research. Prerequisite: MBIO 2410. Frequency: Winter.

MBIO 4260 Ecology of the Galápagos Islands (3 credits)
This course will introduce and amplify principles of evolutionary ecology that occur in the unique setting of the Galapagos Islands. Lectures will cover the historical, geological, and biological aspects of the archipelago and will prepare the student for an immersive experience in the summer-based field course MBIO 4261. Prerequisite: MBIO 2410 or BIOL 1510 or BIOL 1510H. Frequency: Winter, odd years.

MBIO 4261 Ecology of the Galápagos Islands Field Trip (1 credits)
This field course will provide direct experience with principles of evolutionary ecology that were introduced in MBIO 4260 in the unique setting of the Galapagos Islands. The course will include visits to the Charles Darwin Research Station and several sites in the Galapagos National Park on the island of Santa Cruz, and offer additional experiences on other islands of the archipelago. Prerequisite: MBIO 4260. Frequency: Odd Year Summer.

MBIO 4900 Special Topic (Chemical Oceanography) (3 credits)
Did you know that nearly the entire periodic table of elements is dissolved in seawater? Containing about 97% of Earth’s water, the ocean acts as a giant solution dissolving rocks, minerals, and atmospheric gases. This course will serve as an introduction to the field of marine chemistry, or the study of chemical cycles within the ocean. Students will learn about the chemical composition of seawater, biogeochemical cycles, and how humans are currently changing ocean chemistry at geologically unprecedented rates. Prerequisites: CHEM 2410; MBIO 2500 Oceanography.

MBIO 4900A Special Topics in Marine Biology (3 credits)
Topics in advanced marine biology that are not included in a regular course offering.

MBIO 4900B Special Topics in Marine Biology (3 credits)
Topics in advanced marine biology that are not included in a regular course offering. Frequency: Upon request.

MBIO 4900D Special Topics in Marine Biology (3 credits)
Topics in advanced marine biology that are not included in a regular course offering.

MBIO 4950 Internship in Marine Biology (1-3 credits)
A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of department chair. Frequency: Upon request.

MBIO 4990 Independent Study Marine Biology (1-3 credits)
The student selects and independently carries
out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: Determined by faculty and department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request.

MBIO 4990A Independent Study Marine Biology (A) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: Determined by faculty and department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request.

MBIO 4990B Independent Study Marine Biology (B) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: Determined by faculty and department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request.

MBIO 4990C Independent Study Marine Biology (C) (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: Determined by faculty and department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon request.

MBIO 4990D Independent Study in Marine Biology (1-3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: Determined by faculty and department chair. Frequency: Upon request.

MGT—Management
MGT 2010 Learning to Lead I: Women in the Workplace (1 credits)
MGT 2010 is the first course in Huizenga College's three course series, Learning to Lead. Learning to Lead courses provide undergraduate students from across the NSU unique opportunities to develop their leadership skills, network with female business executives, and gain a competitive advantage by learning to navigate the often challenging professional and personal waters faced by women. Learning to Lead I: Women in the Workplace provides students with understandings of the opportunities, challenges, and organizational dynamics experienced by women in work organizations. In addition to exploring issues women face in the workplace, students will increase their own self-knowledge including identifying their personal strengths and capabilities to add value to work organizations. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MGT 2050 Principles of Management (3 credits)
Provides an overview of management history and theory, schools of management thought, the functions and processes of management, and the environment within which the modern manager operates. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MGT 2050H Principles of Management Honors (3 credits)
Provides an overview of management history and theory, schools of management thought, the functions and processes of management, and the environment within which the modern manager operates. This course is open to HONORS students only. Frequency: Upon request, see Academic Department Chair.

MGT 2150 Business Law I (3 credits)
Sets forth, explains, illustrates, and applies fundamental principles of business law to modern day business problems. Important subject matters covered are introduction to the legal system, constitutional law as applied to business, contract law and sales law, agency and employment law, types of business organizations, and torts and products liability law. Credit cannot be obtained for both this course and LEGS 3400. Frequency: Every Fall and Winter.

MGT 3010 Learning to Lead II: Financial Skills for Women (1 credits)
MGT 3010 is the second course in Huizenga College's three course series, Learning to Lead. Learning to Lead courses provide undergraduate students from across the NSU unique opportunities to develop their leadership skills, network with female business executives, and gain a competitive advantage by learning to navigate the often challenging professional and personal waters faced by women. Learning to Lead II: Financial Skills for Women develops key skills and abilities necessary for personal career and financial success. In addition, this course will explore work-life balance, understanding your value and other issues of relevance to working women. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Once a year.

MGT 3020 Business Communications (3 credits)
Examines the strategies of effective written and oral business communications. Topics include persuasive messages, delivery of good news and bad news, sales letters, collection messages, design of business reports and oral presentations, use of visual aids, and resume preparation. Prerequisite: COMP 1500. Frequency: Every Fall and Winter.

MGT 3055 Managing Groups and Teams (3 credits)
Groups and teams are an integral part of today's global marketplace. This course focuses on exposing students to essential theories and concepts for analyzing, understanding, and managing groups and teams. Through course readings, case studies, and other methodologies designed to help students successfully work in and lead groups and teams, they will develop a firsthand understanding of group and team dynamics that can be applied to their personal and professional lives. Frequency: Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Every Fall and Winter.

MGT 3100 Managing Conflict and Change (3 credits)
Examines the impact of conflict, stress and change on the workplace and the quality of work life. Topics include the myriad of stressors and their effect as well as the selection of appropriate interventions and responses. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MGT 3900 Management Internship (3-6 credits)
MGT 3900 Management Internship (3–6 credits) The Huizenga College internship fosters learning through the application of classroom theory in the workplace. During the course, the student also focuses on practical career skills and personal professional goals with individual guidance from the professor. The minimum work requirement is 180 hours during one semester (16 weeks). Contact Academic Advising for registration. ACADEMIC REQUIREMENTS: good academic standing, GPA of 2.5 or higher, and completion of at least 36 credit hours. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MGT 3901 Management Internship Extension (0 credits)
Students may register for this noncredit course to extend an internship for one term with the same or a new employer. ACADEMIC REQUIREMENTS: good academic standing, GPA of 2.5 or higher, and completion of at least 36 credit hours. Grading is Pass/Fail. Frequency: Every Fall and Winter.

MGT 3910 Special Topics in Management (3 credits)
Topics in management that are not included in a regular course offerings. Prerequisites may be required. Specific content and prerequisites are
announced in the course schedule for the given term. Frequency: Upon request and see academic department chair.

MGT 4010 Learning to Lead III: Leadership Skills for Women (1 credits)
MGT 4010 is the third course in Huizenga College’s three course series, Learning to Lead. Learning to Lead courses provide undergraduate students from across the NSU unique opportunities to develop their leadership skills, network with female business executives, and gain a competitive advantage by learning to navigate the often challenging professional and personal waters faced by women. Learning to Lead III: Leadership Skills for Women develops the skills students will need to work successfully towards their future as the next generation of business leaders or entrepreneurs. This course will include learning experiences to develop the student's personal brand, networking skills, business etiquette, and communication skills. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Once a year.

MGT 4100 Business Ethics (3 credits)
Examines the nature of morality and theories of normative ethics. Identifies a variety of ethical issues and moral challenges involving consumers, the environment, the professions, and the role of the corporation in our society. Experiential Education: Successful completion of this course satisfies 1 ExEL unit. Prerequisite: Senior standing. Frequency: Every Fall and Winter.

MGT 4170 Organizational Behavior (3 credits)
Organizational Behavior: Explores the interaction of individuals and the organization as a dynamic interplay that affects total organizational effectiveness. Topics include the role of effective communication in the organization, motivation, leadership and values. Prerequisite: MGT 2050. Frequency: Every Fall and Winter.

MGT 4880 Business Strategy and Policy (3 credits)
Business Strategy and Policy is an integrative senior course in strategic management building on functional area learning in management, accounting, finance, operations and marketing. The course focuses on the solution of specific business problems utilizing a corporate simulation which requires students to develop a strategy to lead their own company and implement the strategy through tactics for operations, management, marketing, and finance. Students are measured by a balanced scorecard estimating their performance in each area and their preparation for the future. Prerequisites: FIN 3010 and Senior Standing. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MGT 4880H Business Strategy and Policy (3 credits)
Business Strategy and Policy is an integrative senior course in strategic management building on functional area learning in management, accounting, finance, operations and marketing. The course focuses on the solution of specific business problems utilizing a corporate simulation which requires students to develop a strategy to lead their own company and implement the strategy through tactics for operations, management, marketing, and finance. Students are measured by a balanced scorecard estimating their performance in each area and their preparation for the future. Prerequisites: FIN 3010 and Senior Standing; Honor Students Only Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit.

MGT 4966 Travel Study in Management (3 credits)
This travel study course aims to provide students with a thorough understanding and firsthand look at a specific area of the world through the lenses of business and management. Students will be introduced to the challenges organizations face when working in the specific country of travel. The course is taught using a combination of in-country and pre-arrival lectures, company visits, and presentations.

MGT 4990 Independent Study in Management (3 credits)
The student works independently under the guidance of a faculty member to learn more about a subject area for credit. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request and see academic department chair.

MKT—Marketing

MKT 3050 Marketing Principles and Application (3 credits)
A focus on the marketing concept, and examination of a marketing oriented firm. Topics include consumer behavior, market analysis and the marketing mix. Students will produce a marketing plan. Frequency: Every Fall and Winter.

MKT 3060 Consumer Behavior (3 credits)
This course introduces students to marketing concepts and theories developed in the behavioral and economic sciences (cultural anthropology, psychology, social-psychology, and sociology) as they relate to consumer markets. Students will examine models of consumer behavior. They will learn how these behaviors are influenced by principles of learning, motivation, personality, perception, communication, culture, and group influence. Frameworks of consumer behavior are discussed in the context of advertising/promotion, product management, and the development of effective marketing strategies. Prerequisite: MKT 3050. Frequency: Every Fall and Winter.

MKT 3100 Services Marketing (3 credits)
Explores the marketing of services, highlighting the distinctions that exist in the marketing of intangibles. Presents strategies for marketing of services versus the traditional product related marketing. Prerequisite: MKT 3050. Frequency: Odd Winter.

MKT 3210 Professional Selling (3 credits)
The focus of this course is to introduce students to the field of professional and personal selling, their role in marketing, and the overall sales process required to cultivate long-term relationships through effective communications, rapport and bonding strategies. Prereq: MKT 3050 or SPT 3650. Frequency: Every Fall.

MKT 3320 International Marketing (3 credits)
The course studies the scope of international marketing, the structure of multinational markets, foreign market research, international advertising and promotion, international distribution channels, international product policy, international pricing policy, and export/import management. Frequency: Fall and Winter.

MKT 3510 Customer Value & Relationship Marketing (3 credits)
The Customer Value and Relationship Marketing course builds on the principle the customer is at the center of the firm’s activity and that by delivering superior value and building long-term relationships the firm will be competitive and generate sales and profits. Every successful firm whether marketing to consumers or to businesses, has developed customer relationship strategies, tools, and processes to provide outstanding value to customers. The course approaches building customer value and relationships from three important perspectives. First, the course focuses on the customer using key marketing concepts such as satisfaction, loyalty, retention and the strategies used to build these. Second, the course develops implementing customer relationship management from the organizational perspective across all functional areas and with special emphasis on sales and marketing. Third, the course introduces students to the importance of data management as a foundation of customer relationship management and marketing insight and the importance of evaluative tools to measure the progress of a customer relationship program. The course will use lectures, discussions, case problems and written assignments. Prerequisite: MKT 3050. Frequency: Every Winter.

MKT 3600 Digital and Search Engine Marketing (3 credits)
In this course, students will examine how online marketing techniques can maximize brand awareness and sales generation. Through marketing plan and other exercises, students
will learn how to develop advertising and communications strategies that blend traditional marketing concepts with marketing in a digital age. Specifically, the course demonstrates how to boost website traffic through online advertising, precision email campaigns and websites designed for customer usability. In addition, students will further examine how engine marketing techniques and keyword research are used in Web 2.0 environments to maximize website exposure and viewer experience. The course will then demonstrate the most effective ways to measure these results through web analytics. 

**Prerequisites:** MKT 3050. **Frequency:** Every Fall and Winter.

**MKT 3620 Social Networking and Content Marketing (3 credits)**
This course offers a comprehensive overview of how content marketing and social networking strategies are used in brand awareness and sales generation. Using both educational and entertaining formats, students will learn how to best engage their target communities with a media mix of live video, photo-based, audio and textual content. Strategies will be developed for social networks to spread marketing content, building target audience communities and creating thought leadership. In addition, students will learn how to activate and engage communities of these networks with campaigns and brand conversations as well as share-worthy content. The course includes social media marketing plan exercises that provide hands-on experience in fan engagement, content mix and social community development. In addition, context-marketing strategies will be examined for reaching audiences through real-time mobile apps and behavioral targeting techniques. 

**Prerequisite:** MKT 3050. **Frequency:** Every Fall and Winter.

**MKT 3900 Marketing Internship (3 credits)**
The Huizenga College internship fosters learning through the application of classroom theory in the workplace. During the course, the student also focuses on practical career skills and personal professional goals with individual guidance from the professor. The minimum work requirement is 180 hours during one semester (16 weeks). Contact Academic Advising for registration.

**ACADEMIC REQUIREMENTS:** good academic standing, GPA of 2.5 or higher, and completion of at least 36 credit hours. 

**Prerequisite:** MKT 3050. **Every Fall and Winter.**

**MKT 3910 Special Topics in Marketing (3 credits)**
Topics in marketing that are not included in a regular course offerings. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. 

**Frequency:** Upon request and see academic department chair.

**MKT 4100 Integrated Marketing Communication (3 credits)**
The Integrated Marketing Communication course introduces students to the concept and application of integrating the elements of advertising, sales promotion, public relations, direct marketing and other essentials of the marketing mix to support the overall marketing strategy. IMC allows marketers to effectively and efficiently reach prospects and retain customers with consistent brand messages in the context of fragmented media and increasing customer empowerment through the Internet. Emphasis will be placed on linking the fundamentals of segmentation, targeting, positioning, buyer behavior, and branding with planning, budgeting, and executing a comprehensive, integrated marketing communication program from message development through media selection.

**Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite:** MKT 3060. **Every Fall.**

**MKT 4700 Marketing Research (3 credits)**
This course outlines the fundamentals of research methodology and its application to the solution of marketing problems. Students are exposed to procedures and analytical tools for collection, analysis and interpretation of data for marketing decisions. Topics include: problem definition, research design, questionnaire construction, sampling, attitude scaling, statistical analysis, presentation and evaluation of research findings. 

**Prerequisite:** MKT 3060. **Frequency:** Every Winter.

**MKT 4966 Travel Study in Marketing (3 credits)**
This travel study course aims to provide students with a thorough understanding and firsthand look at a specific area of the world through the lenses of business and marketing. Students will be introduced to the challenges organizations face when working in the specific country of travel. The course is taught using a combination of in-country and pre-arrival lectures, company visits, and presentations.

**Frequency:** Every Fall and Winter.

**MSLR 3201 Leadership and Problem Solving (3 credits)**
This travel study course aims to provide students with a thorough understanding and firsthand look at a specific area of the world through the lenses of business and marketing. Students will be introduced to the challenges organizations face when working in the specific country of travel. The course is taught using a combination of in-country and pre-arrival lectures, company visits, and presentations.

**Frequency:** Upon request and see academic department chair.

**MSLR—Military Sci & Ldshp/ROTC**

**MSLR 1001 Introduction to the Army (2 credits)**
Examines the unique duties and responsibilities of officers, organization and role of the Army, review skills pertaining to fitness and communication, analyze Army values and expected ethical behavior. Leadership laboratory is mandatory for ROTC Cadets and complements this course with hands-on experiences. The lab requirement of MSLR 1001/MSLR 1002 meets on Thursdays from 11:00am – 1:00pm. 

**Frequency:** Every Fall and Winter.

**MSLR 1002 Foundations of Leadership (2 credits)**
This course introduces students to the concept and application of integrating the elements of advertising, sales promotion, public relations, direct marketing and other essentials of the marketing mix to support the overall marketing strategy. IMC allows marketers to effectively and efficiently reach prospects and retain customers with consistent brand messages in the context of fragmented media and increasing customer empowerment through the Internet. Emphasis will be placed on linking the fundamentals of segmentation, targeting, positioning, buyer behavior, and branding with planning, budgeting, and executing a comprehensive, integrated marketing communication program from message development through media selection.

**Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite:** MKT 3060. **Every Fall.**

**Frequency:** Every Fall and Winter.

**MSLR 2101 Individual Leadership Studies (2 credits)**
Develops knowledge of self, self-confidence, and individual leadership skills, develop problem solving and critical thinking skills, apply communication, feedback, conflict resolution skills. Leadership laboratory is mandatory for ROTC Cadets and complements this course with experiential learning exercises. 

**Frequency:** Every Fall and Winter.

**MSLR 2102 Leadership and Teamwork (2 credits)**
Examine how to build successful teams, various methods for influencing action, effective communication in setting and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback. Focuses on self-development guided by knowledge of self and group processes, challenges current beliefs, knowledge, and skills as a small group leader.

**Frequency:** Every Fall and Winter.

**MSLR 2101 Leadership and Problem Solving (3 credits)**
This travel study course aims to provide students with a thorough understanding and firsthand look at a specific area of the world through the lenses of business and marketing. Students will be introduced to the challenges organizations face when working in the specific country of travel. The course is taught using a combination of in-country and pre-arrival lectures, company visits, and presentations.

**Frequency:** Upon request and see academic department chair.

**MSLR—Military Sci & Ldshp/ROTC**

**MSLR 1001 Introduction to the Army (2 credits)**
Examines the unique duties and responsibilities of officers, organization and role of the Army, review skills pertaining to fitness and communication, analyze Army values and expected ethical behavior. Leadership laboratory is mandatory for ROTC Cadets and complements this course with hands-on experiences. The lab requirement of MSLR 1001/MSLR 1002 meets on Thursdays from 11:00am – 1:00pm. 

**Frequency:** Every Fall and Winter.

**MSLR 1002 Foundations of Leadership (2 credits)**
This course introduces students to the concept and application of integrating the elements of advertising, sales promotion, public relations, direct marketing and other essentials of the marketing mix to support the overall marketing strategy. Focuses on self-development guided by knowledge of self and group processes, challenges current beliefs, knowledge, and skills as a small group leader.

**Frequency:** Every Fall and Winter.
This course will introduce fundamentals of music theory including chord progressions, song forms, and harmonic techniques used in commercial music. This course will develop the necessary music skills, abilities, and techniques in music performance, vocal, and instrumental. You will learn, practice, and develop these skills and abilities through a variety of methods including aural and written theory, music notation, the use of computers in music production, and the application of music production software. You will also develop the skills and techniques required to produce commercial music, including the ability to write, produce, and analyze commercial music.

MUSC 1200 Piano I (3 credits)
A laboratory class designed to integrate aural and written theory through the development of keyboard proficiency. Prerequisite: Every Fall and Winter.

MUSC 1250 Piano II (3 credits)
A laboratory class designed to further integrate aural and written theory through development of keyboard proficiency. Prerequisite: MUSC 1200. Frequency: Every Winter.

MUSC 1300 Beginning Guitar Class (3 credits)
A course designed to learn basic rhythm patterns and scales, standard chord sequences and progressions from different styles for the developing electric or acoustic guitar player. Frequency: Every Fall and Winter.

MUSC 1500 Beginning Voice (3 credits)
A performance-oriented course designed to introduce, develop and reinforce fundamental vocal skills and techniques. Frequency: Every Fall.

MUSC 1960 Commercial Music Theory (3 credits)
This course will introduce fundamentals of music theory including chord progressions, song forms, and harmonic techniques used in commercial music. Students will develop the foundation to write and analyze commercial music. Frequency: Every Fall.

MUSC 2050 Beginning Applied Instruction (2 credits)
Beginning Applied Instruction is a weekly lesson designed to examine and practice musical technique (digital, vocal, or instrumental) at a deeper level of understanding. Outcomes will be fostered through instructor modeling and demonstration; student achievement will be assessed through instructor feedback, student reflection, and peer review. Prerequisite: Permission of program director. Frequency: Every Fall and Winter. Repeatable.

MUSC 2600 Music Production I (3 credits)
This three credit course is an introduction to the use of computers in music production and music notation. Basic software and concepts in music technology will be explored and applied. Sources, selection, evaluation, creation, and implementation of electronic media for the musician will be covered in this course. Frequency: Even Year Fall.

MUSC 2900 Introduction to the Music Industry (3 credits)
This course will introduce and examine the music industry from a practical, historical, and contextual viewpoint. The music product will be considered as well as career options for students as developing producers and performers. Students will develop the foundation to produce and analyze commercial music. Frequency: Odd Year Winter.

MUSC 2960 Creating Commercial Music (3 credits)
This course will develop the necessary music theory fundamentals to create commercial music. Students will analyze commercial repertoire to more fully understand improvisation, stylistic interpretation, and application of technical skill. Prerequisite: MUSC 1960. Frequency: Every Winter.

MUSC 3050 Intermediate Applied Instruction (2 credits)
Intermediate Applied Instruction is a weekly lesson designed to examine and practice musical technique (digital, vocal, or instrumental) at a deeper level of understanding. Outcomes will be fostered through instructor modeling and demonstration; student achievement will be assessed through instructor feedback, student reflection, and peer review. Prerequisite: Permission of program director. Frequency: Every Fall and Winter. Repeatable.

MUSC 3301 Ensemble I (1 credits)
Ensemble focuses on solving production-based problems through a flexible, adaptive approach to contemporary music. Collaboration among musical performers, composers, and producers in Ensemble will develop proficiency in writing, rehearsing, and presenting a variety of musical
MUSC 3302 Ensemble II (1 credits)
Ensemble focuses on solving production-based problems through a flexible, adaptive approach to contemporary music. Collaboration among musical performers, composers, and producers in Ensemble will develop proficiency in writing, rehearsing, and presenting a variety of musical styles and original compositions. Pass/Fail only. Prerequisite: Permission of program director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MUSC 3303 Ensemble III (1 credits)
Ensemble focuses on solving production-based problems through a flexible, adaptive approach to contemporary music. Collaboration among musical performers, composers, and producers in Ensemble will develop proficiency in writing, rehearsing, and presenting a variety of musical styles and original compositions. Pass/Fail only. Prerequisite: Permission of program director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MUSC 3304 Ensemble IV (1 credits)
Ensemble focuses on solving production-based problems through a flexible, adaptive approach to contemporary music. Collaboration among musical performers, composers, and producers in Ensemble will develop proficiency in writing, rehearsing, and presenting a variety of musical styles and original compositions. Pass/Fail only. Prerequisite: Permission of program director. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MUSC 3305 Ensemble V (1 credits)
Ensemble focuses on solving production-based problems through a flexible, adaptive approach to contemporary music. Collaboration among musical performers, composers, and producers in Ensemble will develop proficiency in writing, rehearsing, and presenting a variety of musical styles and original compositions. Pass/Fail only. Prerequisite: MUSC 3304. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MUSC 3306 Ensemble VI (1 credits)
Ensemble focuses on solving production-based problems through a flexible, adaptive approach to contemporary music. Collaboration among musical performers, composers, and producers in Ensemble will develop proficiency in writing, rehearsing, and presenting a variety of musical styles and original compositions. Pass/Fail only. Prerequisite: MUSC 3305. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

MUSC 3600 Music of World Cultures (3 credits)
This course will introduce musical traditions from around the world and examine how cultural setting shapes the music. The means derived from musical styles and structures will be assessed through active and informed listening. Non-Western cultures studied may include West Africa, Asia, India, Latin America, and more. Prerequisite: COMP 2000 or COMP 2000H or COMP 2020. Frequency: Every Winter.

MUSC 3900 Popular Music in Western Culture (3 credits)
Popular Music in Western Culture is a course that studies popular music in the dynamic and highly commercialized Western society. With an understanding of the basic elements of music, we will examine the historical and sociological forces that shaped music of the 20th and 21st centuries creating phenomena such as Elvis, the Beatles, Madonna, Jay-Z, Beyonce, and many more. Prerequisite: COMP 2000 or COMP 2000H. Course Frequency: Every Fall.

MUSC 4050 Advanced Applied Instruction (2 credits)
Advanced Applied Instruction is a weekly lesson designed to culminate in a capstone project for music majors. Considerable flexibility of project topics will allow and serve as a synthesis for the student’s course of study in the Bachelor of Arts in Music. Examples include but are not limited to research papers, recitals, presentations of original works, digital portfolios, or other music-related projects. Prerequisite: Permission of program director. Frequency: Every Fall and Winter.

MUSC 4100 Composition/MIDI (3 credits)
This course is designed to study in detail film/media composition techniques through midi notation and audio recording. Composition of music and harmony in the digital domain, from the basic concepts behind synthesizers and sequencers to production techniques such as mixing, mastering and signal processing will be covered. Prerequisite: MUSC 1960. Frequency: Odd Year Fall.

MUSC 4650 Advanced Music Production (3 credits)
Advanced Music Production is designed to amplify and focus student interest and study in music production within media. Through lectures, class demonstrations, and projects, the student develops skill and knowledge in the technical and artistic aspects of audio and sound recording techniques for film and television. Prerequisite: MUSC 2600. Frequency: Odd Year Fall.

MUSC 4900 Special Topics in Music (3 credits)
An advanced course in a particular composer, collection, or musicological period. Specific focus to be announced. May be repeated once for credit if content changes and with written consent of division director. Prerequisites: one MUSC course and COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Upon Request; see academic department chair.

MUSC 4950 Internship in Music (3 credits)
Internship in Music requires a 15-20 hour per week field or work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisite: cumulative GPA of 2.5 or higher, completion of 60 or more credit hours, and permission of division director. Repeatable to 6 credits. Frequency: Every Fall and Winter.

MUSC 4990 Independent Study in Music (3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of division director required. Prerequisites: one MUSC course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Upon Request; see academic department chair.

MUSE—Museum

MUSE 1000 Transdisciplinary Arts: Demystifying the Creative Process (3 credits)
“Viewing and creating art come together in this immersive, interdisciplinary museum experience. Through in-depth study of a variety of art forms, students will examine the cultural conditions of artistic production through object-based observation. Workshops in a variety of disciplines including visual art, music, dance and drama will develop and strengthen an understanding and appreciation of self-expressive art-making experiences, nurturing spontaneity, improvisation and imagination. Students will explore the inter-relationships of the theory and practice learned in context to each student’s individual course of study. Innovation can be found at the intersection of distinct disciplines. The purpose of this course is to expose students to a variety of artistic forms; facilitate an understanding of the arts in theory, context and practice; form relationships between various artistic disciplines; and develop students’ capacity to apply creative problem solving to any field of study. The role of the museum as laboratory is explored through the unique resources available within the exhibits, facilities and studios at the Museum of Art | Fort Lauderdale and its Academy of Art.”
NEUR—Behavioral Neuroscience

NEUR 1020 Nutritional Neuroscience (3 credits)
Nutritional neuroscience explores the relationship of nutrition to behavior and neuroscience. This class covers the effects of macronutrients and micronutrients on brain function and behavior. It specifically explores the role of foods, specific nutrients, food constituents, and food additives on cognitive behavior, mood, and overall brain function. Frequency: Every Fall and Winter.

NEUR 2090 Sports Neuroscience (3 credits)
This course integrates the fields of neuroscience with exercise and sports science. The course will explore the neuroscience of exercise and performance, including measures of motor and sensory systems (e.g., afferent and efferent motor pathways) and brain function (e.g., motivation, behavior, and arousal) as it applies to exercise. This course includes an analysis of the neurobiology underlying exercise and sports performance. Equivalent Course: EXSC-2090. Cross listed with EXSC-2090. Frequency: Every Fall and Winter.

NEUR 2500 Introduction to Neuroscience/ Lab (4 credits)
This course highlights the biological structures and functions of the brain and nervous system and introduces the fundamental concepts in neuroscience and research methods used by behavioral neuroscientists. Concepts range from cellular to behavioral aspects of neuroscience. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

NEUR 2600 Introduction to Neuroanatomy (3 credits)
This course will introduce students to structural, functional, and developmental features of the human nervous system. After each major structure, system, or anatomical pathway is presented, a clinical component will emphasize normal function and dysfunction resulting from injury or disease. Clinical cases will be presented to reinforce the relationship between structure and function. Prerequisite: None Frequency: Every Fall and Winter.

NEUR 2700 Research Methods and Data Analysis in Behavioral Neuroscience /Lab (4 credits)
This course will introduce students to a wide range of research strategies and methods being used by behavioral neuroscientists. The course will focus on modern, common techniques used in hypothesis-driven research to collect scientifically relevant and publishable data. Examples from various areas of inquiry (e.g., learning and memory, sleep, etc.) will be used to illustrate both applications and limitations of these techniques. Prerequisite: NEUR 2500 Experiential Education and Learning (ExEL):

Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Winter and Fall.

NEUR 3000 Behavioral Genetics (3 credits)
Students will have the opportunity to integrate information from a variety of specialties in behavioral neuroscience. Each seminar will have a focal theme that will allow students to gain new perspectives, as well as apply knowledge from prior courses and experiences. This course is presented as a capstone experience; therefore students with advanced standing in the behavioral neuroscience major will benefit the most from the seminar. Prerequisite: NEUR 2500. Frequency: Every Fall and Winter.

NEUR 3010 Introduction to Theoretical and Computational Neuroscience (3 credits)
This course will develop theoretical and computational approaches to structural and functional organization in the brain. The course will cover the introduction and motivation of simplified models of neurons that are suitable for exploring information processing in large brain-like networks. Additionally, it introduces several fundamental network architectures and discusses their relevance for information processing in the brain, giving some examples of models of higher-order cognitive functions to demonstrate the advanced insight that can be gained with such studies. The course will be appropriate for advanced undergraduates and beginning graduate students. Prerequisites: MATH2100 or MATH2100H. Frequency: Infrequent.

NEUR 3100 Developmental Neuroscience (3 credits)
This course provides an overview of the progressive stages of neural development. The course will focus on molecular aspects of developmental neuroscience, with an emphasis on known signaling pathways involved in neural growth and specification. Current research in several fields such as growth cone guidance and collapse, activity dependent development, and applications of these to injury and disease will be discussed. Prerequisite: NEUR 2500 Frequency: Every Fall and Winter.

NEUR 3200 Drugs and the Brain (3 credits)
This course provides a foundation in neuropharmacology. Topics covered include the impact of psychotropic drugs on the nervous system, basic principles of pharmacodynamics and pharmacokinetics, synaptic transmission, and an overview of brain structure and function. Prerequisite: NEUR 2500 Frequency: Odd Year Winter.

NEUR 4100 Neurobiology of Disease (3 credits)
This course is based on the National Institutes of Health Blueprint for Course Development in the Neurobiology of Disease. This course provides a lecture and literature based overview of neurodegenerative diseases and disorders. The course will focus on basic genetic, molecular, and cellular mechanisms that underlie a wide range of neurodegenerative diseases and disorders. The course is designed to foster an understanding of the links between basic science, disease-oriented research, and translational research. The course offers a foundation of knowledge in critical areas of basic and clinical neuroscience. Prerequisites: NEUR 2500. Frequency: Every Winter.

NEUR 4880 Senior Seminar in Behavioral Neuroscience (3 credits)
Students will have the opportunity to integrate information from a variety of specialties in behavioral neuroscience. Each seminar will have a focal theme that will allow students to gain new perspectives, as well as apply knowledge from prior courses and experiences. This course is presented as a capstone experience; therefore students with advanced standing in the behavioral neuroscience major will benefit the most from the seminar. Prerequisite: NEUR 2700. Frequency: Every Fall and Winter.

NEUR 4950 Internship in Behavioral Neuroscience (1-3 credits)
A 16-week work experience in the student’s major area of study or career interest. This can include placement to work in a research laboratory, to engage in applied science in the private sector, or otherwise to gain first-hand experience outside the classroom in behavioral neuroscience or a closely related field. Student will receive guidance from both an on-site supervisor and a behavioral neuroscience faculty member. Consult academic department for additional details and requirements. Pre-requisites: Cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, 36 completed credit hours, including at least 12 credit hours completed at NSU, supervision of faculty member, and permission of department chair. Frequency: Upon request and with approval of department chair.

NEUR 4990A Independent Study in Behavioral Neuroscience A (1-3 credits)
Independent, faculty supervised academic research. Students will develop the research questions and the techniques for their study. Topics will vary by individual research projects. Prerequisite: Written consent of instructor and department chair. Frequency: Upon request see academic Department Chair.

NEUR 4990B Independent Study in Behavioral Neuroscience B (1-3 credits)
Independent, faculty supervised academic research. Students will develop the research questions and the techniques for their study. Topics will vary by individual research projects. Prerequisite: Written consent of instructor and department chair. Frequency: Upon request see academic Department Chair.

NEUR 4990C Independent Study in Behavioral Neuroscience C (1-3 credits)
Independent, faculty supervised academic research. Students will develop the research questions and the techniques for their study. Topics will vary by individual research projects. **Prerequisite:** Written consent of instructor and department chair. **Frequency:** Upon request see academic Department Chair.

**NEUR 4990D Independent Study in Behavioral Neuroscience D (1-3 credits)**

Independent, faculty supervised academic research. Students will develop the research questions and the techniques for their study. Topics will vary by individual research projects. **Prerequisite:** Written consent of instructor and department chair. **Frequency:** Upon request see academic Department Chair.

**NUR—Nursing**

**NUR 3000 Transition to Baccalaureate Nursing Education for Registered Nurses (3 credits)**

This course is designed to assist the registered nurse as an adult learner to make the transition to the university setting and the role of the nursing student. Students will be introduced to computer skills that facilitate success in achieving their educational goals at NSU and how the application of these skills can be used in nursing practice. Students will learn computer skills that include foundational concepts of information technology, Microsoft Office, and access to the NSU online library data bases and resources to support evidence-based practice. In addition, students will be introduced to the concepts of the American Psychological Association (APA) and scholarly writing. Emphasis is placed on the development of the knowledge and competencies in computer technology that are necessary for registered nurses in education and healthcare. The class will involve active participation in cooperative group activities as well as individualized activities. **Frequency:** Every Fall and Winter

**NUR 3029 Foundations of Health Assessment (3 credits)**

This course introduces the entry level student to foundational health assessment skills emphasizing data collection. Students will be expected to use principles based on the biological sciences to perform a holistic health assessment. Students will interpret pertinent data in order to make sound clinical judgments needed to deliver safe, quality and effective nursing care. Students will demonstrate competency in communicating and documenting assessment findings. Integrity, compassion and stewardship will be discussed as they relate to cultural awareness and legal and ethical issues that pertain to health assessment. **Frequency:** Every Winter and Summer

**NUR 3030 Health Assessment (3 credits)**

This course emphasizes the knowledge, skills, and competencies necessary to complete a health assessment for clients across the life span. Integrity, compassion and stewardship will be demonstrated as related to cultural awareness, legal and ethical issues. This course analyzes the concepts of health assessment methodology which include interviewing, history taking, and physical assessment. Practicing nursing students will utilize assessment skills in identifying pertinent data as it relates to evidence-based health promotion and health education strategies. **Frequency:** Every Fall and Winter

**NUR 3031 Pathophysiology (3 credits)**

The focus of the course is on the pathogenesis of selected diseases leading to alterations of body structure and functions across the lifespan. The practicing registered nurse student will discuss and apply cell structure, function, genetic control and its impact on the disease process utilizing case study review. The student will integrate and apply pathophysiological concepts to client care in the development of primary, secondary, and tertiary interventions to attain, maintain, and retain the health state. Contemporary treatment, legal and ethical issues and health promotion concepts pertaining to pathophysiological disorders will be explored. **Frequency:** Every Winter and Summer

**NUR 3032 Foundations of Pathophysiology (3 credits)**

This course introduces the entry level student to concepts of pathophysiology based on principles from the biological sciences. Students will examine the phenomena that cause changes in physiological functioning. Specific system disorders will be investigated, using current evidence-based literature, as a basis for health promotion. Students will utilize pathophysiological concepts as a basis for making sound clinical judgments needed to deliver safe, quality and effective care. Ethnic, cultural and other influences on health will be discussed. **Frequency:** Every Winter and Summer

**NUR 3050 Research Methodologies and Evidence-Based Practice (3 credits)**

This course prepares the baccalaureate nursing students to become consumers of research. Students will be introduced to the research processes essential to providing evidence based care and disseminate best practices. Research designs will be discussed as a basis for critiquing the efficacy of selected research studies. Students will be introduced to the legal and ethical principles which guide the integrity of nursing research. The nurse’s role in retrieval, appraisal, and synthesis of evidence in collaboration with members of the inter-professional team to improve patient outcomes will be addressed. **Frequency:** Every Winter and Summer

**NUR 3051 Introduction to Nursing Research (3 credits)**

This course introduces essential concepts of nursing research and evidence-based practice. Students will review the scientific merit of research methods with an emphasis on implication and application for evidence based nursing practice. Practicing Registered Nurses will build upon existing knowledge and skills related to research to improve patient outcomes, nursing practice, and interprofessional collaboration. Students will also examine the contemporary trends and legal and ethical issues related to...
the research process. Frequency: Every Fall and
Summer.

**NUR 3110 Health Care Ethics for Nursing Students (3 credits)**

The course provides an opportunity for the nursing student to assess ethical principles and legal issues confronting nurses in a variety of health care settings. Students learn the foundations for critically analyzing ethical dilemmas in nursing practice, clarifying values and promoting moral considerations regarding health care challenges through ethical-decision models, and professional ethical and legal standards under which the professional nurse practices. Emphasis is on ethical obligations of the professional nurse's role as members of a profession, providers of care, and designers and managers of care. Frequency: Every Fall and Summer.

**NUR 3111 Health Care Ethics for Nurses (3 credits)**

The course provides an opportunity for the professional nurse to assess ethical principles and legal issues confronting nurses in a variety of health care settings. Students learn the foundations for critically analyzing ethical dilemmas in nursing practice, clarifying values and promoting moral considerations regarding health care challenges through ethical-decision models, and professional ethical and legal standards under which the professional nurse practices. Emphasis is on ethical obligations of the professional nurse's role as members of a profession, providers of care, and designers and managers of care. Frequency: Every Fall and Summer.

**NUR 3130 Foundations of Professional Nursing Practice (6 credits)**

This course introduces the entry level student to the discipline of nursing in which they will provide holistic and compassionate care for diverse populations. Students will begin to develop the knowledge, skills and attitudes needed to provide safe, quality and effective nursing care. Students will start to use clinical/critical reasoning, communication and assessment skills to care for patients across the health illness continuum and across the life span understanding the need for stewardship and integrity in this changing healthcare environment. The roles of provider of care, coordinator of care, advocate and educator will be applied in the delivery of competent patient care. Frequency: Every Winter and Summer.

**NUR 3160 Introduction to Professional Nursing (3 credits)**

This course focuses on the role transition to baccalaureate prepared nursing student as provider of care, manager of care, and member of the profession. The students will explore the history of nursing and how society views the nursing profession. Ethical and legal principles guiding the nursing profession are introduced. Fall and Winter.

**NUR 3180 Primary Concepts of Adult Nursing I (6 credits)**

This course introduces the entry-level student to the application of nursing concepts in order to provide holistic and compassionate care for patients who have specific disorders. Students will apply knowledge, skills, and attitudes needed to provide safe, quality, and effective nursing care. Students will continue to develop clinical/critical reasoning, communication, and assessment skills to care for patients across the health illness continuum understanding the need for stewardship and integrity in this changing healthcare environment. Topics covered include gastrointestinal, endocrine, genitourinary, immunological, hemotological, and oncological disorders. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Summer.

**NUR 3191 Pharmacological Basis for Nursing Interventions I (2 credits)**

This course introduces the entry-level student to pharmacologic concepts in order to provide safe and effective care for patients who have specific disorders. The concepts of drug efficacy, pharmacokinetics, mechanism of action, and medication interactions will be introduced as a basis for providing safe, quality, and effective nursing care. Students will apply mathematical concepts to calculate safe medication dosages. Students will begin to develop clinical/critical reasoning as related to the nurse's role in pharmacotherapy. Topics covered include medications used in the treatment of gastrointestinal, endocrine, immune, and hematological/oncological disorders and in the treatment of pain and anxiety. Frequency: Every Fall and Summer.

**NUR 3192 Pharmacological Basis for Nursing Interventions II (2 credits)**

This course provides opportunities for the entry level student to integrate pharmacologic concepts in order to provide safe and effective care for patients who have specific disorders. Students will apply mathematical concepts to calculate safe medication dosages. The concepts of drug efficacy, pharmacokinetics, mechanism of action, and medication interactions will be examined as a basis for safe, quality, and effective nursing care. Students will continue to improve clinical/critical reasoning as related to the nurse's role in pharmacotherapy. Topics covered include medications used in the treatment of cardiovascular, peripheral vascular, respiratory, neurological, musculoskeletal and sensory disorders. Frequency: Every Fall and Winter.

**NUR 3193 Pharmacological Basis for Nursing Interventions (4 credits)**

This course provides opportunities for the entry level student to integrate pharmacologic concepts in order to provide safe and effective care for patients who have specific disorders. Students will apply mathematical concepts to calculate safe medication dosages. The concepts of drug efficacy, pharmacokinetics, mechanism of action, and medication interactions will be examined as a basis for safe, quality, and effective nursing care. Students will continue to improve clinical/critical reasoning as related to the nurse's role in pharmacotherapy. Frequency: Every Fall and Summer.

**NUR 4020 The Nurse as a Leader and Manager (3 credits)**

This course is designed to assist the baccalaureate nursing student apply leadership and management theories, concepts, and skills. Principles of stewardship, prioritization, delegation, quality improvement, patient safety, and evidence-based practice will be discussed. Students will examine the basic concepts of an organizational structure, mission, vision, philosophy, and core values as they relate to individual ethics and values. Students will investigate power, accountability, conflict management and team-building within an interprofessional team. Legal, ethical, and political issues that impact quality and safety in the delivery of compassionate and competent patient care will be analyzed. Frequency: Every Fall and Summer.

**NUR 4021 Transformational Nursing Leadership (3 credits)**

This course prepares the practicing registered nurse to apply evidence-based leadership and management theories, concepts, and skills to be full partners and work productively in interprofessional teams to facilitate the transformation of complex healthcare systems. Principles of stewardship, prioritization, delegation, communication, quality improvement, patient safety, development of self, and evidence-based practice will be analyzed. Students will investigate power, accountability, conflict management, and team-building within an interprofessional team. Emphasis will be placed on organizational systems structure and culture, change management, human resource management, and performance improvement in care delivery systems. This course will analyze legal, ethical, cultural, and political issues related to leadership and management. Frequency: Every Winter and Summer (RN-BSN)

**NUR 4030 The Business of Health Care (3 credits)**

This course focuses on the environmental conditions of healthcare systems and how they relate to today's professional nursing roles in leadership, management, and patient-centered care, incorporating the values of stewardship, integrity and competence. Students will analyze the principles of financial management, healthcare reimbursement, regulatory processes,
healthcare policy, and healthcare reform related to current nursing practice. This course will assist the student to differentiate the concepts of cost and revenue, accounting vocabulary, budgeting, human resource management, and financial processes, functions, and reports commonly utilized in healthcare systems. Emphasis will be placed on the political and economic forces that influence the development of health policy and professional nursing practice. Students will assess how financial management integrates with safety, information technology, patient-centered care, interprofessional teams, quality, and evidence-based practice. 

**NUR 4031 The Business of Healthcare in Complex Systems (3 credits)**
This course focuses on the financial environments of healthcare systems and how they relate to today's professional nursing roles in leadership, management, and patient-centered care, incorporating the values of stewardship, integrity and competence. Students will analyze the principles of financial management, healthcare reimbursement, regulatory processes, healthcare policy, and healthcare reform related to current nursing practice. This course will assist the student to differentiate the concepts of cost and revenue, accounting vocabulary, budgeting, human resource management, and financial processes, functions, and reports commonly utilized in healthcare systems. Emphasis will be placed on the political and economic forces that influence the development of health policy and professional nursing practice. Students will assess how financial management integrates with safety, information technology, patient-centered care, interprofessional teams, quality, and evidence-based practice. Frequency: Every Fall and Winter

**NUR 4101 Theory and Research Foundations for Professional Nursing (3 credits)**
This course focuses on the nursing students' acquisition, evaluation, utilization, and interpretation of nursing theories and research as a foundation for patient-centered care. Students will be introduced to how to evaluate research and apply evidence-based and best practices to the care of patients. The students will apply legal and ethical principles which guide the integrity of nursing research. In addition, nursing practice knowledge will be derived from the interpretation and application of selected theories from other disciplines. Frequency: Every Summer and Fall.

**NUR 4110 Primary Concepts of Adult Nursing II (6 credits)**
This course provides opportunities for the entry level student to integrate nursing concepts in order to provide holistic and compassionate care for patients who have specific disorders. Students will integrate knowledge, skills and attitudes needed to provide safe, quality and effective nursing care. Students will continue to improve clinical/critical reasoning, communication and assessment skills to care for patients across the health illness continuum and across the life span, understanding the need for stewardship and integrity in this changing healthcare environment. Topics covered include cardiovascular, peripheral vascular, respiratory, neurological, musculoskeletal and sensory disorders. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

**NUR 4120 Advanced Concepts of Adult Nursing (5 credits)**
This course provides opportunities for the entry level student to synthesize nursing concepts in order to create and manage holistic and compassionate care for patients who have complex needs. Students will incorporate knowledge, skills and attitudes needed to provide safe, quality and effective nursing care to patients who have multiple system disorders. Students will apply clinical/critical reasoning, communication and assessment skills to care for patients across the health illness continuum understanding the need for stewardship and integrity in this changing healthcare environment. Legal and ethical issues pertaining to patients who have complex multi-system health care needs will be analyzed. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

**NUR 4130 Concepts of Maternal-Child Nursing and Families (5 credits)**
This course integrates developmental theories, theories from the biological and social sciences, family nursing theory, and evidence-based practice in order to provide holistic and compassionate care for the childbearing and child-rearing families. Health promotion and risk reduction, contemporary trends, social justice issues, and legal and ethical issues, will be addressed. Students will apply knowledge, skills and attitudes needed to provide safe, quality and effective nursing care. Students will apply clinical/critical reasoning, communication and assessment skills to care for patients across the health illness continuum. The students will examine the need for stewardship and integrity in this changing healthcare environment. Topics covered include care of the members of childbearing and child rearing families and specific disorders in these populations. Frequency: Every Winter and Summer.

**NUR 4140 Population Health: Promotion, Prevention, and Disease Management (4 credits)**
This course is designed to prepare the practicing registered nurse to utilize evidenced based health promotion, health prevention, and disease management as it applies to diverse individuals, families, groups, communities, and populations. Essential concepts of epidemiology, community based assessment and evaluation, equity, vulnerable populations, and community resources are introduced. This course leads to an increased understanding of the relationships related to socio-cultural contexts, ethics, and health/illness beliefs and practices. Students will demonstrate an ability to facilitate health care delivery to populations of diverse cultures using effective communication skills that include negotiation, problem-solving skills, and collaboration with various interprofessional health care teams. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Summer.

**NUR 4150 Population Health: Promotion, Prevention, and Disease Management (4 credits)**
This course is designed to prepare the practicing registered nurse to utilize evidenced based health promotion, health prevention, and disease management as it applies to diverse individuals, families, groups, communities, and populations. Essential concepts of epidemiology, community based assessment and evaluation, equity, vulnerable populations, and community resources are introduced. This course leads to an increased understanding of the relationships related to socio-cultural contexts, ethics, and health/illness beliefs and practices. Students will demonstrate an ability to facilitate health care delivery to populations of diverse cultures using effective communication skills that include negotiation, problem-solving skills, and collaboration with various interprofessional health care teams. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Summer.

**NUR 4151 Population Health: Promotion, Prevention, and Disease Management (4 credits)**
This course is designed to prepare the practicing registered nurse to utilize evidenced based health promotion, health prevention, and disease management as it applies to diverse individuals, families, groups, communities, and populations. Essential concepts of epidemiology, community based assessment and evaluation, equity, vulnerable populations, and community resources are introduced. This course leads to an increased understanding of the relationships related to socio-cultural contexts, ethics, and health/illness beliefs and practices. Students will demonstrate an ability to facilitate health care delivery to populations of diverse cultures using effective communication skills that include negotiation, problem-solving skills, and collaboration with various interprofessional health care teams. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Summer.

**NUR 4160 Genetics for Nursing Practice (2 credits)**
This course will focus on providing students with a fundamental understanding of human genetics and its role in diagnosis, disease management, risk reduction and health promotion. Students will learn ways to assess protective and predictive genetic factors, which influence the health of individuals, families, groups, communities, and populations in order to develop a basis for competent nursing care. Students will apply knowledge of inheritance and immuno-genetics in predicting the possible effect of genetics on disease development. The student will evaluate the ethical, social, political and economic impact of selected genetic diseases, DNA-based genetic diagnosis, and gene therapy. Frequency: Every Winter and Summer.

**NUR 4161 Genetic Concepts (2 credits)**
This course will focus on building upon the previous experience and knowledge of the practicing registered nurse to develop a deeper understanding of human genetics and genomics and the role in diagnosis, disease management, risk reduction and health promotion. Students...
will learn ways to assess protective and predictive genetic factors, which influence the health of individuals, families, groups, communities, and populations in order to develop a basis for competent nursing care. The student will apply knowledge of patterns of inheritance and immunogenetics in predicting the possible effect of genetics on disease development. The course will analyze the ethical, social, political, and economic impact of selected genetic diseases, DNA-based genetic diagnosis, and gene therapy. Frequency: Every Winter and Summer

NUR 4171 Nursing and Healthcare Trends (3 credits)
This course integrates contemporary trends in the present complex healthcare delivery system with professional nursing practice. Students will integrate knowledge from previous courses further exploring health care system quality and safety, evidenced-based practice, technology, informatics, and the nurse’s role in today’s healthcare delivery system. This course examines the relationships between quality of care, cost of care, and safety as well as the regulatory effects on patient care and cost. Students will develop skills to address relevant issues within today’s healthcare delivery system. Trends in healthcare informatics are explored and the effects of nursing informatics on communication and safety will be analyzed. Frequency: Every Fall, Winter, and (Summer for RN to MSN students).

NUR 4172 Nursing in Today’s Healthcare Environment (3 credits)
This course integrates contemporary trends in the present complex healthcare delivery system with professional nursing practice. Students will synthesize knowledge from previous courses to further investigate health care system quality, safety, evidenced-based practice, technology, and the professional nurse’s role. The importance of collaborative relationships among interprofessional team members and their impact on quality and value-based care, and patient safety will be analyzed. Students will further develop skills to address relevant legal, ethical and regulatory issues. Frequency: Every Fall and Winter.

NUR 4175 Transition to Graduate Education (9 credits)
The course prepares the student for the transition into graduate nursing studies. It incorporates evidence-based research and various theories that may be utilized to enhance nursing practice. Students will be introduced to concepts and theories of leadership and business, relating these to nursing practice. Ethical and legal issues pertinent to graduate nurse practice environments will be explored. This course will provide an overview of the skills required to be successful as a leader in today’s healthcare environment. Frequency: Every Fall and Summer.

NUR 4180 Nursing Practicum (6 credits)
This course synthesizes all previous knowledge as a foundation for implementing holistic, patient-centered care that reflects an understanding of human growth and development, pathophysiology, pharmacology, medical and nursing management. Students will provide competent, compassionate care to diverse patient and family populations across the health illness continuum, across the lifespan, and in a variety of healthcare settings. Students will incorporate current evidence-based research in delivering safe, quality patient care. The student will work with a registered nurse preceptor and apply leadership skills in delegating, supervising, and collaborating with other members of the interprofessional healthcare team. Students will demonstrate stewardship and integrity when providing patient care in this dynamic healthcare environment. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

NUR 4250 Concepts of Psychiatric-Mental Health Nursing (4 credits)
This course applies theories and concepts from liberal education and evidence-based practice to provide nursing care for diverse populations who have specific psychiatric disorders. The focus is on designing nursing strategies that support mental health and wellness and reduce symptomatology following a reaction to stressors. Contemporary trends in treatment and mental health promotion will be emphasized. The legal and ethical issues pertaining to intrapersonal, interpersonal, and extrapersonal stressors of the psychological variable will be discussed. Students will also reflect on their own behaviors and methods of communication. The course will include both a clinical and didactic component. Frequency: Every Fall and Summer

NUR 4904 Advanced Anatomy & Physiology for Health Professions (4 credits)
This course builds on previously acquired knowledge related to human anatomy and physiology and provides a foundation for understanding pathophysiology. A systematic approach is used to explain the relationship between the structure and function of organ systems. Innovative approaches assist students to apply these concepts in the laboratory setting using effective educational tools and state of the art technology. Frequency: Every Fall and Winter.

OPS—Operations Management

OPS 3880 Operations Management (3 credits)
This course approaches Operations Management from the “inside-out”. It develops the student’s personal understanding of processes, process capabilities, and results and then transfers those into the business environment. The course builds on an understanding of applied statistics to develop an understanding of the planning and the processes involved in the creation of value both through the provision of services and manufacture of goods. Topics include process flow and capability, operations strategy, total quality management (TQM), supply chain and capacity management, process improvement, project management. Prerequisites: Math 3020 or Math 3020H, or Math 2020, or Math 2020H. Frequency: Every Fall and Winter.

OPT—Optometry

OPT 1233 Biochemistry (3 credits)
This course will enable the student to describe and understand the biochemical components of the human body and the metabolism of these components. The biochemical basis of ocular functions will be emphasized where appropriate. (54.0-3)

PADM—Public Administration

PADM 1000 Introduction to Public Administration (3 credits)
Public Administration is a multi-disciplinary discipline that provides students with the basic skills necessary for employment in government, public service, and non-profit organizations. This course is a survey of the field of public administration, and will introduce the student to the history, theories, concepts, and practice of public administration. This course will provide an overview of the major sub-fields in public administration and will serve as a basis for further study in the field.

PADM 2100 Principles of Management in Public Administration (3 credits)
This is an introductory course focusing on fundamental public management theories, concepts, principles, and practices. The course provides an overview of the field at the state and local levels setting the stage for the program’s curriculum. Topics are taken from a variety of subject areas from across the discipline. Students are challenged to explore and evaluate techniques for structuring and resolving managerial problems in public organizations. Prerequisite: COMP 1500 or COMP 1500H, and POLS 1010 and POLS 2100.

PADM 2150 Transforming Public Administration for Sustainable Development (3 credits)
Based on the United Nations’ call to transform public administration to help foster environmental, social and economic sustainability (the three pillars of sustainable development), this course invites students to explore the change of public administration for sustainable development. Through theoretical and practical research of the meaning and relevance of sustainability for our governments, participants will learn how public administration reports and improve on sustainability standards at regional, national and international levels.
They will have the opportunity to partner with a local government and conduct a mini-consultancy project. Participants will combine their skills to develop their expertise on governance for sustainability, to deliver innovative projects and contribute to our governments’ deliverables for sustainable development.

**PADM 2200 Leadership of Public Organizations (3 credits)**
This course exposes students to definitions and conceptualizations of organizational leadership with emphasis on leadership of public bureaucracies. Theories of leadership are examined to identify the skills, qualities and characteristics commonly attributed to the effective leader. Leadership will be examined and linked to various organizational contexts including power, gender, personality, culture, and development. Differences in leadership roles in public and private sector organizations are also explored. **Prerequisite:** PADM 1000.

**PADM 3000 Public Policy (3 credits)**
This course focuses on the public policy process in U.S. states and local governments as well as on how potential ideas for government action are translated from concepts into reality. In addition to providing a basic overview of the processes of policy formulation, implementation and evaluation, this course introduces some of the major stakeholders and actors, both formal and informal, in the world of policymaking. This course examines the policy process at the state and local levels and explores the political contexts in which policies are made, administered, analyzed, and challenged. **Prerequisite:** PADM 2100.

**PADM 3100 Financial Accounting in the Public Sector (3 credits)**
Provides an introduction to financial accounting and its decision-making elements. Areas covered are the conceptual frameworks of accounting, fund accounting, and government financial statements and their components. **Prerequisite:** PADM 2100 and ACT 2300.

**PADM 3200 Public Budgeting (3 credits)**
Public budgeting is the study of how scarce public resources are allocated among competing interests in a political environment. Though resource allocation decisions are essentially economic, fiscal policy decisions are made through public institutions and political processes. This course introduces students to the policies, procedures, and skills relevant to financial management in public sector organizations. The emphasis is on the practice of budgeting, financial reporting, revenue generation, capital budgeting, and debt management. The purpose of the course is to provide the knowledge and skills that all public administration students need as preparation for careers in public management, and to provide a solid foundation for those who wish to study more advanced topics in government policy and finance. **Prerequisite:** PADM 2100 and ACT 2300.

**PADM 3300 Public Sector Human Resource Management (3 credits)**
Human resource management personnel are actively involved in the selection, hiring, training, compensation, job analysis, and performance evaluation functions in public and nonprofit organizations. This course explores each of these functions in turn. Additionally, this course is an introduction to issues encountered by human resource management personnel in the public sector as they perform this vital work. This overview course provides students, future government employees, and future government managers with a foundation for developing human resource management skills and an appreciation for the fact human resource management involves much more than “red tape” and “pushing paper”. **Prerequisite:** PADM 2100.

**PADM 3456 Creativity and Innovation in Government and Social Practices (3 credits)**
The future will be determined by individuals and government organizations who choose to creatively grow and renew. This course will focus on how individuals and teams develop perspectives, principles and practices that will bolster a contagion for newness in operations and social systems. Students will learn the principles and practices which lead to creativity and innovation in government practices addressing citizen needs and societal challenges. Students will learn techniques and tools to strengthen their efforts to better align with individual and team results. The course will also involve reviewing successful innovative government practices and social environments in operation today. Students will produce their own problem, plan and implementation agenda for an existing opportunity in a government or societal deficiency.

**PADM 3910 Special Topics in Public Admin (3 credits)**
Examines topics in Public Administration that are not included in regular course offerings. Specific content and prerequisites may vary. Students may re-enroll for special topics covering different content. **Frequency:** Upon Request; See Department Chair.

**PADM 4100 Data Driven Decision-Making (3 credits)**
Management is a continuous cycle of decision-making and evaluation. What actions should be taken? How should those actions be implemented? Who should take those actions and when? Were the actions effective? How can we improve? These questions must be constantly asked and answered. Accurate identification, collection, and analysis of proper data can enhance management’s potential to make optimal decisions and produce desired outcomes. This course introduces students to methods for identifying, collecting and analyzing data and provides students hands-on opportunities to apply their analyses to decision scenarios related to operations management, strategic planning, and program evaluation. **Prerequisite:** PADM 2100 and MATH 2020.

**PADM 4200 Planning, Zoning, and Development (3 credits)**
This course will cover the fundamentals of land use planning with an emphasis on sustainable development. A more complete course description will be developed by the department in collaboration with an expert in this area. **Prerequisite:** PADM 2100.

**PADM 4400 Public Sector Labor Relations (3 credits)**
This course explores public sector collective bargaining and labor relations. Topics include the historical background of collective bargaining, current bargaining practices, labor and management bargaining strategies, and contract maintenance. Students will participate in simulated collective bargaining negotiations. **Prerequisite:** PADM 2300.

**PADM 4500 Administrative Ethics (3 credits)**
This course will provide students with an understanding of the core assumptions of the major ethical theories. Armed with this knowledge, students will evaluate ethical dilemmas in the public service, and analyze the role social and political forces play in shaping these dilemmas. **Prerequisite:** PADM 2100.

**PADM 4880 Senior Seminar in Public Administration (3 credits)**
The senior seminar in public administration is the capstone course of the B.S. in Public Administration program. This course uses case studies, service learning projects, and research activities to prompt students to synthesize content from across the curriculum. Students will demonstrate their accomplishment of the seven program learning outcomes. **Prerequisite:** Completion of 50 Public Administration Major Credits. **Prerequisite:** PADM 2100, PADM 3000, PADM 3100, PADM 3200, PADM 3300, PADM 4100, PHIL 3670.

**PADM 4950A Internship in Public Administration A (3 credits)**
This course is designed to provide students with an opportunity to integrate academic and experiential knowledge in the field of Public Administration. Students will be placed with an agency or organization, of their choice, related to the practice of public administration. All internship placements must be approved by the Academic Internship Supervisor before the commencement of the internship. Students will be required to complete a minimum of 140 contact hours at the internship placement site during the 16 weeks of enrollment. **Prerequisites:** (1) a minimum grade point average of 3.0 as
PHIL 1010 Introduction to Philosophy (3 credits)
An introduction to the nature of philosophy, philosophical thinking, major intellectual movements in the history of philosophy, and specific problems in philosophy. Prerequisite: COMP 1500 or COMP 1500H. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

PHIL 1400 Introduction to Logic (3 credits)
A study of the principles and evaluation of critical thinking including identification and analysis of fallacious, as well as valid reasoning. Traditional and symbolic logic will be considered and foundations will be laid for further study in each area. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

PHIL 2000 Moral Issues (3 credits)
This course provides an introduction to moral reasoning through a philosophical examination of important ethical concepts, such as ethical theory, relativism, egoism, and virtue. Topical moral problems such as world hunger, abortion, and animal rights (among others) will be used as illustrative examples. Students will be introduced to the idea that ethical problems are largely a matter of reason and that progress toward solutions can be gained through an application of normative ethical (philosophical) theory. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall and Winter.

PHIL 2400 Symbolic Logic (3 credits)
Rigorous analyses of the concepts of proof, consistency, equivalence, validity, implication, and truth as exemplified in propositional logic and predicate logic. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall and Winter.

PHIL 3010 Ethical Issues in Communication (3 credits)
This course provides an introduction to moral reasoning through a philosophical examination of major ethical problems in communications, such as those encountered by media professionals; conflicts of interest, morally offensive content, media influences on anti-social behavior, confidential sources, privacy, truth and honesty in reporting, among others. Students will be introduced to the idea that ethical problems are largely a matter of normative ethical (philosophical) theory. Prerequisite: COMP 2000 or COMP 2000H. Frequency: Every Fall and Winter.

PHIL 3100 Philosophy of Science (3 credits)
This course consists in the philosophical examination of the nature, definitions, and practices of science. The course focuses on the philosophical analysis of scientific method and its basic concepts and assumptions. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Every Fall and Winter.

PHIL 3180 Biomedical Ethics (3 credits)
This course provides an introduction to biomedical ethical examination of major problems in biomedical ethics, such as abortion, euthanasia, allocation of resources, medical experimentation, genetic engineering, confidentiality, among others. Students will be introduced to the idea that ethical problems are largely a matter of reason; that progress toward solutions can be gained through an application of normative ethical (philosophical) theory. Prerequisite: COMP 2000, COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Fall and Winter.

PHIL 3180H Biomedical Ethics Honors (3 credits)
This course provides an introduction to moral reasoning through a philosophical examination of major problems in biomedical ethics, such as abortion, euthanasia, allocation of resources, medical experimentation, genetic engineering, confidentiality, among others. Students will be introduced to the idea that ethical problems are largely a matter of reason; that progress toward solutions can be gained through an application of normative ethical (philosophical) theory. Prerequisite: COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Honors students only. Frequency: Every Fall.

PHIL 3200 Ethics and Sport (3 credits)
This course provides an introduction to moral reasoning through a philosophical examination of major problems in sports, such as the nature of sportsmanship, drugs, violence, commercialization, and gender equality, among others. Students will be introduced to the idea that ethical problems are largely a matter of reason; that progress toward solutions can be gained through an application of normative ethical (philosophical) theory. Prerequisite: COMP 2000, COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Fall.

PHIL 3220 Philosophy of Science (3 credits)
A study of the conceptual foundations of modern science. The course focuses on the philosophical analysis of scientific method and its basic concepts and assumptions. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Every Fall and Winter.

PHIL 3300 Ethics of War and Peace (3 credits)
This course consists in the philosophical examination of the nature, definitions, and practices of war. Special attention will be paid to the just war tradition in ethics. Prerequisite: COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Fall and Winter.

PHIL 3360 Environmental Ethics (3 credits)
This course provides an introduction to moral reasoning through the philosophical examination of major problems in environmental ethics, such as the relationship between human beings and living and non-living environments, controlling nature, and land use, assessing risk, responsibility to future generations, and the role of science, among others. Students will be introduced to the idea that ethical problems are largely a matter of reason; that progress toward solutions can be gained through an application of normative ethical (philosophical) theory. Prerequisite: COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Year Fall.

PHIL 3400 Physical Education Principles and Practice in Coaching (3 credits)
This course provides foundation principles and techniques related to coaching in schools (K-12) in various team and individual sports. Other topics include principles of: coaching, behavior, teaching, physical training, and management. In addition to class meetings, at least six hours of field experience are required. Prerequisite: None. Frequency: Every Winter.

PHIL 3300 Physical Education Administration (3 credits)
This course is designed to acquaint individuals in the management and operations of physical education. This course provides the philosophy and policies in administration of program planning and management. Classroom management, professional ethics, and legal issues are reviewed as it pertains to physical education. Prerequisite: None. Frequency: Every Fall.

PHIL 1640 Visual Thinking (3 credits)
This course introduces the philosophy of visual thinking and its historical and cultural context. Visual thinking is the way we engage with the world through our senses of sight and touch. Prerequisite: None. Frequency: Every Winter.
PHIL 3510 Ancient Philosophy (3 credits)
A study of the classic works of philosophy focusing on Plato and Aristotle, and might include discussion of various Pre-Socratic and Hellenistic philosophers. The emphasis throughout will be on understanding, analyzing, and evaluating arguments of the philosophers. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Every Fall.

PHIL 3520 Modern Philosophy (3 credits)
A study of the classic works of philosophy focusing on the rationalists, the empiricists, and Kant. The emphasis throughout will be on understanding, analyzing, and evaluating arguments of the philosophers and placing their work into the historical context of the respective eras in which they produced their work. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Every Fall.

PHIL 3530 Gods and Chariots (3 credits)
A study of the classic works of philosophy focusing on Plato and Aristotle, and might include discussion of various Pre-Socratic and Hellenistic philosophers. The emphasis throughout will be on understanding, analyzing, and evaluating arguments of the philosophers and placing their work into the historical context of the respective eras in which they produced their work. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Every Fall.

PHIL 3540 Revolution and Ideology (3 credits)
A study of the classic works of philosophy focusing on the rationalists, the empiricists, and Kant. The emphasis throughout will be on understanding, analyzing, and evaluating arguments of the philosophers and placing their work into the historical context of the respective eras in which they produced their work. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Every Winter.

PHIL 3560 Gods and Chariots (3 credits)
A critical examination of basic analytic and normative questions pertaining to law. The course may include such topics as the nature of law, law and morality, legal responsibility, civil disobedience, and the justification of punishment. Prerequisite: COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Fall.

PHIL 3600 Philosophy of Law (3 credits)
A critical examination of basic analytic and normative questions pertaining to law. The course may include such topics as the nature of law, law and morality, legal responsibility, civil disobedience, and the justification of punishment. Prerequisite: COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H. Frequency: Every Winter.

PHIL 3670 Social and Political Philosophy (3 credits)
This course will examine significant philosophical contributions to an understanding of politics and society. Among the questions it will address are: What is the nature and basis of the state? Which form of government is best? How do we determine whether political institutions are just? What conceptions of human nature underlie various political philosophies? How are social goods and burdens justly divided? This course will draw from classical, modern, and contemporary sources in political philosophy. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Every Fall.

PHIL 4100 Metaphysics (3 credits)
This course will examine the nature of metaphysical inquiry in general and the specific arguments advanced by philosophers to resolve or clarify fundamental metaphysical problems. The course may include topics such as the nature of existence, the debate between realists and antirealists, the nature of truth, the relationship between conceivability, possibility, and actuality, the status of substances and properties, the persistence of entities through change, and the problem of free will. Prerequisite: one PHIL course and COMP 2000, 2010 or 2020 or COMP 2000H. Frequency: Odd Year Winter.

PHIL 4200 Epistemology (3 credits)
This course will examine the nature of the philosophical study of human knowledge in general and the specific arguments advanced by philosophers to resolve or clarify fundamental epistemological problems. The course may include topics such as skepticism, the analysis of knowledge, the status of a priori knowledge, and theories of justification, memory, and perception. Prerequisite: one PHIL course and COMP 2000, 2010 or 2020 or COMP 2000H. Frequency: Even Year Winter.

PHIL 4300 Knowledge and Reality (3 credits)
This course will examine philosophical approaches to the study of human knowledge and the nature of reality in general, and the specific arguments advanced by philosophers to clarify or resolve fundamental issues in these areas of inquiry. The course may include topics such as skepticism, the analysis of knowledge, theories of justification, the nature of existence, the debate between metaphysical realists and antirealists, the nature of truth, and the free will problem. The final objective is to have the student draw on everything they have learned in this course and prior courses to produce a major research paper that is subject to rigorous academic standards. Topics will vary. Prerequisite: one PHIL course and COMP 2000, 2010 or 2020 or COMP 2000H. Frequency: Every Winter.

PHIL 4900 Special Topics in Philosophy (3 credits)
A careful and critical study of one or more of the outstanding works in philosophy and/or an in-depth study of one philosophical issue. May be repeated once for credit if content changes and with written consent of division director. Prerequisites: one PHIL course; and COMP 2000, COMP 2010, or COMP 2020. Frequency: Every Fall.

PHIL 4950 PHIL 4950 Internship in Philosophy (3 credits)
A 10-20 hour per week field or work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisite: cumulative GPA of 2.5 or higher, completion of 60 or more credit hours, and permission of department chair. Frequency: Every Fall and Winter.

PHIL 4990 Independent Study in Philosophy (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisites: one PHIL course; and COMP 2000, COMP 2010, or COMP 2020 or COMP 2000H or PHIL 3180H. Frequency: Every Fall and Winter.

PHYS—Physics

PHYS 1020 Concepts in Physical Science (3 credits)
This course is designed to introduce the student to the basic concepts of physical science. By surveying the fundamentals of physics and related sciences the student will obtain an appreciation of the basic tenets of science in general. The emphasis will be on the nature of science as a creative human enterprise, the key role that it plays in modern society, its relationship to technology and thereby to the environment, its open-ended character as reflected in the dynamic nature of scientific concepts, and the human qualities of scientists and their social responsibility. Prerequisites: MATH 1030 or higher and COMP 1000 or higher. Frequency: Every Fall and Winter.

PHYS 1500 Introduction to Astronomy (3 credits)
General survey of main topics in astronomy, including the sun/planets, the solar system, galaxies/nebulae, black holes/neutron stars, stellar evolution, and cosmology. Frequency: Every Winter.

**PHYS 2160 Essentials of Earth and Space Science (3 credits)**

This course will cover topics from earth science, including the basic concepts needed to understand geology, oceanography, the atmosphere, the weather, and earth history. Topics from space science will include the sun, planets, solar system, the galaxy and larger structures, the composition and evolution of stars, cosmology, and exotic objects such as quasars and black holes. Prerequisite: PHYS 1020. Frequency: Every Even Year Winter.

**PHYS 2350 General Physics I/Lab (4 credits)**

First of a two-part series covering mechanics, thermodynamics, vibrations, and waves. Includes laboratory sessions. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MATH 1250 or MATH 2100 or MATH 2100H. Frequency: Every Fall and Winter.

**PHYS 2350H General Physics I/Lab Honors (4 credits)**

First of a two-part series covering mechanics, thermodynamics, vibrations, and waves. Includes laboratory sessions. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisites: MATH 1250 or both MATH 2100 and MATH 2100H. Honors students only. Frequency: Every Fall.

**PHYS 2360 General Physics II/Lab (4 credits)**

Second of a two-part series covering electricity and magnetism, optics, and modern physics. Includes laboratory sessions. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisites: PHYS 2350 and either MATH 1250 or MATH 2100 or MATH 2100H. Frequency: Every Fall and Winter.

**PHYS 2360H General Physics II/Lab Honors (4 credits)**

Second of a two-part series covering electricity and magnetism, optics, and modern physics. Includes laboratory sessions. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisites: PHYS 2350 or PHYS 2350H and either MATH 1250 or MATH 2100 or MATH 2100H. Honor students only. Frequency: Every Winter.

**PHYS 2400 Physics I/Lab (4 credits)**

This course covers the basic principles of kinematics, dynamics, work and energy, momentum, rotational motion, gravitation, oscillatory and wave motion, fluid mechanics, and thermodynamics. Includes laboratory sessions. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: MATH 2200 or MATH 2200H. Frequency: Every Fall.

**PHYS 2500 Physics II/Lab (4 credits)**

This course covers the basic principles of electrostatics, magnetostatics, DC and AC circuits, electromagnetic waves, optics, and modern physics, in particular, the special theory of relativity, early quantum theory, semiconductor diodes, and transistors. Includes laboratory sessions. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: PHYS 2400. Frequency: Every Winter.

**PHYS 3000 History of Physics (3 credits)**

This course covers some of the major developments in physics from antiquity to the present, puts the physics into a historical context, and introduces some of the associated philosophical issues, in particular, how physics has influenced conceptions of the nature of reality. Prerequisites: PHYS 2500 or both MATH 2100 or MATH 2100H and PHYS 2360. Frequency: Upon request and see academic department chair.

**PHYS 3100 Introduction to Biophysics (3 credits)**

Applications of physical principles to aspects of biology and medicine. Topics include: Diffusion and osmosis, the thermodynamics of living systems, fluid mechanics, medical imaging and radiation therapy, the nervous system and the physical basis of perception, hydrophobic and hydrophilic interactions, protein folding and aggregation, and cell signaling. Prerequisites: BIOL 1500 and MATH 2100 or MATH 2100H, and PHYS 2360 or PHYS 2500. Frequency: Every Even Year Fall.

**PHYS 3200 Thermodynamics (3 credits)**

This is an intermediate course in thermodynamics. The course covers classical thermodynamics and introduces statistical mechanics. Prerequisites: PHYS 2500 and MATH 3200. Frequency: Upon request and see academic department chair.

**PHYS 3300 Fundamentals of Optics (3 credits)**

This is an introductory optics course that covers the fundamental principles of geometrical and physical optics with some emphasis on the optics of vision. It also serves as an introduction for students of optometry and related sciences. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisites: PHYS 2350 or higher and MATH 2100 or MATH 2100H. Frequency: Every Winter.

**PHYS 3400 Astronomy and Astrophysics I (3 credits)**

This is the first of a two-part series covering the concepts of astrophysics including the analysis of electromagnetic radiation from space, telescope technology, celestial mechanics and stellar evolution. Students will study the importance of astrophysics in our society and the topics and methods of modern astronomical research in the field of stellar and galactic astrophysics and instrumentation. Prerequisites: PHYS 2360 or higher, and MATH 2200 or MATH 2200H. Frequency: Upon request and see academic department chair.

**PHYS 3450 Astronomy and Astrophysics II (3 credits)**

The second of a two-part series covering the concepts of astrophysics such as the structure and physics of galaxies, the distribution of objects in the expanding universe, the Big Bang theory, and the evolution of celestial bodies. Students will study and apply the topics and methods of modern astronomical research in the field of extragalactic astronomy, cosmology, and space science. Prerequisite: PHYS 3400. Frequency: Upon request and see academic department chair.

**PHYS 3500 Introduction to Mechanics (3 credits)**

This course covers basic topics in the mechanics of systems of particles and rigid bodies. Topics covered include vectors, rectilinear and planar motion, non-inertial coordinate systems and fictitious forces, oscillations, three-dimensional motion, gravity, central forces, and Lagrangian mechanics. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisites: PHYS 2500 and MATH 3400. Frequency: Every Year Fall.

**PHYS 3550 Non-linear Dynamics (3 credits)**

This course introduces the student to the basic concepts of nonlinear dynamics, chaos, and related topics in nonlinear dynamics, via numerical simulations, and the detection and quantification of chaos in experimental data. Emphasis will be on the physical concepts and examples, rather than mathematical proofs and derivations. Topics covered include: phase planes, limit cycles, bifurcations, Lorenz equations, fractals, and strange attractors. The course will be taught at a level accessible to advanced undergraduate students in all fields of science and engineering. Prerequisites: PHYS 2500 and MATH 3400. Frequency: Upon request and see academic department chair.

**PHYS 3610 Electromagnetic Theory I (3 credits)**

This course covers the fundamentals of electromagnetic theory. Topics covered include vector calculus, electrostatics, magnetostatics, solutions of Laplace and Poisson equations, electric and magnetic fields inside matter. Prerequisites: PHYS 2500 and MATH 3200. Frequency: Odd Year Fall.

**PHYS 3650 Electromagnetic Theory II (3 credits)**

This is the continuation of Electromagnetic
Theory I. Topics covered include Maxwell's equations, electromagnetic waves, radiation, and relativity. Prerequisite: PHYS 3610. Frequency: Upon request and see academic department chair.

**PHYS 3700 Modern Physics (3 credits)**

This is an introductory modern physics course covering special relativity, quantum mechanics, nuclear, and particle physics. The concepts will be applied to a variety of situations, including some in the field of medicine. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: PHYS 2500. Frequency: Odd Year Fall.

**PHYS 3750 Modern Physics II (3 credits)**

Continuation of PHYS 3700. This course covers introductory quantum mechanics, including Hilbert spaces, the Schrödinger equation, spin, and perturbation theory. Applications to one-dimensional problems, the harmonic oscillator, and the hydrogen atom are included. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: PHYS 3700. Frequency: Even Year Winter.

**PHYS 3800 Introduction to Elementary Particle Physics (3 credits)**

Introduction to particle physics, covering topics that include group theory, properties of elementary particles, the electromagnetic, strong and weak nuclear interactions, gauge theories, and unification. This course has been exempted from the requirements of the Writing Across the Curriculum policy. Prerequisite: PHYS 3650 or PHYS 3750. Frequency: Upon request and see academic department chair.

**PHYS 3900 Mathematical Methods for Physicists (3 credits)**

This course introduces and applies the relevant mathematics required to solve advanced problems in physics. Among the topics included are vector analysis, linear algebra, Fourier series and transforms, differential equations, special and complex functions, and probability and statistics. Prerequisite: PHYS 3500 and MATH 3200. Frequency: Upon request and see academic department chair.

**PHYS 4000 Advanced Physics Laboratory I (2 credits)**

This is an upper-level laboratory course in which a variety of advanced experiments will be performed. This is an intensive laboratory course, with a strong emphasis on independent data analysis and dissemination of results. Students will learn laboratory skills and also gain valuable practice using statistical methods of data analysis. Prerequisite: PHYS 3700. Frequency: Upon request and see academic department chair.

**PHYS 4050 Advanced Physics Laboratory II (2 credits)**

This is the second part of an upper-level laboratory course in which a variety of advanced experiments will be performed. This is an intensive laboratory course, with a strong emphasis on independent data analysis and dissemination of results. Students will learn laboratory skills and also gain valuable practice using statistical methods of data analysis. Prerequisite: PHYS 4000. Frequency: Upon request and see academic department chair.

**PHYS 4400 Science of Planets and Solar Systems (3 credits)**

This interdisciplinary course is an advanced introduction to the linked research of planetary systems, extrasolar planets, astrobiology, astrochemistry, and astrophysics, as well as the cultural changes expected from future discoveries in these fields. Topics include the physics of the solar system such as the sun, planets, moons, comets and asteroids; the properties of other solar systems and ultimately the search for another Earth and life in space. This course is designed for physics and science students and is also suited for engineering students interested in space science and astrophysics. Prerequisite: PHYS 3400. Frequency: Upon request and see academic department chair.

**PHYS 4500 Advanced Mechanics (3 credits)**

This course will cover advanced topics in mechanics. Topics to be covered include Lagrangian mechanics, two-body central force problems, coupled oscillators and normal modes, Hamiltonian mechanics, non-inertial frames, and rigid body motion. Prerequisite: PHYS 3500. Frequency: Upon request and see academic department chair.

**PHYS 4600 Quantum Mechanics I (3 credits)**

First of a two-part series covering the fundamentals of quantum mechanics, covering the wave function, the Schrödinger equation, and elementary statistical mechanics. Prerequisites: PHYS 3500 and PHYS 3700 and MATH 3200. Frequency: Upon request and see academic department chair.

**PHYS 4650 Quantum Mechanics II (3 credits)**

This course is a second of two-part series covering the fundamentals of quantum mechanics, applications using the time-dependent Schrödinger equation, time-independent and time-dependent perturbation theory, the variational principle, the WKB approximation, the adiabatic approximation, and scattering. Prerequisites: PHYS 4600. Frequency: Upon request and see academic department chair.

**PHYS 4900 Special Topics in Physics (1-3 credits)**

Topics in physical science that are not included in regular course offerings and may be taken without prerequisites. Special content is announced in the course schedule for a given term. Students may re-enroll for special topics covering differing content. Frequency: Upon request and see academic department chair.

**PHYS 4950 Internship in Physics (1-12 credits)**

A work experience for 16 weeks in the student’s major area of study or area of career interest. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, major GPA of 3.0 or higher, completion of 60 or more credit hours, supervision of instructor, and permission of Department Chair. Frequency: Upon request and see academic department chair.

**PHYS 4990 Independent Study in Physics (1-12 credits)**

The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and Department Chair. Frequency: Upon request and see academic department chair.

**PHYS 4990A Independent Study in Physics (A) (1-12 credits)**

The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and Department Chair. Frequency: Upon request and see academic department chair.

**PHYS 4990B Independent Study in Physics (B) (1-12 credits)**

The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and Department Chair. Frequency: Upon request and see academic department chair.

**PHYS 4990C Independent Study in Physics (C) (1-12 credits)**

The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and Department Chair. Frequency: Upon request and see academic department chair.

**PHYS 4990D Independent Study in Physics (D) (1-12 credits)**

The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and Department Chair. Frequency: Upon request and see academic department chair.

**POL5—Politics & Public Affairs**

**POLS 1010 American Government and Politics (3 credits)**

An introduction to the processes of the American
COURSE DESCRIPTIONS

POLS 1200 Introduction to Political Science (3 credits)
This course will provide the student with an overview of political science with an emphasis on such topics as: the formation and evolution of government institutions and structures; the evolution of political participation, culture and ideology in both a domestic and international context; and policy formation and implementation (both domestic and foreign); and international relations. In doing this, students will be introduced to the basic vocabulary of the discipline, learning about the different ways that political issues and processes are studied. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

POLS 2010 Comparative Government (3 credits)
This course will examine the elements of foreign political systems such as constitutions, political parties, institutions, historical development, and ideology using the United States as a frame of reference. Attention will be given to how legislation is enacted, how elections are conducted, and the relationship between the judicial, executive, and legislative branches of government. Frequency: Every Fall and Winter.

POLS 2100 State and Local Government (3 credits)
This course is designed to provide a basic knowledge of how state and local governments operate, and how political decisions are made by these governments. The course will also address how federalism impacts these units of government. It will examine the political actors-legislators, governors, interest groups—that affect state and local politics, as well as specific local/state policy issues. Prerequisite: POLS 1200: Introduction to Political Science (3 credits) OR INST 1500: Global Issues (3 credits) Since a basic background in statistics is necessary to understand academic, media, and governmental reports, this course attempts to strike a balance between a theoretical and practical understanding of statistical concepts. It is assumed that students have little or no statistical training—and while a background in mathematics is always helpful—our focus is to explore the empirical process from question to conclusion. Frequency: Every Fall.

POLS 2300 International Relations (3 credits)
This course will introduce students to various theories and concepts used by scholars in the field of international relations and demonstrate their practical application to understanding major issues in contemporary international politics such as war, globalization, international trade and finance, the role of international organizations, ethnic conflict and peacekeeping, proliferation of nuclear weapons, migration and poverty, and the role of international organizations and NGOs. Prerequisite: POLS 1200: Introduction to Political Science (3 credits) OR COMP 1500 or COMP 1500H. Frequency: Every Fall.

POLS 2400 Model United Nations (3 credits)
In this course students will learn about the United Nations through the experiential exercise of The Model United Nations. Students will learn how its institutions function and achieve a historical overview of its formation. Students will also analyze pressing issues in global politics by researching country positions and backgrounds and simulating the experience of the United Nations in attempting to solve vexing world problems. The experience culminates in students competing in the Florida Model United Nations Conference (FMUN) in late October every year (or in a residential Model UN event). Frequency: Every Fall

POLS 3011 Quantitative Research Methods in Political Science (3 credits)
Political scientists ask questions about the behavior of political actors like voters and elected officials, the operations and policies of government institutions like the U.S. Congress or the Supreme Court, or the interactions of political entities like states or NGOs in the international arena. To answer these questions they develop theories and compare their theoretical expectations to real-world data observations. While many social science courses teach a great deal of this conceptual material, in this course students will learn how we derive these paradigms in the discipline of political science. The purpose of this course is to help students understand statistics and develop practical skills for summarizing, describing, and analyzing the data in the context of public policy. The focus is on the presentation and interpretation of quantitative data. Prerequisite: POLS 1200: Introduction to Political Science (3 credits) OR INST 1500: Global Issues (3 credits) Since a basic background in statistics is necessary to understand academic, media, and governmental reports, this course attempts to strike a balance between a theoretical and practical understanding of statistical concepts. It is assumed that students have little or no statistical training—and while a background in mathematics is always helpful—our focus is to explore the empirical process from question to conclusion. Frequency: Every Year Winter.

POLS 3400 The Presidency (3 credits)
This course provides a comprehensive overview of the American presidency, including the evolution of the office; presidential powers; relations with Congress, the courts, the mass media and interest groups; public opinion; electoral politics; White House decision-making; and the president’s impact in domestic and foreign affairs. This course will examine both individual presidents and the presidency as an institution. Prerequisite: POLS 1010 or POLS 1200 and COMP 2000 or 2020 or COMP 2000H. Frequency: Odd Year Winter.

POLS 3500 Global Politics (3 credits)
This course offers an issue-based examination of world politics. Drawing on theories and practices in the field of international relations, the course will examine pressing and important problems in the world today such as global warming, terrorism, failed states, international public health, transnational organizations, human rights, drug trafficking and global crime. Each issue will be framed in appropriate theoretical, historical and contemporary perspectives, and problem solving exercises will be utilized in order to arrive at a fuller understanding of the dynamics of world politics. Prerequisites: POLS 2300 and COMP 2000 or 2020 or COMP 2000H. Frequency: Odd Year Fall.

POLS 3600 Voting and Elections (3 credits)
This course will focus on the process and procedures by which American public opinion is formally tallied: voting in elections. Emphasis will be placed on deepening an understanding of the theory and practice of American politics by exploring the right to vote, the forces that shape who votes, and the many ways that the vote can be manipulated without breaking the law. Prerequisites: POLS 1010 or POLS 1200 and COMP 2000 or 2020 or COMP 2000H. Frequency: Even Year Winter.

POLS 4100 European Union (3 credits)
This course will examine the historical development, the political parties, and the institutions (Commission, Parliament, Council of Ministers) of the European Union. Attention will be given to how European Union policies are developed, enacted and enforced as well as Congress works, including factors such as constituent pressures, the media, lobbyists, campaigns, representation and elections, party leadership, committee power, rules and procedures, and inter-branch relations. Emphasis is given to the modern Congress and how historical developments have impacted the modern political process, through attention to a variety of current issues such as homeland security, health care, immigration, defense policies, education, and the environment. Prerequisite: POLS 1010 or POLS 1200 and COMP 2000 or 2020 or COMP 2000H. Frequency: Odd Year Winter.
the effect of European rules upon the domestic legal systems of the twenty-seven member states. Students will consider to what extent the European Union protects the human rights and economic interests of its citizens and how effectively it functions as a unit in the international arena. Prerequisites: POLS 1200 and COMP 2000 or 2020 or COMP 2000H. Frequency: Every Year Fall.

POLS 4200 Latin American Politics (3 credits)
This course will examine the politics of Latin America. Emphasis will be placed on the political, economic, and social developments that have contributed to Latin America’s current state of development. The course will also examine the political development of Latin American states, the impact of the Cold War, internal political conflict and the role of the military in these conflicts, and democratization and social movements. Some of the aspects that will be highlighted are the effect of colonization on the region’s economic development, the impact of revolution, and the effects of migration. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: POLS 1200 and COMP 2000 or 2020 or COMP 2000H. Frequency: Odd Year Winter.

POLS 4300 Middle Eastern Politics (3 credits)
This course will examine the politics of the Middle East. Emphasis will be placed on the political, economic and social developments that have contributed to current tensions in the Middle East. The course will also examine the political development of Middle Eastern states, the phenomenon of Arab nationalism, Islamism, the Palestinian-Israeli conflict, democratization, oil and economic development and regional security. Some of the aspects that will be highlighted are an understanding of the Arab-Israeli conflict, events surrounding Iraq, and changing patterns in other countries such as Iran, Syria, Lebanon and Egypt. Prerequisite: POLS 1200 and COMP 2000 or 2020 or COMP 2000H. Frequency: Every Year Winter.

POLS 4400 Applied Quantitative Analysis (3 credits)
In this course we will examine the meaning of “explanation” and “causal reasoning”, and provide an overview of the methods of inquiry in political science through the use of elementary descriptive and inferential statistics. By broadening analytical proficiency and developing critical thinking skills, this course will enhance the students’ ability to evaluate politics and policy using the basic principles of scientific methodology. Students will also be introduced to LATEX, the high-quality typesetting system, and learn the R language and environment for statistical computing and graphics. (Prerequisites: POLS 1200: Introduction to Political Science (3 credits) OR INST 1500: Global Issues (3 credits))

POLS 4950 Internship in Political Science (3 credits)
A 10-20 hour per week field or work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisite: cumulative GPA of 2.5 or higher, completion of 60 or more credit hours, and permission of department chair. Frequency: Every Fall and Winter.

POLS 4990 Independent Study in Politics and Public Affairs (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisites: One POLS course and COMP 2000, COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Fall and Winter.

PSYC—Psychology

PSYC 1020 Introduction to Psychology (3 credits)
An introduction to theory, research, and applications in the field of psychology. Topics include biological bases of behavior, perception, learning and memory, psychological development, personality, social psychology, and the identification and treatment of mental illness. Frequency: Every Fall and Winter.

PSYC 1020H Introduction to Psychology Honors (3 credits)
An introduction to theory, research, and applications in the field of psychology. Topics include biological bases of behavior, perception, learning and memory, psychological development, personality, social psychology, and the identification and treatment of mental illness. Prerequisite: Honors Students Only. Frequency: Every Fall.

PSYC 2010 Cognitive Processes (3 credits)
This course will provide an introduction to experiments (methods and results) and theory in cognitive psychology. Topics covered will include object recognition, attention, memory, concepts, language, imagery, problem solving and reasoning and the neural bases of cognitive processes. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Fall and Winter.

PSYC 2020 Foundations of Clinical and Counseling Psychology (3 credits)
This course serves as an overview of Clinical and Counseling Psychology including a discussion of the training and employment of clinical/counseling psychologists; the assessment tools and treatment approaches routinely utilized by clinical/counseling psychologists; sub specialties of clinical and counseling psychology; and current trends and emerging issues in the field of clinical/counseling psychology. Various other related counseling professions are discussed throughout the course. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Fall and Winter.

PSYC 2100 Biological Bases of Behavior (3 credits)
This course provides a survey of genetic, neural, and endocrine bases of behavior. Focus topics include brain neuroanatomy, neural communication, sensory processes, motivation, emotion, and arousal. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Fall and Winter.

PSYC 2110 Human Sexuality (3 credits)
Anatomy/physiology of the human sexual system, the human sexual response, the range of sexual behaviors, and sources of attitudes and beliefs about sexuality. Prerequisite: PSYC 1020 OR PSYC 1020H OR SOCL 1020. Frequency: Every Fall and Winter.

PSYC 2110H Human Sexuality Honors (3 credits)
Anatomy/physiology of the human sexual system, the human sexual response, the range of sexual behaviors, and sources of attitudes and beliefs about sexuality. Prerequisite: PSYC 1020 OR PSYC 1020H OR SOCL 1020. Honors Students Only Frequency: Infrequent.

PSYC 2160 Social Psychology (3 credits)
This course provides an introduction to the scientific study of how people’s thoughts, feelings, and behaviors are influenced by the real or imagined presence of other people. Topics such as self-perception, judgment and decision-making, rationalization, attitude change, conformity, social influence, obedience, attraction, love, aggression, violence, altruism, deception, nonverbal communication, and prejudice will be covered. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Fall and Winter.

PSYC 2160H Social Psychology Honors (3 credits)
This course provides an introduction to the scientific study of how people’s thoughts, feelings, and behaviors are influenced by the real or imagined presence of other people. Topics such as self-perception, judgment and decision-making, rationalization, attitude change, conformity, social influence, obedience, attraction, love, aggression, violence, altruism, deception, nonverbal communication, and prejudice will be covered. Prerequisite: PSYC 1020 or PSYC 1020H and Honors Students Only. Frequency: Every Winter.

PSYC 2300 Behavior Modification (3 credits)
This course introduces students to the concepts and principles of behavior analysis and behavior modification techniques applied to diverse areas
such as mild and severe behavior problems in children and adults, behavior medicine, organizational behavior, sports psychology and self-management. Frequency: Every Fall and Winter.

**PSYC 2330 Interpersonal Communication (3 credits)**

Study of human communications, interpersonal relationships, and the impact of communication on behavior. Topics include verbal and nonverbal behavior, development of relationships, and conflict management skills. Experiential learning included. Frequency: Every Fall.

**PSYC 2350 Life-Span Human Development (3 credits)**

This course is designed to provide the student with an understanding of systematic changes within the individual from conception through death. Unlike many studies of development, this course is structured around issues of development rather than examination of development from a chronological perspective. This structure will allow the student to more completely grasp life-span issues. Family, social roles, lifestyle, psychological disorders, mental abilities, and death and dying will be examined. Prerequisite: PSYC 2620 or PSYC 2620H. Frequency: Every Fall and Winter.

**PSYC 2350H Life-Span Human Development Honors (3 credits)**

This course is designed to provide the student with an understanding of systematic changes within the individual from conception through death. Unlike many studies of development, this course is structured around issues of development rather than examination of development from a chronological perspective. This structure will allow the student to more completely grasp life-span issues. Family, social roles, lifestyle, psychological disorders, mental abilities, and death and dying will be examined. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Fall and Winter. Honors Students Only Frequency: Odd Year Winter.

**PSYC 2360 Adolescent Psychology (3 credits)**

This course will provide an overview of the principles, theories, and research pertaining to the development of the adolescent. Topics include physical, emotional, social, intellectual, moral, and personality development, as well as the importance of the home, school, and community. Prerequisite: PSYC 2620 or PSYC 2620H. Frequency: Every Fall.

**PSYC 2370 Early Childhood Growth and Development (3 credits)**

Students in this course will critically examine theories and research concerning the cognitive, social-emotional, and physical development of the typical and atypical child from birth to age eight. Emphasis will be placed on the ability to observe and describe child behavior and to understand the principles and processes that govern growth and development in the early childhood years. Implications of knowledge of child development for parental behavior, professional practices, and social policy will also be considered. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Fall.

**PSYC 2390 Adulthood and Aging (3 credits)**

Developmental experiences of maturity. Physiological and psychological aspects of aging. Prerequisite: PSYC 2620 or PSYC 2620H. Frequency: Every Fall and Winter.

**PSYC 2450 Forensic Psychology (3 credits)**

This course describes various interactions between psychology and the legal system. It discusses how psychologists assist law enforcement agencies in the selection, training, and evaluation of law enforcement officers and in conducting criminal investigations. It also describes the various forensic psychology roles in civil and criminal proceedings. Lastly, this course will highlight ways in which forensic psychologists can work to influence public policy. Prerequisite: PSYC 2620 or PSYC 2620H. Frequency: Every Fall.

**PSYC 2460 Health Psychology (3 credits)**

This course covers stressors and health, health behavior promotion, and psychological treatment for cancer, heart disease, and other medical disorders. Prerequisites: PSYC 2620 or PSYC 2620H. Frequency: Every Fall.

**PSYC 2470 Loss, Grief, and Bereavement (3 credits)**

This course addresses the issues of loss accompanying the death of a loved one and the handling of grief for people of all ages. Sensitizes students to their own feelings about death, describes the rites of passage, and identifies methods of resolution for grief. This course will be beneficial to individuals in their own lives, as well as those who will be involved in counseling. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Winter.

**PSYC 2475 Introduction to Substance Abuse Studies (3 credits)**

This course will provide a sound introduction to the pharmacology and physiology of licit and illicit drugs. Psychological, social, physiological, and pharmacological effects of psychoactive substances will be discussed. Signs and symptoms of substances abuse and diagnostic criteria for evaluating chemical dependency will also be studied. Prerequisite: PSYC 2620 or PSYC 1020H. Frequency: Every Fall.

**PSYC 2575 Ethical and Professional Issues in Mental Health (3 credits)**

This course examines ethical issues faced by mental health professionals today. Conflicts among personal, legal, and professional demands will be explored in depth. This course will also focus on how mental health professionals are challenged by and learn to manage ethical dilemmas around such issues as self-disclosure, harm reduction, dual relationships, and limits of confidentiality. Frequency: Odd Year Winter.

**PSYC 2900 Introduction to Quantitative Psychology (3 credits)**

This course is an introduction to the quantitative methods employed by psychologists and other behavioral scientists. You will learn how to conduct, interpret, and report both descriptive and inferential statistics, including the most commonly used statistical analyses in the psychological sciences. By the end of this course, you should have developed the skills to not only conduct your own analyses, but also to critically evaluate and interpret the analyses presented by others (e.g., in the results sections of research articles published in scientific journals). Prerequisites: MATH 2020 or MATH 2020H or MATH 3020 or MATH 3020H and PSYC 1020 or PSYC 1020H. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

**PSYC 3000 Psychological Research Methods (3 credits)**

This course covers the methodological tools used in psychological research studies, with specific emphasis on observational, correlational, experimental, and quasi-experimental designs. Students will develop testable hypotheses, design a quantitative experimental research study, and use APA-format to write a report similar to those found in professional psychological journals. Prerequisites: PSYC 2620. Frequency: Every Fall and Winter.

**PSYC 3030 Experimental Psychology (3 credits)**

This course offers laboratory experience in various areas of experimental psychology. Fundamental assumptions and principles of scientific observation and research design are discussed. Students will learn how to conduct and report experiments in various core areas of psychology. Students will learn how to conduct, interpret and evaluate research and to communicate research findings. Prerequisite: PSYC 3000. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

**PSYC 3070 Stress Management (3 credits)**

This course examines the process and complexities of stress management, its impact on the work place, and the overall quality of work life in an organization. Stressful events and conditions will be presented and analyzed from three perspectives: individual vulnerability to stressors, the environment in which vulnerability is exposed to stressors, and the resulting behavioral symptoms. Prerequisites: PSYC 1020 or PSYC 1020H. Frequency: Every Fall and Winter.
PSYC 3180 Stereotypes, Prejudice, and Discrimination (3 credits)
This course examines how individuals, groups, and cultures develop stereotypes. The course also explores how these stereotypes are used for prejudicial and discriminatory purposes toward other individuals and/or groups. Finally, the course explores the impact of both implicit and explicit prejudice. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Winter.

PSYC 3200 Evolutionary Psychology (3 credits)
Course Description: This course surveys the spectrum of human perception, cognition, and behavior—from consciousness and emotions to sex and violence—through the lens of evolution by natural selection. Students will develop an introductory understanding of the principles of biological evolution and will learn to apply that understanding toward the study of the human experience. Particular attention will be paid to addressing common misunderstandings of the field of evolutionary psychology, and to understand the fundamental differences between the evolutionary approach and traditional social science approaches. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Fall.

PSYC 3210 Personality (3 credits)
Survey of psychoanalytic, humanistic, cognitive, and behavioral theories of personality. Current issues and personality research. Prerequisites: PSYC 1020 or 1020H. Frequency: Every Fall and Winter.

PSYC 3260 Abnormal Psychology (3 credits)
Diagnoses, causes, and prognoses for the various categories of psychological disorders. Case studies supplement and illustrate theory and research. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Fall and Winter.

PSYC 3270 The Psychology of Criminal Behavior (3 credits)
This course provides an overview of the psychology related to criminal actions. The course will focus on some of the developmental, biological, neurological, behavioral, cognitive, and social forces shown to influence criminal thinking and behavior. The class will also cover characteristics of several specific criminal subpopulations including psychopaths, sexual predators, female offenders, substance abusers, serial killers, and mentally disordered criminal offenders. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Fall and Winter.

PSYC 3280 Child and Adolescent Psychopathology (3 credits)
This course will review prevalence, etiology, diagnostic criteria, co-morbidity, sampling patterns and outcome across the major childhood and adolescent behavioral disorders. Prerequisite: PSYC 2350 or PSYC 2370 or PSYC 2380 Frequency: Every Winter.

PSYC 3330 Principles of Applied Behavior Analysis (3 credits)
This course will focus on the basic principles of applied behavior analysis (ABA). Students will learn the philosophy and science of applied behavior analysis and their relation to behavioral interventions, the basic vocabulary and concepts in the field, strategies for measuring, increasing, and decreasing behaviors, and ethical considerations in the application of ABA in a variety of settings. Prerequisite: PSYC 2300. Frequency: Every Winter.

PSYC 3350 Assessment in Applied Behavior Analysis (3 credits)
This course covers the selection of assessments in Applied Behavior Analysis (ABA), behavioral intervention strategies and change procedures, evaluation and assessment strategies, and methods of accountability in ABA interventions. In addition, focus will be placed on the experimental evaluation of interventions, measurement of behavior, and displaying and interpreting data using single-subject and small group design. The course will also address the ethical use of intervention strategies and making decisions regarding ethical treatment for individuals with a variety of challenges. Prerequisite: PSYC 2300. Frequency: Fall Even Years.

PSYC 3360 Psychology of Gender (3 credits)
This course examines theories about, as well as the psychological and social factors related to, gendered identities, roles, and behaviors. Prerequisite: PSYC 1020 or 1020H or SOC 1020. Frequency: Every Fall.

PSYC 3370 Interventions in Applied Behavior Analysis (3 credits)
This course will focus on behavior change procedures and system supports for those interventions. The course will also consider evaluation strategies used in both research and in the ethical provision of interventions. It will cover a variety of effective behavioral strategies as well as measurement and assessment of strategies. Additional focus will be placed on the interpretation of the research literature to make sound decisions about assessment and intervention strategies for a variety of populations. Prerequisite: PSYC 2300. Frequency: Winter Odd years.

PSYC 3390 Single-Case Research Designs & Application (3 credits)
This course provides an in-depth study of single-case experimental designs and strategies for studying behavior change in applied research and clinical interventions. The course introduces students to the origins of the group comparison approach and its limitations in behavioral research. The emphasis is placed on general issues in single-case methodology, including identifying the defining features of single subject designs, the logic supporting the use of reversal designs, multiple-baseline designs, alternating treatment designs, changing-criterion designs, and the application of these designs in clinical interventions. Issues surrounding the analysis of single-case studies, visual inspection of graphed data, and the generalizability of results obtained from multiple observations of single cases are also discussed. Prerequisite: PSYC 2300. Frequency: Every odd year Fall.

PSYC 3400 Sports Psychology (3 credits)
This course includes an analysis of the social and psychological dimensions in sport. Emphasis is placed on social and psychological theories and research related to physical activity, physical education, corporate fitness, and athletic programs. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Fall and Winter.

PSYC 3450 Foundations of Therapeutic Interviewing (3 credits)
General principles of effective interviewing. Skills and techniques for achieving various interview goals, with an emphasis on counseling interviews and the establishment of helping relationships. Prerequisite: PSYC 2000 or PSYC 2020. Frequency: Every Fall.

PSYC 3480 Industrial/Organizational Psychology (3 credits)
Survey of psychology as applied to work emphasizing a general knowledge of industrial/organizational psychology as well as its application to the solving of real-world problems. Discussion of personnel decisions, organizational training, organizations and their influence on behavior, job satisfaction, job design, and organizational development, human factors, and environmental stressors on workers. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Even Year.

PSYC 3520 Principles of Learning (3 credits)
Principles of Learning examines theories and research concerning the basic principles and concepts of learning. Theories of classical and operant conditioning will be explored, in addition to selected theories which explore the interaction between learning, memory and motivation. Additionally, basic neuroanatomy and neurochemistry underlying various learning processes will also be introduced. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Even Year Winter.

PSYC 3575 Treatment of Substance Abuse (3 credits)
This course will focus on the various therapeutic approaches that may be successfully employed in the treatment of substance abuse problems and will discuss the different types of facilities available for substance abuse treatment. Additionally, treatment planning, clinical documentation and supervision, and the influences of managed care and other third-party payers will be thoroughly examined. Prerequisite: PSYC 2575. Frequency: Every Winter.
PSYC 3710 History and Theories of Psychology (3 credits)
Exploration of the historical roots of psychology, and the bases and growth of psychology as a science. Examines the major historical and contemporary theories of psychology with an emphasis on enduring issues. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Fall and Winter.

PSYC 3760 Multicultural Issues in Psychology (3 credits)
Issues relevant to the field of psychology. Examinations of different cultural groups and their values as they pertain to the individual, the family, time, proxemics (personal and interpersonal space), communication styles, and body language. Different cultural worldviews will be explored as they pertain to locus of control, conception of mental illness, and attitude toward seeking psychological help. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Fall and Winter.

PSYC 3800 Current Psychotherapies (3 credits)
This course is a comprehensive introduction into the most popular counseling theories and techniques currently in use. The needs of special populations, including substance abuse clients, adolescents, and clients from other cultures are examined. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Odd Year Fall.

PSYC 3900 Neuropsychology (3 credits)
This course will introduce students to higher cognitive functioning including language, memory and executive functioning. Neurological syndromes associated with damage to specific brain areas will be discussed along with their behavioral manifestations. Additionally, cerebral asymmetry and sex differences in brain organization will be introduced. This course will conclude with a review of neuropsychological instruments. Prerequisite: PSYC 1020 or PSYC 1020H. Frequency: Every Fall.

PSYC 3920 Sensation and Perception (3 credits)
This class will cover the fundamentals of the sensory world, such as taste, touch, vision, hearing and extrasensory phenomenon. Students in sensation and perception will explore the value of each sense in the perceptual world and will be encouraged to consider what life would be like without each sense. Perceptual illusions will be employed in order to encourage students to delve into the neural underpinnings of sensory perception. Through studying the pathways from sensations to perceptions, students will gain an appreciation of the fragility of perceptions. Prerequisite: PSYC 1020 or PSYC 1020H. Experiential Education and Learning (ExEL); Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

PSYC 4300 Psychophysiology (3 credits)
This course is designed to introduce students to the field of psychophysiology, with a focus on human psychophysiology and physiological measures of emotion and cognition. Students in this course will examine the theory of psychophysiology as well as common psychophysiological techniques. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Winter.

PSYC 4400 Hormones and Behavior (3 credits)
Students in Hormones and Behavior will develop an understanding of the many topics related to behavioral endocrinology. This course will review the interrelationships among the major classes of hormones, brain and behavior. Prerequisite: PSYC 1020 or 1020H. Frequency: Every Fall.

PSYC 4700 Practicum in Applied Behavior Analysis (ABA) (3 credits)
This introductory supervised Independent Fieldwork (practicum) is designed to partially meet either the ABA minor requirements (a minimum of 6 hours per week) or partial requirements for the BCBA certification (a minimum of 10 hours per week). Students will participate in a supervised experience that will allow them the opportunity to apply ABA principles. Supervision will take place at least every other week in an individual or group format and will address strategies for increasing and decreasing behavior. Students will be expected to collect data on their cases and employ strategies of behavioral assessment and intervention with input from their supervisor. Prerequisite: PSYC 2300. Experiential Education and Learning (ExEL); Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon Request see academic Department Chair.

PSYC 4800 Practicum in Psychological Research (3 credits)
This course provides practical experience in conducting psychological research. Students will read relevant research literature in professional psychological journals, develop a testable hypothesis, design and run an empirical research study, analyze data from the study, and write a full APA-format research paper. Prerequisite: PSYC 3000. Experiential Education and Learning (ExEL); Successful completion of this course satisfies 1 ExEL unit. Frequency: Even Year Fall.

PSYC 4810 Practicum in Community Psychology (3 credits)
Experience in applying psychological principles in a human services agency. Supervision onsite: weekly team meetings at the university. Written reports required. Prerequisites: PSYC 2000 or PSYC 2020 and PSYC 3450. Experiential Education and Learning (ExEL); Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Winter.

PSYC 4840 Advanced Practicum in Psychology (3-6 credits)
Students will gain experience in a specialty area of Psychology by working with teams of Faculty members and Graduate students. They will be able to observe and participate in both research and applied clinical work. Prerequisites: Psych 3000. Experimental Education and Learning (ExEL) unit. Frequency: Infrequent.

PSYC 4880 Senior Seminar in Psychology (3 credits)
Students will have the opportunity to integrate information from a variety of specialties in psychology. Each seminar will have a focal theme that will allow students to gain new perspectives, as well as apply knowledge from prior courses and experiences. This course is presented as a capstone experience, therefore students with advanced standing in the psychology major will benefit the most from the seminar. Prerequisite: PSYC 3000. Frequency: Every Fall and Winter.

PSYC 4900 Special Topics in Psychology: The Science and Application of Positive Psychology (3 credits)
Can science help us decrease stress, increase happiness, and improve overall well-being? Positive Psychology is the scientific study of the factors that contribute to optimal human functioning. This course will explore the science and application of various areas of Positive Psychology, including mindfulness meditation, character strengths, and factors related to happiness with the goal of gaining knowledge and practical skills to apply to everyday life. Prerequisites: PSYC 1020 or 1020H.

PSYC 4901 APS Capstone Course in Psychology/Substance Abuse Studies (3 credits)
APS Capstone Course in Psychology/Substance Abuse Studies: This course is reserved for students who are enrolled in the Applied Professional Studies Program. Through a series of written assignments, this course provides students with an opportunity to integrate previous learning and experience with a concentration in either psychology or substance abuse studies to form a unique course of academic study. Given that the APS major is individualized to a large extent based on a student’s interests and past experiences, this course ordinarily will be conducted as an independent study and will be taken during the student’s last semester prior to receipt of their degree. Prerequisite: written consent from department chair. (3 credits). Frequency: Upon request see academic Department Chair.

PSYC 4950 Internship in Psychology (1-3 credits)
A 10-20 hour per week, paying or nonpaying work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements.
PSYC 4950A Internship A in Psychology (1-3 credits)
A 10-20 hour per week, paying or nonpaying work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisites: PSYC 3000, cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of department chair. Frequency: Upon request see academic Department Chair.

PSYC 4950B Internship B in Psychology (1-3 credits)
A 10-20 hour per week, paying or nonpaying work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisites: PSYC 3000, cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of department chair. Frequency: Upon request see academic Department Chair.

PSYC 4990A Independent Study in Psychology (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: Written consent of instructor and department chair. Frequency: Upon request see academic Department Chair.

PSYC 4990B Independent Study in Psychology B (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: Written consent of instructor and department chair. Frequency: Upon request see academic Department Chair.

PSYC 4990C Independent Study in Psychology C (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: Written consent of instructor and department chair. Frequency: Upon request see academic Department Chair.

PSYC 4990D Independent Study in Psychology D (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: Written consent of instructor and department chair. Frequency: Upon request see academic Department Chair.

QNT—Quantitative Methods
QNT 2880 Introduction to Business Analytics and Decision Making (3 credits)
This course introduces students to the application of statistical tools and mathematical techniques to analyze business problems and formulate solutions using appropriate technology. Students will utilize decision support tools to assist in evidence-based decision making. Includes such topics as collection, interpretation and presentation of data, descriptive and predictive analytics, and prescriptive modeling. Prerequisite: MATH 2020.
Frequency: Fall and Winter.

QNT 3900 Decision Sciences Internship (3-6 credits)
The Huizenga College internship fosters learning through the application of classroom theory in the workplace. During the course, the student also focuses on practical career skills and personal professional goals with individual guidance from the professor. The minimum work requirement is 180 hours during one semester (16 weeks). Contact Academic Advising for registration.

ACADEMIC REQUIREMENTS: good academic performance, cumulative GPA of 2.5 or higher, completion of at least 36 credit hours. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit.

RAZG—Razor’s Edge Global

RAZG 1500 Global Leadership (1 credits)
This course examines the overall concept of globalization as it pertains to the key global leadership trends, behaviors, and competencies needed to become a global leader, function as part of a global team, and understand diversity and multiculturalism. Students will analyze global trends, maintain a global journal and develop a personal leadership plan. Every Fall semester

RAZG 1501 Global Engagement (1 credits)
This course examines the overall concept of global engagement as it pertains to the key global leadership trends, behaviors, and competencies needed to become an integrated global leader, function as part of a global team with a purpose, and understand the different elements of global engagement for a productive global society. Students will analyze their own cultural frameworks to understand how they interact with today’s global society, and they will develop a personal global engagement plan.
Frequency: Every Fall.

RAZG 1502 Multicultural and Diversity Issues (1 credits)
This course examines the overall concept of multiculturalism as it relates to diversity and the make-up of global leaders, and develops the awareness, knowledge and skills needed to understand the differences and to interact with all individuals effectively accepting all races, ethnicities, religions, and genders with a minimum of misunderstandings. Students will analyze global trends, emerging causes of conflict, and the meaning of cultural differences with the goal of developing strong multicultural competencies.
Frequency: Every Fall.

RAZG 1503 Global Engagement Portfolio (1 credits)
This course consists of a Reflective Portfolio that Razor’s Edge Scholars compile bringing together all the contents acquired throughout all the Razor’s Edge Global classes. The portfolio is compiled through a process of reflection and reaction to the program’s learning experiences as well as to the Razor’s Edge Global learning outcomes; and it guides Razor’s Edge scholars towards the creation of their own personal global engagement philosophy and leadership plan.
Frequency: Every Fall

RAZL—RAZL-Razor’s Edge Exp Leadersh

RAZL 1000 Self Leadership (1 credits)
This course is the first in a 4 part series designed to provide Razor’s Edge Leadership Scholars participants to understand their leadership capacities while also learning how to effectively approach their role as students to aid in engagement and campus vibrancy. During the first year of the program students focus on discovering their leadership capacities and strengthening them, discovering campus and NSU history, values, and signature events, and discovering others on campus as they build relationships throughout the campus. Frequency: Every Fall.

RAZL 2000 Connecting With Others (1 credits)
This 1 Credit Seminar Course is the second in a 4 part series designed to provide Razor’s Edge participants a coherent and marketable approach to building their leadership capacities. Based upon research by Evers, Rush, and Berdrow (1998) in their groundbreaking “Making the Match” research where industry leaders identified 4 critical areas of competence required to be successful in the world of work. These 4 areas included: Leading/Managing the Self, Effective Communication, Leading Others and Tasks, and Mobilizing for Innovation and Change. Prerequisite(s): [RAZL 1000 or RAZR 1000].
Frequency: Every Winter

RAZL 3030 Applied Leadership (3 credits)
This course examines the fundamentals of leadership, with a particular focus on student-led organizations. Age and grade appropriate methods, materials, activities, and assessment
will be introduced through practical applications in campus-based organizations. Prerequisites: [RAZL 1000 or RAZR 1000] and [RAZL 2000 or RAZR 2000]. Frequency: Every Fall and Winter

RAZR 3500 Leading Others (1 credits)
RAZR 3500 is intended for those students enrolled in the Razor’s Edge Leadership Scholarship program to facilitate their awareness of and skills associated with effectively leading others. Students will learn both conceptual and practical information to increase their leadership capacity in leading others whether individually or in groups. Prerequisites: [RAZL 1000 or RAZR 1000] and [RAZL 2000 or RAZR 2000] and [RAZL 3030 or RAZR 3030]. Frequency: Every Winter

RAZR 4000 Leading Change (1 credits)
RAZR 4000 is intended for those students enrolled in the Razor’s Edge Leadership Scholarship program to facilitate their awareness of and skills associated with effectively leading others. Students will learn both conceptual and practical information to increase their leadership capacity in leading others whether individually or in groups. Prerequisites: [RAZL 1000 or RAZR 1000] and [RAZL 2000 or RAZR 2000] and [RAZL 3030 or RAZR 3030] and [RAZL 3500 or RAZL 3500]. Frequency: Every Winter

RAZ—Razor’s Edge Program

RAZR 1000R Seminar in Research Design and Implementation I (3 credits)
This seminar course is an introduction to the core philosophical underpinnings of research across multiple disciplines. We will explore foundational concepts concerning how scientific research can be used to study the world, including demarcation, the distinction between what science is and is not, hypothesis development, confirmation and falsification, and causation and explanation. Basic scientific paradigms will be described as well. Students will explore how these issues are applicable both for evaluating published research and planning new research. To that end, the course will employ guided discussions during weekly meetings focusing on published studies. Class presentations will be delivered by teams of selected students focused on demonstrating a clear understanding of the research design and results from published, timely and relevant articles within a chosen field of study. Also, students will design a university-based project. The University-based project will involve formulating a research study that is consistent with core concepts of scientific integrity and ethical standards. Prerequisites: None. Frequency: Every Fall

RAZR 2000R Seminar in Research Design and Implementation II (3 credits)
Students will continue to explore how basic scientific paradigms are used to both understand published research and plan new investigations. This seminar course will involve guided class discussions focusing on both published peer reviewed studies and conducting an original University-based project. Class presentations will be delivered by teams of students and will focus on the role of theory in development of research questions and hypotheses, research design, and interpretation of results from peer-reviewed research articles within a chosen field of study. Students will complete all aspects of the University-based project that was started in RAZR1000R as follows: formulating a research question, designing a brief instrument, collecting data within the University, analyzing the data, formally writing-up results, and presenting findings to the class. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: Students must pass RAZR1000R with a B letter grade or better. Frequency: Every Winter

RAZR 2501 Field Experience I (1 credits)
This experiential learning component of the Razor’s Edge Research Minor will provide students with hands-on training to increase competence in various fields, discover new interests and talents, and reflect upon potential graduate school and career paths. These experiences may take the form of: 1) immersions (during which a student is paired with a research professional and completes an agreed upon scholarly research review paper or proposal); 2) mentorships (during which students spend one semester learning within the context of the paired mentor’s research project as a co-researcher, completing various tasks as assigned); 3) internships (functions much the same as a mentorship, but for a longer period of time), or 4) independent research studies (during which students conduct a research study of their own design in collaboration with a mentor). Settings for these investigative experiences include but are not limited to labs, professional workspaces, clinics, and natural environments. Each placement is different, but all depend upon the ability to complete tasks as assigned by the faculty mentor. The students will document field placement experiences via a weekly log and artifacts recorded in a digital portfolio. Students will meet with their cohort of Razor’s Edge Research scholars to communicate their experiences in a classroom setting. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: RAZR 1000R, RAZR 2000R, and RAZR 3000R. Frequency: Every Term.

RAZR 3502 Field Experience II (1 credits)
This experiential learning component of the Razor’s Edge Research Minor will provide students with hands-on training to increase competence in various fields, discover new interests and talents, and reflect upon potential graduate school and career paths. These experiences may take the form of immersions (during which a student is paired with a research professional and completes an agreed upon scholarly research review paper or proposal), mentorships (during which students spend one semester learning within the context of the paired mentor’s research project as a co-researcher, completing various tasks as assigned), internships (functions much the same as a mentorship, but for a longer period of
time), and independent research studies (during which students conduct a research study of their own design in collaboration with a mentor). Settings for these investigative experiences include but are not limited to labs, professional workspaces, clinics, and natural environments. Each placement is different, but all depend upon the ability to complete tasks as assigned by the faculty mentor. The students will document field placement experiences via a weekly log and artifacts recorded in a digital portfolio. Also, students will meet with their cohort of Razor’s Edge Research scholars to communicate their experiences in a classroom setting. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisites: RAZR 1000R, RAZR 2000R, and RAZR 3000R. Frequency: Every Term

RAZR 4501 Field Experience IV (1 credits)
This experiential learning component of the Razor’s Edge Research Minor will provide students with hands-on training to increase competence in various fields, discover new interests and talents, and reflect upon potential graduate school and career paths. These experiences may take the form of immersions (during which a student is paired with a research professional and completes an agreed upon scholarly research review paper or proposal), mentorships (during which students spend one semester learning within the context of the paired mentor’s research project as a co-researcher, completing various tasks as assigned), internships (functions much the same as a mentorship, but for a longer period of time), and independent research studies (during which students conduct a research study of their own design in collaboration with a mentor). Settings for these investigative experiences include but are not limited to labs, professional workspaces, clinics, and natural environments. Each placement is different, but all depend upon the ability to complete tasks as assigned by the faculty mentor. The students will document field placement experiences via a weekly log and artifacts recorded in a digital portfolio. Also, students will meet with their cohort of Razor’s Edge Research scholars to communicate their experiences in a classroom setting. Prerequisites: RAZR 1000R, RAZR 2000R, RAZR 3000R, RAZR 2501, RAZR 3501, RAZR 3502, and RAZR 4501: Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Term

RAZT—RAZT-Razor’s Edge Shark Teach

RAZT 1050 Fundamentals of Peer Education (3 credits)
This course introduces core competencies required to become an effective peer educator. Students will learn about historical and theoretical underpinnings that define the unique role and influence of peer educators and be able to apply best practices in a variety of student leader roles on campus. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. (no prerequisites). Frequency: Every Fall.

RCP—Respiratory Therapy

RCP 3001 Medical Terminology for Respiratory Therapy (1 credits)
This course will provide use of medical terminology for appropriate and accurate communication in patient care. Students acquire a medical vocabulary, knowledge of medical terminology and terminology reference material. Every Fall
Prerequisites: RAZR 1000R, RAZR 2000R and RAZR 3000R. Frequency: Every Term

RCP 3002 Cardiopulmonary Anatomy & Physiology (3 credits)
This course will provide a comprehensive study of cardiopulmonary anatomy and physiology. Topics include normal ventilation, lung mechanics, pulmonary circulation, diffusion, and gas transport in the blood. The course will also include the natural and chemical regulation of breathing, blood flow and pressure, cardiac output with an emphasis on heart-lung relationship, clinical applications of respiratory care and commonly associated disorders. The renal system will be included. Frequency: Every Fall.

RCP 3003 Fundamentals of Respiratory Care w/Lab (4 credits)
This course provides students with an introduction to the field of respiratory care. Historical development of the profession, the principles of chemistry and physics as they apply to respiratory care, cardiopulmonary anatomy and physiology as well as respiratory care procedures are covered. This course will include oxygen delivery devices, humidifiers, aerosol generators, gas delivery, metering and analyzing devices, precursors, vibrators, environmental devices, manometers and gauges and vacuum systems. Specific modes of respiratory care are examined to understand the indications, hazards, contraindications and evaluation of therapy. Modes of care include medical gases, humidity/aerosol therapy, aerosol medications, positive pressure breathing, incentive spirometry, expiratory resistance, postural drainage and percussion/vibration. Frequency: Every Fall.

RCP 3004 Respiratory Care Basics and Assessments w/Lab (4 credits)
This course provides essentials of respiratory assessment which will include review of existing data in the patient record, patient history, physical examination, oximetry, blood gases, respiratory monitoring, laboratory studies, chest and upper airway radiographs, bedside EKG interpretation, cardiovascular monitoring, and nutritional assessment. Basic life support will be covered to include cardiopulmonary resuscitation, artificial ventilation and circulation, endotracheal intubation, airway care, tracheostomy care, recognition and treatment of arrhythmias. Related equipment will also be reviewed to include manual resuscitators, artificial airways, defibrillators and cardiac monitors. Frequency: Every Fall.

RCP 3007 Pulmonary Disease (3 credits)
The course provides a comprehensive approach to etiology, pathophysiology, clinical manifestations, diagnosis, treatment, and prognosis of common pulmonary diseases and syndromes. Main topics include obstructive and restrictive pulmonary and cardiovascular disorders, neoplastic disease of the lung, disordered breathing, cardiac and cardiovascular disorders, neuromuscular disorders, shock, near drowning, burns, smoke inhalation. Frequency: Every Winter.

RCP 3008 Pharmacology for Respiratory Therapy (3 credits)
The purpose of this course is to cover the physiologic and pharmacologic basis of pulmonary and cardiac medications. Preparation, calculation of dosages and mixtures and general principles of pharmacology will be covered followed by an in-depth discussion of the most commonly used respiratory drugs. This will include bronchoactive drugs, and drug groups related to the cardiopulmonary system.
RCP 3009 Patient Monitoring w/ Lab (4 credits)
This course provides a study of invasive and non-invasive patient monitoring techniques and equipment. Invasive topics include hemodynamic monitoring, arterial pressure monitoring, central venous and pulmonary artery catheters, as well as cardiac output measurement. Non-invasive monitoring topics include pulse oximetry, transcutaneous monitoring, inductance plethysmography, capnography, and electrocardiogram. This course will also include the recognition and treatment of arrhythmias and cardiovascular pharmacology. ACLS instruction will be provided. Frequency: Every Summer I.

RCP 3011 Mechanical Ventilation w/lab (4 credits)
This course provides instruction in the theory, setup, operation, and maintenance of mechanical ventilators and related equipment. Topics include mechanical ventilator theory, ventilator operation, ventilator maintenance, and troubleshooting. Lab hours will provide students hands on practice in these areas. Frequency: Every Winter.

RCP 3012 Cardiopulmonary Diagnostics and PFT w/Lab (4 credits)
An overview of the various areas comprising cardiopulmonary diagnostics to include normal and abnormal pulmonary function and related technology. The student will learn to perform, interpret, and evaluate pulmonary function studies. In addition, the student will learn the operation and maintenance of pulmonary function and gas analysis equipment. Other topics include stress and exercise testing, metabolic testing, ventilation/perfusion scanning, cardiac catheterization laboratory, nutrition, and non-invasive cardiology. Lab hours will provide students hands on practice in these areas. Frequency: Every Fall.

RCP 3013 Human and Infectious Disease (3 credits)
This course will cover non-respiratory disease managed in the critical care unit and will include neurologic disorders, shock, trauma, sepsis, drug overdose, renal failure, acute G.I. disturbances, and respiratory care of the post-operative patient. Common infectious diseases such as HIV/AIDS, hepatitis, SARS, and influenza will also be studied. Frequency: Every Summer I.

RCP 3501 Clinical I (2 credits)
This course introduces students to clinical practice in basic respiratory care procedures. Topics include: introduction to clinical affiliate, patient assessment, chart review, medical documentation, medical gas therapy, aerosol therapy, incentive spirometry, and chest physiotherapy. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit.

RCP 3502 Clinical II (3 credits)
This course introduces students to critical care. Students will cover tracheostomy care, ventilator monitoring, arterial puncture, endotracheal intubation, EKG services and bronchoscopy observation. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Summer I.

RCP 4001 Neonatal/Pediatric Respiratory Care w/Lab (4 credits)
This course provides an overview of important concepts required for the understanding of the neonatal and pediatric patient. From fetal growth to infant development, students will learn how to assess, identify, and treat the most common respiratory diseases that affect the neonatal and pediatric patient. An overview of common congenital diseases, including respiratory, cardiac, gastrointestinal, and neurologic, will be included. Neonatal/pediatric critical care and mechanical ventilation are included. Laboratory time will focus on respiratory care equipment used to care for neonates and pediatric patients to include: isolettes, ventilators, specialty gases, intubation, manual resuscitators, airway clearance devices, and airway maintenance. Frequency: Every Fall.

RCP 4002 Cardiopulmonary Technology & Specialties (3 credits)
This course will provide an overview of the various areas comprising cardiopulmonary diagnostics and related technology. Topics include sleep laboratory, disaster management, extracorporeal membrane oxygenation, mechanical circulatory assistance, hyperbaric medicine, bronchoscopy (laser, etc.), flight and ground transport, and perfusion technology. This course will also cover genetics human development, including the application of genetic technology in regard to the pulmonary system. Frequency: Every Summer I.

RCP 4003 Alternate Respiratory Disciplines (3 credits)
This course provides an overview of the concepts, procedures, and equipment utilized in the delivery of long-term care to persons with a chronic cardiopulmonary disorder. The development and implementation of disease management programs for the care of patients with asthma, COPD, and other chronic conditions is presented. Pulmonary rehabilitation, patient education, and smoking cessation programs are reviewed. Provision of health care services in the home and other non-acute settings is examined. Frequency: Every Fall.

RCP 4005 Health Research & Evidence-Based Practice (3 credits)
This course is designed as an introduction to critical analysis of research and medical literature as well as basic research methods. The course includes an introduction to descriptive and inferential statistics and research design. Statistical and research concepts and procedures are combined with an emphasis on Evidence based research in Respiratory Care. Frequency: Every Winter.

RCP 4006 Leadership & Management in Respiratory Care (3 credits)
Extensive examination of current practices/trends of techniques used in the leadership of the health care environment. Emphasis will be placed upon specific skill sets used by the managers of today’s workforce. Frequency: Every Winter.

RCP 4009 Legal and Ethical Considerations in Respiratory Care (3 credits)
This course will provide a forum for discussion of current ethical, legal and professional issues. We will refer to historical and emerging controversies in health care and society that influence the patient-patient care giver relationship. The method of instruction will primarily be student presentation and classroom. Frequency: Every Winter.

RCP 4040 Statistics & Principles of Scientific Literature & Evaluation (3 credits)
This course is designed to introduce the conceptual foundation of statistical analysis & statistical reasoning of health sciences data, and prepare the student to calculate, interpret and utilize appropriate software packages for basic statistical analysis. This will include the use of descriptive and inferential statistics, graphical and numerical descriptive measures, probability, common random variables and their distributions, Binomial and normal distributions, the Central Limit Theorem, sampling procedures, confidence intervals, and hypothesis testing will also be introduced. The course will provide and introduction to basic research methods for respiratory care. Frequency: Every Fall.

RCP 4100 Clinical Seminar 1 (2 credits)
This is a hybrid course. Review of respiratory care as it pertains to the credentialing examinations administered by the National Board for Respiratory Care (NBRC). A series of written and simulation examinations will be used to prepare the students for these exams. Emphasis will be placed on decision-making and problem-solving as they relate to clinical respiratory care. Students will also obtain Medical Error certification necessary for licensure. Current processes for Respiratory Therapy Protocol development and initiation will be discussed. Frequency: Every Winter.

RCP 4101 Clinical Seminar 2 (2 credits)
This is a hybrid course. Continued review of respiratory care as it pertains to the registry (RRT)
Entrepreneurship fosters learning through the application of classroom theory in the workplace. Undergraduate students have the option of participating in a university-sponsored internship for academic credit. The minimum internship work requirement is 180 hours during one semester. Registration for an internship is done through the HEBE Office of Academic Advising, not online, after conferral with the NSU Office of Career Development. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. ACADEMIC REQUIREMENTS: Good academic standing, GPA of 2.5 or higher, and completion of at least 36 credit hours.

REE 3910 Special Topics in Real Estate (3 credits)
Topics in real estate that are not included in a regular course offerings. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Frequency: Upon request and see academic department chair.

REE 4302 Residential Property Management (3 credits)
This course focuses on managing and marketing residential properties using condominiums, apartment buildings, and mixed use properties as the basis for discussion and analysis. Issues include maintenance, marketing, location analysis, lease provisions, risk management, leasehold improvements, and government and tax incentive programs. Students discuss best practice examples and analyze and visit properties to meet industry leaders. Frequency: Every Fall.

REE 4303 Commercial Property Management (3 credits)
This course focuses on managing and marketing commercial property using retail buildings, office buildings, warehouses, medical buildings, factories, and industrial properties as the basis for discussion and analysis. Issues include maintenance, marketing, location analysis, lease provisions, risk management, leasehold improvements, and government and tax incentive programs. Students discuss best practice examples and analyze and visit properties to meet industry leaders. Frequency: Every Fall.

REE 4304 Facilities Management (3 credits)
This course focuses on the physical buildings, grounds, and services associated with an organization. Topics covered include issues in architecture, computer and telecommunication systems, interior design, real estate acquisition and disposition, construction project administration, and energy management. Frequency: Every Winter.

REE 4305 Property Portfolio and Asset Management (3 credits)
This course focuses on maximizing the performance and value of the company’s portfolio of property assets that are owned and/or managed through acquisitions, dispositions, or operations. Attention is focused on formulating and implementing a long-range property asset management and/or fund management strategy. While asset managers typically focus on a single property type, e.g., office properties. Within the company’s real estate investment portfolio, portfolio managers would be responsible for all the product types within the fund, which may include office, retail, and multifamily properties. Frequency: Every Winter.

REE 4306 Hospitality, Resort, Cruise Ship, and Casino Property Management (3 credits)
This course focuses on the property management functions that enable hospitality focused enterprises to manage front-office capabilities, such as booking reservations, guest check-in/check-out, room assignment, managing room rates, and billing. Real estate and physical property management, creative hotel marketing, and disciplined fiscal techniques are examined to maximize revenue, profit and asset value of each property. Frequency: Every Winter.

REE 4990 Independent Study in Property Management (3 credits)
The student works independently under the guidance of a faculty member to learn more about a subject area for credit. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request and see academic department chair.

RRT—Reg. Respiratory Therapy

RRT 3014 Advanced Patient Monitoring and Assessment (3 credits)
This course studies techniques and methods used to analyze and evaluate the health status of critically ill adult patients with emphasis on the respiratory, cardiovascular, and renal systems. Frequency: Every Summer II.

RRT 3015 Critical Care Pathophysiology for Respiratory Therapy (3 credits)
This course provides a survey of the disease processes which affect the tissues, organs of the body as a whole. Special emphasis is placed on infectious diseases, their causes, prevention and treatment in the critical care setting. Frequency: Every Winter.

RRT 3016 Advanced Cardiopulmonary Physiology for Respiratory Therapy (3 credits)
This course covers advanced physiology of the cardiovascular and pulmonary systems. It includes the study of respiratory physiology, cardiac and circulatory function with relevant clinical application of concepts in ECG interpretation, blood pressure regulation, gas exchange and transport, breathing regulation, respiratory insufficiency as well as congenital
abnormalities. **Frequency:** Every Fall.

**RRT 3017 Outpatient Services in Respiratory Therapy (3 credits)**
This course is an introduction to the history, trends, issues, and evolution of the outpatient services. It also covers reimbursement for respiratory therapy services in various healthcare settings. The course includes selected respiratory care theories and practices in alternate-care sites including pulmonary diagnostics, pulmonary rehabilitation, home care and sub-acute care. **Frequency:** Every Spring.

**RRT 3018 Advanced Pharmacology in Respiratory Therapy (3 credits)**
This course builds upon a basic understanding of the concepts and principles of pharmacology as applied in the respiratory therapy in the management of patient with cardiopulmonary disease and critical care. **Frequency:** Every Winter.

**RRT 3020 Quality Improvement in Healthcare (3 credits)**
This course provides an introduction and evaluation of current approaches to assessing risk as well as improving health care quality through the practice of continuous quality improvement. The focus is on conceptual understanding and experiential learning. **Frequency:** Every Summer II.

**RRT 3021 Sleep Medicine (3 credits)**
The course provides an in-depth overview of sleep medicine to include the anatomical and physiological considerations of sleep and breathing. Sleep disorders and polysomnography are explored to include monitoring techniques and instrumentation. **Frequency:** Every Spring.

**RRT 4005 Evidence-Based Practice (3 credits)**
This course will provide the student with an introduction to evidence-based practice, and an opportunity to acquire the skills necessary to incorporate evidence and best practices into professional work. This will include an understanding of research methods and critical appraisal of the research literature. **Frequency:** Every Spring.

**RRT 4006 Leadership and Management for Respiratory Care (3 credits)**
This course provides an extensive examination of current practices/trends of techniques used in the leadership of the health care environment. Emphasis will be placed upon specific skill sets used by the managers of today’s workforce. **Frequency:** Every Spring.

**RRT 4007 Education Principles in Health Care (3 credits)**
This course provides an introduction to basic principles of education and their application to the current health care environment. Course content includes information on designing a lecture or course for the classroom, as an independent project or in a continuing education program. It focuses on assessing educational needs, organizing instruction, instructional methods and education. **Frequency:** Every Summer II.

**RRT 4009 Legal and Ethical Considerations in Respiratory Care (3 credits)**
This course will provide a forum for discussion of current ethical, legal and professional issues. We will refer to historical and emerging controversies in health care and society that influence the patient-patient care giver relationship. The method of instruction will primarily be student presentation and classroom. **Frequency:** Every Fall.

**RRT 4010 Case Management Theory and Process (3 credits)**
This course on case management uses the framework of the strengths-based model in working with different populations with a special focus on pulmonary patients. Through an integration of online activities and discussion, key issues will be explored and examined in-depth. **Frequency:** Every Summer II.

**RRT 4014 Operational Analysis and Quality Improvement (3 credits)**
This course addresses health care strategies to affect operational decisions. Strategic and tactical planning issues, with particular attention to marketing and strategic planning, opportunity assessment, and external analysis are covered. Students also analyze and evaluate Total Quality Management (TQM) principles and Continuous Quality Improvement (CQI) processes and organizations. Students compare total quality tools and performance measures and examine leadership and teamwork in the business environment.

**RRT 4013 Strategic Planning and Organizational Development for Health Care (3 credits)**
This course focuses on management of human resources. Topics include employment law, typical middle management functions of recruitment, supervision, and retention, disciplinary procedures, and performance standards. The student will gain knowledge of organizational behavior, entrepreneurialism, and change management. Assessment and benchmarking techniques are also explored. **Frequency:** Every two years

**RRT 4502 Practicum (3 credits)**
This course includes experiences in a chosen focus area (clinical, administrative, or population-based). This experience will culminate in a capstone project in the form of research, or other scholarly activity that articulates the design, organization, statistics and data analysis used and includes a written presentation of the project.

**RRT 4505 Scientific Investigation (3 credits)**
This course provides the student with an opportunity to gain experience in applying the scientific method. Emphasis will be on literature inquiries, statistical analysis, research design, and the preparation of material for publication. The student will develop an independent project or thesis proposal under the supervision of a faculty advisor, and prepare and submit a final report prior to the end of the students academic program. Upon request. See academic Department Chair.

**RRT 4506 Internship (3 credits)**
This course is designed to have the student demonstrate competency in advanced practice area (neonatal critical care, adult critical care, pediatric critical care, pulmonary rehabilitation, pulmonary function testing, polysomnography, hyperbaric therapy, respiratory care management or respiratory care education). Students select a specialty area for Internship. A written presentation will be completed for course completion.

**RRT 4507 Scientific Investigation 2 (3 credits)**
This course provides the student with the opportunity to perform a systematic review or meta-analysis. Emphasis will be on study protocol design, define inclusion/exclusion criteria, literature search strategies, and statistical methods for analysis. The student will develop an independent systematic review or meta-analysis with the aid of a faculty advisor and submit as a final project prior to graduation. Upon request. See academic Department Chair.

**RT—Recreational Therapy**

**RT 1100 Recreational Therapy: Theory and Foundations (3 credits)**
This course examines the history, concepts, theories, and foundations of therapeutic recreation. It introduces the role of therapeutic recreation for disadvantaged populations and persons with disabilities and illnesses in health care and community settings. Students will examine the application of therapeutic recreation in prevention services and the link between social, psychological, and physical health. Students will also gain a basic understanding of the disabilities, impairments and illnesses most often encountered in the provision of therapeutic recreation services. Students will gain a basic understanding of the principles and techniques in therapeutic recreation programming to include: client assessment, individual programming planning, behavioral techniques, activity analysis, documentation, specific program design, and program evaluation. **Frequency:** Every Fall and Winter.

**RT 1200 Recreational Therapy with Physically Disabled Individuals (3 credits)**
Addressing physical and psychological needs of individuals with physical disabilities. This course will also provide appropriate recreational therapy
techniques and methods used in providing services to individuals in clinical and community settings. Frequency: Every Fall.

RT 1400 Current Trends in Recreational Therapy (3 credits)
This course will examine the most recent trends in the field of Therapeutic Recreation. Topics that will be discussed will include: the current settings in which recreational therapists are typically employed, various treatment modalities, collaboration entities that are beneficial to clients treated in recreational therapy environments, and future developments within the Therapeutic Recreation field, including evaluation of current research in this area. Prerequisite: RT 1100. Frequency: Every Fall.

RT 2000 Recreational Therapy: Processes and Techniques (3 credits)
An introduction to the processes and techniques of therapeutic recreation to meet the unique needs of people with disabilities. This course is designed to discuss the assessment, planning, implementation, and evaluation strategies utilized in recreational therapy. The course will also take an in-depth look at the challenges associated with the recreational treatment process and examine various methods used in overcoming these challenges. Frequency: Every Fall.

RT 2020 Introduction to Gerontology for Recreational Therapists (3 credits)
This course will focus on aging, providing evidence-based, comprehensive and holistic knowledge about growing old. In addition, this course will explore practical applications of knowledge that will enhance the vitality of older adults in settings in which recreational therapy is or can be provided. As recreation therapists, your work may primarily be oriented toward older adults. In this course, you will gain knowledge about the factors influencing the health and wellness of older adults, as well as health promotion, an important aspect of health and wellness. Additionally, you will gain an awareness of individual differences and cultural differences that affect aging.

RT 2100 Recreational Therapy for Individuals with Mental Illness (3 credits)
This course will address psychiatric, social, behavioral, and addiction difficulties through recreational therapy interventions in behavioral and mental health settings. This course will discuss the therapeutic recreation strategies and techniques that can improve functional abilities, enhance recreation skills and attitudes, build confidence, ease fears, promote greater self-reliance, strengthen interpersonal skills, manage stress and emotional difficulties, and enrich the client’s quality of life. Prerequisite: PSYC 3260. Frequency: Every Winter.

RT 2200 Multicultural Issues in Therapeutic Recreation Settings (3 credits)
This course examines multicultural competence and helps students develop awareness, knowledge, and skills that will enable them to work effectively in cross-cultural situations. The course will also discuss the challenges and ethical considerations associated with working with diverse populations in a therapeutic recreation environment and the various methods used in overcoming these challenges. Frequency: Every Fall and Winter.

RT 3050 Clinical Assessment and Evaluation in Recreational Therapy (3 credits)
This course will examine the importance of reliable assessment and evaluation in the recreational therapy treatment planning process. There will be a focus on assessment, developing measurable treatment goals, evaluating outcomes, and documentation. Frequency: Every Fall.

RT 3100 Recreational Therapy Services for Children and Adolescents (3 credits)
This course will address physical, psychological, and social needs of children and adolescents through recreational therapy. The course will also take an in-depth look at assessment, treatment, and evaluation considerations when working with children and adolescents. Age-appropriate activities to provide support, pain management, and coping education for medical and therapy procedures will be discussed, as well as activities that involve families to facilitate coping skills for the child and the family. Frequency: Every Winter.

RT 3200 Recreational Therapy Services for Older Adults (3 credits)
This course will address the physical, psychological, and social needs of older adults through recreational therapy. This course will also take an in-depth look at assessment, treatment, and evaluation considerations when working with the older adult population. Frequency: Every Fall.

RT 3250 Human Anatomy and Physiology (3 credits)
This course deals specifically with form and function of human systems. The course stresses human anatomy and physiology. A comprehensive coverage of the musculoskeletal system, articulations and the neural system is discussed. The application of kinesiological principles to the analysis of movement and the description of movement in anatomical terms is also a focus of the course. Frequency: Every Fall and Winter.

RT 3300 Supervision in a Therapeutic Recreation Setting (3 credits)
This course will examine specific management, supervision, and leadership skills when overseeing therapeutic recreation practice. Operational and program evaluation procedures specific to therapeutic recreation settings will be discussed, including components such as developing quality improvement measures, directing and advising staff, and managing conflicts with clients and staff. Frequency: Every Winter.

RT 4100 Field Placement in Recreational Therapy I (3 credits)
The field placement courses will be individually arranged and will provide a supervised on-site training experience (280 hours total). Students will select their choice of a Community Based Organization (CBO) and will complete their field experience in this site. This experience will provide a hands-on implementation of principles and theory learned as they relate to recreational therapy settings. Students will be supervised by an onsite supervisor who is NCTRC CTRS certified on a weekly basis. Frequency: Every Fall.

RT 4120 Field Placement in Recreational Therapy (6 credits)
The field experience will be individually arranged and will provide a supervised on-site training experience (560 hours). Students will select their choice of a Community Based Organization (CBO) and will complete their field experience in this site. This experience will provide a hands-on implementation of principles and theory learned as they relate to recreational therapy settings. Students will be supervised by an onsite supervisor who is NCTRC CTRS certified on a weekly basis. Prerequisite: completion of 90 or more credit hours. Frequency: Every Fall and Winter.

RT 4200 Field Placement in Recreational Therapy II (3 credits)
The field placement courses will be individually arranged and will provide a supervised on-site training experience (280 hours total). Students will select their choice of a Community Based Organization (CBO) and will complete their field experience in this site. This experience will provide a hands-on implementation of principles and theory learned as they relate to recreational therapy settings. Students will be supervised by an onsite supervisor who is NCTRC CTRS certified on a weekly basis. Prerequisite: RT 4100. Frequency: Every Winter.

SCIE—Science

SCIE 1150 Great Experiments in Science (1-6 credits)
An outline course in which students review some of the experiments and scientists that have shaped the fields of biology, chemistry, and physics. Students will receive one unit of credit for completion of 10 modules. Completion of 60 modules results in six credits. The course culminates in a lecture given by a prominent scientist concerning a current topic in scientific research. The course is intended to advance scientific literacy and examine the impact of science on our health, technology, and culture.
SCIE 3210 History of Science (3 credits)
The course is a survey of science and scientists from ancient to modern times. The major advancements in life science, medicine, and oceanography will be discussed from the perspective and tenor of the times. Some original literature and autobiographies as well as historical reviews will be assigned and discussed. **Prerequisite:** BIOL 1040 or M BIO 1050 or higher. **Frequency:** Every Fall and Winter.

SCIE 4490 Research Methods (3 credits)
This course will present a broad theoretical outline for the design and implementation of research projects. Topics to be covered include problem definition, principles of design, sampling, measurement concepts, and research proposal preparation. Although this is not a course in statistics, a brief overview of univariate and bivariate statistics will be presented. This course will also cover the presentation of results, including graphics. It is assumed that the student will have some background in basic statistics and have some familiarity with computers. **Prerequisite:** MATH 3020 or MATH 3020H or MATH 2020 or MATH 2020H. **Frequency:** Every Even Winter.

SEBI—Sci Ed Biology Internship

SEBI 4570 Secondary Biology Education Internship (12 credits)
This course for Secondary Biology Education majors offers a comprehensive review and practical application of educational philosophy, methods, and strategies through a 12-week clinical experience (internship) consisting of 450 hours in a secondary biology classroom setting that includes coursework and seminars. The central coursework is composed of a 12-week clinical experience, with the concurrent seminar serving as a supportive and reinforcing component. During the seminar sessions, the teacher candidate will explore, in depth, such topics as school board rules, regulations and policies; professional ethics; best practices; national and state standards; teaching strategies; current trends in education; teaching competencies; secondary biology student assessment; NSTA safety guidelines for the science lab, including the safety and welfare of all living things in the science lab, and reflective practices. This course requires candidates to demonstrate professional, pedagogical, and content standards, including ESOL competencies and skills. **Prerequisites:** EDUC 2500, ESOL 2903, EDUC 3330, ESOL 3340, EDUC 3350, EDUC 3360, EDUC 3525, EDUC 3535, SECE 3550, SECE 4320, EDUC 4200, SECE 4550, SECE 4560, ESOL 4565, BIOL 1070, CHEM 1100, BIOL 2400, BIOL 1500, BIOL 1510, BIOL 3200, BIOL 3312, MATH 2020, and passing scores on all subtests of the Florida Teacher Certification Examination. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. **Frequency:** Every Fall and Winter.

SECE—Secondary Education

SECE 3210 Creative Writing Workshop (3 credits)
This is an eight-week course, which introduces students to a variety of creative writing strategies and instructional practices. Through detailed literary analysis and experiential learning opportunities, students will emerge from this course with an enhanced understanding of how to both create and five steps of the writing process while providing them with opportunities to provide their peers with constructive and authentic feedback related to their work. **Frequency:** Every Fall and Winter

SECE 3210F Creative Writing Workshop (3 credits)
This is an eight-week course, which introduces students to a variety of creative writing strategies and instructional practices. Through detailed literary analysis and experiential learning opportunities, students will emerge from this course with an enhanced understanding of how to both create original literary works and apply five steps of the writing process while providing them with opportunities to provide their peers with constructive and authentic feedback related to their work. **Frequency:** Every Fall.

SECE 3530 Methods of Teaching Secondary Social Studies (3 credits)
This course is a study of content, methodology, program development, appropriate activities, and assessment techniques for secondary school social studies. In addition, students will implement ESOL strategies in planning and presenting lessons. Students will also become familiar with the Florida Accomplished Practices as appropriate. Students are required to teach a social studies lesson in a classroom during the 10 hour field experience required for this class. This is an ESOL infused course. **Prerequisites:** EDUC 3330, EDUC 3350, EDUC 3360, and EDUC 3525. **Frequency:** Every Fall.

SECE 3530F Methods of Teaching Secondary Social Studies (3 credits)
This course is a study of content, methodology, program development, appropriate activities, and assessment techniques for secondary school social studies. In addition, students will implement ESOL strategies in planning and presenting lessons. Students will also become familiar with the Florida Accomplished Practices as appropriate. Students are required to teach a social studies lesson in a classroom during the 10 hour field experience required for this class. This is an ESOL infused course. **Frequency:** Every Fall.

SECE 3540 Methods of Teaching Secondary Mathematics (3 credits)
The purpose of this course is to examine content and methods for teaching Mathematics in middle and secondary school. Our emphasis is on mathematical problem solving; the necessary training for lifelong learning; use of technology; alternative assessment; and techniques of assertive discipline. Students will explore a variety of techniques and reflect on approaches most applicable to teaching and learning in the middle school and high school mathematics classroom. “Hands-on” approaches, resources, materials, technology, and ideas drawn from the student’s experience will be discussed. A full and comprehensive grasp of the National and State standards in Mathematics will be developed. There will be a field experience in a community school. **Frequency:** Every Winter.

SECE 3550 Methods of Teaching Secondary Science (3 credits)
The purpose of this course is to examine content and methods for teaching science in a secondary school. You will explore a variety of techniques and reflect on approaches most applicable to teaching and learning in the high school science classroom. “Hands-on” approaches, resources, materials, technology, and ideas drawn from the student’s experience will be discussed. A full and comprehensive grasp of the National and State standards in science will be developed. There will be a Field experience in a community school required. **Prerequisites:** EDUC 3525, EDUC 3530, ESOL 3340, and passing scores on the Florida Teacher Certification Examination. **Frequency:** Every Fall.

SECE 3550F Methods of Teaching Biology in the Secondary Classroom (3 credits)
The purpose of this course is to examine content and methods for teaching science in middle and secondary school. You will explore a variety of
This course engages students in the study of secondary school content related to geometry and measurement from an advanced point of view. Emphasis will be placed on development of mathematical practices in problem solving, reasoning, modeling with mathematics, strategic use of tools and representations, use of mathematical structure, and attention to precision in mathematical language. Course activities support development of knowledge of secondary curriculum, methods of teaching and learning, and diverse student thinking related to geometry and measurement to build a cohesive, unified vision of big ideas and supporting concepts and a progression of learning that is appropriate and meaningful for diverse learners. Students will be engaged in experiences fostering reflective practice, ethical decision making, and continuous learning. Frequency: Every Fall and Winter.

SECE 4370 Methods of Teaching Secondary English (3 credits)
This course addresses current instructional methodologies in English in the secondary school. The emphasis is on identifying strategies and procedures for comprehensive instruction across the written language arts areas. Students will implement ESOL strategies in planning and presenting lessons. In addition to class meetings, at least 10 hours of field experience are required. Prerequisites: EDUC 3330, EDUC 3350, EDUC 3360, and EDUC 3525. Frequency: Every Fall.

SECE 4370F Methods of Teaching Secondary English (3 credits)
This course addresses current instructional methodologies in English in the middle and secondary school. The emphasis is on identifying strategies and procedures for comprehensive instruction across the written language arts areas. Students will implement ESOL strategies in planning and presenting lessons. In addition to class meetings, at least 10 hours of field experience are required. Frequency: Every Fall.

SECE 4380F Methods of Teaching Computer Science (3 credits)
This course provides students with the knowledge and skills they will need to succeed as computer science educators. Throughout this course, students engage in active learning experiences, which provide them with opportunities to translate theory to practice. This course features a requirement of at least 10 hours of field placement. Frequency: Every Fall.

SECE 4510F Race, Society, and Ethics (3 credits)
This eight-week seminar is a guide for facilitating authentic dialogues related to race, it’s function as a social construct, and the ethical challenges that professional educators encounter both in and outside of the classroom. During this course, students will make connections between the social construction of racial identity and the use of racism as a mechanism for economic control. Students will immerse themselves in self-reflection through a series of activities designed to enhance their understanding of critical race theory. Frequency: Every Fall.

SECE 4550 Teaching Inquiry Science in Secondary Schools (3 credits)
The design of this course is to prepare and equip all secondary biology education majors with the knowledge, skills, principles, major concepts, current theories, practices, and dispositions of teaching science in the secondary school. Concepts and methods of teaching science through inquiry based learning and hands-on investigation activities will be explored, discussed, and each teacher candidate will develop hands-on activities and assessments that promote scientific inquiry. There is a ten hour field experience requirement. Pre-requisite: SECE 3550. Frequency: Every Winter.

SECE 4550F Teaching Inquiry Science in Secondary Schools (3 credits)
This course is designed to prepare and equip secondary science education majors with the knowledge, skills, principles, major concepts, current theories and practices used in the secondary school classroom. Concepts and methods of designing lessons and teaching biology through inquiry based learning will be explored and discussed. Additionally, each teacher candidate will develop hands-on activities and assessments that promote analytical thinking and scientific inquiry in order to satisfy the educational needs of diverse learners. In addition to class meetings, at least 10 hours of field experience is required. Frequency: Every Fall and Winter.

SECE 4560 Methods of Teaching Secondary Reading (3 credits)
This course addresses the significance of reading ability and study skills throughout the secondary school curriculum. The emphasis is on identifying sources of difficulties experienced by secondary school students in reading and learning from instructional materials. General strategies for learning from textbooks are examined as well as study skills and specific strategies for dealing with text materials from particular content areas. Students will implement ESOL strategies in planning and presenting lessons. In addition to class meetings, at least 10 hours of field experiences are required. Prerequisites: EDUC 2500, EDUC 3330, EDUC 3350, EDUC 3360, and EDUC 3525. Frequency: Every Fall and Winter.

SECE 4560F Methods of Teaching Secondary Reading (3 credits)
This course addresses the significance of establishing an in-depth understanding of critical literacy for preservice teachers. The course also highlights the value of reading, writing, speaking and listening in helping adolescent readers become more skillful in teaching in the content
areas. Through active learning experiences provided throughout this course, candidates will develop an understanding of the importance of the ability to learn from text. This course will also address the concerns of special needs students. Candidates will implement strategies for ESOL and struggling readers in planning and presenting lessons. In addition to class meetings, at least 10 hours of field experiences are required. Frequency: Every Fall and Winter.

SECE 4565 Teaching Controversial Topics in Social Studies (3 credits)
This course is designed to develop the knowledge and skills required to teach about controversial topics by examining history/social science curriculum and appropriate instructional methods. Students explore ways to teach about the dangers of indifference and the values of participation in a democracy by confronting the complexities of history. Specifically, students will develop their knowledge of a critical discourse educational model including (1) understanding multiple perspectives, (2) contextualizing facts, and (3) connecting information to grades 6-12 students' lives for relevancy. Prerequisites: SECE 3530 and SECE 4320. Frequency: Every Fall.

SECE 4565F Teaching Controversial Topics in Social Studies (3 credits)
This course is designed to develop the knowledge and skills required to teach about controversial topics by examining history/social science curriculum and appropriate instructional methods. Students explore ways to teach about the dangers of indifference and the values of participation in a democracy by confronting the complexities of history. Frequency: Every Fall.

SEE—SEEN—Sec Eng Edu Internship

SEEN 4570 Secondary English Education Internship (12 credits)
This course for Secondary English Education majors offers a comprehensive review and practical application of educational philosophy, methods, and strategies through a 12-week clinical experience (internship) consisting of 450 hours in an English classroom setting that includes coursework and seminars. The central coursework is composed of a 12-week clinical experience, with the concurrent seminar serving as a supportive and reinforcing component. During the seminar sessions, the teacher candidate will explore, in depth, such topics as school board rules, regulations and policies; professional ethics; best practices; national and state standards; teaching strategies; current trends in education; teaching competencies; student assessment; and reflective practices. This course requires candidates to demonstrate professional, pedagogical, and content standards, including ESOL competencies and skills. Frequency: Every Fall.

SEMA—SEMS - Secondary Educ Math

SEMA 4570F Secondary Mathematics Education Internship (12 credits)
This course for Secondary Mathematics Education majors offers a comprehensive review and practical application of educational philosophy, methods, and strategies through a 12-week clinical experience (internship) consisting of 450 hours in a secondary mathematics classroom setting that includes coursework and seminars. The central coursework is composed of a 12-week clinical experience, with the concurrent seminar serving as a supportive and reinforcing component. During the seminar sessions, the teacher candidate will explore, in depth, such topics as school board rules, regulations and policies; professional ethics; best practices; national and state standards; teaching strategies; current trends in education; teaching competencies; student assessment; and reflective practices. This course requires candidates to demonstrate professional, pedagogical, and content standards, including ESOL competencies and skills. Frequency: Every Fall.

SESS—Secondary Edu Social St

SESS 4570 Secondary Social Studies Education Internship (12 credits)
This course for Secondary Social Studies Education majors offers a comprehensive review and practical application of educational philosophy, methods including NCSS 10 standards, and strategies through a 12-week clinical experience (internship) consisting of 450 hours in a social studies classroom setting that includes coursework and seminars. The central coursework is composed of a 12-week clinical experience, with the concurrent seminar serving as a supportive and reinforcing component. During the seminar sessions, the teacher candidate will explore, in depth, such topics as school board rules, regulations and policies; professional ethics; best practices; national and state standards; teaching strategies; current trends in education; teaching competencies; social studies student assessment; and reflective practices. This course requires candidates to demonstrate professional, pedagogical, and content standards, including ESOL competencies and skills. Frequency: Every Fall.
SOCL—Sociology

SOCL 1020 Introduction to Sociology (3 credits)
This course is concerned with the nature and needs of people, their relationships to their societies, and the manner in which they govern those relationships by establishing groups and institutions, engaging in social processes and bringing about social change. Special emphasis will be placed on culture in the United States and the impact of technology on the modern person. Frequency: Every Fall and Winter.

SOCL 2000 Introduction to Social Work (3 credits)
This course covers the basic theoretical and professional approaches to general social work in society. The class includes examination of social justice issues and social welfare policies, as well as the role of social workers among different populations and in various settings. Prerequisite: SOCL 1020. Frequency: Every Fall.

SOCL 2030 Medical Sociology (3 credits)
The course uses sociological concepts, perspectives and research methods to develop an understanding and awareness of how social, cultural, and behavioral factors influence health, illness and healthcare. Students will study the explanations and theories relating to the distribution of diseases among various population groups, the behaviors or actions taken by individuals to maintain, enhance or restore health or cope with illness, disease and disability. Prerequisite SOCL 1020. Frequency: Even Year Fall.

SOCL 2100 Sociology of Sexuality (3 credits)
This course reviews the sociology of sexuality from a socio-historical perspective. Among the topics to be discussed are the theoretical approaches to sexuality, the making of sexual identities, the relationship between sexuality and social institutions, sexual politics, and ethics. Prerequisites: SOCL 1020. Frequency: Every Fall and Winter.

SOCL 2130 Sociology of the Family (3 credits)
Contemporary patterns of marriage and family living. Approaches to effective living together in family units. Covers both adult and parent-child relationships. Emphasis on communication, supportiveness, and contingency management. Frequency: Every Fall and Winter.

SOCL 2200 Ghana: Through a Sociological Lens (3 credits)
This course will help students to develop ?intercultural competence? by expanding their knowledge, experience and understanding of the diversity of cultures, and at the same time, the interconnectedness of these cultures. Learning and experiencing other cultures are necessary preparations for life in our thoroughly globalizing world. Students in this course will travel to Ghana, a country located in West Africa, on a study abroad trip. Ghana’s history, unique features and conditions make it an ideal location for a study abroad program. Within the African continent Ghana stands out for its unique sociocultural and historical location. The first sub-Saharan country in Africa to gain its independence [in 1957], Ghana is currently one of the most peaceful and stable democracies and rapidly growing economies in Africa. Furthermore, Ghana, formerly called the Gold Coast has an intriguing colonial history, a rich cultural heritage and offers an example of a post-colonial African society with a seamless transition between tradition and modernity. Also, Ghanaian people are noted for their warmth, hospitality, and peaceful and easy going attitudes. Visiting Ghana will offer students the opportunity to explore and experience first-hand the rich diversity of Ghana’s cultural heritage through their direct interaction with the people and visits to several historical, geographical and cultural sites. More important, visiting a country in which modern forms of living and indigenous traditions co-exist, will further enhance students? understanding of the dynamics of social and cultural change. Prerequisite: None. Frequency: Odd Year Winter.

SOCL 2250 Social Theory (3 credits)
This course concentrates on the historical development of sociological theory with special reference to its European origins. It will also provide a comparative study and critique of various theoretical accounts on the rise and of the transformations of modern society in the 19th and 20th centuries. Selected topics include the individual, society, and polity; economy, class, and status; organization and ideology; religion and society; moral and instrumental action. Prerequisite: SOCL 1020. Frequency: Every Fall.

SOCL 2510 Social Problems (3 credits)
Focuses on a number of contemporary social problems, analyzing causative factors and exploring alternative solutions. Examines the role of community service agencies in the improvement of some of these problems. Prerequisite: SOCL 1020. Frequency: Every Fall and Winter.

SOCL 2600 Sociology of Sport (3 credits)
This course will use the investigative tools of sociology to explore the myths and realities of sport, with a particular focus on contemporary American society. It will attempt to answer such questions as: Do sports “build character”? Is “amateurism” a myth? Should professional athletes be paid exorbitant sums of money? Are there elements of racial and sexual prejudice in sports? Do governing bodies exploit athletes? What is the role of athletics in society? Do our established athletic (and societal) institutions serve this purpose? Do sports provide a valid means of upward mobility? Should professional athletes be considered role models? What tools are available to assess the frequency of drug use in sports? Prerequisite: SOCL 1020 Frequency: Odd Year Winter.

SOCL 3000 Research Methods in the Social Sciences (3 credits)
Introduction to qualitative research designs commonly used in the social sciences. Discussion of data collection methods such as participant observation and interviewing, focus groups, case studies and ethnographies. Prerequisites: SOCL 1020 or ANTH 1020 Frequency: Every Winter.

SOCL 3150 Social Movements (3 credits)
This course examines how and why people attempt to bring about social change as well as forces that oppose social change. Various theoretical viewpoints will be used for analysis. Concentration is on twentieth and twenty-first century social movements from case study perspectives. Prerequisite: SOCL 1020. Frequency: Odd Year Fall.

SOCL 3250 Social Theory (3 credits)
This course concentrates on the historical development of sociological theory with special reference to its European origins. It will also provide a comparative study and critique of various theoretical accounts on the rise and of the transformations of modern society in the 19th and 20th centuries. Selected topics include the individual, society, and polity; economy, class, and status; organization and ideology; religion and society; moral and instrumental action. Prerequisite: SOCL 1020. Frequency: Every Fall.

SOCL 3350 Gender, Society, and Culture (3 credits)
This course examines women and men in the context of society and culture to ascertain what gender means and how gender plays a role in everyday lives and social institutions. Gender will be examined in regard to various areas including: relationships, work, economy, education, media, justice, deviance, politics, religion, and health. Prerequisite: SOCL 1020 or ANTH 1020. Frequency: Every Winter.

SOCL 3500 Race and Ethnicity in the U.S. (3 credits)
This course covers race and ethnic divisions, discrimination, conflict and cooperation. Further, it explores the impact of global processes on race and ethnicity in the United States. There will be
a comparison of US racial and ethnic patterns to other countries. Prerequisite: SOCL 1020. Frequency: Every Fall.

SOCL 3600 Environmental Sociology (3 credits)
This course examines the relationships between societies and the physical environment in the U.S. and at the global level as well as the ways in which environmental problems are also social problems. It will explore materialism, technology, development, population, and environmental activism and attitudes including the pivotal role that social inequality plays in relation to environmental problems. Prerequisites: SOCL 1020 or ENVS 1100 or ENVS 1200. Frequency: Every Fall and Winter.

SOCL 4010 Lesbian, Gay, Bisexual, and Transgender Cultures (3 credits)
This course examines topics in lesbian, gay, bisexual, and transgender cultures from theoretical, historical and political perspectives. Topics might include an examination of the essentialist versus constructionist debates and their respective implications, sex policing, political resistance, and the politics of AIDS. Prerequisite: SOCL 1020. Every Winter.

SOCL 4880 Senior Seminar (3 credits)
"Students will analyze and integrate information from a variety of sub-disciplines within sociology. Topics may include, but are not limited to, sociological perspectives on race/ethnicity, gender, environment, religion, medicine, deviance, sexuality, and family. Each seminar will have a focal theme that will require students to develop and use their sociological imagination, as well as apply knowledge from prior courses and experiences. This course is presented as a capstone experience, therefore students with advanced standing within the sociology major will benefit the most from the seminar. Prerequisites: SOCL 3000 or SOCL 3200. Frequency: Every Fall and Winter."

SOCL 4950 Internship in Sociology (1-3 credits)
A 10-20 hour per week, paying or nonpaying work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of academic director. Frequency: Every Fall and Winter.

SOCL 4950A Internship A in Sociology (1-3 credits)
A 10-20 hour per week, paying or nonpaying work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of academic director. Frequency: Every Fall and Winter.

SOCL 4950B Internship B in Sociology (1-3 credits)
A 10-20 hour per week, paying or nonpaying work experience for 16 weeks (or more) in the student’s major area of study. Consult academic division for specific details and requirements. Prerequisites: cumulative GPA of 2.5 or higher, completion of 36 or more credit hours, and permission of academic director. Frequency: Every Fall and Winter.

SOCL 4990 Independent Study in Sociology (1-6 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Frequency: Every Fall and Winter.

SOCL 4990A Independent Study in Sociology A (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: Written consent of instructor and division director. Frequency: Every Fall and Winter.

SOCL 4990B Independent Study in Sociology B (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: Written consent of instructor and division director. Frequency: Every Fall and Winter.

SOCL 4990C Independent Study in Sociology C (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: Written consent of instructor and division director. Frequency: Every Fall and Winter.

SOCL 4990D Independent Study in Sociology D (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: Written consent of instructor and division director. Frequency: Every Fall and Winter.

SPAN—Spanish

SPAN 1210 Elementary Spanish I (3 credits)
Essentials of Spanish language with emphasis on grammar, vocabulary, writing, and oral skills. This course is the first of a two-part introductory series designed to meet the needs of students with little or no formal background in Spanish who are pursuing a career in a health-related profession. It will introduce students to the necessary vocabulary, medical terminology, as well as useful phrases and pertinent grammatical structures needed to communicate at a basic level with Spanish-speaking patients and their loved ones in medical and clinical encounters. Special emphasis will be placed on developing a cultural understanding of medicine and illness in the Spanish-speaking world, as well as on acquiring oral, listening, writing and reading skills in order to prepare students to effectively communicate essential information in real-world contexts. Not open to native speakers or heritage learners. Frequency: Every Fall.

SPAN 1210 Elementary Spanish II (3 credits)
Essentials of Spanish language with emphasis on grammar, vocabulary, writing, and oral skills. Not open to native speakers. Prerequisite: SPAN 1210 or SPAN 1211 or a Spanish Placement Exam score of 60-75. Frequency: Every Fall and Winter.

SPAN 1221 Elementary Spanish for Health Professionals I (3 credits)
This course is the second of a two-part introductory series designed for students with a basic familiarity of Spanish fundamentals pursuing a career in health care. It will present students with additional vocabulary and medical terminology, as well as useful phrases and grammatical structures needed to communicate at an elementary high level of Spanish with patients and their loved ones in medical and clinical encounters. Special emphasis will be placed on developing a more in-depth cultural understanding of medicine and illness in the Spanish-speaking world, as well as on sharpening existing oral, listening, writing and reading skills in order to prepare students to effectively communicate essential information in real-world contexts. Prerequisite Span 1211: Elementary Spanish for Health Professionals I. Not open to native speakers or heritage learners.

SPAN 2210 Intermediate Spanish I (3 credits)
Intermediate Spanish I: Readings in Spanish literature and culture. Study of Spanish idioms and syntax. Further development of oral and written Spanish. Not open to native speakers. Prerequisite: SPAN 2210 or SPAN 2211 or a Spanish Placement Exam score of 95 or above. Frequency: Every Fall.

SPAN 2220 Intermediate Spanish II (3 credits)
Continuation of SPAN 2210: Readings in Spanish literature and culture. Study of Spanish idioms and syntax. Further development of oral and written Spanish. Not open to native speakers. Prerequisite: SPAN 2210 or a Spanish Placement Exam score of 86 and above. Frequency: Every Winter.
SPAN 2350 Spanish for Heritage Learners (3 credits)
This intermediate level course is designed for students who have had little or no formal instruction in Spanish, but who, because of their exposure to the language via their familial ties or previous social exposure, can understand much of casual spoken Spanish or can passively understand the language, but may not speak it or write it themselves. The focus of the course is to build upon their knowledge and develop formal speaking, reading and writing skills. Frequency: Every Fall and Winter.

SPAN 3000 Conversation and Composition (3 credits)
A course for students with intermediate-level Spanish reading and writing competency who wish to increase their oral and written competency in the language. Prerequisite: SPAN 2220 or SPAN 2350 or a Spanish Placement Exam score of 93 or above. Frequency: Every Year Fall.

SPAN 3200 Business Spanish (3 credits)
Introduces business terminology and usage to develop fluent oral and written communication in business and professional settings. Special attention is given to understanding the cultural context for conducting business in both Spain and Latin America. Group projects, class discussions, oral and written work all in Spanish. Prerequisite: SPAN 2210 or SPAN 2350 or a Spanish Challenge Exam score of 93 or higher.

SPAN 3240 Introduction to Spanish Literature (3 credits)
An introductory literature course intended to familiarize students with the literature of Spain from the medieval period until the twentieth century to develop skills in literary analysis. Class discussions, readings, oral and written work all in Spanish. Prerequisite: SPAN 2220 or SPAN 2350 or a Spanish Placement Exam score of 93 or higher. Frequency: Every Year Winter.

SPAN 3250 Introduction to Latin American Literature (3 credits)
An introductory literature course intended to familiarize students with the literature of Latin America through selected readings in all genres and to develop skills in literary analysis. Class discussions, readings, oral and written work all in Spanish. Prerequisite: SPAN 2350 or SPAN 3000 or a Spanish Placement Exam score of 93 or higher. Frequency: Odd Year Fall.

SPAN 3300 Spanish for Health Professions (3 credits)
This course focuses on intermediate-level Spanish grammar and vocabulary designed to help current and future health care professionals communicate with Spanish-speaking patients and their families. Students will also learn about the cultural context for discussing medical issues in both Spain and Latin America. Prerequisite: SPAN 2210 or SPAN 2350 or a Spanish Placement Exam score of 93 or higher. Frequency: Every Year Fall and Winter.

SPAN 3400 Spanish for Legal Professions (3 credits)
This course introduces legal terminology and usage to develop fluent oral and written communication in legal and professional settings. Special attention is given to understanding a variety of major cultural complexities that envelop the law and communication when working with a Hispanic population. Students will be required to translate short legal documents (cases and studies) and interpret through role playing. Group projects, class discussions, oral and written work are all in Spanish. Prerequisite: SPAN 2220 or SPAN 2350 or a Spanish Placement Exam score of 93 or higher. Frequency: Every Year Winter.

SPAN 3740 Spanish Culture (3 credits)
This course is an introduction to the political, social, economic, and cultural history of Spain from its earliest origins to the present. Class discussions, readings, oral and written work all in Spanish. Prerequisite: SPAN 2220 or SPAN 2350 or a Spanish Placement Exam score of 93 or above. Prerequisite: SPAN 2220 or SPAN 2350. Frequency: Odd Year Fall.

SPAN 3750 Latin American Culture (3 credits)
This course is an introduction to the political, social, economic, and cultural history of Spanish-speaking Latin America from pre-Colombian times to the present. Class discussions, readings, oral and written work all in Spanish. Prerequisite: SPAN 2220 or SPAN 2350 or a Spanish Placement Exam score of 93 or above. Frequency: Every Year Fall.

SPAN 4900 Special Topics in Spanish (3 credits)
An in-depth study of a period, an author or a literary genre in the Spanish language. Class discussions, readings, oral and written work all in Spanish. May be repeated once for credit, if content changes, and with written consent of division director. Prerequisite: one 3000-level SPAN course. Frequency: less than once every two years.

SPAN 4990 Independent Study in Spanish (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisites: One SPAN course and COMP 2000, COMP 2010 or COMP 2020 or COMP 2000H. Frequency: Every Fall and Winter.

SPCH—Speech

SPCH 1010H Public Speaking Honors (3 credits)
Training and practice in the fundamentals of public speaking, including audience analysis, topic development, research, organization, language use, and delivery. Honors students only. Frequency: Infrequent, less than every two years.

SPCH 2000 Fundamentals of Human Communication (3 credits)
This course surveys major concepts, theories, and research in the study of human communication. The course assists students in developing knowledge and skills in the development of their own communication competence. The course covers basic human communication processes in the contexts of interpersonal, group/team, and public communication. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Winter.

SPCH 2020 Argument and Debate (3 credits)
Training and practice in fundamentals of oral argumentation, including methods of obtaining and organizing materials, delivery, and audience analysis, with an emphasis on researching evidence and constructing and refuting an argument in a debate format. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall and Winter.

SPCH 3120 Speech Communication for the Professions (3 credits)
Emphasis on public communication skills required of the person in business and/or professional settings. Topics include business interviews, public speaking, presentation aids, listening, team communication, and cultural diversity in the workplace. Frequency: Odd Year Winter.

SPT—Sport and Recreation Mgt

SPT 1050 Introduction to Sport and Recreation Management (3 credits)
This course will examine the sport industry through the perspective of a sport and recreation manager. Sport management principles in the areas of sport marketing, finance, facility and event management, risk management, popular culture, and sport sociology will be introduced within the framework of professional, collegiate, recreational, high school, and youth sports. Every Fall and Winter.

SPT 2050 Sport in Popular Culture (3 credits)
Examines sport in today's popular culture, this includes music, film, television, advertising, fashion, toys, magazines, and cyberspace. Through critical analysis the connection between sport, popular culture and issues of race, gender, sexuality, censorship, and social class will be analyzed and discussed. Frequency: Every Winter.
SPT 2075 Intro to e-Sports Management (3 credits)
This course introduces students to the business side of the e-Sport industry and the roles and managers play in it. Best practices in e-Sport management will be examined through current articles and case studies. The course will focus on current issues in the area of finance, legal & ethical, marketing, and event operations. Career opportunities in e-Sport management will also be explored.

SPT 2150 Sport in Society (3 credits)
Studies the impact sport has on our society. The course examines the different levels of sport and emphasizes issues related to economics, education, race, gender, youth sports, social mobility, violence, and deviance. Frequency: Fall - Even Years.

SPT 2350 Ethics in Sport and Recreation Management (3 credits)
This course examines morality and ethical issues pertaining to sport. Topics include sportsmanship, fan behavior, performance-enhancing drugs, drug testing, gender equity in sport, violence on and off the field, and youth sport participation. Frequency: Every Fall.

SPT 2950 Sport and Recreation Practicum (3 credits)
This course is designed to give students the opportunity to gain practical experience with a sport or recreation organization. Allowing the student to experience first hand what it is like to work in the industry. Students must work 75 hours within one academic term (16 weeks). Prerequisites: SPT 1050 and Instructor Approval. Frequency: Every Fall and Winter.

SPT 3150 Facility and Event Management (3 credits)
This course studies the guidelines and principles of managing sport and recreation events and facilities. Topics include event logistics, critical planning techniques, negotiations, funding, and facility design, operation, and maintenance. Frequency: Winter - Even Years.

SPT 3425 Public Relations in Sport (3 credits)
Studies the guidelines and principles of public relations in sport and recreation. Topics include communication, mass media, interviewing, media formats, and publication design. Frequency - Odd Years.

SPT 3550 Issues in Sport Finance (3 credits)
This course will examine current financial issues in the sport industry; topics include cost-benefit analysis of sport franchises to cities, team acquisitions and budgets, sports franchises valuation, sport facility investment, economic impact of stadiums and facilities, financial impact of college sport teams on higher education, and the financial impact on fans throughout the years. Frequency: Fall - Odd Years.

SPT 3650 Sport Promotions and Sponsorship (3 credits)
This course will examine sport marketing principles and strategies focused around sport promotions throughout the different levels of the sport industry. The emphasis will be on the development of critical thinking, decision making, and communication skills through real world sport marketing applications. The course will also provide students with the opportunity to analyze sponsorships in sport and the key issues surrounding sport sponsorship management. Frequency: Winter - Even Years.

SPT 3900 Sport and Recreation Internship (3 credits)
The Huizenga College internship fosters learning through the application of classroom theory in the workplace. During the course, the student also focuses on practical career skills and personal professional goals with individual guidance from the professor. The minimum work requirement is 180 hours during one semester (16 weeks). Contact Academic Advising for registration. ACADEMIC REQUIREMENTS: good academic standing, GPA of 2.5 or higher, and completion of at least 36 credit hours. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall, Winter and Summer.

SPT 3910 Special Topics in Sport & Recreation Management (3 credits)
Topics in sport and recreation management that are not included in a regular course offerings. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Frequency: Upon request and see academic department chair.

SPT 3925 The Business of College Sports (3 credits)
This course examines the business side of college sports. Topics include the formation and history of college sports, the basics of the NCAA, athletic conferences, and university athletic departments, as well as current issues involving student-athletes, college coaches, and financial issues that impact big-time college sports. Frequency: Every Fall - Even Years.

SPT 3926 The Business of e-Sports (3 credits)
This course examines the business side of college sports. Topics include the formation and history of college sports, the basics of the NCAA, athletic conferences, and university athletic departments, as well as current issues involving student-athletes, college coaches, and financial issues that impact big-time college sports. Frequency: Every Fall - Even Years.

SPT 3955 Risk Management in Sport (3 credits)
This course focuses on the principles of risk management in sport. Specifically, issues of negligence and tort law, risk identification and mitigation, and ethical issues relative to supervision of employees and athletes will be discussed. Frequency: Every Winter - Odd Years.

SPT 4675 The Business of e-Sports (3 credits)
This course will focus on the business functions and activities that are vital for any e-Sport franchise. This includes but is not limited to monetizing e-Sports, e-Sport marketing, the financial and economic impact of e-Sports, e-Sport facilities and event management, e-Sport sales and sponsorships, e-Sport broadcasting and communication, current trends in the e-Sport industry, and exploring opportunities for future growth and expansion within and outside the industry.

SPT 4850 Seminar in Sport and Recreation Management (3 credits)
A capstone course for senior sport and recreation management majors. Students will examine trends in the industry, career paths, and discuss current topics in sport and recreation. Prerequisites: SPT 1050, Senior Standing, and SPT Faculty approval. Frequency: Every Fall.

SPT 4910 Research Study in Sport and Recreation Management (3 credits)
The student selects and independently carries out library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisites: To be determined by the faculty and department chair. Frequency: Upon request and see academic department chair.

SPT 4950 Sport and Recreation Management Internship (12 credits)
A supervised work placement for a period of 16 weeks in the student’s major area of study. A minimum of 420 hours is required. There is also a classroom component for this course. Prerequisites: cumulative GPA of 2.5 or higher, completion of 36 or more credits within Major Requirements and permission from SPT faculty. Sport and Recreation Management Majors Only. Frequency: Every Fall and Winter.

SPT 4951 Sport and Recreation Internship (6 credits)
A supervised work placement for a period of 16 weeks in the student’s major area of study. A minimum of 210 hours is required. There is also a classroom component for this course. Prerequisites: cumulative GPA of 2.5 or higher, completion of 36 or more credits within Major Requirements and permission from SPT faculty. Sport and Recreation Management Majors Only. Frequency: Every Fall and Winter.

SPT 4952 Sport and Recreation Internship (6 credits)
A supervised work placement for a period of 16 weeks in the student’s major area of study. A minimum of 210 hours is required. There is also a classroom component for this course. Prerequisites: cumulative GPA of 2.5 or higher, completion of 36 or more credits within Major Requirements and permission from SPT faculty. Sport and Recreation Management Majors Only. Frequency: Every Fall and Winter.

SPT 4966 Travel Study in Sport & Recreation Management (3 credits)
A travel course that allows students to conduct field research in sport and recreation management. The student travels to a specific area of the world and explores current topics in sport and recreation management. Frequency: Upon request and see academic department chair.

SPT 4995 Independent Study (3 credits)
Provides an opportunity for students to pursue independent study in a specialized area of sport and recreation management. Frequency: Upon request and see academic department chair.
the lenses of business and Sport & Recreation Management. Students will be introduced to the challenges organizations face when working in the specific country of travel. The course is taught using a combination of in-country and pre-arrival lectures, company visits, and presentations.

SPT 4990 Independent Study in Sports & Recreation Management (3 credits)
The student works independently under the guidance of a faculty member to learn more about a subject area for credit. Faculty supervision is provided on an individual basis. Prerequisite: To be determined by the faculty and department chair. Frequency: Upon request and see academic department chair.

TECH—Information Technology

TECH 1110 Technology in Information Age (3 credits)
In this course, students work for mastery of basic computer application skills in file management, word processing, spreadsheet, charting, database, Internet research, and web authoring/publishing. In addition, students acquire a deeper understanding of technology as used by professionals in all information technology fields, current trends, ethical use of technology, and technology management. Frequency: Every Fall and Winter.

TECH 1400 Excel at Spreadsheets (3 credits)
This course introduces a range of intermediate to more advanced Excel topics giving students exposure to the Excel skills necessary to support success in the classroom and workplace. Topics include lists, tables, formulas, functions, pivot tables, and data presentation. Frequency: Every Fall and Winter.

TECH 1500 Programming for Everyone (3 credits)
An introduction to programming as a problem solving technique for all majors and disciplines; no prior programming or advanced mathematics are required. The course focus is on key concepts that sustain everyday technologies and devices including designing and implementing basic computer functions such as sorting, searching, data manipulation, user interaction and game development using the Python language. Frequency: Every Fall and Winter.

TECH 2010 Excel at Spreadsheets (3 credits)
This course introduces a range of intermediate to more advanced Excel topics giving students exposure to the Excel skills necessary to support success in the classroom and workplace. Topics include lists, tables, formulas, functions, pivot tables, and data presentation. Frequency: Every Fall and Winter.

TECH 2020 Programming for Everyone (3 credits)
An introduction to programming as a problem solving technique for all majors and disciplines; no prior programming or advanced mathematics are required. The course focus is on key concepts that sustain everyday technologies and devices including designing and implementing basic computer functions such as sorting, searching, data manipulation, user interaction and game development using the Python language. Frequency: Every Fall and Winter.

TECH 3100 Introduction to Data Science (3 credits)
This course provides a broad overview of the elements of Data Science, focusing on the challenges and methods of working with large data sets. Topics include data collection, management, analysis, visualization, prediction and decision making. Concepts of data science are illustrated through hands-on projects and case studies. Prerequisite: MATH 1040 or Higher. Frequency: Every Fall.

TECH 4890 Special Topics in Information Technology (3 credits)
Topics in advanced information technology that are not included in a regular course offering. Prerequisites may be required. Specific content and prerequisites are announced in the course schedule for the given term. Students may re-enroll for Special Topics covering different content. Frequency: Infrequent: less than once every two years.

TECH 4900 Directed Project (3-8 credits)
Taken in the student’s senior year preferably in their last semester. A major project will be completed by the student under the direction of a faculty member with specific goals agreed on by the faculty member, student and the department chair before enrolling in this course. The project should cover concepts and skills learned in more than one upper division computing course and must be approved by the Computing Department chair. Prerequisites: Senior standing and approval of the project by the department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon chair approval.

TECH 4950 Internship in Technology (1-12 credits)
Information Technology majors who are not already employed can use this course to satisfy the capstone requirement. It can be taken in their senior year preferably in their last semester. An Internship constitutes a relevant work experience for 16 weeks based on a project with specific goals agreed on by the work supervisor, student and the department chair before enrolling in this course. The project should cover concepts and skills learned in more than one upper division computing course and must be approved by the Computing Department chair. Prerequisites: Senior standing, written internship offer, and approval of the job description by the department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Upon chair approval.

TECH 4990 Independent Study in Technology (1-12 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Prerequisite: to be determined by the faculty and department chair. Frequency: Every Fall and Winter.

THEA—Theatre

THEA 1000 The Theatre Arts (3 credits)
This course focuses on the arts of the theatre, including drama, music, dance, and play production, particularly those plays representing major theatrical trends. Frequency: Fall and Winter

THEA 1500 Comedy and Improvisation (3 credits)
This course introduces students to the basic techniques of improvisational theatre, sketch and stand-up comedy. Frequency: Every Fall and Winter.

THEA 2000 Voice and Movement (3 credits)
Study and practice in breathing, phonation, standard speech, text analysis, scansion and cold readings, as well as kinesthetic awareness, warm-up, use of space, stage movement, stage blocking, and stage combat. Frequency: Every Winter.

THEA 2020 Acting I (3 credits)
A performance-oriented course designed to introduce, develop and reinforce fundamental acting skills and techniques. Frequency: Every Fall and Winter.

THEA 2025 Performance for Film and Television (3 credits)
This course focuses on camera performance techniques relevant to film, television, and broadcasting. Frequency: Every Fall.
THEA 2030 Play Analysis (3 credits)
Training and practice in the fundamentals of text analysis for the purposes of theatrical production. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall and Winter.

THEA 2060 Technical Theatre (3 credits)
A laboratory approach to technical theatre with focus on backstage operations, crew assignments, and practical application in actual productions. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Frequency: Every Fall and Winter.

THEA 2101 Theatre Laboratory I (1 credits)
Participation in one or more of NSU’s theatre productions. Assigned duties may include set construction, costume, technical support, acting, directing, management, or administration. Pass/fail only. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

THEA 2102 Theatre Laboratory II (1 credits)
Participation in one or more of NSU’s theatre productions. Assigned duties may include set construction, costume, technical support, acting, directing, management, or administration. Pass/fail only. Prerequisite: THEA 2101. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

THEA 2103 Theatre Laboratory III (1 credits)
Participation in one or more of NSU’s theatre productions. Assigned duties may include set construction, costume, technical support, acting, directing, management, or administration. Pass/fail only. Prerequisite: THEA 2102. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

THEA 2104 Theatre Laboratory IV (1 credits)
Participation in one or more of NSU’s theatre productions. Assigned duties may include set construction, costume, technical support, acting, directing, management, or administration. Pass/fail only. Prerequisite: THEA 2103. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

THEA 2401 Singing Technique (2 credits)
Using the repertoire of musical theatre, this class will examine and practice singing technique including posture, breath management, diction, vowel purity, intonation, tonal quality and resonance. Prerequisite: Permission of program director. Frequency: Every Fall and Winter.

THEA 2402 Singing Musicianship (2 credits)
Using the repertoire of musical theatre, this class will examine and practice musicianship in singing including elements of music theory such as accuracy of rhythm and melody, phrasing, tempo, and dynamics. Prerequisite: THEA 2401. Singing Technique OR permission of program director. Frequency: Every Fall and Winter.

THEA 2500 Healthcare Theatre (3 credits)
Through acting and improvisational activities, students in this class will develop the skills to act as patients, family members, and healthcare providers in simulated performances. Real-life healthcare scenarios will be used to evaluate the communication abilities of students in standardized situations and provide valuable feedback to improve the patient-centered effectiveness of future medical professionals. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Frequency: Fall and Winter.

THEA 3020 Acting II (3 credits)

THEA 3025 Audition Techniques (3 credits)
A performance-oriented course designed to explore audition techniques and career planning for the professional theatre, film, and television industries. The course will focus on monologue selection and performance, cold readings, movement/dance calls, warm-ups and basic audition etiquette and protocol. Prerequisite: THEA 2020. Frequency: Every Fall.

THEA 3040 Lighting Design (3 credits)
This course provides the study of advanced techniques of lighting design, including exploration of various lighting boards, projections, research, and design styles. Students in this course complete a lab component that focuses on practical applications of lighting equipment and light board programming. Prerequisite: THEA 2102. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall.

THEA 3050 Costuming and Makeup (3 credits)
Study of sewing, fabrics, patterns and practical application of costume construction techniques; materials and techniques for stage makeup with emphasis on practical application for theatrical production. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Frequency: Every Winter.

THEA 3060 Scene Design (3 credits)
A study of the fundamental principles and techniques of stage design. Prerequisite: THEA 2060. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Frequency: Odd Fall Year.

THEA 3080 Sound Design (3 credits)
This course provides the study of advanced techniques of sound design, including exploration of various sound boards, digital editing/recording, wireless microphones, and design styles. Students in this course complete a lab component that focuses on practical applications of sound equipment and sound board programming. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Prerequisite: THEA 2060. Frequency: Every Year Fall.

THEA 3200 Theatre History I (3 credits)
This course explores the history of theatre from the origin of performance to the Renaissance. Prerequisite: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Every Fall.

THEA 3250 Theatre History II (3 credits)
This course explores the history of theatre from the Restoration to the present. Prerequisites: COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Odd Year Fall.

THEA 3275 American Musical Theatre (3 credits)
The America Musical Theatre is a unique sub-genre of theatre incorporating contemporary literature, jazz, popular music, rock music, dance and film to reflect and comment on the evolution of society. Through an analysis of the musical theatre canon, this course focuses on contemporary perspectives on race (Hamilton, Wicked), gender and sexual prejudices (Fun Home, Legally Blond), myths (Hadestown, Come From Away), and stereotypes (Book of Mormon, Mean Girls). Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Winter.

THEA 3500 Stage and Production Management (3 credits)
Stage and Production Management: An in-depth look at the management aspects of the theatre. The course will focus on the individual roles of stage manager and production manager and how these roles are applied in performing arts events. Prerequisites: one THEA course; and COMP 1500 or COMP 1500H. Frequency: Every Winter.

THEA 4100 Directing for the Stage (3 credits)
The history of the director, the function of the director, and the examination of theoretical viewpoint, including textual analysis, establishing group work for the director’s approach to production, play selection, analysis, and pattern of auditory and visual elements of production. Directing of a one-act play. Prerequisite: THEA 2020 and completion of 60 or more credit hours. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL. Frequency: Every Winter.

THEA 4101 Singing Artistry (2 credits)
Using the repertoire of musical theatre, this class will examine and develop artistry in singing including elements of musical and dramatic interpretation, communication of the text,
THEA 4102 Singing Mastery (2 credits)
Using the repertoire of musical theatre, this class will examine and practice versatility in singing including elements of various vocal styles and the development of a healthy approach to belting. Prerequisite: THEA 4401 Singing Artistry OR permission of program director. Frequency: Every Fall and Winter.

THEA 4900 Special Topics in Theatre (3 credits)
An advanced course in a particular dramatist, period, or form of theatre. Specific focus to be announced. May be repeated once for credit, if content changes and with written consent of division director. Prerequisites: one THEA course and COMP 2000, 2010, or 2020 or COMP 2000H. Frequency: Upon Request; see academic department chair.

THEA 4930 Senior Seminar (1 credits)
Seminar style course designed to synthesize coursework and performing experience with preparation for a professional career or graduate study in the performing arts. Course topics will include formulation of artistic philosophy, the business of the performing arts, professional development, interview/audition skills, and culminate in a final capstone performance or project. Prerequisite: Completion of at least 90 credit hours and permission of director. Frequency: Every Winter.

THEA 4950 Internship in Theatre (3-6 credits)
Training and practice at a professional theatre or arts venue. Prerequisites: cumulative GPA of 2.5 or higher, completion of 60 or more credit hours, and written consent of division director. Frequency: Every Fall and Winter.

THEA 4990 Independent Study in Theatre (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and division director required. Prerequisites: One THEA course and COMP 2000, 2010 or 2020 or COMP 2000H. Frequency: Upon Request; see academic department chair.

TXX—Taxation
TXX 3110 Federal Taxation I (3 credits)
Examines the fundamentals of individual income taxation. A background of accounting courses is not essential for this course. The course may be of special interest to non business majors. Topics include exemptions, exclusions, and deductions available to the individual. These concepts will aid the student in the preparation of an individual tax return. Prerequisite: ACT 2030. Frequency: Every Fall.

TXX 4110 Federal Taxation II (3 credits)
A study of the income taxation of corporations and their shareholders; partnerships and their partners; and estates and trusts and their beneficiaries. Includes a study of the rights and obligations of the taxpayers in dealing with the Internal Revenue Service. Prerequisites: TXX 3110 and ACT 3050. Frequency: Every Fall.

UABA—Behavioral Analysis
UABA 3010 Introduction to Applied Behavior Analysis (3 credits)
This course will focus on the basic tenets of the science of applied behavior analysis that are the underpinnings of effective teaching strategies. Students will study the philosophy and science of applied behavior analysis, an overview of the areas of ABA and its relation to education and psychology, basic vocabulary and concepts in the field, and strategies for measuring behavior. The course will focus on basic strategies for increasing and decreasing behaviors of students and ethical considerations in the application of ABA in a variety of settings with an emphasis on research of education with children ages birth to 8 years old. Frequency: Every Fall.

UABA 3020 Assessment in Applied Behavior Analysis (3 credits)
This course will expand upon the introductory course to address the selection and implementation of assessments in ABA based on those principles. The selection of interventions and outcome strategies resulting from the assessment process will also be addressed. In addition, focus will be placed on the experimental evaluation of interventions, measurement of behavior, and displaying and interpreting data using single-subject and small group designs. Assessment choices and procedures will be evaluated for practical application in educational setting with children ages birth to 8 years old. Frequency: Every Fall.

UABA 3030 Intervention in Applied Behavior Analysis (3 credits)
This course will focus on intervention strategies for increasing skills and decreasing challenging behaviors with young children (birth to 8 years of age) in educational settings and with families. Focus will be placed on the effects of systems on intervention efforts, the ethical practice of applied behavior analysis within systems, and creating systems that support behavior change. Evaluation of research on intervention with children for both increasing and decreasing behaviors will be evaluated to help students become informed consumers of research-based information. Frequency: Every Winter.

UABA 3040 Positive Behavioral Support for Children with Challenging Behaviors (3 credits)
Positive Behavioral Support (PBS) is the application of ABA principles within natural contexts and from a systems perspective. This course will focus specifically on addressing challenging behavior for children in the home and classroom settings. Students will learn to assess challenging behaviors using functional assessments, select and implement interventions based on those assessments within the natural environment, and to train families and staff members to implement behavioral programming to support children whose behavior often limits their opportunities for education and childcare services. Frequency: Every Winter.

UNIV—University
UNIV 1000 First-Year Experience (3 credits)
This course introduces first-year students to fundamental expectations of college learning and the range of opportunities and experiences both in and outside the classroom that Nova Southeastern University provides. The course promotes a pathway to student success by fostering academic inquiry in various academic disciplines and knowledge of essential resources that facilitate a successful transition to college life. This course develops the foundation that serves as a pathway to graduation and a thriving professional career. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter

WRIT—Writing
WRIT 2100 Introduction to Professional Writing (3 credits)
This course provides an introduction to the writing and research practices active in the field of professional writing. Students will examine the various approaches to language, writing, and research active in professional communities and explore them in their own original works. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

WRIT 2200 Civic and Community Writing (3 credits)
This course examines the relationships between academic and community writing. Students will explore the history of literacy practices and civic discourses. Students engage in service learning projects in their local community by partnering with local organizations to address local needs. Prerequisite: COMP 1500 or COMP 1500H.

WRIT 2400 Style and Grammar (3 credits)
This course examines the history and practice of written style and grammar, highlighting the differences between the two traditions. Students will study word choice, sentence structure, and paragraphing in texts of varying genres. Drawing on analyses of written texts, students will learn...
to apply the stylistic and grammatical principles of deviation and convention, respectively, to their own writing. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

WRIT 2500 Introduction to Creative Writing (3 credits)
This course examines the fundamentals of writing poetry and fiction, introducing students to creative writing techniques and strategies. Students will read works of fiction and poetry by published authors and write their own works using various models and styles. Through workshopping their original poetry and fiction, students will learn the importance of finding one’s voice and the necessity of revision in the writing process. Prerequisite: COMP 1500 or COMP 1500H. Frequency: Every Fall.

WRIT 3020 Poetry Workshop (3 credits)
An examination of the fundamentals of writing poetry, learning to use metrical language and seeking the universal in individual human experience. Students will read a wide variety of contemporary poems and will attempt to develop their own poetic language. Prerequisite: COMP 2000 or COMP 2000H. Frequency: Every Winter.

WRIT 3030 Fiction Workshop (3 credits)
An examination of the fundamentals of writing fiction, learning to use the techniques and tools of the fiction writer. Students will read a variety of fictional works and will attempt to develop their own voices and narrative style. Prerequisite: COMP 2000 or COMP 2000H. Frequency: Even Winter.

WRIT 3150 Business Writing (3 credits)
This course focuses on techniques for effective communication in global business environments. Students learn various strategies for writing letters, memos, proposals, electronic communication, and other types of writing in the workplace. Prerequisite: COMP 2000 or COMP 2000H or COMP 2020. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

WRIT 3160 Scientific and Technical Writing (3 credits)
This course focuses on developing techniques for writing reports, descriptions, instructions, graphic arts, and other types of writing in formats appropriate to the scientific or technical working world. Students will practice explaining technical issues to various audiences, analyze technical objects and processes, and write reports, technical manuals, and user instructions. The course will emphasize writing understandable, concise language, integrating text and graphics, and designing documents. Prerequisite: COMP 2000 or COMP 2020 or COMP 2000H. Frequency: Every Year Winter.

WRIT 3200 Writing for Popular Culture (3 credits)
This course introduces students to professional writing for popular culture through the study and creation of texts such as zines, blogs, and fan sites. Students will identify various rhetorical features used by communities of writers in the public sphere, paying careful attention to theories of the production and consumption of popular culture texts. Prerequisite: COMP 2000 or COMP 2000H or COMP 2020. Frequency: Odd Year Winter.

WRIT 3350 Document Design and Publishing (3 credits)
This course focuses on the skills necessary to produce well-designed documents for private and commercial publication. Students will analyze various publication models and produce print-ready documents for various professional or commercial audiences. Prerequisite: COMP 2000 or COMP 2000H or COMP 2020. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Odd Year Winter.

WRIT 3400 Language and Society (3 credits)
This course examines variables such as class, ethnicity, gender, geography, technology, and history that influence language behavior and language change. Prerequisite: COMP 2000 or COMP 2000H or COMP 2020. Frequency: Even Year Fall.

WRIT 3600 Writing Center Studies (3 credits)
The course provides students with theoretical and experiential grounding in peer conferencing. Students will study writing center theory and practice, and they will apply such strategies in conferences with writers. Prerequisite: COMP 2000 or COMP 2000H or COMP 2020. Frequency: Every Winter.

WRIT 4000 Writing for Technologies (3 credits)
This course focuses on emerging forms of writing produced with, focused on, and distributed through contemporary mobile and web-based technologies. Students in this course will closely examine and practice the theories and approaches to writing within such digital environments and networks. Prerequisite: COMP 2000 or COMP 2000H or COMP 2000H. Frequency: Every Year Winter.

WRIT 4100 Advanced Research Methods (3 credits)
This course focuses on designing, conducting, and analyzing research projects using qualitative and quantitative methods. Prerequisite: COMP 2000 or COMP 2000H or COMP 2000H. Frequency: Every Winter.

WRIT 4600 Composition and Rhetoric (3 credits)
This course introduces students to the discipline of Composition and Rhetoric through the key concepts, philosophies, and frameworks involving teaching, theory, and research. Students will learn how theories and practices affect classroom settings and their own writing processes. Prerequisite: COMP 2000 or COMP 2000H or COMP 2020. Frequency: Odd Year Fall.

WRIT 4800 Professional Writing Capstone (3 credits)
Students will undertake a significant project reflecting their area of professional writing interest. Prerequisite: completion of at least 90 credit hours and permission of department chair. Frequency: Every Fall.

WRIT 4900 Special Topics in Writing (3 credits)
Topics, which vary from year to year, will focus on specialized genres and techniques in writing. Topics may include memoir/autobiographical writing, travel writing, creative non-fiction writing, and screenwriting. Specific focus to be announced. May be repeated once for credit, if content changes and with department approval. Prerequisite: one WRIT course above the 2000-level. Frequency: Every Fall and Winter.

WRIT 4950 Internship in Writing (1-6 credits)
A minimum of 80 hours (per credit hour earned) of field or work experience in the student’s major area of study. Consult academic department for specific details and requirements. Prerequisites: permission of department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 1 ExEL unit. Frequency: Every Fall and Winter.

WRIT 4950A Internship in Writing (1-6 credits)
A minimum of 80 hours (per credit hour earned) of field or work experience in the student’s major area of study. Consult academic department for specific details and requirements. Prerequisites: permission of department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 2 ExEL units. Frequency: Every Fall and Winter.

WRIT 4950B Internship in Writing (1-6 credits)
A minimum of 80 hours (per credit hour earned) of field or work experience in the student’s major area of study. Consult academic department for specific details and requirements. Prerequisites: permission of department chair. Experiential Education and Learning (ExEL): Successful completion of this course satisfies 2 ExEL units. Frequency: Every Fall and Winter.

WRIT 4990 Independent Study in Writing (1-3 credits)
The student selects, and carries out independently, library and/or empirical research. Faculty supervision is provided on an individual basis. Written consent of instructor and
department chair required. Prerequisites: One WRIT course and COMP 2000, COMP 2020 or COMP 2000H. Frequency: Every Fall and Winter.
